

# MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, OCTOBER 28, 1937

VOLUME 15 NUMBER 40

## MULESHOE WINS OVER AMHERST FRIDAY, 26 TO 0

### Play Powerful Sudan Team At Sudan Friday P. M.

Muleshoe High School yellow jackets defeated the Amherst football squad in a snappy, yet rather one-sided game played here last Friday in a score of 26 to 0.

The game was replete with good plays of an interesting nature and hotly contested throughout. The local lads were perhaps a few pounds heavier than their rivals, but the visiting team did some good aerial work highly commendable.

Delbert Parsons scored the first touchdowns for the Yellowjackets; but interference on the part of opponents obviated the goal kick which followed. Woodie Lambert made a pair of touchdowns, Frank Prescott kicking goal, then Don Moore made the last touchdown. Prescott again booting the pigskin over the line between goal posts.

Many fans present remarked regarding the much better playing done by the locals, especially during the last half of the set-to, when they held their rivals in practically every play. Horace McAdams and Geo. Hill deserve commendation for outstanding playing, especially of a scrimmage nature, while good support of plays was rendered by all members of the team. Coach Stevens also played all his substitutes before the game ended.

Pep squads for both teams were present in full array of dress colors and proverbial yells to encourage their respective team players. The Amherst girls put on a display march between halves greatly appreciated. Excellent sportsmanship between teams was shown throughout the entire game. Prof. Glen Daugherty, Bula, was referee.

Much regret is expressed over the injury a fractured bone received by one of the visiting players in one of the pile-ups. Apparently, it was unavoidable—just one of the bad "breaks" that come occasionally in such games. Nevertheless, the injury is regretted by both officials and players.

Muleshoe lads go to Sudan Friday of this week to mix it with the western Lamb county team. Just how the game may turn out is anybody's guess. Sudan has a hefty bunch, its center reported weighing 220 pounds, a couple of "moon fixers" who can reach up into the stary heavens for passes, and plenty other beefsteak among its players. However, encouraged with the victory of last Friday plus the added training and work-outs being given the lads this week, Coach Stevens feels confident of bringing back home the long end of the score.

### NEW BUS ROUTES PROPOSED

Application for bus and freight truck routes from Muleshoe to Canyon, Baileyboro, Enoch and on to Morton have been made to the State Railroad Commission by the Bowman Bus Co. and Garrison Truck Lines Co., Lubbuck, the same having been endorsed by the Muleshoe Chamber of Commerce.

While they did not come up for hearing at the meeting of the Commission last week, yet it is anticipated they will be given a hearing in the near future.

## 25 DIFFERENT MAKES OF AUTOMOBILES FORDS AND CHEV. VIE FOR LEADERS REGISTERED UP TO DATE IN BAILEY CO.

The automobile business, like that of the bank or post office, is frequently taken as an index of the general business prosperity of a given section, and is generally quite correct. While the Journal is not at liberty to publish the number of cars sold by Bailey county dealers, since there are only two different car agencies in the county, yet it can say that sales this year have been much heavier than during 1936, and with new models now coming out, heavy buying is anticipated during the coming weeks and months remaining of 1937.

People frequently wonder just how many cars, and how many of the different makes there are in a given county, and a representative of this newspaper actually made the count according to the records being kept at the tax collector's office in Muleshoe, finding there were 255 different kinds of passenger cars and trucks owned by citizens of Bailey county.

That most citizens of this county are of the medium class as to riches and desires, is indicated in the fact there are more Fords and Chevrolts owned than of any other make. In a similar system of reasoning, there are more of the weather chime of folks, such de-

DATUS E. PROPPER

He was last week appointed executive manager of the Texas Good Roads association, succeeding Col. Ike Ashburn. Headquarters of the association will be moved from Houston to San Antonio.

### Young Trees May Be Secured At Lubbock Planting Profitable

Young trees of several different varieties adaptable to Plains growth may be secured again this year at the State Experiment station, Lubbock. Last year several hundred of these trees were obtained by Bailey county citizens, and the accommodations is again available, though it is urged those desiring them place their orders early as the supply is limited.

Most of the trees may be secured at the rate of \$1.00 per 100, and must be ordered in lots of not less than 25 of each kind. Some larger trees are furnished at \$2.00 per 100.

Application blanks for tree orders may be secured from the county or home demonstration agent at their offices at the court house in Muleshoe.

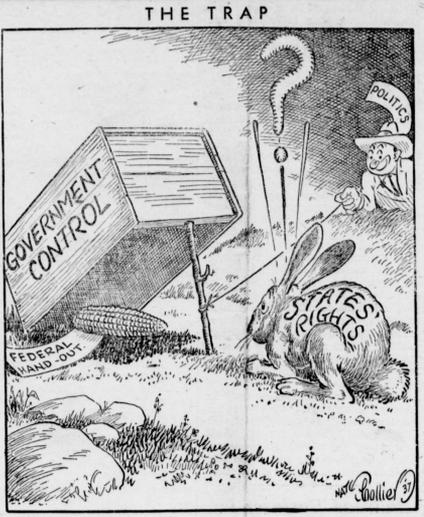

The good effect of proper land preparation for planting of young trees has been demonstrated by a few of those who put out trees last spring for windbreaks according to a recent report by the county agent who has recently inspected these demonstrations.

G. A. Davis of Maple, has one of the outstanding demonstrations of last season's planting. He has 100 live healthy trees out of that number purchased. He plowed the area well and threw the soil out to leave a furrow where the trees were to be placed. This provided for catching and holding more moisture than would have otherwise been possible.

John S. Williams of West Camp had a loss only two or three trees out of 100 planted. Good methods of preparations is considered the main factor in the large percent of trees saved.

Those who station tree planting at Needmore, supervised by A. A. Randolph of Lubbock Experiment station, saw the method of preparation demonstrated in the field. In that discussion in which he emphasized land preparation. Poor results in getting trees to live have been noted where no preparation was made but where small holes were dug and trees set without working the land.

More than 40,000 tons of potash has been shipped to Japan recently by a truck; Willis Knight, 4 passenger; Dodge, 18 passenger, 7 trucks; Pontiac, 21 passenger; Chrysler, 6 passenger, 2 trucks; Plymouth, 39 passenger, 1 truck; Buick, 23 T. 2 trucks; Cadillac, 1 truck; Studebaker, 8 passenger; Oldsmobile, 4 passenger; Oakland, 5 passenger; International, 19 trucks; White, 5 passenger; Terraplane, 4 passenger; Nash, 1 passenger, 1 truck; Lincoln Zephyr, 1 passenger; Durant, 1 passenger; Reo, 1 passenger; Durant, 1 passenger; Devois, 1 passenger; Blainmont, T. 2 trucks; Cadillac, 1 truck; GMC, 3 trucks; Nash, 1 passenger.

## SENATOR G. H. NELSON FAVORS ALL ACTUAL NEEDED EXPENSES; BUT IS AGAINST ALL THOSE NOT NOW REQUIRED

That Senator G. H. Nelson, this district has taken quite a reasonable and fair-minded stand in the muddled legislation which has been going on during the special session, is clearly evident from the contents of a letter received by the Journal editor this week from Mr. Nelson.

The Senator declares his favor of carrying out the mandates of the citizens in all pension matters desired, of taking care of school needs, of holding former appropriations as needed to their former figure, and at the same time reducing state expenses as much and as rapidly as follows: is letter to the Journal as follows:

"Although I favor economy in State government, this does not mean that I favor sacrificing either the pressing needs for Social Security or the reduction in necessary appropriations to support our education institutions. I have assumed the position as taken by the framers of our Constitution that Democracy can survive only by means of education of the masses and special preparation for life work.

"I make no apologies, therefore, but on the other hand, am happy that I, as your senator, together with the aid of your representative, have been successful in our efforts to defeat any cut in the appropriation made for Tech college. The fight is over in that respect, and we have won an important battle so far as our section of the State is concerned.

"Likewise, I make no apologies for voting for such necessary tax as may be needed to adequately finance our secondary schools, and more particularly, to secure the needed revenue to carry on the transportation of Texas school children to Texas school houses. Certainly, I favor the elimination of all unnecessary departments, bureaus, and commissions, and the elimination of all unnecessary employees in those that may be retained. This has been my program in the past and has, I think, been well demonstrated by my votes in the Texas Senate. During this session I have tried to abide the mandate of the people to provide adequate revenue for the blind and dependent children, for the Teachers' Retirement fund, and for Old Age assistance. I have done my best to raise this revenue from sources it would be least oppressive on the masses of the people, and to levy a tax to secure this needed money as far as possible on the non-essentials of life.

"In this program I have had the full cooperation of my constituents. Not one letter of criticism has been received by me during this session as to the position I have taken on these matters, for all of which I am happy and deeply grateful."

### Maple Wilson Makes Experiment With A New Type of Silo

A new type of silo, consisting of fence wire, feed bundles and building paper has been constructed by Maple Wilson at his feed lots in south Bailey county where he will feed about 1,000 lambs this winter. This plan is experimental with him, and he is not recommending it for general use, at this time, according to County Agent W. C. Taylor.

Taylor recently inspected the structure and is of the opinion that with more substantial construction the plan may meet with favor among farmers. The Wilson silo is temporary in construction and it is intended the feed so stored will be used at an early date.

The structure consists of light wire fastened to the inside of posts set to make a rectangular storage space similar to the shape of a trench silo. Feed bundles have been used as reinforcement and are placed inside the wire in an upright position. Building paper forms the inner lining of the container to make it more nearly air tight.

Mr. Wilson has also stored this year more than 1,000 tons of silage in a trench made on the usual trench silo plan. An additional large amount of this kind of feed stored at the same place last year is still available.

Gov. Bailey of Arkansas, who had himself nominated by the State Democratic committee to succeed the late Jpg Robinson as U. S. senator from that state, apparently is not so hot with his own folks as he was defeated by Rep. John E. Miller in a state election held last week. Both Robinson's widow and Senator Hatlie Carraway supported Miller.

### Subscription Bargain Days Now Ready For You

Bargain days on various daily newspapers are now at hand, and the Journal office can save subscribers money on many of these subscriptions either singly or in conjunction with new or renewed Journal subscriptions.

While the cost of producing a newspaper has considerably advanced, the subscription price of the Journal is still being maintained at the same rate for the present. Some of the daily newspapers have increased their subscription prices; but using the clubbing rates this office is authorized to grant, subscriptions may still be received at real bargain prices.

This office can also save subscribers money on any magazines published in the United States, whether purchased singly or in groups. It is authorized to present several group magazine subscriptions in conjunction with the Journal at exceedingly low rates.

Come to the Journal office and save money on your reading materials for the next year!

## ESTIMATES ON CROP PLAN IS ABOUT MILLION

### Aggi Dept. Says It Will Need \$700,000,000 For Surplus

Washington—The new farm program, part of which Congress must finance from new taxes cost one billion dollars in its first year.

Agriculture department experts and others have estimated a probable cost of \$700,000,000 for surplus crop control. President Roosevelt said in his revised budget estimate that 1937 cotton loans would cost \$130,000,000. Some believe that roped cotton loans (if granted) easily could cost \$170,000,000 considering that this year's crop forecast runs 1,000,000,000 bushels, above the 1936 yield and that approximately \$150,000,000 was lent on the 1934 corn loan program.

The cotton loans have been shouldered by the treasury, but Mr. Roosevelt has made it plain Congress must find a way to pay for the new farm act to be asked of the special session convening on Nov. 15. If there is to be a corn loan program, some believe it may have to be mandatory action of Congress and probably financed from new sources of revenue.

Administration leaders want crop control legislation. At the same time President Roosevelt expresses a desire to balance the budget in the fiscal year 1939.

In letters to Chairman Smith and Jones of the Senate and House agricultural committees, he said, "It is especially important that any new legislation should not unbalance the expected balancing of the budget." Any additional obligations on the treasury, he said, should be limited to 10 per cent by receipts from new taxes."

## Bailey County Club Girls Win In Contest Held At Canyon Sat.

Six 4-H club girls from Bailey county were represented at the Canning and Clothing contest held at Canyon last Saturday. Bailey county had more club girls and sponsors than any other county in District 2.

Clothing and canning contests for District 2 and which cover the entire Fairbairn area, were held at Canyon to replace the Annual Short Course held at A & M college, called off this year because of a paralysis epidemic.

Bailey county entered two girls and both won places: Barbara Lindsey of Stegall club won third on canned beet and Opal Snitker of Bula won second on clothing.

Mrs. Dora R. Barnes, clothing specialist from A & M college had charge of the clothing contest held in the home economics laboratory of W. T. S. C. and Miss Grace Neely, food preservation specialist also from A & M, had charge of the canning contest.

A crowd of 200 attended. Most of the county home demonstration agents of the two districts were present.

A tea was given for the group from 9:00 to 10:00 o'clock in the college cafeteria by the Randall County Home Demonstration club.

Bailey county sponsors attending were: Mesdames Grace Snider of West Camp and Mrs. Joe Howie of Stegall; 4-11 club girls attending were: Mary Doyle and Bobby Nell Sullivan of Fairview; Barbara Lindsey of Stegall; Roba Winkle, Ethel Lee Smith; Helen and June Arnold of Baileyboro; Doris Church of Northway and Florence Stone of Muleshoe; Opal Snitker of Bula; Peggy Williams, Juanita Hughes, Wilma Louise Snider and Ila Lee and Bernice Harrington of West Camp. The Bailey County Agent, Miss Alma Stewart, also attended.

### BULA SCHOOL STARTS NOV. 1

The Bula public school in eastern Bailey county, which had dismissed a month for cotton picking, will reconvene Monday, Nov. 1, according to Supt. Glen Daugherty.

## BIG ORANGE BUSES SUPPLANT THE LITTLE RED SCHOOL HOUSES OF BAILEY COUNTY CARRYING 1,400

Instead of the proverbial "little red school house" when this section of West Texas was settled its citizens had much higher ideals regarding education for their children and big brick schoolhouses embodying large districts came in vogue. Ever smaller districts which were organized during the pioneer days of early settlement, seeing the advantage of the larger districts where more teachers were employed and better curriculums prevailed became consolidated with other districts for better educational training and less expense.

Today there are 28 buses instead of several little schoolhouses dotted over the county furnishing accommodation to about 1,400 pupils who receive transportation to and from their respective schools, about 1,100 of these pupils transportation being paid for by the State at the rate of \$1.00 for grade pupils and \$2 for high school pupils. Each bus carries an average of 40 pupils.

If a pupil is lucky enough to reside on the bus route the school is practically at his front door. Some pupils must walk or be transported a mile or more to reach the bus "stop" as the State Commission, much to the appreciation of the driving public.

Just how extensive the work would be Mayor Lewis was unable to state but said all available funds in that direction would be used.

## Many Farmers Are Filling Silos Now With Year's Silage

The filling of silos with large new trench silos in the central and south part of Bailey county were reported this week by W. C. Taylor county agent, who has been recently cooperating with farmers in this work.

A 200 ton capacity trench was being filled at L. E. Smith's place, southwest of Baileyboro, last week. He has a good herd of dairy stock to utilize this feed.

L. A. Corbell and D. P. Brinker of the same community are filling trenches of similar capacity. W. E. Laney near by, expects to store enough silage for a small herd of dairy stock, which is one of the many activities he is carrying out under a whole farm demonstration in which his entire family has cooperated with the county and home agents this year.

A Member of Weston, Hoyt Slape of Stegall, D. McCormick and E. Harry of Enoch; Black Brothers of Longview; W. A. Mathis, Fairview; G. W. Damron, Circleback, are among others who have recently put in new silos.

Several new ensilage cutters have been purchased by silo owners of this county this year, some of which are being used for custom cutting after their own pits have been filled.

## MAKE STREET IMPROVEMENT

Several of the principal and secondary streets of Muleshoe are being resurfaced this week and put into better condition, also some new stretches of connecting blocks being opened for more comfortable travel, by the City Commission, much to the appreciation of the driving public.

Just how extensive the work would be Mayor Lewis was unable to state but said all available funds in that direction would be used.

WEEKLY LAY SERMON  
RELIGION vs. POLITICS

By JESS MITCHELL

Considerable stir has gone abroad in this land since a few weeks ago a Pittsburgh newspaper published a sensational article... relations of Justice Hugo L. Black's connection with the Ku Klux Klan in Alabama, and no little condemnation has been heaped upon the jurist because of such allegations. This writer holds no brief of any kind for that organization. He does not favor any society, no matter how patriotic its motives, which has for its purpose the annihilation of any other sect or race of people, and the Klan certainly decreed against Catholics, Jews and Negroes. In Democratic America there is no place for bigotry, intolerance, race nor religious prejudice; but I do highly favor any legal or moral means or method available toward yielding in to a solidarity the ideas and ideals of this great nation toward the betterment and perfection of its mutual welfare and advancement. Mr. Justice Black is to be commended in that a few weeks ago he cannot be said to have once being a member of the Klan, his throwing away of the perpetual pass given him by officials of that order, and his insistence on freedom of any bias, bigotry or other mental condition which would in any way invalidate or even color his position as a member of the Supreme court. The U. S. Supreme court, which he presided in that following its recent reconvening, when charges of illegality were preferred by a certain gentleman attacking the right of Mr. Justice Black to serve as a member of the high tribunal, it refused to even consider such question, thus giving still further evidence of the fairness and lack of partiality of that honored and august body.

Congressmen unfavorable to the President's appointment to the Supreme court bench should have forewarned when, just a few days before adjournment, Senator Bankhead put into the record number of letters from prominent Catholics, Jews, Negroes and foreign-born of that state, highly commending Mr. Black for his broadmindedness as an American statesman, and expressing in no uncertain tones their confidence in his ability and judicial capacity. These letters were all addressed personally to Mr. Black, and this gentleman had penciled notes on each indicating whether the writer was Catholic, Jew, Negro, or foreign-born. There were 35 of such commendatory letters read into the Record without at that time producing any adverse comment or apparently a single interjection from fellow-congressmen. If it is true that Justice Black was and is still a member of the Klan this writer pays respect not so much to that fact; but rather to his astute and adroit manner of handling the situation at that time. However, he now claims no affiliation of any kind.

Now that the appointment has been recommended by Dr. Roosevelt and seconded by Congress, there is perhaps nothing that can be done by that executive or his legal compatriots, since the only way he can be unseated is by death or dishonorable service to his kind. We do not anticipate the former very soon nor expect the latter at any time. Whether his decisions as a member of that high tribunal will be influenced in any way because of an alleged affiliation with the Klan, time alone will tell; but it is our opinion that Mr. Black will put the welfare of his nation ahead of the personal or corporate welfare of any one citizen or group of citizens, and, after all, the Klan was organized for patriotic purposes, though many citizens of our land may not agree with its avowed methods of securing such.

This recent protest serves to call attention to the lament that politicians of today are lacking in the general public generally to become elected officials and to serve the nation in a free and untrammeled manner as they should. There have become so many organizations, societies, churches and teams in this nation it is practically impossible for a stalwart, independent, self-thinking man to be the success in a political career he might otherwise be, but for these influencing hindrances.

Too many candidates are forced to pretend they are Christians with liberal tendencies, Catholics with Protestant proclivities, temperance men with slight or occasional aberrancy, or, while they do not belong to any denomination, yet their wife is a strong Baptist, their father-in-law is a pronounced Methodist, their sister a devout Presbyterian, etc. ad infinitum, ad nauseum. The result of such a situation is to frequently elect men to office who are lacking in the very principle while hypocritically receives its reward.

Government is supposed to be a matter of political economy, not religious theories, and it should be entirely secular. Religious ideals of candidates should be subservient to their ability as statesmen. It is not fundamental of statesmanship that one believes in the inspiration of the Bible, accepts or rejects infant baptism or adult immersion; that one should uphold the immaculate conception, believe in the "single or double procession of the Divine Spirit" or some particular eschatological theory. Religious ideas are supposed to be personal and private, while ideas and ideal of political economy are public, affecting the welfare of all the people.

Our form of American government is not supposed to have anything to do with religion. It is neither pagan, Mohammedan nor Christian. Its constitution grants all individuals the right to worship God according to the dictates of their own consciences, and nearly every form of religion under the sun is now represented in this country with its more or less adherents. Just as long as the ballot is biased by religious views, just that long will hypocrisy reign supreme in governmental affairs and political candidates, hiding their personal religious ideas, will flatter those of different opinions, pretend to agree with some whose ideals they may even despise, and will crawl in the dust for preferment at the polls, while honest men will be trampled under foot.

In my personal opinion many denominations are too fast becoming political organizations. It is a notable fact that most Catholics are Democratic; Congregationalists and Presbyterians are largely Republican. Methodists are pretty well split according to their geographical location, whether they belong to the church north or south of God. The wide variety of Baptists have just as wide divergence of political ideas, while their influence in Texas is overwhelming Democratic because there are more of them there than in any other denomination. The various churches are moral organizations and have a right as such to proclaim pronounced opinions on matters of social and moral welfare; but, generally speaking, pulpit proclamations for or against matters purely economic are outside the realm of their avowed purposes.

A few years ago this nation witnessed a vivid demonstration against a certain gentleman by the name of "Smith" because of his religious affiliations. His candidacy for office was promptly put down by the masses at the polls. As a matter of fact, Smith was not wanted in office because of his uneconomic handling of financial matters in a city where he had been mayor; but the financial leaders knew his religious views would appeal more to the prejudices of the people at large and accordingly, they had him nominated as a national issue while the real reason of big business was withheld.

For ought I know the time may come and not in a distant future, when the denominations will become as sharply divided upon political questions as they are now at variance over those theological. When and if that time are not enough, a nation of liberal minded citizens to hold the balance of power, the future of our democratic form of government will certainly be jeopardized and the liberty of its citizens greatly curtailed. Past history has proven in numerous instances that when religion and the sword form a partnership, human slavery invariably arises.

EX-WORLD WAR VETERAN  
VOUGERS FOR A VERY  
QUEER SNAKE STORY

Curtis Taylor, local citizen and government official in three or four different capacities, is very quiet, unassuming gentleman, widely known for his truth and veracity, in his peregrinations over three or four counties of this area, a few days ago noticed a slight movement in the grass alongside the road on which he was traveling and getting out of his car to investigate saw what appeared to be a snake with its tail in its mouth.

Instantly he had visions of the fabled hoop snake and all its death-dealing proclivities. Notwithstanding attending dangers Curtis, who is an ex-soldier of the World War, summoned his bravely used frequently during that consuming embargo, and, upon closer investigation, confirmed his preliminary idea that the snake had actually swallowed a part of its own tail.

However, Curtis, who is noted as a fied for detail, persisted in still further examination. Realizing the mouth of the serpent was busy with its tail in such a manner there was little danger of its sinking its fangs into him, he held it down with one foot and proceeded to cut it open, when, to his great surprise, he found there was a still smaller reptile inside which had swallowed almost a foot of the larger snake's tail.

The only way Curtis was able to reconstruct what had happened to the two vipers was that one snake started to swallow the other, beginning at the tail. Then the other snake managed in some unexplainable manner to get hold of its opponent's tail. In this position they started to swallow each other. Before the smaller snake went down the gullet of the larger one more readily than did the larger one in the esophagus of the smaller, the larger snake made such quick work of the little fellow that he was nearly swallowed a part of himself also.

Curtis hasn't been able to quite figure it all out to his own satisfaction; and it now seems if the two reptiles had kept on swallowing each other, both of them might have finally turned themselves wrong side out, the larger one especially.

Variety in Water From Springs  
In Stafford county, Virginia, there are five springs within sixty feet of each other and each yields a different kind of mineral water.

Beware of Common  
Cold Warns State  
Doctor To Public

Austin.—Beware of the common cold," Dr. Geo. W. Cox, state health officer, cautions the people of Texas. "This is the season of the year when colds are most prevalent, and their sequences more far reaching. The organisms causing the disease is, as is well known, but every individual is acquainted with its effects."

"Not a little of the susceptibility of catching colds can be overcome by a gradual acclimating to lower temperatures and inclement outdoor weather. This hardening should begin now, and consist of regular exercise—walking is good—to be continued throughout the winter in weather of every kind. One should be careful to avoid wet stockings drying on the feet, over-clothing and over-heated rooms."

"There are two broad principles to observe in the treatment and prevention of colds. The first says: Let every person with a cold consider it seriously very cold should be regarded as the possible beginning of a serious illness. That means seeking a physician's advice and explicitly following his directions. If he orders bed then bed it should be. Complete rest is a fine way to overcome a cold in short order."

"One's resistance to many diseases, including colds, can be raised by increasing one's vitality through observing the fundamental rules of health: plenty of fresh air, good wholesome food, neither too much nor too little, sufficient rest and the avoidance of habitual over-indulgence of devitalizing stimulants including alcohol, tobacco and the like."

"The cold is a common disease," Dr. Cox repeated, "but every cold is important enough to justify careful attention and treatment for its immediate cure. Death-dealing pneumonia and tuberculosis may begin with colds that do not receive care and attention."

Railroad Business Is  
Big; Has One-Third  
Of World's Mileage

Most people living in Muleshoe and throughout this entire section of the state do not realize what a big business railroading is. This is due largely because of no intimate connection with such business; but that railroading is one of the giant businesses of America, and the entire world for that matter is clearly evident from statistics just published regarding railroad activity last year, the following being some of them.

Last year there were 786,551 miles of railway line in the world, of which 30 per cent or 241,922 miles was in the United States, while of this latter number, Texas has 16,651 miles, the largest mileage of any of the states, Illinois being second and Pennsylvania third in rank.

Total length of track operated by all railroads in the U. S. is 418,000 miles, including sidings. There were 40,600 passenger cars in operation last year. \$3,119 locomotives and 1,769,000 freight cars.

The net capitalization of all railroads in the U. S. is \$18,342,000. There were 620,000,000 passengers carried on trains last year, an increase of approximately 44,000,000 over 1935, these passengers traveling an increase of 21 per cent miles.

Taxes paid last year by the railroads totaled \$32,000,000, or 7.9 per cent of their total revenues. The Santa Fe system is the biggest taxpayer in Muleshoe and railway country. Net revenue of railroads was an average of 2.59 per cent.

Railroads last year purchased material and supplies totaling \$603,000,000. They used 1,066,000 employees who worked an average of 2,511 hours each, receiving an average of 69.1 cents wages per hour or an annual salary averaging \$1,733.

A TRAGIC EVENT!

It was a Muleshoe girl—and the same sad story that alas, has often been told, and checked many a young life which had its beginning in sunshine, surrounded by luxury and the wealth of the world.

Her eyes were now wild and staring, her face was flushed and her hands were nervously working. She was a deeply troubled and terribly injured woman, and we hear her saying: "Oh, cruel one, you have injured the very foundation of my being! Day by day you have tortured me, and yet I could not bear of give you up. When first me and now your eyes have attracted me! When you became my own, how many friends envied me; but your understanding is too small for my large soul. You are opposed to my advancing myself. You have injured my standing in society. If I had never met you, I might have walked in peace."

"So now be gone! We part forever!" This was a moment of convulsive breathing, a gritting of teeth and a sharp sigh. It was all over. By a supreme effort she had pulled off her new shoe.

COTTON GINNINGS TO OCT. 18  
The Census bureau, Washington, reported Tuesday there had been 11,068,319 bales of cotton ginned to Oct. 19, compared with 8,569,476 the same date last year.

Texas had turned out 3,124,024 bales against 2,691,900 the same date last year.

Do You Know Real  
Money From Bogus  
It Pays To Watch

All kinds of counterfeit money is scattered over the country, and it behooves everyone to be on the watch for they never know when they may become the recipient of some bogus bill or coin, innocently of course; but in such a way it may produce legal implications not very pleasant.

Many people even some bankers, think they know genuine money and can always tell it from the bogus kind; but they get slipped up on sometimes. Really, it takes an expert to distinguish all the counterfeit money floating about, though there are many who can detect most of it. There are some rules regarding money, especially currency, which every Muleshoe citizen should become familiar.

For instance, a \$20 note bears the portrait of Andrew Jackson; a \$50 note that of Benjamin Franklin; and a \$100 note that of President Cleveland. However there are not many Muleshoe citizens who are likely to be taken in with currency of the two higher named denominations.

Counterfeit coins are mostly made of lead, or lead and tin. It is noticeable they have a dead kind of ring, also, many of them are blurred—not clear cut in their engraving. Bogus coins have been known to be made of wood, faced on either side with tin and the impress of the real coin then made into the tin.

It used to be common for citizens to accept gold plated dimes, lead and pewter quarters are still in circulation. Plenty of counterfeit coins of different kinds are made for typing slot machines of different types. One dollar bills are frequently raised to a ten, and sometimes to a 100 dollar note. Counterfeit money seldom has the silk threads running through it, and if so, they are likely to be different in size, kind or color. Carefully feeling of the paper of a note, as it passes through one's hands will often bring detection of a spurious one. Now that \$2 notes are uncommon in this section, not many of them are raised to \$20.

Sometimes bogus government notes are engraved free hand drawing style, practically perfect; but if one will draw a motioned finger across one they will find it blurs. No one ever knows when something new in counterfeit money may come out. It always pays to be critical and observant.

WILSON WAS WINNER

The Journal is requested to announce that it was the Wilson, instead of the Watson school that won first honor in attendance during the parade held here at the county fair.

BAILEY CO. HOME  
DEMONSTRATION  
CLUB NEWS

By MISS ALMA STEWART  
Home Demonstration Agent

Cans Greens In Pints  
Mrs. J. C. Hart, home food supply demonstrator of the Maple H. D. club, says she cans greens in pint containers because they are a solid pack and it is hard for the heat to get to the center of the jar. She uses pint jars for canning English peas and other foods because she has only three in family, and a pint of food is enough for a meal. She has canned 448 containers of food and will can a lot more.

Leaves Carrots In Garden  
Mrs. J. A. Johnson, home food supply demonstrator of the Goodland home demonstration club is serving fresh English peas and new potatoes now. She has fall carrots that are al-

most large enough to eat now and she plans to leave them in the garden in preference to canning because it saves time and jars as well as have raw carrots when they want them. The Johnson's have a sub-irrigated garden.

BAPTISTS TO HAVE REVIVAL  
Revival services were begun at the local Baptist church Wednesday, continuing until Nov. 7, two services, at 10:00 a. m. and 7:30 p. m., being held daily.

Preaching will be done by Rev. J. M. Reynolds, Baptist pastor from Goliad, who was the first evangelist of the Texas Baptist convention, for sometime field representative for Simmons university, Abilene and representative of Buckner's Orphan's home, according to Rev. J. Manley Reynolds, local pastor.

W. H. Martin, of Kansas State College, advises marketing cream through four days after production.

MAKE IT  
COMPLETELY AUTOMATIC  
WITH GAS!

Automatic gas equipment lends almost magic ease to housekeeping—at lowest initial cost and least upkeep expense. The new automatic GAS ranges, for example, make cooking seem effortless—yet save you money every day. GAS refrigerators are more efficient, attractive, dependable and silent! And automatic GAS water heaters insure hot water always—at moderate cost! Visit our show-rooms today.

IMPORTANCE OF BUILDING PONDS ON FARMS OR RANCH IS TOLD BY THE FARM AGENT OF WHEELER CO.

By W. B. HOOPER

Assistant Wheeler County Agent A pond on the farm or ranch is an asset over much of the county. In some cases, ponds are the principal source of water for livestock and household use.

It is seldom that an ideal site for a pond may be found. Therefore, it is well to consider the desirable and undesirable features of proposed sites and then choose the best site available. It is well to avoid locating a pond where it will collect water carrying considerable quantities of silt.

Choose Site Carefully Sometimes a likely appearing site for a dam may have such an excessive slope above it that too small an area will be available for the pond. In this connection a site where a considerable area may be covered with water with a dam of reasonable height is desirable and yet on the other pond should have considerable depth, at least 7 or 8 feet, so that a high percentage of the water will flow through surface evaporation, which may be as much as 5 or 6 feet per year.

Foundation for Dam After a location for an earthen dam has been selected, the foundation for the dam should be prepared so as to eliminate a line of seepage at the bottom of the dam. The area to be under the dam should be plowed. A trench some 4 to 8 feet wide, depending on how high the dam is to be, should be dug lengthwise of the dam and about where the center of the dam is to be. The trench should be a foot or

more in depth or down to fairly impervious subsoil. The dirt from the trench should be placed in the outer slope of the dam. The core of the dam should be made of the best dirt available for the purpose which is a clayey soil with a high percent of sand and small gravel in it. Clay alone is not as good a material for making the core as is a mixture of clay and gravel soil.

Spillway is Explained If a pipe is to be put through the dam to let out water for stock or for a garden, it should be laid in a trench dug for the purpose running approximately at right angles to the length of the dam. Such an outlet pipe is recommended, as it makes it possible to run water into a small stock tank so that stock need not be admitted to the pond to get drinking water. The pond should be fenced so as to keep stock out of it. A cut-off valve may be put on the outer end of the pipe, although this may make it necessary to protect the pipe against freezing while the valve is in the pond, there is little danger from freezing. One or more concrete collars should be built in place around the pipe through the dam to cut off seepage along the pipe.

Spillway: Except where the pond is large in capacity as compared with the size of the watershed, as for instance 10 acre foot capacity for each 5 or 6 acres of watershed, the spillway is extremely important. The spillway should be of ample capacity to carry off surplus water during heavy rains, so that water will not run over the dam and destroy it. A simple freeboard, or depth of the bottom of the spillway below the crest of the dam, should be allowed. The spillway should be located so that water running through it will not erode the dam. It should be emptied well downstream from the dam, if it is at all practicable to do so.—Shamrock Telegram

SCOUTING A GREAT GAME

No better program has ever thought of than the Boy Scout movement, which was started in England by Sir Robert Baden-Powell, now Lord Baden-Powell of Gilwell. The purpose of the movement has been character building and citizenship training, through activities based upon the legends of knightlyhood, chivalry and the lore of the plainsman and the Indian. The imagination of boys was fired, and two years after the movement got underway in England, the message of Scouting spread to America. Here it has grown with great rapidity and today there are two million men and boys in the United States who are actively playing the game of Scouting and over 7,000,000 who have played a part during the 27 years it has been actively organized in America.

IS YOUR NOSE STRAIGHT? IF NOT, WHY?

Is your nose straight? The question is directed to the charming femmes. Of course, men have all kinds of snifflers, a few straight, many crooked, some bulbous, some red, a few pointed, a few nose hooked, etc., but it remains for Emile F. Martin, New York City hair-dresser expert, to say that 98 per cent of the women have crooked noses.

Of course no man ever noticed such a twist—at least not before he married it—everything was absolutely perfect; but Martin explains that women have a way of creating an optical illusion regarding their noses, just as some men insist they created an optical illusion regarding their whole being before the clergyman made his pronouncement that hitched him either for life or Reno.

A Journal representative has spent three days examining the noses of women on the streets of Muleshoe, of course not in a technical way, but metaphorically speaking, and failed to locate a single twisted proboscis. Some of them were slightly tilted, others decidedly stuck up, a few would have been blown from off the face of pulchritude; but none were seen pointing west when the owner was going south, or north when the proprietor was headed west.

Several women, who are generally considered authority on facial affairs were interviewed on the subject, but none admitted any knowledge regarding it. Local beauticians admitted that in a few cases there were otherwise beautiful customers visited their studios whose noses were not entirely aligned with their other facial adornments; but they said it was so easily overcome that no unmarried woman ever worried a minute about it—and, of course, after they were married, it was up to the other side of the house to do the worrying.

The correction is quickly and deftly made by simply parting the hair a little more toward the side the nose leans toward. For instance, if the olfactory member inclines somewhat toward the stomach, part the hair just a little to the right of center. If the situation is opposite, just reverse the idea by parting a little to the left—no one is likely to ever notice the inclination and deviation.

FOLKS in New York may have crooked noses by the thousand, but the general consensus of opinion in this section is that the women are absolutely perfect, including their noses.

FOVIER BOY JERKED FROM CAR Ebbby Fovier, small son of Mrs. Ethel Fovier, one of the teachers in Muleshoe Grammar school, was seriously injured Sunday morning when he fell out of a car that was going at a moderate speed.

He was riding in the car with his mother, and opened the door to get something out that was caught, when the wind blew against the door which opened from the front and pulled the child out onto the ground. He was badly skinned, bruised and had several cuts. He was given medical attention immediately and is recovering nicely, according to report.

P-T. A. Membership Drive Culminates In Meeting Mon. Nite

The regular meeting of the Parents-Teachers association was held last Monday night at the Muleshoe High school auditorium with a large crowd of parents, teachers and patrons attending.

Regular routine business was attended to under direction of Mrs. J. Clyde Taylor, president of the association, after which a short program was rendered as follows:

Talk by Mrs. J. J. DeShazo on "Why Parents Visit School."

Comedy Parca, "Love and Lather," by several blackface characters.

Plans were discussed for the both the P-T. A. will sponsor at the Muleshoe school, Halloween's carnival, Friday evening of this week. Everyone is invited to attend and watch for the "Mystery Person," that will be the important feature of the booth.

Thursday, November 18 was set for visitors, day at the local schools. All parents and interested persons are invited and the room mothers will assist the teachers as hostesses in various rooms.

The P-T. A. sponsored a show put on at the high school Tuesday evening of last week by a traveling magician and ventriloquist. The proceeds were divided and the association received 40 per cent for their part, it totaling \$10.75.

Mrs. C. R. Stevens' room received the picture for having the most parents present at the meeting to vote, and Mrs. Curtis Taylor's room received the \$250 prize for securing the most members to join the association.

The membership committee, composed of Mrs. Irvin St. Clair chairman, Mesdames R. N. Edwards, Howard Carlyle and Roland Eigham have been working diligently for the past few weeks on the membership drive. The drive is still in progress and anyone wishing to be added to the list, so there are already more members in the association this year than there have been for the past several years.

Paid members who belong to the association are: Mr. and Mrs. J. L. Alsup, Miss Lucille Beatty, Mr. and Mrs. R. B. Eigham, Mrs. J. D. Border, J. I. Bartley, Mr. and Mrs. M. G. Bass, Mrs. Bonnie Brock, Mrs. L. S. Barron, Miss Evelyn Boone, Mr. and Mrs. Howard Carlyle, Mrs. A. W. Coker, Mr. and Mrs. C. C. Cox, Mrs. L. B. Churchill, Mr. and Mrs. J. J. DeShazo, Mrs. R. D. Daniels, Mrs. Joe Deaton, Mr. and Mrs. Ray Griffiths Mrs. Ethel Fovier, Mr. and Mrs. A. J. Gardner, Mr. and Mrs. Flandie Galden, Mrs. Cleo Ginos, Mrs. Cecil Harvey, Will Harper, Miss Elizabeth Harman, W. B. Harlan, Mrs. H. C. Holt, Mr. and Mrs. E. R. Hart, Mr. and Mrs. N. J. Holt, Mr. Harrison, Mrs. C. H. Hines, Mr. and Mrs. J. Clyde Taylor, Mr. and Mrs. Curtis Taylor, Cecil H. Tate, Mr. and Mrs. Jay Weyer, Mr. and Mrs. Gilbert Wollard, Dr. and Mrs. H. E. Williams, Mr. and Mrs. A. H. Isaacs, Mrs. Tye Young, Miss Helen Jones, Mrs. E. W. Johnson, Mr. and Mrs. Roy Jordan, Mr. and Mrs. R. L. Jones, Miss Okla Mae Lawrence, Julian Lawrence, Miss Josephine Lee, Mrs. Arnold Morris, Miss Mildred Miller, Judge M. C. Miller, Mrs. Delma McCarty, Mrs. C. C. Mardis, Mr. and Mrs. Jesse M. Osborn, Mrs. Irma Mitchell, Mrs. Royce Mrs. W. V. Parsons, Mr. W. E. Renfrow, Mr. and Mrs. H. W. Roberts, Bevington Reed, Mr. and Mrs. Frank Snyder, Mrs. R. G. Spence, Mr. and Mrs. C. E. Stevens, Mr. and Mrs. Irvin St. Clair, E. C. Smith, A. P. Stone, and Mrs. Rosa Stidham.

With an advance showing of the 1938 model Ford V-8 cars being made at New York City which began Wednesday of this week, management of the Muleshoe Motor Co., are expecting a general distribution of these new cars in the near future.

In the New York show a de luxe V-8 and a standard V-8 are on display, both said to be entirely new in appearance, having new design of radiator grill, longer appearing hood, more massive fenders and greater refinement of both exterior and interior. There is more room in the sedans and trucks which steering construction.

TEXAS LEGISLATURE FAILS TO PROVIDE NEEDED NEW REVENUES Special session of the Texas legislature adjourned Tuesday without creating any new taxes or making arrangements for liquidating the state indebtedness. Gov. Allred had asked for revenues aggregating \$15,000,000 a year.

Shortly after convening, the House blocked a general tax compromise bill as unsatisfactory. Various other measures were also introduced but came to naught through lack of agreement of the two bodies.

The Governor said he would not call another special session until he was assured something definite would be accomplished.

It was stated before this special session convened that unless added taxes were levied before being paid to the aged, blind and needy children would probably be stopped for three or more months.

Here Are Ways For Hunters To Bring Selves Back Alive

The Red Cross Society Washington, has aimed a volley of advice at the average American hunter, some of whom may have sent shots into their fellow Nimrods during last season.

Hunting accidents last year accounted for 2,000 deaths, many of which might have been avoided with proper care. Here are some of the suggestions offered for protection:

Don't pull a gun carelessly from an automobile; help it out as if it were your lady love.

Remove shells before crawling thru a fence; they can cause more pain than a rip in the pants.

Don't use a gun to club game with brush, bringing it out with bare hands is less dangerous.

Don't carry your gun cocked. It's always closer to you than any game.

Never point a weapon at any one in fun. There is too little difference between comedy and tragedy.

Don't deploy ahead of inexperienced hunters. Be polite and let them go first.

Don't leave a gun where children can reach it. All weapons are popguns to them.

Don't leave a loaded gun in the house. Bears are not coming through the living room this year.

Don't allow the gun muzzle to log with mud or snow. Clean it as you would your teeth; the bite is 1,000 times worse.

Deer hunters should wear red coats or hats because—deer don't.

Cream lead on the farm under average conditions for a period of one week loses many of its desirable butter-making qualities.

GET READY FOR WINTER! There are numerous odd jobs of repairing and rebuilding that may need doing on your place before Old Man Winter arrives in earnest. Don't delay them—we can furnish you materials for any job. PERHAPS you need material for Cotton Sheds, Barges, Truck Bins, etc., lumber for making Grain Bins, or Steel Bins desired—we have them. ## THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

JESS MITCHELL, Editor. I. F. MITCHELL, Bus. Mgr.

**SUBSCRIPTION RATES**  
In Bailey County, one year, \$1.50; Outside of County one year, \$2.00

Published every Thursday at Muleshoe, Texas.  
Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both old and new addresses.  
Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. In other cases, it matters not by whom nor for what purpose, if the object is to raise money by omission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, eulogies, and resolutions of respect may also be charged for at the same rate.  
Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount requested by him for such advertisements.

## Editorial

Every Great Attempt is Glorious Even if It Fails

### A THOUGHT FOR THE WEEK

What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them.—Mark 11:24  
A wise man will desire no more than he may get justly, use soberly, distribute cheerfully, and leave contentedly.

### IT WON'T WORK

Motorists around Muleshoe will learn with more than the usual interest that after a trial in several states of "no speed limit" on the highways, the experiment has proved a failure. Michigan, one of the first of the few states that let down the bars and permitted drivers to use their own judgment on the open road, raises her hands in horror at a 15 percent increase in fatalities over last year, and is planning to return to former speed limits. The motorist, it seems, cannot be relied upon to stick to a safe and sane speed; it requires a law, strictly enforced, to make him do so.

With the death toll in America so far this year the highest in history, it is obvious that something must be done, and done quickly, to make highways safer. With almost 10,000 killed on Labor Day alone the necessity for laws fixing a lower rate of speed is apparent. However, at the time that new speed laws, and laws with teeth in them, are being enacted, some attention should also be given those drivers who idle along a main highway at a rate of 15 or 20 miles an hour.

Hundreds of accidents occur when drivers turn out to pass these slow-moving machines, for as a rule they are not hugging their side of the road. The need for regulating the slow-pokes is as great as the need for regulating the speeder.

This year's death toll is going to be a ghastly one when the figures are made public. Maybe it will speed the enactment of some sort of legislation that will make human life a little bit safer in America.

### YOUR SCHOOLS

When their children start off to school in the morning that seems to end interest in them until they return home, with a vast number of mothers around Muleshoe.

Somewhat it has never occurred to them to take a few minutes off from household duties some afternoon and drop in at the school house just for a little visit. They do not realize that it boisters the morale of the school, and that they are taking more interest in their work when they find, through the personal visits of parents, that interest is being taken in them. It will also serve the good purpose of revealing how well and capable the children of school age are being taken care of by those in whose charge they now spend a goodly portion of their time.

You may be sure of a welcome, and you will return home with a deeper pride in your school.

### WORTH TEACHING

The fact there is no regular course in the public schools of Muleshoe and surrounding territory covering the conservation of wild life and natural

resources does not mean that it is not worth teaching. No better instruction can be given by any teacher than the simple methods of protecting the trees, birds and small animals of the neighborhood in which his or her school is located. A few moments now and then devoted to the value of planting trees, and protecting those now growing, will serve to impress the youthful mind with the value and importance of conservation.

The same is true regarding our outdoor life. Children may be destructive by nature, but leading them into new paths is an easy matter. Tell them, so their childish minds can understand why this country must conserve its natural resources, such as timber and fish and game, and they will grasp the meaning and carry it with them on through to maturity. The teacher who realizes the value of such instruction is worth more to the community he serves than the one who never mentions the subject simply because it doesn't happen to be a part of the regular school course.

### SNAP SHOTS

It is a sad reflection on civilized man when so many laws have to be passed to keep him honest.

**"SUCKER LISTS"**  
Dumb animals are the ones that grow old without overtaxing their hearts in an effort to be young again.

If you are accustomed to receiving tempting offers of oil well or gold mine stock through the mails then you may be sure that in some mysterious way your name has found its way onto some of the "sucker lists" used by those who are after easy money.

There is no occasion for showing resentment at receiving such mail; they don't know how they got there; but some of the most prominent men in the country are enrolled on one or more "sucker lists." Instead of losing your temper the thing to do is to toss the literature into the fire unopened. Even that will not prevent other such offers reaching you, for these mail-order promoters not only "swap" mailing list names, but buy and sell names to each other.

So save your temper and also your money by destroying the bait with which they attempt to catch and "sucker" you. Throw away their invitations to become a "sucker" and let them go on wasting their time and their postage so far as you are concerned.

### FALL TIME HERE

Fall time is harvest time and generally a happy time in West Texas, for it is the time when farmers realize on their summer labors. It is a time when the sound of the cotton whistles are as music to the ears of both grovers and ginners as signals are sounded for the next customer to drive up to the section chutes.  
Mexicans, Indians, Gypsies and white folks come trucking in looking for jobs picking the fleecy staple to get a share of the prosperity boom which harvest time invariably brings. Trucks and cotton wagons park on the busy streets while the women folks crowd into the stores to buy various merchandise needed for months past.

There will probably be \$400,000 worth of cotton go out from Muleshoe this fall—and it all contributes to the general welfare, happiness and prosperity of the section.

### Jauity Journalettes

It's a great kindness to trust some kind-hearted woman with a secret; they feel so important while telling it.  
An optimist is a Muleshoe citizen who hopes to make enough money next month to pay last month's bills.

Ever notice how lots of Muleshoe people waste much of their time worrying over things that never happen.

Most Muleshoe people who take the trouble to think don't have much trouble to think of.

When a Muleshoe woman says: "I look like a wreck today," it's very bad manners to agree with her.

More than one Muleshoe vacationist has returned home this year to discover that the fish he caught were not the only things that got hooked.

Muleshoe folks should not worry too much about what the world is coming to. It may run into a detour any minute.

Some steam engines are like little Muleshoe folks. The more they blow their whistles the less power they have to turn the wheels.

Perhaps the reason some elderly Muleshoe people put candies on their birthday cakes is just to make light of their age.

Perhaps some Muleshoe folks have yet to learn that Sunday religion will not convert the sinners they cheat during week days.

Streamlined consciences are now being recommended to Muleshoe citizens as offering less resistance to evil influences.

The turning point in the average Muleshoe life is when he quits saying he feels good when he don't and begins saying he feels awful when he don't.

The old-fashioned Muleshoe man who never thought of anything of walking 10 or 12 miles in an afternoon has a grandson who never thought of it either.

Scientists now claim to have discovered a way to keep bread from getting stale. That's nothing new; most Muleshoe housewives discovered that secret a long time ago.

Alligator hunters claim those creatures are perfectly harmless so long as they keep their mouths closed. The same rule would apply to some talkative Muleshoe folks.

### THE JOURNAL'S Weekly Scrapbook

Week's Best Recipe  
Stuffing For Green Peppers—Chop a small onion and cook in one tablespoon of fat until yellow. Remove from stove, add one and one-half cups of ground cooked meat, one-half cup dry bread crumbs, one egg slightly beaten, one-half teaspoon salt, two teaspoons chopped parsley, and tomato juice to moisten. Fill par-boiled peppers with this mixture, cover with buttered crumbs and bake in 375-degree oven for 30 minutes. This recipe fills four peppers.

**A Beauty Hint**  
The small, light summer freckle clears away with summer's passing. Large, dark, disfiguring freckles are slower to go, and some just won't go. Lemon juice is often enough to bleach out the light freckles. The heavy ones call for stronger ointments and bleaches. Your best care with freckle creams. Your best protection is the complete reliability of the manufacturer.

**For the Kitchen**  
Any leftover bits of chicken meat or vegetables can be added to scrambled eggs and served for supper. . . . Stale cake can be freshened by dipping into cold milk for an instant and then rebaking slowly. . . . To freshen celery, place it in water containing a little baking soda.

**The Flower Grower:**  
Leaves, straw, manure or other safe litter may be used for winter protection to perennial beds. . . . Light fertilization in the fall is helpful to plants, but plants are always in a better state to absorb fertilizer in the spring. . . . If the upper leaves of your dahlias plants are wilted, look for borers.

**The Family Doctor**  
Colds often lead to serious diseases if neglected. At the onset of a cold take an anemine; drink a hot lemonade or other alkaline solution; grease the chest; examine a dog's tongue; spend a day in bed, partaking only of light food and

A woman left Henington's grocery the other day terribly out of humor. When the boss asked Vance what was the trouble, he replied: "Oh nothing except she didn't like the color of the potatoes eyes."

"This world would be considerably better off if everybody practiced what they preached," suggests Rev. Watkins; "but," he continued, "it is a fairly good place as it is. Just suppose everybody preached what they practiced," he said.

No one to look at George Shadid, would think him a poet; but he is. Here is one of his recent effusions: "A pretty good firm is Hatch & Waite. And another is Attit, Early & Laite; And still another is Doo & Daire; But the best is probably Grimm & Barrett."

A young married woman who had recently become a mother was in the Western drug store for the coming year, one phase of it being the pastor's salary, which some of the members thought should be increased. The increase was granted, according to report, with the understanding he should not be paid any overtime on his sermons.

Fry & Cox Bros. have recently been installing some of their machinery in their machine shop, some of it apparently of a rather complicated nature. The other day a customer was looking at one of these contrivances and asked Jack what it was. "Why," replied Jack, "that is a machine in which a pedal attachment, coinciding with a fulcrummed lever converts a vertical reciprocating motion into a circular movement. The principal part of the machine is a huge disk that revolves in a vertical plane. Power is applied by the horse sapens through the axis of the disk, and work is done on the periphery, and the hardest substance by virtue of its being changed, or broken, into the desired shape." "my gosh, replied the astonished man, "that's something wonderful. What is it? Just a grindstone." Jack calmly replied:

"Grindstones," admitted the other day he wasn't quite as brisk as he used to be 25 years ago. "Why," he said, "I used to walk around a block every morning before breakfast, but now when I get half way 'round I have to turn and come back."

There isn't much danger of a revolution in a country where every man can feel like a dictator by merely getting under a steering wheel.

As we understand the unemployment census, it merely means counting those who really want to work and letting the rest loaf on WPA.

Six Russian officials were recently shot for wasting the taxpayers' money. Omygosh! What a slaughter there would be if that idea ever became popular in this country.

Paying an annual salary of \$102,000 to a kid movie actor is on a par with the silliness of a university paying \$10,000 or \$15,000 annually for a football coach. P. T. Barnum was certainly right!

When the State County Judges association met at Amarillo last week it passed a resolution favoring sterilization of insane and prison inmates. Perhaps it should have included those would-be politicians who are always running for office and never getting there.

**Pavement Pickups**  
A post office patron remarked to A. J. Gardner the other day, "why, this letter is damp!" as it was handed to him. That's because there is some postage due on it," replied the postmaster.

County Clerk J. J. Williams presents the following formula as fitting for many citizens of this section: "He winks. She prinks. He woos. She coos. He said. 'We wed.' Pa sighs. Ma cries. Perambulator. In-laws. Reno."

A fellow went into Dameron's drug store last Sunday morning about a quarter of eleven. "Give me change for a dime, please," he asked. "Sure," said Joe, as he handed him the change, "hope you enjoy the sermon."

By Bearden, who has somewhat of a reputation as a veterinarian in the treatment of cows, horses and sometimes dogs, remarked the other day when he examined a dog's tongue: "he could always see the seat of his pants."

drink large quantities of liquids, preferably water.

For relief from insect bites, wash in cold water and apply mentholatum, baking soda or chloroform to the bite. Rub wasp sting with a slice of onion. Use a paste made of salt, soda and water for the sting of bees. Or use weak ammonia water. Salt, wet earth or cold water may be used for relieving the sting of most any insect, or use spirits of camphor or hydrogen peroxide.

**An Inspiration**  
Whoever you are, be noble; Whatever you do, do well; Whenever you speak, speak kindly, Give joy wherever you dwell.

### Don't Get Excited!

For sometime past certain conditions have been in more or less of a quandary as to peculiar noises pervading the otherwise peaceful atmosphere of Muleshoe during the quiet of early morning hours. The Journal, having numerous reports of such condition, quietly employed Mr. Hawkshaw, famous detective, to make a thorough investigation of the peculiar noises and the causes for such. Here is the answer:  
"All this combination sound of belching and wailing and panting and

ranting and fixing and spitting and clanging and banging and bursting and hissing and howling and puffing and grating and grinding and jangling and bumping and clicking and clanking and chugging and chomping and crashing and growling and gasping and grunting and wheezing and squawking and blowing and jarring and jerking and pecking and rasping and jangling and clattering and yelping and croaking and howling and humming and snarling and screeching and snorting and shaking and scraping and throbbing and crinkling and jangling and quivering and rambling and roaring and tattling and yelling and shrieking—is just the fat women of Muleshoe taking their daily reducing dozen.

### LAMB GETS DRILLING CONT.

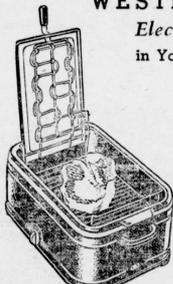

A drilling test for oil and gas well has been closed in Lamb county by C. J. Duggan with J. W. Murchison, representing an unknown oil company well to be located on a 17,000 acre lease located between Littlefield and Ambrose of that county.  
Contract calls for a 5,500 foot hole unless oil or gas is struck before that depth. The lease is said to be along and on both sides of the Santa Fe railroad which runs diagonally across the county. No date for beginning drilling is announced but it is said in the "near future."

Mulshoe Pupils May Snap Fingers At Fire Drill Is Unexpected

When the fire alarm sounded at Mulshoe High school building last Monday afternoon at 3:12 o'clock, so far as the pupils of that school knew, the entire city was a blazing holocaust, yet they marched out in perfect order, the entire building of more than 230 pupils being emptied through the three exits in just 20 seconds. A bunch of layed riffsy ion. s'awd-CTYFD fire flames would have to be strategically located and travel quite rapidly to get one of those boys or girls within its burning grasp.

APPOINTED

New Special Representative of the Public Relations Department of the Santa Fe Railway in the Amarillo Territory is L. J. Cassell, formerly with the Department in San Francisco, and Ex-News-paper Man. He succeeds C. W. Lane who goes to Topeka as Assistant Manager of the Country's Agricultural Development Department.

Returning, Superintendent W. S. Cox tried them out on various signals, to all of which they responded with perfect action. Apparently no parent of any boy or girl in the local school has need of much worry if lightning should hit the high school building, for the youngsters would be out of it in a jiffy.

Prof. Cox explained that similar fire drills are held frequently and at unexpected times so far as the pupils are concerned, such drills being not only for the protection of the pupils during any unexpected emergency, but also because such training brings a three per cent reduction in the key rate of fire insurance to Mulshoe property owners. Similar drills are also held in the Grammar school building.

In addition to the fire drills, written compositions on various fire subjects are required at state intervals of pupils in the ninth and eleventh. In the eighth and tenth grades various fire projects are worked out, and similar instruction is given in the Grammar grades from the fifth on up. Much material for this instruction is furnished by the State Fire Commission at Austin.

Male Emu Hatches Eggs. The oddest thing about the emu is the fact that the male hatches the eggs. He sits on the nest, brooding, and when the young are hatched, he even takes care of the young chicks, and is a fierce and jealous guardian until they are able to look out for themselves.

What's Happening In Washington And Other Cities Of Importance

The U. S. has closed a contract leasing six average warships to Brazil.

Italy has finally agreed to withdraw her soldiers from the Spanish rebellion war.

Of the 28,062 postmasters named by President Roosevelt during his four years in office, 7,108 of them have been women.

A French sub-chaser was bombed by an unidentified airplane in Spanish waters off the island of Minorca last Sunday, setting fire to the vessel. The crew of 25 was taken off safely.

Automobile plants of the U. S. and Canada produced 5,110,000 passenger cars and trucks during the 12 months ending with September, 1937. It is announced. Of this total 4,182,000 were passenger cars and 928,000 were trucks. The total wholesale value being \$2,576,500,000.

With war indications growing more probable every day, the War Department officials, Washington have turned their attention to the investigation of the nation's potash, an important ingredient in the making of gunpowder. Some of these warlike makes may receive development, it is said.

Last Saturday, Oct. 23 was the birthday of the World. It having been created 5,941 years ago, or 4,004. B. C., according to an act of the British Parliament which officially set that date. Scientific investigation, however, indicates the world is probably 28,000,000 years old.

More crop control means more taxes, says President Roosevelt; and to figure out this increased expense so it will not hinder in balancing the national budget, is one of the tasks facing Congress soon to reconvene. Representative Marvin Jones, chairman, House Agriculture committee, and Senator Smith of the Senate committee, are now in Washington trying to work out plans of that big puzzle. No one, apparently, has any idea where the proposed new taxes will hit. Something on the order of a process tax has been suggested.

General News Over Texas And Adjoining States For The Week

The Court of Civil Appeals, Austin has ruled the law taxing slot machines is invalid because of its vagueness.

Broomcorn prices are starting off low in this area this year, from \$50 to \$60 per ton being paid.

A directory completed in Amarillo last week gives that city a population of approximately 35,000 people.

Members of the Baptist State convention, which opens at El Paso, Nov. 9, will go on record opposing the sale of liquor by the drink, it is announced.

Floyd county, this state, with an estimated crop of 5,500,000 bushels of wheat, was the champion county producer of the U. S. this year.

Julian Montgomery, state highway engineer, has ordered that where both state and federal markers are found on highways the state markers shall be removed to avoid confusion. This system is being adopted in most states.

Carroll Wade, 13, Mexico youth, has one of only five "liberty head" medals minted in 1913 said to exist. He found it in some rubbish and has to date refused an offer of \$650 for it; holding out for more money.

The Legislature in special session, last week ordered an investigation of alleged "irregularities in various departments of state activities, including acceptance of free passage on trains and buses. Much extravagance, high prices and dishonest salaries are alleged to be paid.

State Senator Vernon Lemons insists that the Senate in its haste to make reductions had increased them \$883,552,047, instead of reducing them \$5,000,000. Use of the word "each" in an amendment to the general tax bill showed 47 departments had been given \$19,379,771 each instead of that amount for all of them, he said.

42 PARTY PROCLAIMED HUGE SUCCESS BY GUESTS. Friday evening of last week, members of the local chapter of Eastern Star organization sponsored a 42 tournament and Halloween party at the American Legion hall in Mulshoe. About 60 guests attended and a total of \$25 was realized, which will be used for expenses of the chapter.

The hall was appropriately decorated in Halloween motif. There were 15 tables of 42 at play and a delightful musical program was rendered. Glenn Rocky played several piano numbers, Mrs. Inez Bello sang a solo, accompanied by Mr. Rocky, and a quartet of small boys, Loyd Alsop, Lowell Irvin, St. Clair, Buddy Taylor and "Sugar" Glaze, sang two numbers, accompanied at the piano by Miss Lee. A fortune teller located in a private decorated booth interested many present by prophesying their future.

At the close of the enjoyable evening delicious refreshments of hot chocolate and waters were served.

A GOV. COTTON WAREHOUSE TO LOCATE HERE

Charles Lenau Is Now A Qualified Gov. Classifier.

Contract has been let and construction was begun last Wednesday on the Bailey County Cotton warehouse for storing government loan cotton.

The 77 by 150 feet sheet iron building will be located north of the Santa Fe depot across the railroad tracks, and adjoining Warren park, and will be completed in about 10 days, in time to take care of some of this year's cotton crop, according to report.

Charles Lenau, local cotton buyer, has now qualified as a government classifier, and will manage the warehouse for the convenience to cotton growers. This warehouse in Mulshoe will be a great convenience to the cotton growers of this and adjoining counties, as heretofore Littlefield was the nearest warehouse where such staple is received and official classification given. Hundreds of growers in this area will greatly appreciate this new enterprise.

Hundreds View New 1938 Chevrolet On Display Here Sat'y

Chevrolet new model automobiles for 1938 went on display here last Saturday at the Valley Motor Co., headquarters, local agent, hundreds of visitors and prospective buyers enjoying the mechanical improvements and revolutionary design, which is being introduced on all the new 1938 Chevrolts, both passenger cars and trucks.

The mechanical improvements and revolutionary design, which is being introduced on all the new 1938 Chevrolts, both passenger cars and trucks. The mechanical improvements and revolutionary design, which is being introduced on all the new 1938 Chevrolts, both passenger cars and trucks.

The central unit is a spring diaphragm of heavy heat-treated steel, shaped somewhat like a convex disc, or more accurately, a "dished" washer with 18 tapering steel fingers pointing inward from its edge.

The 1938 line, Chevrolet engineers assure, represents important advances over even the highly successful 1937 models. Refinements extend to bodies, both interiors and exteriors, and to numerous units of the chassis, whose design, however, remains fundamentally unchanged. The power plant in both series is the 85-horsepower high-compression valve-in-head six cylinder engine whose most important advances are already familiar to millions of owners throughout the world.

It is noted that Chevrolet's perfected hydraulic brakes, all-steel turret-top bodies by Fisher, and the trouble-free hypoid rear axle. On the Master DeLuxe series, Chevrolet fully-enclosed lane action is starting its fifth year.

Outwardly, the most notable change in the new Chevrolts is their advanced styling, which is especially evident at the front end. The top of the hood sweeps forward from the cowl in a graceful curve, to cap the almost vertical flat-topped radiator and grille. The latter, a radical improvement over previous design, consists of chrom-plated horizontal bars, flowing back from the center line of the grille to blend into the radiator shell. Accentuating these lines, every fifth bar is of double width, pin striped down the center with vermilion enamel. The new Chevrolet emblem, in cream letters on blue, embossed in a die-cast winged shield, is centered at the top. The streamline which introduced a new style note is continued in 1938.

Other important changes extend to louvers, headlamps and their mountings, hood side panels, running boards, and body hardware, interior and exterior. Outside door handles are incised at their ends for greater safety, and embody the vermilion enameled pin stripe found on the grille. The overall effect of the many refinements in the new Chevrolts is one of greater length and rafter, more graceful lines—an impression of fleetness which is confirmed when one takes to the road. Engine advances for 1938 are mainly in the nature of refinement, although a new ad lighter flywheel, in conjunction with the new clutch, affords greater flexibility and quicker response to the controls, and more efficient valves, and certain portions of the cooling system have been re-designed rather than simply refined.

The most notable change in the power plant and its related units is the electrical system, which is entirely new. It consists of a new higher-capacity generator with voltage regulator which adjusts its output at times to the load imposed on the battery; a new starting mechanism of the type furnished on costlier General Motors cars, with over-running clutch and automatic throttle, assuring easy, positive starts; and a new, weather-tight, and accessible battery cover.

Greater body space, and increased stability on the road are provided by widening the rear track from 57 9-16 inches to a full 59 inches. In conjunction

tion with changes in the wheel house design, this makes possible two inches greater width through the rear seat of the car. The longer axle drive shafts and housing necessitated by the change are compensatingly sturdier to take care of their added length.

Bula News Items

Our community is a very busy place at present, cotton picking and cutting feed being the principal duties. Church services were well attended at each church Sunday.

Mr. and Mrs. C. L. Cannon spent last weekend visiting relatives at Clarendon.

PARENTS DAY TO BE OBSERVED ROOM MOTHERS TO BE HOSTESS

Parents day is to be observed in Muleshoe schools in the near future, according to Supt. W. C. Cox, who states that room mothers for each grade have already been named, and invitations are soon to be sent out asking parents of all pupils attending this school to visit it and see their children as they receive instruction. The day will be under direction of the Parent-Teachers association, and these room mothers will be responsible for the entertainment of the parents. Much exhibitionary work will be on display at that time, and with the classes still being heard, parents will have first hand opportunity of seeing and hearing of the progress of their own children-pupils. The principal purpose of the day is toward a more intimate acquaintance

Whooping Cough Is Dangerous Says St. Dr.; No Immunity

"To the very young there is no other disease as dangerous as whooping cough," states Dr. Geo. W. Cox, state health officer.

"In addition, there is no other disease causing an equal amount of suffering of which parents show so much inexplorable disregard, not only for the safety of their own children, but also for that of their neighbors' children.

"There does not exist a natural immunity against whooping cough during the first six months of life as there does for measles. It is at this age that whooping cough strikes its hardest blow, and over fifty per cent of the deaths occur in children under one year of age.

"Whooping cough is usually transmitted by direct contact with the secretions of the mouth or nose, and only a very short exposure is required to contract the infection. Handkerchiefs, drinking cups and toys may also transmit the infection.

"The infection is communicable from the appearance of the first symptoms and is most contagious at this early period when the nature of the affection can only be suspected. The incubation period is commonly seven days.

A slight fever, running of the nose, and a cough make their appearance so gradually and insidiously that a diagnosis is practically impossible unless a history of exposure is obtained. "When the whoop appears there is no mistaking the disease. If there is whooping cough in your community, keep other children away from your little children and keep your children at home. Call your family physician early. Isolation of all cases for at least two weeks from the development of the characteristic whoop should be rigidly enforced."

P.-T. A. SPONSORS PROGRAM PRELIMINARY TO STATE HONOR

Friday night, Nov. 12 the local Parent-Teachers association will sponsor a 3-part literary program to be given at the High school auditorium under direction of Miss Trannie Mae Russell, expression teacher.

The first part will consist of a beauty contest in which young women between the ages of 14 and 23 years are eligible to participate. The winner will be sent to San Antonio to participate in a state program of similar nature.

There will also be a Shirley Temple parade open to children from two to 12 years of age, the winner to receive a nice dress, also, a trip to San Antonio, if properly chaperoned.

An amateur contest will be open to all people, the winner enjoying a trip to San Antonio with all expenses paid. Three disinterested judges not acquainted with the participants of any part of the program will render winning decisions.

PROGRESS CLUB MEETING

The Progress H. club met with Mrs. Tom Radney, Oct. 19 "How We Are Governed," was discussed by all. Officers for 1938 were elected: Miss Elzada McMahan, president; Mrs. Harold Mardis, vice-president; Mrs. Marion Springstube, secretary-treasurer; Mrs. Charles Long, council delegate; Mrs. Harold Mardis, kitchen demonstrator.

Those present were: Mrs. Charles Long, Mrs. Russell Bearden, Mrs. Harold Mardis, Mrs. Springstube, Mrs. Gross, Miss Bessie Vinson, Miss Eunice Humphrey, Miss Elzada McMahan and hostess, Mrs. Tom Radney.

Enochs Echoes

Officers Are Elected The Enoch's H. D. club met at the home of Mrs. E. N. McCall Wednesday of last week and elected new officers for the following year: President, Mrs. E. W. Brewer; Sec.-Treas., Mrs. Ray Seagler; Council delegate, Mrs. Maxie Harroli; Council delegate, Mrs. Roy Nelson; Reporter, Mrs. Homer Green; and Farm Food Supply demonstrator, Mrs. Roy Nelson.

Plans were made for Enoch's club Achievement day, Nov. 3. Everyone has a special invitation to attend as we are planning on having a worth while exhibit.

After club adjourned, Mrs. E. N. McCall, Misses Frances Harris and Nadine Nickelson entertained with a wedding shower honoring Mrs. James Cash, who was formerly Miss Vida Parker. She received many useful gifts from her many friends. The following guests were present: Mesdames James Beck, John Butcher J. W. Butcher Jr., Guy Berry, Grace West, Hubert Dennis, Frank Griffith, Roy Nelson, J. T. Burns, W. R. Adams, Dutch Cash, J. F. McGinnis, A. V. Pepper, John Beck, Ray Seagler, Will Nickelson, Ray Tigert, A. A. Alexander, A. E. Ford, Jack Doby, Homer Green, Misses Lena Snitker, Lillie Mae Weed, Francis Harris, Nadine Nickelson and Mrs. E. N. McCall.

Mr. and Mrs. L. G. Harris are the proud parents of twin girls, born Oct. 19.

Mr. and Mrs. G. P. Howell were in Lubbock, Monday of this week.

Ginning season is in full swing in this community. Everyone is rushing to get their crop gathered.—Reporter.

HUNTERS GETTING READY

Several citizens of Muleshoe and elsewhere in Bailey county are this week gathering up camping outfit, polishing guns and making other necessary preparations for the opening of the big game season near at hand.

Some will hunt in Southwest Texas while others will invade the mountains of adjoining New Mexico. A fair supply of game is reported awaiting these modern Nimrods.

Buy it in Muleshoe.

FARM TOPICS GRASS FLAVOR IN MILK UNNECESSARY

Keep Cows From Any Greens Few Hours Is Advised.

By Dr. O. F. Garrett, Instructor in Dairy Husbandry, New Jersey College of Agriculture.—WNU Service.

Nothing puts that desirable "June" flavor in milk quite so successfully as tender green grass, but in order to avoid the undesirable odor and flavor which nearly always occurs when cows are first turned on pasture, it is necessary to observe caution in the pasturing practice.

Research workers at the California and Oklahoma Agricultural Experiment Stations have shown that if cows are kept away from roughage, especially green roughages, at least five hours before milking very little of the "feed" flavor will be found in the milk. This same procedure can be applied to pasturing practices. The cows can be turned on pasture immediately after the morning milking but they should be removed to a dry lot or barn at least five hours before the next milking.

If this practice is followed for the first two or three weeks in the spring, there will be very little of the undesirable grass odor and flavor in the milk. This practice will even eliminate most of the wild grass or onion flavor if these plants are found in the pasture. At the same time, the cows will have enough time to consume the necessary quantity of grass to supply the required milk yield.

To get the very finest flavor in milk during the pasture season, it is suggested that this procedure be followed throughout the entire time.

Forcing Breeding Hens By Increasing Protein

Forcing breeding hens by increasing the amount of protein in the ration may be done with no ill effects if an abundance of green feed is supplied. Recent experiments conducted at the Oklahoma agricultural experiment station show that the mortality of the breeders fed green feed was not increased by forcing, observes a writer in Successful Farming. Green feed protects the hatching qualities of eggs produced by forced breeders. Rations with a protein content as high as 28 per cent may be fed without injury to the hatchability of eggs if sprouted oats, alfalfa meal, or some other green feed is fed each day. Where forcing is done by increasing the protein in the feed and using lights, the use of green feed is especially important to maintain good advances in the total egg production.

Clean Water for Ponds

A location that will allow drainage from only clean pasture or meadow should be chosen for the farm pond, says Marion Clark of the Missouri College of Agriculture. Water from barnyards and lots should never be allowed to drain into stock ponds. Where it is necessary to construct a pond where water from lots would normally drain into it, terraces should be used to intercept the contaminated water and carry it to another watershed where it will not pollute the pond water.

Grain Mixture for Poultry

There are several grains or combinations of grains that give satisfactory results, but the one most commonly used in all sections of this state, says a North Carolina State college poultryman, is composed of 60 per cent yellow corn and 40 per cent wheat. However, this ration should be largely governed by what is grown on the farm, and the cost of the grain which must be purchased. Where there is an abundance of heavy barley (48 pounds to the bushel) or heavy oats (38 pounds to the bushel) these may be substituted for a part of the corn and wheat, but should never exceed 30 per cent of the grain mixture.

Agricultural Notes

Hogs yield a greater proportion of edible meat than any other meat animals.

It is found that seven out of every 100 farm fires start when sparks land on a roof.

Among spring-seeded pastures, oats give the greatest pasturage in the shortest time and at the least cost.

Milk cows require from 100 to 300 pounds of water daily, it is stated by the Missouri experiment station.

More than 50 kinds of fruits and vegetables are of commercial importance in the United States.

For the past ten years the tobacco crop in the United States has averaged about 1,350,000,000 pounds grown on 1,740,000 acres and having an estimated farm value of \$214,000,000.

LEGAL

NOTICE TO BIDDERS Sealed proposals addressed to George Johnson, President of the Board of Trustees, Muleshoe Independent School District, Muleshoe, Texas, for the construction of an Auditorium-Gymnasium at Muleshoe, Independent School District, hereinafter called the "owner," in accordance with plans, specifications and contract documents, prepared by and may be obtained from Hayes & Strange, Architects, 511 Merrick Building, Lubbock, Texas, will be received at the office of the Superintendent of Schools until 2:00 P. M., November 12, 1937, and then publicly opened and read aloud. Any bid received after the closing time will be returned unopened.

MECHANIC OR WORKMAN SKILLED MECHANICS

Table with 2 columns: Trade, Wage Per Day. Trades include Acetylene Cutter, Caulker, Bricklayer, etc.

MECHANIC OR WORKMAN SEMI-SKILLED WORKERS

Table with 2 columns: Trade, Wage Per Day. Trades include Apprentice, Caulker, Handy Man, etc.

LEGAL

opened and read aloud. Any bid received after the closing time will be returned unopened. The Owner expects to have available not to exceed \$20,000 for this contract. A cashier's check, certified check or acceptable bidder's bond, payable to the Owner in an amount not less than five per cent (5%) of the largest possible total for the bid submitted, including consideration of the additive alternates, must accompany each bid. Attention is called to the fact that there must be paid on this project not less than the general prevailing rates of wages which have been established by the Owner as follows:

MECHANICS Wage Per Day Wage Per Hour

Table with 2 columns: Trade, Wage Per Day, Wage Per Hour. Trades include Caulker, Bricklayer, etc.

MECHANIC OR WORKMAN SEMI-SKILLED WORKERS Wage Per Day Wage Per Hour

Table with 2 columns: Trade, Wage Per Day, Wage Per Hour. Trades include Apprentice, Caulker, Handy Man, etc.

For all overtime, 1 1/2 of above scheduled wage rate shall be paid; for all holidays as designated by local labor unions, double above scheduled wage rate shall be paid.

In case of ambiguity or lack of clearness in stating prices in the proposal, the Owner reserves the right to adopt the prices written in words, or to reject the proposal.

The Owner reserves the right to reject any or all bids and to waive any or all formalities.

Plans and specifications may be examined without charge in the office of the Architect, or may be procured from Hayes & Strange, Architects, 511 Merrick Building, Lubbock, Texas, upon a deposit of \$10.00, a guarantee of the safe return of the plans and specifications, the full amount of which will be returned upon the return of the plans and specifications within ten (10) days after receipt of bids. Additional sets of plans and specifications may be procured upon the payment of a deposit of \$10.00 each, as a guarantee of their safe return within thirty (30) days from date of opening bids, in which event \$5.00 (amount of deposit less actual cost of reproduction of the deposit) will be returned.

MULESHOE INDEPENDENT SCHOOL DISTRICT

By George Johnson, President of Board of Trustees. Publ. Oct. 28, Nov. 4, 1937

will proceed to the hearing and adjudication of this suit as if the said J. N. Scott, R. A. Tipton and W. B. Arnold, and each of them, had been served with process in this cause.

IT IS FURTHER ORDERED that this order be published in the MULESHOE JOURNAL, a weekly newspaper published at Muleshoe, in Bailey County, Texas, once a week for six successive weeks.

Dated, this the 22 day of October, A. D. 1937.

T. Whitfield Davidson, United States District Judge.

I hereby certify that the foregoing is a true copy of the original thereof now in my office. Attest: 10-25-37.

By GEO. W. PARKER, Clerk by Olive Fluke, Deputy. Publ. Oct. 28, Nov. 4, 11, 18, 25, Dec. 2, 1937.

INSTALL AUTOMATIC HEATER

The Western Drug store this week installed a gas-electric automatic heater in their place of business. It occupies a position on the ceiling of the store out of the way of customers and furnishing that much more room for their crowded space.

This heater, a practically new type and the first installed in this section of the country, may be set for the temperature desired and automatically holds that degree of heat without further attention. It is said to be very cheap in operation, and a great convenience.

SINGING AT Y Y NEXT SUNDAY

The Bailey County fifth Sunday singing will be held at Y Y next Sunday, according to announcement of Zela Robinson, president.

It will be an all day affair with dinner on the ground at the noon hour, and everyone is invited to attend.

A large number of song leaders, trios quartets and chors from all over Bailey and adjoining counties is expected to attend and take part in the warbling of melodious harmony on that occasion.

## Ford V-8s Score Clean Sweep in Argentine Road Race

Ford V-8s finished first, second, third and fourth in the 277.5-mile Argentine Grand Automobile Race for 1937 in which 69 cars of a dozen well-known makes competed. Part of the throng which cheered the winner, Angel Lo Valvo, as he swept over the finish line in La Plata in his V-8 coupe is shown above. Lo Valvo's driving time for the rugged course, over highways and mule paths, mountains and plains, was 89 hours 36 minutes, an average of 53.13 miles an hour. Only 19 cars finished, and 10 were Fords, including one Model A. (Inset) Lo Valvo, in white, and his mechanic smile over their smashing victory.

## THE REST OF THE RECORD

By James V. Allred  
Gov. of Texas

As this column is written, the Legislature has only three more days of actual work. I don't know whether they will have passed any substantial tax bill for the people's program. At this time the outlook is very doubtful.

In any event, it seems to be conceded that I was right in refusing to submit appropriation bills which some of the Senators said they wanted to revise after they had voted for them during the regular session. On Tuesday of last week one of the leading writers for a big daily said my judgment that the submission of appropriations was impractical had been vindicated by the action of the Legislature itself.

The record shows that after some of the Senators had told thru the newspapers about what they would do if I submitted appropriations to them, they suddenly decided that I had done so and accordingly considered economy wide open to them. The Senate passed one bill affecting the state departments without a hearing and sent it over to the House. Then they admitted the bill would have to be worked over BUT they didn't do anything at all with reference to economizing on the education bill which they had voted out last spring with the biggest increase of all the appropriation bills. Furthermore the Senate did nothing on the judiciary

bill which had substantially increased the salaries of all the Judges.

These bills didn't even get out of committee and Senator Stone, who had been one of the loudest of all in saying that he would economize voted to put off any hearing on these bills, even in committee.

With only eight days left to work, the House of Representatives passed a resolution asking me to submit appropriations for economy; BUT even the author of the resolution said on the floor that his purpose was to "put the monkey" on the Governor's back.

I knew that if I were to submit appropriations the Legislature couldn't revise them intelligently in so short a time when they had considered appropriations for four months before. I also knew that to get the subject on the calendar would block absolutely the chances of passing any tax bill to finance by economy the aid to the blind, to dependent children, the old folks and the teachers. All they could hope to do even if they passed economy bills would be to reduce the deficit in the general fund out of which the general operation of the government is paid.

There has been so much talk about how much money the so-called "economists" could save by abolishing the liquor board that I want the people to have the facts.

In the first place, we wouldn't have any enforcement law. In the next place, the present administrator, Bert Ford,

collected in his first ten months of service a million dollars more than was collected in the preceding ten months. Thus, he has collected enough additional money in ten months to more than pay the operation of his entire department for over a year and enforced the liquor law in addition.

### MULLESHOE RAISES \$40 FOR BOY SCOUT ASSISTANCE DURING YR.

Mulleshoe was the first town in the Northwest district Boy Scouts to go over the top in the sustaining membership drive for funds to carry on such work in this district, according to S. C. Beavers who, with R. S. Watkins have raised about \$40 to be used in Boy Scout work in Mulleshoe, and more money is still coming in, Beavers said.

The Northwest District Court of Honor is scheduled to be held at Littlefield Nov. 9, beginning at 7:30 p. m. and preparations are being made for an interesting program. Troops from Mulleshoe, Anton, Amherst, Sudan and Bula are expected to attend and take part. Floyd Coffman, district chairman, will preside.

### CIRCLEBACK WILL BROADCAST

Bailey county will go on the air at 1:30 p. m. Friday, Nov. 12 over station KPYO at Lubbock.

Plans are being made for Circleback 4-H club to have charge of half the program. A quartet composed of Circleback club girls will have charge of the singing and six other Circleback girls will have a part in a skit Mrs. Ollie Damron, club sponsor, will have charge of the program.

## MULESHOE WINS OVER AMHERST FRIDAY, 26 TO 0

### Play Powerful Sudan Team At Sudan Friday P. M.

Muleshoe High school yellow jackets defeated the Amherst football squad in a snappy, yet rather one-sided game played here last Friday in a score of 26 to 0.

The game was replete with good plays of an interesting nature and hotly contested throughout. The local lads were perhaps a few pounds heavier than their rivals; but the visiting team did some good aerial work highly commendable.

Robert Parsons scored the first touchdown for the Yellowjackets; but interference on the part of opponents obviated the goal kick which followed. Woodie Lambert made a pair of touchdowns, Frank Prescott kicking goal, then Don Moore made the last touch-down. Prescott again booting the pigskin over the line between goal posts.

Many fans present remarked regarding the much better playing done by the locals, especially during the last half of the set-to, when they held their rivals in practically every play. Horace McAdams and Geo. Hill deserve commendation for outstanding playing, especially of a scrimmage nature, while good support of plays was rendered by all members of the team.

Coach Stevens also played all his substitutes before the game ended. Pep Squads for both teams were present in full array of dress colors and proverbial yells to encourage their respective team players. The Amherst girls put on a display march between halves greatly appreciated. Excellent sportsmanship between teams was shown throughout the entire game.

Prof. Glen Daugherty, Bula, was referee. Much regret is expressed over the injury a fractured bone received by one of the visiting players in one of the pile-ups. Apparently, it was unavoidable—just one of the bad "breaks" that come occasionally in such games, nevertheless, the injury is much regretted by both officials and players.

Muleshoe lads go to Sudan Friday of this week to mix it with the western Lamb county team. Just how the game may turn out is all conjecture. Sudan has a hefty bunch, its center reported weighing 220 pounds, a couple of "moon fixers" who can reach up to the stary heavens for passes, and plenty other beefsteak among its players. However, encouraged with the victory of last Friday plus the added training and work-outs being given the lads this week, Coach Stevens feels confident of bringing back home the long end of the score.

### NEW BUS ROUTES PROPOSED

Application for bus and freight truck routes from Muleshoe to Needmore, Baleyboro, Enochs and on to Morton have been made to the State Railroad Commission by the Bowmen Bus Co., and Garrison Truck Line Co., Lubbock, the same having been endorsed by the Muleshoe Chamber of Commerce.

While they did not come up for hearing at the meeting of the Commission last week, yet it is anticipated they will be given a hearing in the near future.

## 25 DIFFERENT MAKES OF AUTOMOBILES FORDS AND CHEV. VIE FOR LEADERS REGISTERED UP TO DATE IN BAILEY CO.

The automobile business, like that of the bank or post office, is frequently taken as an index of the general business prosperity of a given section, and is generally quite correct. While the Journal is not at liberty to publish the number of cars sold by Bailey county dealers, since there are only two different car agencies in the county, yet it can say that sales this year have been much heavier than during 1936, and with new models now coming out, heavy buying is anticipated during the coming weeks and months remaining of 1937.

People frequently wonder just how many cars, and how many of the different makes there are in a given county, and a representative of this newspaper actually made the count according to the records being kept at the tax collector's office in Muleshoe, finding there were 255 different kinds of passenger cars and trucks owned by citizens of Bailey county.

That most citizens of this county are of the medium class as to riches and desires, is indicated in the fact there are more Fords and Chevrolets owned than of any other make. In a similar system of reasoning, there are only two of the wealthier class of folks, such de-

DATUS E. PROPER  
He was last week appointed executive manager of the Texas Good Roads association, succeeding Col. Ike Ashburn. Headquarters of the association will be moved from Houston to San Antonio.

### Young Trees May Be Secured At Lubbock Planting Profitable

Young trees of several different varieties adaptable to Plains growth may be secured again this year at the State Experiment station, Lubbock. Last year several hundred of these trees were obtained by Bailey county citizens, and the accommodation is again available, though it is urged those desiring them place their orders early as the supply is limited.

Most of the trees may be secured at the rate of \$1.00 per 100, and must be ordered in lots of not less than 25 of each kind. Some larger trees are furnished at \$2.00 per 100.

Application blanks for tree orders may be secured from the county or home demonstration agent at their office at the court house in Muleshoe. The good effect of proper land preparation for planting of young trees has been demonstrated by a few of those who put out trees last spring for windbreaks according to a recent report by the county agent who has recently inspected these demonstrations.

G. A. Davis of Maple, has one of the outstanding demonstrations of last season's planting. He has 100 live healthy trees out of that number purchased. He plowed the area well and threw the soil out to leave a furrow where the trees were to be placed. This provided for catching and holding more moisture than would have other wise been possible.

John S. Williams of West Camp had a loss of only two or three trees out of 100 planted. Good methods of preparation is considered the main factor in the large percent of trees saved.

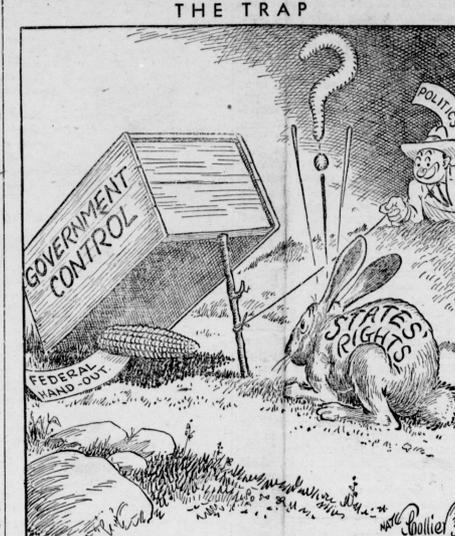

Those who visited the tree planting at Needmore, supervised by U. A. Ranolph of Lubbock Experiment station, saw the method of preparation demonstrated and heard Mr. Ranolph's discussion in which he emphasized land preparation. Poor results in getting trees to live have been noted where no preparation was made but where small holes were dug and trees set without working the land.

More than 40,000 tons of potash has been shipped to Japan recently by a potash firm at Carlsbad, N. M., most of which will go into war munitions.

duction being made in the fact that only one Lincoln Zephyr and one Cadillac are registered, though there are exceptions to both rules.

Records kept at the tax collector's office show there have been 1,038 passenger cars, 197 commercial trucks and 184 farm trucks registered this year, an increase of approximately five percent in registrations over that of last year. Three different orders have been made for plates this year, according to W. E. Renfrow, deputy collector.

The various makes and number of each registered this year to date is as follows: Fords, 360 passenger, 94 trucks; Chevrolets, 365 passenger, 104 trucks; Willys Knight, 3 passenger; Dodge, 18 passenger, 7 trucks; Pontiac, 21 passenger; Chrysler, 6 passenger, 2 trucks; Plymouth, 39 passenger, 1 truck; Buick, 25 passenger; Graham, 1 passenger; Studebaker, 8 passenger; Oldsmobile, 4 passenger; Oakland, 5 passenger; International, 19 trucks; Whippet, 5 passenger; Terraplane, 4 passenger; Nash, 2 passenger, 1 truck; Lincoln Zephyr, 1 passenger; Desota, 1 passenger; Reo, 1 passenger; Durant, 1 passenger; Devoex, 1 passenger; Diamond T, 2 trucks; Cadillac, 1 truck; GMC, 3 trucks; Nash, 1 passenger.

### SENATOR G. H. NELSON FAVORS ALL ACTUAL NEEDED EXPENSES; BUT IS AGAINST ALL THOSE NOT NOW REQUIRED

That Senator G. H. Nelson, this district has taken quite a reasonable and fair-minded stand in the muddled legislation which has been going on during the special session, is clearly evident from the contents of a letter received by the Journal editor this week from Mr. Nelson.

The Senator declares his favor of carrying out the mandates of the citizens in all pension matters decreed, of taking care of school needs, of holding former appropriations as needed to their former figure, and at the same time reducing state expenses as much and as rapidly as follows: is letter to the Journal is as follows:

"Although I favor economy in State government, this does not mean that I favor sacrificing either the pressing needs for Social Security or the reduction in necessary appropriations to support our education institutions. I have assumed the position as taken by the framers of our Constitution that Democracy can survive only by means of education of the masses and special preparation for their work.

"I make no apologies, therefore, but on the other hand, am happy that I, as your senator, together with the aid of your representative, have been successful in our efforts to defeat any cut in the appropriation made for Technical College. The fight is over in that respect, and we have won an important battle so far as our section of the State is concerned.

"Likewise, I make no apologies for voting for such necessary tax as may be needed to adequately finance our secondary schools, and more particularly, to secure the needed revenue to carry on the transportation of Texas school children to Texas school houses. Certainly, I favor the elimination of all unnecessary departments, bureaus, and commissions, and the elimination of all unnecessary employees in those that may be retained. This has been my program in the past and has, I think, been well demonstrated by my votes in the Texas Senate. During this session I have tried to abide the mandate of the people to provide adequate revenue for the blind and dependent children, for the Teachers' Retirement fund, and for Old Age assistance. I have done my best to raise this revenue from sources as would be least oppressive on the masses of the people, and to levy a tax to secure this needed money as far as possible on the non-essentials of life.

"In this program I have had the full cooperation of my constituents. Not one letter of criticism has been received by me during this session as to the position I have taken on these matters, for all of which I am happy and deeply grateful."

### Maple Wilson Makes Experiment With A New Type of Silo

A new type of silo, consisting of fence wire, feed bundles and building paper has been constructed by Maple Wilson at his feed lots in south Bailey county where he will feed about 1,000 lambs this winter. This plan is experimental with him, and he is not recommending it for general use, at this time, according to County Agent W. C. Taylor.

Taylor recently inspected the structure and is of the opinion that the more substantial construction the plan may meet with favor among farmers. The Wilson silo is temporary in construction and it is intended the feed so stored will be used at an early date.

The structure consists of light wire fastened to the inside of posts set to make a rectangular storage space similar to the shape of a trench silo. Feed bundles have been used as reinforcement and are placed inside the wire in an upright position. Building paper forms the inner lining of the container to make it more nearly air tight.

Mr. Wilson has also stored this year more than 1,000 tons of silage in a trench made on the usual trench silo plan. An additional large amount of this kind of feed stored at the same place last year is still available.

Gov. Bailey of Arkansas, who had himself nominated by the State Democratic committee to succeed the late Jop Robinson as U. S. senator from that state, apparently is not so hot with his own folks as he was defeated by Rep. John E. Miller in a state election held last week. Both Robinson's widow and Senator Hattie Caraway supported Miller.

### McCulvey Well Cored Some Salt Water Is Found; Enochs Drills

A drill stem coring test was made last Friday night of the J. O. Whittington No. 1 McCulvey oil test well being drilled in southwestern part of this county, at which time a section of the hole from 4,150 to 4,236 feet showed an accumulation of drilling fluid of which the last 150 feet showed salt water. No oil nor gas was present, though it is reported that previously a small streak of sulphur had been encountered, also, a rainbow of oil. This well is being drilled by the center of labor 12, league 182, Presidio county school land belonging to McCulvey. Drilling is being continued this week.

There were 16 oil men, representatives of different major oil concerns present to witness the coring process, all of whom took away with them samples of the lower water encountered.

Atty. Cecil H. Tate, Geo. Johnson and Dr. A. E. Lewis, Muleshoe were also present to witness the test.

In the George Ets Enochs well, also drilling in the southern part of Bailey county in labor 66, league 182, Floyd county school land, much difficulty is reported having been had with a stream of clear water encountered at 1,970 feet level, 100 bags of cement being used to case it off. That work has now been completed, according to report, and the well is now drilling in anhydrite and red rock at a depth below 2,000 feet.

Federal agents are this week trying to recover approximately 700 bottles of elixir of sulfanilamide, a new medicine of which little is yet known other than it is a deadly poison. 41 deaths having already been traced to its use.

### SUBSCRIPTION BARGAIN DAYS NOW READY FOR YOU

Bargain days on various daily newspapers are now at hand, and the Journal office can save subscribers money on many of these subscriptions either singly or in conjunction with new or renewed Journal subscriptions.

While the cost of producing a newspaper has considerably advanced, the subscription price of the Journal is still being maintained at the same rate for the present. Some of the daily newspapers have increased their subscription prices; but using the clubbing rates this office is authorized to grant, subscriptions may still be received at real bargain prices.

This office can also save subscribers money on any magazines published in the United States, whether purchased singly or in groups. It is authorized to present several group magazine subscriptions in conjunction with the Journal at exceedingly low rates.

Come to the Journal office and save money on your reading materials for the next year!

### Bailey County Club Girls Win In Contest Held At Canyon Sat.

Six 4-H clubs in Bailey county were represented at the Canning and Clothing contest held at Canyon last Saturday. Bailey county had more club girls and sponsors than any other county in District 2.

Clothing and canning contests for Districts 1 and 2 which cover the entire Panhandle, were held at Canyon to replace the Annual Short Course held at A & M college, called off this year because of a paralysis epidemic.

Bailey county entered two girls and both won places: Barbara Lindsley of Stegall club won third on canned beans and Opal Snitker of Bula won second on clothing.

Mrs. Dora R. Barnes, clothing specialist from A & M college had charge of the clothing contest held in the home economics laboratory of W. T. S. T. C. and Miss Grace Neely, food preservation specialist also from A & M, had charge of the canning contest.

A crowd of 200 attended. Most of the 26 county home demonstration agents of the two districts were present.

A tea was given for the group from 9:00 to 10:00 o'clock in the college cafeteria by the Randall County Home Demonstration Council.

Bailey county Sponsors attending were: Mesdames Grace Snider of West Camp and Mrs. Joe Howie of Stegall. 4-H club girls attending were: Mary Doyle and Bobby Nell Sullivan of Fairview; Barbara Lindsley of Stegall; Roba Winkle, Ethel Lee Smith; Helen and June Arnold of Baleyboro; Doris Churchill, Dorothy Jones and Florence Stone of Muleshoe; Opal Snitker of Bula; Peggy Williams, Juanita Hughes, Wilma Louise Snider and Isla Lee and Bernice Herrington of West Camp. The Bailey County Agent Miss Alma Stewart, also attended.

### BAILEY SCHOOL STARTS NOV. 1

The Bula public school in eastern Bailey county, which had dismissed a month for cotton picking, will reconvene Monday, Nov. 1, according to Supt. Glen Daugherty.

### BIG ORANGE BUSES SUPPLANT THE LITTLE RED SCHOOL HOUSES OF BAILEY COUNTY CARRYING 1,400

Instead of the proverbial "little red school house" when this section of West Texas was settled its citizens had much higher ideals as regards education for their children and big brick schoolhouses embodying large districts came in vogue. Even smaller districts which were organized during the pioneering days of early settlement, sensing the advantage of the larger districts and where more teachers were employed and better curriculum prevailed became consolidated with other districts for better educational training and less expense.

Today there are 28 buses instead of several little schoolhouses dotted over the county furnishing accommodation to about 1,400 pupils to receive transportation to and from their respective schools, about 1,100 of these pupils' transportation being paid for by the State at the rate of \$1.00 for grade pupils and \$2 for high school pupils. Each bus carries an average of 40 pupils.

If a pupil is lucky enough to reside on the bus route the school is practically at his front door. Some pupils must walk or be transported a mile or more to the bus route to a bus "stop" which is always located at the most convenient

### ESTIMATES ON CROP PLAN IS ABOUT MILLION

#### Aggi Dept. Says It Will Need \$700,000,000 For Surplus

Washington—The new farm program, part of which Congress must finance from new taxes cost one billion dollars in its first year.

Agriculture department experts and others have estimated a probable cost of \$700,000,000 for surplus crop control. President Roosevelt said in his revised budget estimate that 1937 cotton loans would cost \$900,000,000. Some believe that roped corn loans (if granted) easily could cost \$170,000,000 considering that this year's crop forecast runs 1,000,000,000 bushels above the 1936 yield and that approximately \$150,000,000 was lent on the 1934 corn loan program.

The cotton loans have been shouldered by the treasury, but Mr. Roosevelt has made it plain Congress must find a way to pay for the new farm act to be asked of the special session convening on Nov. 15. If there is to be a corn loan program, some believe it may have to be mandatory action of Congress and probably financed from new sources of revenue.

Administration leaders want crop control legislation. At the same time President Roosevelt expresses a desire to balance the budget in the fiscal year 1939.

In letters to Chairman Smith and Jones of the Senate and House agricultural committees, he said, "It is especially important that any new legislation should not unbalance the expected balancing of the budget." Any additional obligations on the treasury, he said, should be "backed 100 per cent by receipts from new taxes."

### Many Farmers Are Filling Silos Now With Year's Silage

The filling of several large new trench silos in the central and south part of Bailey county were reported this week by W. C. Taylor county agent, who has been recently cooperating with the farmers in this work.

A 200 ton capacity trench was being filled at L. E. Smith's place, southwest of Baleyboro last week. He has a good herd of dairy stock to utilize this feed.

L. A. Corbell and D. P. Brinker of the same community, are filling trenches of similar capacity. W. E. Laney near by, expects to store enough silage for a small herd of dairy stock, which is one of the many activities he is carrying out under a whole farm demonstration in which his entire family has cooperated with the county and home agents this year.

A. J. Neutzler of Watson; Hoyt Slappe of Stegall, R. D. McCormick and E. Harry of Enochs; Black Brothers of Longview; W. A. Mathis, Fairview; G. W. Dameron, Circleback, are among others who have recently put in new silos.

Several new ensilage cutters have been purchased by silo owners of this county this year, some of which are being used for custom cutting after their own pits have been filled.

### MAKE STREET IMPROVEMENT

Several of the principal and secondary streets of Muleshoe are being resurfaced this week and put into better condition, also some new stretches of curbing blocks being opened for more comfortable travel by the City Commission, much to the appreciation of the driving public.

Just how extensive the work would be Mayor Lewis was unable to state but said all available funds in that direction would be used.

## WEEKLY LAY SERMON RELIGION vs. POLITICS

By JESS MITCHELL

Considerable stir has gone abroad in this land since a few weeks ago a Pittsburg newspaper published the revelations of Justice Hugo L. Black's connections with the Ku Klux Klan in Alabama, and no little condemnation has been heaped upon that statesman jurist because of such allegations. This writer holds no brief of any kind for that organization. He does not favor any society, no matter how patriotic its motives, which has for its purpose the annihilation of any other sect or race of people, and the Klan certainly is decreed against Catholics, Jews and Negroes. In Democratic America there is no place for bigotry, intolerance, race nor religious prejudice; but I do highly favor any legal or moral means or method available toward welding in to a solidarity the ideas and ideals of this great nation toward the betterment and perfection of its mutual welfare and advancement. Mr. Justice Black is to be commended in that a few weeks ago he candidly admitted once being a member of the Klan, his throwing away of that membership card given him by officials of that order, and his insistence of freedom from any bias, bigotry or other mental condition which would in any way invalidate or even color his position as a member of the Supreme court. The U. S. Supreme court is to be commended in that following its recent reconvening, when charges of illegality were preferred by a certain gentleman attacking the right of Mr. Justice Black to serve as a member of that high tribunal, it refused to even consider such question, thus giving further evidence of the fairness and lack of partiality of that honored and august body.

Congressmen unfavorable to the President's appointment to the Supreme court bench should have been forewarned when, just a few days before adjournment, Senator Bankhead put into the record a number of letters from prominent Catholics, Jews, Negroes and foreign-born of that state, highly commending Mr. Black for his broadmindedness as an American statesman, and expressing in no uncertain tones their confidence in his ability and judicial capacity. These letters were all addressed personally to Mr. Black, and this gentleman had penciled notes on each indicating whether the writer was Catholic, Jew, Negro, or foreign-born. There were 35 of such coming letters read into the Record without at that time producing any adverse comment or apparently a single interjection from fellow-congressmen. If it is true Mr. Justice Black was and is still a member of the Klan this writer pays respect so much to that fact; but rather to his astute and adroit manner of handling the situation at that time. However, he now claims no affiliation of any kind.

Now that the appointment has been recommended by Dr. Roosevelt and seconded by Congress, there is perhaps nothing that can be done by that executive or his legal compatriots, since the only way he can be unseated is by death or dishonorable service of some kind. We do not anticipate the former very soon nor expect the latter at any time. Whether his decisions as a member of that high tribunal will be influenced in any way because of any alleged affiliation with the Klan, time alone will tell; but it is our opinion that Mr. Black will put the welfare of his nation ahead of the personal or corporate welfare of any one citizen or group of citizens, and after all the Klan was organized for patriotic purposes, though many citizens of our land may not agree with its avowed methods of securing such.

This recent protest serves to call attention to the lament that politicians of today are not permitted by the public generally to become elected to office and to serve the nation in a free and untrammelled manner as they should. There have become so many organizations, societies, churches and so on in this nation it is practically impossible for a stalwart, independent, self-thinking man to be the success in a political career he might otherwise be; but for these influencing hindrances.

Too many candidates are forced to pretend they are Christians with liberal tendencies, Catholics with Protestant proclivities, temperance men with slight or occasional abstinence, or while they do not belong to any denomination, yet their wife is a strong Baptist, their father-in-law a prominent Methodist, their sister a devout Presbyterian, etc. ad infinitum, ad nauseum. The result of such a situation is to frequently elect men to office who are lacking in desired principle while hypocrisy receives its reward.

Government is supposed to be a matter of political economy, not religious theories, and it should be entirely secular. Religious ideals of candidates should be subservive to their ability as statesmen. It is not necessary that a statesmanship that one believes in the inspiration of the Bible, accepts or rejects infant baptism or adult immersion; that one should uphold the immaculate conception, believe in the single or double procession of the Divine Spirit, or the particular eschatological theory. Religious ideas are supposed to be personal and private, while ideas and ideal of political economy are public, affecting the welfare of all the people.

Our form of American government is not supposed to have anything to do with religion. It is neither pagan, Mohammedan nor Christian. Its constitution grants all individuals the right to worship God according to the dictates of their own consciences, and nearly every form of religion under the sun is now represented in this country with its more or less adherents. Just as long as the ballot is biased by religious views, just that long will hypocrisy reign supreme in governmental affairs and political candidates, hiding their personal religious ideas, will flatter those of different opinions, pretend to agree with some whose ideals they may even despise, and will crawl in the dust for preferment at the polls, while honest men will be trampled under foot.

In my personal opinion many denominations are too fastly becoming political organizations. It is a notable fact that most Catholics are Democratic; Congregationalists and Presbyterians are largely Republican; Methodists are pretty well split according to their geographical location, whether they belong to the church north or south of God. The wide variety of Baptists have just as wide divergence of political ideas, but their influences in Texas is overwhelming Democratic because there are more of them in the Lone Star state than of any other denomination. The various churches are moral organizations and have a right as such to proclaim pronounced opinions on matters of social and moral welfare; but, generally speaking, pulpit proclamations for or against matters purely economic are outside the realm of their avowed purpose.

A few years ago this nation witnessed a vivid demonstration against a certain gentleman by the name of "Smith" because of his religious affiliations. His candidacy for office was promptly put down by the masses at the polls. As a matter of fact, Smith was not wanted in office because of his uneconomic handling of finances in a certain large city where he had been mayor; but the financial leaders knew his religious views would appeal more to the prejudices of the people at large and accordingly, such were made a national issue while the real reason of big business was withheld.

For ought I know the time may come and not in the far distant future, when the denominations will become as sharply divided upon political questions as they are now at variance over those theological. When and if that time comes there are not enough liberal minded citizens to hold the balance of power, the future of our democratic form of government will certainly be jeopardized and the liberty of its citizens greatly curtailed. Past history has proven in numerous instances that when religion and the sword form a partnership, human slavery invariably arises.

### EX-WORLD WAR VETERAN VOUCHES FOR A VERY QUIET SNAKE STORY

Curtis Taylor, local citizen and government official in three or four different capacities, a very quiet, unassuming gentleman, widely known for his truth and veracity in his peregrinations over three or four counties of this area, a few days ago noticed a slight movement in the grass alongside the road on which he was traveling, and getting out of his car to investigate saw what appeared to be a snake with its tail in its mouth.

Instantly he had visions of the fabled hoop snake and all its death-dealing proclivities. Notwithstanding attending dangers Curtis, who is an ex-soldier of the World War, summoned his bravery and frequently during that consuming embroglio, and, upon closer investigation, confirmed his preliminary idea that the snake had actually swallowed a part of its own tail.

However, Curtis, who is noted as a fied for detail, persisted in still further examination, realizing the mouth of the serpent was busy with its tail in such a manner there was little danger of its sinking its fangs into him, he held it down with one foot and proceeded to cut it open, when, to his great surprise, he found there was a still smaller reptile inside which had swallowed almost a foot of the larger snake's tail.

The only way Curtis was able to reconstruct what had happened to the two vipers was that one snake started to swallow the other at the beginning of the tail. Then the other snake managed in some unexplainable manner to get hold of its opponent's tail. In this position they started to swallow each other. Because the smaller snake went down the gullet of the larger one more readily than did the larger one in the esophagus of the smaller, the larger snake made such quick work of the little fellow that he actually swallowed a part of himself also.

Curtis hasn't been able to quite figure it all out to his own satisfaction; but it now seems if the two reptiles had kept on swallowing each other, both of them might have finally turned themselves wrong side out, the larger one especially.

Variety in Water From Springs  
In Stafford county, Virginia, there are five springs within sixty feet of each other and each yields a different kind of mineral water.

## Beware of Common Cold Warns State Doctor To Public

Austin.—Beware of the common cold," Dr. Geo. W. Cox, state health officer, cautions the people of Texas. "This is the season of the year when colds are most prevalent, and their consequences more far reaching. The organisms causing the disease is not known, but every individual is acquainted with its effects."

"Not a little of the susceptibility of catching colds can be overcome by a gradual acclimating to lowering temperatures and inclement outdoor weather. This hardening should begin now, and consist of regular exercise—walking is good—to be continued throughout the winter in weather of every kind. One should be careful to avoid wet stockings drying on the feet, over-heavy clothing and over-heated rooms."

"There are two broad principles to observe in the treatment and prevention of colds. The first says: Let every person with a cold consider it seriously. Every cold should be regarded as the possible beginning of a serious illness. That means seeking a physician's advice and explicitly following his directions. If he orders bed, then bed it should be. Complete rest is a fine way to overcome a cold in short order."

"One's resistance to many diseases, including colds, can be raised by increasing one's vitality through observing the fundamental rules of health: plenty of fresh air, good wholesome food, neither too much nor too little, sufficient rest, and the avoidance of habitual over-indulgence of de-vitalizing stimulants including alcohol, tobacco and the like."

"The cold is a common disease," Dr. Cox repeated, "but every cold is important enough to justify careful attention and treatment for its immediate cure. Death-dealing pneumonia and tuberculosis may begin with colds that do not receive care and attention."

## Railroad Business Is Big; Has One-Third Of World's Mileage

Most people living in Muleshoe and throughout this entire section of the state do not realize what a big business railroading is. This is due largely because of no intimate connection with such business; but that railroading is one of the giant businesses of America, and the extent of that matter is clearly evident from statistics just published regarding railroad activity last year, the following being some of them.

Last year there were 788,551 miles of railway line in the world, of which 30 per cent or 241,825 miles was in the United States, while of this latter number, Texas has 16,651 miles, the largest mileage of any of the states, Illinois being second and Pennsylvania third in rank.

Total length of track operated by all railroads in the U. S. is 418,000 miles, including sidings. There were 40,600 passenger cars in operation last year, 45,100 locomotives and 1,760,000 freight cars.

The net capitalization of all railroads in the U. S. is \$19,342,000. There were 200,000,000 passengers carried on trains last year, an increase of approximately 44,000,000 over 1935, these passengers traveling an increase of 21 per cent miles.

Taxes paid last year by the railroads totaled \$23,000,000, or 1.9 per cent of their total revenues. The Santa Fe system is the biggest taxpayer in Muleshoe and Bailey county. Net revenue of railroads was an average of 2.59 per cent.

Railroads last year purchased material and supplies totaling \$800,000,000. They used 1,066,000 employees who worked an average of 2,511 hours each, receiving an average of 69.1 cents wages per hour or an annual salary averaging \$1,733.

### A TRAGIC EVENT!

It was a Muleshoe girl—and the same sad story that alas, has often been told, and checked many a young life which had its beginning in sunshine, surrounded by luxury and the wealth of the world.

Her eyes were now wild and staring, her face was flushed and her hands were nervously working. She was a deeply troubled and terribly injured woman, and we hear her saying:

"Oh, cruel one, you have injured the very foundation of my being! Day by day you have tortured me, and yet I could not bear of give you up. When we first met, how your ease and polish attracted me! When you became my own, how many friends envied me; but your understanding is too small for my large soul! You are opposed to my advancing myself. You cause injuries to my standing in society. If we had never met, I might have walked in peace."

"So now be gone! We part forever!" There was a moment's convulsive breathing, a gritting of teeth and a sharp sigh. It was all over. By a supreme effort she had pulled off her new shoe.

### COTTON GINNINGS TO OCT. 18

The Census bureau, Washington, reported Tuesday there had been 11,068-319 bales of cotton ginned to Oct. 18, compared with 8,569,476 the same date last year.

Texas had turned out 3,124,024 bales against 2,081,900 the same time last year.

## Do You Know Real Money From Bogus It Pays To Watch

All kinds of counterfeit money is scattered over the country, and it behooves everyone to be on the watch for they never know when they may become the recipient of some bogus bill or coin, innocently of course; but in such a way it may produce legal implications not very pleasant.

Many people, even some bankers, think they know genuine money and can always tell it from the bogus kind; but they get slipped up on some times. Really, it takes an expert to distinguish all the counterfeit money floating about, though there are many who can detect most of it. There are some rules regarding money, especially currency, which every Muleshoe citizen should become familiar.

For instance, a \$20 note bears the portrait of Andrew Jackson; a \$50 note that of General Grant; a \$100 note that of Benjamin Franklin; and a \$1,000 note that of President Cleveland. However there are not many Muleshoe citizens who are likely to be taken in with currency of the two higher named denominations.

Counterfeit coins are mostly made of lead, or lead and tin. It is noticeable they have a dead kind of ring, also, many of them are blurred—not clear cut in their engraving. Bogus coins have been known to be made of wood, faced on either side with tin and the impress of the real coin then made into the tin.

It used to be common for citizens to accept gold plated dimes, lead and pewter-quarters are still in circulation. Plenty of counterfeit coins of different kinds are made for typing slot machines of different types. One dollar bills are frequently raised to a ten, and sometimes to a 100 dollar note.

Counterfeit money seldom has the silk threads running through it, and if so, they are likely to be different in size, kind or color. Carefully feeling of the paper of a note, as it passes through one's hands will often bring detection of a spurious one. Now that \$2 notes are uncommon in this section, not many of them are raised to \$20. Sometimes bogus government notes are engraved free hand drawing style, practically perfect; but if one will draw a moistened finger across one they will find it blurs. No one ever knows when something new in counterfeit money may come out. It always pays to be critical and observant.

### WILSON WAS WINNER

The Journal is requested to announce that it was the Wilson, instead of the Watson school that won first honor in attendance during the parade held here at the county fair.

## BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By MISS ALMA STEWART  
Home Demonstration Agent

**Cans' Greens In Pints**  
Mrs. J. C. Hart, home food supply demonstrator of the Maple H. D. club, says she cans greens in pint containers because they are a solid pack and it is hard for the heat to get to the center of the jar. She uses pint jars for canning English peas and other foods because she has only three in family, and a pint of food is enough for a meal. She has canned 448 containers of food and will can a lot more.

**Leaves Carrots in Garden**  
Mrs. J. A. Johnson, home food supply demonstrator of the Goodland home demonstration club is serving fresh English peas and new potatoes now. She has fall carrots that are al-

most large enough to eat now and she plans to leave them in the garden in preference to canning because it saves time and jars as well as have raw carrots when they want them. The Johnson's have a sub-irrigated garden.

### BAPTISTS TO HAVE REVIVAL

Revival services were begun at the local Baptist church Wednesday, continuing until Nov. 7, two services, at 10:00 a. m. and 7:30 p. m., being held daily.

Preaching will be done by Rev. J. M. Reynolds, Baptist pastor from Gold, who was the first evangelist of the Texas Baptist convention, for sometime field representative for Simmons university, Abilene and representative of Buckner's Orphan's home, according to Rev. J. Manley Reynolds, local pastor.

W. H. Martin, of Kansas State College, advises marketing cream within four days after production.

## MAKE IT COMPLETELY AUTOMATIC WITH GAS!

Automatic gas equipment lends almost magic ease to housekeeping—at lowest initial cost and least upkeep expense. The new automatic GAS ranges, for example, make cooking seem effortless—yet save you money every day. GAS refrigerators are more efficient, attractive, dependable and silent! And automatic GAS water heaters insure hot water always—at moderate cost! Visit our show-rooms today.

### IMPORTANCE OF BUILDING PONDS ON FARMS OR RANCH IS TOLD BY THE FARM AGENT OF WHEELER CO.

By W. B. HOOSER

Assistant Wheeler County Agent

A pond on the farm or ranch is an asset over much of the county. In some cases, ponds are the principal source of water for livestock and household use. Where they are not so essential, their construction may be worthwhile as a source of water for garden irrigation, as a place for the production of fish, and for recreation. It is seldom that an ideal site for a pond may be found. Therefore, it is well to consider the desirable and undesirable features of proposed sites and then choose the best site available. It is well to avoid locating a pond where it will collect water carrying considerable quantities of silt. If water from the pond is to be piped to the house and barn, it would be desirable to have pond on land enough higher than the farmstead so that water will flow through a pipe by gravity. Sites where the drainage from the house and barn lot would flow directly into the pond carrying polluted water into it are not desirable. Unless the watershed for the pond is small as compared with the capacity of the pond, it is important that a site be selected where an adequate spillway, commensurate with the size of the watershed, may be constructed at a reasonable cost.

#### Choose Site Carefully

Sometimes a likely appearing site for a pond may have such an excessive slope above it that too small an area will be available for the pond. In this connection a site where a considerable area may be covered with water with a dam of reasonable height is desirable and yet on the other pond should have considerable depth, at least 7 or 8 feet, so that a high percentage of the water will not be lost through surface evaporation, which may be as much as 5 or 6 feet per year. A level should be used to determine the size of the flooded area with certain suitable dam heights. The boundary of the pond as it will exist when the water is level with the bottom of the spillway may be easily determined with a level.

To do this, take a reading at the elevation proposed for the bottom of the spillway. Then with the target clamped at this reading, locate as many points as the water around the proposed spillway as the starting pond. The operation is the same as running a level terrace line around the area, using the bottom of the proposed spillway as the starting point. The top of the dam will, of course, be 3 or more feet higher than this line. Before definitely determining upon a site for a dam, some digging or boring should be done to see if the pond is likely to leak through underlying sand or gravel strata, or rock seams.

#### Foundation for Dam

After a location for an earthen dam has been selected, the foundation for the dam should be prepared so as to eliminate a line of seepage at the bottom of the dam. The area to be under the dam should be plowed. A trench some 4 to 8 feet wide, depending on how high the dam is to be, should be dug lengthwise of the dam and about where the center of the dam is to be. The trench should be a foot or

more in depth or down to fairly impervious subsoil. The dirt from the trench should be placed in the outer slope of the dam. The core of the dam should be made of the best dirt available for the purpose which is a clayey soil with a high percent of sand and small gravel in it. Clay alone is not as good a material for making the core as is a mixture of clay and a gritty soil.

As dirt is dug up for making the dam the material that is undesirable for the core such as rocks or pervious soil may be placed in the outer slope of the dam. It is desirable that the dam be built up in layers less than a foot thick. Dry soil will not pack as well as wet. Allow 10 percent or 15 percent in height for settling where wet or damp soil is used and more where dry soil is used.

#### Spillway is Explained

If a pipe is to be put through the dam to let out water for stock or for a garden, it should be laid in a trench dug for the purpose running approximately at right angles to the length of the dam. Such an outlet pipe is recommended, as it makes it possible to run water into a small stock tank so that stock need not be admitted to the pond to get drinking water. The pond should be fenced so as to keep stock out of it. A cut-off valve may be put on the outer end of the pipe, although this may make it necessary to protect the pipe against freezing, while if the valve is in the pond, there is little danger from freezing. One or more concrete collars should be built in place around the pipe through the dam to cut off seepage along the pipe.

Spillway: Except where the pond is large in capacity as compared with the size of the watershed, as for instance an acre foot capacity for each 5 or 6 acres of watershed, the spillway is extremely important. The spillway should be of ample capacity to carry off surplus water during heavy rains, so that water will not run over the dam and destroy it. Ample freeboard, or depth of the bottom of the spillway below the crest of the dam, should be allowed. The correction is quickly and deftly made by simply parting the hair a little more toward the side the nose leans toward. For instance, if the olfactory member inclines somewhat toward the starboard, part the hair just a little to the right of center. If the situation is opposite, just reverse the idea by parting a little to the left—no one is likely to ever notice the inclination and deviation.

#### SCOUTING A GREAT GAME

No better program was ever thought of than the Boy Scout movement, which was started in England by Sir Robert Baden-Powell, now Lord Baden-Powell of Gilwell. The purpose of the movement has been character building and citizenship training, though activities based upon the legends of knighthood, chivalry and the lore of the plainsman and the Indian. The imagination of boys was fired, and two years after the movement got under way in England, the message of Scouting spread to America. Here it has grown with great rapidity and today there are two million men and boys in the United States who are actively playing the game of Scouting and over 7,000,000 who have played a part during the 27 years it has been actively organized in America.

### IS YOUR NOSE STRAIGHT? IF NOT, WHY?

Is your nose straight? The question is directed to the charming femmes. Of course, men have all kinds of smellers—a few straight, many crooked, some bulbous, some red, a few pointed, a few more hooked, etc., but it remains for Emile F. Martin, New York City hair-dresser expert, to say that 98 per cent of the women have crooked noses.

Of course no man ever noticed such a twist—at least not before he married it—everything was absolutely perfect; but Martin explains that women have a way of creating "an optical illusion" regarding their noses, just as some men insist they created an optical illusion regarding their whole being before the clergyman made his pronouncement that hitched him either for life or Reno.

A Journal representative has spent three days examining the noses of women on the streets of Muleshoe, of course not in a technical way, but metaphorically speaking, and failed to locate a single twisted proboscis. Some of them were slightly tilted, others decidedly stuck up, a few would have stuck in the sidewalk if they had been blown from off the face of pulchritude; but none were seen pointing west when the owner was going south, or north when the proprietor was headed west.

Several women, who are generally considered authority on facial affairs were interrogated on the subject; but none admitted any knowledge regarding it. Local beauticians admitted that in a few cases there were otherwise beautiful customers visited their studios whose noses were not entirely aligned with their other facial adornments; but they said it was so easily overcome that no unmarried woman ever worried a minute about it—and of course, after they were married, it was up to the other side of the house to do the worrying.

The correction is quickly and deftly made by simply parting the hair a little more toward the side the nose leans toward. For instance, if the olfactory member inclines somewhat toward the starboard, part the hair just a little to the right of center. If the situation is opposite, just reverse the idea by parting a little to the left—no one is likely to ever notice the inclination and deviation.

Felks in New York may have crooked noses by the thousand; but the general consensus of opinion in this section is that the women are absolutely perfect, including their noses.

**FOWLER BOY JERKED FROM CAR**  
Coby Fowler, small son of Mrs. Ethel Fowler, one of the teachers in Muleshoe Grammar school, was seriously injured Sunday morning when he fell out of a car that was going at a moderate speed.

He was riding in the car with his mother, and opened the door to get something out that was caught, when the wind blew against the door which opened from the front and pulled the child out onto the ground. He was badly skinned, bruised and had several cuts. He was given medical attention immediately and is recovering nicely, according to report.

### P.-T. A. Membership Drive Culminates In Meeting Mon. Night

The regular meeting of the Parent-Teachers association was held last Monday night at the Muleshoe High school auditorium with a large crowd of parents, teachers and patrons attending.

Regular routine business was attended to, under direction of Mrs. J. Clyde Taylor, president of the association, after which a short program was rendered as follows:

Talk by Mrs. J. J. DeShazo on "Why Parents Visit School."  
Comedy Farce, "Love and Lather," by several blackface characters.

Plans were discussed for the booth the P.-T. A. will sponsor at the Muleshoe school Halloween carnival Friday evening of this week. Everyone is invited to attend and watch for the "Mystery Person," that will be the important feature of the booth.

Thursday, November 18 was set for visitors day at the local schools. All parents and interested persons are invited and the room mothers will assist the teachers as hostesses in various rooms.

The P.-T. A. sponsored a show put on at the high school Tuesday evening of last week by a traveling magician and ventriloquist. The proceeds were divided and the association received 40 cents for their part, it totaling \$10.75.

Mrs. C. R. Stevens' room received the picture for having the most parents present at the meeting to vote, and Mrs. Curtis Taylor's room received the \$2.00 prize for securing the most members to join the association.

The membership committee, composed of Mrs. Irvin St. Clair chairman, Mesdames R. N. Edwards, Howard Carlyle and Roland Bigham have been working diligently for the past few weeks on the membership drive. The drive is still in progress and anyone wishing to join are urged to do so. There are already more members in the association this year than there have been for the past several years.

Paid members who belong to the association are: Mr. and Mrs. J. L. Alsup, Miss Lucille Beaty, Mr. and Mrs. R. B. Bigham, Mrs. J. D. Border, J. I. Bartley, Mr. and Mrs. M. G. Bass, Mrs. Bonnie Brooks, Mrs. L. S. Barron, Miss Evelyn Boone, Mr. and Mrs. Howard Gayle, Mrs. A. W. Coker, Mr. and Mrs. W. C. Cox, Mrs. L. B. Churchill, Mr. and Mrs. J. J. DeShazo, Mrs. R. B. Dennis, Mrs. Joe Danron, Mr. and Mrs. Ray Griffiths Mrs. Ethel Fowler, Mr. and Mrs. A. J. Gardner, Mr. and Mrs. Flaudie Gallant, Mrs. Cleo Goins, Mrs. Cecil Harvey, Will Harper, Miss Elizabeth Harden, W. B. Harlan, Mrs. H. C. Holt, Mr. and Mrs. E. R. Hart, Mr. and Mrs. N. J. Holt, Mr. Harrison, Mrs. Clyde Holland, Mr. and Mrs. J. Clyde Jones, Mrs. Chris Taylor, Cecil H. Tate, Mr. and Mrs. Jay Weyer, Mr. and Mrs. Gilbert Wollard, Dr. and Mrs. H. E. Williams, Mr. and Mrs. A. H. Isaacs, Mrs. Tye Young, Miss Helen Jones, Mrs. E. W. Johnson, Mr. and Mrs. Roy Jones, Mr. and Mrs. R. L. Jones, Miss Okla. Mae Lawrence, Julian Lennis, Miss Josephine Lee, Mrs. Arnold Morris, Miss Mildred Miller, Judge M. G. Miller, Mrs. Delma McCarty, Mrs. C. C. Mardis, Mr. and Mrs. Jesse M. Osborn, Mrs. Irma Mitchell, Mrs. W. H. Parsons, Mrs. W. E. Renfrow, Mr. and Mrs. H. W. Roberts, Bevington Reed, Mr. and Mrs. Frank Snyder, Mrs. R. G. Spence, Mr. and Mrs. C. R. Stevens, Mr. and Mrs. Irvin St. Clair, E. C. Smith, A. P. Stone, and Mrs. Ross Stidham.

**FORD SHOWS NEW MODELS THIS WEEK AT NEW YORK STYLE SHOW**

With an advance showing of the 1938 model Ford V-8 cars being made at New York City which began Wednesday of this week, management of the Muleshoe Motor Co. are expecting a general distribution of these new cars in the near future.

In the New York show a de luxe V-8 and a standard V-8 are on display, both said to be entirely new in appearance, having new design of radiator grill, longer appearing hood, more massive fenders and greater refinement of both exterior and interior. There is more room in the sedans and larger luggage space provided.

An entirely new line of trucks will also be presented the buying public, including a one-tonner bridging the gap between the regular commercial car and truck groups, with either 85 or 69 h. p. engine. There will also be a new 134 and 157-inch wheelbase truck, having improved brakes, better and easier steering construction.

**TEXAS LEGISLATURE FAILS TO PROVIDE NEEDED NEW REVENUES**

Special session of the Texas legislature adjourned Tuesday without creating any new taxes or making arrangements for liquidating the state indebtedness. Gov. Allred had asked for revenues aggregating \$15,000,000 a year.

Shortly after convening, the House blocked a general tax compromise bill as unsatisfactory. Various other measures were also introduced but came to naught through lack of agreement of the two bodies.

The Governor said he would not call another special session until he was assured something definite would be accomplished.

It was stated before this special session convened that unless added taxes were levied pension being paid to the aged, blind and needy children would probably be stopped for three or more months.

### Here Are Ways For Hunters To Bring Selves Back Alive

The Red Cross society Washington, has aimed a volley of advice at the average American hunter, some of whom may have sent shots into their fellow Nimrods during last season.

Don't pull a gun cocked. It's always closer to you than any game. Never point a weapon at any one in fun. There is too little difference between comedy and tragedy.

Don't deploy ahead of inexperienced hunters. Be polite and let them go first. Don't leave a gun where children can reach it. All weapons are popguns to them.

Don't leave a loaded gun in the house. Bears are not coming through the living room this year. Don't allow the gun muzzle to clog with mud or snow. Clean it as you would your teeth; the bite is 1,000 times worse.

Deer hunters should wear red coats or hats because—deers don't.

Cream held on the farm under average conditions for a period of one week loses many of its desirable butter-making qualities.

**GET READY FOR WINTER!**

There are numerous odd jobs of repairing and rebuilding that may need doing on your place before Old Man Winter arrives in earnest. Don't delay them—we can furnish you materials for any job.

PERHAPS you need material for Cotton Sheds, Barges, Truck Bins, etc., lumber for making Grain Bins, or Steel Bins desired—we have them. Also, all materials needed for making Poultry Houses comfortable for the biddies this winter.

SEE US FOR ANY CONTEMPLATED BUILDING IMPROVEMENT. PLANS AND ESTIMATES GLADLY FURNISHED—NO COST

# EDITORIAL AND FEATURE PAGE

## THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

JESS MITCHELL, Editor. I. F. MITCHELL, Bus. Mgr.

Subscription Rates: In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas.

Advertising application, Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.

Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office no later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, it matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

## Editorial

Every Great Attempt is Glorious Even if It Fails

### A THOUGHT FOR THE WEEK

What things ever ye desire, when ye pray, believe that ye receive them, and ye shall have them.—Mark 11:24.

A wise man will desire no more than he may get justly, use soberly, distribute cheerfully, and leave contentedly.

### IT WON'T WORK

Motorists around Muleshoe will learn with more than the usual interest that after a trial in several states of "no speed limit" on the highways, the experiment has proved a failure. Michigan, one of the first of the few states that let down the bars and permitted drivers to use their own judgment on the open road, raises her hands in horror at a 15 percent increase in fatalities over last year, and is planning to return to former speed limits. The motorist, it seems, cannot be relied upon to stick to a safe and sane speed; it requires a law, strictly enforced, to make him do so.

With the death toll in America so far this year the highest in history, it is obvious that something must be done, and done quickly, to make highways safer. With almost 1,000 killed on labor day alone the necessity for laws fixing a lower rate of speed is apparent. However, at the time that new speed laws, and laws with tests in them, are being enacted, some attention should also be given those drivers who idle along a main highway at a rate of 15 or 20 miles an hour.

Hundreds of accidents occur when drivers turn out to pass these slow-moving machines, or as a rule they are not hugging their side of the road. The need for regulating the slow-poke is as great as the need for regulating the speeder.

This year's death toll is going to be a ghastly one when the figures are made public. Maybe it will speed the enactment of some sort of legislation that will make human life a little bit safer in America.

### YOUR SCHOOLS

When their children start off to school in the morning that seems to end interest in them until they return home, with a vast number of mothers around Muleshoe.

Somehow it has never occurred to them to take a few minutes off from household duties some afternoon and drop in at the school house just for a little visit. They do not realize that it bolsters the morale of the children to see their parents interested in school work, and that it also reflects a genuine interest in the welfare and progress of this all-important institution. Teachers and pupils alike will take more interest in their work when they find, through the personal visits of parents, that interest is being taken in them. It will also serve the good purpose of revealing how well and capably the children of school age are being taken care of by those in whose charge they now spend a goodly portion of their time.

You may be sure of a welcome, and you will return home with a deeper pride in your school.

### WORTH TEACHING

The fact there is no regular course in the public schools of Muleshoe and surrounding territory covering the conservation of wild life and natural

resources does not mean that it is not worth teaching. No better instruction can be given by any teacher than the simple methods of protecting the trees, birds and small animals of the neighborhood in which his or her school is located. A few moments now and then devoted to the value of planting trees, and protecting those now growing, will serve to impress the youthful mind with the value and importance of conservation.

The same is true regarding our outdoor life. Children may be destructive by nature, but leading them into new paths is an easy matter. Tell them, so their childish minds can understand why this country must conserve its natural resources, such as timber and fish and game, and they will grasp the meaning and carry it with them on through to maturity. The teacher who realizes the value of such instruction is worth more to the community he serves than the one who never mentions the subject simply because it doesn't happen to be a part of the regular school course.

### "SUCKER LISTS"

If you are accustomed to receiving tempting offers of oil well or gold mine stock through the mails then you may be sure that in some mysterious way your name has found its way onto some of the "sucker lists" used by those who are after your money.

There is no occasion for showing resentment at receiving such mail; they don't know how they got there; but some of the most prominent men in the country are enrolled on one or more "sucker lists." Instead of losing your temper the thing to do is to toss the literature into the fire unread. Even that will not prevent other such offers reaching you, for these mail-order promoters not only "swap" mailing list names but buy and sell names to each other.

So save your temper and also your money by destroying the bait with which they attempt to catch and "make a sucker of you." Throw away their invitations to become a "sucker" and let them go on wasting their time and their postage so far as you are concerned.

### FALL TIME HERE

Fall time is harvest time and generally a happy time in West Texas, for it is the time when farmers realize on their summer's labors. It is a time when the sound of the cotton gin whistles are as music to the ears of both growers and ginners as signals are sounded for the next customer to drive up to the auction chute.

Mexicans, Indians, Gypsies and white folks come trekking in looking for jobs picking the fleecy staple to get a share of the prosperity boom which harvest time invariably brings. Trucks and cotton wagons park on the busy streets while the women folks crowd into the stores to buy various merchandise needed for months past.

There will probably be \$400,000 worth of cotton go out from Muleshoe this fall—and it all contributes to the general welfare, happiness and prosperity of the section.

### Jaunty Journalettes

It's a great kindness to trust some Muleshoe women with a secret; they feel so important while telling it.

An optimist is a Muleshoe citizen who hopes to make enough money next month to pay last month's bills.

Ever notice how lots of Muleshoe people waste much of their time worrying over things that never happen.

Most Muleshoe people who take the trouble to think don't have much trouble to think of.

When a Muleshoe woman says: "I look like a wreck today," it's very bad manners to agree with her.

More than one Muleshoe vacationist has returned home this year to discover that the fish he caught were not the only things that got hooked.

Muleshoe folks should not worry too much about what the world is coming to. It may run into a detour any minute.

Some steam engines are like little Muleshoe folks. The more they blow their whistles the less power they have to turn the wheels.

Perhaps the some elderly Muleshoe people put candles on their birthday cakes is just to make light of their age.

Perhaps some Muleshoe folks have yet to learn that Sunday religion will not convert the sinners they cheat during week days.

Streamlined automobiles are now being recommended to Muleshoe citizens as offering least resistance to evil influences.

The turning point in the average Muleshoers life is when he quits saying he feels good when he don't and begins saying he feels awful when he don't.

The old-fashioned Muleshoe man who never thought anything of walking 10 or 12 miles in an afternoon has a grandson who never thought of it either.

Scientists now claim to have discovered a way to keep bread from getting stale. That's nothing new; most Muleshoe housewives discovered that secret a long time ago.

Alligator hunters claim those creatures are perfectly harmless so long as they keep their mouths closed. The same rule would apply to some talkative Muleshoe folks.

### SNAP SHOTS

It is a sad reflection on civilized man when so many laws have to be passed to keep him honest.

Dumb animals are the ones that grow old without overtaking their hearts in an effort to be young again.

Man is a funny animal; he scorns the hangman who kills for pay and then joins a foreign war to kill for fun.

Probably you have noticed by this time that the high price of pork has started the consumers to squealing.

There isn't much danger of a revolution in a country where every man can feel like a dictator by merely getting under a steering wheel.

As we understand this unemployment census, it merely means counting those who really want to work and letting the rest loaf on WPA.

Six Russian officials were recently shot for wasting the taxpayers' money. Omygosh! What a slaughter there would be if that idea ever became popular in this country.

Paying an annual salary of \$102,000 to a kid movie actor is on a par with the silliness of a university paying \$10,000 or \$15,000 annually for a football coach. P. T. Barnum was certainly right!

When the State County Judges association met at Amarillo last week it passed a resolution favoring sterilization of insane and prison inmates. Perhaps it should have included those would-be politicians who are always running for office and never getting there.

### Pavement Pickups

A post office patron remarked to A. J. Gardner the other day, "why, this letter is damp!" as it was handed to him. That's because there is some postage due on it," replied the postmaster.

County Clerk J. J. Williams presents the following formula as fitting for many citizens of this section: "He winks, She prinks, He woos, She coos. He said, 'We wed.' Pa sighs, Ma cries. Perambulator, In-laws, Reno.

A fellow went into Dameron's drug store last Sunday morning about a quarter of eleven. "Give me change for a dime, please," he asked. "Sure," said Joe, as he handed him the change, "hope you enjoy the sermon."

By Bearden, who has somewhat of a reputation as a veterinarian in the treatment of cows, horses and sometimes dogs, remarked the other day when he examined a dog's lungs—he could always see the seat of its pants.

A woman left Henington's grocery the other day terribly out of humor. When the boss asked Vance what was the trouble, he replied: "Oh nothing except she didn't like the color of the potatoes eyes."

"This world would be considerably better off if everybody practiced what they preached," suggests Rev. Watkins; "but," he continued, "it is a fairly good place as it is. Just suppose everybody preached what they practiced," he said.

No one to look at George Shadid, would think him a poet; but he is. Here is one of his recent effusions: A pretty good firm is Watch & Waite. And another is Attit, Early & Laite; And still another is Doo & Daire; But the best is probably Grinn & Barrett."

A young married woman who had recently become a mother was in the Western Drug store a few days ago to buy some scientifically prepared milk for her infant. After showing her several brands of food Pharmaceutical Schmittee handed her a bottle, remarking: "this, madam, is elephant's milk. There is one case on record where it was fed to a baby which gained 20 pounds a day." "You don't say so," remarked the young mother. "Whose baby was it?" "The elephant's" replied Schmittee.

It came out the other day why Dr. Williams' father-in-law is down here for a visit. It seems the doctor has recently been talking considerably about Violet Ray and his wife insisted on knowing who she was; but Doc wouldn't tell her.

Recently officials of the local Baptist church have been considering their financial budget for the coming year, one phase of being the pastor's salary, which some of the members thought should be increased. The increase was granted, according to report, with the understanding he should not be paid any overtime on his sermons.

Fry & Cox Bros. have recently been installing some new machinery in their machine shop, some of it apparently of rather complicated nature. The other day a customer was looking at one of these contrivances and asked Jack what it was. "Why," replied Jack, "that is a machine in which a pedal attachment coinciding with a fulcrum lever converts a vertical reciprocating motion into a circular movement. The principal part of the machine is a huge disk that revolves in a vertical plane. Power is applied by the homo saepens through the axis of the disk, and work is done on the periphery, and the hardest substance, by virtue of mere impact, may be changed or reduced to any desired shape." my gosh, replied the astounded man, "that's something wonderful. What is it? Just a grindstone." Jack calmly replied.

Grandpa Jennings admitted the other day he wasn't quite as brisk as he used to be 25 years ago. "Why," he said, "I used to walk around a block every morning before breakfast; but now when I get half way 'round I have to turn and come back."

### THE JOURNAL'S Weekly Scrapbook

Week's Best Recipe—Stuffing For Green Peppers—Chop a small onion and cook in one tablespoon of fat until yellow. Remove from stove, add one and one-half cups of ground cooked meat, one-third cup dry bread crumbs, one egg slightly beaten, one-half teaspoon salt, two teaspoons chopped parsley, and tomato juice to moisten. Fill par-boiled peppers with this mixture, cover with buttered crumbs and bake in 375-degree oven for 300 minutes. This recipe fills four peppers.

A Beauty Hint—The small, light summer freckle clears away with summer's passing. Large, dark, disfiguring freckles are slower to go, and some just won't go. Lemon juice is often enough to bleach out the light freckles. The heavy ones call for stronger ointments and bleaches. Be very careful with freckle creams. Your best protection is the complete reliability of the manufacturer.

For the Kitchen—Any leftover bits of either meat or vegetables can be added to scrambled eggs and served for supper. . . . Stale cake can be freshened by dipping into cold milk for an instant and then baking slowly. . . . To freshen celery, place it in water containing a little baking soda.

The Flower Grower—Leaves, strawy manure or other safe litter may be used for winter protection to perennial beds. . . . Light fertilization in the fall is helpful to plants, but plants are always in a better state to absorb fertilizer in the spring. . . . If the upper leaves of your dahlias plants are wilted, look for borers.

The Family Doctor—Colds often lead to serious diseases if neglected. At the outset of a cold take an aspirin, drink a hot lemonade or other alkaline solution; grease the chest, nose and lips; spend a day in bed, partaking only of light food and

drink large quantities of liquids, preferably water.

For relief from insect bites, wash in cold water and apply mentholatum, baking soda or chloroform to the bite. Rub wasp sting with a slice of onion. Use a paste made of salt, soda and water for the sting of bees. Or use weak ammonia water. Salt, wet earth or cold water may be used for relieving the sting of most any insect, or use spirits of camphor or hydrogen peroxide.

An Inspiration—Whoever you are, be noble: Whatever you do, do well: Whenever you speak, speak kindly. Give joy wherever you dwell.

### Don't Get Excited!

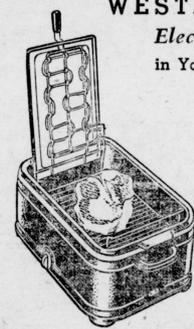

For sometime past certain citizens have been in more or less of a quandary as to peculiar noises pervading the otherwise peaceful atmosphere of Muleshoe during the quiet of early morning hours. The Journal, having numerous reports of such condition, quietly employed Mr. Hawkshaw, famous detective, to make a thorough investigation of the peculiar noises and the causes for such. Here is the answer: All this combination sound of bel-lowing and wailing and panting and

ranting and fizzing and spitting and clanging and banging and buzzing and hissing and howling and yowling and grating and grinding and puffing and bumping and clicking and clanking and chugging and moaning and crashing and groaning and gasping and grunting and wheezing and squawking and blowing and jarring and jerking and perking and rasping and jangling and clattering and yelping and croaking and howling and humming and snarling and screeching and snorting and shaking and scraping and throbbing and creaking and jangling and quivering and rumbering and roaring and tattling and yelling and shrieking—is just the fat women of Muleshoe taking their daily reducing dozen.

### LAMB GETS DRILLING CONT.

A drilling test for oil and gas well has been closed in Lamb county by C. J. Duggan with J. W. Murchison, representing an unknown oil company well to be located on a 17,000 acre lease located between Littlefield and Ambrest of that county. Contract calls for a 5,500 foot hole unless oil or gas is struck before that depth. The lease is said to be along and on both sides of the Santa Fe railroad which runs diagonally across the county. No date for beginning drilling is announced but it is said in the "near future."

### Muleshoe Pupils May Snap Fingers At Fire Drill Is Unexpected

When the fire alarm sounded at Muleshoe High school building last Monday afternoon at 3:12 o'clock, so far as the pupils of that school knew, the entire city was a blazing holocaust, yet they marched out in perfect order, the entire building of more than 230 pupils being emptied through the three exits in just 38 seconds. A bunch of layee riflemen, s'awd-t'yp'd fire flames would have to be strategically located and travel quite rapidly to get one of those boys or girls within its burning grasp.

### APPOINTED

New Special Representative of the Public Relations Department of the Santa Fe Railway in the Amarillo Territory is L. J. Cassell, formerly with the Department in San Francisco, and Ex-Newspaper Man. He succeeds C. W. Lane who goes to Topeka as Assistant Manager of the Company's Agricultural Development Department.

Returning, Superintendent W. C. Cox tried them out on various signals, to all of which they responded with perfect action. Apparently no parent of any boy or girl in the local school has need of much worry if lightning, should hit the high school building, for the youngsters would be out of it in a jiffy.

Prof. Cox explained that similar fire drills are held frequently and at unexpected times so far as the pupils are concerned, such drills being not only for the protection of the pupils during any unexpected emergency; but also because such training brings a three per cent reduction in the key rate of fire insurance to Muleshoe property owners. Similar drills are also held in the Grammar school building.

In addition to the fire drills, written compositions on various fire subjects are required at state intervals of pupils in the ninth and eleventh. In the eighth and tenth grades various fire projects are worked out, and similar instruction is given in the Grammar grades from the fifth on up. Much material for this instruction is furnished by the State Fire Commission at Austin.

Male Emu Hatches Eggs  
The oddest thing about the emu is the fact that the male hatches the eggs. He sits on the nest, brooding, for about eight weeks. He even takes care of the young chicks, and is a fierce and jealous guardian until they are able to look out for themselves.

### What's Happening In Washington And Other Cities Of Importance

The U. S. has closed a contract leasing six overseas warships to Brazil. Italy has finally agreed to withdraw her soldiers from the Spanish rebellion war.

Of the 28,092 postmasters named by President Roosevelt during his four years in office, 7,108 of them have been women.

A French sub-chaser was bombed by an unidentified airplane in Spanish waters off the island of Minorca last Sunday, setting fire to the vessel. The crew of 23 was taken off safely.

Automobile plants of the U. S. and Canada produced 5,110,000 passenger cars and trucks during the 12 months ending with September, 1937. It is announced. Of this total 4,132,000 were passenger cars and 978,000 were trucks the total wholesale value being \$2,376,500,000.

With war indications growing more probable every day, the War department officials, Washington have turned their attention to the investigation of the nation's potash, an important ingredient in the making of gunpowder. Some of these western lakes may receive development, it is said.

Last Saturday, Oct. 23 was the birthday of the World, it having been created 5,941 years ago, or 4,004 B. C. according to an act of the British Parliament which officially set that date. Scientific investigation, however, indicates the world is probably 28,000,000 years old.

More crop control means more taxes, says President Roosevelt; and to figure out this increased expense so it will not hinder in balancing the national budget, is one of the tasks facing Congress soon to reconvene. Representative Marvin Jones, chairman, House Agriculture committee, and Senator Smith of the Senate committee, are now in Washington trying to work out plans of that big puzzle. No one, apparently, has any idea where the proposed new taxes will hit. Something on the order of a process tax has been suggested.

### General News Over Texas And Adjoining States For The Week

The Court of Civil Appeals, Austin has ruled the law taxing slot machines is invalid because of its vagueness.

Brookmorn prices are starting off low in this area this year, from \$50 to \$60 per ton being paid.

A directory completed in Amarillo last week gives that city a population of approximately 55,000 people.

Members of the Baptist State convention, which opens at El Paso, Nov. 9, will go on record opposing the sale of liquor by the drink, it is announced.

Floyd county, this state, with an estimated crop of 5,500,000 bushels of wheat, was the champion county producer of the U. S., this year.

Julian Montgomery, state highway engineer, has ordered that where both state and federal markers are found on highways the state markers shall be removed to avoid confusion. This system is being adopted in most states.

Carroll Wade, 13, Mexia youth, has one of only five "liberty head" nickels minted in 1913 said to exist. He found it in some rubbish and has to date refused an offer of \$850 for it; holding out for more money.

The Legislature in special session, last week conducted an investigation of alleged "irregularities in various departments of state activities, including acceptance of free passage on trains and buses. Much extravagance, high prices and dishonest salaries are alleged to be paid.

State Senator Vernon Lemens insists that the Senate in its haste to make reductions had increased them \$893,552,047, instead of reducing them \$5,000,000. Use of the word "each" in an amendment to the general tax bill showed 47 departments had been given \$19,379,771 each instead of that amount for all of them, he said.

### 42 PARTY PROCLAIMED HUGE SUCCESS BY GUESTS

Friday evening of last week, members of the local chapter of Eastern Star organization sponsored a 42 tournament and ballroom party at the American Legion hall in Muleshoe. About 60 guests attended and a total of \$25 was realized, which will be used for expenses of the chapter.

The hall was appropriately decorated in Halloween motif. There were 15 tables of 42 at play and a delightful musical program was rendered. Glenn Rockey played several piano numbers. Mrs. Inez Bobo sang a solo, accompanied by Mr. Rockey, and a quartet of small boys, Loyd Alsup, Lowell Irvin, St. Clair, Buddy Taylor and "Smoo" Glaze, sang two numbers, accompanied at the piano by Miss Lee. A fortune teller located in a private decorated booth interested many present by prophesying their future.

At the close of the enjoyable evening delicious refreshments of hot chocolate and waters were served.

### A GOV. COTTON WAREHOUSE TO LOCATE HERE

#### Charles Lenau Is Now A Qualified Gov. Classifier.

Contract has been let and construction was begun last Wednesday on the Bailey County Cotton warehouse for storing government loan cotton.

The 77 by 150 feet sheet iron building will be located north of the Santa Fe depot across the railroad tracks, and adjoining Warren park, and will be completed in about 10 days, in time to take care of some of this year's cotton crop, according to report.

Charles Lenau, local cotton buyer, has now qualified as a government classifier, and will manage the warehouse for the convenience to cotton growers. This warehouse in Muleshoe will be a great convenience to the cotton growers of this and adjoining counties, as heretofore Littlefield was the nearest warehouse where such staple is received and official classification given. Hundreds of growers in this area will greatly appreciate this new enterprise.

#### Hundreds View New 1938 Chevrolet On Display Here Sat'y

Chevrolet new model automobiles for 1938 went on display here last Saturday at the Valley Motor Co., headquarters, local agent, hundreds of visitors and prospective buyers enjoying their first view of them, several orders being taken, according to A. A. Alexander, local manager.

Driving effort is greatly reduced, and control over the car is increased, by the new "Tiptoe-matic" clutch, of revolutionary design, which is being introduced on all the new 1938 Chevrolets, both passenger cars and trucks.

The mechanism operates on a principle which has already had some applications in long-range artillery, hydraulic presses, railcar couplings, and mill and heavy-duty installations, although it has never been adapted to use in the automotive field.

The central unit is a spring diaphragm of heavy heat-treated steel, shaped something like a concave disc, or, more accurately, a "dished" washer with 18 tapering steel fingers pointing inward from its edge.

The 1938 line, Chevrolet engineers assert, represents important advances over even the highly successful 1937 models. Refinements extend to bodies, both interiors and exteriors, and to numerous units of the chassis, whose design, however, remains fundamentally unchanged. The power plant in both series is the 85-horsepower high-compression valve-in-head six cylinder engine whose power, smoothness, economy and long freedom from interruptions are already familiar to millions of owners throughout the world.

All models have Chevrolet's perfected hydraulic brakes, all-steel, all-steel turret top bodies by Fisher, and the trouble-free hypoid rear axle. On the Master Drive series, Chevrolet's fully-enclosed knee action is starting its fifth year.

Outwardly, the most notable change in the new Chevrolets is their advanced styling, which is especially evident at the front end. The top of the hood sweeps forward from the cowl in a graceful curve, to cap the almost vertical flat-topped radiator and grille. The latter, a radical improvement over previous design, consists of chromium-plated horizontal bars, flowing back from the center line of the grille to blend into the radiator shell. Accentuating these lines, every fifth bar is of double width, pin striped down the center with vermilion enamel. The new Chevrolet emblem, in cream letters on blue, embossed in a six-point winged shield, is centered at the top. The speedline which introduced a new style note is continued in 1938.

Other important changes extend to louvers, headlamps and their mountings, hood side panels, running boards, and body hardware, interior and exterior. Outside door handles are incurved at their ends for greater safety, and embody the vermilion enameled pin stripe found on the grille. The overall effect of the many refinements in the hood and body is one of greater length and racter, more graceful lines—an impression of fleetness which is confirmed when one takes to the road.

Engine advances for 1938 are mainly in the nature of refinements, although a new and lighter flywheel, in conjunction with the new clutch, affords greater flexibility and quicker response to the controls, and valve-springs, valves, and certain portions of the cooling system have been re-designed rather than simply refined.

The most notable change in the power plant and its related units is the electrical system, which is entirely new. It consists of a new higher-capacity generator with voltage regulator which adjusts its output at all times to the load imposed on the battery; a new starting mechanism of the type furnished on costlier General Motors cars, with over-running clutch and automatic throttle, opening assuring easy, positive starts; and a new, weather-tight, and accessible battery cover.

Greater body space, and increased stability on the road, are provided by widening the rear track from 57.9-16 inches to a full 59 inches. In conjunc-

tion with changes in the wheel house design, this makes possible two inches greater width through the rear seat of the car. The longer axle drive shafts and housing necessitated by the change are compensatingly sturdier to take care of their added length.

### Bula News Items

Our community is a very busy place at present, cotton picking and cutting feed being the principal duties. Church services were well attended at each church Sunday.

Mr. and Mrs. C. L. Cannon spent last weekend visiting relatives at Clarendon.

Mr. and Mrs. Earnest Gohen and family of Anton visited Sunday in the Gene Bryant home.

Mr. and Mrs. A. B. Simmons returned Wednesday from seeing the Centennial at Dallas.

R. A. Scifers spent Thursday and Friday attending to business in Dallas.

Mrs. H. B. King of Sudan spent Sunday with her parents, Mr. and Mrs. Gilbert.

Mrs. C. M. Tidwell was able to return to her home, after being confined in a Littlefield hospital about three weeks. We all wish her a speedy recovery.

Mr. and Mrs. Murrell Waller welcomed a new comer, "Donna Murrell" in their home last Tuesday.

Mr. and Mrs. Jonnie Redden and family of Preport, are visiting his parents, W. R. Redden.—Reporter.

DAMRON DRUG CO.

### Stomach Sufferers

Mr. Sidney Smith who is manager of the Lubbock Hotel Laundry, states that he suffered for fifteen years with stomach trouble, but after giving Gas-Tons a trial now calls anything he likes. Gas-Tons are on sale in Muleshoe at Western Drug Store.

Ask him to explain the iron-clad guarantee that you must be pleased.

### STATE TAKES OVER NO. 214

That the State Highway Department has taken over maintenance of State Highway No. 214 from Muleshoe south 14 miles to Needmore, is the information received in a letter by M. G. Miller, county judge, from Harry Hines, member of the State Highway commission.

Additional rightway has been secured through the Federal bird refuge in the southern part of Bailey county, and work is now progressing satisfactorily on the southern end of this highway. The road has been changed so as to give long distance visibility for drivers either day or night, and no grade will exceed five per cent, it is said. The hill on the Paul ranch is being cut down about 20 feet and will have a corresponding fill at the bottom.

Alaska fisheries produced 400 million cans of salmon in 1936.

### HEADACHE REMEDY STARTS WORKING IN SECONDS

THE REASON BAYER ASPIRIN WORKS SO FAST  
Drop a Bayer Aspirin tablet into a tumbler of water. By the time it has reached the bottom of the glass it is dissolving.  
This speed of disintegration enables genuine BAYER Aspirin tablets to start "killing" head-ache and similar pain a few minutes after taking.

All people who suffer occasionally from headaches ought to know this way to quick relief.

At the first sign of such pain, take two Bayer Aspirin tablets with a half glass of water. Sometimes if the pain is unusually severe, one more tablet is necessary later, according to directions.

If headaches keep coming back we advise you to see your own physician. He will look for the cause in order to correct it.

15c FOR 12 TABLETS  
virtually 1 cent a tablet

## Circleback News

A nice crowd was out for church Sunday. Rev. Blair of Plainview did the preaching.

Mr. and Mrs. Sam Martin, of Shawnee, Okla., visited with Mr. and Mrs. John Garner, Sunday.

Mr. and Mrs. Albert Isaacs and child ren of Muleshoe and Mrs. Edna Holly of Lubbock, spent Sunday in the home of Mr. and Mrs. Clayton Wells.

Mr. and Mrs. J. T. Gean shopped in Lubbock Saturday.

Mrs. Fred Hunt, who was taken to a Littlefield hospital Wednesday of last week was brought home Saturday in an improved condition.

Mrs. J. E. Hall is visiting with her mother-in-law, Mrs. J. T. Gean.

D. L. Brewer and J. C. Wells made a trip to Clovis, N. M., last Friday.

Mr. and Mrs. Cecil Robison spent Sunday with relatives in Littlefield.

Mr. and Mrs. Delbert Brandon had as their visitors Sunday, Hubert Stokes, of Brinkman, Okla.

School turned out Friday for three weeks on account of cotton picking.

H. D. Club News

The H. D. club met Oct. 21 in the home of Mrs. J. E. Hall.

Miss Alma Stewart home demonstration agent, discussed the value of salads in the diet. She also prepared and served four different salads.

This demonstration was enjoyed by the following members: Mrs. Van Rogers, Mrs. Luther Hall, Mrs. Virgie Garner, Mrs. Fred, H. H. Mrs. Clayton Wells and Mrs. Helen Hall.

The next meeting will be with Mrs. Lester Patton, Nov. 4.—Reporter.

## PARENTS DAY TO BE OBSERVED ROOM MOTHERS TO BE HOSTESS

Parents day is to be observed in Muleshoe schools in the near future, according to Supt. W. C. Cox, who states that room mothers for each grade have already been named, and invitations are soon to be sent out asking parents of all pupils attending this school to visit it and see their children as they receive instruction.

The day will be under direction of the Parent-Teachers association, and these room mothers will be responsible for the entertainment of the parents. Much exhibitionary work will be on display at that time, and with the classes still being heard, parents will have first hand opportunity of seeing and hearing of the progress of their own children-pupils.

The principal purpose of the day is toward a more intimate acquaintance

between parents and teachers; that they may become better acquainted one with the other, the parents learning more of what and how their children are receiving needed instruction for meeting the problems of future life.

**The Duckbill Lays Eggs**

The duckbill, an Australian animal with a tail like a beaver, fur like a seal, claws like a dog and bill like a duck, lays eggs and hatches like a young, like an ordinary fowl. It is a throw-back to the prehistoric ages.

### Whooping Cough Is Dangerous Says St. Dr.; No Immunity

"To the very young there is no other disease as dangerous as whooping cough," states Dr. Geo. W. Cox, state health officer.

"In addition, there is no other disease causing an equal amount of suffering of which parents show so much inexcusable disregard, not only for the safety of their own children, but also for that of their neighbor's children.

"There does not exist a natural immunity against whooping cough during the first six months of life as there does for measles. It is at this age that whooping cough strikes its hardest blow, and over fifty per cent of the deaths occur in children under one year of age.

"Whooping cough is usually transmitted by direct contact with the secretions of the mouth or nose, and only a very short exposure is required to contract the infection. Handkerchiefs, drinking cups and toys may also transmit the infection.

The infection is communicable from the appearance of the first symptoms and is most contagious at this early period when the nature of the affection can only be suspected. The incubation period is commonly seven days.

A slight fever, running of the nose, and a cough make their appearance so gradually and insidiously that a diagnosis is practically impossible unless a history of exposure is obtained.

"When the whoop appears there is no mistaking the disease. If there is whooping cough in your community, keep other children away from your little children and keep your children at home. Call your family physician early. Isolation of all cases for at least two weeks from the development of the characteristic whoop should be rigidly enforced."

### P. T. A. SPONSORS STATE PROGRAM PRELIMINARY TO SAN ANTONIO

Friday night, Nov. 12 the local Parents-Teachers association will sponsor a 3-part literary program to be given at the High school auditorium under direction of Miss Trannie Mae Russell, expression teacher.

The first part will consist of a beauty contest in which young women between the ages of 14 and 25 years are eligible to participate. The winner will be sent to San Antonio to participate in a state program of similar nature.

There will also be a Shirley Temple parade open to children from two to 12 years of age, the winner to receive a nice dress, also, a trip to San Antonio, if properly chaperoned.

An amateur contest will be open to all people, the winner enjoying a trip to San Antonio with all expenses paid. Three disinterested judges not acquainted with the participants of any part of the program will render winning decisions.

### PROGRESS CLUB MEETING

The Progress H. D. club met with Mrs. Tom Radney, Oct. 19. "How We Are Governed," was discussed by Miss Officers for 1938 were elected: Miss Elzada McMahan, president; Mrs. Harold Mardis, vice-president; Mrs. Marion Springstube, secretary-treasurer; Mrs. Charles Long, council delegate; Mrs. Harold Mardis, kitchen demonstrator.

Those present were: Mrs. Charles Long, Mrs. Russell Bearden, Mrs. Harold Mardis, Mrs. Springstube, Mrs. Gross, Miss Bessie Vinson, Miss Eunice Humphrey, Miss Elzada McMahan and hostess, Mrs. Tom Radney.

### Enoch's Echoes

**Officers Are Elected**

The Enoch's H. D. club met at the home of Mrs. E. N. McCall Wednesday of last week and elected new officers for the following year: President, Mrs. E. W. Brewer; vice-president, Mrs. Roy Sealger; Sec.-Treas., Mrs. Maxie Harroli; Council delegate, Mrs. Roy Helson; Reporter, Mrs. Homer Green; and Farm Food Supply demonstrator, Mrs. Roy Helson.

Plans were made for Enoch's club Achievement day, Nov. 3. Everyone has a special invitation to attend as we are planning on having a worth while exhibit.

After club adjourned, Mrs. E. N. McCall, Misses Frances Harris and Nadine Nicholson entertained with a wedding shower honoring Mrs. James Cash, who was formerly Miss Vida Parker. She received many useful gifts from her many friends. The following guests were present:

Mesdames James Beck, John Butcher J. W. Butcher Jr., Guy Berry, Grace Weed, Hubert Dennis, Frank Griffith, Roy Helson, J. T. Burns, W. R. Adams Dutch Cash, J. F. McGinnis, A. V. Pepper, John Beck, Ray Sealger, Will Nicholson, Ray Tigert, A. A. Alexander, A. E. Ford, Jack Doty, Homer Green, Misses Lena Snitker, Lillie Mae Weed, Francis Harris, Nadine Nicholson and Mrs. E. N. McCall.

Mr. and Mrs. L. G. Harris are the proud parents of twin girls, born Oct. 19.

Mr. and Mrs. G. P. Howell were in Lubbock, Monday of this week.

### HUNTERS GETTING READY

Several citizens of Muleshoe and elsewhere in Bailey county are this week gathering up camping outfits, polishing guns and making other necessary preparations for the opening of the big game season near at hand.

Some will hunt in Southwest Texas while others will invade the mountains of adjoining New Mexico. A fair supply of game is reported awaiting these modern Nimrods.

Buy it in Muleshoe.

## FARM TOPICS

### GRASS FLAVOR IN MILK UNNECESSARY

#### Keep Cows From Any Greens Few Hours Is Advised.

By Dr. O. F. Garrett, Instructor in Dairy Manufacturing, New Jersey College of Agriculture—WNU Service.

Nothing puts that desirable "June" flavor in milk quite so successfully as tender green grass, but in order to avoid the undesirable odor and flavor which nearly always occurs when cows are first turned on pasture, it is necessary to observe caution in the pasturing practice.

Research workers at the California and Oklahoma Agricultural Experiment stations have shown that if cows are kept away from roughages, especially green roughages, at least a few hours before milking very little of the "funky" flavor will be evident in the milk. This same procedure can be applied to pasturing practices. The cows can be turned on pasture immediately after the morning milking but they should be removed to a dry lot or barn at least five hours before the next milking.

If this practice is followed for the first three weeks of the spring, there will be very little of the undesirable grass odor and flavor in the milk. This practice will even eliminate most of the wild garlic or onion flavor if these plants are found in the pasture. At the same time the cows will have enough time to consume the necessary quantity of grass to supply their needs.

To get the very finest flavor in milk during the pasture season, it is suggested that this procedure be followed throughout the entire time.

### Forcing Breeding Hens

#### By Increasing Protein

Forcing breeding hens by increasing the amount of protein in the ration may be done with no ill effects if an abundance of green feed is supplied. Recent experiments conducted at the Oklahoma agricultural experiment station show that the mortality of the breeders fed green feed was not increased by forcing. It is well known that in Successful Farming, Green feed protects the hatching qualities of eggs produced by forced breeders. Rations with a protein content as high as 23 per cent may be fed without injury to the hatchability of eggs if sprouted oats, alfalfa meal, or some other green feed is fed each day. Where forcing is done by increasing the protein in the feed and using lights, the use of green feed is especially important to maintain good advances in the total egg production.

### Clean Water for Ponds

A location that will allow drainage from only clean pasture or meadow should be chosen for the farm pond, says Marion Clark of the Missouri College of Agriculture. Water from barnyards and lots should never be allowed to drain into stock ponds. Where it is desirable to construct a pond where water from lots would normally drain into it, terraces should be used to intercept the contaminated water and carry it to another watershed where it will not pollute the pond water.

### Grain Mixture for Poultry

There are several grains or combinations of grains that give satisfactory results, but the one most commonly used in all sections of this state, says a North Carolina State college poultryman, is composed of 60 per cent yellow corn and 40 per cent wheat. However, this ration should be largely governed by what is grown on the farm, and the cost of the grain which must be purchased. Where there is an abundance of heavy barley (48 pounds to the bushel) or heavy oats (38 pounds to the bushel) these may be substituted for a part of the corn and wheat, but should never exceed 30 per cent of the grain mixture.

### Agricultural Notes

Hogs yield a greater proportion of edible meat than any other meat animals.

It is found that seven out of every 100 farm fires start when a spark lands on a roof.

Among spring-seeded pastures, oats give the greatest pasturage in the shortest time and at the least cost.

Milk cows require from 100 to 300 pounds of water daily, it is stated by the Missouri experiment station.

More than 50 kinds of fruits and vegetables are of commercial importance in the United States.

For the past ten years the tobacco crop in the United States has averaged about 1,350,000,000 pounds, grown on 1,740,000 acres and having an estimated farm value of \$214,000,000.

### LEGAL

#### NOTICE TO BIDDERS

Sealed proposals, addressed to George Johnson, President of the Board of Trustees, Muleshoe Independent School District, Muleshoe, Texas, for the construction of an Auditorium-Gymnasium building for the Muleshoe Independent School District, hereinafter called the Owner, in accordance with plans, specifications and conditions, documents, prepared by and may be obtained from Haynes & Strange, Architects, 511 Myrick Building, Lubbock, Texas, will be received at the office of the Superintendent of Schools until 2:00 P. M., November 12, 1937, and then publicly

Publ. Oct. 28, Nov. 4, 1937

### DISTRICT COURT OF THE UNITED STATES, NORTHERN DISTRICT OF TEXAS, AT LUBBOCK

THE PRESIDENT OF THE UNITED STATES OF AMERICA  
To the Marshal of the Northern District of Texas—Greeting:  
YOU ARE HEREBY COMMANDED to serve J. N. Scott, R. A. Tipton and W. B. Arnold with the accompanying certified copy of an order entered by Honorable T. Whitfield Davidson, United States District Judge, in Cause No. 185 in Equity, between Clarence Boyd Markham vs. J. N. Scott, A. X. Erickson, R. A. Tipton, Joseph C. Orr, J. B. Stewart, W. B. Arnold, and A. J. Ahlberg, by causing the same to be published in the Muleshoe Journal, a newspaper regularly published in Bailey County, Texas, once a week for six consecutive weeks.

HEREIN FAIL NOT, and due return of this writ make, showing how you have executed the same.

WITNESS, the Honorable T. Whitfield Davidson, Judge United States District Court, Northern District of Texas, and the seal of said District Court at Lubbock, Texas, this 22 day of October, A. D. 1937.

GEO. W. PARKER, Clerk of said District Court.  
By Olive Fluke, Deputy.  
Publ. Oct. 28, Nov. 4, 11, 18, 25, Dec. 2, 1937.

### IN THE DISTRICT COURT OF THE UNITED STATES OF THE NORTHERN DISTRICT OF TEXAS AT LUBBOCK

CLARENCE BOYD MARKHAM, Complainant, vs. J. N. SCOTT, ET AL, Respondents, No. 185 in Equity.

On motion of the complainant in the above entitled cause, by W. D. Grand, one of his attorneys, and it appearing to the court that the respondents, J. N. Scott, R. A. Tipton and W. B. Arnold, and each of them, are not inhabitants of this District, and have not voluntarily appeared herein, and that personal service on said J. N. Scott, R. A. Tipton and W. B. Arnold, and each of them, is not practicable because the residence and whereabouts of said respondents is unknown; it is

ORDERED that said J. N. Scott, R. A. Tipton and W. B. Arnold, respondents, and each of them, appear, plead, answer or demur to the bill of complaint, by the 13 day of December, 1937, and in default thereof that the court

will proceed to the hearing and adjudication of this suit as if the said J. N. Scott, R. A. Tipton and W. B. Arnold, and each of them, had been served with process in said District.

IT IS FURTHER ORDERED that this order be published in the MULESHOE JOURNAL, a weekly newspaper published at Muleshoe, in Bailey County, Texas, once a week for six successive weeks.

Dated, this 22 day of October, A. D. 1937.  
T. Whitfield Davidson, United States District Judge.

I hereby certify that the foregoing is a true copy of the original thereof now in my office. Attest: 10-28-37.  
GEO. W. PARKER, Clerk  
By Olive Fluke, Deputy.  
Publ. Oct. 28, Nov. 4, 11, 18, 25, Dec. 2, 1937.

### INSTALL AUTOMATIC HEATER

The Western Drug store this week installed a gas-electric automatic heater in their place of business, it occupying a position on the ceiling of the store out of the way of customers and furnishing that much more room for their crowded space.

This heater, a practically new type and the first installed in this section of the country, may be set for the temperature desired and automatically holds that degree of heat without further attention. It is said to be very cheap in operation, and a great convenience.

### SINGING AT Y Y NEXT SUNDAY

The Bailey county fifth Sunday singing will be held at Y Y next Sunday, according to announcement of Zeb Robinson, president.

It will be an all day affair with dinner on the ground at the noon hour, and everyone is invited to attend.

A large number of song leaders, trios, quartets and choirs from all over Bailey and adjoining counties is expected to attend and take part in the warbling of melodious harmony on that occasion.

**MANSFIELD TIRES ARE 3 WAYS SAFER**

**CORD-LOCK SIDEWALL DURO-MIX TREAD 700% SAFER BEAD**

● Mansfield Tires are 3 Ways Safer because they are built three ways differently from other tires.

Mansfield Cord-Lock construction puts more tough cord fabric into the sidewall. Their wide, flat treads are made of Duro-mix rubber that wears longer in grinding service. Their high tensile piano wire beads are seven times stronger than actually needed.

Mansfield Tires equip thousands and thousands of cars and trucks in every part of the country today because wise motorists wanted Mansfields and bought Mansfields—they did not get them as equipment tires.

If you, too, want extra safety and extra mileage, let us show you Mansfield Tires to fit your car. You'll quickly see their extra value.

**Ford V-8s Score Clean Sweep in Argentine Road Race**

**F**ORD V-8s finished first, second, third and fourth in the 4279-mile Argentine Grand Automobile Race for 1937 in which 69 cars of a dozen well-known makes competed. Part of the throng which cheered the winner, Angel Lo Valvo, as he swept over the finish line in La Plata in his V-8 coupe is shown above. Lo Valvo's driving time for the rugged course, over highways and mule paths, mountains and plains, was 80 hours 36 minutes, an average of 53.13 miles an hour. Only 19 cars finished, and 19 were Fords, including one Model A. (Insert) Lo Valvo, in white, and his mechanic smile over their smashing victory.

**It's Here!**

Just what you have been waiting for—the new 1938 model Chevrolet automobiles are now here and on display at our headquarters—

**THE REST OF THE RECORD**

By James V. Allred Gov. of Texas

As this column is written, the Legislature has only three more days of actual work. I don't know whether they will have passed any substantial tax bill for the people's program. At this time the outlook is very doubtful.

In any event, it seems to be conceded that I was right in refusing to submit appropriation bills which some of the Senators said they wanted to revise after they had voted for them during the regular session. On Tuesday of last week one of the leading writers for a big daily said my judgment that the submission of appropriations was impractical had been vindicated by the action of the Legislature itself.

The record shows that after some of the Senators had told thru the newspapers about what they would do if I submitted appropriations to them, they suddenly decided that I had done so and accordingly considered economy wide open to them. The Senate passed one bill affecting the state departments without a hearing and sent it over to the House. Then they admitted the bill would have to be worked over BUT they didn't do anything at all with reference to economizing on the education bill which they had voted out last spring with the biggest increase of all the appropriation bills. Furthermore the Senate did nothing on the judiciary

bill which had substantially increased the salaries of all the judges.

These bills didn't even get out of committee and Senator Stone, who had been one of the loudest of all in saying that he would economize voted to put off any hearing on these bills, even in committee.

With only eight days left to work, the House of Representatives passed a resolution asking me to submit appropriations for economy; BUT even the author of the resolution said on the floor that his purpose was to "put the monkey" on the Governor's back.

I knew that if I were to submit appropriations the Legislature couldn't revise them intelligently in so short a time when they had considered appropriations for four months before. I also knew that to get the subject on the calendar would block absolutely the chances of passing any tax bill to finance the old folks, the blind, the dependent children, and our part of the teachers' retirement system.

Of course, not even those who have been talking so loudly about economy claimed for a moment that they could finance by economy the aid to the blind, to dependent children, the old folks and the teachers. All they could hope to do even if they passed economy bills would be to reduce the deficit in the general fund out of which the general operation of the government is paid.

There has been so much talk about how much money the so-called "economists" could save by abolishing the liquor board that I want the people to have the facts.

In the first place, we wouldn't have any enforcement law. In the next place, the present administrator, Bert Ford,

collected in his first ten months of service a million dollars more than was collected in the preceding ten months. Thus, he has collected enough additional money in ten months to more than pay the operation of his entire department for over a year and enforced the liquor law in addition.

**MULESHOE RAISES \$40 FOR BOY SCOUT ASSISTANCE DURING YR.**

Muleshoe was the first town in the Northwest district Boy Scouts to go over the top in the sustaining membership drive for funds to carry on such work in this district, according to S. C. Beavers who, with R. S. Watkins have raised about \$40 to be used in Boy Scout work in Muleshoe, and more money is still coming in, Beavers said.

The Northwest District Court of Honor is scheduled to be held at Littlefield Nov. 9, beginning at 7:30 p. m. and preparations are being made for an interesting program. Troops from Muleshoe, Anton, Amherst, Sudan and Bula are expected to attend and take part. Floyd Coffman, district chairman, will preside.

**CIRCLEBACK WILL BROADCAST**

Bailey county will go on the air at 1:30 p. m. Friday, Nov 12 over station KFYO at Lubbock.

Plans are being made for Circleback 4-H club to have charge of half the programs A quartet composed of Circleback club girls will have charge of the singing and six other Circleback girls will have a part in a skit Mrs. Ollie Damron, club sponsor, will have charge of the program.
