

Our Circulation covers the territory like the sandstorm.

# THE MULESHOE JOURNAL

Buy a farm in the Blackwater Valley. Water 8 to 30 feet.

Vol. 2

Muleshoe, Bailey County, Texas, Friday, May 24, 1925.

Number 14

## Potato Curing Plant Assured for Muleshoe

At the regular meeting of the Chamber of Commerce, Tuesday night a large crowd of farmers who operate irrigation wells were present to close up on the potato curing plant. John Kropff was present and put his plans before the body in regard to building the plant. He will have it ready for the crop this fall. If the acreage continues to grow we will likely have several plants over the valley to take care of the crop. Nearly all the farmers present pledged some acreage.

We have the water and land, all we have to do is to plant the acreage for we know this is fine potato land. Over \$400 per acre has been made.

## Muleshoe Wins Close Game From Farwell

Last Sunday the Farwell baseball team played here against our popular mine. The park was well filled and a fine crowd was present from Farwell and Texico to help their boys win. But the Muleshoe bunch was just a little to fast for them. "Old Moore" that lightning pitcher, simply put the ball by in such grand style they could not handle it. The score stood 4 and 4 until the last inning, when our boys reached out and claimed the victory, 4 to 5.

The Farwell boys are all good men and played clean ball throughout the game. We go to Farwell Sunday in a return game. Let us have a good crowd to help the boys win.

## Panhandle Telephone Makes Improvements

The Panhandle Telephone System is this week stringing a telephone line between Muleshoe and Clovis, which will be completed in a few days, thus giving another northern outlet for service.

This concern is also hauling out cross arms for another long distance circuit between Littlefield and Lubbock.

The next thing the people of this city want, is a rural telephone line or two. The farmers in the irrigated district have already asked for a line.

## Texas Utilities Put Line to Irrigation Plants

The Texas Utilities Company will find one of the best fields on this road when they place their high line thru here. The pumping plants over the Shallow Water Valley are already calling for the power line to be extended out thru the valley. With the big irrigation plans now underway, the many new crops that are being introduced here it will require much more power to run the pumps. Hundreds of pumps will be put in when they can have the electricity for power.

The Texas Utilities Company have had their eyes on this proposition for some time. The Company will realize more from the Muleshoe district than a half dozen small towns. Come on Texas Utilities we are waiting on you.

## C. H. LONG DAIRY

This is to certify that I have given the Government test for Tuberculosis to the Dairy herd of C. H. Long and find his herd tuberculosis free. TAYLOR WHITE, Agricultural Instructor. Subscribed and sworn to before me this 11, day of May, 1925, BYRON GRIFFITHS, Notary Public in and for Bailey County, Texas. 13-16-C

## Wonderful Progress On Court House

The Rice Construction Co., with branch office at Lubbock, have the contract to build the court house. They have started to work in earnest this week. A big crew of men and teams are doing the excavation work, men with pick and shovel digging the foundation pits, carpenters building tool sheds and other preliminary work. Sand, brick, steel, concrete mixers, gas engines and much of the material is on the ground.

Several out of town people have been here this week looking over business lots around the square. One party from Slaton, who owns several lots on the square, we understand will erect several bricks, if he can secure renters. We feel sure that he will have no trouble in renting good business houses, with the court house making such progress.

## Bailey County Roads Improving Rapidly

There was a committee from Farwell, Muleshoe, Sudan, Amherst, Littlefield, and Anton, met at Lubbock with their Chamber of Commerce officials in conference with Senator Burket State Highway Commission yesterday to consider good road matters in this district.

Last Saturday, County Judge Kennedy and County Engineer Mathews attended a conference at Littlefield, in regard to the good road move on in this part of the state.

Last Thursday, Devison State Highway Engineer George Fields and County Engineer Mathews inspected highway No. 7 across the sand and stated that he was well pleased with its present condition. And assured Mathews that we would receive in the very near future maintenance from the department. He also favored the opening of No. 7 on the South side of the track, to the Parmer county line.

Born to Edward Pavlick and wife on Wednesday of last week a fine girl. "Polly," has been all smiles this week. He is connected with the Blackwater Valley State Bank.

J. E. Hanley moved his wife here from Amarillo, the first of the week, and are living in the Barron cottage.

B. A. Howell and wife have returned from the Lumbermen's Convention at Amarillo. They also visited in White Deer.

Ford size battery, \$14.50 at T. B. Fry.

## H. E. BYRAM

H. E. Byram, president of the St. Paul railway, who, with the board of directors, asked for and obtained a receiver for the railroad of 16,000 miles of lines in 11 states.

## MISS LUCY ALDRICH

Miss Lucy Aldrich, sister of Mrs. John D. Rockefeller, Jr., who has been awarded \$41,000 by the Chinese government, in payment for her sufferings when she was captured by Chinese bandits and held for ransom, more than a year ago.

## UGO J. A. CARUSI

Ugo J. A. Carusi, former secretary to Attorney General Frank C. Archibald of Vermont, has been named secretary to Attorney General John C. Sargent. Carusi was born in Italy and is only twenty-three years old, being the youngest secretary to any cabinet member.

## Revival Gaining Interest Each Night

Sunday night a ten day revival was started at the Baptist Church. Rev. B. F. Dickson of Alvarado, preaching, being ably assisted by Rev. Stewart, the local pastor. Bro. Dickson comes to us highly recommended as a great revivalist, wonderful speaker and a great worker for his master. We are glad to have him with us.

Taylor White their faithful choir leader has charge of the song services. He is extending a special invitation to all singers in the city to come out and take part in the services, regardless of what Church they belong to.

Brother Stewart said, "Just because the Baptist were doing the preaching it was no sign that it was to be a strictly Baptist meeting, everyone is invited to take a part in the work."

Rev. Dickson is a real booster, for this country already. When he had assended the caprock and looked off over the beautiful green plains country, dotted with modern farm homes and new towns springing up every few miles, he drew a deep breath of the wonderful fresh air and thought, what a splendid country what a great opportunity, what fertile soil, and such congenial free hearted people: this must be the promised land. While all this great work is going on, we must not forget to work and develop ourselves and others for the Lord, he said.

The revival is growing in interest with each meeting, and a fine time is being had.

## B. Y. P. U. Program For Sunday May 24th

Leader—Harrol Griffiths.  
Subject—"The Power of God."  
Song Hymn No. 55.  
Prayer.  
Scripture Reading---Psalm 97: 1-12---Louise Lawler.  
Introduction---Leader.  
I. Worthy To Be Worshiped---Verbie Griffiths.  
II. God's Power Described---Leona Brown.  
III. Why Does Not God Kill the Devil---B. B. Layne.  
Special Music.  
IV. God's Power Manifest in Miracles---Lee Green.  
V. Power in the Spread of the Gospel---Mrs. DeShazo.

Join the K K K. Cream kanlan. See Erick Moeller, at Moeller Grocery.

SPECIAL fried chicken dinner at Hotel James on Sunday.

## \$60,000 Contract Let On School Building

The Rice Construction Co., received the contract on the new Senior High School building. Work will begin at once and it will be rushed to completion.

The new building will be located just on the other side of the present building. With the addition of the new building this will enable us to take care of the children for a few years.

## School Board Elects New Staff Of Teachers

At the last meeting of the school board they elected a new staff of teachers for the coming school year. H. O. Smith, of Canyon, was elected Supt., Taylor White was re-elected Agricultural Instructor, Miss Esther Rudolph 7th. grade, Mr. Billy McCluge 5th and 6th., Mrs. Viola Smith 3rd and 4th. Miss Lorena Stegal 2nd., Miss Amelia Spencer Home Economics, Deward H. Reed Principal, Miss Eunice Page 1st., and the English teacher had not been elected at this time.

## Longview School Votes \$20,000 For Building

Longview is one of our most progressive school districts, just below the sands. On Saturday the 9th they held an election to take a vote to see if they would build a \$20,000 school building. We understand they voted 22 to 0, in favor of the building. The people in the Longview community are all live ones. They believe in progress, in good schools, good roads, fine homes and in general they are all very progressive people.

## Circleback Votes \$16,000 School Bonds

The school district known as Circleback voted a \$16,000 school bond last Saturday to the tune of 31 to 0. Here is one community that is wide-awake. They believe in doing things up in good fashion. This community has been settling up very fast for the past year. The land in this community is some of the choicest in this part of the state and promises to be one of our best school districts.

Bailey county has many fine school districts, and most of them will have fine buildings by the next term.

WANTED—Men, women and children to attend the Revival at the Baptist Church.

## School Closes This Week; 5 Graduate

This week closes the Muleshoe school, with five graduates from the high school, Billy Daniels, Houston Taylor, Agnes Abney, Virge Mae DeBord and Winnie Mae Crosswhite. Several will graduate from the grammar school.

Upon the closing of the school we extend our congratulation to students, hardworking teachers and the faithful school board for the completion of a good school year. The passing session has been a good one, a busy one and a faithful one.

In both schools possibly there are a few who failed to make the grade. To them we say, grit your teeth, and resolve to not let it happen again. Life is long, and while disappointment may be kept at the present, remember that people love above all else the fighting spirit that comes back for more, that is knocked down again and again, but never gives up. If you have that spirit you are not a failure.

## Epworth League Lesson For May 24th

Leader---Mills Barfield.  
Subject of Lesson---Planning to Make the Most of the Summer.  
Topic No. I. What Should Characterize a Christian Vacation---Mrs. Roy Elrod.  
Song.  
Topic No. II. Summer Dangers---Ethel Kistler.  
Special Music---Mrs. Carl Elrod.  
Scripture Reading---Proverb 6-6-8---Dudley Buzard.  
Topic No. III. What Our Epworth League Can Do To Make the Most of the Summer---Lela Bickel.  
The Coming Assembly---Helen Carles.  
Selection of Delegates.  
Song.  
Collection.  
Benediction.

## Moeller Cream Station Open For Business

Erick Moeller makes the announcement this week that he is ready to test and buy all your cream. He said he would make tests every day and pay you when you come after your cans. There will be no use for you to send your cream away now. Erick will pay the highest market price at all times and wants your business, Mr. Sollock the produce man is also buying so we will have a good market for it all.

SPECIAL fried chicken dinner at Hotel James on Sundays.

The Journal is only \$1.50 per year

## DR. CROSBY A. PERRY

Dr. Crosby A. Perry, or of the American Revolution recently observed his 81st birthday at his Pittsfield.

## 200 Acres Will Be Planted in Cucumbers

R. H. James, wholesale seed grower of Rocky Ford, Colorado, is here this week contracting acreage and the products, for his firm. The farmers of the Shallow Water Valley will plant 200 acres in cucumbers. The Company has contracted all the seed from the 200 acres at 29c/lb. They will bring a thresher here to handle the crop. In Colorado the farmers realizes about \$150 to \$200 per acre from their cucumber seed.

All the farmers that are planting cucumbers are in the irrigating district, with good wells and plenty of water. Prospects were never brighter for this country.

## Longview Logic

Joe Essary and wife spent Saturday in Sudan, visiting.

Mrs. Della White and Mrs. Edith McCarty, of Sudan, visited their parents, Ole Essary and wife, of this community.

Tom Cunningham and son, Claude, from the Figure Two community was in this part of the country looking after cotton seed.

The farmers are all busy planting cotton, however we need more rain as the moisture has not met. Our rain was light but highly appreciated and hope for another rain soon.

The Longview Independent School District had an election, Saturday the 9th for the purpose of voting bonds for the amount of \$20,000 to erect a school building which carried 22 votes to 00. We are hoping to see work start at once for a good school is what we are looking for now.

Bryant Kintable will build another house on his farm at once.

Mrs. Roberts, has finished her school at Hurley where she has been teaching, and has moved on her farm in this community for the summer.

A number of folks enjoyed their selves Wednesday night at O. C. Essarys residence. After playing a while all got hungry and helped themselves to hot chocolate and cake.

Mrs. Clark and family, of Claton, N. M., are visiting in the Graves and Smith home this week.

Grandma Leach is visiting her niece Mrs. Steve Sullivan in the Davis community this week.

Rex Stegall and Mr. Gadye was over at the Graves brothers Thursday from the Figure Two community and reported that their land was to wet to work.

The Graves brothers truck left Saturday morning for their farm in Brisco county after some choice cotton seed to plant in this section. L. V. L.

## Muleshoe Will Kill a Big One On July 3-4

The Muleshoe people are making plans for their annual celebration on the 3rd and 4th of July. The main features of the two days will be horse races, rodeo stunts, barbecue and a real old fashioned time. Muleshoe has been having a big time on these days for many years.

**CUSTARD CAKE IS GOOD FOR CHANGE**

**Two Ways Given for Mixing Confection.**

(Prepared by the United States Department of Agriculture.)  
There are two ways of mixing custard corn cake, states the United States Department of Agriculture. By the first method the meal, milk, salt, butter and sugar are cooked in a double boiler for about ten minutes. When the mixture is cool the eggs, well beaten, are added, and the soda, dissolved in one tablespoonful of cold water. By the other method all the dry ingredi-

Splendid Dish for Dinner.

ents, including the soda, are mixed together, and then the sour milk and eggs, well beaten, and the butter are added. If the second method is followed the cold water is not needed.

**Custard Corn Cake.**

- |                    |                        |
|--------------------|------------------------|
| 2 eggs             | 1 1/2 cups corn meal   |
| 1 cupful sugar     | 1/2 cupful wheat flour |
| 1 teaspoonful soda | 2 tablespoonfuls milk  |
| 1 teaspoonful salt | 1 cupful sweet milk    |
| 1 cupful sour milk | 1 cupful cream or milk |

Mix all the ingredients but the cream and butter as directed. Melt the butter in a deep pan, using plenty on the sides. Pour in the batter, add (without stirring) a cupful of cream, and bake 20 to 30 minutes. When cooked there should be a layer of custard on top of the cake, or small bits of custard distributed through it. This serves six persons. It is a lunch or supper dish, or, if the sugar is omitted, it may be used to accompany the meat and vegetables at dinner.

**SPRING TONIC FROM THE POULTRY FLOCK**

**Egg Yolk Heads List of Iron-Rich Foods.**

(Prepared by the United States Department of Agriculture.)  
Why buy spring tonic from the drug store when the hens are working overtime to produce an abundance of eggs which are far more effective as a source of iron? Egg yolk heads the list of iron-rich foods and is one of the best possible means of supplying the body with this valuable mineral, says the United States Department of Agriculture. It contains phosphorus and calcium, too, elements needed to build bones, teeth and other tissues. The white of eggs comes very near to being pure protein, which is one of the chief substances of our bodies. Eggs are also rich sources of vitamins, those A B C's of the diet needed to promote health and proper development. Taken all in all, then, the hen beats the doctor as a mixer of spring tonic, for she combines minerals with other valuable foods in a form that the body finds particularly useful.

Every homemaker alive to the effect of the daily meals on health, plans to use an abundance of eggs in the spring. This is good economy as well as good nutrition.

There are so many appetizing ways of using whole eggs or the yolks and whites in separate dishes that the family need never tire of them. Use the yolks left over from prune whip or other dishes requiring a large proportion of whites, in place of butter in Hollandaise sauce. This egg-yolk sauce is excellent served hot with fish, poached eggs, or vegetables such as asparagus, cauliflower, or even plain cabbage cooked just long enough to make it tender. Persons who do not enjoy mayonnaise dressing because of the oil, will also like this sauce cold on salads.

**Egg-Yolk Sauce.**

- |                   |                              |
|-------------------|------------------------------|
| 4 egg yolks.      | 1/2 teaspoonful lemon juice. |
| 1/2 cupful water. | 1/2 teaspoonful salt.        |

Mix the ingredients by stirring rather than by beating, and cook over boiling water until thick. Stir constantly, and be careful not to overcook the sauce so that it separates.

Custards, steamed or baked, soft or stiff, are year-round standbys in most households. In the spring, however, the homemaker can afford to be more generous with the eggs. The family will enjoy a soft custard served with stewed fruit or pudding occasionally instead of cream.

In these and many other ways, the clever homemaker can put so much iron in the daily meals that there will be no need for the patent medicine man's tonic.

**LOVELY HATS NOW BLOOMING; MUST BE SOFT AND GRACEFUL**

IT IS while the summer is still young that the loveliest of millinery comes into bloom. The month of roses and birds also claims the most picturesque millinery as its own; for it is in June that the midsummer hat, in all its colorful glory and its daintiness, challenges the rest of the year to make comparisons. Nearly all the dressy hats presented for midsummer wear are made of del-

SOME PRETTY HATS

icate braids or sheer fabrics—or both—and many of them are flower-trimmed. If flowers are not used then flower motifs of ribbon are substituted for them, or they are cut out from printed silks and chiffons and applied to the shape. Painted fabrics, gay with flowers, mostly in transparent weaves, are posed over shapes, some of them as transparent as the fabrics.

A group of midsummer hats shown here includes favored shapes and materials and begins with a small hat of hair braid with narrow brim. It is veiled with chiffon that extends beyond the brim edge, making a pretty shadow for the eyes. Flower motifs, fashioned of narrow ribbons and a bow of wider ribbon, provide the trimming. Set it at the right a wide-brimmed hat of hair braid has leaves cut from printed chiffon in several colors applied to it. They are outlined with a tiny cord in black—gold and silver cord are also used in this way. Printed silk covers the small hat at the left and metallic ribbon makes an odd and beautiful adorn-

ment for the natural figure, a little below, velvet is cut in irregular figures edged with straw braid and posed against the shape; colored water lilies mesh it. The last hat—another semi-transparent model—has a band of velvet ribbon about the crown and a big chon of malines at the front. Favored colors are orchid, blue, tan and light green.

decided that we must have something more strictly feminine. Even the long-banished natural waistline is said to be "in the air" threatening to vibrate down and land right in our midst. Whether it is accorded a welcome or not, remains to be seen, but we have already approved the appearance of its first cousin, the low waistline, indicated by girdles or in the shaping of the bodice. Along with it come fuller

skirts, uneven hemlines, floating panels, soft fabrics and laces—and what could please the June bride more, or suit her better, than the fluttering and flattering mode? Her bridesmaids will revel in it. Here, in the picture, is a demure but dignified wedding gown of soft lace, posed over white satin. This is a time-honored combination, and it will see many generations pass before anything more beautiful outrivals it. This model is particularly well suited to youthful brides, who prefer girlish to stately styles for the wedding gown. But Paris offers more intricate designs in lace and satin, which combination seems to be in great favor with the couturiers. The long underbodice in this frock, of supple satin, follows

BEAUTIFUL WEDDING GOWN

ment for it. On the wide-brimmed hat below, velvet is cut in irregular figures edged with straw braid and posed against the shape; colored water lilies mesh it. The last hat—another semi-transparent model—has a band of velvet ribbon about the crown and a big chon of malines at the front. Favored colors are orchid, blue, tan and light green.

All at once, and with one accord it seems, Parisian style creators have turned from the straight up-and-down lines, that have reigned so long over the world of fashion, and have

the lines of the natural figure, a little vaguely and the bordered lace is posed smoothly over it. The lace skirt is laid in wide plaits, starting from under a panel of satin at the front. Fine tucks in the net portion of the lace, form a border at the bottom of the skirt and at the juncture of the bodice and skirt. The sleeves are short and the arms veiled by a lace-bordered veil falling from the very simplest of caps with small clusters of orange blossoms at each side.

JULIA BOTTOMLEY.

**FARM STOCK**

**RAISING SHEEP ON DIVERSIFIED FARM**

There are three systems of sheep management in the United States. 1. Running sheep in large bands on the range. 2. Keeping small flocks on the farms. 3. Fattening of range sheep.

The second and third are farm enterprises. The third is often more or less a speculative business, but the second—keeping a flock on the farm—may well be considered a permanent part of diversified farm business.

Sheep fit well into a system of farming because of the small investment required, the quick returns, their habits of feeding, their benefit to the land and their "two-way" cash crop.

It is usually considered that sheep can be purchased cheaply in comparison with other live stock. At present prices, however, an animal unit of sheep (seven ewes), is not so much lower in price than in other classes of live stock. The investment for shelter need not be large, as expensive barns are not necessary. The fleece of the sheep will prevent it from suffering from cold if it is kept dry and given a windbreak. Proper fencing will be the greatest investment necessary.

It should never be but a few months after sheep are purchased until a cash crop may be sold, either wool or lambs, either one of which will return a considerable part of the purchase price.

A very large part of the feed for sheep should be roughage. This makes it possible to utilize large quantities of grain that would otherwise have very little value. They can also graze profitably on waste lands, fields, meadows, lanes and roadways.

Sheep benefit the land upon which they run, in two ways, by keeping down weeds and by increasing the fertility. Their value to soil fertility has been so generally recognized that they have been called the Golden Hoof. They have an advantage over other common classes of farm live stock because their lighter weight does not pack the soil and also because their droppings are distributed to much better advantage.

**There Are Two Types of Runty Pigs, Says Peters**

W. H. Peters, head of the division of animal husbandry at the Minnesota experiment station, University Farm, St. Paul, says there are two types of runty pigs—one the pig that is born small and weak, of which there are from one to three in a litter, and the other the pig that has become runty after getting a good start from its mother.

The problem as to what to do with the runt of the first kind is not difficult. If the litter is small, such a runt will probably do fairly well and make nearly as good a pig as the rest. If the litter is large, it will probably be starved out, or it may be destroyed on the ground that it will not pay to attempt to raise it "by hand."

Runts of the other type, however, are more serious. Their presence indicates that the owner has made some mistake in caring for his pigs, and instead of one pig's becoming runty, all are likely to be runty. The real cause for the presence of such pigs is likely to be either lack of proper care and feed or else lack of attention to sanitation and health.

Mr. Peters believes that if the farmer is not able to determine the cause of lack of thrift among pigs, he should appeal to his county agricultural agent, and, if the county agent thinks it advisable, should call in a veterinarian. He says that the farmer cannot afford to ignore unthriftiness among his pigs, as it removes any chance of profit. A normal healthy pig should weigh about 200 pounds when 200 days old.

**Live Stock Hints**

Get the pastures ready for the mower.

• • •  
Dock lambs when they are about two weeks of age.

• • •  
A good 1,000-pound steer will dress out 580 pounds of carcass, while a common steer of the same weight will usually dress out about 520 pounds. The well-bred critter also brings more on account of quality.

• • •  
Potatoes make very fair fattening feed for hogs, particularly when cooked. From 4 to 4 1/2 pounds of potatoes cooked are equal to a pound of corn. It is desirable to feed some other feed, such as oats or shorts, with the potatoes.

• • •  
Plenty of good pastures mean the best and cheapest feed for live stock. Have pastures all the year.

• • •  
Sanitation in the hog lot sounds impractical but this method of preventing small pig ailments has kept a number of Kansas hog men in the business.

• • •  
In fattening stock for market don't over-stuff them. They will make faster gains if you keep 'em a little hungry. It's the last mouthful of grain that puts 'em out of condition.

**FREE To Housewives**

Send us your name and we will send you, FREE, and POSTPAID a 10 cent bottle of LIQUID VENEER. Wonderful for your daily dusting. Cleans dusts and polishes with one sweep of your dust cloth. Renews pianos, furniture, woodwork, automobiles. Makes everything look like new. Makes dusting a pleasure. Moreover, we will tell you how to obtain, FREE, a

**FOR OVER 200 YEARS**

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

**GOLD MEDAL HAARLEM OIL CAPSULES**

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

**Dickey's OLD RELIABLE Eye Water** relieves sun and wind-burned eyes. Doesn't hurt. Genuine in Red Fielding Box. 25c at all druggists or by mail, DICKEY DRUG CO., Bristol, Va.-Tenn.

**Sleepy Man Driven to Make Suggestion**

A Hoosier traveling man had a hotel room next to one occupied by two teachers during the teachers' convention. He was very tired and turned in early. But hardly had he closed his eyes when the two teachers came in from the evening session. They discussed it, one of them particularly being endowed with a voice commonly called strident.

Finally they finished with the subject and he, thinking they were through with the conversation for the night, turned over again and once more began to think of slumbering. But after a little pause the loud talking began on another theme, namely, the hard life of a teacher. After she had discussed it from all angles she said: "If I only knew where I could succeed I would leave the teaching profession. Now what could I really do as well as I can teach school?"

Before the second teacher could answer her the long-suffering man rose to the occasion. "Madam," he shouted through the wall, "you could be an auctioneer."—Indianapolis News.

Parrots should be taught to speak only in polysyllables.

**No Tonight Tomorrow Alright**  
Get a 25c. Box.

**Pimples**

BLOOD impurities are pumped by the heart into the face. That is what causes that grainy appearance, that muddiness, sallowness, pimples, blackheads, acne, red spots, and that impossible "something" which no face cream, massage, or face powder can cover up or beautify! The foundation for a beautiful skin is simply a clean blood.

there, and no face treatment can give it to you. But increase your red-blood-cells, — and quickly the ruby tint of purity begins to glow in the cheeks, the complexion becomes Venus-like and immaculate! Try it. It will do it every time. S. S. S. builds the red-blood-cells you need for a beautiful complexion. Begin using S. S. S. at once, and give yourself what you have been working for, for years.

Free Booklet  
Send name and address to S. S. S. Co., 111 S. E. 3rd Bldg., Atlanta, Ga. for special booklet on the Blood.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

**PROPERLY LABEL STORED CANNED GOODS**

But Few of These Jars Were Properly Labeled and the Housekeeper Will Find It Troublesome to Locate Those She Wants.

(Prepared by the United States Department of Agriculture.)

Although at the time of canning one thinks every jar of jelly, jam, or canned goods will be remembered and identified easily, when winter comes one is often doubtful, until a jar is opened, whether it holds blackberries or black raspberries, plum or currant jelly. It is also useful to know the date on which the food was preserved or canned, and if more than one method has been used to have that information on record. Peaches, for example, may be canned in heavy sirup for some purposes and in a light sirup for others.

useful facts to have on record, when one is canning the same fruit again or giving directions to some one else. The bureau of home economics of the United States Department of Agriculture suggests labeling all jars and cans with a neatly printed or writer label, giving such information as the above and any further statements deemed necessary.

Labels may either be purchased or made at home by cutting plain paper in pieces about 1 by 2 inches; they should be pasted on the jars at a uniform distance from the bottom.

**Handle With Care.**

Fruit, vegetables, and other canned goods should not only be carefully put up and labeled, but they should also be carefully stored. This means that a clean, cool, dark place should be provided. A cupboard with strong other shallow shelves and close-fitting doors will protect the products from dust, dirt and light. If the shelves are wide enough to hold only one jar, or at the most two rows of jars, it will be easy to find any particular jar. For the first week each jar should be stored by itself in order to be watching for signs of

and storage cupboard is necessary to wrap glass jars, peans, and other things that fade when

## THE CANYON

**SYNOPSIS.**—Kate Cathrew, "Cattle Kate," owner of the Sky Line ranch, on her way to McKane's store at Cordova, seemingly infuriated by the sight of a girl plowing in a valley below, places a rifle bullet near the horse's feet. The girl takes no notice. Kate goes on to town, where her presence brings on a fight between McKane, the trader, and Sheriff Selwood. Nance Allison, the girl on whom Kate Cathrew had vented her spite, is with her widowed mother and crippled brother Bud farming land taken up by her father, killed a short time before in a mysterious accident. Bud is the victim of a deliberate attempt to maim or kill him. Kate Cathrew wants the farm for pasture land, and is trying to frighten the Allisons into leaving.

## CHAPTER III—Continued

For a considerable space of time the woman sat regarding him. "I sent you to help in the breaking of morale," she said coldly, "not to bring me back defence. Next time I'll send a more trustworthy man."

She nodded dismissal, and the youth went quickly, his face burning.

At the far end of the veranda he almost ran into Big Basford, whose huge, gorilla-like shape was made more sinister and repellent by the perceptible limp. Basford was always somewhere near, if possible, when men talked with Kate Cathrew.

His great strength and stature, his small eyes, black and rimmed with red, his unkempt head and flaring black beard, everything about him suggested a savagery and power with which few men cared to trifle.

He scanned the boy's flushed face with swift appraising.

"I take it," he was grinning, "that the boss wasn't pleased with you?"

"Take it or leave it," said the other with foolhardy daring, "is it any of your business?"

With a smothered roar Big Basford leaped for him, surprisingly nimble on his lamed foot, surprisingly light.

He caught him by the throat and bore him backward across the veranda's edge, so that both bodies fell heavily on the boards of the floor.

"You'll find what's my business d—n you," gritted Big Basford; "you—!"

He got to his knees and straddling the lad's body came down on his throat with all his weight in his terrible grip. At the sound of the fall Minnie Pine leaped to a window.

"That black devil is killing the Blue Eyes," she said in patois Spanish to Josefa. "Give me that knife—"

But there was no need of Minnie's interference.

Kate Cathrew had heard that heavy thunder of falling bodies on boards and she was quicker than her half-breed for she was up and away from the desk before Big Basford had risen on his knees, and as she rose her left hand swept down the wall, taking from its pegs the heavy quilt that always hung there.

With the first jab of the boy's head back on the floor, she was running down the veranda, her arm raised high. With the second she was between Big Basford and the light like a threat of doom.

As he surged forward once more above the blackening face in his throttling fingers, she flung her body back in a stiff arc to get more impetus—and drove the braided lash forward and down like a fury.

It circled Big Basford's head from the back, the bitter end snapping across his face with indescribable force.

It curled him away from his victim, tumbling back on his heels with his murderous hands covering his cheeks.

For a moment he hung on the veranda's edge, balanced, then slipped off, lurching on his lame foot. He held his hands over his face for a tense moment. Then he looked up through his fingers, where the blood was beginning to ooze, straight at the woman.

The red-rimmed eyes were savage with rage and hurt, but behind that was a flaming passion which seemed to swell and burgeon with a perverted admiration.

"I've told you before, Basford," said Kate Cathrew, "that I will deal with

my men myself. I don't need your overly zealous aid. Get out of my sight—and stay out till you can heed what I say. Minnie, take this fool away—pump some wind into him. Give him some whisky."

She touched the boy contemptuously with the toe of her buckled slipper. He was weakly trying to get up and the Pomo girl unceremoniously finished the effort, lifting him almost bodily in her arms and supporting him through the door into the kitchen. The look she turned over her shoulder at Big Basford was venomous.

The owner of Sky Line walked down the veranda to her living-room door. At its lintel she stopped and stood, drawing the heavy quilt through her fingers, looking back at Big Basford. He had watched her progress and now the hard, bright, sparkling gaze of her dark eyes seemed to force him to movement, so that he picked up his hat, set it on his head and turned away towards the corral at Rainbow's foot, swinging with a rolling gait that further made one think of jungle folk.

But the lips in the flaring beard were twitching.

Kate Cathrew went in and hung the quilt on its smooth pegs, then sat down and took up her interrupted work just where she had left it.

## CHAPTER IV

### The Mystery of Blue Stone Canyon.

On the rich flats of Nameless, Nance Allison tilled her soil and her blue eyes caressed the land. The homestead was a feast with her. It had been her daddy's dream of empire. It was hers. He had stuck by and toiled, had secured his patent, made the good start.

She asked nothing better than to carry on, to see it prosper and endure. But strange disasters had befallen her, one after the other—first and bitterest, the hidden rope stretched in a cattle trail two years back, just after John Allison's mysterious death, which sent young Bud's pony tumbling to the gulch below and left the boy to walk lopsided ever after.

At that the girl had almost weakened in her stubborn purpose. She had held the young head in her arms many a weary hour when the pain was worst, and tried to build a plan of a future away from Nameless valley, but Bud would not listen. The bare thought made him fret and toss, sent the red blood burning in his cheeks.

"We'll never let 'em beat us out, Nance," he would pant with his hot breath, "the land is ours, safe and legal, and no bunch of cut-throats is going to get it from us. Not while we can stand—not while we can ride or plow—or use a gun!"

But Nance would stop him always there.

"Thy rod and Thy staff they comfort me," she would say gently, "we have no need of guns, Bud."

However, as the seasons passed, each with its promise and its inevitable blight, her face had become graver, less smiling. There had been the hay fire then—the fire in the night where no fire was or had been. There had been the six fat steers that disappeared from the range and were never heard of, though Bud rode Buckskin to a lather in a fruitless search for them. There had been the good harness cut to pieces one night when Bud had forgotten to lock it up.

All these had been disasters in a real sense to these people living so meagerly with their scant possessions. And this year they were more than poor, they were in debt to McKane for the new harness that had to be bought to replace the other. But Nance looked at her field of corn coming in long rows of tender green on the brown floor of the well-worked land and hoped. She was prone to hope. It was part of her equipment for the battle of life, her shield before the lance of her courage, her buckler of energy.

"It looks like a heavy crop, McKane," she told the trader honestly, "and I'll have far and away more than enough for you—I think I'll have enough left for my winter stake."

"Hope you do," said McKane, for though he was none too scrupulous where his own interests were concerned, he felt a vague admiration for the game girl working her lonely homestead in her dead father's place.

So, with the crop spreading its four delicate blades to the coaxing sun and the hay knee-deep in the big fenced flat across the river, Nance Allison laid by her labors for a while to rest her body and refresh her soul.

"I've just got to ride the hills, Mammy," she said smiling, "got to fish the holes in Blue Stone canyon, to climb the slopes for a little while. It will be my only chance, you know—there's the hay to cut soon and the corn to cultivate, and the cattle to look after later. I can't work all the year, Mammy, without a little play."

At which the mother's tragic eyes filled with tears—this for her daughter's only play—the riding in the lone-some hills—the fishing for trout in a shadowed canyon—when her young feet should have been tripping to the lilt of diddles—when she should have had ribbons and music boucées, and a sweetheart—the things of youth ever her youth should pass! Pass, tolling at the handles of a plow! It was a poignant pain indeed, that brought

those insistent tears, that withheld the tear-urged protest.

So, in the golden mornings, Nance began to saddle Buckskin and ride away, a snack of bread and bacon tied behind the cattle, to come ambling home at dusk happy, sweet, filled with the joy of life, sometimes a string of speckled beauties dangling at her knee, sometimes empty-handed.

Sometimes Bud went with her, but it was not fair to Dan and Molly, the heavy team, to cheat them of their share of rest, since Bud must ride one or the other of them, and so Nance rode for the most part alone.

She "lifted up her eyes to the hills" in all truth and drew from them a very present strength. The dark, blue-green slopes of the tumbling ridges, covered with a tapestry of finely picked out points of pine and fir trees, filled her with the joy of the nature lover, the awed humility of the humble heart which considers the handwork of God.

She lay for hours on some log high in a sunny glade, her hands under her fair head, her lips smiling unconsciously, her long blue eyes dreaming into the cloud-decked heavens, and sometimes she wondered what the future held for her after the fashion of maidens since the world began. She recalled the restless wanderings of the family in her early years, remembered vaguely the home and the school in old Missouri, her father's ceaseless urge for travel. And then had come their journey's end, here in the austere loneliness of Nameless valley, where his homestead had settled down and had been at home. She thought of these familiar things, and of others

"You'll Find What's My Business, D—n You," Gritted Big Basford. "You—!"

not familiar, such as picturing the house she and Bud would one day build on the big meadow, with running water piped from the rushing stream itself, with carpets—Mrs. Allison was already sewing interminable balls of "rags" for the fabric—and with such simple comforts as seemed to her nothing short of luxuries. She knew of a woman in Bennett who wove carpets, a Mrs. Porter, at the reasonable price of thirty cents a yard, warp included. The warp should be brown-and-white, she decided—at least she had so decided long back after many conferences with her mother.

Brown and white running softly through the dim colors of the rags—nothing new enough to be bright went into the balls, though there would be a soft golden glow all through the bit-and-miss fabric from the "hanks" dyed with coppers—brown and white, Nance thought, would make it seem like the floor of the woods in fall, weathered and beautiful.

She could scarcely wait the time of the fulfillment of this dream, when the cabin floors should be soft under foot.

Longing for the refinements was strong in her, though limited painfully to such simple scope as Cordova supplied, or as she remembered dimly from the days of her childhood in Missouri.

But the glory of the land was too compelling for idle dreams of the future. Here at hand were carpets of brown pine needles, shot through with scarlet bleeding hearts.

Here were mosses soft and wonderful when one bent close enough to study their minute and intricate patterns. Here were vast distances and dropping slopes, veiled in pale blue haze so delicate as to seem a hallucination.

Here also, were the mysterious fastnesses of Blue Stone canyon, its perpendicular walls of eroded rock cut by seam and fissure, its hollow aisles resonant always of the murmurous stream that tumbled through them.

Nance loved the canyon. She liked to climb among its boulders, to whip its frequent pools for the trout that hung in their moving smoothness, to listen to the thousand voices that seemed always whispering and talking. They were made of fairy sturd and madness, these voices. If one sat still and listened long enough he could

swear that they were real, that strange concourses discussed the secrets of the spheres. On the hottest days of summer the canyon was cool, for a wind drew always through it from its unknown head somewhere in the Deep Hearts themselves far to the north and east. Buckskin felt the mysterious influence of the soundful silence, pricking his ears, listening, holding his breath to let it out in snorts, and Nance laughed at his uneasiness.

"Buckskin," she said one day, as she lay stretched at length on a flat rock beside a boiling rill, "you're a bundle of nerves, a natural-born flinder of fears. There isn't a thing bigger or uglier than yourself in all the canyon—unless it's a panther skulking up in the branches, and he wouldn't come near for a fortune—though what could be fortune to a cougar, I wonder?" she went on to herself, smiling at the strip of sky that topped the frowning rim-rock, "only a full belly, I guess—the murderer."

She lay a long time basking in the sun that shone straight down, for it was noon, revelling in the relaxation of her young body, long worked to the limit and frankly tired.

She took her bread and bacon from a pocket and ate with the relish which only healthy youth can muster, clearing up the last crumb, drank from the stream, her face to the surface, and finally rose with a long breath of satisfaction.

"You can stay here, you old fraud-ent," she said to the pony, dropping his rein over his head, "it's hard on your feet, anyway. Me—I'm going on up a ways."

Buckskin looked anxiously after her, but stayed where he was bid, as a well-trained horse should do, and the girl went on up the canyon, her fair head bare, her hands on her hips.

She drank in the somber beauty of the dull blue walls, hung to their towering rims with corrosion and prominence carved fantastically by erosion of uncounted years—listened deep apart the better to hear, to the deep blended monotone of the talking voices.

She skirted goat boulders fallen from above, waded a rill here, leaped a narrow tangle, and always the great cut became rougher, wilder, more forbidding and mysterious.

She stood for a long time beside a pool that lay, still-seeming and dark, behind a huge rock, but in whose shadowed depths she could see the swirling of white sand that marked its turmoil.

When the snows melted in the high gulches of the Deep Hearts a little later, this place would be a roaring race. She thought of its foamy volume pouring from the canyon's mouth to swell the flood of Nameless a bit below her southern boundary. But it was a lone and lovely spot now, what with its peopled silence and its blue-toned walls.

These things were passing through her mind as she watched the swirling sand, when all suddenly, as if an invisible hand had brushed her, she became alert in every fiber.

She had heard nothing new in the murmurous monotone, seen no shadow among the pale shadows about her—yet something had changed. Some different element had intruded itself into the stark elements of the place.

Her skin rose in tiny prickles, she felt her muscles stiffen. She had lived in the face of menace so long that she was supersensitive, had developed a seventh sense that was quick to the nth degree.

She stood for a moment gathering her powers, then she whirled in her tracks, sweeping the canyon's width with eyes that missed nothing.

They did not miss the movement which was almost too swift for sight—the dropping of some dark object behind a rock, the passing of a bit of plummy tail.

The rock itself was between her and the broken foot of the wall, one of a mass that had tumbled from the weathered face. For a long time she stood very still, waiting, watching with unwinking eyes. Then, at the rock's edge, but farther away, she caught another glimpse of that tail-tip. Its wearer was making for the wall-foot, keeping the rock between. A wolf would do so—but there was something about that bit of plume which did not spell wolf. It was tawny white, and it was more loosely haired, not of the exact quality of a wolf's brush. Once more a tiny tip showed—and on a sudden daring impulse Nance Allison leaped for the rock, caught its top with both hands and peered over.

"Blue Stone canyon is evidently a most delightful place. And what is its mystery?"

(TO BE CONTINUED)

### What the Deacon Said

This is credited to the Osborne Village Deacon: "Deacon," said a half-baked chump to me the other day, "why don't you take more of your own advice?" "My benighted brother," I replied as softly as my temper would permit, "I am fixing up this medicine for your ailments and not for my own. No doctor takes his own medicine, any more than a banker pays 8 per cent for money."

# DAIRY FACTS

## INCREASE PROFITS BY GROWING FEED

The dairy farmer who can raise all or a big proportion of the feed for his dairy cows has a distinct advantage over the dairyman who has to purchase his feed, according to Prof. J. B. Fitch, head of the dairy department at the Kansas State Agricultural college. His feed will be cheaper, giving him greater profits on his milk products, and he has the chance of getting market prices for his surplus feed.

Alfalfa is the best hay for dairy cattle, Professor Fitch stated. In sections where alfalfa cannot be grown, sweet clover is being used to great advantage. Soy beans and cowpeas are being used in some sections, both as a hay crop and protein substitute.

Corn or "cane" silage is the best and cheapest feed with which to supplement legume hay. As to the use of corn, "cane," or kafir as a silage crop, Professor Fitch recommends the one which will give the largest yield with the greatest degree of certainty.

For higher production it is necessary to use grain in addition to the bulky feeds. Kansas produces corn, oats, barley, kafir, "cane," and wheat, all of which may be used in a dairy ration. Bran is another popular concentrated feed because of the large amount of wheat milled. Linseed oil-meal and cotton-seed meal are both used as concentrated protein for high producers.

Besides the natural pasture crops, the use of wheat and rye for pasture is very extensive. Sweet clover and sudan grass, both of which are relatively new, have also become very popular as pasture for dairy cattle.

## Future of Dairy Herds

### Depends on Heifer Care

Declaring that the future of the dairy herd depends a great deal upon the care given the heifer calves which will be the cows of tomorrow, H. M. Jones, dairy extension specialist at South Dakota State college points out that the usefulness of many a good cow is impaired by neglect or mistreatment as a calf.

"Feeding is of prime importance," he says. "On well-managed dairy farms, regularity in feeding is the rule, and the pails used for feeding calves are as clean as those into which drawn for human use. The best assurance for the health of the calf is cleanliness in quarters and feeding pails."

Raising the calf on whole milk is not economical, according to Jones, but it is necessary that the whole milk be fed for at least the first two or three weeks of the calf's life. After that, he suggests a gradual shifting of skim milk plus a grain ration of ground oats and corn. The cause for an "undersized" cow, he says, can usually be traced to too scanty feeding during the early period of her life.

## Butterfat and Feed Are

### Most Important Items

If a cow receives sufficient nutrients to maintain her body weight, the percentage of fat cannot materially change for any considerable period of feeding or by supplying any particular kind of feed. Cows that are greatly underfed may produce milk somewhat lower in fat percentage than normal. All experiments conducted up to the present time show that there is no positive evidence of any continued direct effect of a feed in stimulating milk production or increasing the percentage of fat. No kind of feed or care will cause a Holstein to give milk rich in fat like the Jersey. However, a cow may be fattened before freshening and caused to milk off this body fat in the first month of lactation, thereby raising the percent of butterfat in her milk.—From Colorado Experiment Station Bulletin 295, "Make the Dairy Pay."

## Dairy Notes

Sometimes cow-testing shows that the cow you think is a "poor stick" is being maligned.

See that the pasture fence is in good condition for the summer, making necessary repairs.

Freshen up the premises with white-wash—all buildings and fences which I've not been painted.

The cost of producing milk may be reduced by using pastures. The feed cost is generally the biggest expense item in producing milk.

See that the salt boxes in the pastures are kept well filled. Milk cows need more salt when on green pasture.

Continue to feed liberal grain rations to the cows in milk especially. Fresh green grass is very watery and contains little food value.

The feed and care given the dairy cow will bear a rich harvest all through her coming lactation period. It will help her to start well and that means she will continue well, if you do your part.

**I Love You, Texas**

Oh Texas dear land of my birth;  
I love you best of all the earth;  
I love your skies of azure blue;  
I love your grass with silver dew;

I love your streams with diamond drops;

I love your lakes and shadow spots;

I love your birds and fragrant flowers;

I love your lanes and beauty bowers;

I love your trees with branches wide;

I love your hills and mountain sides;

I love your fields with fruit and grain;

I love your pleasure I love your pain;

I love your lark and whippoorwill;

I love your nights when all is still;

I love your stars as they shine at night;

I love your sunsets with their golden light;

Sweet sunny south so bright and fair.

You know my song you know my prayer.

A Reader.

**Figure Two**

The rain Saturday afternoon interfered with the ball game between Goodland and Morton teams. They quit when the score was 11 each.

J. W. Martin and family and Lawra Green attended the Sunday School, Mothers Day program at Arch, Sunday.

Quite a few of Figure Two people attended the ball game between Mulshoe and Rogers team at Rogers Sunday afternoon. They were all most water bound. Had a time getting home in the mud, water and hail.

Day Halt, George and Charlie Lock were business visitors in Littlefield Tuesday.

Most farmers are trying to make good use of the rain, they waited for so long. Most ever one is planting cotton.

The Figure Two school will present the play, "Her Honor The Mayor," May 29, at 8:45 p. m.

Miss Eula Walker entertained the young folks Thursday night, with a party, that furnished fun for everyone there.

Miss Lucile Killough, of Littlefield, spent a few days with her sister, Miss Thea, this week. "Pat."

**ROAD NOTICE**

**STATE OF TEXAS,**

Bailey County.

We, the undersigned Jury of Freeholders, citizens of said Bailey County Texas, duly appointed by the Commissioners' Court of Bailey County, Texas, at its April 13th Term, 1925, to view and establish a First class Road from and to the points herein-after described and having been duly sworn as the law directs, hereby give notice that we will on the 23rd day of May 1925, assemble at Hurley, Texas and thence proceed to survey, locate, view, mark out and establish said road, beginning at point in Section 15, Block Z. W. D. & F. W. Johnson's Subdivision where the Bailey County line crosses the Panhandle and Santa Fe Railway Company's track on the South side of said crossing, and continuing in a Southeasterly direction on the South side of said track parallel with said Panhandle and Santa Fe Railway Company's track and joining the right of way of said Railway Company through Section 2, Block Z, and Sections 2, 3, 14, 19, 20, 25, 24 and 33 in Block X of W. D. & F. W. Johnson's Subdivision ending at a point the Southeast corner of said Section 33 where the Highway No. 7 crosses the Panhandle and Santa Fe Railway Company's track.

And we hereby notify, Robert C. Nickell, T. W. Vannata, E. K. Warren & Son, C. K. Warren, S. H. Withers, Wimbert Mann, H. R. Cress, S. E. Stoddard, H. D. Huyck, A. J. Hays, C. A. Adams, Geo. W. A new dance is announced from France, whose steps are adapted from the game of tennis. It promises to be an agile and racquetty affair.

Five powers are to unite to guarantee peace in Europe, and the idea ought to work out, provided they can keep from fighting among themselves.

Railroad men say it would cost \$19,000,000,000 to abolish the railroad crossings in the United States. So the crossings will probably continue to abolish careless humans.

The day of the kerosene lamp is by no means gone, says a news story. Neither is the day of the persons who pour kerosene on the kitchen fire just to see the house burn down.

That device that would enable talkers to see one another over the telephone would put an end to that old excuse about having to stay downtown for a directors' meeting.

A new paint has been invented in England which makes a warship practically invisible. It is understood, however, that ships painted thus will be counted in the 5-5-3 ratio.

The government is printing 1,000,000 new postal cards, but it will take far more than that number to meet the needs of the summer vacationists who will write: "Wish you was here."

The Missouri man who has proved that he is one hundred and seven years old may remember the first time a legislature started a session with the idea that it could finish in a few days and quit.

It is all right to bring up the child in such a way that some day he may set the world on fire, but he will have a much better chance of reaching that goal if the matches are kept out of his reach.

Philadelphia will have a stadium costing \$2,000,000 for her sesquicentennial in 1926. It is presumed that after the exposition has closed the stadium can be sold to some rising young western college.

There are no radio widows. Father listens over the home set.

What makes affections that can be alienated worth so much?

When two women are using the phone it's no lie about "line busy."

The new safety technique is to look before, during and after you leap.

A square man's dearest blunder is to assume that everybody else is also.

One of two things is certain. Either kissing or lipsticks will eventually go out of use.

The professor who says that the kiss is losing its kick is only exposing his advanced age.

Men fight for freedom; then they begin to accumulate laws to take it away from themselves.

There are few things more pathetic than the space in the cellar that was filled with fuel last autumn.

The treasury says a new dollar bill lasts only seven months, which is a little tender, even for tender.

A cynic is one who says there are two sides to every scandal, the truth and the one everyone repeats.

While there is no fool like an old fool, one doesn't hear so much about it if he has less than a million.

We regret to report that somewhere the fellow who wants to know in July if it is warm enough for you is thawing out.

The fellow who buys one 1 1/2-cent stamp probably will have to give the government the benefit of the other half cent.

What is there about human nature that makes a man with his life's savings in a bank want to confide in a stranger?

Maybe it was somebody who came to a street intersection with no right turn and no left turn that thought up the airplane.

An exchange wants to know the difference between talking and eloquence. Well, for one thing, there is more of the former.

"New faces are needed in the movies," says a critic. That ought not to be difficult, considering the wealth of cosmetics.

News of Spanish operations in Morocco would seem to consist largely of accounts of the casualties suffered as the Spaniards retreat.

A church announces it has a room where babies may be checked while the parents attend service. This is a popular alibi doomed.

Civilization has its little ups and downs, one of the former being the utter disappearance of yellow button oxfords with bulldog toes.

To some persons it seems perfectly plain that the cross-word puzzle was invented by the rubber trust to promote the demand for erasers.

It is now asserted that human intelligence reaches its maximum at sixteen years. After that there is nothing left to do but to learn how to use it.

The Chicago health commissioner asserts that few people blow their noses correctly. We've always thought so. People should carry tuning forks with them.

The observation of a scientist that the earth weighs more in winter is verified by the owner of a corner lot who lifted considerable of this winter off his sidewalks.

At sixteen a poor girl would be glad to buy a pair of new shoes every day. At sixty, a rich man would be happy if his old shoes would hold out for thirty years longer.

The surprising thing about the finding of two human skeletons 50,000 years old by a Russian scientist is that there is a scientist left alive in Russia to make the discovery.

Money not only talks, it vamps.

Is the major sport getting to be the kernel of the college course?

Another eternal triangle is boy, dog and cat.

Life is just one cross-word and income tax problem after another.

"Density in autos" makes a deadly combination with density in jay walkers.

It now becomes the task of the jazz artists to find a pet name for King Seneferu.

You don't hear of all the self-made men. Some of them can't afford a publicity expert.

Discussion is going on as to whether the German police dog is a domesticated animal.

If we can't avert war entirely, let us at least postpone it till the last one is paid for.

The term "naked woods" became current after the first spring invaders had left them so.

Food prices are still doing the high-climb stunt far above the country where they were raised.

Our idea of a novel music memory contest is being able to remember all the words of "After the Ball."

"Thousands of girls are wed under sixteen," and thousands of them are unwed within the next few years.

When the cross-word puzzle dies the unabridged will come in handy to make the baby a high chair at the table.

Another needed invention, suggested for use in the apartment overhead: A player-piano roll with no perforations.

Dispatches from Pisa are to the effect that the famous Leaning Tower is looking more discouraged than ever.

Aviation can't expect much enthusiasm from our admirals until someone invents a plane with a rocking chair in it.

What a difference in the speed of a man's car when he is bragging about it to a friend or lying about it to a judge.

With some people it isn't enough that free verse is free; they think a man ought to be paid \$10 an hour to read it.

To get along congenially with the patrons, one thing that a Turkish bath attendant must not have is a sense of humor.

At any rate, the two-year fast undertaken by a medical student to sharpen his mind will sharpen his appetite.

At least Nero was honest. The towel found in his bathhouse recently by excavators did not bear the Pullman mark.

In Finland, of course, when the real estate salesman says the lot is only four minutes from the cars he means about a mile.

Though the teeth of many school children have been found faulty, every one of the children retains the power to eat candy.

The latest Parisian skirts do not reach to the knees, and it must be getting hard to tell a French flapper from a member of the Kiltie band.

It is not particularly encouraging, when baffled by a crossword, to know that somewhere in the dictionary's 4,000 pages is the proper answer.

Speeches at public dinners in Japan are made before the dinner. This enables the fellow on the program to go home and tell what he had to eat.

Cincinnati's orchestra needs \$2,000,000. That ought to dispel the idea entertained by so many leaders that all an orchestra needs is a saxophone.

A Chicago minister says the world needs a rest. It also needs to work more. The world is loafing too much, and a loafer is apt to get into mischief.

The following is a copy of a letter from Fred Determan who has only recently returned to Iowa.

Early, Iowa,  
May 14th, 1925

Mr. K. K. Smith, Muleshoe, Texas

Dear K:

I will write you a few lines to let you know the amount of gasoline that we used on our trip. The speedometer registered about 1100 miles and we used just 46 gallons of gasoline. About 225 miles of the 1100 were awfully muddy and sticky.

"You can sure put in a good word for the Chevrolet, because they sure went around the big cars."

Yours truly, Signed: Fred

PLEASE NOTE: The average for the entire trip including the 225 miles of MUD was 23 9:10 miles to the gallon. What more in economy could a person ask?

## Users Say—

Water and Prosperity With a WITTE Engine

"I'll drop you a line to let you know about my 15 H-P. Stationary Throttling Governor WITTE engine which I have installed and which is doing good work. I have a head of water to pump from that is about 25 feet and have irrigated six acres of alfalfa in one day. All farming done in this country is done by irrigation—we don't have to wait for snow or rain if we have the water and with a WITTE engine properly installed you have the water and prosperity will follow."

W. P. Birchfield, Deming, N. Mex.

"We are using our 25 H-P. WITTE Throttling Governor Engine pulling a 6 inch Centrifugal Pump. It requires practically no attention—runs day in and day out and always starts on the first kick. We are certainly well pleased with the WITTE and can recommend it to anyone."

David Turner, Portales, N. Mex.

"I have set my WITTE engine to handle a Centrifugal pump and I am using seven hundred feet of fire hose, carrying the water to my truck. I think I get about two hundred gallons a minute and I am certainly well pleased with my outfit."

J. M. Sparks, Rock Port, Texas.

## WITTE Throttling Governor Engines

are the favorites for irrigation work—big surplus of power for any emergency and sturdy construction that welcomes continuous hard work.

## Best For Irrigating—The Rugged, Dependable WITTE

Here is the engine with a back-ground—for nearly half a century the WITTE Throttling Governor Engine has been known for its rugged, dependable qualities and performance. Simple and trouble-proof—at work every minute under any climatic conditions.

### Uses Cheapest Fuels

Kerosene, Distillate, Gasoline, Tops and all similar low-grade fuels.

You get perfect performance with the WITTE, using the cheapest fuel in your locality. Specially designed for irrigation work—many exclusive features not found on any other engine. Fully equipped with WICO Magneto, the best system of high-tension ignition known. Easy to start. Any speed you want by merely turning thumb screw on the Speed Regulator.

## Write Today for My New Engine Book—FREE

**Write for It Today!** I want to send you my new engine book—the most interesting book about power that you have ever read. Fully illustrated. Tells all about this remarkable engine and how easily you can get it to do the hard jobs on your place. Shows details of equipment, many exclusive features and hundreds of vital points about application of power to your place. I'll also send you letters from my customers all over the world—over 150,000 of them—people who are actually using WITTEs on hard jobs and who know how it can work. Write me today, a postal will do. You are under absolutely no obligation by writing me, and my big book is sent at once, all postage paid.

ED. H. WITTE, President

## The Santa Fe Creed

President Storey says that teamwork, courtesy, and co-operation form the Santa Fe creed. Regional Advisory Boards are an example of co-operation. Every one benefits when the transportation machine works smoothly.

Community of interest of the railroads, their patrons, and the public is generally recognized without argument.

A fine spirit of co-operation has resulted and has become an invaluable aid in rendering transportation service.

One outstanding example of co-operation is the Shippers' Regional Advisory Boards, eleven in number. They are voluntary organizations of shippers, representing production, distribution, consumption, and credit as related to transportation.

Each board has separate commodity committees dealing with each important commodity.

Railroads are not represented on these boards, but do have separate committees of their own which co-operate with the commodity committees.

These boards consider, analyze, and solve many transportation problems. Through them railroads learn shippers' needs in advance and are enabled to distribute cars to care best for such needs.

Shippers learn the necessity of prompt

loading, unloading, cleaning, and release of cars, and the importance of giving advance notice of their requirements.

Friendly conferences around the table have been very helpful. All parties have profited thereby.

Car loadings in 1923 and 1924 broke all records, yet the railroads moved the traffic offered without car shortage or delay.

There was no magic or mystery about this record-breaking performance. Available facilities were used to the best advantage by railroads and shippers. Plain common sense was applied in a co-operative spirit to solving a difficult problem.

Such co-operation made it possible to have the products of forests, mines, manufactures, and agriculture delivered without delay at reasonable cost.

Everyone benefits when the transportation machine functions smoothly and without friction.

W. B. STOREY, President

The Atchison, Topeka and Santa Fe Railway System

### FATHER WAS SON'S RIVAL FOR GIRL'S HAND, SHE ADMITS

Former Sweetheart Tells Motive for Murder by Parent Who Shot Self.

Pittsburgh.—A love triangle where in the father won the affections of his son's sweetheart and, after casting her aside, shot and killed his boy because he refused to obey his parent's order to marry her, was the explanation given to the police by the woman in the case in the shooting of Albert J. Tilles, Jr., eighteen, by his father, Albert J. Tilles, forty-five, a leading churchman of No. 81 Maple avenue, Ingram. The elder Tilles, after killing his son, fired a bullet into his own head, but the wound is not serious.

The tragedy occurred in the Tilles home. Before the shooting Tilles and his son had been quarreling in the boy's room. During the altercation the boy was heard to say: "I can get you 20 years for what I know about you." This remark was the clue on which

Killed His Boy.

police have been working, and a pretty North side girl, "the woman in the case," told the police the motive for the shooting and attempted suicide.

#### Girl Tells Story.

According to the story of the young woman, the elder Tilles went to a summer camp on the Allegheny river last summer with his son. The boy's sweetheart was there. The father became infatuated with the young woman. The son, on learning of the attachment, broke off his friendship with her.

A marked coolness between father and son followed. This feeling became bitter a short time later when the elder Tilles, to shield himself, insisted that his son marry the girl. The boy refused and several violent quarrels followed.

The boy's threat, just before the shooting, that he could get his father 20 years for what he knew about him, was based, the police say, on the knowledge of his father's relationship with the young woman.

Tilles, who is now in the Presbyterian hospital, told the police he shot his son and then attempted to end his own life, in pursuance of a suicide pact. He will be taken from the hospital to be confronted by the young woman whose inconsistency led to the tragedy.

### Russian Women, Children Are Using More Liquor

Moscow.—Alcohol consumption among women and children in Russia is increasing at a disturbing rate. Statistics just issued by the international revenue authorities of the Yenisei district disclose that while men drink relatively less than formerly, women and children imbibe considerably more. Most of the liquor consumed is home-brewed vodka.

Out of 3,000 villages in one district, 2,640 were found to be engaged in making illicit vodka. In this district 4,256 stills were confiscated, while a much larger number were hidden from the authorities.

Realizing that complete prohibition was a failure, the government now is permitting the sale of vodka containing 30 per cent alcohol.

### Woman Locked in Room Four Years by Husband

Insterburg, Germany.—Authorities were investigating an unusual case of inhumanity brought to light by the death of a girl who played a minor part in it. A farmer named Golkow was accused of imprisoning his wife, who formerly was insane but had been cured, in a narrow, unlighted, unheated room, for four years. The room had no windows. The woman's children consented to the imprisonment, which was brought to light by the death of a daughter. The woman's plight when she was released was pitiable.

#### "December-May"

Columbia, Ky.—A record for "December-May" weddings was believed to have been established here when Solomon Statts, seventy-two years old, married Miss Rose Sennett, thirteen. It is Statts' third marriage and he has great-grandchildren older than his bride.

### SHERIFF'S NOTICE OF ELECTION

THE STATE OF TEXAS: COUNTY OF BAILEY:

Notice is hereby given that an election will be held on the 15th day of June 1925 at Pleasant Valley in Common School District No. One of this County as established and defined by County Board of Education of Bailey County, Texas to determine whether a majority of the legally qualified resident property taxpayers of said district desire the issuance of bonds on the faith and credit of said common school district in the amount of \$15,000.00 the bonds to be of the denomination of \$1,000.00 each, numbered consecutively from 1 to 15 both inclusive, payable March 1st, 1928, 1931, 1934, 1937, 1940, 1943, 1945, 1948, 1950, 1953, 1955, 1958 1960, 1962, and 1965, years from their date, bearing 6 per cent interest per annum, payable semi-annually on March 1, and September, 1 of each year, to provide funds to be expended in payment of accounts legally contracted in building of a brick and tile school building and equipping same and to determine whether the Commissioners Court of this County shall be authorized to levy, assess and collect annually while said bonds or any of them are outstanding a tax upon all taxable property within said district sufficient to pay the current interest on said bonds and to provide a sinking fund sufficient to pay the principal at maturity.

All persons who are legally qualified voters of this State and county and who are resident property taxpayers in said district shall be entitled to vote at said election, and all voters desiring to support the proposition to issue the bonds shall have written or printed on their ballots, the words:

"For the Bonds" and levying of a Tax in payment thereof.

And those opposed shall have written or printed on their ballots the words:

"Against the Bonds" and levying of a Tax in payment thereof.

D. C. Stovall has been appointed presiding officer for said election and he shall select two judges and two clerks to assist him in holding the same and he shall within five days after said election has been held make due return thereof to the Commissioners court of this county as is required by law for holding a general election.

Said election was ordered by the County Judge of this County by order made on the 11th day of May 1925 and this notice is given in pursuance of said order. Dated the 13 day of May 1925.

H. A. Douglass, Sheriff Bailey County, Texas. 14-15-16.

### ROAD NOTICE TO NON-RESIDENT LAND OWNERS

STATE OF TEXAS, Bailey County.

We, the undersigned Jury of Freeholders, citizens of said Bailey County, Texas, duly appointed by the Commissioners' Court of Bailey County, Texas, at its April 27th Term, 1925, to view and establish a First class Road 50 feet wide and having been duly sworn as the law directs, hereby give notice that we will, on the 13th day of June, 1925, assemble at the beginning point of said road and thence proceed to survey, locate, view, mark out and establish said road, beginning at a point on the North boundary

line of Bailey County, Texas, where the East line of Section No. 28 and the West Line of Section No. 45 intersects the same; thence South on the Section line between Sections numbered as follows: 28 & 45, 29 & 44, 30 & 43, 31 & 42, 32 & 41, 33 & 40, to the right-of-way of the Panhandle and Santa Fe Railway Company; thence South across the said right-of-way to the public road on the South side of said Rail Road; the entire road being in Block Y, Bailey County, Texas, and ending at the last above mentioned point.

And we do hereby notify Geo. F. Hopper, D. R. Grush, W. H. Grush, J. W. Edwards, Chas. E. Johnson, J. W. Johnson, Ray H. Johnson, F. W. Titler, E. Byars, E. K. Warren and Son, Chas. K. Warren, Fairview Land & Cattle Co., E. K. Bonifoy, W. L. Kepner, Henry Schacht, Jos. Weidel, F. B. Lyons, E. S. Morris, and any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damage, if any, claimed by them.

Witness our hands, this 16th day of May A. D. 1925.

S. E. Morris, I. W. Harden, Carl Elrod, Byron Griffiths, C. H. Long, Jurors of view. 14-15-16-17.

**Serious operation avoided**

Resinol healed stubborn sore

Elyria, Ohio, March 1:—"I feel it my duty and pleasure to thank you for the wonderful cure your Resinol salve has wrought for my husband, who suffered from an open sore on the back of his neck for four years. Several doctors said that it was a cancer and advised its removal, but it was so near the base of the brain that we feared an operation. I had found Resinol Ointment so effective for my husband and similar things that I induced my husband to try that. After using only two jars of Resinol, the sore entirely healed—every trace of it has disappeared. Resinol certainly was a God-send to us!" (Signed) Mrs. E. E. Kennedy, 243 E. 8th St.

### Montreal's Amphitheater

The amphitheater now nearing completion in Montreal for hockey and other indoor winter sports is designed to be one of the largest and best-equipped buildings of its kind in the world. Two miles of pipes are laid over the arena surface and after the first ice is supplied it will take only a matter of an hour or two to make a new surface, so that after each hockey game the ice may be hardened at will.

Most of the advice given is about indiscreet duties. This is why it isn't taken.

### Rural Carriers Travel Far

The army of rural mail carriers in the United States travels on an average 1,173,473 miles daily in distributing the mail of all classes that go to rural residents. The annual total is 390,256,364 miles. Fifteen and a half billion stamps and more than 2,500,000 postcards are sold yearly by the Post Office department to the American public.

### Uncertain Feeling

Dorothy, who had just returned from Europe, was asked by her teacher how she enjoyed her trip and whether or not she was seasick. "The trip was very interesting, but I was so sick all the way over that one minute I was afraid I would die and the next minute I was afraid I wouldn't," replied Dorothy.

## NEARLY INSANE AT TIMES

Mrs. Saunders Tells how Lydia E. Pinkham's Vegetable Compound Relieved Troubles of Change of Life

Knoxville, Tenn.—"I took Lydia E. Pinkham's Vegetable Compound while going through the Change of Life. I was very nervous, could not sleep and had melancholy spells. In fact, I was nearly insane at times and my memory was almost a blank. I was so weak I could not do my household half of the time and suffered dreadfully with my back. My doctor said I would have to worry it out and I went through this for three years before I began taking the Vegetable Compound which I saw advertised. I think it was eight bottles that I took. It has been two years since I took any and I haven't had a doctor since for that trouble. I do all my washing and ironing and I have gained from 116 to 138 pounds. I feel so well I think I do not need any medicine now, but I advise all women who suffer physically and mentally as I did to give the Vegetable Compound a fair trial. I hope it will do as much for them as it did for me."—Mrs. T. A. SAUNDERS, 711 E. Depot Street, Knoxville, Tenn.

### Wonderful Experience

When Henry Oldys, naturalist and authority on bird calls, died recently at Rockville, Md., he left a will which contains this paragraph: "I commend my soul to God in the hope that, despite its unworthiness to enjoy the great privilege, he will allow it to continue its existence after the death of my body. Should I be denied this great boon, yet am I deeply grateful that I have been permitted to enjoy this beautiful world, to think and to feel. It has been a wonderful and delightful experience, and I thank my God with an overflowing heart that I have lived. My one regret is that I have dealt so unworthily with the life he lent me."

## Popular System for Sanitation

Plan Originated Few Years Ago Is Saving Hog Raisers Much Money.

(Prepared by the United States Department of Agriculture.)

That the system of swine sanitation originated in the United States Department of Agriculture a few years ago is saving hog raisers large numbers of pigs and much money is shown by reports coming in continuously from various parts of the Middle West. Illinois, where the system was first tried out in McLean county, has been taking up this new method of handling sows and young pigs with a great deal of energy, and the results obtained no doubt will stimulate increasing numbers of farmers to raise pigs under sanitary precautions which will keep them free of worms.

### Pigs Given Good Start.

This spring 500 farmers in 57 Illinois counties gave all the pigs farrowed a good start by having them come to clean farrowing houses after the sows had been thoroughly scrubbed. The live stock extension specialist of the University of Illinois considers that with this start half the battle in the economical production of pork has been won. He says the other half consists merely in keeping the pigs away from worm eggs until they are at least four months of age, and to do that does not require skill, but merely determination and persistence.

Reports indicate that farmers who have raised pigs the sanitation way will not go back to the old careless method. They saved more pigs, the pigs grew faster, and gain costs less, and the profit was greater. At the experiment station farm at Urbana, Ill., a lot of sanitation pigs gained 35 pounds each while others allowed to run in old hog lots where they picked up worm eggs gained only 18 pounds. Dr. H. B. Raffensperger, of Bloomington, Ill., representative of the bureau of animal industry, United States Department of Agriculture, reports a lot of sanitation hogs that reached a weight of 218 pounds, while others frequenting an old hog lot grew to only 162 pounds. In this case the sanitation method increased the size of the pigs 35 per cent. Hundreds of farmers in various parts of the state have reported similar and even greater gains. One man raised sanitation hogs to a weight of 300 pounds in the same time that his hogs formerly grew to only 200 pounds; another reported a ton litter of sanitation pigs averaging 272 pounds when others in the old hog pastures weighed only 150 pounds, a gain of 80 per cent. A farmer who adopted the sanitation system last year had two sows which raised 13 pigs on a half-acre of old pasture land which had been plowed and sowed to oats and rape. As this man expressed it, he had the best "luck" with these pigs that he had had in ten years.

### Easiest Way to Raise Pigs.

With such enthusiasts as these men scattered throughout the state, it is highly probable that the sanitation method of hog raising will be the common method in a few years. The method is not complicated and, as one Illinois farmer expressed it, once you are fixed for handling hogs in this way, it is the easiest way to raise pigs. Briefly, all that is necessary is to have the pigs farrowed in a pen that has been thoroughly cleaned with lye and hot water, from sows that have been thoroughly scrubbed before the pigs are born. From this point on the pigs must be handled so as not to be brought in contact with old hog-lot soil polluted with worm eggs. They should be moved to clean pastures and kept away from contact with other hogs until they are four months of age, and have a good enough start to resist any worm infection that may come later.

### Find Rape Superior as Pasture Crop for Pigs

When compared with other pasture crops for pigs, rape demonstrates itself the equal of any and the superior of most of them. Feeding trials at the Iowa and Ohio stations with fattening pigs on corn and tankage on pasture have shown the gains produced, feed requirements and carrying capacities of rape and alfalfa to be practically identical. Alfalfa, of course, enriches the soil as a legume and also has the ability to produce hay, neither of which is true of rape. When neither alfalfa or clover is available for the pigs, however, rape should not be omitted. It is of course, much superior to bluegrass pasture, particularly after July 1.

### Orchards Need Repairs

In every fruit region there are orchards that need to be rejuvenated, made over, or repaired. These are not always old orchards. Some have never borne a barrel of fruit. Many such orchards have not had a chance through neglect, and others have suffered at the hands of ignorant owners.

### Sweet Clover Helps

Sweet clover prepares land for alfalfa. This is especially true on any of the poorer types of soil where it is desired to grow alfalfa. The large roots of the sweet clover plants open up the subsoil and the plants inoculate soil with the proper bacteria for alfalfa. Follow the sweet clover with a cultivated crop.

## Prevent Cows From Eating Garlic Tops

Disagreeable Flavor and Odor Spread Quickly.

(Prepared by the United States Department of Agriculture.)

One minute after garlic is eaten by a cow the disagreeable flavor and odor of this pungent plant may be detected in the milk. This is one of the facts brought out in an investigation carried on by the bureau of dairying, United States Department of Agriculture, and reported in Department Bulletin 1320, Effect of Garlic on the Flavor of Milk, by C. J. Babcock. The only practical way to prevent the appearance of this flavor and odor in milk in regions where the weed infests pastures is to keep the cows from eating the plant.

In the tests, which were made by giving to several persons samples of milk from cows milked at different periods after having been fed garlic and from check cows, it was found that the intensity of the bad flavor and odor increased until it reached a maximum at ten minutes after feeding the odorous ration. Bad flavor and odor were present to an objectionable degree when the cows ate one-half pound of garlic tops four hours before milking. As the time between the eating of the garlic and milking time increased, the bad flavor and odor diminished and in seven hours practically disappeared.

Not only were the garlic flavor and odor taken in by eating, but it was shown that inhaling garlic for ten minutes gives strong flavor and odor to the milk. Milk drawn 90 minutes after inhalation of garlic was practically free from objectionable flavors and odors.

Copies of the bulletin may be obtained free, as long as the supply lasts, from the United States Department of Agriculture, Washington.

## Bordeaux Mixture Spray Will Protect Potatoes

When the potato plants are six inches high, spray with bordeaux mixture. See that every part of the plant, leaves, upper and under sides of the leaves, and stems are reached with the spray to protect them from blights and rust.

This spraying is very important, as it reaches the heart of the cluster of stems and leaves—which is hardest to reach as the plant grows.

Just as important is spraying to kill insect enemies. Use one-half pound of pure paris green in 50 gallons of the bordeaux mixture. Spray with the poison just as the eggs of the Colorado beetle first show signs of hatching. Make one or two more applications of the poison three to five days apart, as required.

Spray with bordeaux at least four times. Spray every ten days or two weeks until the potato tops get large enough to meet in the rows, or until they are as large as they ever will be. If you can't get in four sprayings ten days or two weeks apart while the plants are making this growth, spray oftener.

That is, do this if you are planting potatoes for profit. Careful tests in New Jersey show a profit of \$40 an acre of potatoes by spraying, and similar results have been arrived at elsewhere. People who make a business of growing them for the market would never think of omitting the spraying. They know their business.

## Trapping and Poisoning for Control of Gophers

Trapping and poisoning are methods recommended for the control of gophers, according to Fred D. Butcher, extension entomologist at Iowa State college. Traps set in runways should always be used to supplement other control measures. Special pocket gopher traps are advised.

For poisoning gophers, use a bait made by cutting sweet potatoes, carrots or parsnips into pieces about one inch long and about one-half inch in diameter. Wash and drain the pieces as soon as they are cut. Over one gallon of the bait sprinkle one-eighth of an ounce of powdered strychnine. Stir one or two pieces of bait into the gopher runways one or two feet from each mound. The runways may be located by means of a sharp stick or wagonbox endgate rod used as a probe and the bait dropped through the holes thus made. Close the holes after inserting the bait.

## FARM NOTES

Spring is the best season for the planting of all kinds of nursery stock.

It is less costly to be prepared for apple scab than to be surprised by it.

Don't rely too much on your own opinion; men have been known to err.

Don't let the weeds get a start. It's worse than a large handicap in a foot race. Sharpen the hoes and start from the same mark.

An incubator room that can maintain a temperature ranging between 60 and 70 degrees F. will increase the efficiency of the incubator.

Two-thirds of the seed corn sent to the New Jersey College of Agriculture for test has been found unfit to be used for planting. Play safe and have yours tested.

## Important to All Women Readers of This Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine will do for them. By inclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.

### Portable Mill Works

Many times in the past we have all wished for a woodworking machine combining many of the features of the mill works, so portable, well balanced and flexible that we could take it to where heavy timbers lie and frame them to our heart's content while they lay where gravity held them. Butchers are planning their chopping blocks as they stand. Tank and vat makers are framing their heavy timbers as they lie on benches; cutting, splicing, boring and graining on timbers as thick as 12 inches is all done as the timbers lie.—Scientific American.

### Cuticura for Sore Hands.

Soak hands on retiring in the hot sud of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

### Strained

A man of the soil went into the city for a wife. He was blessed on his mission and brought her back to the farm. As it happened she was not versed in the arts of farming and as a result made many mistakes as she was learning.

One day, as her husband was returning from the field, she met him at the door and said: "Old Lead (a dog) got in the cream jar, but I strained it."

The war has made table linen very valuable. The use of Red Cross Ball Blue will add to its wearing qualities. Use it and see. All grocers.—Advertisement.

### Extreme in Cold

Coldest condition in the world is that of frozen helium gas, which is within one degree of theoretical absolute zero.

Dr. Peery's "Dead Shot" is powerful, but safe. One dose will expel Worms or Tape-worm; no castor oil needed. Adv.

### Banana's Introduction

Bananas were introduced in the New world in 1516 from the Canary Islands.—Science Service.

## CHILDREN CRY FOR

**Fletcher's CASTORIA**

MOTHER:—Fletcher's

Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. H. H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

He talks and she listens during the courtship, but after marriage the plan is reversed. It doesn't take a girl long to catch a husband after she begins to pose as a man hater.
