Mrs. DeBusk said, "I know that all the workers will do their best," and she also asked cooperation of the public in the drive. She added that she feels confident that the drive quota will be reached.

Rev. Simpson added that in order to reach the goal, participation by all area citizens will be required, as has been the case in past drives.

HOW TO STDUDY THE BIBLE ... Continued

Number two: We must study the Bible with proper regard for its purpose. The Bible relates to the need for human redemption. This is the fundamental thought dealt with in the first three chapters of Genesis: God sets before us the explanation as to why there was a need for the plan of redemption. The Bible teaches that all accountable persons share in this need, Romans 3:22, 23; I Jno. 1:8-10. The Bible shows that redemption is through Jesus Christ, Rom. 3:24; Eph. 1:7; Col. 1:14; Gal. 1:4. The Old Testament message points the way to Christ and prepares for Him and for His message. This is the testimony of dozens of passages, such as Lk. 24:13-35; Jno. 5:39, 46; I Pet. 1:10-12. The sacred plan for human redemption brings honor and glory to God. This fact is mentioned in Eph. 1:6; Eph. 3:21; Rom. 16:27; Gal. 1:5; Phil. 2:11; Rom. 11:36. Consideration of these fundamental facts makes obvious the purpose of the Bible: THE GLORY OF GOD, AND THE SALVATION OF MAN, THROUGH JESUS CHRIST OUR LORD. This is the basic point in Bible study. This is the divine purpose line which runs from the first verse of Genesis 1 through the last verse of the Revelation.

American farmers have long been making things better for fellow countrymen. As the bicentennial fever starts to build, it is appropriate to take a look at the contributions of our farmers. For instance, thirty-two of the fifty-six men signing the Declaration of Independence were farmers. Some of those same men later worked to frame the Constitution. As for the American Revolution, some historians are now giving a major share of the credit for American victory to the farmer. Not only as a fighter, but also as a critical food supplier. American fighting strategy never needed to be changed because of short food supplies. Conversely, the British were constantly having to make major changes in planning because of food shortages. Strategically, the food supply advantage created by the patriotic American farmer, was probably as important as any other single factor in the British defeat.
