PHILOSOPHER'S NOTE: The Bayou philosopher on his Johnson grass on the Bayou won't get here with his idea this week...

But back to the idea that the way to whip the recession is for you and me to spend more. I was discussing this with a neighbor and he said it won't work...

Soil Conservation District News

Waterway seeding has been in hand. Since the waterway re-creation system, care should be selecting the kind of grasses. The grasses best suited to the Cross Plains bluestem, or Bermudagrass, are King Ranch bluestem, The farmers and ranchers planning to sod their waterways should make arrangements now for their sprigs.

Carrying extra water may be used. If carefully managed, those waterways more than pay their way in income. Many are producing regular hay meadows while some produce grass seed for use on farm or for sale. All waterways may be grazed at certain times of the year. Care should be taken in grazing so as not to stand and vigor of the grass.

If you plan to sod a waterway this spring contact the Soil Conservation Service technicians for assistance in locating the waterway for planting.

Winona Treadwell Circle Holds Meeting Tuesday

The Winona Treadwell Circle of the W. M. U. met at the First Baptist Church Tuesday morning, March 18.

Circle chairman, Mrs. Dan Johnston, presided over the meeting, and Mrs. Dale Bishop, program chairman, led the program entitled "Fruits of Faithful Prayer."

Mrs. Donald Baird brought the meditation from John the seventeenth chapter, and led in prayer for missionaries. Mrs. Dale Bishop told of instances of answered prayer on the mission field; Mrs. Dan Johnston discussed "Prayer Joins Your Life to God's Redemptive World Purpose;" Mrs. Pat McNeel, Jr. discussed "Prayer Strengthens the Missionaries for Their Task" and Mrs. V. C. Walters discussed "Prayer Transforms Your Life into Nobler Living."

Plans were discussed concerning a breakfast to be given Friday morning honoring the senior class of the local high school, and the meeting adjourned with prayer.

Those present were: Meses V. D. Walters, Jimmy Prewitt, Pat McNeel, Jr., Dan Johnston, Dale Bishop and Donald Baird.

JUNIOR CLASS TO STAGE—

(Continued from page one) as Miss Jenkins, Alexander's secretary; Kenneth Hanke as Andrew, his nephew; Sidney McClure as Vivian Odell, Alexander's fiancée; Jim Fleming as George Brewster, a friend of Vivian's, and Jo Holland as Flo Baker, a gangster's sweetheart.

Arriving in Heaven, Alexander Arlington is surprised to learn that he has been stabbed in the back with the Chinese dagger which he uses as a letter-opener. Even Michael, the archangel, can not tell him who the murderer was, and Arlington feels that he will never be happy until he finds out "who dunit." Permitted to return to earth for just one day to solve the mystery, Alexander at first finds it hard to believe that any of his immediate associates could have been guilty. Annie, his maid, takes care of him and scolds him affectionately like a mother. Harry, the butler and gardener, is an ex-convict who is grateful for the easy job he has in exchange for telling Arlington some of his former experiences in crime, which Arlington often uses in his stories. Miss Jenkins, his secretary, seems to be a colorless spinster who appreciates the chance to work for a popular a writer. Andrew Arlington's lazy and shiftless nephew, would be unfortunate indeed without Alexander to pay off his gambling debts. Vivian Odell, although much younger than Arlington, seems a devoted fiancée.

George Brewster, Vivian's athletic young friend, causes Arlington some qualms of jealousy, but Vivian soon allays them. However, Arlington learns that things are not so calm and pleasant as they seem on the surface. When Flo Baker, the sweetheart of Lucky Louie, brings news that Andrew must pay his \$5,000 gambling debt at once or be killed, the real nature of the people surrounding Alexander Arlington begins to be revealed. Almost every one of Alexander's associates has a good motive for wanting to see him dead. Which one of them is the murderer? Will Alexander be able to solve the mystery before the murder occurs, and thus save his own life? For an evening of laughs and suspense, be sure to see this play. The clever dialogue and the surprise ending make it a drama that will be long remembered.

AUSTIN—Two supercharged issues—taxation and recession—like two strands of a high-voltage electric fence, seem to be twined through every area of Texas government.

Recession, though considered mild and temporary, is here and now. New taxation, in the light of official estimates, will be practically unavoidable next year.

Even though the recession is labeled "mild" and new state taxes the inevitable result of explosive growth, having both issues come up at the same time makes each seem

worse. New tax talk, never popular, is even less so with people feeling the chill wind of a cut in income.

Barring an unexpectedly swift upturn in the economy, the two issues will break through the middle of next summer's political campaigns. It'll be particularly rough campaigning for those who have to get on one side or the other of the taxation fence.

Some legislative candidates are already being asked, "If there had to be a new tax, what kind will you vote for?" Some say they have

ned decided what they'd vote for, but will say what they'd vote against. Others say they're making no decision until after the State Tax Study Commission completes its reports.

Latest report by the Tax Study Commission show some of the possible directions in which Texas may have to move to get additional tax money.

It notes that, besides Texas, only two other states are without either a general sales tax, personal income tax or corporate income tax.

Texans in 1966 paid lower state and local taxes than the average for other states—\$129.50 per capita for Texas compared with \$157.50 per capita national average.

Rate of tax increase for Texas has been much faster than U.S. average. Texas rate of increase from 1961-66 was 23.4 per cent, national average, 13.4 per cent.

Commission's next report will deal with future spending needs, says Senator William S. Fly, chairman.

UNEMPLOYMENT UP AGAIN—Texas Employment Commission reports claims for unemployment compensation at a new high.

There had been a slight drop for the previous week. But latest weekly tabulations showed TEC paid out \$1,438,448, compared to \$696,464 for the same week a year ago. Number of persons filing claims was 42,378, almost double the 42,705 filed a year ago.

Even so, most nationwide figures show Texas to be a highly favored area. Labor Department's Bureau of Employment Security says that Texas has the lowest rate of unemployment of insured workers of any state in the nation—1.5 per cent here compared to 1.9 per cent nationally.

ON PLUS SIDE—Other business barometers tend to bolster the view that Texas' economy is weathering the squally weather well.

First 1968 reports from the Bureau of Business Research on overall business activity showed the January index up eight per cent from December, one per cent from January, 1967.

Texas Banking Commission's spring call for condition of Texas banks brought reports of hefty increases in money on deposit. Some cities showed drops in bank deposits, but in general they were up with some cities setting records or near records.

BBR's report notes that "although evidence of recession is plain, the strength of the state's economy is shown by its stubborn resistance to further decline."

A small increase in building activity in early 1968 may be the forerunner of a general revival of the home building industry this year, says BBR.

On the state's No. 1 economic headache—sagging oil production—a BBR spokesman says competition of cheap foreign oil could "flatten out" Texas' growth curve. Suggested antidote: bring in other industries with strong growth potential to "fill in the gap."

GOVERNOR TO BATTLE IMPORTS—Gov. Price Daniel has asked Washington to reduce oil imports.

He has presented evidence gathered by the state oil imports study commission on how Texas economy is hurt by cutbacks in oil production. Governors of other oil-producing states have joined him in asking that imports be limited to the 1964 level.

Though many economists predict that the problem of foreign oil is here to stay, Texas officials hope to gain at least enough relief to get the stymied domestic industry going again.

JUVENILE IMMUNITY CITED—A proposal to allow criminal court trials of teen-agers who commit serious crimes may come before the next Legislature.

Dr. James A. Turman, director of the Texas Youth Council, suggested a study in this area at the joint Austin meetings of the Attorney

General's Law Enforcement Conference and Texas Law Enforcement

Turman said he felt that in some cases "chronic and serious" juvenile offenders were being over-protected by the law at the expense of society. Under present law boys under 17 and girls under 16 cannot be tried in criminal court. One "serious offender," related Turman, told officers, "You can't touch me. I'm a juvenile."

Not so in Canada, said a visiting speaker from the Royal Canadian Mounted Police. Canada has no minimum age for sending offenders to the penitentiary, reported the Mountie, and "we are not troubled by many murders and rapes by youngsters."

HEALTH DRIVE ON—Governor Daniel has joined a young father from Baird, Texas, Bob Stanley, in urging Texans to participate in the fight against nephrosis and other critical kidney diseases which claim thousands of lives each year.

Stanley, who has lost two children to nephrosis, visited Daniel recently and won his support in the campaign to organize additional chapters of the National Nephrosis Foundation in Texas. The Foundation now has chapters in El Paso and San Antonio, but victims

of nephrosis, nephritis and allied kidney diseases are found in all parts of the state.

Governor Daniel designated March as Nephrosis Month and urged Texans to give financial support to research studies to determine the causes and seek cures for diseases of the kidney.

ANTI-ACCIDENT STUDY—A brand new commission is at work to find ways to prevent needless deaths of industrial workers.

It is the Industrial and Occupational Safety Study Commission set up by the last Legislature. Former Civil Appeals Judge Mallory B. Blair of Austin is chairman.

Governor Daniel told members that Texas presently has 600 to 700 deaths yearly from industrial accidents. He said 98 per cent are considered preventable.

CHEVY'S NEW V8 LEVELS THE HIGHEST, HARDEST HIGHWAY OVER THE ANDES!

To prove the durability of Chevrolet's radical new Turbo-Thrust V8,* the tremendous flexibility of the new Turboglide transmission,* the incredible smoothness of Full Coil suspension, we tackled the most challenging transcontinental road in the world — the 1,000-mile General San Martin Highway. To make it harder, the Automobile Club of Argentina sealed the hood shut at Buenos Aires — no chance to add oil or water or adjust carburetors for high altitude.

So the run began — across the blazing Argentine pampas, into the ramparts of the forbidding Andes. Up and up the road climbed, almost 2½ miles in the sky! Drivers gasped for oxygen at 12,572 feet — but the Turbo-Thrust V8 never slackened its torrent of power, the Full Coil springs smothered every bump, the Turboglide transmission made play of grades up to 30 percent. Then a plunge to the Pacific at Valparaiso, Chile, a quick turn-around and back again. Time for the round trip: 41 hours 14 minutes — and the engine was never turned off!

physical requirements be minimized to the greatest possible extent. Emphasis would be on scientific knowledge and development, and not on the cadets' military standing or service.

The author of the bill points out these advantages:

It would assure our Armed Forces and civilian branches of the Government with a definite, dependable and steady number of highly trained scientist-officers. At present, we must obtain such men through the draft and have been unable to get enough of them.

The author maintains it would provide a far greater advantage for the country by the fact that men and women trained at the Science Academy would be geared toward national defence, including scientific research and scientific defenses.

The pro argument says that it would provide an incentive for American youth to strive for scientific cadetship and pursue a career in science and engineering; that it would strengthen our present system of scientific education by training more people skilled in the art of communicating interest in science, and increase the percentage of science teachers.

If we are to concentrate on training scientists for the future, this method would at least pin-point our efforts. It would assure the services of trained scientists for the Government, and not train a lot of people who may decide to accept employment in private industry after they receive their education at Government expense.

What do you think?

Guarding Tomorrow's Freedom

How to maintain a lasting peace . . . how to preserve full employment . . . how to ward off recession . . . how to keep our high standard of living. Those are problems which continually face the Government of our country.

Tomorrow they may blaze into issues that must be solved by the factions and interests that make up our democracy. Each of these factions and interests will demand to be heard — and they will be heard.

The press of America will report and comment on what each and every party to an issue has to say. The public will know what is going on.

It is only thus that the best interests of America

can be served over and above the interests of any one faction or any limited-interest group.

This vital function can be performed only by a press that is free to write and free to publish the story of national issues, unfettered by dictation from any source.

Today's freedoms can be secured and tomorrow's freedoms guarded only by a press that owes allegiance to no ogre of tyranny bent upon shaping our destiny to suit its own ends.

If the press of America is, in a real sense, to remain the guardian of our future, we must preserve the freedom it possesses today.
