## YESTERDAY, **TODAY OR NEXT WEEK**

When an advertiser puts his trade-mark on a product and his money behind it, he wraps his reputation into the package. That is why the purchaser of advertised goods can take an unvarying standard of quality for granted.

Look through the advertising columns of this newspaper and notice the number of established products you see listed there. As you read the name of each one, you form an instant mental picture. Its size, color, shape, flavor and quality are known factors, as staple as wheat. You know that whether you buy the article today or next week, it will be precisely what you want--the same uniformly good product that gave you satisfaction when last you used it.

That is one of the tremendous advantages that advertising has brought you as a consumer. You know before you buy that the maker, whose business success is tied up with his product, will see that quality is maintained. You know that if any change is made in an advertised article it will be to improve it---to give you even greater value for your money.

From the report of a famous scientist who studied the effects of LUCKY STRIKE'S exclusive "TOASTING" Process-

"During the course of some recent investigations ... we became interested to ascertain whether Ultra Violet Rays produced any change in the quality of the cigarettes. It may interest you to know that I was able to detect a very definite difference in the irritant qualities of the treated and untreated cigarettes. Several tests were made, not only on myself, but others as well, and we experienced little difficulty in selecting the treated or irradiated cigarettes as distinctly less irritating to the mucous membrane of the nose and pharynx than the control or untreated cigarettes."

Sunshine mellows - heat purifies - that's why LUCKY STRIKE'S exclusive "TOASTING" Process includes the use of modern Ultra Violet Rays. At present there are over 1,000 Japs in the heretofore unsettled country, engaged in planting rice, cotton, nurseries and other tropical products, Noda said.

There are three separate colonies of Japanese in the remote area, according to Noda. A group of 100 families has been established in the state of Para, Brazil, at the town of zon from the city of Para. At the settlement of Maues, in the state Amazon, is another colony of 39 families. And far up the Amazon to the south, on the Rio Madeira, a tributary, clear into Bolivia, is a colony of 500 Japanese men who

have married native women.

The group of 500 in the Bolivia section was brought to the country by an American mining company operating in Bolivia, the Inca in-terests, which used Japanese labor.

Noda, who is famed for his explorations and books that he has written on them, said that it will be many generations before civilization of the country back of the Rio Branca, where wild and savage headache, or "the morning after" tribes that use blow-guns and feeling to inspire them, seven men is able to penetrate the dark regions

# Car Owners Bought More Firestone Tires

During April, May and June than in any like period in History

THERE are reasons for this-Firestone is now building the Greatest Tire Values in history, with the result that Firestone factories are operating 24 hours a day, 6 days a week, to meet public preference.

This is the year everybody is scrutinizing his purchases. This is partie-

ularly true in tire buying because of the many confusing and misleading statements made about tires. To give car owners the facts, Fire-

stone published comparisons showing quality, construction and prices. Then the public came in — made their own comparisons with cross-sections cut from Firestone tires—and from special brand mail order tires and others.

When they saw the facts, they bought more Firestone tires during April, May and June than in any like period in Firestone history.

Drive in today and let us show you these Firestone Extra Values and have your car equipped for Safe, Trouble Free Summer Motoring. We can save you money and serve you better.

## Conoco Passport Holders are on Vacation Highways

THESE motorists have requested and received free 1931 Passports from the Conoco Travel Bureau. In addition more than a million are using Conoco Road Maps. Now they are on the highways of America... fishing in the Minnesota Lakes, viewing new scenes in the Rockies, lazying thru restful days in the Ozarks, exploring historic spots in the East... swimming, golfing ...enjeying vacation time to the utmost.

As these motorists travel the highways Conoco stations will be their stopping places for service and information. These stations are not merely sales points for Conoco Germ Processed Motor Oil, Conoco Ethyl Gasoline and Conoco Balanced Blend Gasoline; each is a field outpost of the Conoco Travel Bureau, rendering many special services, which include:

Local Road Information Hotel Information Mail Forwarding

Fishing Information Package Checking Camp Information Assistance in Obtaining Repairs and Making Necessary Purchases

The Conoco Travel Bureau... maintained by the Continental Oil Company... is the only free national service of its kind. It is the culmination of years of growth of the idea of service to travelers, dating from the earliest days of the oil industry. This free service is at your command, whether you plan a long trip or a short one. Stop at Conoco stations, identified by the Red Triangle; call on Conoco men for service. You'll find each a well-informed friend.
