DRAK ULTIMATUM

HURL DEFIANCE AT THOSE WHO WOULD STOP TURKISH PLANS.
NATION'S ARMIES HAVE ROUTED GREEK FORCES

Will Not End War Until After Total Occupation of Asia Minor.
LONDON, Sept. 9.—A wireless dispatch from Smyrna reports the surrender of the town to the Turks, according to a communication received by the Exchange Telegraph Co.

LIFE OF THE WIFE OF NATION'S CHIEF HANGS IN BALANCE

WASHINGTON, Sept. 9.—The condition of Mrs. Harding was declared to be "still critical" in a bulletin issued by General C. E. Sawyer, the family physician, at 1:30 o'clock tonight.
Just before the formal bulletin was issued, however, Secretary Christian upon leaving his office in company with Rear Admiral Cary E. Grayson stated to newspaper correspondents that "all signs still are very distressing."

ELEVEN ARE INJURED WHEN A KATY TRAIN BUMPS AUTOMOBILE

GREENVILLE, TEXAS, Sept. 9.—One woman and two children were seriously injured and eight others injured when the Texas Special of the Missouri, Kansas & Texas railroad struck the automobile in which the 11 persons were riding.

WEATHER FORECAST FOR COMING WEEK

WASHINGTON, Sept. 9.—Weather outlook for the week beginning Monday: West coast states generally fair except widely scattered thunderstorms, normal temperatures.

Call Convention to Nominate Candidate To Oppose Mayfield

JACKSON, CALIF., Sept. 9.—Jackson mingled hope and fear tonight as it closed its thirteenth day of waiting for the release—dead or alive—of the 47 miners imprisoned in the Argonaut gold mine here.
Hope was based on two elements. First was the report of scientists that analysis of the gas from the mine had failed to reveal any sign which would show even one death had occurred in the mine.

RESCUE WORKERS WORK FAITHFULLY TO SAVE MINERS

JACKSON, CALIF., Sept. 9.—Judge Harry Miller of Dallas today issued a call for a state convention of democrats opposed to the election of Earle B. Mayfield to the United States senate.

FORECASTS EARLY RETURN TO WORK BY RAIL SHOPMEN

SAYS FIFTEEN PER CENT WILL BE BACK WITHIN 24 HOURS.
SEPARATE AGREEMENT PLAN TO BE ACCEPTED

By CHARLES R. LYNCH.
United Press Staff Correspondent.
CHICAGO, Sept. 9.—Speculation that 15 per cent of the 400,000 striking railroad shopmen would be back at work within 24 hours after the meeting of the union policy committee here Monday "unless the unions make an unexpected bolt from the leadership of Earl M. Jewell" was contradicted tonight by H. E. Byram, president of the Chicago, Milwaukee & St. Paul railroad.

WILKES BARRE, PA. (Continued)

The hard coal suspension was ended tonight when the tri-district convention voted unanimously to ratify the report of the scale committee, accepting the settlement reached a week ago by operators and skilled mine workers officials at Philadelphia.

COUNTY WILL SOON HAVE 6 MILES OF IMPROVED CONCRETE ROAD PAVEMENT

Burk Burnett, on Labor Day, commemorated the completion of the paving of the road to Red River bridge in a fitting manner. Over 10,000 people gathered in the city to help observe the occasion.

The opening of this road marked the completion of Wichita county's road building program of state highways.

Plans for an improved highway system for Wichita county were begun as early as 1916 by the Wichita County Motor Club and a bond issue of \$100,000 was voted in July, 1918, for a system of gravel roads.

Preliminary work was done and construction of the gravel roads began, when conditions imposed by the world war prevented completion of work and construction was halted.

In June 1919 an additional bond issue of \$1,500,000 was carried by a vote of 14 to 1.

Construction work was delayed during 1919 and the greater portion of 1920 due to congestion of traffic on railroads, inability to secure stone and cement, scarcity of open top cars and chiefly by failure to obtain reasonable bids from contractors.

Bids received during 1920 were from \$48,000.00 to \$58,000.00 per mile. Despairing of receiving a reasonable bid and being unwilling to sacrifice the bond money letting construction at such an unreasonable figure, the county authorities decided to construct the roads themselves and not as general contractors for the county, purchasing all necessary building materials.

Contracts for such necessary materials have been entered into from time to time by the county commission with very appreciable saving to the county.

A sub-contract was entered into in the early part of 1921 for the construction of the major portion of the work, with the understanding that contractors would install machinery and labor at the most modern type, such as locomotive cranes for unloading, and industrial railways for hauling materials.

Actual construction was begun on the Wichita Falls-Archer City road in September 1921 and 4.7 miles on the Lake Wichita road completed before January 1st, 1922.

In the early part of 1921 contractor's equipment and plant were moved to the Wichita Falls-Electra road and construction began in earnest. Thirty-two miles of 18 ft. concrete pavement completed in 1921, making a record for square yards or miles by any contractor during the working season, at a saving to Wichita county of at least 10 per cent below the lowest bid received for the work.

This 32 miles of pavement, Texas Highway No. 8, part of the Colorado to the Gulf Highway, from Wichita Falls to the Wilbarger county line passes through Iowa Park and Electra, two thriving towns of Wichita county, in which public celebrations were held as a mark of public approval and appreciation of the completion of paved road, which united them so closely to other cities and towns of the county.

PURE SEED WHEAT WILL MAKE MORE PRICE IS HIGHER

W. E. Oster, agricultural agent of the Fort Worth & Denver Railroad company has prepared the following article on the sowing of wheat:

"Pure strains of seed wheat usually make one bushel more per acre than ordinary scrub or mixed varieties. Mixed wheat sells for two cents less per bushel than pure types. On a 100 acre crop at 15 bushels per acre this is a loss of \$300 for mixed wheat alone. A 100 acre crop sown to good pure seed should yield 1000 bushels of No. 1 wheat.

In such instances, to the firm condition of the seed bed. There are two ways to get land properly settled. One is to plow early and the other is to delay seeding until ground is settled. Late seeding, when made on a firm seed bed is not dangerous. It is loose land that retards growth. On loose land seeding should be delayed to permit the soil to settle well.

"While waiting for the land to get in proper condition see about that pure seed wheat. The writer has supplied the grain men in nearly every town with a list of men who have pure seed wheat for sale. Also consult your county agent."

"Another method of getting greater profit from wheat is to delay sowing until the seed bed is well settled. The best wheat farmers know it is disastrous and almost useless to sow wheat on freshly plowed loose land. Many wheat men demonstrated the value of a well settled seed bed this year on their own farms. The part seeded soon after plowing was very poor, while that sown on a firm seed bed made fair wheat. The difference was due

to the fact that the soil was well settled and the wheat had a firm seed bed. The difference was due to the fact that the soil was well settled and the wheat had a firm seed bed. The difference was due to the fact that the soil was well settled and the wheat had a firm seed bed.

to the fact that the soil was well settled and the wheat had a firm seed bed. The difference was due to the fact that the soil was well settled and the wheat had a firm seed bed. The difference was due to the fact that the soil was well settled and the wheat had a firm seed bed.

New Problems

are arising every day in business and finance; and in the meeting and solving of them, broad experience and matured judgment are of essential importance.

The City National Bank of Commerce counts itself especially fortunate in that its directorate is made up of men representative of West Texas business interests whose diversified connections enables them to bring to the conduct of its affairs a very valuable quality of financial guidance.

When you bank here you are assured of sound counsel and satisfying service.

Cooking with Gas

Because natural gas is concentrated heat, a little of it will do more cooking than most people get out of it.

The short blue flame indicates perfect combustion in cooking. It is not necessary to have this flame around the cooking utensil, but it is advisable to have it close to the utensil.

Governmental Advice

The first two diagrams are from a publication of the United States Department of Mines, and show the correct principle in cooking. Burners should never be more than 1 1/4 inches from the cooking surface.

Then the burners should be kept clean and carefully regulated, both at the valve and in the "mixer." Shutters of the air intake should be so regulated as to give a steadily burning blue flame.

Regulate the Air

The shutters regulate the air taken in. The pressure of the gas through the pipes draws in the required amount. Too little air means imperfect burning, usually evidenced by a yellow flame; too much air may give the same effect.

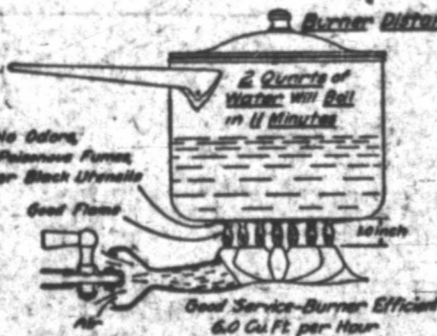

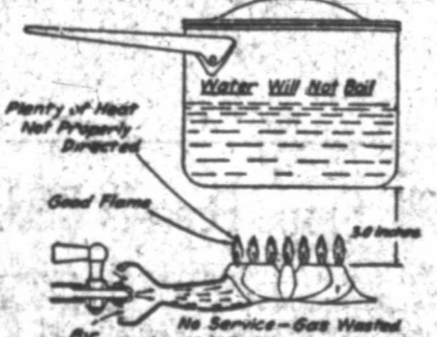

When the gas "blows" it means too much gas for the capacity of the mixer. This can be regulated by the valve.

A little practice will enable you to get a better heat at less cost.

Solid Tops Wasteful

The last diagram shows the effect of a solid top, the heat being deflected away from your cooking and consequently wasted.

Right appliances—skelton or grid tops with the burner not over 1 1/4 inches from the cooking surface—not only give you better service, but cost you less money for gas.

MISSIONARY BISHOPS OF EPISCOPAL CHURCH ELECT NEW OFFICERS

PORTLAND, ORE., Sept. 8.—The missionary bishops representing the 22 missionary districts of the Protestant Episcopal church in continental United States, comprising the council of continental-domestic missionary bishops at a meeting here in connection with the triennial convention in session here today elected officers for the ensuing three years.

Right Rev. Louis C. Sanford, D. of Fresno, Cal., bishop of San Joaquin, was elected president; Right Rev. Frederick H. Howden, D. of bishop of New Mexico, vice-president; Right Rev. William F. Remington, D. of bishop of South Dakota, secretary.

Bishop Theodore P. Thurston, D. of bishop of North Carolina, was elected a member of the executive committee, which includes in addition the president and secretary of the council.

FAIRVIEW SCHOOL BUILDING WILL NOT BE COMPLETED UNTIL OCTOBER 1.

RECORD ENROLLMENTS EXPECTED IN COUNTY

Corps of Teachers Have Signed Contracts and Are Ready to Start Work.

All the country schools in Wichita county with the exception of three will open the year's work Monday morning.

A record enrollment is expected in practically all of the schools and the county officials are expecting the largest number of students this year in the history of the county.

A very strict enforcement of the truancy law is being asked for. A corps of teachers have been employed in the country schools and practically all contracts have been signed.

- The teachers in the county follow: 1. Bacon: Louise Powell. 2. Fairview: W. T. White, Supt. 3. In Porterfield: S. A. Davis, O. D. White, M. R. Turner, Margaret Barker, Leah White, Fannie Muse, Miss Whitcomb, Gladys Lewis, Jake Harris, Mrs. Jake Harris, Hallie Mercer, Willie Mercer, Mary Oatis, Mr. Tase, Mr. Holloway, Miss Hawkins, Miss Love, Marie Strivers. 4. Deep Creek: Maude Brothers. 5. Beaver Creek: I. N. Lee. 6. Valley View: E. R. White, Mrs. E. H. Wolfe, Daley Lee Jones. 7. Pleasant Valley: Norma Rollins. 8. City View: Mrs. C. R. Lovell. 9. Clara: E. W. Cullers, Supt.; J. R. Carter, A. M. Moore, Mr. Porter, Mattie Robinson, Mrs. Gail Dutta, Johnnie Hamer, Amelia Spencer, Miss Nash, May Dorsett, Miss M. Hall. 10. Sunshine: J. P. Kidd and Mrs. J. T. Kidd. 11. Fowlkes: A. B. Corder, Etta Maddry. 12. Lake View: Ethel Morgan. 13. Williams: Mrs. T. W. Williams, Alice Faulkner. 14. Allendale: Virginia Powers. 15. Rockypoint: L. E. Huff. 16. Faircross: Mrs. Anna Lewis. 17. Howard: Tula Gilbert, Gladys Wisdom. 18. Friesberg: Sammie Morgan, Grace Fugitt, Anne Freston. 19. Cashion: W. C. Reddy, Ruby Corder, Ruth Carney. 20. Evert: Mrs. Ethel Minnick. 21. Enterprise: Tom Carpenter, Mrs. Tom Carpenter, Elisabeth Garner. 22. County Line: W. F. Lewis, G. F. Hargrove, Luella Heatley. 23. Barlowe: E. R. Stroud, Zuelma Vender. 24. Cobb: Irene Tyson. 25. Pond Creek: Ruby Banks. 26. Cooper: Dannie Mah Jones.

ENROLLMENTS IN NIGHT SCHOOL ARE SETTING NEW MARK

The public night school promises to be more popular than ever this session. Principal A. K. Frazier said Saturday. School of 40 enrolled Friday night, bringing the total well above the 150 mark, and surpassing the showing made at the beginning of the 1921 session. Classes are offered in a variety of subjects and it is announced that whenever as many as 10 persons apply for instruction in any subject not included in the curriculum, a class will be formed. Classes will start Monday night at 7:15 p. m. During last session the total enrollment was 465, and that mark is expected to be exceeded this year. No tuition is charged, the school being free to all residents of Wichita Falls. Last session the ages of students ranged from 15 and 16 up to middle age.

DALLAS WOMAN INJURED - IN JUMP FROM VIADUCT

DALLAS, Sept. 9.—Mrs. Alice Herron, 34 years old, was injured, probably fatally, when she leaped from the balustrade of the Oak Cliff viaduct into the Trinity river this morning.

What This Buffalo Physician Has Done For Humanity

The picture which appears here of Dr. Pierce of Buffalo, N. Y., was taken in 1916. As a young man Dr. Pierce practiced medicine in Vermont and was known far and wide for his great success in alleviating disease. He early moved to Buffalo and put up in ready-to-use form his Golden Medical Discovery, the well-known tonic for the blood. This strength-builder is made from a formula which Dr. Pierce found most effective in diseases of the blood. It contains no alcohol and is an extract of native roots with the ingredients plainly stated on the wrapper. Good red blood, vim, vigor and vitality are sure to follow if you take this alternative Extract Pierce's Golden Medical Discovery clears away pimples and annoying eruptions and tends to keep the complexion fresh and clear. This Discovery corrects the disordered conditions in a sick stomach, aids digestion, acts as a tonic and purifies the blood. Write Dr. Pierce's Invalids Hotel in Buffalo, N. Y., and receive confidential medical advice without charge. All druggists sell Discovery, tablets or liquid. Send 10c for trial package.

VERNON TOURISTS' CAMPING GROUNDS

By ERIC G. SCHROEDER. VERNON, Sept. 9.—Vernon has established reception parlors in a grove of trees on the west edge of town. There nightly, with soft summer winds furnishing the orchestral accompaniment through the myriad leaves, it holds court for countless travelers vacation bound and homeward returning along the Colorado-Gulf highway. Electric lights offer their brilliance, there are cooling showers for the dual covered and road weary tourists, spacious cook ovens built for hearty meals, quaint little dining-halls, and all the comforts of home. There is running water everywhere and a complete sewerage system. Added to all that, there is the gracious invitation to "come and stay as long as you please." It is Vernon's tourists' camping grounds. Nightly can be found there dozens of travelers who, during many added miles in order to enjoy the hospitality of the open air hospitality. Without exception, say the state bureau vacationists who come from all parts of the country, the accommodations are most complete to be found from the Gulf to Danvers, and the surroundings as attractive as are offered anywhere. Vernon's camping grounds are the product of the past summer. Local citizens vined under the auspices of the Vernon Tourists' Association, who, after miles of travel under hot Texas sun, failed to find the proper welcome awaiting them here. Under the leadership of the Rotary club, the enterprise of building an open air hotel was got under way. Then came a liberal donation from the chamber of commerce while townpeople were quick to respond with substantial offerings. City water was piped to the fair grounds, a complete system of electric lights installed, shower baths constructed, sewers laid, dining booths built, cook ovens fashioned, and the latch string hung conspicuously on the outside of the door. Only motor vehicles are permitted into the grounds which are kept scrupulously clean at all times. The new accommodations found immediately favor with the scores of travelers who daily pass through the community. On a recent night forty-two were counted within the grounds, and the average closely approximates this figure. Local hotels have not felt an attendant depression on account of the open air hospitality. There is rather an increase in the number of visitors to whom the city is rightly privileged to play host. When the Lee Highway is brought through Vernon, and the circumference appears now very much as a certainty, extensive additions will likely be made to the present camp grounds. An avenue, nearly a quarter of a mile in length, will be run through the center of the grove, and additional conveniences added. Vernon is quietly laying its plans to entertain thousands of visitors as the junction place of two of the greatest arteries of travel in America.

RAIN AT DIVERSION DAM TOTALS 1.85 INCHES IN SUMMER

Less than an inch and two-thirds of rain fell at the site of the diversion dam during the three summer months, the exact precipitation being 1.85 inches, according to the government gages kept at that point. This is below the record for dryness in that section. The rainfall by months was: June, .78 inch; July, .51 inch; August, .56 inch; total, 1.85.

CONSUL TO CHINA IN GRANT ADMINISTRATION FOUND DEAD IN YARD

ST. LOUIS, Sept. 9.—Richard M. Johnson, consul to China in President Grant's administration, was found dead in the yard of Alexander Bros. hospital today. He was about 86 years old, and was found under the window of his room, which was on the second floor of the hospital. He was a former circuit attorney of St. Louis and was a brother of the late Charles E. Johnson, former lieutenant governor of Missouri. Stamps for sale at the Times office. A talk by Frank Kell of Bushpa's prospects and a radio talk by C. M. Verchovic on the Texas-Oklahoma fair will be the chief features of the "civic revival" luncheon scheduled for next Friday at noon at the Kemp.

A number of reservations have already been received and the chamber of commerce requests that all who expect to attend send their reservations in promptly as accommodations are available for only 225 guests.

MILLER-FERGUSON CO. TO START BUSINESS HERE SOON

Miller-Ferguson Dry Goods company is the name of a new mercantile firm for Wichita Falls. Claude Miller of this city and N. A. Ferguson of Sherman, Texas, have organized a corporation and taken over the stocks of the United Bargain Basement and Garment Company in the old Kimberlin basement. Carpenters are now busy remodeling and the New York buyers for the firm are already forwarding new fall merchandise for the sale that will open in next few days. Both Mr. Miller and Mr. Ferguson have spent practically their lives in this line of business and have employed all the former salespeople who are busy soliciting their many friends and old customers to see them.

INCREASE IN REVENUE DECREASE IN EXPENSES FOR TEXAS RAILROADS

AUSTIN, Sept. 9.—Net revenues to Texas railroads for the six months ending June 30, 1922, totaled \$12,123,976, an increase of \$3,811,079 or 4.58 per cent over the corresponding six months in 1921, according to a statement issued today by the state railroad commission. Operating revenues for the period were \$9,161,775, a decrease of 16.99 per cent, and operating expenses \$11,739,239 a decrease of 20 per cent.

Health Restored By Radium

The wonderful curative power of Radium has been known for years. However, the benefits of this precious health-giving substance have in the past been only within the means of the rich. It creates a vigorous circulation of blood, thus relieving congestion, which is the real cause of most diseases. To prove just what this remarkable treatment can do for you, we will send our appliance on trial with the understanding that we will not charge you a cent if it fails to give satisfactory results. This offer is open to any person who has pain of any kind, nerve weakness, high blood pressure, stomach, kidney or liver complaint, bladder trouble, or disease of the lungs or heart. No matter what your ailment or how long you have had it, we will gladly let you try the appliance at our risk. Write today for free literature, giving complete information. Radium Appliance Co., 137 Bradbury Bldg., Los Angeles, Calif.

KRUGER PRODUCER FEATURE OF WEEK IN ELECTRA FIELD

HALLMACK DEEP WELL IN CENTER OF NEW ACTIVITY.

WATER SITUATION IS GROWING MORE SERIOUS

Is Hampering Both Drilling and Pumping Operations in Wichita County Fields.

The water situation throughout the north and central sections of the state has practically tied up the oil industry. The continued dry weather of the past three months has had but shut down the wells in the south Electra pool where the major part of Wichita county's activity is going on...

The Texas Pipe Line company, which shut off the supply a few weeks ago is expected to relieve the situation within the week by furnishing water to their drilling teams from their line from the Beaver Creek station. The Wagner interests are also feeling the effects of the drought and are reported making arrangements to build a dam across Beaver Creek with the view of impounding a supply of water for their drilling and ordinary needs.

A number of tests are on the sand wells to drill in and a few small wells have been completed in the shallow sands in the older leases. The only development of importance during the week was the completion of a good well in the sand at 1475 feet by Sam Kruger and associates in section 13 of the Wagner tract. The top of the pay was encountered at 1475 feet which was barely 100 feet from the well flowed at the rate of 200 barrels for the first 24 hours and has gradually increased and is now producing about 400 barrels, making one of the best wells producing from this depth in the pool. The owners are making arrangements to give their production to the adjoining well and have rigged up for their second test. Several locations have been made in the adjoining acreage and are waiting on the water supply to begin.

New Producers in Young. The most important development for the week in Young county was the finding of the pay on the Cordeiro sand by Pitzer and West at 2200 feet in the Wild Bend section of the Herron field, extending the proven area of this sand two miles to the east of Herron City. With the completion of this well an increased activity is looked for in this territory.

The Hallmack well located about four miles southeast of Graham which came in early in the week making around 1000 barrels from a sand encountered at 4175 feet, has increased its flow and is producing at the rate of 450 barrels daily after penetrating the sand two feet. The second pipe line is being laid to take off this enormous production.

The Fena Cities also finished a good well on the No. 3 B lease Herron tract and it is flowing at the rate of 450 barrels from the sand at 2400 feet. This well lies between the 2375 foot sand found in their No. 2 well and the Merrill-Taylor 2150 foot stratum. The well of McAlister-Moore company which was completed this week has increased the flow to 500 barrels; this well is producing from the 4,500 foot level. Two miles south of Herron City the Toloma Oil company's test on the Graham is flowing at the rate of 500 barrels from the 4500 foot sand.

South Bend Activities. In the South Bend section, a great amount of cleaning out on the older leases is taking place with a number of companies drilling deeper or many wells to more productive sands. The majority of work is being done by the Exxon and North American companies. This section so far has not felt the water shortage to the extent experienced in the other districts.

The district surrounding the Roark well is showing big development and a number of tests are being made in the Roark pay which is in the neighborhood of 2325 feet. The Texas company's No. 1 offset to the big well to the north is still producing over 100 barrels. No. 2 on the same tract is drilling at 2000 feet and No. 3 Jones is rigging up. Production for the week fell off to some extent but is still around 12,000 barrels daily.

New Archer Producers. Activity in Archer county during the week centered in the proven or Texhoma pool in the Metherton and Goss tracts. The Texhoma Refining company completed their 57th producer on the S. M. Goss land and it is good for 200 barrels from the 1500 foot level.

The same company finished a well on the Metherton ranch to the south which is a 20 barrel producer, this is an offset to the Texas company's No. 3 on the Chance tract.

As far as the wells in wildcat territories are concerned the water shortage has practically closed down the entire field.

SAYS FARMERS OF THE COUNTRY WANT TARIFF SCHEDULE AS PROPOSED

WASHINGTON, Sept. 15.—Farmers of the country want the tariff rates proposed by the senate for agricultural products retained in the administration bill, the executive committee of the house farm bloc was reported yesterday by a delegation representing 20 national farm, livestock, dairy, wool and poultry organizations. The house farm bloc leaders were urged to insist that the house accept the senate rates which are now in conference.

The delegation, headed by E. C. Atkeson, representing the national grange, have found 75 per cent of the house members willing to approve the senate rates, according to a statement issued last night.

168 TEACHERS ARE NEEDED FOR CITY'S SCHOOLS THIS YEAR

A total of 168 teachers will be required at the 13 public school buildings of Wichita Falls for the school year which starts Monday. The assignments were announced Saturday, as follows:

CHARGE OUT OF ILL UNOFFICIAL CITY HA REVEAL NO ANSWER ELECTED Hasty Survey Also Said. Friends of the two filed this suit in court in answer to the petition stating that a of the city 25 out of the were sent by paid a poll to the modify ever, by stat made as to v rificated was any part of. It was also of the voters tion day in city showed voted. Whether it by friends of the made a j merely sup indication w contestants pr. The mode i contest cases lawyers inter district jud case in the down his ow in the matti Judge Na that is the procedur is in the meantime a crease in he. It is like one filed by the other by district judge patitions inc same allegi prays.

CHARGE 89 VOTES OUT OF 200 WERE ILLEGALLY CAST

UNOFFICIAL CHECK MADE OF CITY HALL BOX SAID TO REVEAL THESE FACTS

NO ANSWER YET IN ELECTION CONTEST CASES

Hasty Survey of Voters' Lists in Also Said to Show That Seven Negroes Voted.

Friends of the contestees named in the two election contest cases filed this past week in the 7th district court intimated Saturday that answers would be filed in both of the cases, probably the first of the coming week.

One of the men who has been investigating the elections held in several of the boxes not named in the petitions in the contest, stated that a hasty unofficial check of the city hall box revealed that 89 out of the first 200 votes cast were cast by voters who had not paid a poll tax.

He modified his statement, however, by stating that no check was made as to whether exemption certificates were held by the 89 or any part of them.

It was also stated that a personal of the voters lists as kept on election day in two other boxes in the city showed that seven negroes had voted.

Whether these statements of facts by friends of the contestees is to be made a part of the answer is merely supposition as no definite indication was given, either by the contestants themselves or their friends.

The mode of procedure in election contest cases is not prescribed by statute and according to several attorneys interested in the contest, the district judge in whose court the case is filed has jurisdiction to lay down his own method of procedure in the matter.

Judge Napier stated Saturday that he had not made a study of the procedure as yet, but would do so in the near future, and in the meantime await the filing of answers in both cases.

It is likely that both the cases, one filed by Fred K. Smith and the other by J. D. Farnell, will be disposed of at the same time as both petitions include substantially the same allegations and the same prayers.

FAIR PREPARATIONS SPEEDING FORWARD LARGE FORCE BUSY

Preparations for the first Texas-Oklahoma fair, now only three weeks away, are approaching completion at a rate that is looked upon as multiplying the chances for an exposition of the first class. At Call field, a big force is at work getting the buildings and grounds ready. In practically every county of northwest Texas, exhibits are being prepared. The amusement features will start for Wichita Falls within the next few days, so as to be here in ample time for the opening.

MUSIC MEMORY SELECTIONS FOR INTERSCHOLASTIC LEAGUE STATE WIDE CONTEST, '22-'23

SUPERVISOR OF MUSIC

MISS HENRIETTA PYLE

BURKBURNETT REVIVAL TO CONTINUE THIS WEEK

BURKBURNETT, TEXAS, Sept. 9.—The revival conducted by the First Baptist church is growing in interest and many are being added to the church.

Sunday school at 10:00 a. m. and preaching at 11:00 a. m. at the church.

Meeting for men only at 5:30 at the R. T. Temple, "Poets."

Meeting for women only at 5:30 at First Baptist church. Mrs. Robinson will speak on "Why Women Sin."

Sunday night services in open air. The meeting will continue into next week.

The pastor, B. R. Robinson, is doing the preaching, and A. E. Park, of Georgia, is leading the singing. His sermons reach the hearts of the people.

The public is invited.

Song service at 5:00 p. m.

Rev. Robinson is a very persuasive speaker, heated and running over with earnestness, so to speak, and delivers his messages with a fire that carry conviction. His sermons are illuminated with illustrations that are both apt and interesting.

DEVELOPMENT OF SECOND IRRIGATION DISTRICT TO START

DIRECTORS EXPECT TO TAKE SOME ACTION AT EARLY MEETING.

DECISION SOON AS TO NORTH SIDE CANAL

Work to Begin Surveying Lateral and Supply Ditches on South Side.

Steps for further organization of Wichita county water improvement district No. 2 are expected to be taken at a meeting of the directors of district No. 1, scheduled for early this week. The board has held no sessions in some time, owing to absence of several members from the city.

District No. 2 was organized some time ago, and directors chosen, but it has never started functioning. In the meantime, construction work on the project has progressed to a point where district No. 2 is ready in the undertaking must be determined.

The survey for the north side ditch is now virtually complete, and the board is expected to decide in the near future as to the letting of the contract for this part of the work. Crews which have been making the north side survey will probably be put to work running lines for lateral and supply ditches from the south side canal.

JUNIOR COLLEGE WILL START WITH ENROLLMENT OF 50

Wichita Falls junior college will start its session Monday morning at 9 o'clock with an enrollment of about 50, and classes in the equivalent of freshman work will start at once.

About 40 had enrolled up to Saturday evening, and additional enrollments Monday are expected to bring the total above the 50 mark.

Practically all members of the faculty have arrived, and everything is in readiness for the inauguration of this important new phase of Wichita Falls educational system.

HALF RATE ON FEED TO WESTERN STATES URGED

FORT WORTH, Sept. 9.—An appeal for a half rate on stock feed being shipped into all western states, including Texas, was laid tonight to the interstate commerce commission in Washington by the Texas and Southwestern Cattle Raisers' association and the American National Livestock association.

The drought, existing in the south and the consequent heavy losses threatened to stock men, are the reasons given for the appeal. A similar appeal made in 1918 was granted.

Texas-Oklahoma Fair, September 26 to October 4, Wichita Falls.—Adv. Stamps for sale at the Times of office.

NEW PRINCIPAL OF HIGH SCHOOL HERE TO ASSUME DUTIES

Prof. Hugh Porter of Denton who, as the new principal of the high school, will have charge of the organization of the junior college, arrived Friday night and assumed his duties Saturday.

TOM BEN ARCHER HELD FOR FORT WORTH KILLING

FORT WORTH, Sept. 9.—Tom Ben Archer, who shot to death G. W. Lawley, assistant manager of a local store last night, is held in jail here today without bond on a charge of murder. He says he fired the shot to save his brother, according to police.

He also charges Lawley was reaching in his pocket for a gun. The shooting followed trouble over an apartment which the Lawleys' rented from the mother of the Archer boys.

OKMULGEE EDITOR MUST FACE CHARGE OF CRIMINAL LIBEL

Arrangement of all but one well known Okmulgee business man on indictments returned in connection with the failure of last year of the Bank of Commerce here were continued indefinitely today by Judge Mark L. Bosarth in district court.

The man was indicted simultaneously with Governor J. B. Robertson, who is charged with accepting a bribe.

Postponement of arraignment followed objections to an immediate arraignment made by counsel for John H. Robold and John P. Cook, two of the defendants. A motion to disqualify Judge Bosarth made by Robold is now pending and this was assigned as the reason for the protest.

John W. Hammond, a former officer of the failed bank, charged with borrowing money from a bank of which he was an officer, waived arraignment and was given until September 15 to enter plea.

CHAPMAN STRONGLY URGES DIVISION OF STATE DEPARTMENT

AUSTIN, TEXAS, Sept. 8.—Commissioner of Insurance and Banking J. E. Chapman in his annual report of the insurance and banking department to Governor Neff filed today strongly recommends division of the department into two separate and distinct bureaus each to be in charge of a commissioner.

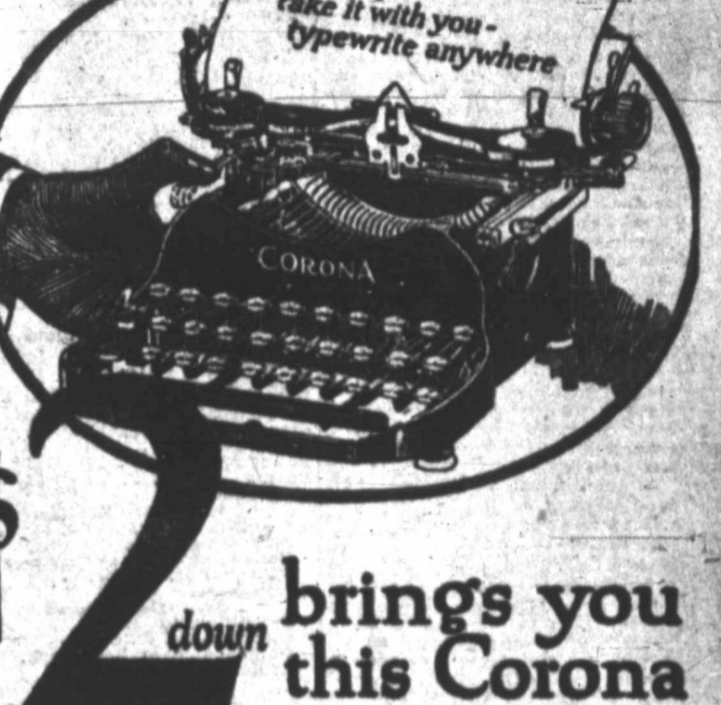

The report just filed, deals only with the insurance side of the department and advises that during the year, ending August 31, 1932, there was only one failure in Texas of an

insurance company, a mutual, and that two outside companies withdrew from the state. There are 622 insurance companies of all kinds doing business in Texas. Their figures for Texas being as follows: Business in force \$4,620,144,520; Texas premiums collected \$65,879,978; Texas losses paid \$39,823,778; invested in Texas by outside companies under Robertson law \$49,116,000.

ORDERS COVERS DIPPING AND SHIPPING OF CATTLE

FORT WORTH, Sept. 8.—Cattle, which have been undergoing systematic tick eradication and which show a tick-free condition on the last dipping, may be marketed at any time between dippings, according to an order issued here today by Chairman Booz-Scott, of the state livestock sanitary commission.

Heretofore stockmen have been required to wait from one to seven days following a dipping before marketing cattle, regardless of their showing.

fold it up - take it with you - typewrite anywhere

down brings you this Corona

PAY NO MONEY until you have seen and tried this wonderful little 6 1/2 pound folding typewriter and are convinced that it is the equal of any \$100 machine on the market. Then pay only \$3 down and balance of \$53 in easy monthly payments, or \$50 cash, including the neat carrying case.

By sixteen years' test and the experience of nearly half a million owners, Corona has proven itself the strongest, simplest, most trouble-proof of all typewriters. Anyone who writes with pen or pencil can profitably own a Corona.

Come in and see Corona, or phone, and we will gladly send it to you for examination.

A COLUMN FOR Amateur Operators

The amateur stations of Wichita Falls have grown very rapidly in the last few months and they are doing splendid work in the way of reaching out with their transmitters.

There are six amateur transmitting stations here now whose calls are 5CJ, 5UO, 5AAR, 5UN, 5FO, 5ELI. These stations all hold government station and operator licenses. They all own and operate equipment that is up to date and efficient, to a point beyond the general equipment on the market at the present.

The amateurs above mentioned have arranged a schedule among themselves as to their working hours. The hours are now arranged will include the hours or from 10:00 p. m. to 2:00 a. m. during week days and 8:00 a. m. to 10:00 a. m. Sunday and holidays; also from 4:00 to 5:00 p. m. all days. This arrangement was made to allow for broadcast reception to be present interference among the stations of this city.

VICE PRESIDENT STANDARD OIL COMPANY IS DEAD
CLEVELAND, Sept. 9.—Charles G. Taplin, 74, vice president of the Standard Oil company of Ohio, died at his home last night. He had been identified with the oil industry for forty-nine years.

Veteran Elevens From T. C. U. and Simmons To Meet Here Oct. 14

NEW RECORDS MADE AT A. A. U. MEET

New York A. C. Leads With 48 Points; High Jump and 8-Mile Walk Marks Set.

By HENRY L. FARRER, United Press Staff Correspondent.

NEWARK, N. J., Sept. 9.—New York A. C. with point score of 48 was the victor in the annual A. A. U. track and field championships here this afternoon.

The standing of other entries in the event follows:

Illinois A. C. 35; Boston A. A. 11; Chicago A. A. 10; Los Angeles A. C. 11; Meadowbrook club, Philadelphia, Pa. 10; Kottinovich A. C., Portland, Ore. 7.

Two new championships were established. D. V. Alberta, of the Chicago A. A. club, shattered University of Illinois star, shattered Johnny Murphy's record of 6 feet 4 1/2 inches for the high jump by clearing the bar at 6 feet 7 1/2 inches.

Willie Plant, national champion walker, broke the old record by doing 8 miles in 15:14.

Ed Knowlak of the Illinois A. C. the 1921 champion and Ralph Spearow of Portland, Ore., tried to break the new world's pole vault record of 12 feet and 4 inches, made recently by Huff of New York, and failed.

Levi Matt McLaughlin of the New York police department and Dehart Hubbard, 18 year old colored lad of Cincinnati, started with two victories. McLaughlin won the hammer throw and the 50 pound weight event while Hubbard finished first in the broad jump and the hop step and jump. In the broad jump, he defeated Ned Gordin, the world's record holder.

AMERICAN LEAGUE

Indians & White Sox 2
CHICAGO, Sept. 9.—Tris Speaker, pinch hitting for Edwards in the ninth, delivered the blow which ended Cleveland to beat Chicago 3 to 2.

Cleveland..... 011 008 001—3 2 0
Chicago..... 001 000 000—2 1 0
Batteries: Edwards and Sewell; T. Blanton and Ryan.

Red Sox & Yankees 3-1
BOSTON, Sept. 9.—Philadelphia slugger Boston divided honors today, Walker made a home run in the second, left field fence, his 25th of the season.

First game:..... R. H. E.
Philadelphia..... 010 001 001—2 1 0
Boston..... 000 000 001—1 0 0
Batteries: Ogdan and Packins; Pennington and Chapman.

Second game:..... R. H. E.
Philadelphia..... 000 010 100—1 7 1
Boston..... 000 010 002—3 2 0
Batteries: Kimmel and Perkins; Quinn, Ferguson and Riatt.

NATIONAL LEAGUE

Pirates 7-6, Cubs 4-7
PITTSBURGH, Sept. 9.—Pittsburgh gained on New York in the National league pennant race by defeating Chicago twice today. The Pirates found the visitors easy in the first contest, winning 7 to 6. In the second game Pittsburgh tied the score in the eighth and won in the ninth, 4 to 7.

First game:..... R. H. E.
Chicago..... 001 000 020—11 0 0
Pittsburgh..... 001 100 000—7 1 1
Batteries: Alexander, Cheever, Jones and O'Farrell; Glaner and Schmidt.

Second game:..... R. H. E.
Chicago..... 000 000 000—0 5 0
Pittsburgh..... 010 110 100—7 1 1
Batteries: Osborne, Cheever, Kaufman and O'Farrell; Wirtz, Brown, Morrison, Yellowhorse, Hamilton and Cooney.

ST. LOUIS

St. Louis 10-0, Yankees 0-1
ST. LOUIS, Sept. 9.—Van Gilder was given excellent support in today's game with Detroit and as a result St. Louis won 10 to 0. Ken Williams, leading major league runner, registered his 25th career drive of the season in the second inning by hitting into the second field stands. It was Williams' fifth homer in as many consecutive games.

Williams' three hits out of five visits to the plate, making 22 consecutive games in which he has hit safely. This is only the 10th time the modern major league record, Detroit..... 000 000 000—0 5 0
St. Louis..... 030 210 020—10 10 0
Batteries: Filbert and Moore; Woodall, Manion; Vandilder and Collins.

BROOKLYN

Brooklyn 5-0, Braves 0
BROOKLYN, Sept. 9.—Myer's home run into left field blanchers with one out in the 13th gave the game over to Brooklyn today 5 to 0 against Boston.

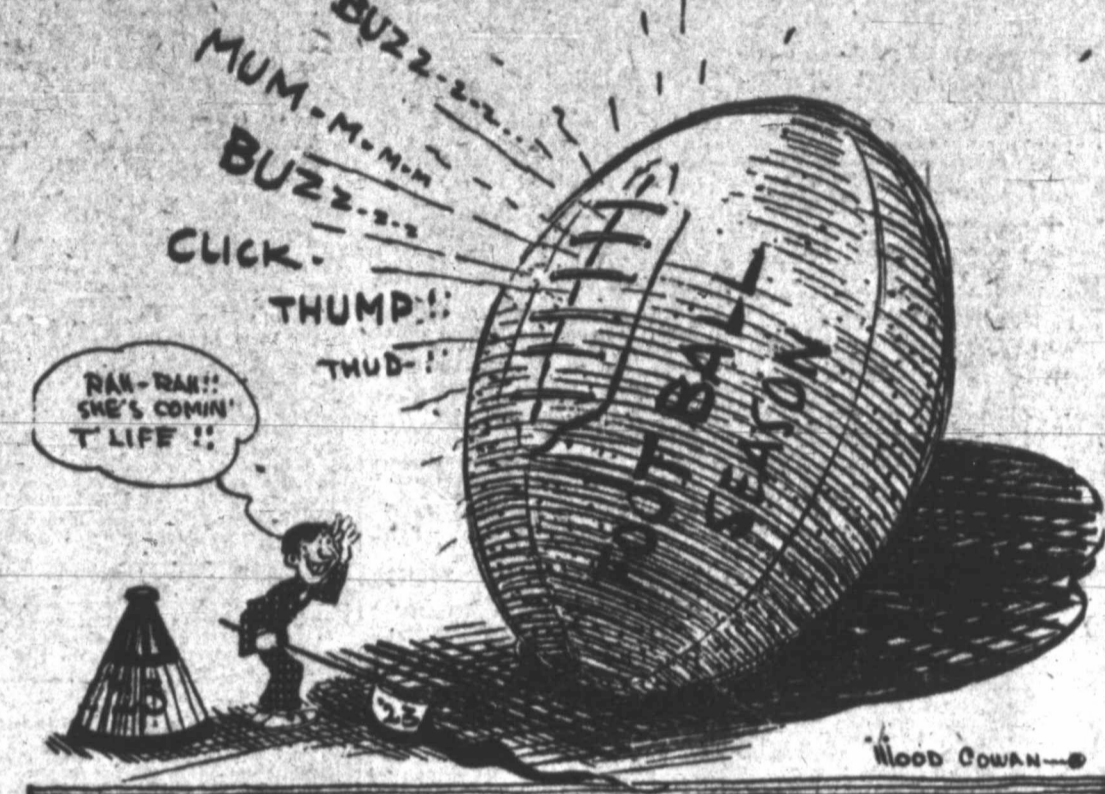

Score by innings:..... R. H. E.
Boston..... 000 000 000—0 11 0
Brooklyn..... 000 010 000—5 1 0
Batteries: Miller and O'Neill; Cowdy, Grimes and Miller; Deberry.

CINCINNATI

Cincinnati 11-0, Reds 0
CINCINNATI, Sept. 9.—St. Louis slugger played game from Cincinnati 11 to 0.

Score by innings:..... R. H. E.
Cincinnati..... 000 000 000—11 0 0
Reds..... 000 000 000—0 10 0
Batteries: Bell, North, Sherdel and Altmire; Kack, Marks, Loggins and Wingo.

THE DAY OF THE CHEER LEADER IS UPON US

Yankee-Brown Contests In St. Louis May Decide American League Race

Boston's double victory over the New York Yankees last week, permitting the Browns to return to the lead, showed the uncertainty of baseball and brought out the keenness of the pennant race in the American league. With fewer than 50 games still to be played it is probable that the outcome will be determined until the last few games of the year have been played.

Neither the Browns or the Yankees could take a good lead by cleaning up the three-game series which opens in St. Louis Sept. 14, and that series will undoubtedly test the acuity of the Browns' park. It will be in the nature of a little world's series and no championship game could be more bitterly contested than they will be. Shocker probably will work the first game of the series and the Yankees are expected to oppose him. That will be a battle of hurlers.

In the National league the Pirates are pressing on the heels of the Giants, but will be handicapped by fighting other contenders for the runner-up position. The Giants' advantage in finishing the season at home will be hard to overcome, also, and it is virtually certain that McGraw will take his machine into another world's series.

Major league batters will probably break the home run record this year, and if they continue at the present pace they will pile up a total of more than 1,000. With almost 24 games still to be played the major league circuit drivers have slugged out more than 200. Last year the total in the two leagues was 271, and that total probably will be passed many days before the season ends. The sluggers have averaged 150 homers a year, and so all the average point to a total of more than 1,000.

McGraw Looking Ahead
With his world's champions of today almost certain of these honors again next fall, Manager John J. McGraw is looking intently into the future for new material. He is commanding to fade in spots, Gray, Bancroft, Snyder, Smith, Brantley, Kahl, Jack Barnes, et al. are slipping over the precipice that will ultimately cast them into the dim and distant past of great men who have gone before them.

The success of Frankie Frisch, formerly of Fordham, and Roy Young, another Fordham, who turned McGraw to the institutions

WEEDING PROCESS TO START SOON AT HIGH SCHOOL CAMP

The first week of high school football practice was brought to a close yesterday afternoon at the Junior High grounds with over 40 aspirants for the coveted "V" indulging in light scrimmage under direction of Coach Jones. It was the first real scrimmage of the season for the backfield men.

More or less gloom was cast over the Coopers camp when it was learned that Pyri Brashear, 1931 halfback, would not return to school. Brashear will wear Graham moustache this season. The news, however, was partially offset when Capt. Bill Walker announced that All man Gates would go to school here this year. Gates is one of the best scholars of the district in this section of the country and was with Terrill last season.

Coach Jones is paying more attention to getting his charges in good physical condition just now than to gridiron tactics. Monday he plans to get down to real work and it will be a case of the best scholar of the district. The squad is too large to be handled by one man at present and the weeding out process will start before the week is over. Among those who have been reporting faithfully are Capt. Walker, Stringer, Davis, Coffey, Channing, Moore Kenley, Shaw Anderson, Beach, Howell, West, Cooper, Jankins, Stigles, Dwidle, Woodson, Cameron, Deems, Tyson, Waggoner, McBee, Taylor, Felder, Ayres, Miller, Hobbs, Barker, Herrington, Deo Moore, Bracken, Curtin, Gordon, Hirsch, Nance, Kelly, Horn, Dote, Hill, Kiker, Baldwin and Gates.

Texas Stars to Play on Thorpe's Canton Eleven

BEAUMONT, Sept. 9.—"Rair" Watson, former Longhorn football star, left here today for Canton, Ohio, to join Jim Thorpe's Canton "Bull Dogs," an independent football team composed of ex-college stars. Watson said Cecil Griggs, "Big" Murray and Jim Kendrick, former Texas stars will also be on Thorpe's team.

AMERICAN ENTRIES WIN FIRST OF YACHT RACES

ABOARD DESTROYER MANAN Off Oyster Bay, N. Y., Sept. 9.—America's four entries in the six meter yacht races for the British-American cup made a clean sweep of the first of the series of six races today, scoring 21 points to 18 scored by the Britishers.

SOUTHERN ASSOCIATION

BIRMINGHAM, ALA., Sept. 9.—Molins has practically clinched the 1933 championship of the Southern league by winning from Birmingham again 4 to 2, giving the Barons their 13th straight victory. The Barons must lose all their remaining games and Memphis must win all its games to reverse the standing of the two teams.

MEMPHIS, Sept. 9.—Nashville defeated Memphis 5 to 3 today.

ATLANTA, Sept. 9.—Although outbatted by Atlanta, New Orleans won today 6 to 5.

LITTLE ROCK, Sept. 9.—The local work a double header today from Chattanooga.

CHATTANOOGA, Sept. 9.—Little Rock, 8 to 4.

CHATTANOOGA, Sept. 9.—Little Rock, 8 to 4.

Golding Wins From Cochran at 38th Hole In Rivercrest Tourney

PORT WORTH, Sept. 9.—Dudley Golding made seven birdies during the morning and had a total of 18 for the day.

Although five down at the lunch hour, Cochran made a brilliant comeback in the final 13 holes and snatched the match at the 17th hole, Golding finally winning out on the 38th when his second was close to the pin and he ran down a pretty putt for a birdie and the match.

In frequent matches on their home course, Cochran had defeated the man who wrested the cup from him today, but Golding proved himself the better "summer" player. Cochran's game is seldom at its best under the pressure of tournament play.

Little Miss Josephine Willis is the attractive daughter of Mr. and Mrs. W. F. Willis, who acted as ring bearer in the recent wedding of Lieutenant and Mrs. B. F. Griffin.

Home Canning Will Be Big Feature In Woman's Department of the Fair

Home canning, with a special department for girls' work including sewing, will be one of the most interesting features of the exhibits in the Woman's department of the Texas-Oklahoma fair opening here the last of September.

In the canning department, of which Mrs. T. B. Smock of this city is chairman, a long list of premiums is offered for an interesting exhibition of specimens of culinary achievement in the way of canned and preserved vegetables and fruit, home cured meats, and home made preserves and pickles.

Among the things which have already been talked over, and those which were discussed at a meeting Wednesday morning of last week, will be the morning musical at the Kemp hotel, presenting outside artists of real repute; occasional twilight concerts on Sunday evening at the Kemp, and plans for at least three individual concerts during the season for which local artists will provide the talent.

CYPER CLUB DANCE ATTRACTS BIG CROWD OF DANCERS TUESDAY

ADVENTURES OF THE TWINS THE SECRET

By OLIVE ROBERTS BARTON

Flap-Doodle, the purple fairy, who flew by his ears, went up to the Fairy Queen's room. He didn't dare to go back to the Fairy Queen's room, who he had to live because he had treated the Fairy Queen's room so meanly. He had to live because he had treated the Fairy Queen's room so meanly. He had to live because he had treated the Fairy Queen's room so meanly.

BRIDGE AT WICHITA CLUB HONORS GUEST

Misses Nancy Jane Harlin and Josephine Mayfield were joint hostesses Friday afternoon at the Wichita Club at a very prettily played bridge party which honored their two house guests, Misses Frances Harlin and Helen E. Hines. The games, Miss Sadie Adickes won high score and Mrs. Ray Fackler low, both being presented with dainty white linen embroidered handkerchiefs. At the close of the games Miss Adickes and Mrs. Fackler were the following: Madames Alfred Miller, Ray Puckett, Ike Upchurch, J. R. Jarrett, and Robert Nolan. Madames had as coadjutors Adickes, Gretchen Avid, Mattie Ruth Corlett, Sibyl Kell, Thelma Kahn, Louise Owens, Gracie D. Shambert, Harriet Snyder, and Helen E. Hines. Madames Montgomery, Elvia Killingsworth, Kathryn Moore, Margaret Duncan, Gay Gwynne, Josephine Tucker, Fret Cummings, Ivy V. Larkin and Vera Hale.

MISS MARGUERITE JAMES HOSTESSES TO CLASS MEMBERS

Miss Marguerite James was hostess to the members of the Intermediate class of the Outh Side Baptist Sunday school Wednesday evening at her home on 14th and Broadway. The guests included Mrs. E. L. Hinchey, Mrs. J. E. Ward, and other members of the class.

MARRIED ON WEDNESDAY IN THROCKMORTON, TEX.

Mr. and Mrs. Clarence R. Roberts came in last week from their wedding trip to Oklahoma points, after their marriage in Throckmorton, Texas, and are making their home at 2105 Ninth street.

BRIEFS AND NOTICES

Mr. and Mrs. J. L. Bond, and Mrs. T. F. Shipley... Cordas Bray and Miss Georgia Lou England of Seymour are spending the week at the home of Mrs. H. H. Hill. Mrs. Hill and two children of Dallas are also visiting Mrs. Hill at her home, 1311 Taylor street.

Misses Lora and Maud Williams, former members of the local school, were invited to teach at the school in Lexington, Ky. One or two other members of the school are also being invited to teach at the school in Lexington, Ky.

Mrs. Paul Von Almen and son, Douglas, have returned from a two months visit with Mrs. Von Almen's mother, Mrs. Dora Muller, in California.

Mrs. and Mrs. Harry Bray and daughter have returned from an overland trip to Colorado.

Mr. and Mrs. G. J. Brown and daughter, Mrs. Doris, have returned from a trip to Colorado.

Mrs. William Huff and children have returned from a visit with their sister in Sherman.

Judge and Mrs. A. H. Carrigan and Miss Elizabeth and Mrs. Carter McGregor and two children have returned from spending two months in Colorado.

Mrs. and Mrs. J. C. Hunt and daughter, Mrs. Maud, have returned from an overland trip to Colorado.

Miss Eugenia Jember has returned from a short visit and business trip to Dallas and Fort Worth.

Mr. and Mrs. Marvin Smith announce the arrival of a baby daughter at their home Friday night.

Dr. and Mrs. R. H. Peterson returned Sunday from points in Colorado and Oklahoma.

Miss Ruby's Yowell has returned from a visit with Misses Hill, Irvine, Elizabeth Jennings and other friends at Henrietta.

Mrs. J. A. Gardner and little daughter have returned from a visit in Colorado.

A note from Mr. and Mrs. J. H. Childers, mailed from San Francisco, states that they are enjoying a wonderful trip along the coast, and that they are leaving that day for Seattle by water.

Mrs. and Mrs. R. O. Harrey and Mrs. C. E. McCutchen and little son, Jimmie, who had a college together in Colorado Springs for the summer have returned home.

Mrs. L. Shields returned Saturday from a month's stay in Colorado Springs, Colo.

Mrs. E. Gwynne, who has been in California the past three months, has returned home and will spend the winter with Mr. and Mrs. Foyton Gwynne.

Mrs. and Mrs. A. Zupolowicz, who have been spending the summer in Los Angeles, will leave September 13 on their return here.

Mr. and Mrs. S. W. Shipley of Muskogee are visiting their parents.

KATHLEEN NORRIS Woman to Woman Talks

WHO HINTS A SNOB?

BY KATHLEEN NORRIS
America's Most Popular Woman Writer for Women

"She used to be so sweet-well, perhaps she is still. But since her husband made all that money, and they moved into the new house, she has become an absolute snob!"

"We women say this carelessly and readily about each other; there are a dozen women of your acquaintance and a dozen of mine, of whom we really believe."

Everything detestable and unworthy is summed up in that one hated word.

To say that a person is a snob conveys a complete description to our minds, and we discuss that woman or that man, or that family, for all time, with the contemptuous generality.

"They are snobs!"

I just asked six young women, to whose intimate conversations I love to listen, exactly what they thought of snobs and snobbishness, and here they defined snobs.

"We instantly found ourselves in a social sense, snobs were those persons who were in the world—no, sometimes they were rich persons who thought they were better than others—on their own merits, but who properly altered—they were women who dropped their old friends when they themselves were fettered by circumstances."

Finally, we got the definition of "snob" to be this: "One who regulates his conduct with reference to the prosperity of persons or families."

Who isn't a snob?

The conversation rushed on, after this satisfactory discovery, like a river in flood. But one of the most thoughtful of the younger women suddenly asked:

"Who isn't a snob?"

"Which one of us," she pursued, "when the upper end of private and private had died down, which one of us isn't always trying to better herself, to meet the interesting and successful people, to go to the places that are talked about, to find rich and prominent friends, rather than the poorer, weaker women who live on the black where one happened to move on a bride?"

"Isn't that, after all, our civilization?"

"Isn't it perfectly legitimate for you to prefer a rich and prominent woman to a poor and obscure woman—Isn't it natural to want one's children to be reared in an expensive school, as one can afford?"

"And if I meet a score of men, upon a visit to Hollywood, isn't it right to choose the one who is a successful, prominent man, to whom I should go again, should I see three or four whose names are household words everywhere?"

"What Women Among Them?"

"You don't listen when I say that a man I know named Joe Williams—or an extremely clever woman I once named Mary Davis—asked this up to that. But when I carelessly drop the name of Mr. Gilbert Parker, or instantly interject, 'As the president said the other day,' your attention is instantly arrested. And you all like to be admired. Most of us even like a little envy mixed in; we like to say to your aunt, 'Oh, do you know Theodore Roberts?' 'Why, he's an old friend of mine.'"

"What women among them?"

"The five million dollars today, and having her husband elected president the day after tomorrow, wouldn't be called a snob by the women she knows now?"

"Her life would pick her out of their midst; she wouldn't school the baby to walk any more, and she wouldn't be the price of a pig-pen. She would find great painters eager to paint her, great musicians eager to play her, great architects eager to run her streets, and all the prominent people of the Union ready to welcome her into their charmed circles."

"Wouldn't she be ridiculous to say to them, 'We don't choose you because we can't make that trip on your yacht—I can't select hats to match it—my club meets at Stand-on-Crossing, and my girls have to

sleep little work—then his heart, he'll be a kid for Auntie Rose? My dear, I love your hat—you think it came from Joseph's—really, Lisbeth is a snob. You and I make a little snob and buy my shoes and your linen dress, and have tea somewhere?"

"But we're not snobs!"

"Marry—it's yours, isn't it? Well, and how are you all? No, we are just back for the week-end. The sorry—I'd love it. But we're with the Carrolls—Bert and Mr. Carroll are partners now, you know."

"Oh, the Carrolls, the type that loves us engaged every night. No, we sell on Saturday—Yes, I've been over twice before now."

"Well, if you do, will you come and see me? We're in the telephone book. Promise, now, and we'll have lunch, and catch up on all these years!"

"And we watch her out of eight, our hearts waiting with pain and agony for the pleasure of a visit."

"Oh, dear me!" we say, at the dinner table. "I saw Rose Clark, today—just the way I know, her! She's become an absolute snob. Bert is Carroll's partner, and they're going abroad again, and she, she couldn't come to lunch or dinner, didn't have a minute—staying at the Washington! 'Roob!'"

"Who is Bert's best?"

"But, after all, is she? Or are you and I the real snobs for trying to draw ourselves out of our own circumstances, to follow this brilliant star for a few hours?"

"I went to school with her," we say indignantly. "I did of the hour. Yes, but we went to school with the girl who is prosperously and happily married to the baker over our bridge street, and with boys who are in jail, and are snobs and janitors and circus clowns. And we are not following them up with any such passionate loyalty."

"I know a young woman who has actually conspired the world. She is young, rich, beautiful, successful—the last two by her own efforts and her own genius. She is a quiet, retiring woman, the type that loves and she adores her mother, her husband and her baby. She wants to spend all her time with them; she rushes home from a business engagement, and from the applause of the world, ready to cry if someone else has put the baby to bed."

"And her reputation is that of a snob. I never had an intimate girl friend in my life who was so faithful to me once pathetically. 'But I went to seven different public schools—and every boy and girl who ever had a friend of mine is now! And I just read to go on board a ship or a train—because of them it is always there!'"

"What? That woman with snobbishness?"

"It is our family civilization that has made the snob, and our false ideals."

"If we women held a high and holy ambition only to be good, and pure, and to serve all of God's creatures alike, then there could be no snobs, for there is no possibility of exhausting the supply of goodness and holiness, and nobody can take away your share or mine and wear it as her own. To snobbish, and to follow, and to frequent the society of great and simple and true minds is to steer clear of envious and of snobbish happiness forever."

"But instead of the spirit, we adore the letter; it is the money we admire—the petty business fame, the jewels, the yachts and the big houses, the pictures in the paper! Our souls know better, but our flesh is weak."

"We know that money breeds unhappiness, we know that big houses (full of the lower class of foreigners) utterly lack the sweetness and joy of the homes where service is for love and not for hire, we know that."

"Did you ever realize that when we define a woman as a snob, we always mean that she won't give us something? She won't give us her society, or her friendship, or the good things of her life any more, and we resent it. Ten years ago, she would have locked her arm in ours confidentially and said something like this:

"How was he last night? Did the

Is your skin pale and sallow?

"A skin you love to touch"

If your skin is pale and sallow, it shows the need of a more stimulating treatment than you are using.

To give your skin the soft, clear color every healthy skin should have, follow once a week this special treatment:

JUST before retiring, fill your basin full of hot water—almost boiling hot. Bend over the top of the basin and cover your head with a heavy bath towel, so that no steam can escape.

Steam your face for thirty seconds.

Now lather a hot cloth with Woodbury's Facial Soap. With this wash your face thoroughly, rubbing the lather well into the skin with an upward and outward motion.

Then rinse the skin well, first with warm water, then with cold, and finish by rubbing it for thirty seconds with a piece of ice.

THE other six nights of the week cleanse your skin thoroughly in the usual way with Woodbury's Facial Soap and warm water.

Get a cake of Woodbury's today, and begin tonight this special steam treatment. A 25-cent cake of Woodbury's lasts for a month or six weeks.

WOODBURY'S FACIAL SOAP

JACK DAW'S ADVENTURES—Continued.

BY ELTON

THE APPROACH OF STRANGE MEN IN THE NIGHT CHASE JACK DAW AND HIS PARTNER THROUGH THE WOODS.

THE MAN WHO HUNGERS FOR THE MEAT OF THE MOUNTAIN GOATS GOES TO THE MOUNTAIN GOATS AND TAKES ONE OF THEM.

THE MAN WHO HUNGERS FOR THE MEAT OF THE MOUNTAIN GOATS GOES TO THE MOUNTAIN GOATS AND TAKES ONE OF THEM.

HE HUNGERS FOR THE MEAT OF THE MOUNTAIN GOATS AND TAKES ONE OF THEM.

know that human greatness—at best so brief—is apt to be accompanied by human weakness; that this great actor is a wretched little fellow, and that great writer has three times made a failure of his domestic happiness.

A Great American.

And we know that by all true standards the woman in the snobby house on the corner, who believes in God, and goodness, and service, and flowers and who is raising seven sweet, noisy, healthy little boys and girls, is as great an American as Washington or Lincoln.

If we women held a high and holy ambition only to be good, and pure, and to serve all of God's creatures alike, then there could be no snobs, for there is no possibility of exhausting the supply of goodness and holiness, and nobody can take away your share or mine and wear it as her own. To snobbish, and to follow, and to frequent the society of great and simple and true minds is to steer clear of envious and of snobbish happiness forever.

But instead of the spirit, we adore the letter; it is the money we admire—the petty business fame, the jewels, the yachts and the big houses, the pictures in the paper! Our souls know better, but our flesh is weak.

We know that money breeds unhappiness, we know that big houses (full of the lower class of foreigners) utterly lack the sweetness and joy of the homes where service is for love and not for hire, we know that.

Did you ever realize that when we define a woman as a snob, we always mean that she won't give us something? She won't give us her society, or her friendship, or the good things of her life any more, and we resent it. Ten years ago, she would have locked her arm in ours confidentially and said something like this:

"How was he last night? Did the

One of those boys, indeed, may be of the Washington or Lincoln of tomorrow. It may be one of those plainly dressed, busy little girls that your daughter will be saying in 1948:

"We used to know them well—they used to live in our block! But now that she's so famous, I don't suppose she'd remember me!"

And although it never occurs to you now to step down that way, and suggest to that over-burdened woman that you sit with the children some evening, so that she can go to her mother—although it never occurs to you to make a friend

of her, to help her with her cutting and the sewing and of buttons, and while you talk to bring her tired mind and soul perhaps, a little of the realization of the glorious patriotic service she is rendering—and so busy to analyze—

Although you won't do that, still you resent the prosperity that presently removes her, and the girls and boys, from your immediate observation. Her Betty becomes the head of a successful business college, and her Mollie begins to write short stories, and her Tom runs for governor, and naturally her Betty,

Dressmaking, Remodelling, Acordian Pleating, Button Making, Stamped Goods, Ladies' and Children's Dresses, Coats and Hats

A Brilliant and Fascinating Gathering of FALL FASHIONS On Display Here

Artists, whose names stand for the last word of authority, approve these modes. They have been chosen with extreme care and special attention to requirements of our own clientele. Beauty, correct fashion and superior quality are presented. And it is most satisfactory to note the lowered pricings of these assortments, which bring the most exclusive and desirable fashions within the reach of the women who prefer to limit their dress expenditures to a moderate figure. Assortments from \$25.00 to \$39.50 and up to..... \$99.00

Interpreting the Mode In Terms of "Line"

The straight line is still the smartest distance from neck to hem. Severity, however is softened by wing-like panels which float gracefully from shoulder or girdle. Draped effects swathed closely at the hips harmonize their classic grace with the slender silhouette. The uneven hem line, too, is much in vogue.

Persian Embroideries And Egyptian Girdles

With the great vague for simplicity in fabric comes the wonderfully artistic designs and colorings of the Caucasian peoples. Metals, beads and embroidery are tastefully used and the bright colorings lend a classic touch which differentiates between and ordinary frock and an artistic costume.

The Suit

Elaborately Trimmed or Severely Tailored

Supple, velvety wools allied with rich furs in headings, collars and cuffs are developed in a galaxy of modes for Autumn.

Loose fitting coats in hip length present Balkan blouse effects with such fascinating and medium length with self belt. Silk or metallic thread blousing and narrow neckings are freely used. Prices from \$45.50 to..... \$99.00

Navy twill cord developed in modes that are almost severe with narrow tanks or line embroidery as their only trimming presents the superior grace of line. Models from \$39.50 to..... \$99.00

Correct Millinery

MAY BE LARGE OR SMALL

Fashion has gone to extremes and miss or matron may choose with equal assurance of correctness between the close fitting black and more black in favored in large hats and the clever placing of crepe feathers, hair-like fascias or ribbon combs in rich shades presents exceeding charm. Soft velvets, silks and felts are tucked, shirred, smocked and embroidered in mill modes. Delicately brocades, various reds and attractive blues are shown.

Prices range from \$8.50 to \$29.50

COULD NOT TURN IN BED

Operation Avoided by taking Lydia E. Pinkham's Vegetable Compound

Dayton, Ohio.—"I had such pains that I had to be turned in bed every time I wished to move. They said an operation was necessary. My mother would keep saying: 'Why don't you take Pinkham's, Henrietta?' and I'd say, 'Oh, mamma, it won't help me. I've tried too much.' One day she said, 'Let me get you one bottle of each kind. You won't be out very much if it doesn't help me or not, but I only took two bottles of Lydia E. Pinkham's Vegetable Compound and one of Lydia E. Pinkham's Blood Medicine when I began to get relief and I am regular ever since without a pain of a headache. When I lie down I can get up without help, and without pain. I can't begin to tell you how I feel and look. I have begun to gain in weight and look more like I ought to. I think every day of ways I have been helped. Any one who does not believe me can write to me and I will tell them what shape I was in. I am ready to do anything I can to help your medicine.'"

Sunday School Picnic

Medames Rex Adams and Walter Gray chaperoned a crowd of little girls of the primary class of the Christian church last Friday afternoon...

Laura Party

The younger set had probably never enjoyed a lawn party more than the one Monday evening on the lawn of Mr. and Mrs. J. A. Wheat...

Colorado Tourists Return

The following families have recently returned from Colorado: Mr. and Mrs. J. T. Lively, Mr. and Mrs. J. E. Lanford, Mr. and Mrs. E. J. Craddock, Mr. and Mrs. I. O. Newton, Mr. and Mrs. J. A. Wheat. They all report a splendid outing and visited many interesting parts of Colorado.

Cochran-Dickson

Miss Henrietta Dickson and Mr. Beth Cochran were married Friday morning at 7:45 at the home of the bride's parents, Judge and Mrs. Joe E. Dickson. After a short trip to Dallas and Mineral Wells, they returned Tuesday at noon and will be at home at their residence at the home of Mrs. Cochran.

Missionary Society News

Medames R. D. Mugg and J. T. Lively entertained the Missionary society of the Christian church Wednesday afternoon at the home of Mrs. R. D. Mugg. A salad plate was served to Medames G. A. Miller, R. H. McClellan, W. J. Cooper, E. L. Craddock, W. A. Baker, J. P. Goss, C. H. Mothes, Walter Gray, A. D. Bell, C. E. Haines, J. E. Craddock, R. E. Cochran, Miss Henrietta, Lee Coy, R. A. Miller, Sam Barlow, Miss Lucile Rupp, and Rev. L. Swindle. Miss Lucile Rupp and Mrs. Tom Craddock will be hostesses in October.

Mrs. Chas. Handal, West

Mrs. Chas. Handal, West, was hostess to the Florian club in its first meeting for the new year's work, and the Harmony club which is a daughter of the Florian club at her home Wednesday afternoon. The house was attractive with cut flowers. Greetings from the Florian club were given by their president, Mrs. R. R. Kellum, and Mrs. Joe A. Wheat gave greetings for the Harmony club. Mrs. S. W. Pistole responded to both clubs. Mrs. H. H. Lanford gave a poem by Arthur Chapman "Out Where the West Begins," giving the history of the author and each member responded by telling "What their summer vacation had meant to them." The Florian club will study western literature for the next year, and as a member of her members have toured the western cities this summer, it will be most interesting. The Harmony club will study folk music first and later opera music. After the program a social hour was enjoyed and the hostess served a delicious luncheon to Medames E. R. Kellum, Mrs. S. W. Pistole, Joe Wheat, J. S. Shultz, Charlie McClain, N. P. Mitchell, W. T. Britton, T. H. Bunkley, John Haines, Lacy Dalton, Joe Dickson, S. Drane, M. R. Fuller, J. C. Howell, Horace C. Lanford, E. Stallings, G. B. Piant, C. T. Foster, John Haines, Lacy Dalton, F. Fisher, L. Briggs, J. T. Burns, F. N. Taylor, Seth Cochran, Lee Coy, T. H. Perry, Helen Briggs, Misses Irene Baker, Newsom, and Mrs. A. E. McDaniel, Alna Briggs and Francis Cooper.

Woodman Lodge News

The Woodman lodge met in their monthly meeting Monday evening. After a business session they were interrupted and surprised by the serving of ice cream and cake, through the courtesy of the ladies of the Woodman lodge, at which a number of games of forty-two were played and a social hour followed.

Band Show Surpassed

After the band boys finished their practice last Thursday evening, Mr. Joe Harvey invited them to his place of business and served them hot hamburgers and cold drinks.

Personal

ARREST THREE IN CONNECTION WITH BATTLE AT SEALY

HOUSTON, Sept. 9.—Under charges of murder three men were being held Saturday in the Austin county jail at Bellville without bond pending a hearing in the Sealy duel which cost the lives of four men. They were arrested late Friday.

The men are Foster Bell, brother of two men killed in the battle; W. M. Andrews and Betch Bradshaw. Sheriff Remmert and Texas Rangers Tremble and Brown made the arrests. The defendants' examining trials are yet to be set.

The new arrests brought the total to four. John Miller of Sealy, who is charged with assault to murder is free on \$5,000 bond pending his examining trial which is set for Monday morning at Bellville.

Officers claim that Andrews and Bradshaw were in the car with the Miller brothers when the latter drove into Sealy just prior to the shooting. Details used in the battle have not been found.

John Miller has submitted it is said the rangers will remain in Austin county until after its examining trial. Ernest Schaffner, 17 year old son of F. C. Schaffner, stricken by the shock is recovering.

ROAD NORTH FROM ELECTRA COMPLETE EXCEPT SHOULDERS

The McCullum Construction company finished the paving of the six miles of road north of Electra during the week and everything has been completed with the exception of dressing the shoulders. This condition is the sub-contract for paving let through Potts & Prontice for concrete roads.

During the week Potts & Prontice placed 4,000 feet of concrete on the Burk Burnett-Clara road. Both miles were closed down Saturday on account of a lack of sand and cement. Five cars of cement, however, arrived in the local yard during the morning and were forwarded to Burk Burnett. Work will be resumed Monday morning.

Over a mile of gravel has been placed and set on the road from Iowa Park toward Kemp City.

PART TWO

BACK-TRAILING ON THE OLD FRONTIERS

Ben Holladay, Famous "Overland King" of the 60's Made and Lost Millions in One of the Most Spectacular Careers of the Frontier Days of the Far West.

One of the towering figures of the west, whose name is scarcely remembered today, was Ben Holladay. Overland stage king, who in a few years made millions and died a pauper.

No single individual played a greater part in the development and settlement of the Trans-Mississippi region than Holladay. In the few years he lived he was a typical westerner, having been born in Kentucky in 1824 and reared on the frontier. As early as 1839 he opened a tavern and bar in Weston, Platte county, Missouri, but soon went into other lines of business and accumulated money very rapidly. In 1848 he took a wagon train and \$75,000 worth of goods overland to California, making a fortune from the sale of these to the population of the gold camps. He then established himself at Salt Lake and as a trader in the Rocky Mountains increased his wealth for several years. Besides his gigantic venture in the overland stage line he had other large interests, including such enterprises as a fleet of first-class passenger steamers plying the Pacific between San Francisco and Portland, Oregon.

Like the Pony Express, the Overland stage lines transporting mail and passengers from the Missouri river to California between 1850 and 1866 proved disastrous from a financial standpoint in spite of the big compensation paid by the government for carrying mail. When the government let the first contract for mail transfer from Independence, Mo., to Salt Lake in 1850 to Samuel Woodson of Independence, the contractor from the western boundary of Missouri to Utah was a wilderness, more than a thousand miles in length. Thousands of gold seekers had passed over it in the spring of 1849 and that year, leaving a trail of bleached bones of men and animals. The presence of many Indian tribes resulted in constant loss of property, so that investment in a transportation enterprise of such a character was unprofitable. The United States government gave assurance that losses from Indian depredations would be made good, but few claims were allowed.

Woodson filled his contract for a one-month service for four years, but finally failed in 1851. His successor operated the line for two years before going into bankruptcy. Others met with similar misfortune until the monthly and weekly services were discontinued. A daily service through to Placerville, California, and the following year the line was taken over by Holladay, the name of the company being the Central Overland California and Pike's Peak Express.

Holladay, while up to that time engaged principally in the mining, had worked as a driver on stage lines in Missouri while still in his teens and had absorbed considerable knowledge of the staging of his frequent trips over the route to Salt Lake. The Overland drivers all had a friendly feeling for him. The most remarkable executive. There were various stage lines in the west besides the C. O. C. & P. P. Express, and the more important of these were soon taken over by Holladay. One of those was the Pioneer Express, the pride of California, which existed in the palmier days of Virginia City and the noted Comstock silver mines. Its equipment was the finest that money could buy. The finest Concord coaches and harness, the best type of six-horse teams and drivers who were highly paid as good reinforcers as the working men. The road built for the stage line across the Sierra Nevada range was one of the best highways ever made. It was smooth, well maintained, graded as wide as a modern city street and was sprinkled and rolled daily, tanks being located at convenient points for this purpose.

Another new line established by Holladay was a daily stage from Salt Lake to Bannock, Virginia City

Copyrighted 1911 by the Cheely-Raban Syndicate.

A "SWING" STATION ON THE OVERLAND

and Helena, Montana, which grew out of the gold discoveries in that state in the early 40's. Later after the discovery of gold in the Overland, Idaho City and Boise, Idaho, new and important mail routes were opened and Holladay obtained a contract for carrying mail from Salt Lake to Dallas City, Oregon, by way of Walla Walla.

On the eastern or Missouri river end of the overland route the later lines, or feeders, were the two important branches from Omaha and Nebraska City, intersecting at Fort Union, where they formed a junction with the main line from Atchison. Later there was the Smoky Hill route from Atchison to Denver, and the Overland line from that city to Central City and California Gulch, near the present city of Leadville. In the various routes operated by Holladay personally and under contract there were 4,000 miles of daily stage lines, the management of which was an enormous undertaking. It required upward of 300 coaches and express wagons, as many freight wagons and 4,000 horses, mules and oxen, the latter being used for hauling supplies to the stage stations. The stations in later years averaged about 10 miles apart. Every 10 miles there was a home station, so called because the driver's route ended there. It was also the eating place for the passengers. The intervening stations were called "swing" stations, consisting of a stable, granary and room for two or three stock tenders. The home stations were quite commodious buildings, with dining and sleeping rooms, office, telegraph office and stables close by.

Important points big shops were established, where repairs to coaches were made with parts and material shipped from the manufacturers at Concord. In case of emergency a coach could be built entirely in these shops, and this was often done.

Holladay kept his stage lines running with the precision and accuracy of a railroad line, and in all seasons night and day coaches ran with nearly the same regularity as railroad trains. It was his boast that he could set his watch anywhere along the line by the arrival and departure of the Overland.

Few persons unacquainted with the old Overland line can realize what a huge enterprise it was and the great amount of money required to equip and operate it. For hundreds of miles it traversed barren wastes whose sole vegetation was sagebrush. The loss to build some of the stations had to be hauled by wagons from 100 to 200 miles. The nearest corn fields on the east and west were on the Blue river in Kansas, and at Grand Island, Nebraska. In the west some grain was grown in Salt Lake valley, but the available production of these localities furnished only a partial supply of the Overland's requirements. Most of the grain had to come by boat from St. Louis. Once Holladay chartered seven steamers at St. Louis in one day to load corn for his system. Some of the hay used had to be

hauled 50 miles or more.

Annual receipts millions of dollars. In order to support the Overland the receipts had to be large, and they ran into big figures. For carrying mail on the main line, Holladay received \$1,500,000 in year. He was paid another million for branch line contracts. Passenger receipts on the line ran as high as \$2,500,000 a year. At one time the passenger fare from Atchison to Placerville, California, was \$600; to Helena, Montana, \$500. Extra baggage formed another big source of revenue, the rate being from 12 cents to \$1.50 a pound. During the mining excitement the stages were filled with passengers both ways.

An illustration of the energy with which Holladay and his men worked is found in his opening of the Virginia City line. Early in May, 1854, he was awarded the contract for carrying the mail to the Montana mining camp from Salt Lake, a distance of 450 miles. He was given to July 1 to get his line in operation, with the provision that for every day after that date on which he failed to carry mail he was to forfeit \$500 as a fine. He at once notified his superintendent, T. J. Spotswood, that the horses, coaches, freight wagons, etc., must be in Salt Lake by July 1. It looked like an impossible task, but Spotswood took the first stage to the Missouri river, gathered his supplies

and in a few weeks had his train of 250 mules and horses, 30 stage coaches and other equipment rolling westward. June 23 he had all his arrangements completed in Salt Lake and the following day had his first stage running on their initial trip toward Virginia City. In order to cross the Sweetwater he had to swim his stock and float his coaches and wagons, taking desperate chances, but winning his battle against time.

Holladay was a man of quick decision and action. Once when he was making an effort to get an increase in the subsidiary for carrying mail to California, he received word from his agents in Washington that something might be accomplished with the federal authorities if he could convince them that the schedule could be reduced if he were better paid. Holladay was at Salt Lake and he planned at once to make the highest speed possible to Atchison—a trip that would astonish the authorities as well as his friends.

Everything having been arranged, the Overland king left Salt Lake in his special coach and was carried in extra-fast time over the Wasatch range and the Rockies, across the plains to Atchison, a distance of 1,200 miles, in eight days and six hours. This was an unprecedented feat in overland staging and created great astonishment in Atchison

when the stage rolled in. Such time had never before been equaled excepting by Pony Express. The result was telegraphed over the country, and in Washington there was a speedy passage of Holladay's bill which had been pending before congress.

End of Stage Line Ruins Holladay.

The profitable staging period for Holladay was during the civil war. At that time he was rated as a multi-millionaire, and the magnificent country home that he built near New York on the Hudson river was one of the finest residences in America. Ophir Farm, as he called it, was furnished in the most luxurious fashion and art objects and paintings worth hundreds of thousands were brought from Europe to beautify it. He also built a stately mansion in Washington, opposite Franklin Square, where he developed one of the finest private libraries in America.

After the war ended the plains Indians became hostile and his financial troubles began as a result of enormous losses suffered through raids on stage stations and attacks on stage coaches. The stage line was virtually abandoned for more than a month at one time after a disastrous raid in Colorado, when nearly half million dollars worth of property was destroyed. Most of the army of employees were idle. The long delay in the opening of the

route was a severe blow to the Overland, and it became necessary to send the letter mail by ocean steamers and the Isthmus of Panama from New York. He had hardly begun to recoup from this loss when a similar disaster followed. In 1866 all the stage stations for 400 miles were burned, hundreds of horses and mules were run off and much valuable property was destroyed.

Then the Union Pacific rapidly pushing its road westward rapidly to form a junction with the Central Pacific, which was coming eastward. This kept shortening the stage route. Financially crippled, Holladay was in 1865 forced to sell what was left of the great Overland system to Wells, Fargo & Co., whose freight and express business throughout the mining camps of the west had been immense. For his interest, which covered livestock and rolling stock, stations, etc., he received \$1,500,000 in cash, besides \$250,000 in stock of the express company.

Holladay died at Portland in August, 1877. While he left a large amount of property, it was so encumbered that his estate finally paid out practically nothing. For several years prior to his death a bill was pending before congress to reimburse him to the extent of \$500,000 for losses sustained through Indian depredations, but it never passed. His remarkable career, and

during which one of the most remarkable transportation systems in American history was built and passed away, occupied only a period of some 18 years.

JURY DISAGREES AND IS DISCHARGED SATURDAY

The jury which tried the case of the State against Morris Hochlander of Burkhardt on an aggravated assault charge reported Saturday morning that it was unable to agree and it was discharged by Judge Gov. Rogers. It was ascertained that the jury stood five to one for conviction.

I First Compounded This Newer Form of Iron For My Own Neighbors

Their Praise of This Remarkable Remedy Has Spread So Rapidly That Now Over 4,000,000 People Use It Annually

Years ago I began to wonder at the great number of my own friends and neighbors who were always complaining and doctoring, without ever seeming to get any better. Both working men and their wives were frequently all tired out in the evening, and a great many were weak, nervous and run-down. One had pains in the back and thought he had kidney trouble.

Another had pains around heart, palpitations and dizziness, and was unable to get any rest from heart disease. Still others had sensitive headaches, floating spots before the eyes, tender spots along the spine and a great variety of alarming symptoms.

For years I made a special study of this condition, consulting a great number of physicians and chemists. An immense number of investigations by physicians all over the country showed that three people out of every four you meet lack 100% iron in the blood.

Lack of iron in the blood is the greatest of all debilitating weaknesses. It is the iron in your blood that enables you to get the nourishment out of your food. Without iron, nothing you eat does you any good. Your heart, lungs and kidneys and all your vital organs get their nourishment from the blood stream, and when the blood lacks iron and is thin, pale and watery, you may

suffer from the symptoms of a great number of diseases when the real and true cause of all your troubles is a lack of iron in the blood.

In the old days people often took metallic iron, which some physicians claim is not absorbed at all. In compounding this newer form of iron which I call Nuxated Iron, I employed a special form of iron, which is like the iron in your blood and like the iron in spinach, health and apples. Unlike the older forms of iron, it will not injure the teeth nor disturb the stomach, and it is ready for almost immediate absorption and assimilation by the blood. It is the people whose blood is rich in iron who possess the greatest strength, force and energy. If you are not strong or well you owe it to yourself to make the following test:

See how long you can walk or how far you can walk without becoming tired. Next take two 5-grain tablets of Nuxated Iron three times a day after meals for two weeks, then test your strength again and see how much you have gained. An astonishing number of nervous, run-down people who were ailing all the while, have greatly improved their health and increased their strength, energy and endurance simply by taking this newer form of iron. For sale by all druggists.

\$25,000.00 REWARD

Will be paid for recovery of lost diamonds and other precious stones

During the coming year over \$25,000 will be paid by owners of jewelry for the recovery of lost diamonds and other precious stones.

How much of this reward are you going to pay? There are hundreds of diamonds lost each year through neglect of not having jewelry examined occasionally or through poor setting.

Better have your jewelry examined now and continue to have it examined every few months.

Also now is the time to have that old fashioned jewelry remodeled into up to date designs of rings, bar pins or whatever you desire. The Kruger Jewelry Co. and Art Jewelry Co. will give you expert service on examining your jewelry or in remounting your diamonds into up to date designs.

Expert service and advice is the motto of these up to date stores. If you are not a customer of the Kruger Jewelry Co. or Art Jewelry Co. then visit the

Wichita Falls Jewelry Service Co.

CHARLES PEIFER
Ward Building, Eighth and Ohio Avenue, Room 1
You will expect service and your jewelry will be examined free of charge

Diamond setting our specialty,
Diamond jewelry repaired and reset

Remember it is better and cheaper to have those diamonds examined than to lose them for they need looking after and cleaning every few months. There is no time like the present time. Let us take care of your jewelry for you and keep it in first class condition.

AUTOMOBILE NEWS

Among the Dealers

M. A. Mappin of the Willard service station left for an extended business trip through Oklahoma.

Claude Hall of the Lloyd Weaver Company reports the following deliveries for the week: Hudson Speedster to Mrs. Weldon Hall of Vernon, Essex coach to H. B. Hines, more than good with the Hudson and Essex dealers, the chief trouble being getting enough cars to supply the demand. Announcement was made today that the Lloyd Weaver company has secured the agency for the Lafayette.

Arthur Huff is a loyal supporter. He is just back from a trip to Fort Worth and Dallas where he witnessed the game.

The Kalm Motor Co. received two car loads of cars last week. They stayed in the house (the garage) to be washed. Stained covers are of hand for many a car.

J. D. Moulder has one of the cleanest jobs in town on his floor. The new Cleveland Chesterfield model.

Carl Waelder's new Franklin has been attracting lots of interest. The designing engineers at the Franklin factory seem to have worked miracles.

Frank Quiesner is back on the job after a very satisfactory trip to the Marmon factory. We believe it was satisfactory in most respects, however Frank says these folks can change a power game around on its own mother wouldn't know it.

Colquhoun in the car, followed by sharp explosion in the muffler indicated a wrong adjustment of the auxiliary air valve. On the other hand, coughing followed by a choking down and stopping of the motor, indicates that there is water in the gasoline.

COMPANY POSTS 'DON'T'S' FOR ITS TRUCK DRIVERS

To insure better care of its motor trucks by their drivers, one company operating a fleet of Republic trucks keeps the following list of "Don't's" posted in a conspicuous place on their loading platform:

Don't try racing with a touring car; your truck was built for strength not for speed.

Don't wash your truck frequently; a dry car can spoil a lot of our advertising.

Street car tracks are nice on wheels, but hard on tires—and steel is less than rubber.

Don't neglect a loose part, even though it seems to operate more freely that way.

Don't forget to watch the other fellow ahead; a slow stop on your part nearly always costs you a punctured radiator.

Use your brakes when getting up a grade; platforms were built to lead from not for bumping posts.

Don't drive too close to the curb; edge-trimming is a fine institution for six cents, but too expensive for truck tires.

The steering wheel is vastly important, but it is well also to give the grease cups an occasional turn.

Don't slide the rear wheels when stopping; rubber pavement polishers are too much of a luxury.

MIX GAS AND WATER FOR FUEL, SAYS INVENTOR

C. F. Degner illustrating the principle of his fuel generator. (Inset) The generator in place.

Take two-thirds gasoline and one-third water. Mix them in your gasoline tank, press the starter and off you will go!

This surprising combination is the fuel for a new form of automotive device to take the place of the carburetor. It is the invention of C. F. Degner, of Los Angeles.

Degner calls his invention a fuel generator. Tests by it were made recently at the Pratt Institute, in Brooklyn, N. Y. where it was said the device was superior to 33 carburetors of different makes which competed with it.

The generator is constructed on the principle that a current of air passing through the mixture of water and gasoline will cause the formation of a fuel gas. It is installed in the same relative position as the carburetor, but with a larger intake pipe. Another pipe leads to the exhaust from which the air pressure is taken.

Degner says this fuel is not only cheaper, but it will produce more miles on a gallon than pure gasoline will.

SERVICE FIELD IS ENLARGED BY UNITED MOTORS

Mr. L. M. Foster of the Electric Service Co., authorized distributor in this city for United Motors Service, has just been advised of an enlargement of the service field, covered by United Motors, and his announcement regarding this follows:

In accordance with a policy of General Motors Corporation to consolidate their accessory service parts business under a single management, Hyatt Roller Bearing Company, Newark, N. J., and New Departure Mfg. Co., will divert the distribution of their service-replacement bearings from Bearings Service Co. to United Motors Service, Inc. on Oct. 1, 1922, according to a statement made by R. E. Lana, president of United Motors Service, at Detroit.

United Motors now represents the factories for service on Dues and Remy starting, lighting and ignition systems and Klaxon warning signals, and sales and service of Harrison radiators, cores, Jaxon, rims and wheels, and A. C. speedometers. While Hyatt roller bearings and New Departure ball bearings are listed as new lines by the company, they do not represent an entirely new activity for either the management or field personnel, it being pointed out that Mr. R. E. Lana, president of United Motors Service, was for seven years chief engineer for the motor bearings division of the Hyatt company and subsequently for four years was president of the Bearings Service Co.

United Motors Service was incorporated October, 1916, and now operates through 21 direct branches and approximately 400 distributors and dealers. This company is the national sales and service organization for the General Motors products mentioned above.

Since one or more of the products listed are used on every motor car, this addition of Hyatt roller and New Departure ball bearings by United Motors will make their branches even more convenient than formerly as a source of supply for motorists and dealers.

5708,088 CARAVAN OF NEW FRANKLINS ARE DRIVEN AWAY

SYRACUSE, N. Y., Sept. 9.—The largest single day's movement of automobiles out of the plant of the Franklin Automobile company took place today when 57,088 cars of the new series, to be announced next week, started to their destination by highway routes, in the hands of dealers and their representatives. The retail value of this drivesway totals nearly \$700,000.

Over 200 automobile tradesmen, representing 24 states and Canada, were invited here by the Franklin company to learn the details of the latest product of the local factory in which the new motor, which has been under development for five years, is featured in the Franklin Six. The arrangement of the record drivesway was made in order to afford these dealers an early opportunity to experience the increased power which is prominently mentioned in connection with the performance of the latest car.

In numerous cases, dealers are traveling over 1,000 miles on the homeward trip and in the case of San Antonio, Texas, representative, a distance of 2,000 miles is to be covered. The wily scattered territories to which these cars are going are represented by such towns as Kenilworth, N. J.; Raleigh, N. C.; Atlanta, Ga.; Memphis, Tenn.; Chicago, Ill.; St. Louis, Mo.; and Kansas City.

Through arrangements with the city authorities, a parade a mile and a half in length was staged through the principal streets of Syracuse during the noon hour. A detail of traffic police escorted the various divisions of the proceedings to the highway exits from the city.

Beginning today, all cars shipped from the Franklin factory will be of the series 10 type. Franklin officials announce that the production schedule for the new car is the largest which has ever been set by the company.

DEMAND FOR JORDANS AS HEAVY AS IN SPRING

Today's demand for Jordan cars is fully as heavy as it was in the spring," said Edward E. Jordan, president of the Jordan Motor Car company.

"The announcement of the new Blue Boy has flooded us with orders. Fully two-thirds of the production, scheduled for September will have to be turned over to this popular four-passenger model."

"We had a record breaking month and with no let-up in demand in sight, the factory has a day's schedule will be continued through September."

Times West Ad. brings results.

AUTO TRUCK IS ESSENTIAL PIECE OF FARM EQUIPMENT

One of the greatest boosters of the automobile truck as a boon to farmers is Mr. Quiesner of the Exits Motor company. In discussing conditions in this line yesterday he said:

"The automobile has accomplished wonders for the farmer in improving his social life, but the motor truck has proven fully as great a factor in improving his business interests. To say the motor truck is an essential piece of farm equipment is repeating a platitude, but the truth of the statement is indisputable. With its running mate, the tractor, it has done more to revolutionize the business of farming than any other factor evolved during the past two decades. Certainly no farmer who uses a truck considers it anything but indispensable."

"Due to his load and road conditions, the farmer must be even more careful in selecting a truck than he is in selecting a passenger car. With loads usually ranging from a ton to three thousand pounds, the stumpy, cheaply-built vehicle is entirely unsuited to the farmer's work. Unimproved roads, adverse grades and other factors of farm service call for lots of power and stamina. The logical vehicle is one that is of light weight in relation to its carrying capacity, equipped with pneumatic tires, that has mechanical ruggedness and that is capable of holding 'around' 2000 pounds. That the farmer has discovered this is evident from the demand of Speed Wagons in the rural districts."

If you contemplate going on a long tour it is well to carry along a 21-foot length of one-half inch Manila rope.

DISTRICT AGENT PLEASED WITH CONDITIONS HERE

Mr. George E. Sill, district representative of Dodge Brothers in the Dallas district, who visited at McFall Brothers yesterday, was a visitor at McFall Brothers yesterday.

Mr. Sill was recently appointed to the post, succeeding D. A. Carson who was transferred to the Atlanta district. This is Mr. Sill's first official visit to McFall Brothers territory.

In company with J. M. McFall, J. A. McFall and L. M. Cregor, Mr. Sill visited the McFall Brothers associate dealers at Henrietta, Burk Burnett, Elletts, Vernon, Quannah, Crowell, Munday, Seymour and Graham.

Mr. Sill expressed himself as being very favorably impressed with conditions in general in the territory and the wonderful building progress made in the city of Wichita Falls since his last visit here, three years ago. Mr. Sill was also immensely pleased with McFall Brothers business and the high quality of representation throughout the territory.

The recent improvements in the sales and service departments of McFall Brothers came in for a great amount of praise.

AUTOMOBILES WILL KEEP ALL MAILS MOVING, PROMISE

WASHINGTON, Sept. 9.—Automobiles will keep the mails moving, even if the railroads are stopped altogether.

This is promise made by Fred H. Caley, secretary of the National Motorists' Association, in offering his organization's aid to Postmaster General Work.

"The ten million motor car owners in the United States," wrote Caley, "can and will be of material benefit for both transportation of mail and commerce."

It is Caley's idea that every motorist could help deliver mail from one city to another, in connection with any tour he might be making. Since every highway always has its motorists going back and forth he sees no trouble in moving the mails by a relay system across the country.

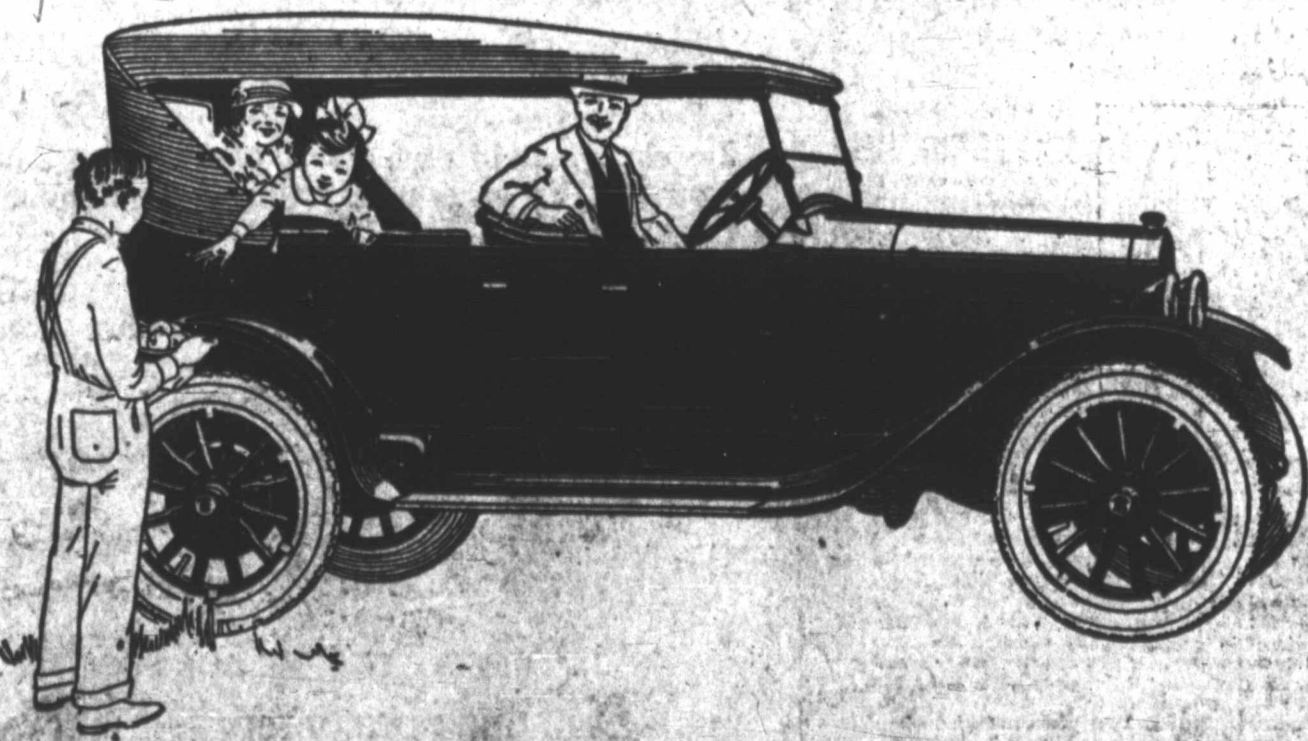

"We are suggesting to the affiliated clubs that they offer their services to the local postmasters," said Caley.

DODGE BROTHERS MOTOR CAR

A constant unremitting process of betterment has been Dodge Brothers policy from the first. Consistent with that policy, the body lines of the car have recently undergone a new and distinctive revision in design.

The new radiator is singularly smart and graceful. The cowl is higher, and more vividly expressive of the car's roominess and abundant power.

Further improvements in the vital mechanism have notably increased the excess margin of strength which has always characterized the car in every rugged detail of its structure.

THE MOTORISTS' PROBLEMS

By WILLIAM H. STEWART, JR.

Motor Department: Are there any in your neighborhood who have a 1921 Ford touring car which has a funny humming noise in the engine when going more than 15 miles per hour? Have looked at all bearings and they are fine. I cannot locate the noise. Thanking you for any information.—C. E.

Probably the humming noise is caused by the timing gears being worn or meshed too tight.

Motor Department: I have a Chevrolet four-cylinder model 18 which runs good while the motor is hot. After it gets hot it seems to misfire and the motor if you let it run it will quit. I have noted the carburetor and intake manifold gaskets for air leaks and they are tight. The motor is stored properly, the wiring and spark plugs are in good condition and the oil gives a good spark. The valves do not stick and the radiator is not cleaned up. Please tell me what the trouble is.—L. M.

Motor Department: Could you give me any information as to the loading of the crank shaft and fly wheel for eight cylinder and 14 cylinder engines, that is 90° crank shaft set at 90 degrees and 2 cylinder 45 degree motorcycle engine? I have taken the fly wheel out of the motor with the connecting rods and the crank shaft and the crank pin and the fly wheel to much heavier on one side. The motor has lots of power more than the average motor of this size, but the no power like one cylinder of the same make of motorcycle which can make from 20 to 30 miles per hour.

Motor Department: I have a 1922 model Ford coupe used for 2 1/2 months. Having read your department for several years with interest and profit, I am asking for some information for my motorcycle needs.

(1) How often should a Ford timer be cleaned. How often oiled? How? With what kind of oil? (2) I have a knock in my motor, apparently a spark knock that occurs only in strains when spark is well advanced. Would the removal of the carbon from cylinder head tend to relieve this knock? Are there any special precautions of direction to follow in the removal of the cylinder head and scraper of the carbon by myself, a compressive material? How often does the differential ratio of a Ford need to be filled ordinarily? I am also bothered by not knowing when it is best to drive my Ford on the battery or magnets in order to best conserve my current from my battery. My battery is strong, new, registered about 1922. I have been driving on lights on battery if driving slowly and starting on magnet. Is this best? When switch is on magnet does generator get current into storage battery the same as if on battery? Does it also take "jolt" out of battery if driving slowly with lights on magnet?—C. F.

Motor Department: My car is an old one, with a brass radiator and brass lamps. As I am tired of polishing them I should like to know if there is some way. How shall I do this? Thank you.—E. M.

Your supply dealer has a preparation which can be applied with a brush. Follow directions on can. If a more durable finish is desired the lamps may be blackened. This is easily kept clean, but must be done at a shop-plating works and so is more expensive.

Motor Department: Am retaining my clutch, changing from leather to shimlock brake lining. Will it be necessary to change the angle of the clutch face? Will a smooth operation of the clutch adjustment tend to trouble a car?—L. C.

No change in the cone is necessary.

Motor Department: Have a 1918 Ford roadster that I expect to have fixed up for probably two months or more, including general overhauling, painting, etc. Would appreciate answers to the following queries in your valuable column: 1. The tires are all in fair shape and are worth preserving. Would it pay to remove them and store in a cool place? 2. Intend reworking block and installing oversize light weight pistons, replacing present valves with Footlock valves, and replacing present camshaft with "Lightning camshaft" which I am told opens valves more than regular cams. Have you heard of a camshaft of this name or description? If I make the above change in cams and valves will it be necessary to change the timing of motor? 3. Am told the intake valves and cams will increase the speed and power of motor but will decrease amount of fuel, and reduce mileage the change. 4. Am told it will increase speed of motor but will deduct from the power. What do you say? 5. Desires to increase speed of car but do not want to take from power to any great extent. Also intend installing three to one gears in addition to above changes. The car does not seem to have the speed it should with regular gears as I can hardly get 30 miles out of it. 6. My indignation of information will be appreciated. Do you advise installation of water pump? Would it really improve the cooling system to use marked separator? 7. Deflate the tubes to about 10 pounds. Leave the tires on the wheels which should be jacked up. Clean and wrap the tires with burlap and store in a cool dry place. Regrinding of cylinders and fitting

of new pistons is common practice in order to obtain greater efficiency and power. It hardly seems worth while to change the design of the engine unless you wish to experiment. We hesitate to advise you to depart from the manufacturers approved design. If the cooling system were defective, the manufacturer would undoubtedly change over to the pump system.

Motor Department: Please tell me if a 4 cylinder car will run faster than a 6 cylinder? Also, did a 6 cylinder car ever win a race at the race track? I ask this because of the discussion as to whether a 4 or 6 has more power. It would seem that the two extra cylinders on a 6 should increase the power at least 20 per cent.—A. M.

If the 4 cylinder engine and the 6 cylinder engine develop the same power they will drive a car at the same speed. If the cylinders of the two engines are of the same bore the six cylinder engine will develop more power. It is the custom, however, as the number of cylinders is increased to make the bore smaller, as it is not increased power that is required but great flexibility and smoother action, and if one cylinder misses explosion the effect is not so serious. Several six cylinder cars have made good records in

fact, but we have none of the records available.

Motor Department: Would like to know how to locate the trouble when lights go out with battery in good condition. Sometimes all lights go out and then sometimes only one or two. Have had this happen to me a number of times, but always had to take care to garage. A little information on lighting will be a benefit. How is a fuse tested for being burnt out?—C. S.

Test a suspected fuse by turning on lights and removing one of the fuses which carries current. Place fuse to be tested in its place. If lamps light the fuse is good. When all lights go out look for loose contact or broken wire between battery and frame, or battery and switch box. If one or two lights go out inspect wires leading to those lights. Get all the information you can about your system from the manufacturer and read up on other systems, using some one of the leading books on the subject of lighting, starting and ignition.

Motor Department: The brake rods under my car are continually snapping up and down, making a disagreeable noise and sometimes

striking the floor boards of the car, especially when it is heavily loaded. Please tell me if there is any remedy for this.—W. H. M.

Some sort of guide installed at a point not to interfere with the brake and action would be advisable. Also take into consideration the spring action. Perhaps you can install small springs which will create a

tension on the rods and prevent excessive vibration.

HELPFUL HINTS.

Did you ever wonder why the engine does not get the accustomed pop or why the lights burn dimly or the ignition seems poor. Unfasten the wires and bars at the

battery terminals and notice if they are clean. They must be clean if current is to flow freely. Scrub off any grease or white deposit; use sand and spread a little cup grease over the parts to prevent corrosion.

Seat covers can usually be cleaned with a non-alkaline soap and warm water.

Supreme Court of the United States
Wichita Falls, Texas
April 24, 1923

EXHIBITOR MOTOR CO.
Wichita Falls, Texas

September 11th, 1923. I purchased a Light Six Studebaker touring car. I have concluded that for the Studebaker touring car, the best value is the Studebaker Corporation touring car. I have owned a Studebaker touring car for a long time and I have never had a better car than the Studebaker touring car. The Studebaker touring car is the best of the lot.

Mr. Keim, I can also testify to the very fact that the Studebaker touring car is the best of the lot. I am a Studebaker booster. Ask my friends. Yours for continued success, C. V. LEMEN

WE HAVE MADE WICHITA FALLS A STUDEBAKER TOWN

A "Four" That Sets a New Standard
The 1923 Buick Four Touring—\$885

In beauty of appearance, dependability and economy of operation the Buick four-cylinder, five-passenger Touring has established an entirely new standard for four-cylinder cars.

Its low body with its clean, straight lines, accentuated by the high radiator and straight hood, give it a long, racy appearance that is new to cars of its class. Massive crown fenders add to this distinction, as do the snug-fitting, slapsly top and the handsome drum-type head and cowl lamps.

And with this beauty has come a new riding comfort. The seats are deep and low with full leg room in both compartments. The steering column has been changed in position to increase driving ease and the gear shift lever has been raised to meet the driver's hand. A transmission lock, a windshield adjustable from the inside, and a transmission-driven speedometer likewise are among the many new refinements of this model.

Material changes also have been made in motor, chassis and body construction which contribute still further to the wonderful performance record characteristic of Buick cars for twenty years.

The Buick Line for 1923 comprises fourteen models:
Four—2 Pass. Roadster, \$885; 5 Pass. Touring, \$925;
5 Pass. Coupe, \$1175; 6 Pass. Sedan, \$1305; 6 Pass. Touring Sedan, \$1525; 6 Pass—2 Pass. Roadster, \$1175;
6 Pass. Touring, \$1195; 6 Pass. Touring Sedan, \$1305;
6 Pass. Sedan, \$1365; 1 Pass. Coupe, \$1125; 7 Pass. Touring, \$1155; 7 Pass. Sedan, \$1215; Sport Roadster, \$1025;
Sport Touring, \$1075. Prices f. o. b. Flint. Ask about the G. M. A. C. Purchase Plan, which provides for Deferred Payments.

JORDAN

COUPLE TAKES HOME ON 3-YEAR AUTOMOBILE TOUR

Travelling home of J. T. Kette. Below: Left, the "kitchen stove", right, same as buffet.

NIA Service.
SEATTLE, WASH., Sept. 2.—For the next three years Mr. and Mrs. J. Kette will be visiting small-like, very part of the United States. Small-like, not in speed, but in the fact that their home will be moving with them.

The Kettes have built a comfortable bungalow on a small one-ton truck chassis and are already on the road. The traveling home provides all conveniences a young married couple would want.

The body, of wood with a sheet iron covering, has front and rear entrances. Windows on each side, with honey curtains, provide light. Tank under the rear carries 25 gallons of water. Lockers on each side carry food. An ice box, in front, can be opened by the driver without stopping the car.

Five minutes' work converts the compartment into a dining room, kitchen, bed room or living room.

Hiding back a cover makes an oil stove ready for cooking and swings out two cabinets containing silverware, utensils and dishes. The meal prepared, a table for four people lifts up from the wall on the other side. To the rear, an inviting couch in daytime is made into a full-sized bed at night by releasing its spring holders.

A sewing machine can be swung out under the work table when needed. A full-length mirror and drawers, combined with an ingenious clothes closet, provide wardrobe facilities. A medicine chest on the wall can be converted into a writing desk by turning it around.

Carpet covers the floor, electric lights the interior and a canary the final home-like touch.

The Kettes have already covered distance enough to tell the value of their modern ark. They will reach Washington, D.C., in time to attend the shriners' convention next year.

forced in place. After starting the fire in this manner, it should be forced in place further by stamping on it, first one side then the other.

Two parts of iron or steel that have become rusted together may be separated by soaking them for several hours in a mixture of one-third kerosene and two-thirds benzene.

When mud is allowed to remain on the brake rod cleaves and other similar parts it soaks up the oil designed to lubricate the points, which become dry and wear excessively. All such parts as this must be cleaned regularly and have fresh oil applied to them.

In some cars looseness of the engine bolts which hold the water in place may cause misalignment of the engine, resulting with serious consequences. If there is even a slight looseness of the bolts it may permit the engine support to hammer and in time the supporting arm may actually break off.

If you find that your wheels are not true, jack one up at a time and place a stationary point almost against the felloe head, then revolve the wheel to determine if the distance between the stationary point and the felloe is the same at all points on the circumference.

Motorcycle Notes.
Inch-wide rings cut from an other-wise suitable pneumatic tube are the best things keeping closed, puncture outfit boxes, the spare box and others one must carry in the tool kit.

A visit to the makers of one's carburetor might result in doubling the mileage per gallon, and without loss of speed. A brand new machine may have a jet three sizes too large.

Stale carbide refuse will gradually eat through the metal of the generator if it gets the chance. Always clean out carbide from the container directly it is spent. If it has caked into a solid mass, soak the container in water for a time, then scrape vigorously with a blunt knife.

If your machine, having run like a bird last time it was out, refuses to start some morning, look to the magneto rocker arm, which may be stuck slightly owing to a thin film of congealed oil. The points neither making nor breaking. A squirt of oil over the commutator will fix it.

The way to remove a driving belt without pinching your fingers is to place a screwdriver between the belt and the low part of the back wheel belt rim, push the machine forward and the belt will then run off.

If you have a slow leak around the base of your tire valve, as there is nothing more annoying than a slowly deflating tire, fit a supplementary hard leather washer over the rubber cap that is usually fitted. This will usually affect a cure.

It is most important to flush out the crank case with paraffin every thousand miles or so, recharging afterwards with half a dozen pumpfuls of fresh oil, for much foreign matter gets into the tank when the oil is not strained or the spout of the can wiped free from dirt.

The simplest way to test whether your side car is running parallel with your machine is to measure, with a piece of string, the distance between the center of the side car tire and of the back wheel tire. Measure from four points, corresponding to 12, 2, 6 and 9 o'clock on a watch face, and if these four measurements are dead equal you are all right.

F. D. Harman, Cedar Falls, Wash., has invented a device that warns the driver when a tire is deflated.

Texas-Oklahoma Fair, September 25 to October 4, Wichita Falls.—Advt

KNOWLEDGE FOR CAR OWNERS

Interesting and Important Facts That Every Motorist Should Know.

Don't fail to inspect your car at different intervals.

Never push the starter while the motor is running.

Dim your headlights when another car is approaching on a dark road. This is the cause of many dreadful accidents and is a case of criminal negligence.

A properly lubricated steering assembly should never work hard.

Dampness must be excluded as far as possible from the place where you store your car.

Oil of any description should never be used on tires or tubes as its action will rot the rubber.

If you store your car for any length of time, disconnect electrical cables and remove the storage battery.

In replacing a shackle, thoroughly oil or grease the surface of the shaft and if possible rotate it as you replace it.

Make sure you use a clean chamber or piece of cotton and polish the reflectors with circular strokes.

A bath of kerosene will never hurt the working parts of the overhead valve mechanism—it will often loosen gummed valves.

Do not, under any circumstances, run your car on the starter, and do not run the starter longer than thirty seconds at a time.

You will find that a spark plug is more readily removed, if the threads are wiped with a good graphite when the plug is put in.

A leather washer placed beneath a metal washer not only tends to stop rattling, but affords a compression that often saves a bolt being stripped off its threads.

Soap and water will remove dirt and grease from the running boards but a clean rag saturated with kerosene will make them as new.

When the brakes are not evenly adjusted they throw the vehicle sideways.

If the springs are oiled at least once a week ridine will be found much easier.

Never screw or nail anything on the coil box as it will injure the box and disarrange the coils.

Less gasoline is used when driving at an even speed than it is when running slow and then suddenly speeding up.

Speeding shortens the life of tires because the faster the speed the more heat there is generated.

It is just as important to correctly adjust tappets on a new car as it is on one that has seen service for several seasons.

The proper method of mounting straight side tires is to lay the rim on the floor, inserting the valve stem of the tire in its proper place. The bead for ten inches on both sides of the valve should then be

Paint this Fall and Save Money

WINTER is the most destructive season on paint; particularly if the paint has begun to wear off. Cold rains and snows find every little crack and cranny, and quickly start expensive damage.

If your house needs paint this fall, put it on; don't get it off. By waiting until next spring you will have to buy more paint and pay more for putting it on, to say nothing of possible repairs.

The right time to paint is right before your building needs it—not afterwards. You don't let your crank case go dry before filling it with oil. Then why not use the same brand of common sense in painting?

And just as you use the best brand of oil, why not use the best brand of paint? We suggest that you paint this fall—now—with Lowe Brothers High Standard Paint.

PART TWO

ALFALFA MAY BE ONE OF SAFEST AND SUREST CROPS UPON IRRIGATION TRACTS

By FRANK S. REID.

A certain suggestion prompted the writer to mention something about one of the greatest legumes we have, grown in many of our agricultural sections throughout the United States. I refer to alfalfa.

A peculiar legume it is, adapted to certain kinds of soil, thrifty to the last word when grown under proper environments, adds richness to a soil that cannot be surpassed, is not to be outclassed anywhere as food for animals, and of later years many products fit for the human family are being made from alfalfa.

There are a number of varieties of alfalfa which were brought into the United States through department of agriculture agents. Many of these varieties, came from Russia and naturally are very hardy and adaptable to a cold climate, where winter has a tendency to kill.

Particularly does the western irrigated lands favor the alfalfa plant. Where a deep, sandy soil would be usually a failure, alfalfa grows in all its luxuriance. I am quite familiar with its growth in the irrigated lands of southeastern Idaho where remarkable yields were obtained.

Many parts of Texas are to be found growing alfalfa on the irrigated sections and on the plains country. The seed of the alfalfa looks much like clover seed. Of course, in obtaining seed, one should look for seed testing high in germination and free from weed seed. In the irrigated sections of the west the seed may be planted either in the spring or the fall. Experts tell us to plant top or winter alfalfa in the spring, which is sufficient, but the writer's experience has been that of planting from fifteen to eighteen pounds to the acre, and has never regretted planting this much seed.

Many of the ranchers of the west sowed it with a grain crop. They would either sow the seed into the sower with the grain and sow it together, or plant the grain with a drill, then broadcast alfalfa seed on the alfalfa seed. Perhaps seeding the grain first, then the alfalfa seed, is the best for grain requires deep planting, while alfalfa requires a very shallow planting, and if planted too deep, much of the seed will fall to come up, since it does not have the strength to sprout to get up out of the ground and usually dies before it reaches the surface.

The writer noted that alfalfa planted in the spring of the year when danger of much frost is past, makes a good growth and the alfalfa in the fall, so perhaps much is not gained in planting in the fall outside of the fact of heavier work in the spring of the year when we are to be done.

In the irrigated sections of the west, if there has not been much winter moisture, the ground is usually irrigated, then plowed and harrowed to conserve the moisture, leveled and carefully prepared in all details for the reception of the seed. The seed is then planted, the ground corrugated (little furrows to run the water through), for irrigation, and much water applied to the growing crop for alfalfa requires a good deal of water to get it started, keep seed from blowing on the freshly plowed ground that would cut the tender young sprouts. It grows rapidly once it gets started. The first cutting may be obtained late in the summer. After the first year, three cuttings are obtained, except in some sections where seven to eight cuttings are obtained.

In Idaho the first cutting is usually made in June, the second in July or first of August, and the last cutting in September or early in October. These cuttings may be put on the ground for several months before it is necessary to feed from the stacks.

One of the great secrets of splendid hay is the proper handling and getting it into the stack at the right time. During the hot days of summer, when the sun dries out alfalfa, it is a task to get it up before the leaves all shatter from the stem and become too dry. So the stack will not rot, it and so it is the best practice to cut a small portion of alfalfa, rake it up into windrows, then bunch it right away and let it stand, then when put up, it is in the prime of condition. Of course, there must not be too much dampness for it to cause mold in the stack, and a possible danger of

burning up a stack, and though strange as it may seem, alfalfa may start to mold in the stack and become brown and rancid smelling, yet it has not lost one pound of its wonderful food value. I have seen sheep leave green alfalfa to eat brown, mouldy alfalfa.

To get the hay up hurriedly at the proper time requires the proper kind of implements. In the west where hundreds of tons are put up, several methods are employed. One is by means of a derrick pole and Jackson fork, a five tye fork. The green sheeps are loaded on to the wagons and hauled to the stack where the Jackson fork is used to take the load from the wagon, that the stacker may properly place it and build his stack.

Perhaps one of the best ways and the quickest is by means of slips and slings. Slips made of rough boards, varying in length from eight to fourteen feet and eight feet wide. These slips are drawn along the ground. A sling chain is placed triangularly on the slip and the alfalfa is loaded by the pitchers in the field. When 700 to 1,000 pounds are so loaded, the load is drawn to the stack site, where it is hoisted to the stack, tripped and dropped into place wherever the stacker may wish it in building uniform stack. This is a very quick and satisfactory method and is especially to be desired where it is necessary to get up a large acreage and put it into the stack quickly.

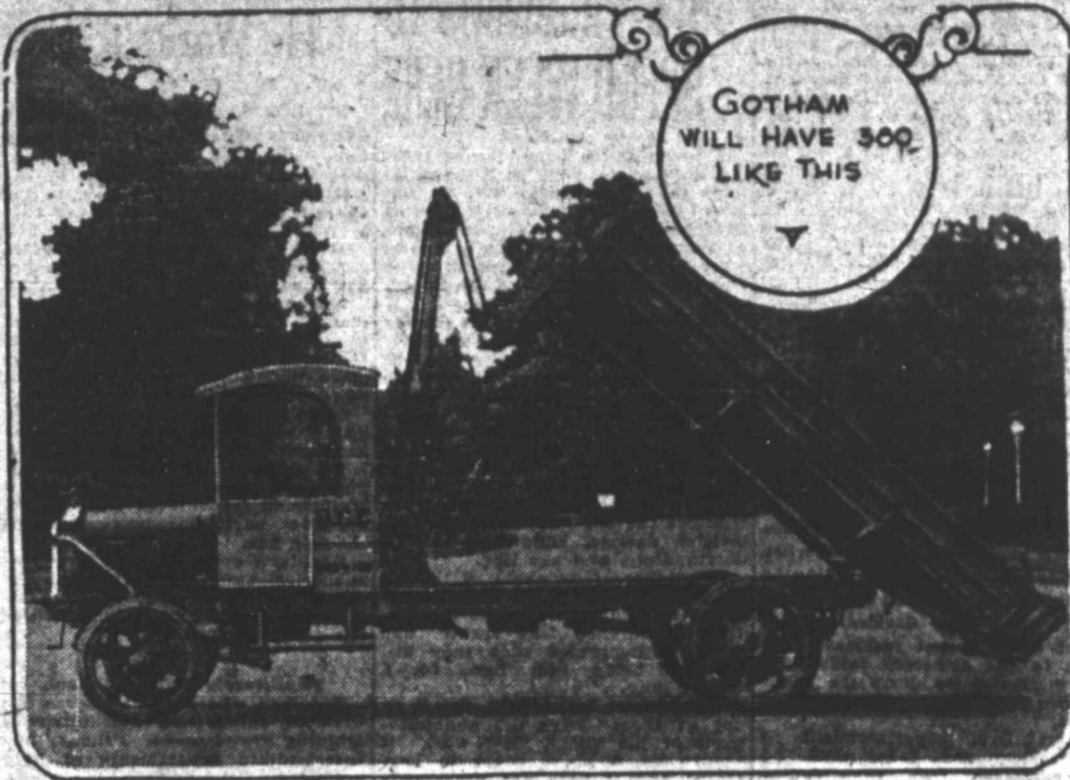

Some use ball rakes in sweeping it in, but the damage caused by these rakes tearing the hay is quite serious and perhaps is not always to be recommended. I have seen several hundreds of tons of alfalfa in one stack. I have handled it through every stage of its growth into the stack and out of it, either through feeding or baling it. A wonderful feed it is. Keeps stock sleek and fat, though in seasons of heavy demand alfalfa grain must be fed with it. For cows giving milk it is not to be excelled, but a dangerous feed when wet with dew, for cows or sheep hoist on it and many die, and so this must be watched, but when fed properly stock eagerly devour it and do well on it at all times.

Perhaps one of the best ways to get the full value out of feeding alfalfa hay is to run it through a chopper, or better still, a grinder that powders it, so that none of it is lost and more easily digested by the stock. Many sheep owners prefer to chop it when feeding to sheep, for sheep like the leaves and usually waste a great deal.

Several years ago the writer was in attendance at the National Land show held in Chicago, and wonderful exhibits of alfalfa products were on display, for alfalfa tea and many other products were to be found and are to be found today, made of alfalfa.

One of the things that has not been satisfactorily explained is how to raise alfalfa seed. That is a hard problem to solve. Out in the west where alfalfa was supposed to know, they advised the newcomer to do thus and so to raise seed, but these things didn't always work out. One would say to use plenty of water, and another would say to stunt the growth. I have observed alfalfa plants six feet high along an irrigation ditch bank loaded with seed where the roots had access to water all the time, and seeds. I have seen a plant not more than a foot high simply black with seed, where not a drop of water had touched it. It is a fact, though, that one has much to do with seed. Sometimes the first crop of alfalfa is left for seed, but this perhaps is not necessary when it

CITIES ARE USING GREAT TRUCK FLEETS TO KEEP STREETS CLEAN—NEW YORK ORDERS 123 MORE WHITES

A contract for 123 five-ton motor trucks, just awarded by the City of New York to the White Company, Cleveland, following a previous order for 212 trucks of this make, some time ago, gives the White Company the two largest orders for motor trucks ever placed by a municipality and gives the street cleaning department of the City of New York the largest known fleet of standardized heavy duty trucks.

Specifications required bidders to produce verified records showing at least 100 heavy duty trucks which have covered more than 75,000 miles. This requirement was a simple one for the White Company, which qualified in this respect two years ago.

One hundred and twenty of the trucks will be equipped with power dumping bodies developed especially for refuse collection under the conditions existing in New York. Each will carry six yards of refuse. They will be used for all phases of street cleaning work, including the removal of ash, garbage and snow. Six will be provided with winches and two will be equipped with apparatus for handling wrecks.

New York City has found motor trucks essential in keeping its thousands of miles of streets in a sanitary condition. The city has a nationwide reputation for clean streets and because of the constant growth of the street cleaning problem, large investments in motor equipment have been necessary. To protect the city against the blocking of thoroughfares by heavy snowfalls, such an investment two years ago when New York traffic was paralyzed for days, a method of attaching snow plows to the front of the trucks was developed and, on short notice, the city can throw into service a great battery of snow fighters.

are expected to arrive within the next week. One automobile owner who inspected the new car received Friday morning stated that in his opinion it was the best looking car that he had seen in years. After a ride around the city for a few minutes, he declared that "it runs like a top."

Corroded terminals are one of the most frequent causes of ignition trouble, and it is not generally known that the best agent for cleaning them is a strong solution of washing soda. After the corrosion has been removed and the terminals dried, grease the parts well with cup grease or vasoline.

Have you seen the new Lafayette? It is being exhibited on the floor at the Lloyd Weaver automobile showroom and according to many automobile owners, is one of the "cutting edge" pieces of manufactured product seen. Mr. Weaver has secured the agency for this new automobile for northwest Texas. The automobile is manufactured in Indianapolis, Ind. and in certain parts of the country, since its brief existence has taken it by storm. The new car is an eight-cylinder and is being made in all the very latest models. The one now on exhibition at the Lloyd Weaver showroom is of the torpedo style, a sort of sport model. It accommodates four passengers. Two more models

ASKS ASSISTANCE IN ENFORCING OF ATTENDANCE LAWS

Juvenile Officer R. L. Tolson stated Saturday that he was in position to enforce the school attendance law this year more rigidly than in the past and further stated that he solicited the aid of people in all parts of the county to assist him in enforcing the law. He stated that all information would be regarded strictly confidential and that he would not require his informant to give his name in reporting any case. The same rule as was laid down a year ago is again in force, according to the juvenile officer, who stated that it was either a case of attending school in Wichita county or attending it at Gatesville or Gainesville. No exception to the law will be tolerated, he emphasized.

Schools open Monday morning and a rigid enforcement of the attendance law will begin immediately.

There are some 6,000 gasoline stations in New York state. Keep your eye on the gasoline pump for full measure.
