Much of the advertising on subjects pertaining to health which we see and hear these days is misleading. Investigation will prove that many advertisers of medicinal products have no training in medicine, pharmacy, or chemistry. Thousands of dollars are wasted every year on asthma cures, oral treatments for diabetes, cancer remedies, and countless other nostrums. Please remember that there are no secrets in clinical medicine. As soon as the value of a remedy is satisfactorily proved, it becomes the common knowledge of all physicians. Don't be misled.
