C. of C. Give Large Sum in Agricultural Contest day and informed us that J. W. after the long serious illness of Rev. G. O. Dean's little girl,

At the regular meeting of the Chamber of Commerce, Tuesday Hart Lumber Co. night it was decided to make up a large sum of cash and give it to the person raising the most cotton on ten acres. There was a committee of three appointed to secure the donation, form the plans and see about the judges. On this committee were R. L. Brown, J. E. Aldridge and Taylor White.

Many of our farmers planted their best cotton here about the 15th, of June last year. So it is not to late to enter the cotton contest and win the handsome prize. There is also plenty of Pleasant Valley Vote good cotton seed here and you will not have any trouble in securing your seed. Make up your mind and enter the contest on section 13 will hold an election and win the big money.

scarce in the old cotton districts. of section 13. It has rained so much the worms to make the cotton. So the time school starts this fall. HEART OF THE STONE

By DON MARK LEMON

(© by Short Story Pub. Co.)

N GOD'S name, sign the passport and let me go! "Pardon, monsieur: my signature will not make good the

passport. Monsieur must a new passport obtain from his legate." "A new one! It will take hours-

days-to do that, and he will be out of my reach by morning."

"Monsieur, it is the law."

"The law! Shall this man be allowed to rob me of my dearest possession, while the law binds me here hand and foot? Must I delay for a needless sheet of paper while every minute takes him nearer the sea coast and farther from me? Can't you see my cause is honest?"

"Pardon, monsieur; if the gentleman has robbed you, it is best for you to wait here and let the law-the officials, monsieur-seek him."

"The law again!" "Yes, monsieur."

"Then I have lost her forever!" The traveler, who for some ten minutes had been pleading with the courteous official to honor his expired passport and allow him to cross from France into Spain, sank down upon a chair in the private quarters of the French railway station and buried his face in his hands.

"Lost her, monsieur?" the official questioned, with a new show of interest, "x it a lady?"

"Yes!" the other groaned. "He has robbed me of my wife!"

"And the lady?" "Is with him."

"Pardon again, monsieur; the gentleman you seek journeyed alone. Ah, monsieur is mistaken! He need not despair! Take courage! The gentleman journeyed alone!"

"No, I say. She is with him-and as helpless as the dead."

"Monsieur!" "I say, yes-she is with him."

"In spirit, monsieur?" "In body."

"Will monsieur explain to the officials how the gentleman has robbed him of his wife? We have the telegraph and may the gentleman detain how the gentleman was not accompanied by a lady, nor by a servant at- apparel. tended."

"The lady is dead!" came the amazing reply.

"Dead, monsieur!" exclaimed the sanity seemed to strike the Frenchman and he looked about uneasily. "Will monsieur read to pass the time?" he questioned.

"Read!" The American traveler laughed an unpleasant laugh. Then his smothered impatience broke out. "Can't I follow him on foot without a passport?"

"No, monsieur; not into territory Spanish."

'May death stop him then!" the other cried with unlifted hands.

The Frenchman's suspicions deepened: but, courteous even to a madman, he only begged the other to have patience.

"Yes, I know that you think I rave," the American broke in, passionately; "and you would think me mad if I told you the whole truth. Yet I say he has robbed me of my wife and she is with him in person. You, yourself, saw her."

"Pardon, monsieur; I saw her not." "Did he not wear a great diamond upon his hand?"

"Monsieur is right." "Then-"

"It was a pool of light, monsieur." continued the Frenchman. "Ah, it is monsieur's jewel, and so lovely that he calls it his wife!"

"It is my wife!" came the amazing reply.

There is the telegraph, monsieur, and the officials. Let monsieur have the gentleman detained." "I fear to act so," the other an-

swered. "This diamond might tempt some high Spanish official, or the king of Spain himself."

The Frenchman expostulated.

"I mean it-every word. Has it not tempted my dearest friend to rob me? No, no! I must follow him and get the jewel back without any learning of its lovely nature."

"But I, monsleur?" the other questioned, with a bow.

"I can trust in you." replied the American, politely.

"Ah!" The official glowed with the high compliment.

"But what is to be done?"

"Monsieur, let me think." The Frenchman began to pace back and forth the length of his private quarters, now tugging nervously at his beard, now excitedly gesticulating to himself. "Ab, monsieur!" he finally exclaimed coming to a standstill before the American; "the next train comes not till morning; you must a new passport obtain; it will take-I cannot tell monsieur how many hours. I despair!"

A groun arose to the lips of the merican, but was stifled by the sudclanging of a bell, a hiss of esig steam and the rumble of car s without. Both men rushed to oor and out upon the platform. gine with three passenger ttached drew into the stathe wrong direction and

wrong? The men were soon to learn, Two coaches from the rear of the train which had drawn out of the station about helf an hour before had broken from their couplings and been wrecked and a high French official being among the number injured, the engineer had reversed his engine and returned for surgical aid into French territory.

Despite the tragic nature of this return, the American gave a cry of joy and began searching among the passengers for the fugitive—the false friend who had robbed him of his

That friend was not to be found among the living, nor among the injured, and four of the five dead had already been removed from the rear coach to the station! Would the fifth and last corpse be that of the fugitive?

Brushing by the porters, the American leaped to where the fifth dead body lay, crushed and mangled past recognition save by its clothing, andyes, the great white Polar star-like diamond that flamed upon a finger of its bloodless hand!

Tearing the splendid jewel away, the American brought it passionately to his lips and murmured: "Darling, lock up! I am here!"

"Will monsieur show me the ring?" the French station official questioned, when again in his private quarters alone with the American.

The latter drew the jewel from his breast and handed it with a powerful magnifying glass to the Frenchman. "Look at the heart of the stone through the glass," he said, softly.

The official did as he was bidden and a cry of astonishment escaped

"Monsieur, it is divine!"

"Divine! It is the work of God himself! Is not he an artist?"

The Frenchman turned again to the diamond in the ring and for fully five minutes gave it his unbroken attention, scarcely breathing, as if he trembled to dim for a moment the magnifying glass or the limpid gem beneath. And well might the jewel hold his gaze, for in the heart of the perfect forty-carat stone, attired in simple Grecian costume, with a red rose in the dark hair, lay in repose the minute, exquisite figure of a woman. The human eyes were half-veiled, the lips lightly parted with a smile, the cheeks taking their color it seemed from the rose twined low in the dark hair, and the forehead and breast like glowing ivory. The lovely face, too, caught an added toyeliness from its exquisite before he reaches the sea coast. But minuteness, and the contour of the if monsieur will listen, he will learn perfectly formed body and limbs showed lifelike through the delicate

> And now, as the hand that held the stone trembled, and rich purple and erange lights played over the surface of the diamond, or, stabbing deeper, bathed those delicate limbs in prismatic fire, it seemed indeed that the ideal had wrought a perfect work.

"Monsieur, she?" "Is human."

"Ah !"

"Yes-and once a divine and stately woman." "Monsieur, how?"

"She was my bride, and, as she reclined one day within a large artificial crystal, diamond-shaped-we were rehearsing for an entertainment in which she was to appear as the spirit of the diamond-as she reclined in the attitude which she now keeps. somehow-I don't know exactly how, but I think that the crystal in which she was imprisoned had been made of an unknown sand with some strange inherent quality-somehow a bolt of lightning leaped out of the clear sky, that mysterious crystal seemed to draw down upon itself all the electricity in heaven, and when I found my sight again this diamond lay at my feet."

"And, monsieur, this is your bride?" "Yes, yes!" A great passion shook the speaker and his voice broke painfully. "The force of the lightning compressed that crystal and her sweet body into what you see-into ultimate form."

Once more the Frenchman gazed for a while into the heart of the lovely stone, then, holding the ring tenderly in the hollow of his hand, returned it to the American.

"Monsieur, it is a jewel for a deity." The other finally said: "She is not dead to me, and while I thus have her with me I care not what I suffer."

He took the ring from the hollow of his hand and was about to place it upon his finger-the diamond-when the lovely jewel slipped from his hold and fell to the floor. As it came in contact with the hard tiles, there was a slight explosive sound and a shower of minute scintillating particles seemed to burst from the ring itself

and scatter like dust on the air. With a cry of horror, the American stooped and snatched up the ring. The diamond was gone utterly from its

setting! That lovely figure in the heart of the stone had been a center of weakness, like a carbon spot in a natural diamond, and, upon coming into sharp contact with the flooring, the stone had exploded, exactly as a Prince Rupert's drop does when the end is broken away.

"My God!" The words were a shriek, and the American staggered back against the wall, his face drawn with unspeakable

"Monsieur! Monsieur! Monsieur!" The American's right hand made a quick backward movement.

"She never died till now!" he cried: "Oh, my God!"

There was a glint of steel, a sharp report, and, as the Frenchman rushed forward, the other pitched headlong Ticial time. What was at his feet, dead!

THE SORCERESS SYNOPSIS .- Kate Cathrew, "Cat-

SYNOPSIS.—Kate Cathrew, "Cattle Kate," owner of the Sky Line ranch, on her way to McKane's store at Cordova, seemingly infuriated by the sight of a girl plowing in a valley below, places a rifle bullet near the horses' feet. The girl takes no notice. Kate goes on to town, where her presence brings on a fight between McKane, the trader, and Sheriff Selwood, Nance Allison, the girl on whom Kate Cathrew had vented her spite, is with her widowed mother and crippled brother Bud farming land taken up by her father, killed a short time before in a mysterious accident. Bud is the victim of a deliberate scheme to maim or kill him. Kate Cathrew wants the farm for pasture land, and is trying to frighten the Allisons into leaving. Big Basford, Sky Line rider, desperately, in love with leaving. Big Basford, Sky Line rider, desperately in love with Kate, picks a quarrel with a fellow rider, Rod Stone Kate, to part them, lashes Basford across the face with a quirt. Name discovers in a cave a fine collie dog, evident-ly guarding a child. She goes home mystified. Next day Nance returns to the cave with food and makes friends with the dog and the small boy, Sonny.

CHAPTER V-Continued

too," said the child horse. He's a big horse. Brand has got to swing me pretty high to get me When we ride-"

But again some inner warning stopped him, some stern habit closed his mouth

Nance held out a hand.

And so it was that after a while Blue Stone canyon saw the miracle of friendship grow like a magic flower in its pale light, for the girl talked low and sweetly to the child in her lapand strangest of all, the savage collle sat gravely on his plumy tail beside the two, accepting the turn of fate.

When Nance made ready to go away at noon she knew that Brand was coming at night, that these two had always ridden on Diamond, and that they would ride again some day, while Dirk, the collie, would run beside them. She knew that Brand was always gone in daylight, and that the cave by the rock below was home.

But that was all she dld know, or could find out, except that the child's name was Sonny and that he was Perhaps it was due to the fact that

she had inadvertently called him that, that she owed the success of the hour Be that is it may, the yearning pity which she felt made Nance use the last

and greatest of feminine wiles to win "I'm going away now," she said smil-

ing into the grave brown eyes in the little face, "but if you'll kiss me and won't tell Brand a thing about me, I'll come again tomorrow-and I'll bring you some more goodies. How about

The promise, the kiss-these completed the downfall of the lonely waif. and Nance's heart ached anew at the pathetic grip of the weazened arms about her neck.

From the far bend she looked backand this time it was to see the two strange denizens of Blue Stone canyon watching her in the babitual repression and silence of their unnatural lives, but withal so hungrily that the mist swam in her eyes again.

"What'd you find, Nance?" Bud queried when she rode in at home.

"I found a mystery I'm going to unravel," she answered grimly, "or my name's not Nance Allison—and I made love to a half-starved little kid-and got all chewed up by a dog-and I heard of a man who's going to get a plece of my mind some day-now.

"Land sake!" said Mrs. Allison in the doorway, "what are they-camp- mer."

"No-and it looks mighty mysterious to me, Mammy. As soon's Bud puts Buckskin away I'll tell you all about

CHAPTER VI

Shadows in the Sheriff's Glass. The sheriff went back to the store at Cordova and looked the proprietor in

"McKane," he said, "Is there anything you want to say to me?" McKane looked at him sullenly.

"Don't know's there is," he answered frankly, "you're able to answer it if I have, I find. I didn't wake up for two hours after you left that day."

"I'm sorry," said Price Selwood earnestly, "but you know you run against my fist yourself. I'd never mess up with a friend if I didn't have to. You'd ought to know me well enough to know

"I guess I do-but that d-d sneering threat of yours, Price-it just set me to seeing red. You don't seem to know a woman from a man, somehow." There was a petulant complaint in his voice.

"Not when the woman's Kate Cath-rew," said the sheriff grimly, "I don't." "You're a good sheriff, Price, and a good man, but you're stupid as h-! 1 Miss Cathrew un

together the worst set of off-scourings this country ever saw? Why do they obey her lightest word, step lively when she speaks in that high-andmighty tone of hers? Tell me that. It ain't natural-not by a long shot. And here's another thing-a good twothirds of them ain't cattlemen. Never were. I know that every new one, as he has come in from time to time during these past three or four years, has had to be taught the cattle business. Caldwell, her foreman, is a cowhandhe came from Texas-and so is that long black devil they call Sud Provine, and one or two others, but the rest are city products, or I'm a liar-and why does she want that kind? And she keeps a heavy force for the amount of cattle she runs."

McKane spread his hands in eloquent resignation.

"You two-bit officers!" he said, "you make me sick." "Make you sick because you're al-

ready sick for Kate Cathrew-who wouldn't wipe her boots on you, and you know it." "Sure, I know it. But that don't

prevent me taking up for a woman, anywhere, any time." Uncertain of morals and dealings as

the trader was, there was a simple dignity in his words which demanded respect, and they struck Selwood so,

"I'm sorry I can't see Cattle Kate In the proper light. McKane," he sald, "and that we've come to words and

From the Far Bend She Looked Back, and This Time It Was to See the Two Strange Denizens of Blue Canyon Watching Her.

blows over her. Maybe I lack some thing fine which you possess-but she's under my glass, all right, and I'm as sure as I stand here that some day its rays will show her up."

"As what?"

"I'm not saying." "Men have died in their boots for less than that."

"True-but I wo "Maybe not."

"Look here, McKane-don't mess into Kate Cathrew's affairs. I'm giv ing you my hunch that the man who does is due for tragedy sooner or later -and you have no reason, for Kate don't care for you." "No-nor for any other man."

"Wrong," said the sheriff succinctly.

"Eh ?"

"Don't forget the man who comes in once a year-and he's due before so very long again-the man who sends her that regular letter from New York and who comes across the continent to see her?"

"Mr. Lawrence Arnold? Why, he's her business partner-owns a full halfinterest in Sky Line."

you see them together again this sum-"H-1!" said McKane again in that

"Well? You watch Kate's face when

resigned voice, "how'd you ever get yours?"

"Oh-all right. But stay clear of Cattle Kate's fringes-for some day Cathrew's mode of life in her high dothere's going to be the prettiest blow- main. All things were ordered, filed up ever seen in the cattle country of the Deep Heart hills-and Kate's go- was the master. ing mile high on the explosion."

why don't you busy yourself with trying to find out who stole that last bunch of steers from Conlan a month ago? The old man's half crazy with gulf of space between the peaks. Her the loss. Yes-and that ninety head from Bossink-and the ones run off wooded slopes of Mystery slanting be-Jermyn's range last year? It looks neath her to the long green flats on like there's plenty he-man stuff around Nameless, the equally long brown Nameless to Interest your keen powers of perception without picking on a

The sheriff was tying his sack of her to slow and resurgent anger. It purchases on behind his saddle and didn't look round.

"I'll never find those cattle McKane -ner will anyone else-this side of cow-heaven," he said as he mounted, "but they, and their manner of disuppearance, along with a few other things are all under that magnifying glass of mine. I think their ghosts will be in at that blow-up.

"That's rustler talk, Price," said the rader shortly. "Sure," returned Selwood as he rode

That talk set going in the sheriff's aind a train of thought which was reurrent with him, which was forever weling with him somewhere in his

sness. Sometimes one thing set

it going, sometimes another. In the two years already passed of his term of office it had been a matter of deep annoyance to him that he had not been able to put his hands on the mysterious rustlers who from time to time got away with stock up and down Nameless river.

This unseen, baleful agency was baffling as smoke.

It struck here—and there—with a decisive clean stroke like the head of a killing hawk, and there was nothing to show the how and wherefore. Cattle disappeared from the range with a smooth magic which was maddening. They left no trace, nothing. It seemed ridiculous that ninety head of steers could be driven out of the country leaving no trail, but such had been the

Selwood himself, with a picked posse, had trailed them into the river, and there they must have taken to themselves wings, for they had apparently never come out. To be sure Kate Cathrew was driving out her fall beef at the time, and the trampling band had crossed the river a bit below where the ninety head had entered the stream. That trampled crossing was the only spot for miles each way where a cattle-brute could have left the water, for Selwood searched every foot with eagle eyes. The coincidence of time stayed with the sheriff doggedly, even though the Cathrew cattle, honestly branded, went boldly through Cordova and down the Strip, as the narrow valley beside Nameless was called, and thence out to the milroad.

three long days' drive away. And the smaller thefts-old man Conlon's bunch and those of Jermynall lifted light as a feather. These had left not even a hoofmark. It was smooth stuff-and it galled the sheriff. was a secret source of humiliation. He had heard a good many remarks about his own inaction, though nearly all of the ranchers in the country were his

But deep inside himself he laid a spiritual finger on the handsome. frowning-eyed woman at Sky Line and held It there.

Sooner or later, he told himself, as he had told McKane, the steady rays of his searching glass would reveal in her the thing he knew was there.

This was not logic, it was instincta poor thing for a sher!ff to base his actions on, apparently, but Price Sel wood based his thereon in unwavering confidence.

And if he could have looked into the living room at Sky Line that day he would have jotted in his mental note book as correct, one premise-for the mistress sat again at her dark wood desk and read a letter, and her face was well worth watching.

The letter bore a New York postmark, and its terms were sharp and decisive, almost legal, leaving no doub: of their meaning.

Thus they carried to her conscious ness a clear presentment of satisfac tion concerning the last shipment of cattle, and just as clear an avowal of affection.

Kate Cathrew's sharp face was suf fused with a light not meant for any eyes at Sky Line as she read and re read the sheets in her hands.

At their concluding words-"and so think I shall be wifh you at the usuatime"-her lips parted over her teeth in a slow smile which was the visible embodiment of passion, while her dark eyes became for a moment slumbrous with the same surging force.

There was a man this woman loved. if ever a face spoke truth, and he was the writer of the letter.

Though the scattered denizens of the outside world of Nameless knew nothing of this, it was covertly known at Sky Line.

Every one of the hard-eyed band of riders knew it, with varying feelings Minnie Pine knew it and old Josefa. Big Basford knew it and his red rimmed eyes glowed with the light of murder when he watched Kate sit on the veranda with Lawrence Arnold in the long summer days while the light drowsed down from the high blue vault and Rainbow cliff sent down its prismatic colors shining afar over the slopes of Mystery. There was a look in the woman's dusky eyes that was plain as print-the hot, unsmiling, in-

flammable look of untempered passion. Now she folded the letter, slipped it back in its envelope and put it away in a drawer of the desk which she locked elected with those reasoning powers of securely with a key on a ring that shee took from a pocket in her neat outing skirt. The act was indicative of Kate and locked, so to speak, and she alone

A little later she went out on the "If you're so d-d bright as a sheriff broad veranda and sat down in the deep willow chair which rocked there, stirred fantastically by the stiff breeze which swept in across the great blue eyes dropped down and down the spaces of Nance Allison's tilled field. Sight of that field was a barb in her consciousness. It never failed to stir was an affront to her arrogant autoc-

racy, a challenge and taunt. She who hewed to her mark with such brilliant finesse, who had not so far failed to get what she wanted from life, had failed to get those flats. -the best feeding ground for cattle in a hundred miles of range.

Cattle Kate Cathrew frowned as she regarded the tiny brown scar on the her slim muscular fingers on the peeled arm of the hand-made rocker. For half an hour she sat so, her chin on her hand, thinking

called Minule Pine from the inner regions.

"Send me Caldwell," she said briefly, keys."

When presently the foreman cam his hat in his hand, his attitude one of strict attention, she spoke swiftly with a certain satisfaction.

When she had finished, he sald "Sure. It's a pretty long trick, but it can be done."

"Then do it," said Kate Cathrew 'when I give the word. We'll wait s little, however-until the corn shows green from here. The better it looks one day the greater will be the con-

"The devils are working in the Boss' head again," said Minnie Pine, who had listened behind the window, speaking to old Josefa in their polyglot Spanish and Pomo, "and h--l's going to pop for the sun-woman on Nameless."

"How do you know?" asked the accient dame, weaving a basker in dim green grasses.

"Because I heard what she said to Caldwell." "You hear too much. An overloaded

basket-breaks." "Huh," grunted the half-breed, "the

open eye sees game-for its owner's fattening." "What are you two talkin' about?"

asked the slim boy whom Big Basford had so nearly murdered that day on the porch, "always talkin' in that d-d native tongue. Why don't you learn white man's talk, Minnie?" The girl wheeled to him where he

leaned in the kitchen door, and her comely dark face flushed with pleas "Would you like me any better?"

little whiter anyway." There was cruelty in the careless neech and it did not miss its mark though Minnle Pines dark eves gave no sign.

"Sure," he said, "make you seem s

"The young-green-tree-with-the-risingsun-behind it may want to talk the white man's tongue," said old Josefa grimly, "but she's a fool. All halfbreeds are. They reap sorrow."

The boy taughed and his face came the nearest to wholesome youth of any at Sky Line. It still held something of softness, of humorous tolerance and good temper, as if not all its heritage of good intent had been warped away to wickedness.

His blue eyes regarded the big girl with approval, passing over her sleek black hair that shone like a crow's wing, her placid brow and unwavering dark eyes, her high cheeks and repressed thin lips.

"I'll give you a kiss. Minnie." he drawled, "for half that cream ple yon-Minnie looked at the pie and at

Josefa, speaking swiftly. The old woman nodded. "If the mountain-stream wants to

waste itself on the greedy sands" she said, "who am I to counsel otherwise? Yonder is the pie." Minnie crossed the clean white floor

and taking the pie from the window ledge where it sat cooling, divided it neatly. She fixed the two quarters on a plate from the cupboard and adding a fork, carried the whole to the

She was the embodiment of the spirit of womanhood since the world was-selling her service to man for

"Take it. Rod Stone," she said. It was indicative of her race that she did not exact her payment first It was sufficient that she serve. If the white man chose to pay, to keep his word, so much the better.

Stone took the plate and put one arm about the splendid broad shoul-

Bending down he kissed the half breed full on the lips-and for a sec ond the black eyes glowed. Minnie Pine put a hand on his cheek with a caress infinitely soft. "Humph," said Josefa, in English

this time and pointedly, "I, too, have stood in the bend of a man's arm-but mine was a full-blood Pomo. I did not live to cover my head and weep." "Shut up, Josefa." said the boy

laughing again, "neither will Minnie. through me." At that moment the door to the south part of the house opened noiselessly, and Kate Cathrew stood there

scanning the group with her keen "Stone," she said coldly, "Is this the best you can do to earn your wages? Get out with the men-go quick. Minnie, if I see any more of this you'll go back where I got you. Josefa, what's the matter with your rule out here? Do you let all the morning be

wasted without care?" Josefa gazed at her out of old eyes. cain with much looking on life, undisturbed.

"Not always," she answered, "but I too, have been young. Minnle will work better for the kiss."

"Well," said Kate, "you'd better see that she does."

Here's two kinds of love. And it looks as if both would make trouble. What next?

(TO BE CONTINUED.)

Bachelor's Joy "This may seem peculiar," said a

bachelor, "but I haven't a single key among my possessions. I live in a hotel, I have no car, the lock on my suitcuse is broken, the janitor opens the office where I work, and, in fact. I have no occasion, during an entire green bowl so far below and tapped day, to use a key of any description. And when I see some married man who is in business struggling to pick out the right key to fit some of his many holdings, I feel lucky. I really Then at last she straightened and believe my bachelority is compensated in the fact that I don't have to go about carrying several pounds of

SURFACE COOLER IS BEST FOR COOLING

Prompt cooling to 50 degrees Fahrenheit is absolutely essential for producing milk of low bacteria count, warns F. C. Button, professor of dairying at the New Jersey College of Agriculture in New Brunswick.

The quickest and therefore best way of cooling milk is to run it over a surface cooler. On such a cooler the milk passes over the outside surface in a thin layer. Cold water is circulated through the inside and thus chills the milk. By this means the temperature of the milk can be brought within two or three degrees of the temperature of the water. Ice water will be needed in hot weather to bring milk to 50 degrees Fahrenheit.

Morning's milk should be cooled to at least 50 degrees Fahrenheit. Night's milk may, however, be cooled within two or three degrees of the temperature of spring or well water, since it is afterward placed in the cooling tank where further chilling can take place. The water in this vat should not be above 45 degrees.

After mik has been cooled by a surface cooler it can be held at 50 degrees Fahrenheit by placing in the vat two to two and a half pounds of ice for every gallon of milk. If the milk is not pre-cooled before being placed in the vat, four pounds or more of ice are needed to cool each gallon of milk. This pre-cooling will cut in hair the amount of ice required in the tank.

The use of small-top milk pails and clean, sterilized utensils, and the milking of clean, healthy cows help to keep bacteria out of milk. Some always get in, however, and unless the milk is cooled quickly they multiply rapidly. In warm milk bacteria double their number every half-hour. At 50 degrees they reproduce very slowly.

Cows Swallow All Sorts of Dangerous Objects

Cows swallow all sorts of strange things, including clothes off the fence, rags, bones, leather, crockery, bits of metal, pebbles, bark, wood and, unfornately, sharp objects, such as nails, wires, pins, needles, tacks, hairpins and staples. A swallowed sharp object is extremely dangerous. It lodges in the second stomach, is churned about there, at length may work through the stomach wall, pierce the diaphragm and then the sac to the heart. If that happens incurable and often fatal inflammation of the sac

results; causing a disease of the heart

called traumatic pericarditis. Wires that fasten labels to feed sacks are a real menace. Shingle nails have caused many losses. The practical farmer makes it a habit to dispose of every sharp object he sees where it can do no harm. Punctures of the hoof often end in fatal lockjaw, horses being the commonest sufferers. People may contract the disease in the same way. A dairyman of my acquaintance used a wire brush to scrub the cow mangers. Wires fell out and got into the feed. Seven fine cows died .- Dr. A. S. Alexander, Wis consin.

Various Roots Are Good

Feed for the Dairy Cow

Roots of all kinds are good feed for dairy cows. Beets are especially valuable, for they not only supply nutrients in a good form, but they do not in any way affect the quality of milk. Rutabagas and turnips do affect the quality of milk, and especially if fed just before milking. If they are fed after milking, it is difficult to discern any flavor in the milk, but butter made from it will, upon standing a few weeks or months, develop an objectionable flavor. This has led some creameries producing high-quality butter to request their patrons not to feed turnips or futabagas.

\$0\$0\$0\$0\$0\$0\$0\$0\$0\$0\$0\$0\$0\$0

Dairy Notes

Cows do not enjoy moldy silage, and it makes horses sick.

Feeding minerals to dairy cows is relatively new, and we have not learned about it yet.

Clean the barn lots and dairy premises and haul off litter in order to destroy breeding places for flies.

The choice of a herd sire may make or break a man in the dairy business, say dairy specialists of the Pennsylvania State college. The future herd is dependent upon influences in operation now.

Remove the cows from pastures in-

fested with wild onions and bitter

weeds three hours before milking, to

prevent bad odors and flavors to milk and cream. Seed or sod the pastures with Beranuda, lespedeza or other desirable

grasses. Native pasture grasses can-

not be depended on.

The good cow shows femininity in conduct, in disposition and in expre

THIS WOMAN'S RECOVERY

Entirely Due To Lydia E. Pinkham's Vegetable Compound

Forest City, Iowa. — "My first child fived only a short time and I was sick for a year after.
When I bent over and raised myself up again I could alup again I could almost scream with pain in my back. One day I was so bad that I had to leave my washing and get ready to go to the doctor. He gave me medicine but it did no more good than no more good than if I drank just water.

Once when we had been in town a little book telling about Lydia E. Pinkham's Vegetable Compound was left in our car. Vegetable Compound was left in our car. I have taken five bottles of the Vegetable Compound now and I do all my housework and help with the milking and taking care of chickens and garden. Besides I have a fine baby girl eight months old, just the picture of health and I am feeling fine myself. You may use this letter as a testimonial and I will answer any letters asking about the Vegetable Compound."—Mrs. OSCAR F. BORGELIN, Route No. 5. Forest City. Iowa. 5. Forest City, Iowa. Lydia E. Pinkham's Vegetable Com-pound is for sale by all druggists.

Buying Art Works

It is not surprising that an occasional protest appears against the sales of English works of art to Americans when it is realized how many of the treasures of the Old World find their way across the Atlantic. During the last two years the sales of works of art to American purchasers in London have reached the huge sum of \$10,000,000 annually. It is a compliment to American taste in art that the demand seems to be increasing, and it is usually an American bidder who has the last word before the fall of the

English Private Hotels

Front doors of private hotels in England are kept locked and only opened on demand, and meals are served in the guests' rooms.

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instanty that corn stops hurting, then short-

ly you lift it right off with fingers. Your druggist sells a tiny bottle of 'Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Contracted Cold at a Billy Sunday Revival

Developed Into Systemic Catarrh Recommends PE-RU-NA

Mr. A. R. Wilson, LaFollette, Tenn.

The letter written a short time ago by Mr. A. R. Wilson of LaFollette, Tenn., brings some more direct evi-dence of the value of Pe-ru-na in the treatment of catarrhal diseases.

It reads as follows :- "While attend-It reads as follows:—"While attending Billy Sunday's great revival at Knoxville, Tenn., last February I contracted a cold which weakened my entire system. I have taken only three bottles of Pe-ru-na and feel like a new man. It is a great system builder as well as a great catarrh remedy."

To attempt to even estimate the thousands who, in the last half century, have come to know and appreciate the merits of Pe-ru-na would be worse than useless. The number is astonishing and increasing daily.

Your nearest dealer has Pe-ru-na in both tablet and liquid form. Insist upon having Pe-ru-na, the original treatment for catarrh.

Engagement Ring Is Gift

younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them.

Value of Crops. and Live Stock

Weighted Prices Have Been Used in Estimating Worth of Product.

(Prepared by the United States Department of Agriculture.)

The combined value of crop and live stock production in the United States last year was \$12,404,000,000, which was \$56,000,000 more than in 1923 when the total value was \$12,348,000,-000, according to estimates by the United States Department of Agricul-

The higher figures for last year are over the preceding year, inasmuch as shows a decline.

of \$11,404,000,000 compared with \$10,-401 000,000 in 1923, but of this value some \$4,951,000,000 worth of crops were fed to live stock whereas in 1923 the value of crops fed to live stock was \$4,286,000,000.

Live stock and live stock products are given a farm value of \$5,951,000,-000 compared with \$6,233,000,000 the preceding year, nearly all animal products having decreased in value.

Weighted prices have been used in estimating the value of nearly every plowing, use the wheel hoe and then crop and animal product, so that the figures are more nearly representative be eliminated. of the prices that farmers received than in previous years when the figures were based mostly on December 1 prices. The department points out also that the gross value of either crops or animal products last year was exceeded only in the years 1917 to 1920 inclusive.

The value of the cereal crops in 1924 was \$5,220,000,000 or 45.8 per cent of the total of all crops, as compared with \$4.138,000,000 in 1923 or 39.8 per cent of the value of all crops in that year. Every cereal crop increased in value last year.

The value of the corn crop last year Is placed at \$2,890,000,000 as compared with \$743,000,000 and oats \$799,000,000 compared with \$554,000,000.

The cotton crop, including lint and seed, is valued at \$1,701,000,000 tast year compared with \$1,657,000,000 in 1923. This increased value was due to larger production inasmuch as the average price per pound of cotton lint was lower than for the preceding year.

Hay and forage crops are given a value of \$1,733,000,000 compared with \$1,619,000,000 in 1923; the fruit crops \$626,000,000 compared with \$642,000,-000; vegetables \$1.018.000,000 compared with \$1,169,000,000.

Nearly all animal products declined in value as compared v h 1923; the value of dairy products being \$2.586, 000,000 against \$2,652.000,000 the preceding year; animals raised \$2.267.000, 000 compared with \$2,440,000.000, and poultry products \$994,000,000 compared with \$1,038,000,000.

Brood for Bee Colony

Peaches, plums and some other fruit trees are furnishing enough nectar to stimulate the bees to brood rearing, and each stand of bees should have two or three frames of brood. if good queen is present. It takes good deal of honey to feed this brood see that the bees have enough of they will dwindle away. The secret of making a big surplus of honey lies in having your colony strong and full of bees before the main honey flow

Plant good seed and reap more than you sow.

Sweet clover pastures are excellent for all classes of stock.

Alfalfa gives the best results when allowed to stand three to five years.

If your garden has no great length or breadth, remember that its height is infinite.

Remember that sweet clover hay properly made is as high in protein as alfalfa.

It is well to ask people to help with that community enterprise, they like to be useful.

Just as a certified check is a guaranteed check, so certified seed are guaranteed seed.

There is no short cut to ease in farming; but there are ways of making farming easier.

Wherever farmers get together and really co-operate they help to make farming a business and not a gamble.

More than 60 per cent of farm grown feeds are marketed through live stock. A scrub cow is a poor market for this feed, while a good cow has no superior as such market.

Treating oats with formaldehyde to prevent smut will not kill the germinating power of the oats, if one pint of fermaldehyde to five gallons of water for 50 bushels of oats is used.

Results that here been secured with the yellow bie vial sweet clover are advantages in the early lamb. On the causing large numbers of farmers to other hand, there are some things in favor of having them dropped later tations to produce hay and pasture.

Weeds Rob Gardens of Food and Water

Plants Should Be Controlled for Good Crop.

Weeds are persevering thieves. They are at work continuously and rob the garden of sunlight, plant food and moisture which are most essential to the growth of cultivated vegetables. They should be controlled to have a successful garden.

"Succulent, tender vegetables can be grown only in the presence of the maximum amount of moisture, light and plant food," says Glenn O. Randall, extension horticulturist for the North Carolina State college extendue to the increased value of crops sion service. "For the home gardener to get the most profitable returns from the value of live stock production his efforts, therefore, he must make these conditions favorable and he cer-Crop production had a farm value tainly should not allow weeds to take charge.

"Many gardeners allow their enthusiasm for the plot to lag when the weather gets hot and the weeds begin to grow. It is possible to have plenty of vegetables in mid-summer and late in the season but the weeds must be controlled. This can be done if the garden is laid out in long rows with plenty of space between each row so that horse cultivation may be given. If the area is too small for regular a large amount of hand hoeing may

"The destruction of weeds is the most important object of cultivationmore important than maintaining a mulch. This has been proven by several experiments, notably one with corn which showed, as a result of sixteen tests, that killing weeds produced a gain of 17.1 bushels per acre. However, vegetable crops are benefited by frequent, shallow cultivation and when this is done so as to keep the weeds in check, the garden will be most profitable. It costs money to neglect the home garden.

Average Cost of Fig at Weaning Time Will Vary

Records kept by Pennsylvania farmers show that during the past three years the average cost of a pig at weaning time has varied from \$4.06 to \$5.75. Twelve Lancaster county (Pennsylvania) farmers kept cost of production records for 43 sows in cooperation with the extension department of the Pennsylvania State college. The sows averaged slightly more than nine pigs each in farrowing and raised slightly under seven each. Costs on the fall pigs were lighter than on spring-farrowed pigs. For the three seasons of 1921, 1922 and 1923, the costs on fall pigs were \$4.43, \$4.06 and \$4.57. For the spring seasons of 1922 and 1923 the costs were \$5.06 and \$5.75 per pig.

As a result of the study the Pennsylvania extension department issues the following summary of the cost of caring for a brood sow raising 7.3

Substitute for Pasture

The silo is the best known substitute for pasture, and where land is valued at more than \$100 per acre, very few acres should be devoted to pasture, for this same land put into good corn and that put in the silo would produce six to seven times more feed than if it is left in pasture, writes A. L. Haecker in the Iowa Homestead. From my experience I would prefer a silo in summer to one in winter if I could have but one, but a winter and summer silo makes on the average stock farm by far the most economic feeding arrangement.

Plan for Docking Lambs

All lambs' should be docked at one to two weeks old. Docking is best done with a beated pair of pinchers, or it may be done with a sharp knife and the wound disinfected with a mild disinfectant solution. Ram lambs that are to be marketed as feeder or fat lambs should be castrated at three to six weeks old. They should not be allowed to go longer than this or there may be some loss as a result of cas

Plan to Destroy Lice

A simple plan to destroy lice that has been used for years with the best of success is to soak a pack of tobacco stems in a barrel of cold soft water for a few days. With this solution wash the animals affected with lice thoroughly all over and about two or three days later repeat the dose all over again. It is very seldom that two doses do not clearse the animal of lice completely. Use cold water to soak the stems.

Raising Lambs for Market Whether It is best to have the lambs come early or late will depend upon circumstances and conditions. The man who raises pure-bred sheep to sell has already been accomplished. as breeding stock will almost always find the early lambs more profitable, on account of greater size. In producing market lambs there are some when the ewes are on pasture.

Vitamins Grown in Our Gardens

Advantages of Vegetables for Family Needs and Likes Are Many.

(Prepared by the United States Department of Agriculture.) Closely associated in our minds with the vitamins they supply are the vegetables that can be grown in almost any home garden-spinach, cabbage, lettuce, carrots, string beans, peas, rutabagas, tomatoes, all the leafy vegetables known as "greens," and many others. We also obtain necessary minerals from these vegetables-iron, calcium, phosphorus-and depend on them for bulk, or "roughage." But our first thought is apt to be-vegetables for vitamins!

Advantages of Vitamins.

The advantages of growing vitamins in our gardens are many and obvious. To begin with, there is the matter of freshness. No matter how near the market may be to the home, it is usually a long way from the farmer who produced the vegetables. Garden products that have been carried over a dusty road, and perhaps exposed for hours before they were sold, cannot be compared in desirability of flavor or condition with those just off the vine or out of the earth. The vitamin content of vegetables is also dependent to some extent upon freshness.

Again, when the vegetables are actually at hand in the garden, waiting to be gathered, the chances are that they will be used oftener, and in larger quantities, than when some one has to go to a store to get them. The price often influences the quantity bought when the housekeeper goes to market, but when she steps into her garden she is apt to bring in as much as she believes her family will consume.

The convenience of having a garden frequently leads to a beneficial change in the proportions of the family diet. Vegetables are served more abundantly because they are available, and they satisfy the craying for bulk, lessening the desire for other foods which may lack the necessary vitamins. Almost automatically the garden tends to increase the use of vegetables.

The garden must, of course, be carefully planned so that it will yield an adequate supply of the kinds of vegetables the family likes and needs, both for table use and for canning or storing. If some sort of record is kept from one year to the next to show the quantity of each vegetable grown and the use made of it, a garden budget can be eventually worked

Fruits Are Important.

Fresh fruits are also important sources of vitamins, and should be considered in connection with the garden plan. Many orchard fruits and berries grow well in all sections of the country, and others are best suited to certain localities. While the citrus fruits-oranges, lemons, grapefruitare among the best sources of vitamins, Tomatoes are comparable with citrus fruits as sources of vitamins. and when the latter are lacking, tomato juice, either fresh or canned, may be used instead. It goes without saying, therefore, that it is a good thing to include tomatoes in every garden plan.

Successful farming is planned; it doesn't just happen.

Don't be afraid to try something new this year, but don't try it too hard.

Sow celery seed for winter celery, and sow cabbage seed for late crop.

Heavy feeding and no exercise on Sunday is equally bad for horses and

Farming may not be financially so profitable but there is a "heap o' living" in it.

Better seed and better machinery are not expenses; they are productive investments

Peat is far more valuable as a place for crops to grow than as a fertilizer for upland soils.

Long rows in gardens are best. Beds suffer more from drought and are harder to cultivate. No vegetable is easier taken care of

upon it than asparagus Fertilizers are plant food, not merely stimulants, and should be given in properly balanced rations.

or returns more for the labor expended

Well made soy bean hay has about the same feeding value as alfalfa hay and one or the other should be used whenever possible.

By scientific seed breeding and selection the returns of the farmer's investment and expense can be increased more than in any other way. Much

The crop season usually demands more time than is available. Farm labor can be utilized best when definite plans are made for its use. A definite pla should be in mind for the work to be done on rainy days or during wet

Choice of Tractor Depends on Needs

Several Suggestions Made to Use as a Guide.

Before buying a tractor most farmers want to know what kind will meet the need of their farms. Because of frequent requests from farmers for help in this matter the engineering staff at the New Jersey State College of Agriculture, New Brunswick, has drawn up a group of suggestions which may be used as a guide to prospective buyers

1. Choose from the ranks of those which have been tried by years of use, from the manufacturer who has a local representative with a stock of repair parts near at hand.

2. A reasonable amount of service should go with a machine of this type. See if your agent is in the habit of following up his sales to see that he has satisfied customers.

3. A belt pulley controlled by a friction clutch is usually desired. Study the size and location of this pulley. 4. A mechanical governor is very desirable for belt work.

5. At the present price of gasoline it is economical to have a tractor that will operate successfully on kerosene at any load.

6. An air cleaner is essential to long life of the engine if used in dusty fields. 7. A magneto with an impulse

starter provides as nearly as possible sure ignition and ease and safety in cranking. 8. It is very important to see that

the tractor hitch and implement hitch are suited to each other in height and lateral adjustment. 9. Most working parts should be in-

closed, and run in oil. 10. A tractor pulling a two-bottom plow would suit most New Jersey farms on which a tractor can be profitably used. Some might need a threebottom outfit. Only a few would require a larger one.

'Flushing" Recommended for the Breeding Ewes

Preparation for breeding is the beginning of the direct work for the harvest of lambs hoped for the next spring. The period of gestation in sheep is 147 to 150 days. The mating, therefore, should begin practically five months before the first lambs are wanted. The ewes should be gaining in condition at the time of mating. Such a condition will cause more of the ewes to come in heat quickly and to settle at the first mating, as well as a larger number of twin lambs. Changing the ewes to especially good pasture or giving a little extra feed beginning ten days before the breeding season, will serve to bring about this desired condition. This extra feeding whether from extra pasture or additional feed given, is called "flushing." It has been recommended and followed by successful shepherds for generations and carefully controlled experiments have proved that good results do follow the practice. Trim off the excess wool around dock of all ewes. Neglecting to do this is often the cause of many ewes failing to get with lamb

Rape on Sour Soils

When land is too sour to grow clover or alfalfa, one of the best forage crops for hogs that can be grown is rape. While rape will grow on poor sour soils, it will not grow as much forage as it will on good sweet rich land; but it will most likely pay to grow some of it for hogs. It would probably make more growth if you would plow the land first, and then work it down well with a disk before sowing the rape.

Clover Improves Soil

Sweet clover is a very good crop to mprove the land. That is, where sweet clover grows well. It will not do well on acid or sour soil unless the soil is limed. Better crops of grain or corn can be expected after a good crop of sweet clover. It is not difficult to get rid of sweet clover. Buckwheat is a good crop to plow under to improve the soil, but not nearly so good as sweet clover because It is not a legume.

Pears Gaining in Favor

Pears are now a year-around fruit in the market and growing slowly in favor as a fresh fruit while their popularity as a canned fruit for use in various desserts is increasing steadily. The pear has an interesting history as it invaded the United States from the northeast and southwest corners of the country in the days of the early

Get Chicks on Ground

Get the chicks out on the ground as soon as you can. Even while the weather is cool, let them have access to the grass and ground, but provide a runway so they can hurry back to the brooder stove when they get cold. Chicks will come to the heat when necessary if the runway is opened for

Collecting Broomsticks

This is a good time to start cohecting broomsticks from all your neighbors. They are ideal stakes for heavygrowing plants. Grab anything that looks like a neat stake and store it. for stakes never come amiss in the growing season and usually there is a dearth of them when they are most needed. Stout stakes for tomatoes will be needed.

Novelty, to Be Sure

Helen had spent the morning in the dentist's chair. Doctor Dentist had kept her mouth open for so long that when the child tried to relax her facial muscles she found it extremely difficult.

"Doctor," said Helen, "my mouth feels so stretched I feel like I could hisper in my own ear."

DAILY CARE OF LINOLEUM IS IMPORTANT

Linoleum Is Easy to Keep Clean.

(Prepared by the United States Department | with a cloth wrung out of suds made of Agriculture.)

The housekeeper who planned this interesting method of installing a sink in one corner of a large kitchen table, has three tables, as well as the kitchen floor, all covered with linoleum on which spar varnish has been used to make it more resistant to water, heat, injure linoleum and should never be soap and grease. Extension workers have long been advocating the use of linoleum, treated in this way, as a permanent finish for kitchen tables, to remove any trace of the water in because it is so easy to keep clean.

Special attention should be given to the daily care of linoleum floor coverings, says the United States Department of Agriculture. If not given a ing a wide bearing surface and no special finish linoleum should be swept with a soft brush and dusted with an across linoleum the added precaution oiled or dry mon. Occasionally it should be taken to place an old rug should be cleaned more thoroughly or carpet under them.

These rilky, cotton fabrics are made in fast colors and do not lose their luster with tubbing. There is no end to the variety in color combinations Be that as it may, the authentic model, but stripes in a single color on a white, or very light ground, appear to be most of Paris, abounds in inspiring suggespopular for the younger girls while tions. Crepe georgette was selected for more decided and bolder color con. the fashioning of this lovely robe and trasts are chosen for older ones.

Of course the groom does not think so, but those who come to behold and to "take notes" realize that though se be in glimmering satin and

frocks the ever picturesque flower girl to look every inch the part. We in America require some readjustment in our minds to consider other than a very little girl to serve as flower girl. the rose motifs are all handmade out of vari-tinted pastel taffeta. Such a frock, made of organdle or voile, would serve admirably later an as a party dress for her youthful tadyship.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no

harmful or habit producing drugs.
Such a medicine is Dr. Kilmer's Swamp-Root, kidney liver and bladder medicine. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs. It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sa's at all drug stores in bottles of two sizes, medium and large However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a When writing be sure sample bottle. and mention this paper.

Ship Without a Rivet

An oil tanker in one piece, without rivet in its hull plates or a bolt in its steel frame, the first one ever built in the United States by the electric welding method, was launched recently in Providence, R. I., says Popular Science Monthly. Terrific heat generated by electricity fused together the sheets of steel and heavy angle iron in the tanker's frame.

Let Tanlac restore your health

TF your body is all fagged-out and run-down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into

"Typhoid fever reduced me to 95 lbs. and left me weak as a rag. Failing to get relief as a rag. Failing to get relief from other sources I tried Tanlac and after 6 bottles had gained 20 lbs. Now I eajoy a fine appetite and feel like a new woman. As a nurse I give Tanlac to all my patients."

Mrs. J. B. Terry,
1101 ParkSt., Ft. Worth, Tex.
