

# THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITERA SCRIPTA MANET—THE WRITTEN WORD ENDURES MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, AUGUST 27, 1936

VOLUME 14 NUMBER 31

## M. G. MILLER ELECTED COUNTY JUDGE, WILLIAMS, CLERK

### THOMPSON AND McDONALD WIN STATE OFFICES; D. WARNER GETS COMMISSIONERS PLACE IN RUNOFF

#### Voters Rally In Supposedly Indifferent Second Primary To Cast Large Number of Votes For Their Choice.

Bailey county citizens as a whole surprised themselves last Saturday when they turned out en masse to cast their ballots in the second Democratic primary election which swept M. G. Miller into the office of County Judge and J. J. Williams into office as County and District Clerk. Miller led his opponent, Dr. A. R. Matthews by 80 votes while Williams beat his opponent, Miss Elizabeth Harden by 232 votes, according to unofficial returns posted late that night.

### TABULATED RETURNS OF VOTES CAST IN BAILEY COUNTY SATURDAY, AUGUST 22

	Thompson	Morris	Terrell	McDonald	Miller	Matthews	Harden	Williams	Henderson	Warner
Males	20	26	24	22	20	21	25	28	15	41
Females	68	66	58	56	56	58	58	61	23	35
Total	88	92	82	78	76	79	83	89	38	76

### Pupil Registration In Muleshoe School Begins Fri. Sept. 4

The Fall term of Muleshoe school opens proper Monday, September 7, and the opening scheduled for the coming term has been set by Superintendent W. C. Cox as follows: Thursday morning September 3, at 9:00 o'clock teachers will meet at the High school building. Friday, Sept. 4, registration of students in both Grammar and High school grades. It is hoped all students will register on this date whether or not they will be able to enter regular attendance. This will be a great aid to both the student and classification authorities. Students not registering on the day set for this purpose will find greater difficulty working out their schedule as this will be more or less worked out in stabilized form immediately after registration.

### Scattered Rain Over West Texas Loosens Heat's Grip on Plains

Moisture, ranging from very light showers, fell in scattered manner over the Panhandle and Eastern New Mexico Friday and Saturday of last week, loosening heat's tenacious grip it had held over this area for several weeks past. The precipitation was quite spotted over Bailey county, reaching as far east as Lubbock northeast to Gray county and northwest to Dallam county.

### TECH HAS 20 SCHOLARSHIPS

Lubbock, Aug. 25.—American Legion members, their sons and daughters are eligible for 200 scholarships at Texas Technological college again this fall, President Bradford Knapp has announced.

### FEDERAL FARM LOANS HIKED \$200 TO \$400

#### Roosevelt Signs Order Notifies Congressmen Marvin Jones.

Farm loans have been doubled, going from a maximum of \$200 to \$400, to distressed farmers who make applications under the Farm Credit Administration, according to announcement made Friday of last week by Congressman Marvyn Jones, Amarillo, chairman of the Congressional Agricultural committee.

President Roosevelt, acting under the Emergency Relief act of 1933, issued the following order: "The amount which may be lent to any one borrower (inclusive of any loan or loans heretofore granted to such borrower under the provisions of the above act and this executive order) shall not exceed the sum of \$200, except that the amount which may be lent to any one borrower for the production of winter wheat (inclusive of any loan or loans as aforesaid) shall not exceed the sum of \$400 and each applicant for a loan shall establish to the satisfaction of the proper officer or employee of the Farm Credit Administration, under such conditions as the governor may prescribe, that the applicant is unable to procure such loan from any other source."

### Local Boy Scouts Place In Lubbock District Swim Meet

While winning several individual first, second and third places, Muleshoe placed fourth in the Boy Scout regional swimming event held at Lubbock last week. Billy Beavers, well known local "wigletail submarine" of the junior division, placed first in the diving event; Weldon Brooks Winn, placed third in the 30 yard free style swimming event and second in diving event for intermediates. Muleshoe troop placed third in the free style relay swimming event.

### 250 TON SILOS ARE FAVORITE SIZE FOR BAILEY CO. FARMERS

It appears the Journal was a little premature in its report last week that Paul Bros., ranchers south of Circleback, were putting up a 250 ton silo, for later information is to the effect that four silos of this size and type are now being erected. County Agent Waide says trench silos will be dug in every community of Bailey county. John Stanky, of Baileyboro community, now constructing one of 250 ton capacity. John Williams, Melvin Snider and Will Williams, of West Camp community are making preparations to begin trench silos on their respective farms. More than 20 farmers have already signified their intentions of having silos of this type this fall.

### MRS. LONG IS INSANE

Mrs. Olga Long, of the Maple community, southern part of Bailey county, was adjudged insane at a hearing held Friday of last week in County court. Application for her incarceration in the state asylum has been made at Wichita Falls where she will be taken as soon as possible. It is stated that while her mental faculties have been falling for some time past, it is only within the last month she has become seriously demented. Germany will shortly inaugurate a two year compulsory military service, according to report last week.

### SISTERS MARRY FATHER AND SON—NOW WHO'S WHO?

Two sisters married to father and son in a double ceremony held at Helmetta, N. J., studied their complicated relationships. Julia Scott, 22, married William Tilton, 60-year-old chicken farmer and Julia's sister, Cecilia, 18, married Tilton's son, Ernest, 22. Julia became the mother-in-law of her sister Cecilia, who became Julia's daughter-in-law. Father and son are brothers-in-law.

### HART-ALEXANDER

Miss Pauline Hart, daughter of Mr. and Mrs. Thomas J. Hart, Plainview, and Audrey A. Alexander, this city, son of Mr. and Mrs. J. M. W. Alexander, Friona, were married Thursday of last week at the Central Presbyterian church, Amarillo. Rev. R. Thomsen, pastor officiating as the nuptial vows were read.

### EVANS-FAULKNER

Miss Alynne Evans and Bill Faulkner were married Sunday evening, August 16, at Corviss, N. M., by Rev. Campbell, Methodist pastor. The bride is the daughter of Mr. and Mrs. Martin Evans, of Y. L. community. She is a graduate of the Muleshoe High school class 1935, and was a student at Texas Technological college at Lubbock the past school term. The groom is the son of Mr. and Mrs. C. V. Faulkner, formerly of Muleshoe, but now living at Rosalia, and a brother of Mrs. Lucie Lowe, of this city. He was a graduate of the 1936 class of Muleshoe High school and while attending here he was one of the star basketball players. He is a student at Texas Technological college at Lubbock the past school term.

### DENNIS-PORTER

Miss Christine Dennis, daughter of Mr. and Mrs. B. Dennis, residing a few miles west of Muleshoe, left Tuesday for Hearne to be married to Euell Porter, the wedding ceremony taking place Wednesday at Atlanta Junction. She was a graduate of the 1935 class of the Muleshoe High school and has recently been attending Hardin-Simmons university at Abilene where she is a student. Mr. Porter was a graduate of Hardin-Simmons university a few years ago and has been in Muleshoe several times assisting with the singing during revival meetings at the Baptist church.

### TOWNSEND CLUB MEETING

There will be a meeting of members of the Bailey County Townsend club held in the district court room of the court house in Muleshoe next Sunday afternoon, beginning at three o'clock, according to Elmo Head, to which all members and friends of the club are invited. Head stated some prominent speaker would be present to address the gathering and that music by the Hill-Billy orchestra, of Colvis, N. M., would be rendered.

### INVESTIGATE SCREW WORMS

L. L. Brock, of National Bureau of Animal Industry, was in Muleshoe Monday and Tuesday of this week and accompanied by J. B. Waide, county agent, visited several ranches and other livestock growers of the county to investigate the ravages of screw worms. Mr. Brock states that while they found evidence of some worms of this type, yet they are not nearly so prevalent here as in some other counties of this section.

### BALLOT IS TO BE LENGTHY IN NOVEMBER VOTE

Six parties have announced they would have candidates, which would require six columns. One column would be left blank for "write ins" and candidates in which independent candidates filed the ballot would be eight columns wide. The ballot columns would be nearly 20 per cent wider than a newspaper column.

### PLAINS GINNERS HOLD Annual Meeting At Lubbock Last Week

Plains Ginner's association elected Lon M. Davis, Floydman and a director of the association, as president at an annual meeting in Lubbock Thursday. The association heard a recommendation of a 35-cent ginning rate.

### Very Ancient Folks Lived Here Says Dr. Howard, Investigator

Dr. Edgar B. Howard, of the University of Pennsylvania Museum, was in Muleshoe last week checking up on archeological conditions of this area, he having spent some time in similar investigations just across the line in New Mexico. There is every indication, said Dr. Howard, that this country was inhabited some eight to twelve thousand years ago by a very primitive type of prehistoric people. Arrow and spear heads found are classified as an exceedingly early type. No skeletal remains of these early people have yet been discovered; neither are investigations finished, and it is hoped and expected that such may be later discovered. Just a few miles east of Muleshoe good specimens of the sabre tooth tiger have been found and in the sandhills southeast of here very ancient types of arrow heads and other early Indian pottery has been discovered, also a few Spanish coins of later civilization have been found. There is much profitable investigation that may be made in this area in a geological and archeological way.

### PROGRESS GETS AUDITORIUM TO COST \$10,000.00

#### Will Be Ready In Six Weeks; No Tax Increase.

Construction of a new brick auditorium, 48x78 feet, was begun at Progress last Monday by the Jess Williams construction Co., Lubbock. Butler Co., Lubbock, being architects. This new building, a separate unit of the Progress school building, being located 61 feet from the other building, will furnish adequate accommodations for growing school, social and religious needs of that rapidly growing community. The building construction is being rapidly financed by a Federal grant of \$4,500, plus serial bonds, drawing only four per cent interest, the bonds totaling \$5,500 having been bought by the state. It is stated by members of the school that because of the Federal grant and low rate of interest on voted bonds, no additional taxes will be demanded of patrons and property owners of the school district. Architectural type of the new auditorium will be of Gothic style, similar to Texas Tech building construction. When finished it will be equipped with its own steam heating plant operated by gas, and will be lighted by electricity. Progress school begins September 7. There are three teachers handling all grades up to High school. Seth Hollins being superintendent. High school pupils from that district attend in Muleshoe. It is expected the building will be completed and ready for occupancy within six weeks.

### Claims Laws Not Clear

Sandlin said the laws were not clear as to the final date for filing of party candidates. He said that the next Monday midnight would be the deadline for filing of independent candidates.

### Only Two HOLC Loans Made In Bailey County During Three Years

Residents of Bailey county received a total of \$4,000 from the Home Owners Loan corporation during the three year period of refinancing operations which terminated June 30, 1936, according to the final figures furnished H. P. Drought, state director for the National Emergency council. This sum represented only two individual loans. A total of 44,361 distressed home owners in Texas were extended aid in the sum of \$103,208,774. Of this money it is estimated that \$6,343,000 went toward the payment of taxes and assessments. The estimated average of tax and assessment payments per loan in Texas being \$143.

### Germany Will Shortly Inaugurate a Two Year Compulsory Military Service, According to Report Last Week.

**SALES SERVICE**

**SUMMER THRILLS**

The strike of a 14-inch trout while using a bamboo rod—the battle to keep the slack out of the line—wondering whether your line can stand the gaff—reeling in while you watch him jump and think what a beauty he is—the juggle with the net—then 300 minutes to recover yourself.

The thrill of new country, mountains, streams, forests. Then—

The thrill of a Ford V-8 with its unequalled power, comfort and ease of handling, just glide over the mountain roads and live the battle over and over again.

If you doubt drive a Ford just watch how easily they pass you in the mountains.

**Motor Co.**

PROVED BY THE PAST—IMPROVED FOR THE FUTURE

**SIX PROPOSED AMENDMENTS TO THE STATE CONSTITUTION DESERVE THE SERIOUS CONSIDERATION OF VOTERS**

Six proposed amendments, which have been published over the state this month, are to be voted on in the special election November 3. State workmen, school teachers, legislators, liquor dispensers and prisoners would be more directly affected than other branches of society, but their passage would be of vital importance to the state as a whole.

One of the proposed amendments, particularly significant to West Texas, provides for a reapportionment of representatives to the Legislature, which would limit all counties with a population of 700,000 or less to a maximum of seven representatives. Counties of more than 700,000 would have an additional representative for each additional 100,000 population. This is intended as a protection to the small counties and would put them on a more equal basis with the counties of larger population. West Texans for years have been fighting for some kind of reapportionment. But until now their pleas have been ignored by the thickly populated sections in East and South Texas who always had a majority vote in the Legislature by virtue

of their population. An amendment which is causing much discussion would raise the salaries of the governor and other constitutionally authorized officers. Under the proposal plan the governor's salary would be raised from \$4,000 to \$12,000, and the attorney-general's from \$2,000 to \$10,000. The secretary of state, who now receives \$2,000 and the comptroller the treasurer and the commissioner of the general land office, all of whom now get \$2,500 would receive \$6,000. Lieutenant Governor Walter Woodul is a leading proponent of the change. Passage of this amendment would eliminate much corruption in our state government and would attract more capable men to the offices.

A workmen's compensation amendment would provide the same type of insurance for state employees as that enjoyed by employees of large corporations. State laborers now "work at their own risk."

Another amendment would place the sale of intoxicating liquors under state control with a central office handling dispensation of all liquors. Of special interest to the teaching

profession is the proposed amendment relating to teachers employed in the public schools, colleges and universities supported by the state would be placed under a retirement system. According to the proposed plan, the teachers would pay a part of their monthly salary into a retirement fund and this amount would be matched with state money as a retirement pension after the teacher had served 20 years. In case of retirement before the 20 year period was completed, the teacher would be refunded all the personal contribution made to the fund. Retired teachers who had served the 20-year period would be paid \$180 per year. A board of pardons and paroles would be set up by the sixth amendment, transferring the power of pardoning prisoners, which now rests in the governor's hands, into the hands of the board. If this amendment had been drawn into the constitution several years ago, it would have served as a sure-fire check on the Ferguson and a few other governors with the pardoning habit.—Tribune, Farwell.

**What's Happening In Washington And Other Cities Of Importance**

The International Garment Workers union New York city, has sent \$5,000 to Spain to aid the "red" cause there. On their ballots this fall Oregon, Colorado, Washington and Georgia will have proposals for limitation of the tax on real estate.

It has been announced there will be no fan dancing or other similar form of mudity at the New York world's fair to be held in 1939.

A National Twins association organized by 24 twins at its last meeting had more than 1,200 twins and triplets present. Their ages ran from mere babies to over 70 years of age.

Rural Resettlement administration reports voluntary reduction by creditors of \$25,861,036 in debts of 33,906 distressed farm cases throughout the nation.

Notwithstanding the day of free passes is supposed to have been over several years ago, report of the Interstate Commerce commission reveals more than 3,000,000 persons obtained orders for transportation without paying fees last year.

The recent votes showing deflection of farmers in the middle states toward London as the coming president has aroused Democratic Chairman James

Farley, that he has invited Congressman Marvin Jones, this state, who is chairman of the powerful Agricultural committee of Congress, to come to Chicago and take charge of the farm vote division of the coming election.

It has been announced the Federal government will purchase \$10,000,000 worth of seed grain for farmers in drought areas.

New Mexico has received \$4,127,975 in federal and benefit payments from the Federal government during the past three years, the AAA reports.

In Navajo county, Arizona, Holbrook county seat, 98 per cent of the farms and ranches are operated by their owners.

A mee Semple McPherson, Los Angeles, Calif., temple preacher, has settled her \$800,000 suit filed by assistant Vivian Denton for \$500, report says.

Gov. Floyd B. Olson of Minnesota, died last Saturday night of cancer of the stomach, his funeral being held Tuesday. He is succeeded in office by Lieut.-Gov. Peerson.

A gold mine recently purchased by George Austin at Junco, Nevada for \$600 is said to now be producing that amount of gold per day. It is reported he has refused \$10,000,000 for its sale.

Hope, Ark., farmer carries honor of having raised a 135 pound watermelon this year. It was purchased by Col. Albert A. Rogers, that place and sent to his son at Boston, Mass., at a total cost of \$20.98.

Sixteen Russian conspirators found guilty of having plotted with the exiled Leon Trotsky, war minister of early revolutionary days, to assassinate Dictator Joseph Stalin and others high in the government, and Communist party, were given death sentences last Monday.

**MRS. SMITH IS HONORED**

Mrs. Jim Cook entertained at her home Thursday afternoon of last week with a surprise miscellaneous bridal shower in honor of Mrs. Ross Smith, who was formerly Miss Stella C. Sullivan.

The honoree received many lovely and useful gifts from those who attended the shower and several who did not attend sent gifts.

A delicious refreshment course of ice cream and cake was served by the hostess.

Mrs. Smith is leaving this weekend for Athens to be with her husband.

**Let' Get Ready for School**

Only a few more days now until Temples of Knowledge will be thrown wide open and the youngsters will be perusing their studies. Better take Time by the forelock and see that the pupils are fully equipped for that opening day. Here are a few suggestions worth while:

- PRINTS, new patterns, fast colors, per yard ..... 10
- PRINTS, beautiful assortment of new patterns, per yard ..... 15c and .19
- CHILDREN'S Dresses, fast colors, each only ..... 50

**General News Over Texas And Adjoining States For The Week**

More than 3,000,000 people have visited the Centennial exposition at Dallas.

Official report says New Mexico now has 46 cotton gins capable of turning out 2,061 bales in a 12-hour period.

Well preserved bodies of the giant sloth, living 10,000 years ago, have been discovered in a cave in Arizona.

There have been 2,995 law degrees conferred on students of State university, Austin, since its opening in 1883.

John Miller, Rowell, has been nominated by Republicans of New Mexico as their candidate for governor.

A \$500,000 women's dormitory is to be erected on the campus of the Eastern New Mexico Junior college at Portales.

Gov. Alfred last Saturday appointed R. B. Stanford, secretary of state, to fill the unexpired term of the late district judge, Sam R. Scott, at Waco.

In the battle of Hobbs against Lovington over the county seat location, Hobbs citizens have enjoined the Commissioners court from constructing a new court house at Lovington the present county capital.

The sum of \$104,421.19 inheritance tax was paid to the State of New Mexico from the estate of the late Senator Bronson M. Cutting who some time ago was killed in an airplane wreck in Missouri.

Texas railroads last week made application to the State Railroad commission to reduce their shipping rates on cotton 33 1-3 per cent to meet competition of truck rates.

So much press agency of the nudity going on at the Centennial at Dallas, and so much criticism has been made from clean minded people, that officials have finally ordered it shall be toned down.

New business corporations chartered in Texas during July decline in number 163 under the previous month and 129 under July a year ago. In capitalization the decline was 493 and 273, respectively.

Dun and Bradstreet Inc., report a decline of 94 per cent in number of business failures in Texas for July and 93 per cent in their liabilities in July as compared with the same month last year.

Hale county now has approximately 310 irrigation wells, pumping water for farm crops at from 100 to 200 feet depth, the pumping plants costing from \$1200 to \$3000. Eighty-three new pumping plants have been installed within the past six months.

The City of Lubbock is to have another hospital, being erected by Drs. F. B. Malone, Olan Key and Sam C. Arnett Jr. It will be known as the "Plains Hospital and Clinic," construction cost being estimated at \$35,000 besides furnishings and equipment.

A long span of the Davidson bridge across the Red river near Frederick.

**Directs Exposition**

Harry Olmsted, one of the best known business men and civic leaders in the Southwest, is the new Director General of the Texas Centennial Exposition. He is at the helm of the \$25,000,000 World's Fair at Dallas following the death of William A. Webb, general manager, on August 9. Mr. Olmsted, for twenty years has been a director of the State Fair of Texas and for five years its president.

**TEXAS MAN'S YEARS OF MISERY QUICKLY STOPPED BY GREAT GAS-TONS TABLETS**

Mr. E. S. Nelson of Shallowater, Texas, says that he spent eight long years a sufferer of stomach disorders. He states that during this eight years of suffering he went to any number of doctors and that three of them told him he had gastric ulcers. A short time ago Gas-Tons Tablets were recommended to him and after taking them for two months he gained 15 pounds and for the first time in eight years is able to do his regular farm work and is back to normal weight again and for the good of humanity wants to unconditionally recommend these tablets to any one suffering with severe stomach pains, gas or colitis, indigestion and other stomach disorders. Gas-Tons tablets are on sale in Muleshoe by the Western Drug, 25 tablets \$1.00 to explain to you what this remarkable compound is doing to rothers and all so ask about the ironical guarantee which says you must be satisfied or your money back. 29-46

**Lovers' Ladders**

In the Dolomites in Italy it is still the custom for a youth to set a ladder to a girl's window, mount it, and talk with her—an ancient custom which Shakespeare utilized in "Romeo and Juliet."

Buy it in Muleshoe.

**GET GULFLUBE— It's "Stripped for action"!**

A cheap, poorly refined motor oil is like an over-dressed wrestler. Such an oil is hampered by useless waste which should be removed by further refining. Such an oil, like the over-dressed wrestler, can't do a good job!

Most 25c oils, like this wrestler, are still somewhat hampered. Some of the useless waste has been removed, but not all of it. No refiner of 25c oils could afford to carry refining further than this until Gulf perfected the Multi-sol process.

GULFLUBE MOTOR OIL, like this wrestler, is stripped for action. Stripped of all useless waste by the Multi-sol process—the finest 25c oil in America—the only 25c oil equaling the finest 35c oil! For better lubrication, cleaner motor, less oil consumption—Get Gulflube—at the Sign of the Orange Disc.

### A Big Hike Seen In Internal Revenue For U. S. Treasury

A jump of \$66,728,906 in internal revenue collections for the first month of the fiscal year as compared with some items showing increases of several hundred per cent.

The total rose from \$221,597,633 in July of last year to \$288,326,539 in the same month this year, or almost 30 per cent. All the major categories of tax collection registered gains, ranging from \$12,752,211 to taxes on liquors to \$35,931,477 for miscellaneous internal revenue.

Secretary Morgenthau said last week after a White House conference that no new taxes would be asked at the next session of Congress. The Treasury report showed that corporation income taxes more than doubled, rising from \$14,364,533 to \$29,065,623. Individual income tax payments rose from \$269,015 to \$11,052,514. Excess profits tax collections gained from \$174,319 to \$1,048,371.

Estate taxes increased from \$14,224,356 to \$29,014,652, while gift taxes jumped from \$96,766 to \$327,212.

### THIRD BIRTHDAY HONORED

Friday afternoon of last week a birthday party was given in honor of Kathleen Huber's third birthday anniversary at the home of her aunt, Mrs. Jim Cook.

Various games were played after which refreshments of ice cream and birthday cake were served. The honoree received many lovely gifts from her little friends.

Those who attended were Howard Tate, Dixie Jennings Chita Hall, J. N. Wyer, Luther Wright Buchanan and Snyder Waggon.

### BANKING SYSTEM SHOWS PROGRESS

State Bank Resources Grow More Than Three Billion Dollars in a Year

### NATIONAL BANKS GAIN

American Bankers Association Gives Details of Banking Institutions and Notes Stronger Condition

NEW YORK.—Continued improvement in the condition of state chartered banking institutions, with an increase of more than three billion dollars in a year in total resources, is shown in a report just issued by the State Bank Division of the American Bankers Association.

The report, prepared by the division's Committee on State Bank Research from data furnished by state banking departments and parallel data issued by the Comptroller of the Currency for national banks which show similar improvements.

"The combined resources of 10,473 state supervised banks were \$35,724,723,000 as of December 31, 1935," the state bank report says. "Total deposits amounted to \$19,523,000,000. Loans and discounts stood at \$12,430,404,000 and total investments were \$14,170,421,000."

A year previous, tables in the report show, there were 10,644 state supervised banks, with combined resources of \$32,690,202,000, total deposits \$17,297,558,000, loans and discounts \$13,060,023,000 and investments \$12,582,325,000.

Classes of Institutions  
Of the reporting state banking institutions on December 31, 1935, 82% were commercial banks, the report states, 9% trust companies, almost 9% stock and mutual savings banks and less than 1% were private banks. The report adds:

"The parallel upward movements of deposits and total invested funds of total state supervised banks during the years 1934 and 1935, after declines in these items in 1932 and 1933, are indications of definite steps toward recovery in banking. "Based on figures assembled for total state supervised banks on resources and liabilities as of December 31, 1931 to 1935, it is noted: (1) that deposits in 1935 rose approximately 12 per cent over the previous year, as compared with an increase of about 9 per cent in 1934 over the year 1933, and declines of 7 per cent and 12 per cent in 1932 and 1933, respectively, from the preceding years of 1932 and 1931; and (2) that total invested funds increased by approximately 2 per cent in 1935 and also in 1934, while they had decreased by 9 per cent in 1933 and by 11 per cent in 1932."

Analysis Shows Stronger Positions  
In a survey and analysis of earnings and expenses of state banks doing commercial business, it is brought out that in a majority of states they have increased their earning ability during 1935. On the basis of data covering 7,928 banks in 42 states, the report says:

"The most significant fact to be pointed out is that net profits of state banks—after deducting charge-offs on loans, investments, etc. and adding recoveries—were shown in 37 of the 42 states which reported in 1935, in comparison with net profits in only 11 of the 25 states reporting in 1934. Measured in terms of dollars per each \$100 of invested funds, net profits in 1935 ranged between \$2.40 and \$1.00 per \$100, with 10 states showing profits of \$1.00, or over, per \$100, while in 1934 net profits did not exceed \$1.20 per \$100 and only three states showed profits of \$1.00, or over."

The report contains voluminous tables showing the resources and liabilities of all classes of state chartered institutions and detailed analyses of earnings and expenses by states and of insured commercial state banks grouped by size of banks.

### Bankers Help Farmers

The conviction that 44 Club work lays the foundation for sound citizenship and intelligent farming influenced a New York City bank executive to contribute \$500 to the Agricultural Committee of the State Bankers Association, to further 44 Club activities in the state. "I am convinced that the work is so worthy, and is being so well handled that it should interest those who believe in building sound citizenship as well as intelligent farming for the future," he said.

Unusual prominence was given this past year to agricultural work by the Tennessee Bankers Association. The Agricultural Committee report reveals hearty cooperation between bankers and extension workers. "Key bankers and county agents have been in closer contact than ever before," it says.

Georgia bankers have given both moral and financial backing to a Marketing Project sponsored by the Extension Service of the College of Agriculture, and activities the past year showed significant results. The phases of the Marketing program emphasized in the year's work are: The retail credit market; roadside marketing; miscellaneous marketing (centered in this locality); bartering (exchange of commodities or services with neighbors); standardized canned products for self-prepared in homes or canning centers.

### REVEALS SECRET OF GOOD PASTRY

When Mixing Keep Dough as Cold as Possible.

By EDITH M. BARBER  
ANYBODY who makes good pastry is naturally proud of it. But let me tell you a secret, there is no reason why any woman should not know how to make the pastry trick, which is really one of the easiest things in the world of cookery.

First of all there is the flour: For a good-sized pie take one and a half cups of sifted flour and one half teaspoonful of salt. Into this work one half cupful of cold shortening. If you can take your choker in this mixture, but it is not really necessary. The best shortening, while many prefer one of the vegetable fats, a little better may be used for flavor if you wish, but it is not really necessary. Work in the shortening. If your hands are cold you may use your fingers, otherwise use a knife or a fork. I usually use a small wooden chopping bowl and a double bladed chopping knife. Do not cut the fat too fine if you like flaky crust with bubbles in it.

When the flour and shortening are well mixed make a hole in the flour at one side of the bowl and pour in one tablespoonful of cold water and mix with a case knife as much flour as it will take up. Do the same thing to other portions of the flour and when you have three balls of dough and some dry flour left in the bowl, take your fingers and press them all together. If you need a little more water add it a few drops at a time. Remember, however, that wet pastry is always tough. Put the dough in a bowl, cover, and chill before using.

If you follow these directions you are pretty sure to have tender, flaky pie crust, and what more can the family ask? Your reputation as a cook is made!

In baking pastry a hot oven is necessary. For a pastry shell, it should be very hot, about 500 degrees Fahrenheit. For a fruit pie and for a custard pie, we start out with a hot oven, 450 degrees Fahrenheit, but after ten minutes we lower the temperature to 350 degrees Fahrenheit or 400 degrees Fahrenheit.

Apple Pie.  
5 or 6 apples  
1/2 cup sugar  
1/4 teaspoon salt  
1/2 teaspoon cinnamon  
1 tablespoon butter  
1 tablespoon flour

Pare, core and slice the apples. Mix the sugar, salt and cinnamon. Line a pan with pastry, sprinkle with a tablespoonful of sugar and add the apples and sugar in layers. Dot with butter, cover with an upper crust and bake in a hot oven (450 F.) for ten minutes, then lower the temperature and bake until the apples are soft. This way of arranging the filling may be used for all fruit pies.

Lemon Meringue Pie.  
1/2 cup flour  
1 cup sugar  
1 1/2 cups boiling water  
2 eggs  
Grated rind of one lemon  
2 tablespoons butter  
3 tablespoons lemon juice  
4 tablespoons powdered sugar

Mix the flour and sugar, add the boiling water, slowly, and boil five minutes, stirring occasionally. Beat the yolks of the eggs and add to them the cooked mixture. Return to the boiler and add butter, lemon juice and rind and cook until the mixture thickens. Cool and fill the baked crust. Cover with a meringue made by beating the whites of the eggs and adding the powdered sugar. Brown in a moderate oven (350 degrees F.).

Coconut Custard Pie.  
2 eggs  
3 tablespoons sugar  
1/4 teaspoon salt  
1 1/2 cups milk  
1 cup shredded coconut  
Nutmeg

Beat the eggs, add the remaining ingredients in the order given. Pour into a deep pie pan lined with pastry. Bake in a hot oven (450 degrees F.) ten minutes then at a lower temperature thirty minutes or until the custard is firm and the crust brown.

Fruit Cream Pie.  
Bake the crust as for lemon pie and fill the shell with cream filling. Whip one cupful cream, add one-half cupful or more of strained fruit pulp and pile on top of the cream filling. Fresh strawberries, raspberries or peaches may be used, or stewed apricots or prunes may take the place of fresh fruit.

Refrigerator Lemon Pie.  
3 egg yolks  
3 lemons (juice)  
3 egg whites  
2 small boxes vanilla wafers  
1 can condensed milk  
1 1/2 lemons (rind)  
3 tablespoons sugar

Beat egg yolks, add milk, lemon juice and rind and mix well. Put vanilla wafers through a meat grinder, and line a well-buttered pie plate with them. Pour in mixture and top with meringue of stiffly beaten egg whites and sugar. Bake in a moderate oven, 375 degrees Fahrenheit, 15 minutes. Chill in refrigerator several hours.

Colors for Child's Room  
An coloring, but exceptionally practical child's room pictured in the current issue of Country Life has white-curtain walls. Faded black trim and floors accent them and, for contrast, there is a red lining in the bookcase-dressing table, red curtains and gray carpet.

### FULLY CHICKEN DINNERS CREATE PROBLEM

Laying Birds Could Be Kept in Production.

By Prof. G. O. Hall, Poultry Department, Cornell University  
Because of the demand for chicken dinners, no one knows how long a hen will live if given a chance.

Also, the scientists and the poultryman are more interested in how long a hen will continue to produce eggs continuously rather than how long she will live if she has a chance to round out her full life span.

Most hens meet their fate when they are about four or five years old. A bird usually lays more eggs during the first, or pullet, year than in later years. It would be a fine thing if birds could be bred and then managed so they would continue to produce eggs for many years. This would do away with the expensive process of renewing from one-half to two-thirds of the flock each year.

The Cornell university experimental flock has one hen, however, that is going strong in her eighth year. She has completed seven laying years with an average of 200 eggs each year, or a total of 1,401 eggs during the seven years.

Thirty-three other birds of the same strain are in the pen with her. None is less than four years of age. The 34 hens have averaged 926 eggs each during their laying life, or 175 eggs apiece for each year of the four laying years. As a group they have been laying for an aggregate of 177 years. Perhaps more can be developed.

### Birds Having Long Egg Cycles Lay Small Eggs

An egg cycle is the number of days a hen lays without a rest. If a hen lays 23 days before she pauses to rest she is said to have a long egg cycle, notes a writer in the Missouri Farmer. If she lays only two or three days in succession and pauses she is said to have a short egg cycle. There are hens that have laid every day for more than a month without stopping, and that is the kind that rise to the 200, egg class; for a hen that lays 300 eggs per year has little time for vacations. Usually hens with long egg cycles lay small eggs and when this is the case her desired prolificity is offset by the bad point of weight. It is a rare and costly condition when the long egg-cycle brings eggs of good size with it, provided the hen has the stamina to live for a second year and to produce her good qualities on to her offspring.

Most poultrymen are content with a moderate-laying hen—a hen with a medium-sized egg cycle, that lays a good size egg and has the ability to live long. Again, this is the "happy medium."

### Poultry Classified

Breeds and varieties of poultry are classified, known as English, Polish, Hamburg, French, Continental, Game and Game Bantam, Oriental, Ornamental Bantam, and several others. The more popular breeds in America are found in the four classes: American Asiatic, Mediterranean, and English. The American class is composed of the Plymouth Rocks of which there are seven varieties; the Wyandottes, of which there are nine varieties; the Reds, Javas, and several others. The Asiatic class contains the Brahmas, Cochins, and Langshans. The Mediterranean class is made up of the Leghorns, Minorcas, Andalusians and Spanish. The English class, Dorkings, Orpingtons, Cornish, and Sussex—Missouri Farmer.

### Keeping Yearling Hens

Year-old hens produce eggs that are about 9 per cent larger than were their eggs during the first year of laying, according to Berley Winton of the Missouri College of Agriculture. For this reason the poultry raiser may well be justified in retaining a large number of the high-producing yearling hens for their second year of production. Few birds should be kept for their third year, he believes.

### Costly Errors

The costliest error a poultryman can make is to entertain the thought that any kind of old hen will lay well if she is fed and cared for well. For a pullet is hatched with a definite capacity to lay an approximate number of eggs and, regardless of her excellent feed or otherwise care she will not lay more eggs than that approximate number. If a hen is only a 100-egg hen, good feed and a good house will not make her lay 250 eggs, nor 175 eggs. She will lay approximately 100.

### Poultry Notes

Double-yolked eggs are caused by speeded ovulation and are quite common during early and late part of the laying season of high production.

Ducks should have all the food that they can eat "right now." Ducks are enthusiastic "diners" and will keep going if allowed so to do.

It is the season when fowl pox may be expected to appear in some poultry

### Y L News Items

M. V. Robinson, Frank Murdock, Alton Bidgett and Glenn King were honored with a buffet luncheon in the home of Mr. and Mrs. E. T. Bryant Sunday. The feast was enjoyed by the following: Rev. and Mrs. Jones, Rev. and Mrs. King and family, Mr. and Mrs. D. A. Bidgett and family, Mr. and Mrs. S. L. Rollins and family, Mr. and Mrs. Robinson and family, Mr. and Mrs. E. F. Murdock and son, Mr. and Mrs. Raymond Chitwood and daughter, Mr. and Mrs. Paul Burch and the host and hostess and their family. The day was enjoyed by all.

The Missionary Baptist church of Y L closed a revival meeting Sunday night. They had two additions to the church by baptism five by letter and one reclaimed. The W. M. U. presented the pastor Rev. Jones and singer, Raymond Chitwood with a shower and eight dollars in cash.

Miss Flora Mae Lee of this community spent the weekend in Lubbock visiting relatives and friends.

## THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.  
JESS MITCHELL, Editor. I. F. MITCHELL, Bus. Mgr.

**SUBSCRIPTION RATES**  
In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.  
Published every Thursday at Muleshoe, Texas.  
Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.  
Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, it matters not by whom not for that, must be given, object to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.  
Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisements.

## Editorial

Every Great Attempt is Glorious Even if It Fails

### A THOUGHT FOR THE WEEK

But the Lord your God ye shall fear, and He shall deliver you out of the hand of all your enemies.—I Kings 17:38.

Our worst enemies are those we carry about with us in our own hearts. Adam fell in Paradise and Lucifer in heaven, while Lot continued righteous in Sodom.—Pittsburg.

### HEED THIS WARNING

Unusually dry weather in every section of the country has developed a new hazard to human life, one every Muleshoe citizen should keep in mind when motoring into strange territory, and one that should be given attention here at home. Springs have gone dry and many wells have almost ceased to flow. In many instances this source of drinking water supply has become sufficiently stagnant as to be dangerous to all who drink it.

Reports from many sections are to the effect that typhoid fever epidemics are more numerous and more severe than in many years. All can be traced directly to the consumption of impure drinking water.

Regardless of how thirsty you may be, make sure the water you are about to drink is absolutely pure. If there is the least reason to question its impurity—let it alone, and it might not be a bad idea to examine your own source of supply if it is drawn from a well. A little care will prevent a long siege of illness and a neighborhood epidemic.

### A TRIBUTE TO PIE

The Muleshoe man who isn't fond of pie is a rare exception and hard to find. Pie is really one of the great American institutions and its adaptability to all conditions is shown by the fact that the knife, the fork and the spoon are all utilized in eating it, and on certain occasions, one can ignore all these and handle it with one or both hands.  
When Ralph Waldo Emerson was asked if he really ate pie for breakfast, he replied that it depended on the pie. No New Englander of 50 years ago objected to pie three times a day. One pie was regarded as belonging in a

particular way to New England. Today it is eaten in every state in the union—and in every state it is pronounced good.

The great thing about pie is that it has no narrow bounds, and its only enemies are those who have ruined their stomachs and their digestions with other foods, can no longer stomach it. It can be made of apples, cherries, all the berries, peaches, pears, pumpkins—in fact, out of nearly everything that is fit to eat. Then, as a special treat, the cook can take a great variety of good things, chop them up together and call it mince meat. Besides there's chicken pie, beefsteak pie, and a dozen other varieties. Uncle Sam counts nearly everything with his Census bureau. It puts down its tallies in long rows of figures. But never before has it counted the pie eaters, and we are glad to know they are so numerous.

Next to pie is good coffee—something Muleshoe cafes don't know how to make,—yet it is the biggest business getter in the world. Good pie and coffee will make any restaurant business grow!

### WE'RE LIVING LONGER

The most accurate statistical report in the world is the U. S. Census bureau, and when it declares that the human race is now living longer it's news everybody around Muleshoe ought to be glad to hear. The information it publishes comes near being gospel truth. Therefore we may accept as a fact its recent statement that since 1900 the span of human life in America has been extended by nearly a dozen years.

In 1900, the expectancy of life of the average man was 48 years. Today it is 59, a gain of 11 years. The expectancy of the average woman in 1900 was 51 years. Now it is 62, a gain of 12 years. It is a pleasure to learn, of course that our life span has been lengthened by 25 percent since the turn of the present century. But this fact alone carries with it as much of responsibility as it does of good cheer. We must see as well as take.

There is obligation in these lengthened and extended years to ourselves and to our fellowmen. These added years are useless unless we use them to better ourselves and to extend our service to others. Their value lies not in multiplying our birthdays, but in

### 3,000,000th at Exposition Feted

Mary Ellen Twitty, a ten-year-old Dallas lassie, was feted by the Texas Centennial Exposition because she was the 3,000,000th visitor. Presents and free entrance into all the exhibits made the day a memorable one for the miss, who was driven through the grounds in the famous 3,000,000th Ford. Now on exhibition at the Ford Motor Company's Exposition building.

the thoughts, the deeds, the service with which we fill these years. They become a blessing to us only if we accept their responsibilities.

### TOWN BEAUTIFUL

Everyone of a given town should have sufficient pride of citizenship and ownership to desire their home town to be as clean and beautiful as possible, gladly contributing their part in that direction. City officials should set the example by passing such ordinances as are conducive in a compelling way to a more sightly and agreeable corporation for habitation.

Much of the world is on the move today, not only touring for vacation and recreation this summer, but many casting about for a new place to settle, live and do business. Other things being equal, towns of a clean and attractive nature will be the ones to receive them. There are good business openings right now in Muleshoe; but it is the kind of town that will attract citizens.

One nauseating sight of Muleshoe is the display of worn out, wrecked and dismantled old automobiles accumulated in local wrecking yards. Of course, this is a legitimate business and one of importance; but slaughter yards are not permitted in corporate limits, neither should decaying auto junk be allowed as an open eyesore to the public. It's an unsightly mess that no one cares to gaze upon.

Many towns have ordinances requiring that all accumulated wreckage of no value shall be carted off to the municipal dump away from public vision, while the wrecking yards proper shall be surrounded by seven foot high fencing, thus eliminating such unsightly accumulations. We believe public opinion will support such an ordinance in Muleshoe, and respectfully submit the suggestion to this City Commission.

### Jaunty Journalettes

We happen to know several Muleshoe people who could learn a few new things if they weren't ashamed to admit they didn't know them before.

We sometimes find ourselves wondering if the heat of a Muleshoe woman's temper is suggestive of the warmth of her love.

Perhaps one reason some Muleshoe folks don't get married is because of the old saying that the longer people live together the more they come to look like each other.

Muleshoe lads who loudly professed soap when they wash—some mother will be sure to smell it and not make them wash again.

Because a Muleshoe relief worker breaks out a good many shovels handles in sign he is a good worker—he may be a good leader.

Perhaps one reason some Muleshoe men never compliment their wives when they cook something they especially like is because if they did then they would get the same thing three times a day for a week or so.

If a Muleshoe woman tells you she would gladly marry the same man over again he can be rated as a first-class husband; but Obnyosh where's the woman!

Wrinkles are not the first sign of a

### Poem by Uncle John

O, the old feather bed was a package of joy, when draped in its trappings of state. . . . If I had a legion of words to praise you, old use 'em, laureate! 'tis fate. We've banished the goose-hair, an' took the pad of corn-shucks, an' shavin's, an' moss. . . . 'Till I am afflicted an' gloomy an' sad, at the mattress they stretched me across! I'm weary in muscle—distracted in tone—and it don't help me any to cuss. . . . It might be more healthy to bunk on a stone, but it's equal to sickness, or worse! I dream of the feather that cushioned my frame, in the halcyon nights of the past. . . . We were born on the feather, an' died on the same, and the grand-children got 'em at last. . . . O, the old feather bed was a bulwark of dreams—a its blubbers an' sweat in its seams—an' nobody needed a bath. . . . It may have felt microbes an' vermin galore, from the spores of the flea to the toad, but it had 'em all skinned as a good place to snore, and we 'bowed out with heat, when it snored!

### Pavement Pickups

Bob Bradley says he has discovered that anyone who courts trouble generally finds a baby in his arms with a year or two.

### SNAP SHOTS

Last week there were plenty of rival politicians declaring their election "was in the bag"; but last Saturday discovered they were in the baited boxes.

### Etiquette

What & When to do it  
By A. Leda

Readers desiring personal copies on points of Etiquette to be forwarded may write Miss A. Leda, care of this newspaper, enclosing a self addressed and stamped envelope.

In answer to K. M.'s question, "Is it considered proper for a young lady to go on a camping trip with her young man friend and his wife?" I'll say it is quite proper but I'll advise, I have heard of so many cases of friendships being broken by just such trips—but I was not asked for my advice, and as for its propriety, it is quite all right. So best of luck, my friend.

DEAR A. LEDA:  
Is it necessary to send both invitations and announcements for a wedding?  
Thank you.  
MARION B. TEXAS.

No. Send the invitations to the friends you wish to invite and then after the ceremony send announcements to those who did not receive invitations.

DEAR A. LEDA:  
At luncheon which side of the plate should the knife and fork be put? 2. Do spoons go on the side with the fork? 3. And if there is a wine glass, where should it be placed? 4. How should the knife and fork be laid on the plate when they are used?

At luncheon as after other meal the knife is placed on the right side of the plate and the fork on the left. 2. Any spoons used are laid beside the knife on the outside. 3. A wine glass stands directly beside the water glass on its left side. 4. The knife and fork should be laid side by side across the plate. It is very poor form to let them lay separated on the plate.

### HELPFUL HEALTH HINTS

Acid Burns.—If one has been burned from an acid, flush the place liberally with water and then wash with a strong solution of baking soda.

Babies.—Never let a child use a pacifier. It strains the muscles of the throat, is liable to cause side nodes, and spoils the shape of the mouth.

Sleeping.—Do not sleep on a high pillow. It will cause one to be round-shouldered.

### Gravety

If a bullet is fired straight up in the air, it will not return to earth at the same speed with which it left the gun. It would if it were traveling through a vacuum, but gravity does not pull a bullet through the air as fast as a charge of powder drives it.

The British empire buys 70 per cent of Trinidad's exports.

## RICHARD LLOYD JONES SAYS

### The Crowd is Lost Without a Leader

Fleaders are legion. It is the master of men who are few. Fleaders make up the rank and file of humanity. They comprise the many common people whom, as Lincoln said, God surely must have loved since he made so many of them.

Fleaders are not without their many virtues. They are stable, reliable, industrial. They are the foundation of Society.

They are a tremendous, slow but constantly moving force. They carry along all the good from the past ages through which they have traveled.

Civilization advances no faster than they permit it, yet they never design their own course. They control only the pace and the direction. To the few rare souls of clear vision has nature handed the gift of leadership, they who direct the way of the march. To them only is given imagination. It is they who lead on the curtain of the future the next right move for the masses to make.

The masters are the men who dare march ahead and alone. Because of their confidence, the fleaders are followed by them and follow them. Age limits leadership. The leader must express the new or be supplanted by him who represents that which is new. Every champion is some day confronted by his better. Youth is bold and leaps ahead.

Masters are never afraid. As soon as timidity controls they cease to be masters.

It is only the man who is subservient to the truth who wears an armor which nothing can penetrate. Back in the ranks are the doubters, prumblers, stumblers. Their protests are silenced by the fleaders, who lead them forward, willingly or unwillingly, on the great march. Sometimes the whole mass seems to fall back. But the masters do not fear. They know the light of the star will lead them on again.

### Juniors Cross Bats With Clovis Sunday Winning 27 to Three

The Muleshoe Junior baseball team played a match game Sunday afternoon at 3:30 with the Clovis Boosters at Cavalry park, Clovis, N. M. The Muleshoe team was victorious 27 to three.

Players for the local team were Kenneth Jennings catcher; Garland Toten pitcher; Wodie Lambert, first baseman; Lester Garth second baseman; Arvil Cathey third baseman; Perel Little, short stop; H. A. Robb, left field; Walter Moeller center field; Cecil Spence right field.

Those on the Muleshoe team who made home runs were Moeller, one; Robb, one; Toten, one; and Lambert one.

Allen McReynolds, manager of the Junior team, sponsored them to Clovis. A game will be played Sunday afternoon, August 30, but no definite arrangements have been made as to where and who they will play.

**Attend Amherst Meet**  
Muleshoe's first team had no contest game last Sunday, most of the players

attending the baseball tournament in progress at Amherst, and several of the local players assisting other teams in games played.

Sudan won over Enochs in last Sunday's game.

Amherst's team copped the pennant in its own tournament when they defeated Sudan Monday in a 9-0 score.

Southpaugh Hambricht was said to have been perfect in his pitching, allowing only three hits in the game. A purse of \$800 was divided between three teams.

#### ORGANIZE FIFTH 4-H CLUB

J. B. Waide, county farm agent, reports organization of the fifth 4-H club for boys in Bailey county at Stegall, with a membership of nine future farmers. Officers will be chosen at a future meeting.

There are now about 40 members of these various clubs who are quite active having already chosen their projects, while about the same number have not all definitely settled on their plans of activity. Waide said.

**Oldest Musical Instrument**  
The oldest musical instrument appears to have been a flute.

### Girls Try Target Shooting

With eyes well trained on the target, these three girls fired the first shots that opened the rifle range at Texas State College for Women (CIA), Misses Bernice Pass, Denton; Gwendolyn Steppelman, Silbuck; and Marguerite Koltz, White, join the ranks of target shooters as the new sport is added to the college curriculum.

### State Budget Hearing For Two Years Is On May Finish In A Week

County expense budgets were formulated and adopted August 15 and now the state budget is being prepared perhaps another week required for its completion, according to J. D. Hall, director.

He said hearings on the judicial, educational and eleemosynary budgets for 1937-39 biennium had been finished and representatives of all except a comparatively few state departments had been heard.

The requests were higher than two years ago Hall said. Many institutions asked for restoration of salaries to the levels before the Legislature cut them approximately 25 per cent in 1933.

Representatives of the state institutions said living costs had increased and private salaries had been restored. State salaries were partially restored two years ago, the greater increases going to employees in the lower salary brackets.

Hall said the board hoped to send the budgets to the printer by Dec. 1. The Legislature usually uses the board's figures as a basis for biennial appropriations, making changes where it thinks they are desirable. The Governor has the power to make recommendations different from those of the board.

Colleges requested appropriations of \$3,929,000 and eleemosynary institutions \$2,905,700 for buildings, large improvements and repairs. The requests did not include any from the University of Texas and A. & M. because the Constitution provided a separate fund for buildings at those schools.

Hall said the \$75,000 appropriated by the last Legislature for partial restoration of salaries at the eleemosynary institutions was sufficient to last only eight and one-fourth months and that the employees were again on the salaries stipulated in the reduced appropriations of 1933.

#### Progress News

The conference will be attended by J. B. Waide, Bailey county farm agent, W. G. Kennedy, Progress community; George Damon, Circelback community and W. L. Key, Watson community, who are members of this county's agricultural conservation committee.

### Jayton Editor Gives Favorable Comment Bailey Co. Irrigation

Monday of this week the editor accompanied by his son, Farley H. Wade of Chicago, who was here for a short visit with home folks, drove over to Muleshoe, and spent two days and nights at the home of Jess Mitchell and wife of the Muleshoe Journal. Mrs. Mitchell being a sister of yours truly.

Muleshoe is located in Bailey county, where at a depth of only 100 feet may be tapped an underground river of water as pure as the water from the melting snows on the Rocky mountains and a supply that seems to be inexhaustible.

The Mitchell's have their home on a twenty acre block which was intended for the capital of Bailey county and its one of the beauty spots of West Texas. Their dwelling is located in the center of a four acre grove of large cottonwood trees. The grove was so planted that it makes a perfect setting for a modern home and their home is as modern as may be found in many or practically all of the larger cities. Gas electricity, running water, both hot and cold, modern refrigeration, etc. It makes an ideal place for a tired man or woman to rest and meditate.

The entire block of land is under irrigation from the well located in the N. W. corner of same. At the well you turn on the power and immediately the river beneath sends up a stream of water that ends drouths and makes all nature bloom like a rose garden.

To tell in detail what is grown on this small block of land in marketable quantities would sound like statistics of some fabled visitor to the Garden of Eden, so we will leave it to the imagination of our readers with the statement that they not fear over doing the subject as it is almost without limitation.

The food cellar at this home reminds one of a well stocked modern grocery and it all came right off, the little irrigated farm that surrounds it. We have oftentimes heard the remark: "Living at home and boarding at the same place." We have certainly seen the saying put into effect and did we appreciate it—we will say we did.

Drouths have no direct terrors for the owner of that farm, as all he has

to do is wave his hand and the life giving liquid is his for distribution over his acreage in unlimited quantities. But we have said enough as we have to live here and we do not want all Kent county to start packing up to move to the land under ground rain in Bailey county.—L. F. Wade in Jayton Chronicle.

### Cotton Carry-Over Is Less Than 1935 Consumption Is Up

A cotton carry-over for the 1935-36 season of 1,806,292 bales less than last year was reported by the census bureau coincident with a report of increased cotton consumption.

The bureau said cotton consumed during the 12 months ending July 31 totaled 6,248,423 bales of lint and 731,490 of linters compared with 5,369,887 and 719,028 the preceding year.

The cotton carry-over for the 1935-36 season was placed at 5,371,185 bales compared with 7,208,477 a year ago and 7,743,965 bales two years ago.

The aggregate supply of domestic and foreign cotton for the season ending July 31 was reported as 17,720,294 bales compared with 17,317,507 for the 1934-35 season and 20,844,098 for the 1933-34 season.

### HART'S

..FROG IN THE WELL SALE..

STARTS WEDNESDAY, AUGUST 26  
Sale ends when?????

The teacher gave the new boy pupil this problem: A frog fell in a well 100 feet deep. He jumped up five feet every morning and fell back 15 in feet every night. How long did it take the frog to get out of the well?

You have probably heard the story of how, after figuring diligently several hours, using all the scratch paper he could find, breaking several pencils and losing a great deal of sweat, the teacher came to his desk and asked how he was getting along with his problem. Very much irritated at the interruption he told her if she would let him alone a few minutes he would have that frog figured clear into—

**A Regular Clean-up**  
We have been in business in Muleshoe several years and have accumulated an assortment of items we want to move rapidly, and also, want to offer some bargains on reasonable items. We are setting aside a table on which we are going to place 20 or more items on the special sale—we are going to mark them low—they will be bargains at the starting price. Then twice weekly—namely for the opening each Wednesday morning and each Saturday morning—we are going to mark half of the unsold items down 15 percent and half of them up 5 percent, then at the next marking the 5 percent items will come off 15 percent and the 15 percent items will advance 5 percent.

**Everything Must Go**  
This to continue until the items are sold or the mark reaches zero—then goes to the first customer wanting the item for the taking. We will keep items placed in this sale on this table until sold or given away.

Additional merchandise will be added to replace sold out items to keep the assortment of interest to all.

The group from here was sponsored by Mrs. R. N. Edwards. They returned home via Happy and visited Rev. and Mrs. E. C. Raney, formerly of Muleshoe.

HOW THE BANKS AID THE GOVERNMENT

Normal and Emergency Needs Met by Advances of Commercial Banking Credit

NEW BRUNSWICK, N. J. — The American commercial banking credit system is an absolute essential in the financial operations of business and government, Harold G. Moulton, President of Rutgers University and of the American Bankers Association, said in an address before the Graduate School of Banking conducted under the joint auspices of Rutgers University and the American Bankers Association. If the flexibility and expansibility provided by commercial banking credit were eliminated, Dr. Moulton declared, "it is scarcely too much to say that the economic system itself would shortly be destroyed." "Normally the amount of credit extended by commercial banks to the government is small in amount and for the purpose mainly of financing temporary requirements in anticipation of tax collections or bond sales. But in periods of war and acute depression, when the financial requirements of government expand with great rapidity, the expansion of commercial bank credit is on a tremendous scale. Such is the case at the present time."

How Public Needs Are Financed "The purchase of government securities by individuals and by the commercial banks provides the government with the means by which its manifold activities are financed. The treasury obtains the funds, with which the Reconstruction Finance Corporation and other government credit agencies finance their operations, through the sale of securities, largely to commercial banks. These funds, in turn, have gone to the assistance of distressed banks and other financial institutions, to aid industrial and agricultural enterprises, to finance new public and private capital construction and to provide relief to the unemployed." Dr. Moulton declared that it is not true that the world depression was caused by a breakdown of the American banking system "which did not, in fact, occur until the depression had been under way for more than three years." He added: "Nor is it true that the world maladjustments existing in 1929 can be explained simply by undue extensions of commercial banking credit in the preceding years. These maladjustments involved world agricultural, industrial, commercial and financial relations."

ONE MARRIAGE THAT IS CERTAIN TO BE COLORFUL

Archie Black and William Will applied for a marriage license last week before County Clerk Elmer Brown, at Mayaville, California, Justice of the Peace, W. A. Green, officiated Monday. The honeymoon will be at Blue Lake, along the Redwood highway and in Yellowstone park.

CARD OF THANKS

We have not words to express our thanks for the contributions given us and the beautiful floral offerings for our beloved husband and father. May God's richest blessings rest upon each and everyone is our prayer. Mrs. T. I. HOLLIS and family.

Desert Igana in Southwest The desert igana is found in the open country of our Southwest, especially among creosote bushes. It feeds on flowers and insects, says Nature Magazine. While it is not a small lizard, it does not compare in size to the large tropical members of its group.

The Household

By LYDIA LE BARON WALKER

PARENTS should teach their children to chew their food. Proper mastication of early youth is a fine preparation for good digestion in later life, since the habit, once formed, is likely to continue. This is no plea for indulgent indulgence for swallowing over the meals, which has little or nothing to do with proper eating. It is a hint to parents of one way to promote good health in their offspring by insisting that food is not swallowed without the amount of chewing needed for its ready assimilation with the gastric juices and the elements of stomach and body. The term "Fletcherism" will be remembered by many readers as the name given to slow eating because the eminent Doctor Fletcher advocated that each mouthful of food should be chewed 40 times before being swallowed. Persons suffering from stomach ailments and their train of illnesses, were greatly relieved by a means of avoiding swallowing improperly chewed food. Before such a necessity arises, parents can ward off stomach troubles by teaching their little folk to chew their food well before swallowing it. The gastric juices must be kept in correct action.

The reward of one duty is the power to fulfill another.—Eliot.

WE HAVE FEEDS OF EVERY KIND

We are still headquarters for the best feeds of every description the market provides. NO MATTER WHAT KIND OF FEED Whether for Chickens, Cows, Mules, Horses, Milk Goats or whatever kind of livestock you have—we have the feed for them—and we guarantee every pound we sell.

Let Us Supply Your Feed Needs! RAY GRIFFITHS ELEVATOR Muleshoe, Texas

Freight trains nowadays act like express specials. New freight schedules are so fast, sometimes wonder if everything has been delivered before yesterday. Many of our passenger trains are running faster schedules, too. Well, one thing is sure. We make faster runs, but the first railroad commandment is still "Safety First." That's one rule they won't change.

Western railroads and allied industries provided jobs for 750,000 workers last year. Some of them live in our town, God neighbors.

Passenger fares are now the lowest in history with substantial reductions on round trips. And no more surcharge for riding in sleeping cars.

This new Free pick-up-and-delivery of less than carload freight—I heard some traveling salesmen talking about it on the train yesterday. They said it saves shippers a lot of money and centers all responsibility on the railroad. The railroad picks up the freight at shipper's door and delivers to receiver's door. Of course, local delivery men get the haul from door-to-car and car-to-door at both ends. The railroad handles the whole transaction.

When railroads are busy, I notice towns along the railroad are prosperous. The merchants put more ads in the newspapers.

Weasprooud, railroad achievements, appreciate the public's good will and increased patronage, and pledge continued progress.

### Adipose Given K. O. By Only U. S. Woman Mayor

Mayor Bradley a year ago—251 pounds and three chins.

Mayor Bradley today—over 100 pounds lighter—enjoying a lunch of pineapple juice and salad on the beach.

**Lead from Mayor Bradley's Diet**

**Breakfast**  
glass unweetened pineapple juice  
1 egg  
slice unbuttered toast  
cup coffee

**Luncheon**  
Tomato and cucumber salad, non-fattening dressing  
1 slice bread  
Milk, tea, or coffee

**Dinner**  
small portion lamb  
string beans  
candy  
Soleinich  
For dessert, any seasonal fruit

ONLY woman mayor in the United States, and complete victor in a battle against overweight that last year made her tip the scales at 251 pounds... these are the distinctions enjoyed by Doris W. Bradley, Mayor of Wildwood, New Jersey, one of the most popular summer resorts on the South Jersey coast. Of which distinction she has most reason to be proud it would be difficult to say, but the majority of women who overweight has afflicted will probably feel that victory over "old debbil adipose" is the more startling.

Today Mayor Bradley wears a size 20 dress as contrasted with the size 62 she wore a year ago. She still weighs 149 pounds, but she is a large woman and, this is just about the right weight for her. The overweight woman who tried far too easily as a more. Instead, Wildwood's mayor is a finely set-up woman with the almost limitless energy of a girl.

The first step in her campaign against overweight was to secure a sound reducing diet from Wildwood's City Physician. Her diet, as she describes it, sounds like a tempting one. All the fruit juices desired, with canned, unweetened pineapple juice as one of the mainstays. Plenty of fresh fruits, and tomatoes in every form. Sea food, lean meat, and fresh vegetables with one or two exceptions.

"Losing the first 30 pounds was the hardest," says Mayor Bradley, "and the worst of it was that, with a woman as fat as I was, there was really no visible difference at first." Her enthusiasm began to carry her too far. She tried to improve upon the diet the physician had given her with the result that she lost weight rapidly, but at the expense of her health. A complete rest, however, restored her health and today the victory has been won. She continues to keep a careful check on her diet, but overweight is a thing of the past.

**BRIDE-TO-BE HONORED**

Monday afternoon Miss Anna Margaret Hart and Miss Eva Harper were sent hostesses at a farewell miscellaneous shower given at the home of Miss Hart in honor of Miss Christine Dennis' forthcoming marriage to Emmet H. Heine.

The honoree received many lovely gifts and an enjoyable afternoon was spent by all.

Refreshments of feed punch and cookies were served by the hostesses.

Those attending were Mesdames J. L. Alsop, Jim Cook, L. S. Barron, R. S. Stevens, Clyde Holland, W. C. Cox, Clarence Coates, K. E. Smith, Byron Griffiths, Manuel Reynolds, Irvin St. Clair, Joe Dameron, J. E. Adams, A. E. Lewis, A. V. McCarty, Cecil Tate, A. J. Gardner, Glynn Buchanan, R. B. Dennis, Will Harper, E. E. Hart, J. B. Waide, Jr., Misses Mary Holt, Twila Farrell and Eunice Griffiths.

### Eve's Epigrams

The more some persons are run down the more up standing they appear in the eye of the slender.

#### USING LEFTOVERS

PERHAPS a glance at what other cooks have done with the leftovers of feasts will help to use those that are daily problems in most homes. Chicken is the one meat that is not hard to serve in left-over dishes. A cupful will make a delightful salad mixed with tender celery, and less than a cupful, mixed with crumbs and seasoning, will stuff tomatoes or peppers. The following is a good recipe to keep on hand:

**Stuffed Peppers.**  
Slice from the stem end of each pepper, making a cup, removing the seeds and white fiber. Parboil the peppers in boiling water five minutes, then drain and chill. For six peppers use the following: Two tablespoons of minced onion cooked in three tablespoons of oil, and one and one-half cups of bread crumbs and one-fourth of a cup of minced chicken. Season with salt and pepper and add one-half cupful of stock. Mix well, stuff the peppers, place them in a little water in gem pans to bake. Cover the tops with buttered crumbs and when they are well browned the peppers will be ready to serve.

**White Sauce That's Different.**  
Take one and one-half tablespoons of corn oil, one tablespoon of minced onion, cook until yellow, add one tablespoon of cornstarch, half a teaspoonful of salt, a dash of pepper and a cupful of milk. Cook until smooth and thick and serve with any leftover vegetable.

**Creamed Chicken.**  
Take two tablespoons of olive oil or any vegetable oil, add a tablespoonful of minced onion, cook three minutes, add two tablespoons of cornstarch, stir until well blended, then add one and one-half cups of top milk, 1/4 thin cream, one teaspoonful of salt, one-eighth teaspoonful of nutmeg, a dash of cayenne and paprika. Add two cupfuls of minced chicken. Serve on toast or in bread cases. A dash of currant jelly is an improvement.

**Tripoli**  
In 1835, Tripoli was proclaimed a Turkish Velayet, but in 1911 Italy annexed the country as the outcome of a quarrel with Turkey.

**Hope Will Direct G.O.P. Farm Group**

Agricultural Division to Work With Township Committees.

Chicago.—Practical farmers will take an active part in directing the Republican campaign in rural areas, Congressman Clifford D. Hope of Garden City, Kas., announced in assuming the directorship of the Farm Division of the Republican National Committee.

In each agricultural state, an advisory council is to be set up. This council is to be composed of practical "dirt" farmers who will supply the basic suggestions for the campaign.

Three assistant directors have been appointed to aid Congressman Hope. They are Don L. Berry of Indiana, Iowa, publisher of the Indiana Record; E. H. Taylor of Yates Center, Kansas, for 12 years assistant editor of The Country Gentleman, and a Congressman Francis D. Calkin of Oswego, New York, an authority on dairying and active in legislation affecting dairy farmers.

"The Republican farm campaign is going to have its roots out in the farm districts," said Congressman Hope. "The farmers themselves will tell us what they want and how they feel about things."

### 25,000 Loaves Rot in One Field

Carrollton, Ill.—Many sections of the West are scared by the effects of the drought, but Greene County in this state presents scenes of growing crop destruction as a result of "planned economy through scarcity."

The Carrollton Patriot reports that 25,000 potential loaves of bread are rotting in a field at the west end of the city limits, alongside route 11, Meade Kealey, owner of the field, signed up for the Roosevelt crop reduction program. He had already sown his wheat before signing a contract which provided that he should reduce his production by 17 acres.

This 17-acre field was not harvested in the usual manner. Mr. Kealey cut the wheat and let it lie as it fell.

The Patriot asserts that any farmer whose wheat yielded 15 or more bushels to the acre would have had more money had he not signed a crop reduction contract.

"In Mr. Kealey's case," the Patriot says, "that 17-acre field would have yielded 340 bushels on the lesser basis of his other fields, or more than 500 bushels if it produced in proportion to the best plot. Though he received \$3.50 per acre bonus from the government, he would still have been more than \$100, possibly \$300 better off if he had not signed that contract."

**Cattle Imports Peril U. S. Herds**

Foreign Beef Is Feared as Disease Carrier to U. S. Livestock.

By FRANK RIDGEWAY  
Farmers in the United States are jealous of the disease-free condition of their herds and flocks and insist that stringent measures be maintained to prevent the re-introduction of foot-and-mouth disease and other human and animal plagues through increasing importations of foreign animals and products.

Livestock producers have become alarmed over persistent efforts being made in Washington to lower embargo bars that aid in keeping out highly contagious foreign diseases. Through their organizations farmers and ranchmen oppose the proposal of high ranking New Dealers to change restrictions now imposed on Argentine imports. Present regulations forbid the importation of meat products from countries where rinderpest or foot-and-mouth disease exist. Federal officials propose changes that would permit the re-zoning of the Argentine and admission of meats from zones declared free of these two maladies.

Farmers' representatives say that "the efforts to break down the present embargo are wholly based on economic grounds, and are pursued with a careless disregard of possible grave consequences." Lives of human beings, as well as cattle, hogs and sheep, are involved. Foreign meat is not needed; farmers in this country even now find it difficult to sell, at a satisfactory profit, the meat animals they produce.

Officials of the American National Live Stock Association believe "no one can fairly claim that imports of meat products from any zone of Argentina under present conditions would not constitute a dangerous threat to our herds and flocks."

They point out that the disease-free condition of live stock in this country has been attained at great expense. "That condition," says the association, "should be maintained in the future at all costs. No diplomatic coup, no international intrigue, no pressure from foreign-trade enthusiasts or well-meaning but misdirected free-trade advocates should be allowed to undermine it."

Farmers wonder why this nation should spend millions to clean up diseases and then have foreign trade policies that threaten to undo all the good work. The United States is the only nation that has ever successfully stamped out foot-and-mouth disease.

"Western cattlemen cannot forget the big foot-and-mouth disease outbreak in California in 1924 when nearly 100,000 of their cattle, sheep, hogs and goats were destroyed to stop it."

**FARM ACCOUNTING REVEALS LESSONS**

Management That Apply to All Farms

An analysis made of detailed records kept by a group of Wisconsin farms revealed several important lessons and the principles of sound business management derived from them apply equally well to other farms, says an article in the Bulletin of the Agricultural Commission of the American Bankers Association. The article says:

"Investment costs, including interest, depreciation, repairs, taxes and insurance, are approximately two-thirds of all farm costs. Furthermore, these costs are largely independent of the production program of the farm.

"This means that if a farmer cuts his production of crops or livestock, he increases his investment costs per unit of product produced, as a smaller number of units must then carry a large expense load as before. This illustrates the importance, from the standpoint of costs of operating a farm at or near capacity.

"Investment mistakes are more costly than many others because they cannot easily be corrected. If a farmer pays too much for his farm, his investment costs will be abnormally high as long as he owns it. If he constructs a \$4,000 barn, when a \$2,000 barn would have served his purpose, he will have excessive barn costs, year after year, during the entire service life of the structure.

"This emphasizes the importance of a knowledge of investment values and the specific investment requirements of individual farms.

**Determining Real or False Economy**  
"In working for greater economy, it is essential that the farm manager be able to distinguish between a real and a false saving. This can be done only through a careful estimate of the contribution to income, over a period of time, of each item of expenditure. Only if more is saved in expense than will be lost in income, can a contemplated cut in expense be designated as a real saving.

"For example, dropping dairy herd improvement work may result in a yearly expense reduction. The question to decide is what effect the drop in size of this work will have on the present and future income from the dairy herd. If the estimated loss in livestock receipts due to a lowered efficiency in feeding and breeding is greater than the original saving, then it would obviously be a false economy.

"Substantial savings can be effected on many farms through the use of more home grown garden produce and farm cured meats. Why pay out money for products of this kind that can be produced much cheaper at home? The money saved from the family food budget can be used for the purchase of many things that will make the farm home a more comfortable and pleasant place to live."

A girl only partly returns a man's affections when she returns and retains his presence.

### CAMERAGRAPHS

**FORMER DIRECTOR of many famous Broadway productions, dynamic Al Goodman has just been appointed musical conductor of that popular, Thursday evening radio hour, the Maxwell House Show Boat. The program can be heard on the NBC Red network from 9:00 to 10:00 P.M. E.D.S.T.**

**A HIGH LIVING HORSE!** "Dallas," says Silver Dollar Brady, early in the morning at a Chicago hotel, Silver Dollar Brady Hotel, Dallas, collapsed in his 17th floor apartment during his visit.

**MAN BITES DOG!** None other than President Roosevelt makes news as he vacations at Hermitage Cove, N. J. Photo was snapped at a picnic tendered to forty guests of the Chief Executive and Mrs. Roosevelt.

**JACK BENNY, MARY LIVINGSTONE AND GINGER ROGERS** head the list of radio and screen stars appearing September 8 to inaugurate new Packard hours, starting with FRED ASTAIRE, versatile movie and stage favorite. Programs will be heard every Wednesday 10:30 P.M. New York time on national radio and on the A.S. Network, marking Astaire's first long-term microphone engagement.

**SWIM TIME IS SNACK TIME.** Who wouldn't envy this aqua-tette during these sweltering days? After their dip in the cool pool they are having cold refreshing drinks of mint juleps served in feed Drink Cook with mussels pinned to the bottom of the glass. The Festivity Tray is a Cockle Bunch. The tray is filled with potato chips and the Cockle Bunch in cases as spiked with black olives. The cheese balls and crackers at both ends and two different kinds of bread in the center. These articles are shiny Chromium on a base of Rust-Proof Brass.

**THE JOURNAL'S Weekly Scrapbook**

**This week's Recipe**  
Rice Cakes—Cook rice, cool, add salt and enough beaten egg (gradually) to thicken, roll in flour. Butter an iron fry-pan, put cakes in. Brush each with melted butter. Put into a very hot oven. They will get crisp and brown on the bottom first. Turn them and brown on the other side. Serve with maple syrup.

**Week's Beauty Hint**  
There is bound to be a slight amount of dandruff but by keeping the hair fed. Brush your hair daily, and be use it only. Never put another person's brush to your hair.

**The Doctor Says**  
Don't expose a baby to the full sun without a physician's directions. It is season to the sun and air a little at a time. First exposures should be allowed in the air, fully dressed, for several weeks. It is just as bad for a child to lie in water for hours as to lie in a tub of proper length of time.

**A Household Hint**  
Corn cut from the cob may be salted over every four-inch layer of corn. Shake one-half inch of cooking salt. Set away in a cool, dark place.

**Give Thanks**  
Lord, I give thanks for the green gospel of the grass. And the white billowy clouds that pass; For the wide world's great loveliness.

And the rain's healing hands that bless The fevered meadow and the road Whereon is set my still abode.  
—TOWNE

**Class "C" Football Organized, Games Are Set For Month**

At a meeting held at the Tech Gymnasium, Lubbock, Friday afternoon of last week a class C of Interscholastic League football was organized, being composed of school teams from Morton, Anton, Amherst, Shallowater, Spring Lake, Petersburg and Muleshoe. The meeting was largely attended by representatives from each of these participating places and much interest was manifest in prospective games. Prof. W. C. Cox, Muleshoe superintendent of schools, and Prof. C. R. Joe H. Potter, superintendent of Anton school, were named chairman for the new classification; G. E. Apple, and E. E. Hancock, J. E. Niecewerner, committee on management, Mr. Eddeman of Spring Lake, being named alternate committee men.

A tentative schedule of games was outlined, that for the Muleshoe team being as follows:  
Sept. 18, Muleshoe at Dimmitt, night game.  
Sept. 25, Muleshoe at Levelland, a day game.  
Oct. 2, Muleshoe at Oton.  
Oct. 9, Muleshoe at Morton.  
Oct. 16, Muleshoe will play Anton at Littlefield, a night game.  
Oct. 23, Muleshoe at Amherst.  
Oct. 30, Muleshoe plays Anton at Muleshoe.  
Muleshoe will play Spring Lake

about Nov. 6, though the date has not yet been definitely set.  
Coach Stevens states he will have an almost entirely new team for the old and former players being available for the coming year. However, he says there is some good material available, and hopes to organize a squad that will make itself felt in coming games.

**DAUGHERTY'S RETURN FROM BIG EDUCATION TRIP TO THE N. W.**

Prof. and Mrs. Glen Daugherty returned Saturday of last week with 12 of their car. They had been on a six week's educational tour, visiting colleges in New Mexico, Colorado, Wyoming, Idaho, Montana and Utah, covering a distance of 4,500 miles on the trip, while gathering valuable information which will be of great personal use as well as of value to their pupils. Prof. Daugherty, who is a teacher in the Bala school, specialized in obtaining additional agricultural information for his agri class. Mrs. Daugherty is a teacher in the Baileyboro school. There were 46 in the touring party. Prof. Daugherty said at Ft. Collins, Colo., he found the fame of Muleshoe him, many questions being asked regarding irrigation in this valley.

**GOVERNMENT TO FURNISH CORN SEED FOR FARMERS IN NEED**

Between five and ten million dollars will be set aside for buying seed corn in drouth areas, according to statement of Secretary Henry Wallace last Monday, the money to be furnished as a government loan.  
It is thought the plan will be completed upon return of President Roosevelt from his tour of the western drouth stricken states.

# OIL-PLATING IS...

Oil-Plating is exactly what is formed in your engine by Conoco Germ Processed oil. The Conoco Germ Process scientifically combines a most carefully refined mineral oil with an extra, exclusive "concentrated oily essence"—fully guarded by patents. And this invention enables your Conoco Germ Processed oil to combine with all engine parts so that they become literally Oil-Plated. Oil-Plating does not depend on constant pumping up, because it does not rapidly drain down, but stays put—fixed—Plated. You can see that this firmly fixed, slippery Oil-Plating leaves no un-oiled bare spots in your engine. And that leaves least chance of wear... And the less wear, the more oil you save... So Oil-Plate your engine this summer—this day!—with CONOCO GERM PROCESSED OIL

Continental Oil Co.  For any motor trip get free maps and data. Write Conoco Travel Bureau, Denver, Colo.
