> High Hopes-Mr. Wilson went to Washington, his saddlebags full of multi-million-dollar hopes for Texas school children.

> Atty. Gen. Will Wilson personally delivered the Texas brief in the upcoming U. S. Supreme court case on Texas tidelands. At issue is whether the state or federal government owns submerged lands between the points 3 miles out and 10.5 miles out.

Wilson carried the arguments for Texas ownership in 40-year-old saddlebags that belonged to a heroic Texas Ranger. He declares optimistically that the case is jinxed -in Texas' favor -- because the brief is dated Aug. 13, trial is set for Oct. 13, oral arguments will last 13 hours and 13 people worked on the research.

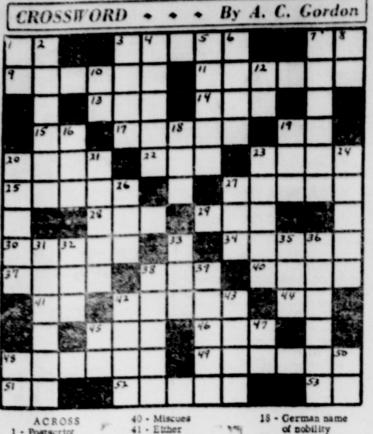

More seriously, he noted that -Texas had spent "a big some of out on the local level with some Mr. and Mrs. Floyd Rose and son, money" marshalling its facts, that sort of coin-tossing arrangement. Joe Allen of Lubbock, and Estin a bevy of top-notch legal minds But they say they'll go to court, if Shepard of Arkansas, were visiting from over the state, nation and two necessary foreign countries had spent some Cit eisWin Out-Cities and utility day last week. LONG PEANUT COMBINE

World's Most Advanced Peanut Combine

PICKS MORE PEANUTS PER DAY

You can actually pick up to 25 acres of peanuts in eight hours! You can start picking earlier in the morning and pick later in the afternoon. You can actually run a LONG peanut combine two to three hours longer in a day than you can others. It easily handles up to four rows of peanuts in a single windrow, or you can pick stacked peanuts by forking them onto the pick-up reel. Hay is discharged downwardly in the row and can be baled with a pick-up type hay baler.

• PATENTED CLEANING SYSTEM GIVES YOU CLEANER PEANUTS

Peanuts picked with the LONG peanut combine do not need recleaning! This combine has special system of air lifting and recleaning the peanuts before they enter the begliffs special system plus a variable speed fan gives you peanuts with only 2% to 6% foreign matter. Most will run 3% or less matter. Most will run 3% or less.

LONGER LIFE AND LOWER UP-KEEP

Throughout the combine all main shaft bearings are mounted in rubber saddles, triple saled to keep out dust and tubricated for life. Heavy duty wood cylinder bars with flexible stime reduces tooth breakage. Frame is all steet. These features plus many other engineering advances make the LONG peanut combine assure you of the lowest up-keep costs. The same of the sa

The Kizer Telephone Co.

Wishes to express its thanks to the people of Rising Star and Cross Plains for their votes of confidence and cooperation which make it possible to give this area a telephone service years in advance of the time.

It is now possible for the Company to go ahead with the EXPAND-ED AREA SERVICE plan which will combine the Rising Star and Cross Plains areas in a one-dialing district, thereby doubling the service to each subscriber without toll costs.

We feel that the actions of the Rising Star and Cross Plains City Councils in approving the small increase in rates necessary to finance the Extended Service are votes for the progress of our twin communities because a first class, dependable communication service is vital to the growth, prosperity and living values of any community.

It is certainly the object of the Kizer Telephone Co. to merit the confidence expressed and to provide you, our friends and patrons, with the best telephone service to be found anywhere.

THE KIZER COMPANY is spending HALF A MILLION DOLLARS to make possible this service for you!

We are glad you have given us the opportunity to do so.

Sincerely,

E. O. and Ralph Kizer
