BRYAN DEFIED BY SULLIVAN

Illinoisan Denounces Alleged Ambition to Dictatorship

THE LIE PASSED

Challenges Bryan to Throw Up Candidacy Unless Assertions Prove True

Special to The Telegram, NEW YORK, Sept. 8 .- Roger C. Sullivan, Illinois member of the national sued a lengthy statement in which he replies to the recent attacks made upon-him by Mr. Bryan. The following is an abstract of Mr. Sullivan's re-

"In his Jefferson Club . banquet speech at Chicago Tuesday evening W. Bryan again saw fit to make me the excuse for exploiting his new ambition to convert the democratic party of the United States into an autocracy with himself on the dictator's throne. I regret that he has done so, as I would regret any incident or circumstance tending toward discord in the democratic party.

"If rertions of Mr. Bryan's speech enything they mean that he would rather have his own way than have the democrats elected to congress or any other office. He has invited all Illinois democrats who agree with him in his opposition to me to bolt their ticket. If there are any democrats in Illinois who are disposed to act on this typically Bryanesque advice, many of them, unfortunately, will be found in congressional districts which are close, but in which, with united (ifort, we have a good chance to elect a democratic congressman. If these districts send republicans to the national house of representatives the democratic party of the nation will

have Mr. Bryan to thank. "Mr. Bryan says: 'I examined into his (Sullivan's) conduct of the Springfield convention before I took part in the attempt to unseat him, and at the St. Louis convention I had in writing a request for his repudiation signed ly more than half the delegates to the convention.' That statement is not true. Mr. Bryan knew it was not true when he made it. Mr. Bryan has rever substantiated it with evidence. "Mr. Bryan and his associates at St. Louis made the statement that some 500 delegates in the Springfield convention had signed petitions or letters repudiating the action of that convention. They never presented any such

number. They presented some. Charges of Forgery Made

"The other side at the same time resented telegrams and affidavits certifying that nearly all of the signatures presented by Mr. Bryan and his assocates were forgeries. He insinuated that I make money out of politics, and that his sincerity, therefore, compels rim to oppose my participation in democratic affairs. The plain inference is that Mr. Bryan thinks it wrong to make money out of politics. If Mr. Bryan thinks it wrong to make money out of politics, he should quit making money. Mr. Bryan has not one dollar that he ever made out of anything but politics. He tried to be a lawyer: he was a failure at it. He tried to be a newspaper editor; he was a failure

"He is now a man of property. As fortunes go, he is a rich man. He made every dollar of his fortune out of politics as a stepping stone to the lecture platform. He is in politics because it helps the gate receipts.

Issues Straight Challenge

"To help Mr. Bryan's boasted sincerity a little. I challenge him to this: If I hold my position on the democratic national committee by fraud, I ought to resign. If Mr. Bryan has falsely accused me of profiting by fraud, then he ought to quit running for president, because no man is fit to be a candidate for that high office who goes cut in public and lies about any member of his party. Therefore, I prorose that Mr. Bryan and I put the issie as between us up to the men who

Oskinson, in whose veins a high strain of Indian blood flows, is a graduate of Leland Stanford University and received a post-graduate course at Harvard. He was born in Vinita, I. T., in 1874. His mother was a Cherokee woman of high character and attain-

sat as delegates in the Springfield contention of two years ago. Those delegates are still living in Illinois; they can all be found. Mr. Bryan said that a majority of them were opposed to me for national committeeman; he has said that he had at St. Louis letters from more than half of those delegates in which they repudiated the action of the convention which resulted in my tecoming national committeeman. Let us poll those delegates. Let us have this poll made under the direction of the chief justice of the supreme court

of Illinois. Proposes Possible Resignation

"If the majority of those delegates will support Mr. Bryan's contention and will say that I was elected to the national committee by fraud, then I will resign from the national committee. On the other hand-and this I contend is but a fair proposition—if the majority of those delegates of two years ago do not support Mr. Bryan's allegation of fraud, then I will insist that Mr. Bryan shall announce that he will no longer be a candidate for the presidency at the hands of the democratic party. The American people believe in fair play. Call the roll.'

SPECULATION CONTINUES

Notwithstanding Money Stringency Stock Market Is Active

NEW YORK, Sept. 8 .- Speculation in stocks has continued active and special stocks have risen strongly on rumors of coming benefits in spite of the restraining influence of the stringency in the money market which carried the rate for call loans to 40 per cent on Wednesday, the highest rate touched in September for many years. Aids Gold Imports

The rate relaxed after the news became known in Wall street that the treasury plan of aid to gold imports in force last April has been adopted again to go into effect on Monday. There were no announcements of bankers' plans for availing themselves of the advantage offered pending its operation next week.

For this reason and because time money rates continued high and the future interior demands for money were known to promise large demand upon New York, the speculation continued under restraint.

SOUTH OPPOSED

Nebraskan Very Popular, But Predicted He Will Not See the White House

Special to The Telegram.

WASHINGTON, D. C., Sept. 8.-Now that a week has passed since Mr. Bryan's home-coming speech and the country has had time to think over the things he said, it is worth while to attempt an estimate of the impression he has made. At first, as was to be expected, there was wild acclaim and severe censure, and no man could tell from which source came the loudest noise. It is only now that we are beginning to get results from democ-

racy's sober second-thought. Overshadowing all the other issues he presented, and most provocative of ontroversy, was the question of pubc ownership of transportation lines. Radical democrats were jubilant, and republicans were not displeased that Mr. Bryan made clear his advocacy of this doctrine. Democrats of the old school, especially southern democrats, were disheartened and dismayed. They predicted direful things for the democratic future, and especially emphatic was the prediction that Bryan had alienated the south from his standard.

South Opposes Views

Southern members of congress who came to Washington did not hesitate to speak their minds. Among the number was Representative Livingston, a veteran and distinguished member of the house from Georgia. He gave it as is profound conviction that the south would never indorse Bryan's new doctrine. Yet Tuesday the Georgia state convention went on record as favoring Bryan for the presidential nomination two years hence. What is the meaning of it? Did Mr. Livingston wrongly appraise sentiment in Georgia? Certainly he ought to be informed as to the things which are in the minds of his constituents. Or does Georgia propose to accept Bryan and repudiate the hief issue for which he stands? Offand, it would be easier to accept the latter solution were it not for the fact that it is impossible such a situation should continue from now until 1908.

Georgia for Bryan

Perhaps today Georgia is willing to evade the issue, but it can't evade it for the next twenty months or more. There isn't any reason to believe that Bryan is going to back-track. In all probability he will go on preaching government ownership until the day he nomination is made: and Georgia. and all the other states, will have to decide for or against that issue, and in so deciding they will choose for or against Bryan. There can't be any middle ground in a matter so revolutionary as that which Mr. Bryan proposes.

Reception Magnificent

Aside from the antagonism. which government ownership has aroused, Mr. Bryan's reception has been all that even his most ardent friends could have desired. People seem to like the Nebraskan in the role of the nation's most distinguished citizen. One facetious newspaper paragrapher remarks that perhaps they like him so well in the role they will decide to keep him in it. And of Mr. Bryan it must be said that he has borne himself remarkably well under circumstances that might ave caused the most level-headed of men to do or say foolish things. From every quarter there come expressions f good will. Even those who most strongly disagree with his preachments express admiration for the man and consciousness of his growth; they would like to be for him, and will glady afford him the fullest possible hear-

Two Years to Campaign

The result is that Mr. Bryan, if he is to attain the presidency, must conduct a campaign of education. He has two years, or nearly so, to convert the democratic party to his way of thinking. It will be a big task, a monumental task. And if ever Mr. Bryan accomplishes it, it will be the most remarkable victory ever achieved in the field of reason.

The campaign of education conducted 1896 by Mark Hanna in the interest William McKinley would not be a marker to it. All Hann'a had to do was to combat a new theory in national economics, or what amounted to a new theory to a great majority of voters. He had to convert no one; his business was to prevent conversion. Where a man could not be convinced it was sufficient for Hanna's purpose to confuse

He must reason with hundreds of thousands of his fellow citizens and convince them that this radical departure from the policies of the fathers and the very foundation plans of the government is right and just and calculated to work the greatest possible good to the larg-

est possible number. He cannot fail and be President. Trip Abandoned

Selection of Head made Known by Ringing of Bells and Much Rejoicing

Bu Associated Press. ROME, Sept. 8 .- Francis Xavier Wernz, a German, was today elected general of the Society of the Congregation of the Company of Jesuits in suc. cession of the late Father Martin, who died last May. Following the election a messenger was immediately dispatched to the vatican to inform the pope of the choice, which, to become effective, requires the papal sanction.

Pope Notified The strictest secrecy was observed. t is learned two ballots were taken before the final choice was made. The announcement a new general of the order had been chosen was communicated to the outer world by the ringing of bells, which was the signal the meeting was at an end. Formal announcement of the election was then made to the rector of the college. Father Alfred Maertens, procurator general of the Jesuits, went to the vatican to inform the pope of the company's choice. The pontiff expressed great satisfaction over the selection of Father Wernz

as "black pope."

Just the Man Wanted "He is just the man wanted for the position," said the pope when he read the message brought by Father Maertens. He charged Father Maertens to take to Father Wernz his apostolic benediction and also an affectionate letter of greeting which he wrote to the general. PUTNEY, Eng., Sept. 8 .- All members of the Harvard crew had an excellent night's sleep and awoke this morning feeling ready to row the race of their lives, and are very confident of success.

The Cambridge men are no less satisfied they will be able to carry off the aquatic palm. Weather conditions were ideal when the two crews turned out early in the day for a few brief practice starts. The

breeze is from the southwest and although against the racers, it was very light in the early hours of the day. The excitement over the intern al contest pervaded all London, all provincial centers and even the most sporting communities on the continent

judging from the telegrams asking for early and full stories of the race. Business houses this morning were gay with stars and stripes and Harvard crimson, which were conspicuous everywhere. Crowds began moving toward the course early in the day. Railroads are running special trains and every available line is being taxed

to its utmost capacity. Crowds at Race

Early in the afternoon the green banks of the river were lined with peo-ple to an extent which promised the great rouring out of people ever witnessed at a boat ace here. The members of the American colony in London and hosts of American visitors to the city were early in the field taking up points of vantage from which to enliven the American crew

with Harvard's college yell. The majority of expert opinions gave the verdict to Cambridge, but Vivian Neckalts, the Oxford Oarsman. and quite a number of other past mas-

ters in the art of rowing, bet heavily on Harvard. Future Contests Promised

The race between Harvard and Cambridge today over the famous old Putney-Mortlake course on the Thames, a narrow winding waterway, four and three-eighths miles in length, was the first dual inter-collegiate race rowed between American and English crews in thirty-seven years. In 1869 Har-vard sent a four to Putney to meet Oxford in a dual contest. The English crew was victorious by nearly four lengths. Today's dual race was the first between British and American university eights and apparently has

opened the way for many similar contests in the future. Interest in the international rowing event has been heightened by the fact that Harvard's crew earned a decisive victory over Yale at New London in June last, while Cambridge was this year's winner of the dual race with Oxford. In a way the two crews were representative of the best college rowing talent of the two countries and the result has been awaited with the liveliest anticition. Harvard's crew was defeated early of the season in a twomile dash on the Charles river at Boston by Cornell, but as the race was not over a full 'varsity course and as

neither crew was at its best, the result was not regarded as decisive. The Harvard eight is admittedly one of the best aggregations of college oarsmen ever seen in an American shell, and every follower of the sport has been confident that in the international struggle on the Thames, America's rowing strength was typically represented in the Harvard boat. The race was brought about through the efforts of R. C. Lehmann, a mem-

ber of parliament, who has often visited Harvard, his last visit being in 1902. Both Crews Matched

It was agreed that the two crews should be as nearly as possible the same as those which raced against Yale and Oxford respectively. Both the oarsmen of Cambridge and Harvard were eager for the contest and the arrangements were not long in making. The fact that Harvard must necessarily cross the Atlantic and row over a course with which they were not familiar was regarded as a strong point in favor of the English crew. But at the same time it was taken

NOT WORRING

No Fear in Texas Over Government Ownership Idea

Special to The Telegram. HOUSTON, Texas, Sept. 8 .- Texas railroad men are not bothering their heads about Colonel William Jennings Bryan's doctrine of governmental ownership of railroads. There are many warm admirers of the great leader of democracy in upper railroad cfrcles, but they put a ring around this one plank of his political faith. Few, if any, railroad men of standing will accept the doctrine.

"Sometimes the shrewdest railroad men themselves fail in proper management of their lines, as witness receiverships from time to time and also common failures to make the lines pay. If hard headed railroad corporations, free of political bias and free of all influences that would hinder their best efforts, have a hard time of it. you can put it down that a political machine, such as the government is could not make a success of it." So observes a general official in this

Again he adds: "It would be the sheerest of nonsense for the government to pay fifty or twenty billion dollars for the railroads of this country just to manage them, when it can already manage them or at least do it to great extent. Its ability to do this is one of the reasons the railroads have such a hard time managing themselves, or rather sub-managing under the government's managership. "The most limited management of railroads is all that the government

should desire in any event. It may be expedient for it to see that there is always safe and comfortable facilities for handling people and freight, that the lives of the traveling public are properly protected with the most modern means railroads can employ. To this might also be added, in fact, has been added the features of reasonable rates and prevention of discrimination. That covers all the ground of governmental control this or any other government of any size should desire. Under the recently passed Hepburn law the government gets control of these vital points, and there is absolutely no ground for considering the Bryan idea for a moment."

Has No Jurisdiction Over Sunset Lines in Texas Special to The Telegram.

HOUSTON, Texas, Sept. 8 .- Traffic Manager J. C. Stubbs of the Harriman lines, offices Chicago, no longer has jurisdiction over the traffic of the Sunset about this, other than that it has never been printed. He relinquished control of the Texas lines of the Sunset something less than a year ago. It was at the time many-changes were made in Sunset traffic department, among Which was the placing of jurisdiction over passenger business in the hands of H. A. Jones, who was at the time freight traffic manager only. Since then all traffic officials have reported to Mr. Jones, who in turn reports to Vice President Fay and President Lovett. Many of the lesser railroad officials of the systems are not themselves apprised of the change. Those who have been expecting announcement to come from Chicago and from

Mr. Stubbs as to the successor of Traffic Manager Jones, who is transferred to San Francisco, may now look in another direction. The appointment will be made by President Lovett and Vice President Fay, or rather the appointment will be made by one with

the approval of the other. Traffic Director J. C. Stubbs exercises full control over the traffic of the other divisions of the great Harriman system, and it was to relieve him of some of the burden that the shift of the Texas lines of the Sunset system

NO MORE FREE PASSES

Effects of Hepburn Rate Bill Felt by Investors

The effects of the new rate law are being felt in diverse places. Heretofore it has been the custom of Texas railroads to grant free transportation to outside capitalists who purposed coming into Texas to establish manufacturing enterprises. Captain B. B. Paddock of the Board of Trade had received assurances from two gentlemen in Alabama that they were considering Texas very favorably as the field for the operation of a manufacturing plant and wanted to visit the state for the purpose of investigation. Camain Paddock applied for transportation on one of the large Texas roads and Saturday morning received reply to his request. The letter stated that in view of the stringent requirements of the Hepburn bill the road in question had practically ceased to issue passes for any purpose and consequently would have to refuse to grant his request. Captain Paddock thinks the bill will work great injury in this way. Texas is a long way from many of the states where capital is plentiful and transportation charges are an item to be considered when one is planning a trip of investigation to this state.

THAT SUMMER ITCHING

IF IT'S AN ITCHING SKIN (NO MATTER THE NAME)

ECEMATOUS affections are a very important class of skin diseases, the most prominent characteristic of which are ERUPTION and ITCHING. The most common form of skin diseases are simply a modified form of ECZEMA, hence a cure for one is a cure for all.

WILL CURE IT

In this class may be mentioned: Humid Tetter, Salt-Rheum, Ringworm, Running Scall, or Heat Eruption

Herpes, Prurigo, Flavus (Scaldhead) SCABIES, (Itch) characterized by scaliness of the skin, eruption of pimples, vesicles or sometimes pus-tules. It is not due to inflammation like other skin diseases, but to the presence of little parasites which burrow under the skin. These minute insects multiply with astonishing rapidity, and within a short time after their first appearance will be found in nearly every part of the body. The itching they produce is so intense it is often with difficulty the sufferer can refrain from tearing the skin with his

But One Cure for Eczema

Eczema is one of the most obstinate, deep-seated, germ diseases we have, and is beyond the reach of the many so-called Eczema cures and blood purifiers. Imperial Remedy will conquer any skin eruption, because it goes down to the seat of the disease, killing the germs, thus permanently eliminating every trace of the disease. People that have suffered for years with untold agony of Ezcema or Skin Eruptions will look with skepticism upon a treatment so remarkably successful that it can be said it will cure all forms of Eczema and Skin Eruptions.

Skin diseases are always worse in warm weather, and those who are sufferers from Eczema, Tetter, Acne, Psoriasis, Salt Rheum, etc., look forward to the return of summer with a feeling of dread. During the cold winter months we shut ourselves in as much as possible, and take a great deal less exercise than is customary in warm weather; we also indulge our appetites by eating of the heavy, rich foods of the winter season, which do not digest as readily as the lighter foods of summer. This indoor life and lack of exercise cause all parts of the system to become inactive and listless and as a result the channels of bodily waste do not properly carry off the refuse and waste matter, which is left from all food after the nutritive properties have been extracted.

The skin is one of Nature's avenues for removing foreign matter from the system, being provided with milkons of little pores and glands through which the unhealthy matter is expelled. As these fiery acids are forced out through these pores and glands they burn and blister the skin, producing Eczema, Tetter, Acne, Psoriasis, Sale Rheum or some other itching, burning skin eruption.

Eczema commences usually with a slight redness of the skin, followed by the formation of pustules, which discharges a clear, sticky fluid. This dries in crusts, and the itching is so intense that often great areas of raw flesh are exposed by the scratching indulged in, in an effort to get relief. In Tetter, the skin becomes hard and dry, often cracking open and bleeding, and as in Eczema the pain and itching are severe. Acne comes on the face and neck, usually, and while not so uncomfortable as other skin troubles, is unsightly and embarrassing. Salt Rheum is very much like Eczema, except that the head is its favorite point of attack; sometimes becoming so severe as to produce baldness. Psoriasis is a dry, scaly form of skin disease and causes acute suffering by its continual burning and itching.

Imperial Remedy is for sale by most all druggists. If yours can not supply you send his name and \$1.00 and a large bottle will be sent by express. (Six bottles for \$5.00)

WHITE HOUSE TO LOOK LIKE NEW

President's Home Repaired Inside and Out

Special to The Telegram.

WASHINGTON, Sept. 8 .- With the President and his family expected back from Oyster Bay inside of another month, a large force of workmen is busy getting the White House in readiness. All summer long the work of renovation has gone on. Congress made a liberal appropria-

tion for the purpose of having the executive mansion overhauled, and Colonel Charles S. Bromwell, superintendent of public buildings and grounds, who has had the work in charge, has devoted much attention to the proper expenditure of the appropriation.

New Coat of White

When the President and his family step into the White House again it will look much like a new building. The exterior has been painted a shimmering white. One of the improvements that will be promptly noticed is the new floor for the piazza at the north or main entrance. The old floor and steps, worn from the tread of the nillions who have made their pilgrimages to the White House, were getting into a dilapidated state. The interior of the house has been

gone over thoroughly by carpenters, painters, plasterers and plumbers. Will Look Like New

The furniture has been re-upholstered and with new fittings and furnishings and paint, the blue room, the red room, the green room, the east room, the state dining room and other important rooms have been made to ook as if ready for the first time. At the same time the style of these rooms has been changed in no respect. The same colors and materials have been used that were employed before.

The rehabilitated building is expected to be a good deal more healthful as a dwelling place by reason of the changes. Some of the rooms, especially upper rooms, have been damp. This has been remedied and the plumbing in the house considerably bettered.

Sept. 8 .- To right a wrong committed by the soldiers of the Union army under General Mc-Pherson during the civil war, the government has decided to settle the claim of Mrs. Florine Austin Albright for \$75,000. Mrs. Albright is the sole survivor of an old Louisiana family, lives at 140 West Sixteenth street, and is well known in New York society. For forty years she has been conducting her fight against the federal government, part of the time assisted by her husband, Attorney George W.

Albright. McPherson's Troops Ravaged Property Mrs. Albright's father, Colonel Stering T. Austin, had an immense plantation at Carroll Parish, Louisiana. He was loyal to the north. He was afterward assassinated. His son was also killed. During the war Colonel Sterling T. Austin had occasion to leave his planatation. During his absence General McPherson's men stripped it of cotton, fodder, mules, horses and cattle. One hundred and sixty slaves were also turned loose. The farm was devastated by breaking the levee and flooding the land. The loss amounted to \$300,000.

The fight against the covernment then began. Mrs. Albright was recently awarded \$60,000 by congress and she still has pending even larger claims.

EL PASO IS DISSATISFIED

Our good friends and far-away dissatisfied and disposed to encourage the idea of state division. It will be remembered that El Paso not many years ago fathered a movement to carve a new state out of portions of Texas and New Mexico, of which new state El Paso was to be the capital, but the movement died of inanition. But El Paso still aspires to do things. The El Paso Times says:

It is not surprising that the papers of East Texas should deprecate, even resent, any suggestion looking to a division of the state. Several papers in West Texas have not only suggested this, but have gone so far as to de-

We are not surprised that the suggestion should meet with instant and vehement protest from East Texas, for West Texas has long been so very valuable an asset to the east for political and taxation purposes that it would lose a very valuable source of revenue as well as a convenient political trump card should the division come.

The recent state democratic convention dominated by the east declared in its platform in favor of a blanket primary. It required no marked acumen and no gift of foresight to see that a blanket primary was inevitable. It means everything to the east and political annihilation to the west. This section, when the blanket primary shall have become the legal method of nominating state officers will be absolutely without a voice in the nomination of state officers, without any influence in the shaping of legislation, the fixing of tax rates and assessments -will be completely at the mercy of the east.

There is a conviction-whether based on true premises or without foundation in fact we do not pretend to say-but there is a conviction that this section has not heretofore had a square deal at the hands of the east; that the cattlemen have been taxed out of all proportion to the farmers of the east.

It would appear that it needs but the practical operation of the blanket primary to arouse into activity the atent and ill-repressed feeling that the west has been ill-treated by the east. The Times in discussing the question some time ago expressed the apprehen-

sion that a division of the state might. be the ultimate result of the attempt on the part of East Texas to take advantage of her strength and force upon us measures as unjust and injurious to our material as the blanket primary manifestly is to our political

This idea that West Texas is not getting a square deal at the hands of the remainder of the state is but the veriest bosh, and evidently inspired by no other motive than that of stirring up sectional feeling in the hope of ultimately promoting state division.

Fort Worth occupies exactly the same position toward West Texas that El Paso does. El Paso marks the ending of West Texas and Fort Worth the beginning. If West Texas was misused at the hands of the balance of the state, Fort Worth would be quick to resent it by joining hands with that section in a determined effort to overcome the adverse conditions. West res people are Fort Worth's chosen

en's and allies, and this city, with tits enterprise, wealth and comr-defluence will ever be ready raily to the assistance of our friends then it is needed.

But Fort Worth will never take stock

stand it has been dignified by the indorsement of the democratic party of this state and is now a platform demand. When the Times undertakes to fight the blanket primary it is fighting the democratic party of all Texas, and democratic newspapers are not

usually accustomed to such procedure. The Telegram is not the father of the blanket primary system, and is free to concede that it has its disadvantages. But the time to have fought the blanket primary issue was before its adoption and incorporation in the state democratic platform. The blanket primary is not an East Texas issue or a North Texas political expedient, as has been intimated in some quarters. It is a Texas democratic demand that must be engrafted upon the election machinery of this state if the voice of the people is to be obeyed.

The papers that are engaged in the work of fomenting dissension in the hope of final state dismemberment could easily bend their energies to a more profitable procedure. There is plenty of development yet to be accomplished in this state, and it affords a field that promises much more in the shape of results than this ill-advised idea of dismemberment.

Texas may be dismembered some day, but that evil day is sufficiently distant to warrant the prediction that no living politician of today will benefit from it.

BRYAN BORROWING FROM ROOSEVELT

The statement has been repeatedly made and never successfully controverted that President Theodore Roosevelt has bodily made away with all the loose planks of the democratic platform that he could lay his hands on, and it seems that time can be depended upon to even all things. William J. Bryan, the great democratic leader, is now accused of forcibly appropriating unto himself a big Roosevelt idea.

Norman E. Mack of Buffalo, a member of the national democratic executive committee expresses some surprise that the public has forgotten a speech made by President Roosevelt last fall at Chautauqua, when the chief executive declared himself in favor of government ownership of railways under certain conditions. Committeeman Mack says:

"Colonel Bryan, in advocating government ownership of railroads, used almost the precise language of Presi dent Roosevelt in a speech he made ab Chautauqua last fall. I cannot remember the date of the address, but I was there at the time. President Underwood, of the Erie railroad, and several other prominent railroad men also

neard the President's words. "On that occasion President Roosevelt declared that if a satisfactory rate bill could not be prepared and Federal regulation of railroads accomplished in that way, the government would be compelled to take over the railroads." Committeeman Mack remains, in spite of some of the radical utterances of Colonel Bryan in his Madison Square Garden speech, a stanch supporter of the great Nebraskan as the next democratic candidate for the Presidency. He evidently finds much satisfaction in the fact that Bryan has apparently borrowed the government ownership idea temporarily from President Roosevelt, and those members of the republican party who are trying to make so much capital out of Bryan's alleged radicalism, can be brought face to face with the proposition that it is mighty good republican doctrine also, according to such an eminent authority as President Theodore Roosevelt.

SOME PECULIAR INSURANCE

METHODS Something of a sensation has been occasioned by charges made in New York relative to insurance methods prevailing in San Antonio and charges of rebating seem to be the root of the matter. The New York Times says:

Further evidence is accumulating in

the hands of the international policy holders' committee as to campaign methods now in use by the Mutual and New York Life insurance companies. This has raised a question as to the liability of the officer or officers responsible under the Armstrong insurance laws. To the letters from New York Life policy holders concerning the widespread efforts of the agents of that company to obtain proxies running to the company's proxy committee signed, but with the date left blank to be filled in by the agent, there are now added several others declaring that insurance has been practically given away by agents of the Mutual Life in Texas, where there is no anti-

rebate law. The matter was formally put before Grover Cleveland yesterday by G. R. Scrugham, organization manager of the policy holders. Mr. Cleveland was appointed by the three large insurance companies of New York to pass on all questions of rebating.

The international committee has just received a letter from Williard L. Simpson of San Antonio, who used to be superintendent of agents for the Mutual's general agency there, inclosing a copy of a letter which Mr. Simpson sent to President Peabody of the Mutual on July 30 last, but on which no action was ever taken so far as appeared from the policy followed by the Texas general agency. This is the famous Chamberlain & Gillette agency. in which a brother of Dr. Walter R. Gillette is a partner, and it appeared in evidence before the Armstrong committee that the McCurdy administration made contracts with it giving it special allowances in excess of those

common or garden

of general agents received.

The device of which Mr. Simpson writes has been worked through what are known as "expectation term" policies, that is with a stated expectation of life estimated according to age and providing that the insured must die within the term stated in order to get his insurance. The rates on these policies, taking the age 25 as an example, have been approximately \$14.12 a thousand for the first part of an unexpected term of life of 38 years and \$20.12 a thousand for the latter part. Mr. Simpson writes that Yale Hicks in any movement that looks to the and Gut McFarland, among the residivision of this state in the interest of | dents of San Antonio, have recently

How About Campbell's Barrel? Referring to the enormous sums o money required to pay the campaign expenses of the several candidates for governor in the recent campaign, the Fort Worth Telegram remarks that "the barrel should be retired from Texas politics and the situation so changed that our important offices will not go to the highest bidder." There is good reason to hope that The Telegram's ideal of the condition that should exist may now soon be realized. There has been a barrel on tap in our gubernatorial campaigns for a numper of years, but it has been owned and controlled by the corrupt combination between the state political machine and the railroad corporations and men who had the temerity to offer as candidates for governor on their individual merits without the sanction of the machine soon ascertained what they were up against and withdrew from the race in advance of the primaries, leaving the combination candidate a walk-over in the outcome. Now that the machine has been smashed and we are to have a state administration that will give the corporations plenty to think about outside of politics, there is no reason why others than millionaires or those wearing the O K. of the corporations may not hereafter reasonably aspire to the highest honors within the gift of the people.-Hillsboro Mirror.

The country west of Fort Worth on the Texas and Pacific railway is furnishing the bulk of the cattle at the Fort Worth market now and there seems some evidence that the cattlemen out that way are going out of business. Of the total receipts Tuesday, which reached 4,600 head, over 2,-500 were calves, and the greater part of the remaining 2,000 were cows and heifers. In 1904 the Express prophesied that stock cattle would make a very perceptible advance in values in 1906, and there is accumulative evidence that the prophesy will be fulfilled not later than 1907.—San Antonio Express.

One of the potent reasons for forbidding legislators to have free passes on the railroads is it would stop their taking jaunts to various places and weekly visits home during the session, and thus force them to put in their time at work for the state and reduce the longest sessions to thirty days, saying thousands of dollars to the people.—Athens Review.

Mr. Bailey does not like Mr. Bryan's speech, parts of it are too unpractical, while much of it is too radical entirely, he says. However, in the meantime the great mass of Mr. Bailey's constituents will go on admiring the speech just the same, the senator from Texas to the contrary, notwithstanding. -Terrell Transcript.

ELECTRIC LINES

Coming to Light

The new interstate commerce bill, or the rate bill, as it is more commonly called, seems to exempt electrical lines of railway, both passenger and freight, from the operations of the bill. The final determination of this may hinge on the exact meaning given to the words "common carriers" and "railroads," as they are used in the bill. As parts of the steam railroads it is defined that bridges, ferries, terminals, switches, depots, yards and grounds are to be included.

By express provision, sleeping car, oil, transportation, refrigerator lines or companies, and express companies are included in the terms of the bill. The implication is that the electrical lines are also included, but many hold that when a law seeks to include every possible thing that the provisions of the law can be applied to, if anything is not specifically included, it is ex-

And that is the contention of those interested in the electrical lines, that they are left out deliberately and by design or unintentionally.

If that position is correct, there is a singular force given to the statements that some of the eastern roads are giving their locomotive engineers a special course in the management and operation of electrical motors, and a line so important as the New York Central has a section of track of several miles length not far from the city of New York where lessons in the management of electrical motors are given daily to the engineers of the road and the time so spent is regarded as time spent in actually running on the road.

This exemption, if it is that, is as regards the interstate electrics, of which there are many.

SIGN BOARDS BARRED

Judge Mike E. Smith of the Seventeenth district court has enjoined J. J. Langever from erecting advertising sign boards on a strip of ground 600 feet long on Main street near Her-

The injunction was granted in the suit of L. L. Slager against J. J. Langever, the petition alleging that plaintiff leased from L. T. McDade for period of four years the strip of land in question, the lease dating from Sept. 1, 1906; that on Sept. 2, without the consent of lessee and in violation of his rights, Langever began the erection of sign boards on said land and proposed to erect others. The prayer in the petition was that Langever be restrained from erecting any such boards on said land and that he be ordered to remove those already erected thereon. The prayer was

GALVESTON FULL

Railroads Have Difficulty Getting Cars Emptied

There has been a congestion at the Galveston elevators, which prompted the Santa Fe to issue orders that no further grain shipments should be received by the agents of that line until the congestion was relieved, about Sept. 15.

From Galveston comes the explanation that the trouble is not general, but confined to the elevators to which the Santa Fe grain shipments were consigned, and that there are other elevators at Galveston which can take care of all the grain which is now in sight, including that on the Santa Fe sidings. The railways have no authority to divert shipments, but must deliver to the elevator to which the grain is consigned and if they chance to be full then there is nothing to do but to wait until the congestion is re-

No more eloquent testimony to the growth of the grain business of Galveston can be given than the statement that ships have been provided and contracts made for the export of 4,000,000 bushels of wheat, through that port, during the balance of September and prior to the 1st of October.

In speaking of the action of the Santa Fe in declining further consignments of wheat to Galveston on account of their inability to get cars unloaded, F. G. Pettibone, vice president and general manager of the Santa Fe,

"There are on the road or in Galreston a large number of cars of wheat which apparently will not be unloaded within the next week or ten days. Owng to the fact that the grain is wet and therefore deteriorates rapidly, we have decided to decline shipments of grain until the elevators are able to empty the cars. This will only be temporary, and before or immediately after Sept. 15 it is expected the slight congestion prevailing will be relieved and | Unless You Want to Run the Risk of grain snipments continued. I understand that elevator A has considerable space left and will accept grain, and I would be very glad if the parties who control the grain now on the tracks at the different elevators would decide to give this elevator their business and release our cars. I have personally

tried to have this done. "The grain arrives in Galveston consigned to the different elevators, some of which are not on our tracks, and is delivered to them. If the elevator to which the grain is consigned is unable to readily unload the cars it works a hardship on the railroad company and they are more than anxious to take steps to release them if any can be found. However, the grain is con- laws. signed by the shipper to the elevator company with which they do business and the railroad makes the delivery as the shipper requests, and has no option to divert the shipments to an elevator which is not full and can therefore handle the business. Brazos and Northern C. H. Alexander, formerly the owner of the Velasco, Brazos and Northern, and the successful bidder under execution July 3 for the property, was seen Friday and his attention called to the report to the effect that the road

would again be sold Oct. 2. Mr. Alexander was noncommittal. He declined to admit that he had failed to comply with the requirements of his bid, but stated that the matter was one of those mysterious things which could not be discussed.

"I suppose," he said, "that the man who wrote the story knew what he was talking about. The sale has been advertised. That's all I care to say at present." Because this road was sold under a

court order issuing out of Judge Dunklin's court, the fate of the road has a certain local interest that would not otherwise attach.

Railroad Notes and Personals

T. J. Underwood has been appointed rain master of the San Angelo division of the Santa Fe, with authority over the line from Temple to San Angelo. Material is being placed on the ground in the north part of Amarillo for the round house and repair shops

of the Chicago, Rock Island and Gulf. The plans call for a twelve-stall house. Petitions are being freely signed by those who live in the towns along the line of the Lufkin branch of the Cotton Belt, asking for double daily passenger service, insisting that the business of the line justifies this concessions to

the convenience of the people. The Texas and New Orleans and the Central East and West Texas railways have called in all annual passes that they may be stamped by the general passenger agent "Good only in Texas." They do not propose to risk even the offer of a pass by its holder over any part of the lines which comes under the

nterstate business. The General Passenger Agents' Association of Texas adjourned at Dallas Friday, after completing the work for which it was called together. The next meeting will be at Eureka Springs, Ark., Phil A. Auer of Fort Worth, genral passenger agent of the Rock

Vice President Nixon, Superintendent O'Hara of the Springfield division, Superintendent Schleicher of the Fort Worth division and other officials of the Frisco who are making a general inspection tour, were in Ardmore Friday morning. It was stated that the Frisco would commence the early extension of the road west of Ardmore, where it will connect with the line that is now being built from Oklahoma City to Cornish, thence to Waurika Okla. This was Mr. Nixon's first trip over the Frisco lines in the Territory since his elevation to the position of vice president. From Ardmore the party went eastward.

Attendance at City Schools Shows an Increase

The first meeting for the school year 906-1907 of the principals and superintendent of the city schools was held Friday afternoon at the high school building. At this meeting reports of total enrollment in the schools of the city for the first week of the year were made and these reports show that the number of pupils is slightly larger than the number which enrolled during the first week of the school year of 1905-1906. Unfavorable weather conditions have kept the enrollment down and the principals expect to see the number grow rapidly during the first days of next week if the weather is favorable. The total enrollment to date is 4.337 pupils, distributed as follows: No. 1, 335; No. 2, 300; No. 3, 278; No. 4, 298; No. 5, 640; No. 6, 613; No. 7, 512; No. 8, 571; No. 9, 280; high school,

Although they won't admit it, many people who suffer from sick headaches and other ails get them straight from the coffee they drink and it is easily proved if they're not afraid to leave t to a test as in the case of a lady in Connellsville.

"I had been a sufferer from sick headaches for twenty-five years and anyone who has ever had a bad sick headache knows what I suffered Sometimes three days in the week I would have to remain in bed, at other times I couldn't lie down, the pain would be so great. My life was a torture and if I went away from home for a day I always came back more

"One day I was telling a woman my troubles and she told me she knew that it was probably coffee caused it, She said she had been cured by stopping coffee and using Postum Food Coffee and urged me to try this food

"That's how I came to send out and get some Postum, and from that time I've never been without it, for it suits my taste and I have been entirely cured of all my old troubles. All did was to leave off the coffee and tea and drink well made Postum in its place. This change has done me more good than everything else put to-

"Our house was like a drug store, for my husband bought everything he heard of to help me, without doing any good, but when I began on the Postum my headaches ceased and the other troubles quickly disappeared. I have a friend who had an experience just like mine and quitting coffee and using Postum cured her just as it did

"The headaches left and my generai nealth has been improved am much stronger than before. I now enjoy delicious Postum more than I and profitable session Friday evening ever did coffee." Name given by "There's a reason" and it's worth

with Onion Production SAN MARCOS, Texas, Sept. 8 .- William Green of this city proposes to make an experiment in the planting of his onion crop this fall by planting the seed three weeks earlier than usual and in this way he expects to have onions ready for shipment a month earlier than he did this year. He will begin

planting Sept 15. W. D. Moone reports that his irrigated corn will yield from seventyfive to eighty-five bushels per acre. The average corn crop in this section is not over twenty to twenty-five bushels, while the average cotton will yield about one-fourth to one-third of bale per acre. This is Mr. Malone's first experiment in irrigating cotton

Modifies Views Regarding Cotton

turned from a ten days' visit to Wichi-

ta county, had a few words to say to

a Telegram reporter today regarding

weather conditions and cotton crop

"I was in the cotton business for a

number of years," said Mr. Vogel, "and

naturally take a great deal of interest

in the staple, and as a result of my

trip I have been compelled to modify

my views as to the size of the crop,

for although every one in the section I

visited seemed to be optimistic over

the situation, I have made occasional

trips to that country for the last

twelve or fifteen years and never saw

as much rainfall there as occurred

during my stay this time; and from

my study of conditions while engaged

in the business I found that a wet

season never produced as large a yield

as a dry one, all other conditions be-

ing equal. From a glimpse at the

fields out of the car windows one

would draw the conclusion that the

crop could not be in better condition,

but it is when a closer investigation is

made that the real facts are ascer-

tained, for while the stalk has ab-

normal growth, fruitage is poor and

bottom bolls are not maturing, in fact

many are rotting. The boll worm is

also in evidence, consequently, as I

conservative view, I am positive that

prospects for a large crop are not

near so good as was the case two

Bulls Retain Confidence-Prices Elevated on a Very Dull and Slow Market

Special to The Telegram. NEW YORK, Sept. 8 .- Stock exchange trading was on a very limited scale today, but bullish confidence wa's reflected in the way prices were held up despite adverse conditions and a very poor bank statement. London offered no help, being very irregular for American securities. Nevertheless, after an irregular opening the market was plainly disposed to respond to bulish efforts, which, despite the fact that hopes of easy money have received a setback owing to Secretary Shaw's announcement yesterday, were not diminished owing to the expectation that more gold would be engaged

in the open London market Monday. An extremely light volume of business was transacted during the first hour, only 194,000 shares changing hands during that period, and it was toward the close that the market exhibited its best tone and prices reached the high of the day.

Yesterday's favorites were again conspicuous in the trading, Reading and Republic Iron and Steel selling 11/2 to 1% respectively above yesterday's finals. Steel common and Erie had a sharp upward movement, the price of the first advancing a point, while Erie pold at a net gain of 2 points. The bulk of the list attained fractional gains and the market closed steady with prices near the best. Quotatione

Wheat at New Low Line-Continued Tables Turned-Bulls More Anxious to Fine Weather Causes Further Slump in Prices Special to The Telegram,

CHICAGO, Ill., Sept. 8 .- The continuation of perfect weather conditions throughout the wheat belt resulted in an easy market for the week end, fluctuations following a downward course throughout the session. Opening prices were lower, and although the crowd bought some on account of reports of heavy Minneapolis buying, sellers were in the majority and there was never any semblance of a rally, prices breaking through 72c for September and touching a new low level, the close being weak with prices at the bottom for the day, showing a net loss of 1/20 to %c. Receipts were slightly under the estimate, being 67 cars, as comnothing in the day's developments fapared with 30 this day last year.

Corn The corn market had a weak undertone at all times, owing to liberal selling by cash houses. Trade Notes With all crops the early cultivation is most important and in nearly all cases the sooner the cultivation is commenced after the crop is planted, the better. Whenever possible it is always best

year on the same piece of ground. It is best to have a change of land every year for the crop. Our imports of potatoes for the first seven month; or the cur, nt fiscal year amounted to 1,188,17 bushels, as

to avoid raising tomatoes year after

against 78,188 bushels during a similar period in 1904-5 and 119,080 bushels Canada is the fifth greatest oat producing country in the world, and prob-

ably the greatest according to population. The only countries that raised larger oat crops than Canada are the United States, Russia, Germany and

FISH NOT DOCTORED

Physician Says Butchers Injustly Arrested for lodine in Fish Special to The Telegram.

SAN ANTON'O, Texas, Sept. 8 .-Dr. John T. Harrison of this city claims that the butchers who have been arrested and fined for selling fish supposed to be doctored with iodine have been unjustly punished. He says that the fish feed on a seaweed known to contain iodine and that they have a smell of iodine as a result. He claims it does not injure them for food purposes. In Scotland he says

the weed is plentiful and the cases of fish smelling of iodine is common. The board of health will investigate the matter before preferring any more charges.

BIG BANK DEFICIT

Amount \$6,577,920, Largest Since the Year 1893 By Associated Press.

NEW YORK, Sept. 8 .- The statement of the clearing house banks today shows a deficit in the legal reserve required of \$6,577,920. This is said to

Vivion Commission Company FORT WORTH, Texas, Sept. 8 .-The cotton market today was quiet, as expected, and net changes were of no importance. The shadow of the coming reports was over traders and they didn't show disposition to extend committments. Liverpool came a little better than expected, after having opened fully responsive to our weak-

ness at yesterday's close. The weather was more favorable, but reports continued to come in. The movement of the new crop is not increasing rapidly enough for some of the shorts and there is a little leaning to long side in some quarters.

The visible was cut down during the week and while spinners' takings were not up to last year, there were signs of improving demand for the actual. The general opinion is that the bureau will come around 78 or 79 Monday, but with the deterioration that has come since / 'g. 25 such figures might be followed by an upturn, though it. would hardly extend far unless the ginning report should be more bullish than expected. If the percentage should be a point or two worse than expected a sharp upturn is likely.

The action of the Southern Cotton Growers' Association at Hot Springs, advising holding cotton for 10c, no matter how large or how small the crop may be, is of no importance, though considered conservative. No attempt to estimate the crop was made. Forecast calls for more cloudiness and showers over tomorrow. Market

There is surplus money in San Francisco at present and banks are finding it profitable to use it in the way of call loans in the east. The local surplus, owing to the influx of insurance money and for further reasons that are pending, preparations of plans for buildings and other local investments, many people with money have no present use for it and are filling banks with it.

"The Sweetest Girl in Dixie" was the attraction at Greenwall's Friday night. The play is given an abundance of southern local story, wound around the story of an innocent and aged planter who mortgages his home to a villain (men who take mortgages are always villains on the stage) and is unable to meet his payments. The villain wants to marry the old man's daughter and just as he is about to succeed, the old negro mammy sends a telegram to the girl's real lover, who rescues everybody.

At Palace Rink The free skating for ladies at the Palace Rink, Lake Erie, is making a big hit this week and the attendance grows nightly. Cotton Belt Out Thousands by Advanced Rates

Special to The Telegram. DALLAS, Texas, Sept. 8 .- A special to the Times-Herald from Sherman says the Cotton Belt is one of the sufferers of the result of the Hepburn rate law to the extent of several thousand dollars. Fifty cars of coal are tied up in the

Denison yards of the Missouri, Kansas and Texas because the Cotton Belt refuses to receive them at the advanced rate. The coal is for the railway shops at Mt. Pleasant. The Missouri, Kansas and Texas notified the Cotton Belt that under the new law the rate on the coal shipped from Lehigh, Pa., and billed to Mt.

Pleasant, would be raised from 60c to \$1.85 per ton. The Cotton Belt made a protest, but so far without avail, and the cars are held until the advanced rate is paid.
