

Clarence and Herman Hidds students at Abilene Christian College, Abilene visited in the Lloyd Bryan home Sunday.

Mr. and Mrs. R. N. Brashear and children spent the week end with the Arvin Brashear family in Abilene.

LUNCH MENUS

The following lunches will be served in the school lunchroom for the week of September 26-30:

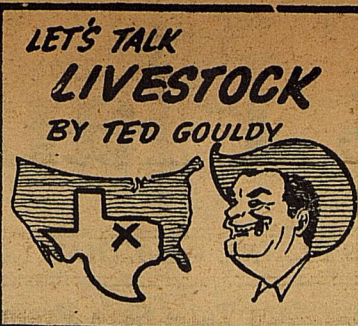

Monday: Fried fish, potato salad, green beans, Harvard beets, pineapple slice, bread and milk.

Tuesday: Cream peas, buttered spinach, macaroni and cheese, cabbage slaw, fruit cobbler, bread and milk.

Wednesday: Meat balls on rice, English peas, carrot and pineapple salad, cake, butter and milk.

Thursday: Beans with ham, sweet potatoes, tossed green salad, banana rice pudding, bread, and milk.

Friday: Cheeseburgers, potato chips, apple and grapefruit salad, cookies and milk.

OVER 126,000 CATTLE AND CALVES MARKETED MONDAY

FORT WORTH—The Fall movement of cattle to market around the major marketing circle hit its highest level last Monday for the season. The 12 major markets reported more than 126,000 cattle and calves and many of the Cornbelt markets had the largest runs since last Fall.

Prices were inclined to weaken on most cattle and calves at nearly all markets, and that was pretty much the story at Fort Worth, too.

Relatively large numbers of cows and heifers were reported at most markets, but the calves continue to be marketed in considerable smaller numbers than a year ago. This holding on the farm of larger numbers of calves appears to be about offsetting the increase in cows and heifers slaughter at most points.

General feeding among the trade at Fort Worth is that there is now small likelihood that there will be a really significant change in the cattle population at the turn of the year.

COMPARATIVE PRICES IN LINE WITH LAST WEEK.

Good and choice cattle were scarce at Fort Worth Monday, a few such selling for \$19 to \$22, and few eligible to sell above \$21 were in the offering. Common and medium steers and yearlings \$12 to \$18. Fat cows \$9.50 to \$12, and canners and cutters \$6.50 to \$10. Several strings of cows Monday included R. T. Poster, Sterling County, a load of 1,030 pound cows at \$10.50; R. J. Coke, Dallas County, had some 743 pound cows at \$12. Seven J Stock Farm, Houston County, sold 60 cows at \$12, and 20 at 977 pounds at \$10. They also had three leads of 427 pound yearlings at 17 and a load at 432 pounds at \$18. LaRue Stock Farms, Houston County, had a load of 431 pound yearlings at \$17 and a load of 382 pound calves at \$15.

Fat calves of good and choice kinds drew \$16 to \$17.50, some heavies to \$18. Baby beef calves of 600 pounds and up sold into yearling beef channels up to \$20. Common and medium slaughter calves \$19 to \$15. Stocker steer calves \$20.00 down. Yearling stockers \$18.50 down. Stocker heifers and stocker heifer calves sold \$2 to \$3 under similar steers. Stocker cows sold from \$8 to \$12.50, and some light young cows reached \$14 late last week.

Hereford Feeder Calves Average \$94.45 September 16.

The special Hereford feeder calves show and sale at Fort Worth last week featured 2,611 head that sold for \$246,613.34, to average \$94.45 per head. Top price was on the champion twenty lot of steers consigned by Scaling V Ranch, Clay County, that brought \$24. Champion ten lot of steers from Marvin Shaw, Bowie, cashed at \$23. Two car loads of J. E. White, Jr., steer calves from Van Horn brought \$22. Miles Cattle Company, champion pen of heifers topped at \$20.

Bulk of the choice steer calves sold from \$19 to \$21, and better kinds of heifers sold from \$17.50 to \$19. Some of the plainer kinds scaled down around \$15.50 to \$16.50 as usual.

The offering was the largest yet for any of the feeder calf shows and scales at the yards. Again average prices were around 50 cents to \$1 per hundred above current values, and some of the top lots were up even more.

HOG RECEIPTS LIGHT, MARKET STRENGTHENS

Movement of hogs to Fort Worth and other major markets Monday was seriously low. The 12 major market had 10,000 fewer swine than a week ago and 20,000 less than the same date a year ago. Prices were 25 cents higher at Fort Worth, with top hogs at \$17.25 to \$17.50. Sows drew \$12 to \$15.50.

SHEEP STEADY, LAMBS SELL STEADY TO 50c OFF.

Fat lambs at \$18.50 Monday at Fort Worth and strictly choice lots were quotable above that figure. The slaughter lamb trade was weak to 50 cents lower, and feeders were steady to weak. Good feeder lambs sold at \$15 and choice light lambs are quotable well above that. Yearling muttons sold from \$8 to \$15.50, and good aged muttons drew \$8 to \$11.50. Old ewes drew \$4 to \$5 and old bucks sold around \$4.

Johnny Ogburne and Eddy Jennings of Abilene visited Dave Lee Sunday.

Hornsby Electric Co.

Letter To The Editor

Dear Editor:

Since I've been on my ranch, working at this job of getting completely well, I have been doing a lot of reading and a lot of thinking about the farm situation. I regret to say that nothing I have learned has made me feel good about the outlook for the average farmer.

Another Rice Crop: In its August price survey, the Department of Agriculture reported a drop of 2 per cent in prices received by farmers for things they raise. This continues the trend that has been under way for three years.

Farm prices, as reported for August, are 6 per cent below prices a year ago. They are 12.5 percent below prices on January 1, 1953.

Farmer's Share Less: It is bad enough that farm income continues to drop. It is even worse that the farmer's relative share of the national income is declining steadily. From 1946 through 1950, farm income averaged 15.2 per cent of the national income. Even in 1952, when farm prices had receded from their high point, the farmer had 12.6 per cent of the national income.

But in 1953 the farmer's share dropped to 11.6 per cent. In 1954 it went down still more — to 11.3 per cent. And the unpleasant truth is that this year, with corporate profits heading toward an all-time high, the farmer's share of the national income will be even less.

Effects Spread Out: Now, you know and I know that the effects of lowered farm income bad as they are on the farmers themselves, are by no means confined to the farmers. Already, even with big corporation profits climbing, bankruptcies of small business are increasing. Many retail merchants in farming areas have been badly hit by the loss in farm income. Farmers are leaving the land, and their sons are going into the cities.

This is bad . . . very bad — for Texas . . . and for the Nation.

No Political Football: I am not trying to make the farm situation a political football. What I want is a farm program that is good for the farmers and good for the country. Politics or no politics, I don't believe we have such a program at the present time. I think the constantly falling farm prices are direct and predictable result of the agricultural policies of the present Administration.

What do you think about this? I will be very glad to have your ideas.

Sincerely
Lyndon B. Johnson

Mr. and Mrs. Sam Hill has as visitors Sunday afternoon their daughter and family Mr. and Mrs. Jimmy McKeever and children, of Abilene.

GI Students Warned To Take Own Money At Start of College

Veterans starting school this fall under the Korean GI Bill can avoid financial troubles by taking enough money of their own to see them through their first two months of training, Veterans Administration said today.

Under the law, it takes about two months for their first GI allowance checks to reach them, VA explained. Once the allowances start coming, they will cover every month of training completed, as long as veterans make sure their schools file monthly attendance certifications with the VA.

VA gave these reasons for the length of time required to make the initial GI allowance payments: First, under the law, the allowances must be paid after the end of each month of training completed,

and not before. Therefore a veteran could not possibly receive his money the day he enters school.

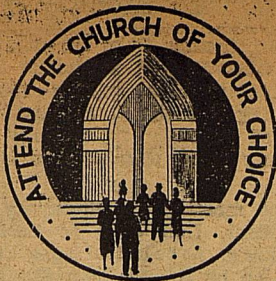

For veterans who begin training after the 20th of the month, the GI allowances usually are not paid until some time after the end of the following full month of training.

Second, after the close of the month, the veteran must sign a certification stating he was attending class during the month. The school sends this certification to VA. Usually, a veteran's check should go out within 20 days after the time VA receives the certification.

That accounts for the remainder of the two-month waiting period, VA said.

VA explained that under the Korean GI Bill, a veteran receives a single GI allowance check to cover each month of training. With the help of that check, he must meet all his own training expenses—tuition, books, fees, supplies and the like. VA does not make separate payments to schools, as it does in the case of veterans training under the original World War II GI Bill.

For veterans in school full-time under the Korean GI Bill, the monthly allowance rates are \$110, with no dependants; \$135, with one dependant, and \$160, with more than one dependant.

NEW FILM PORTRAYS WORK WITH SCOTTISH RITE CRIPPLE CHILDREN

A new film in color which tells the remarkable story the Texas Scottish Rite Hospital for Crippled Children was released this week, according to President John McKee of Dallas, and deputy of the Sovereign Grand Inspector General in Texas of the Scottish Rite.

Produced by the Jamieson Film Company, "To Walk Alone" is a 16mm sound film, which in 18 minutes depicts how thousands of Texas boys and girls have been helped to lead healthy, normal lives. The film will be available for schools, luncheon clubs and other organizations, McKee said.

The Scottish Rite Hospital, founded at Dallas thirty-two years ago by Texas Scottish Rite Masons to provide treatment for children who otherwise would not receive aid necessary for rehabilitation, is open to crippled children of all faiths and creeds. "It is a Texas institution, supported by Texans; a quietly spectacular accomplishment of which all Texans should be appraised and appreciative," McKee said at the previewing of the new film.

Mrs. W. L. Bryan spent last week in Abilene visiting her son Roland Bryan and family.

Say It With Flowers . . .

The Language of Love and Friendship That Is Never Misunderstood

THE LITTLE FLOWER SHOP

Telephone 5-2521 RISING STAR, TEXAS 618 North Main

Why Does God Love You?

God does not love because He needs you. I love my friend because I need in return the love of my Friend.

Nor does He love me because He finds me attractive. Most people love the lovely are attracted to the attractive. It is not so with the love of God. He loveth the unlovely and is attracted to the unattractive. For, while we were yet dead in sin, spiritually and morally ugly, God loved us and came to us.

Nor does He love us because of our possibilities. A teacher might be attracted to anotherwise incorrigible boy because she is persuaded that he could be a good boy; but, if after a couple of years of ardent concern the boy still remains unchanged the teacher might languish her affection for him. Think how long God must have given up hope for the human family and ceased loving were His love to be inspired only by our possibilities.

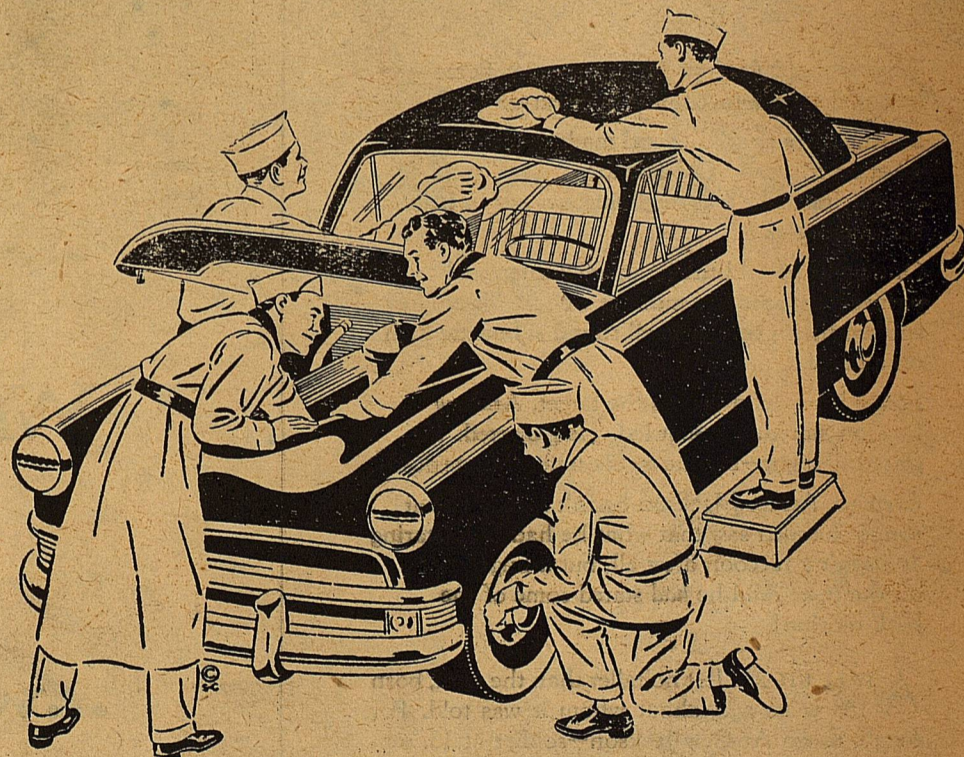

The fact is that God loves you because it is His very nature to love. You cannot stop God from loving you, no matter what you are or what you do. He loved David when he sinned against Uriah; He loved Jonah when he ran away to Tarshish; He loved Adam and Eve when they ate of the forbidden fruit. He loved Judas who betrayed Him and Peter who denied Him and the cruel men who crucified Him.

There is no love as supremely impartial as God's. Like the sun and the rain, His love falls on the good and the evil, the just and the unjust, alike. Man may close the shutters of his soul and keep the sunlight of God's love from coming in, but he cannot stop the sun from shining. God's love is like the waters of a mighty river, flowing ceaselessly century after century, whether men sail upon it or not, whether men drink it or not, whether men think to harness its power or not.

You cannot stop God from loving you but we must remember He is a God of wrath, judgement is fierce.

Funeral services were held for Mrs. Tharp Friday afternoon at the Rising Star Church of Christ and was buried in the Pioneer cemetery.

Mrs. Tharp was born Nov. 12, 1870, in Georgia and came to Texas at an early age. She moved to Ballinger from Eastland County in 1926. Surviving are four sons, Ennis Tharp, Rising Star, Harvey Tharp, Ahilene, Howard Tharp, Ventura, Calif. and Charles Tharp, Ballinger; six daughters, Mrs. Lona Stoval, Crowell, Mrs. Velma Bibby, Mrs. Snoria Walker and Mrs. Ennis Lee all of Rising Star; Mrs. David Lee, Pioneer and Mrs. New, Ballinger; three brothers Lee Tankersley of this city, Jim Tankersley, Austin and Bill Tankersley, New Mexico; 25 grandchildren and 31 great-grandchildren.

MYF Sub-District Meet Held Here Monday Night

The Thomas Coke sub-district of the Cisco District Methodist Young People met in regular monthly meeting at the local Methodist church Monday night with some seventy youth and workers attending.

The meeting got underway with president, Don Jobe of Scranton, presiding. A beautiful song service was led by Norma Jean Shaffer of Cisco as song leader and with Johnny Turner at the piano. Highlight of the meeting was the presentation of reports from National Youth Convocation for Methodist young people and workers held at Purdue University, where some 5,000 attended. A special train from Texas and a special car from Central Texas conference carried the delegates. Dan Jobe and Leland Davis were delegates from Cisco's Thomas Coke sub-district.

After games and refreshments in the church basement, the young people present formed a friendship circle for effective singing and the MYF benediction.

Riffe Family Reunion

Members of the Riffe family enjoying a picnic at the Treadway park Sunday were: Mr. and Mrs. Riffe, Mrs. Geo. Purvis and Mrs. R. W. The raccoon that wouldn't come down

They said old Andrew Jackson was so fierce he could stare a raccoon out of a tree.

So (the story goes) a friend made a bet on it. And "Old Hickory," who could be as obliging as he was terrifying, set out to help his friend win.

One night he and the financially interested parties went into the moonlit woods. They spotted their game, a small round silhouette high on a limb.

Fixing his baleful eye on the target, Andrew Jackson stared. He scowled. He glowered. He glared all night—but the raccoon never came down.

Even so, Andrew Jackson hadn't failed. For at sunup the men saw that what he had been staring at wasn't a raccoon after all, but a huge knot on the tree. And he had stared some of the bark off that!

A TALL STORY. But no taller than the man, born 188 years ago, about whom it was told. For rough, tough Andrew Jackson—soldier at 13, senator at 30, major general at 35, and our seventh president at the climax of his career—was one of the true giants of our nation's youth. Personally fearless, relentless toward his enemies, but self-reliant, honest and straightforward, he was the very embodiment of the early American spirit.

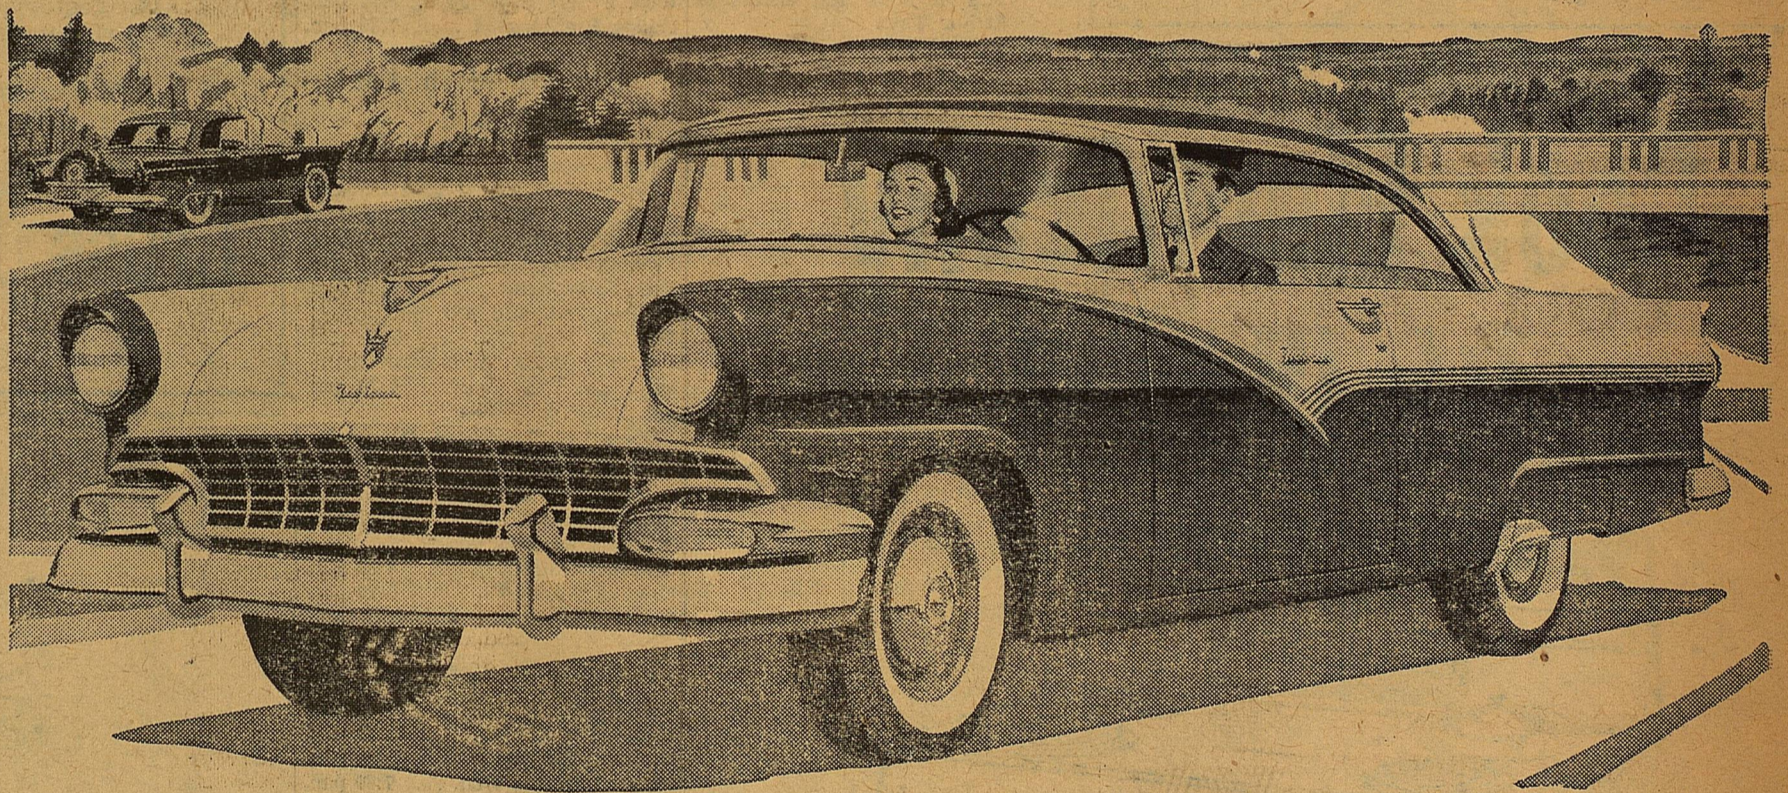

That spirit is as vital today as it was then. And you are an active part of it every time you invest in another United States Savings Bond.

For Bonds, which pay you good interest (3% compounded semiannually, when held to maturity) can make you personally independent in the best American tradition.

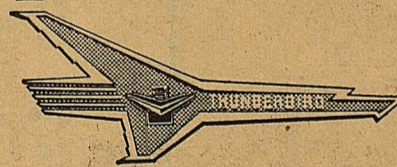

If you haven't already started on the Savings Bond road to individual security and independence, why not begin today? Sign up for Bonds through the systematic Payroll Savings Plan where you work. Or invest in them regularly where you bank.

SAFE AS AMERICA— U. S. SAVINGS BONDS

County Agent's Notes

At the Brush Control Demonstration held last week, Extension Specialist, Garlyn Hoffman, Extension Specialist, showed the group various methods and materials that are giving the best results. The basal spray method, and the fumigant and stump treatment methods are all good to use in this area. Of course these methods are primarily for small plot treatment. For large areas there are mechanical methods that are good, and the airplane spray method.

Most farmers and ranchmen in Callahan County could use some brush clearing around the edges of fields and around water lots and pens. A good time to do odd jobs of brush clearing is in the winter time when there is usually some slack time.

Write, or call at the County Agent's office for a copy of Bulletin No. 800, More Grass from Controlling Trees and Brush with Chemicals. This bulletin will give the details.

Now is the time for 4-H Club members to get their lamb and pig feeding demonstrations started. We will have a County Show next spring so all the boys and girls interested in showing stock should get them started on feed and also attend the 4-H Club meetings. If you need some help let me know and I will help you.

The annual Callahan County 4-H Club Sears Roebuck Foundation Pig Show will be held at 8 a.m. Saturday October 8 near the Court House in Baird. Mr. Claude Rock, Vocational Agriculture Teacher at Eula will judge the show. Boys who will exhibit Sears gifts this year are Allen Woody of Cottonwood, Charles Neeb of Cross Plains, Jerry Lynn Kanady of Baird, J. B. Hicks of Clyde, Ray Baron of Clyde, Jack Ball of Eula, David Blocock of Denton Valley, and Stanley Crawford of Oplin. Glenn Rae Lawrence of Rowden has the boar pig this year, L. M. Green of Clyde was the breeder.

Has your dog been mixed up with a skunk? This can be a sad experience for both dogs and boys. Dr. E. J. Frick of Kansas State College, says that a 5 to 10 percent solution of ammonia water will do the job of destroying the scent.

THANK YOU

I want to thank the people of Cross Plains trade territory for their patronage during the time I was in charge of the Dairy Bar.

Mrs. A. L. Breeding.

Balance Livestock With Range Forage

Maintaining the right balance between livestock number and available range feed and forage is one of the toughest problems faced by the ranchman or stock farmer. Weather variables, too dry and less frequently wet, make necessary continuous adjustments in stocking rates, says A. H. Walker, extension range specialist.

The well planned livestock program, explains the specialist, should be based on average years and on a single good year. The program should make provisions for deferred grazing of at least one pasture each year; the planting of supplemental grazing crops—summer and winter; adequate reserves of hay and silage; grazing off only about half the growth of native grasses and buying feeds needed early and in season.

Deferred grazing, points out Walker, is usually the cheapest and best method of range recovery. It provides for seed, plant vigor and litter, that is, if the deferred pastures are not grazed until frost. Too, he adds, close grazing results in less forage produced; invasion of pastures by poorer kinds of plants; soil washing or erosion and perhaps most importance . . . rainfall penetration is greatly reduced. During May and June 10 inches of rain were recorded at the Spur Experiment Station, on bare soil moisture penetration was 9 inches but was 51 inches on soil with a good grass cover.

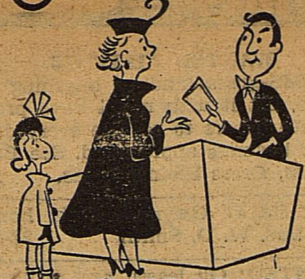

If calves or lambs are being held over for the winter, Walker says only a plentiful supply of grass will make the holding a paying proposition. He says too many operators wait for rain in September and October to produce their range feed for the winter season. "It's a big gamble which seldom pays off and making needed adjustments in livestock before a lack of grass forces marketing is a better method to follow," says Walker.

His final suggestion, try to keep a reserve of cured grass on the range; hay in the barn and silage in the ground.

Jess Moore, Mrs. J. A. Moore and Mrs. Louise Aderhold attended the Eager-Camp wedding in Pecos Thursday evening of last week.

Miss Virgie Eager and Mrs. Eunice Starr of this city and Mrs. J. B. Hart of Abilene were in Pecos Thursday of last week to attend the wedding of a niece, Miss Mona Eager to Tommy Camp. The ladies visited in Lobbock Friday visiting another niece, Mrs. J. M. Hooper before returning home.

Social Security

QUESTIONS AND ANSWERS

Question: How will a farm operator report his self-employment income for social security purposes, if he has a gross of \$18 or less?

Answer: A farm operator who has net earnings of at least \$400 in a year will file his social security tax return at the end of the year when he files his income tax return. This is required although the amount of his income would not require payment of income tax. The amount on which social security tax is paid is the net earnings—or profit—from farm operations after all framing expenses have been deducted from the gross or total income. If the gross income is \$1800 or less, a farm operator may figure his actual net earnings, or he may report one-half of his gross as his net income. The amount of the tax will be 3 percent of the net income. The farm operator must keep a record of his total or gross income from all farming expenses. From these records, he will be able to determine the amount of his net income for the year.

For further information contact: Social Security Admin. 766 Cedar St., Abilene, Texas.

Mr. and Mrs. B. G. Anderson of Midland visited here during the week end with relatives and with Mrs. Anderson's brother, Jack Free who is a patient in the Gorman Hospital.

Time To Plant Winter Temporary Pastures

There is no substitute for winter temporary pastures. They are the only dependable source of green grazing during the late fall, winter and early spring, says E. M. Trew, extension pasture specialist.

Winter pastures should be planted early in order to increase the amount of grazing which in turn can mean cheaper gains on beef cattle, more milk from the dairy herd and lower grain and veterinary bills. Early planting may mean dry planting, but there is a risk, says Trew, with wheat and rye. If small grains are dry planted, put the seed deep enough to prevent germination from light rains, advises the specialist.

Because the inoculant used on legume seed may be killed if the seed remain in dry soil a long period, Trew says it is sometimes advisable to make separate plantings when the grain is dry planted.

Early planted pastures, September 12-20, last year gave almost three times the net return per acre for four, east Texas dairymen as did pastures planted in late October and early November. The value came from increased milk and hay saved. Grazing days were 143 against 90 for the late planted pastures.

Trew suggested to farmers and stockmen interested in planting grasses and legumes for winter temporary pastures a visit with the local county agent. Pick up a copy of brand new Extension Leaflet-258, Winter Temporary Pastures. The leaflet lists recommended plants, date and rate of seeding and gives information on earliness and disease susceptibility of the different grasses.

Finally, Trew reminds, for the soil's sake give it some winter protection either in form of temporary pastures or a winter cover crop. Both are soil improvers.

Morris Ray Cavanaugh visited with friends in Odessa last week.

Veterans ? Box

Q—What is the deadline for getting the special Korean GI insurance available to veterans with service-connected disability?

A—Korea veterans must apply and pay their first premium within one year from date that VA determines their disability are service-connected.

Q—I was disabled while serving in the WAC during World War II, and as a result I am drawing disability compensation payments. My husband recently died of a service-connected ailment. Would I be entitled to death compensation benefits in addition to my own disability payments?

A—Yes. The fact that you are receiving disability compensation would not bar you from receiving death compensation benefits as well.

Q—The house I want to buy with a GI loan does not come under FHA credit controls, because FHA completed all its paperwork before the controls went in effect on July 30, 1955. Will it be subject to VA's credit restrictions?

A—The house will be exempt from VA credit restrictions only if VA receives a request for an appraisal on or before September 30, 1955.

Q—I understand that a private profit school has to be in operation for two years before it can accept veterans under the Korean GI Bill. The school I am interested in attending operates nine months a year and is closing for the summer months. In its case, what would VA consider as two years?

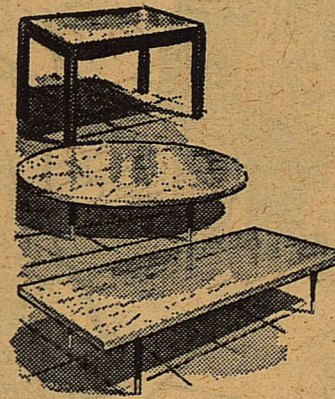

A—In the case of this school, two nine-month school years, covering a period of 24 calendar months, will satisfy the two-year requirement of the law.

Mr. and Mrs. Parker Baum and Martha took Mrs. Billy Parker and daughter to Tatum, N. M. Sunday to join their husband and father in making their home.

Mrs. J. Lee Smith is visiting in Waco this week with her daughter, Mrs. G. S. Dunn.

**Game Commission
Trying Restocking**

AUSTIN—While Texas hunters are concentrating on the fall wild-life harvest, Game and Fish Commission technicians are looking ahead to future seasons, according to the Executive Director of the Game and Fish Commission.

He said he was reminded of this look-ahead program by some current planning board developments such as:

Release of the first sage hens in an experimental restocking program near Marfa in the Big Bend country;

Negotiations looking to possible trapping of Aoudad sheep in California for release in the Palo Duro Canyon in the Panhandle.

Plans to resume trapping of Big Horn Sheep in Arizona for restocking the Black Gap Wildlife Management area West of the Pecos next year.

Reports that at least part of the one hundred fifty Spanish red-legged partridge have survived their first summer in the Panhandle (near Childress).

Meanwhile, the fisheries staff is going ahead with experiments to determine whether some marine species may be profitably adapted to far-inland lakes which have a heavy salt content. Latest move in this direction was transplanting of a consignment of speckled trout in Lake Kemp, near Wichita Falls, where red-fish and blue crabs previously had been released experimentally.

Speckled trout, a great favorite among sport fishermen along the Gulf Coast, is a voracious predator and might help reduce the overpopulation of rough fish in inland waters.

Perhaps the most spectacular experimental projects was the dawn-to-dusk flying of the sage hens sixteen hundred miles from Montana to Marfa in farwest Texas. The fast hop by Warden-Pilot Frank Hamer was scheduled since technicians said the game birds might not survive more than forty-eight hours in captivity. Only two of the eighteen trapped sage hens were lost in transit.

The Executive Secretary said the restocking projects listed represent

**Get The Cotton Then
Destroy The Stalks!**

College Station—Boll weevils and pink bollworms insect dollar grabbers of the cotton fields, are plentiful in most areas of Texas. The showery weather reduced the effectiveness of control measures and enabled the insects to increase to record numbers.

To stop a further increase, Extension Entomologist F. M. Fuller says farmers should destroy all cotton stalks immediately after the harvesting job is completed. He recommends that a shredder type stalk cutter be used and then followed with a plowing job which will get all plant material covered deeply. The big object is to destroy the insects' food supply and thus force them into winter hibernation in a weakened condition. This will mean fewer survivals and a lower emergence rate next spring.

Besides being the most economical control method, early stalk destruction also gets the soil in top condition for planting a winter legume crop and improves its water holding capacity.

Fuller says to be most effective, the stalk destruction program should be carried out on a community or better still on a county or area-wide basis. The larger the area the better, he adds. The biggest returns come when the stalks are destroyed just as far ahead of frost as is possible. But the practice is worthwhile, he explains, even if delayed only a few days before frost.

He says reports from the southern part of the State indicate that counties in that area have met their deadline dates for having all cotton stalks destroyed and urges cotton producers in the other areas to do the job just as soon as the harvest is completed.

"A very small phase of our restoration work since we are primarily engaged in enhancing our native species." "The tests are mentioned," he added, "to reflect the varied efforts comprising a modern wildlife management program. In a state as large as Texas; where the contrast in habitat is so great, we are constantly exploring possibilities for stocking areas which now are barren of wildlife."

*Anything less is an
old-fashioned truck!*

Chevrolet Truck Work Styling is well illustrated in these four models ranging from the Low Cab Forward and Cameo Carrier at left to the pickup and tractor-trailer unit at right.

**New Chevrolet
Task-Force Trucks**

They're the most modern trucks on the road. If you don't get all the advantages they offer, you stand to lose money on the job today . . . and again at trade-in-time!

Most modern power—V8 or 6
In most new Chevrolet truck models, you have your choice of V8* or 6. Chevrolet's new truck V8's have the shortest stroke of any V8 in any leading truck! That means less friction and wear per mile. The valve-in-head sixes are new editions of the engines that have long been famous as the "work horses" of the truck world! And all Chevrolet truck engines have a modern 12-volt

electrical system for quicker starting, better ignition and a greater electrical reserve.

The truck driver's "dream cab"
That's the closest we can come to describing the new Flite-Ride De Luxe cab. What truck driver wouldn't go for features like these: panoramic windshield for wider, safer vision; concealed Safety Step that stays clear of snow, mud and ice; High-Level

ventilation that provides a more constant supply of outside air in all kinds of weather.

Most modern truck styling
We call it Work Styling—and you get it only in new Chevrolet trucks! Two fresh, functional styling treatments are offered—one for light- and medium-duty models, another for heavy-duty models. Your Chevrolet truck will do your job better—and look better doing it!

Most modern features throughout
Advanced suspensions, more rigid, ladder-type frames! Tubeless tires standard on 1/2-ton models! Come in and see all the ways you're way ahead with new Chevrolet trucks!

*V8 standard in L.C.F. models, an extra-cost option in all others except Forward Control models.

Year after year, America's best selling truck!

Bishop Chevrolet Company

AUSTIN—Granite in the capitol building is more radioactive than the dirt being used by Texas mushrooming "uranium dirt-sitting" businesses. So say state health department officials.

Landowners near uranium strikes have erected benches and charge patrons \$2 to \$3 an hour to sit with their feet in the supposedly irradiated dirt. Hundreds of people seeking relief from arthritis and other aches have patronized the places.

After analyzing the dirt, Dr. Holle, health commissioner, said that dirt-sitting does no actual harm—except that it may encourage an ill person to delay visiting a physician.

Farm Hearing Slated
Texas farmers can have their say on a federal farm policy at a U. S. Senate committee hearing Nov. 5 in Ft. Worth.

John C. White, state agriculture

commissioner, is arranging the meeting at the request of the committee chairman.

Drought Aid Sought
Federal disaster aid is being sought for Texas' drought-stricken areas.

Gov. Allan Shivers asked President Eisenhower to designate as disaster areas counties to be specified by the U. S. Department of Agriculture state drought committee.

Crop Production Falls
Texas crops are falling below estimates, according to the USDA.

Although above normal amounts of rain fell in some areas, it did not come where and when it was needed most, said the report. Eastern and southeastern counties, where harvest already had begun were soaked. But in the west and northwest, dryland cotton and sorghum fields languished.

Water Application Undecided
Still to be decided upon is the application for more Pedernales River water to irrigate U. S. Sen. Lyndon Johnson's Gillespie County farm.

Originally scheduled in July, hearing before the State Board of Water Engineers has been postponed three times. No date was set last week.

Downstream landowners had protested that Johnson's water storage already worked a hardship.

Hospitals Approved
Five Texas hospital projects have been approved by the State Board of Health for federal aid money.

They are the Gollin County Hospital at McKinney, City Hospital at Graham, city-county health center at All Saints Hospital at Fort Worth, and the Shelly County Hospital at Center.

Short Snorts
Former Deputy Secretary of Defense Robert B. Anderson, once considered a possible gubernatorial candidate, is apparently out of the running. He is to become president of Ventures, Ltd., a Canadian holding spread over two continents.

Atty. Gen. John Ben Shepperd is the newly-elected president of the 53-member National Association of Attorneys General. He was elected from vice president at the New Hampshire convention.

Selection of a new Democratic National Committeeman, to replace ousted Wright Morrow, has been postponed by the Democratic State Executive committee until Oct. 6. Also it will meet in Waco instead of Ft. Worth.

Over the week end Gov. Allan Shivers attended his first meeting of the National Civil Defense Advisory Commission, to which he was appointed by President Eisenhower. It was held in Omaha, Neb.

Mrs. Mary Joe Carroll, wife of a UT history professor, made feminine legal history by emerging as high scorer in state bar exams. She works for the Austin law firm of Looney, Clark and Moorehead.

Texas' new Advisory Committee on Atomic Energy, created by the Legislature, was appointed by Governor Shivers, with Dallas Attorney Frank Norton as chairman. Its 17 members were selected from major fields of actual and potential activity in atomic energy research, development and application.

Texas received another batch of 157,644 "shots" of Salk polio vaccine from Eli Lilly and Co. of Indianapolis. It went direct to commercial drug channels, to be used outside the school program, on doctors' prescriptions.

Irving school teachers, accused of "going on strike" in protest when their superintendent was temporarily fired, won a victory in district court in Austin. Judge Jack Roberts denied an application of Irving taxpayers seeking to compel Commissioner of Education J. W. Edgar to forfeit the teachers' certificates.

Migration Bit Early, Says Wildlife Expert

AUSTIN—The migration trend among the preliminary flights of southward bound birdlife seems a little ahead of schedule this fall, Game Warden Tom Waddell of Eagle Lake reported to Austin headquarters of the Game and Fish Commission.

Waddell, veteran field observer down in the Colorado County concentration area, said the first cool spell reached the fringe of the Gulf Coast area about ten days early and had a proportionate effort on migrants.

Among the ducks, blue wing teals and pintails arrived on the average nine and in normal numbers but the fleet green-winged teal came in unusually large numbers yet at about the usual time.

Assorted song birds moved in, bunched up and got ready for further southward movement strictly on schedule, said Waddell who has kept comparative records on wildlife movement for more than thirty years.

And he noted that five oak acorns started falling ten days earlier this year than last and the buck deer began rubbing velvet off their horns fourteen days earlier this year. "So fall looks a little early," he concluded.

Mr. and Mrs. J. L. Cummings were here from San Angelo Monday visiting her sister and husband, Mr. and Mrs. V. L. Bobby.

Cross Plains Review — 8 Thursday, September 22, 1955

Elvis Scott was a business visitor in Austin Thursday of last week.

Mr. and Mrs. George Barnard returned home the first of the week after visiting for several days in Nashville, Tennessee with Mrs. Barnard's cousin Mrs. Clara Bryan. James Barnard accompanied his parents to Tennessee and has reported to New York where he will embark for overseas duty. He has spent a 15 day leave here with his parents and other relative.

Joe Howser of Odessa visited here over the week end with his parents, Mr. and Mrs. L. L. Howser. Wayne Howser of Silver accompanied his uncle to Cross Plains and is visiting here with his grandparents.

Mr. and Mrs. W. H. Wallace of San Antonio were visiting in the home of Mr. and Mrs. B. C. McCowan over the week end. Saturday night the two couples attended the ACC-Trinity U. football game in Abilene.

HOUSE PAINT**

Most important Paint Advancement in 25 years
New fume-resistant, Sun-Proof House Paint produces a film of unusual whiteness.

It will not discolor or darken from coal smoke or industrial gases. It's self-cleaning, too—removes surface dirt.

Years of extensive exposure tests under many types of climate conditions, from strong sunlight and salt air to heavy industrial fume areas, have proved the superiority of this new formula over ordinary house-paint.

Come in and ask us about new fume-resistant, Sun-Proof House Paint.

NOTHING IN ITS FIELD CAN MATCH CHEVROLET FOR ACCELERATION!

Drive with care... EVERYWHERE!

Great Features back up Chevrolet Performance: Anti-Dive Braking—Ball-Race Steering—Out-rigger Rear Springs—Body by Fisher—12-Volt Electrical System—Nine Engine-Drive Choices.

When you need a quick sprint for safer passing, this V8 delivers!
It's pure dynamite, and you have to go way, way up the price ladder before you ever find its equal.

Chevrolet's new "Turbo-Fire V8" packs a Sunday punch for safer passing that no car in Chevrolet's field can match!

The proof was burned into the sands of Daytona Beach at the NASCAR* trials earlier this year. In acceleration tests, Chevrolet simply walked away from everything else in its field. Plus—and get this—all the high-priced cars except one!

Surprising? Not when you consider that this beauty's been cleaning up on all comers in short track stock car events this season. That's where acceleration really pays off, as well as handling ease, and cornering ability—things that mean safer, happier highway driving. Come on in and let a new Chevrolet show you what we mean.

NOW'S THE TIME TO BUY! LOW PRICES—BIG DEALS! ENJOY A NEW CHEVROLET

BISHOP CHEVROLET COMPANY

Do You Remember?...

has taken Lofton Brags place as coach and teacher in the school. Cottonwood news.
Clyde Walker, Jr., left for Abilene where he entered Hardin-Simmons University, Saturday.

Brazen Perch Nips Skin Diving Observer

AUSTIN — Under-water observations of specially equipped aquatic technicians has been marked so far by a mere slight nipping of a worker by a brazen perch, reports the Chief Aquatic Biologist of the Game and Fish Commission.
He said the unscheduled incident occurred while Richard Clark, attired in skin diving regalia, sat motionless near the shore of Lake Travis in about twelve feet of water. The perch watched Clark for a few minutes and then darted up and bit the startled youth on the chest.
The subterranean tests have been undertaken to enable biologists to study antics of fish in their natural habitat. They mainly are interested in black bass which are naturally marier than perch and some other panfish species.
The Chief Aquatic Biologist said equipment has been ordered to permit year-around continuation of the below-surface studies. The crewmen will wear insulated suits and other protective raiment. Tests are being concentrated on Lake Travis, near Austin, but will be extended to other fresh-water areas if the new observations prove valuable in improving fishing.
Mr. and Mrs. Bob Smith of Brownwood were Sunday visitors here with her parents, Mr. and Mrs. H. V. Faulkner.
Mr. and Mrs. Bill Edington and family of Albany visited with relatives here Thursday night of last week.
Mr. and Mrs. Albert Faucett and children, Edith and Ceryl Ann visited her parents, Mr. and Mrs. Ben Riffe during the week end returning to their home in San Antonio Monday. Mrs. Dwayne Doyle who has been visiting with her parents here returned home with her sister and family for a visit.
Bro. L. L. Trott, district missionary, of Abilene and Mrs. Trott were in Cross Plains Sunday and Bro. Trott filled the pulpit at the First Baptist Church. Sunday evening the couple showed pictures made at the World Alliance meeting in London, England, which they had attended recently.

Announcing New Ford Trucks for '56

Exciting new functional styling draws all eyes to the finest trucks on the American road—new Fords!

Now! Most horsepower per dollar!

NEW! More horsepower in every model ... up to 26% more! Every engine Short Stroke!

NEW! Bigger capacities! New Driverized Cabs! New Lifeguard safety features!

NEW! New styling, new "leadership look"! Over 280 models, from Pickups to BIG JOBS!

Comparison of strokes shows how much piston travel is saved by Short Stroke engine. Result: less friction, less wear, more usable power.

Now—'56 Ford Trucks give you a choice of seven Short Stroke Y-8's and a Short Stroke Six. Horsepower increases up to 26%. More power to get you rolling faster, save you time all the way! More horsepower per dollar than any other truck line—proved by comparisons of net horsepower and suggested list prices of all trucks!

No other truck gives you all of these '56 features

NEW! 8-ft. "1/2-ton" Express for bulky loads. Also, 6 1/2-ft. Pickup. GVW 5,000 lbs.

NEW! Deep-center Lifeguard steering wheel helps protect driver from steering column. Only Ford has it! No extra cost.

NEW! Lifeguard door latches give added protection against doors jarring open in an accident.

NEW! 12-volt ignition for better starting, better performance, greater electrical reserve.

NEW! "Special" Y-8 engines with exclusive hood air scoop, 4-barrel carburetor and dual exhaust system ... for extra power and performance!

NEW! Tubeless tires run 25% cooler, give extra mileage! Standard on every Ford Truck!

NEW! Sodium-cooled exhaust valves in heavy-duty engines operate as much as 225° cooler!

NEW! Full-wrap windshield standard on all cabs. New full-wrap rear window at low extra cost.
