THE CHRISTIAN'S MISSION - Preach, saying. The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give. Matthew 10:

"LAWS AMERICANS MUST OBEY"

An exchange in a very fascinating article recites a story of the "laws Americans must obey." They run into many thousands and each year the nation, the states and county and city governments add new statutes to a long list. A summary shows that a total of 1524 new laws was enacted by the 71st congress. These new statutes brought the total of congress in the last decade up to 6000 and the total of federal laws enacted during the present century at about 25,000. It is estimated that more than 50,000 federal laws have been placed on the books since the first congress assembled in 1789. Most of these were private measures but people there are about 10,000 federal laws in existence which must be obeyed by all citizens.

State and city and county laws must also be complied with. They bring the total of laws enforced throughout the United States to an appalling number, variously estimated at between two million and ten million. Michael J. Hickey, secretary of the national industrial council, found that 17,015 new laws were approved in 43 states in 1927; that in 1928, when only nine state legislatures convened, 2908 laws were added; and that in 1929, with the number of legislatures in session again reaching 43, 16,921 laws were enacted.

A record kept of the number of bills submitted in the New York state legislature between 1915 and 1930, inclusive, show that 68,192 were introduced during that period and 12,121 passed. A famous justice of the supreme court of the United States is quoted as having returned this verdict, "The United States is the greatest law factory the world has ever
