

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, JULY 6, 1939

VOLUME 17 NUMBER 24

65 4-H Club Boys To Short Course Monday A. M.

Finley White, Bailey county farm agent, accompanied by 65 4-H club boys, delegates from the 13 various clubs of this county, and by seven men sponsors, left last Monday to attend the 4-H club Short Course being held this week at College Station. The trip is being made by school buses furnished by the West Camp and Longview school districts.

Each boy making the trip had previously paid the required fees and put up his individual money for his part of the total expenses, said White, so there was no doubt but that they would all make the trip. Many of the other more than 400 club boys of this county were anxious to go along, but were hindered from various causes.

This is without doubt the largest delegation of 4-H club boys from any portion of the state to ever attend a Short Course meeting.

Following the Course, the lads will go on to Houston and Galveston to see and take a refreshing dip in the Gulf of Mexico, and then return via Austin, where they already have a date with Gov. W. Lee O'Daniel, who will greet them on the capital steps and speak briefly to them.

MASONIC OFFICERS ARE CHOSEN

Prof. W. C. Cox has been elected worshipful master of the local Masonic lodge, A. J. Gardner, Jr. for warden; Carl H. Tate, junior warden; R. J. Klump, re-elected secretary; Ray Griffiths, re-elected treasurer. Appointive officers will be named by Prof. Cox upon his return here the latter part of this week.

Installation of new officers is slated to take place at the regular meeting of the lodge the night of July 11.

POSTAL ROUTE ON TO CLOVIS

The already established and operated postal route from Lubbock to Muleshoe has been extended on to Clovis, N. M., effective last Saturday, according to A. J. Gardner, local postmaster.

This extended route, Gardner says, will give about 12 hours of service in receipt of mail from northern and eastern points, also 12 hours quicker service on airmail.

Anything mailed in Muleshoe before 10:30 a. m. will be in time to catch this extended route, he said.

Muleshoe Wins Off Morton 7-6 In A Titanic Battle

In one of the most interesting and hard fought games of the season for the South Plains Amateur Baseball league, Muleshoe team defeated the Morton team in a struggling victory Sunday afternoon at Morton with scores of seven and six.

The scores were tied up to and including the ninth inning. An additional two innings were played to determine the winner.

Bracket pitched for the Muleshoe team during the first nine innings and "Lefty" McWilliams occupied the pitcher's box for the local team throughout the 10th and 11th innings. Strather Walker held his usual position as catcher for the local team.

Nettles pitched for Morton team and Calver caught.

Several baseball fans and other interested persons from Muleshoe witnessed the battle.

As per schedule, the Amherst team will play the Muleshoe team here Sunday afternoon, beginning at 3:30 o'clock. This being the third game of the season to be played on the home field the public in general is extended a cordial invitation to come out and witness what is expected to be an interesting and fast moving struggle.

NEW COLORS FOR AUTO PLATES

Julian Montgomery, stat. highway engineer, Austin, announces that car license plates for 1940 for passenger cars will have purple letters on a white background; farm trucks will be black on orange; commercial trucks, orange on black; tractors, trailers, dealer motor bus, motorcycle and sidecar plates will be gold on blue.

The plates are now being manufactured by the Texas Prison system and will be shipped to county tax collectors for distribution by March 1, 1940.

Panama's mortgage moratorium has been extended to 1941.

Crucifixion Play To Be Given By M. E. Societies, July 18

A 3-act religious drama, "The Crown of Thorns," built around the story of the crucifixion of Christ, is to be given by members of both missionary societies of the Methodist church at the high school auditorium, beginning at 8:30 o'clock, Tuesday evening, July 18.

The leading characters of that historic trial are being brought out in vivid manner by those studying for the various parts. There is Pontius Pilate, the proud Roman governor; Compositante Claudia Procula, his wife; Caius, the eager, sensitive lad; Marah, the Jewish maid of the household, an attractive girl of 18 years; Cornelius, a crafty, saucy, court advisor; Classius, a rough, boisterous Roman soldier; and Steven, a young, serious-minded disciple of Jesus.

The story of the play presents vivid reactions of these various characters during the exciting days of the trial and death of Jesus, said to be an excellent play, well written. It will be beautifully costumed and staged.

A splendid cast of local young people are working diligently toward a successful production. The names in the cast are: Wallace Solomon, Pontius Pilate; Hazel Nelson, Claudia Procula; Galus, Max Gardner; Marah, Dorothy Mae Schuster; Cornelius, Connie Dals Cupton; Classius, Jack Barbour; and Stephen, Paul Gardner.

The play is being directed by William L. Crow, director of speech activities in Muleshoe schools.

MULESHOERS SCATTER FOR FOURTH OF JULY

With rodeos and Fourth of July celebrations of various kinds held at a dozen or more accessible places near Muleshoe, this town having no particular drawing attraction for Independence day, took off from the heat and labor of the day, many of its citizens scattering to the four winds of the Plains area for celebrations.

Some took advantage of the occasion to journey into the heights of adjoining New Mexico where funds recently passed by Congress leveling brooks brought delightful vacation sensations, while others enduring the heat and dust visited some of the thrill occasions held on prairie areas.

Nearly all business concerns here were closed on the day, such suspension of business being participated in even by those remaining at home.

TEXAS GETS ITS WPA QUOTA

U. S. Senator Tom Connally advises that of the total allotment of funds recently passed by Congress for national WPA work, Texas has been given a quota of \$1,468,340, this sum coming to the State Relief commission for free home assistance and care of children in needy families.

It is also advised that all security wage workers will be required to work 130 hours per month under the new relief plan effective last Friday.

Previous hours and wages in Bailey county have been varying considerably in the past according to type of work done. Local county officers, the first of this week had not yet received any of the above notifications.

NEW DUCK STAMPS HAVE ARRIVED

A quantity of the new Migratory Bird Hunting stamps were received here last Saturday by A. J. Gardner, local postmaster. They sell for \$1.00 each, and are mandatory for bird hunting outside the county of one's residence.

The stamps are a beautiful engraving of a couple ducks swimming on a lake near foliage and a covey of birds flying over.

MRS. BEAVERS IS OES SECRETARY

The Eastern Star organization met in regular session Tuesday evening, at which time Mrs. Jane Beavers was elected and installed as secretary for this year.

Arrangements were made for the chapter to conduct a flower drill each regular meeting night, by each member contributing some small coin to provide for flower purchases to be sent to members who are ill.

Each Monday night the Eastern Star is sponsoring the skating rink, receiving 40 per cent of receipts, the money to apply on piano payments.

For the third consecutive year Liberia not only has balanced its budget but has a surplus.

WHY NOT A SAFE AND SANE FOURTH?

1,200 Acres Of Tomatoes Have Been Planted In Bailey County For Truck and Factory Selling

Approximately 2,000 acres have been planted this spring in Bailey county for marketing purposes, according to Finley White, county farm agent; but late freezes have cut this enlarged acreage down to about 1,200, which is still more than double the acreage planted in this county last year.

Among the planters are 16 4-H club boys, who have put in from two to five acres each. About 50 per cent of this growing acreage had been planted in the irrigation section of the Blackwater valley.

As was the case last year, much of the best of this crop will be sold to truckers coming here for it and will be hauled to other parts of the state for sale. A large portion of the on-coming crop will be hauled to the local canning factory for processing and sale to wholesale houses, which in turn, will dispense them to actual consumers all over the state.

Last year the local canning factory put up 10,000 cases of Bailey county grown tomatoes, according to Carl Case, owner and operator, who expects to process around 30,000 cases this year.

Years ago Bailey county proved the adaptability of its soil and climate for production of tomatoes in large quantities. Affected by disease

of no kind, tomatoes grow here large and succulent.

In recent years it has been proven that tomatoes, either ripe or green, are a rich and cheap source of vitamin C, without which vitamin anyone may be subjected to various diseases. Previously citrus fruits, such as oranges, lemons and grape fruit, were the principal source of this vitamin, but because of their great cost many families were deprived of such vitamins. Now tomatoes take their place and at much cheaper cost. Tomatoes are also a source of vitamin G, the pelagra preventative factor, and from which there are an average of 600 deaths per annum in this state. They also contain much iron, which helps to build rich red blood, and there are other minerals which tone up the body and assist in warding off disease.

Vitamin A is also found in this vegetable, which assists in retaining eyelids and wards off mucous membrane lining infections of the nose, throat, lungs and other bodily organs.

There are today more than 100 recognized staple varieties of tomatoes, which is fundamentally an American product, and several different kinds of them are included in the 1,200 acres now growing in Bailey county.

TEXAS NEW LIBERALIZED PLAN FOR 35,000 PENSIONS TO BE CHECKED AND VERIFIED BY OFFICIALS

AUSTIN—Investigation of 35,000 applicants for old age pensions under the new liberalized Texas plan started last Monday, according to W. A. Little, director.

Little said that while the Legislature intended to reduce and speed up investigators' labors and thus curtail costs by eliminating children's ability to aid their parents, the new law actually doubled their work.

Verifying homestead holdings and checking personal property valuations," the director asserted, "will consume many hours of labor." The statutes provide applicants may own personal property up to \$1,500 valuation if married or \$1,000 if single and still be eligible for old age assistance.

Besides determining such valuations from bonds to hogs, the investigators, all trained social workers, may be called upon to act as insurance adjusters, due to the \$1,000 paid-up life insurance applicants may have under the revised law.

Texas grants pensions to 40 per cent of its residents over 65 years old, and only Oklahoma has 56 per cent, Utah with 50, Colorado with 48, Arizona with 41 and Montana with 41 top the Lone Star State in that respect. Among neighboring states besides Oklahoma are New Mexico with 26 per cent, Louisiana with 36 and Arkansas with 21, Virginia with only 7 per cent is lowest. California and Illinois with 128,000 plus are the only States with more pensioners than Texas' 118,000. Oklahoma has 66,200, New Mexico 3,

Penalty Under New Hot Check Law To Be Increased

Further information received by Sheriff W. E. Renfrow relative to House bill No. 190, commonly known as the "hot check law," which became effective June 22, is to the effect that penalties accruing from giving of worthless checks with intention of defrauding in any way are considerably stiffer than heretofore.

In first conviction cases on check given in sums less than \$5.00, confinement in jail for not more than two years or fine not exceeding \$200, is provided; \$5.00 to \$50, calls for jail sentence of not more than two years and fine not exceeding \$500; for a check of \$50 or over there is a penalty of not less than two nor more than 10 years jail confinement. Second and third offense convictions provide stiffer penalties.

The law is retroactive in that a complaint once filed must be carried through to completion, section 6 providing that any person filing a complaint or furnishing information resulting in filing of such complaint is deemed guilty of a misdemeanor if he suggests or requests discontinuance of the case, and upon conviction shall be fined not less than \$100 nor more than \$200.

Business men generally hail the new law with much approval, declaring its provisions will go a long way toward cutting down the giving of hot checks.

MISS GOOCH ATTENDED DISTRICT MEETING

Miss Marie Gooch, Bailey county relief case employee, along with caseworkers from 14 other counties attended a district meeting held in Lubbock last week, under direction of Miss Viola Perkins, district administrator.

In the discussions heard, there were plenty of evidences set forth as to need of funds for continuing carrying on relief work, it being expressed by some of the agents that the coming fall and winter would see dire need from an increasing number of indigents, perhaps a greater need than before faced by this administration. It was said recent appropriations might have to be stretched pretty thinly to go around.

Recent survey disclosed, according to Mrs. Perkins, that there are about 350,000 families in Texas needing public assistance; 20,000 needing dependent children aid and about 3,000 blind and otherwise afflicted requiring assistance.

There are also many cases of farm relief, crippled children, adult handicaps, tubercular and others variously afflicted who are needy and will need assistance.

YOUNG GROWN-UPS HAVE A CHURCH SOCIAL

Members of the Young Adult class, local Methodist church, were entertained with a picnic on the church lawn, Thursday evening of last week.

Various lawn games were played, after which sandwiches, potato chips, iced soda pop and ice cream were served.

A short business session was conducted by Ferele Little, president.

Among those attending were: Mr. and Mrs. Jim Burkhead and son, Mr. and Mrs. Woodrow Gaede and daughter, Mr. and Mrs. Clyde Holt and son, Mr. and Mrs. J. T. Shofner, Mr. and Mrs. Buford Butts, Mr. and Mrs. Ferele Little, Bob Cartrell, A. W. Copley, Rev. and Mrs. J. H. Sharp.

CHURCH OF CHRIST PREACHER HERE

S. W. Sanders of Shamrock, having accepted pastorate of the local Church of Christ membership, arrived here this week and took charge of the work. His wife and two sons will follow him here as soon as arrangements can be made for residential location.

Mr. Sanders states he is greatly pleased with the favorable outlook here for the religious advancement of his church membership and the congregation membership in general. He also speaks optimistically of the favorable location of Muleshoe and the irrigation section surrounding it, and is thinking of buying a small acreage tract here for permanent location.

Before coming to Muleshoe he was a pastor at Erick, Okla.

The U. S. Senate, during a Republican filibuster last Friday night, stamped out the President's power to devalue the dollar. Senator Tydings, Maryland Democrat, in stern tones declared Congress must keep its historic powers over money to itself.

\$45 In The Pot For Trades Day Next Saturday, July 8

There was, apparently, a double attraction in Muleshoe last Saturday, not only that of Trades Day, but also a rumor to the effect a citizen of Progress community was to claim a "mail order" wife that afternoon.

Of course, as usual, the Trades Day event brought big crowds of people, but these customary visitors were greatly augmented by hundreds of others anxious to see the "tailor made bride" to arrive that afternoon. Crowds assembled upon the arrival of three different buses from the east. At eight and ten o'clock there were crowds variously estimated at from 400 to 700 people jamming the sidewalks and thoroughfares around the corner, drug store to catch a first glimpse of the intended bride.

Reports, however, are to the effect there was another hitch in the matrimonial proceedings, it being another case of "many a slip between the cup and the lip" and the anxious bridegroom failed to greet his intended spouse. Whether the lady exercised her native prerogative of changing her mind at the last moment and did not start her journey is not known. It is reported that upon seeing the immense crowd which surged around the arriving bus, she lost courage, remained on the passenger car and later got off at some unannounced point.

Dame Rumor has it the enchanted groom was to wear a bright red necktie as a mark of identification to the would-be wife, but several prominent Muleshoe citizens in premeditated deliberation and vengeance aforesaid, also donned the crimson neckties so the lady could not determine which man was the one designed to become her husband and she refused to commit bigamy.

In the giving of cash awards last Saturday General Brown was unable to dispose of the \$200 offered, everyone whose name was called being absent. That sum will be auctioned by another \$10, making \$300 some fortunate customer will receive next Saturday.

R. L. Karr received \$700; W. A. Mathis, Ben Elden, Mrs. J. C. Terrell and Bud Hicks were each awarded \$200. A total of \$45.00 will be given away next Saturday—a sum which will doubtless furnish attraction for another immense crowd of patrons and visitors.

Wheat Yields A Re Increased By The Recent Rain

Wheat harvest yield in this section, originally estimated at an average of 10 or 12 bushels per acre, appears to be yielding above that sum as wheat rolls into local elevators owners claiming as high as 25 to 30 bushels per acre. To date there have been 80 cars of wheat shipped from Muleshoe and Larlat, many more are expected before harvest time closing.

Recent showers have hindered harvesting considerably, but no resulting damage to yields have been reported, on the contrary, some growers say the recent rains have been beneficial in swelling grains, making them fill out plumper and heavier. Practically all wheat is grading normal, while some is exceeding the standard of 60 pounds per bushel.

These rains have also been of untold benefit to all spring planted crops, including the large truck crops planted in this irrigated valley.

There are a few fields of barley, rye and oats in this area, all of which are reported will make substantial yields.

Plenty of farmers in this section are now busy fighting weeds and volunteer grasses growing in their crops, which growth has been stimulated by recent rainfalls.

Wheat experts at Chicago last Friday forecast a national yield of 672,000,000 bushels. Last year's harvest totaled 931,000,000 bushels. The June government-estimated yield was placed at 668,000,000 bushels.

Other Chicago estimates were: Corn, 2,542,000,000; oats, 984,000,000, compared with 1,654,000,000 last year; rye, 35,000,000 spring, 55,000,000 harvested last year.

With the fiscal year's income \$3,580,000 short of costs, the national gross indebtedness has reached a high record of \$40,378,000,000, according to federal report from Washington last Friday night. A further debt increase of around four billion dollars is anticipated.

CLOVIS PASTOR AT THE METHODIST CHURCH

As the pastor is going to be away next Saturday, and has asked Rev. Jordan to fill the pulpit, we are asking that the Sunday school meet 15 minutes early and that all officers and teachers plan to be thru with their class periods by 10:30, at which time Brother Jordan will begin the preaching service.

Brother Jordan is asking that we do this so he might have time to get back to Clovis for the services there.

Remember the time of this service Sunday school 9:30, preaching service 10:30. We are asking our people to worship with the other churches of the town Sunday evening.

—JIM H. SHARP, Pastor.

KILL COMPLETE U. S. HIGHWAY NO. 70

Contract has been let to the New Mexico Construction Co., in the sum of \$194,215.94 for asphalt surfacing of 24 miles on U. S. Highway No. 70 between Kenna and Roswell, thus completing the unpaved gap between Clovis and Roswell, N. M.

There is still an unpaved stretch of this highway crossing the Mesquero Indian reservation, which is U.

Oooh! What A Light!

The largest lamp ever manufactured has amazed many a visitor to the General Electric Co. display at the California World's Fair as well as little Miss Beverly Ann Rheder of Oakland, Calif., a 3-year-old who looked over the Exposition with her mother. The huge lamp of 50,000 watts is two and a half feet high and Beverly just can't see-MAG-ine who'd use such a whooper.

S. Government property, and no one knows when it may be paved, if ever, since it is not the policy of the Federal government to pave through its reservations.

OUR APPRECIATION

We take this opportunity of expressing our sincere thanks and appreciation to all our friends for their kindly helpfulness and words of sympathy in the untimely death

of our beloved husband and father. Mrs. Ethel C. Darnell, Mrs. W. L. Holman, Mrs. O. N. Francis, Lettie Elean Darnell, Bertha Evelyn Darnell.

Geds of the Skier According to the ancient sagas there are two gods of the ski, Ull and Skadda. Skadda's pace was so quick he could go over ice and snow without being seen.

The Prize

By WILLIAM SNYDER (Released by Associated Newspapers WNU Service.)

FULL of his news, Martin Stevens hurried across the hall to the living-room without taking time to remove his overcoat. His wife was sewing by the west window, her eyes straining over the material in the last of the daylight.

"Is that you, Martin?" she murmured without looking up. "I did get it right, Alice," he almost shouted, starting her so that she dropped the needle she was threading.

"Got what?" irritably, as she searched for the needle. "Close the door into the hall, Martin; it lets in a draft. What did you say you got?" her tone more amiable as she located the needle.

A little dashed, her husband closed the door and took off his overcoat before he answered, but he did not give a note of exultation out of his voice then.

"That puzzle thing I was trying to work the other night, when all of you made fun of me and said I couldn't do it. I sent it in just for fun and I won a prize."

The staid man of business was as pleased as a child who has received a good school report. And Mrs. Stevens was excited now.

"Isn't that splendid? I can order the new curtains and the rug for the dining-room. I'll call up right away—Arnold's won't be closed yet."

"But—" he began futilely, for she had gone.

He took a step or two after her, then shrugged his shoulder. Oh, well, he had been meaning to tell her that she could get the curtains and rug anyway.

He was settling into a chair by the fire when the door flew open and Suzette bounced in, charming in her bright green frock and little black hat.

"Oh, papa," she shrieked (shrieking was her "line" just now). "Arnold says you got the prize for that funny contest. Now I can have a permanent at Anton's and a new evening coat, can't I?" It was a statement, not a question. "Give me a check now, and I'll get the coat and an appointment with Anton in the morning. A hundred and fifty will do both of them. Who would have thought I had such a smart dad?"

"But, Suzette, I can't—I didn't—" Her soft red lips had begun to quiver, her blue eyes to fill.

"Why, papa, you're going to divide with my aunt's girl? Her mamma can have the curtains and things she wants, surely you'll let your little girl have a little old permanent and a coat for dances. My old one looks just horrid with the new long dress."

Then she brightened, for her father was taking out his checkbook resignedly. She hung over him, chattering fondly, until the magic slip was signed, then she danced out, waving it in the air to dry the ink. The front door slammed, and Suzette shrieked at the new arrival. "Look Wilfred, papa won that prize puzzle he was working at the other night and won a lot of money. See what he gave me," as she stuck the check tantalizingly under her brother's nose.

When Wilfred dashed in Martin Stevens' fountain pen was already poised over the check-book.

"What is your pet desire of the moment, son?" he queried with a grimace that went unnoticed.

"Gee, dad, you're a lucky one, aren't you? If you could let me have fifty, I'd go on that week-end trip with the fellows. Thanks a lot, dad—see you at dinner."

A moment later a light step in the hall presaged the entrance of Aunt Lucy, her delicate face beaming.

"Well, Martin, Alice just told me of your good fortune. I am so glad that you can give me something now to help with the settlement girls. Twenty-five would be about right. I thank you in behalf of the settlement."

"Hello, Martin, you lucky dog!" boomed a hearty voice. "Ha, ha—I found you out. Yessir, your Suzette told my Elsie about it. Now, old man, you'll have to come across with that subscription to the new club-house. I'm going to put you down for five hundred. Easy come—easy go—ha, ha! See you tomorrow."

Martin sank limply into his chair before the fire, and drawing a neat slip of blue paper from his wallet contemplated it ruefully. It read:

"Pay to the order of Martin Stevens 25 dollars as tenth prize in the Whatisis puzzle contest."

"Garden of Eden" Improved With life-giving water from recently completed irrigation projects, the government of Iraq is transforming the traditional stony of the Garden of Eden from dusty desert into green, productive land. West of Baghdad, between the ancient Euphrates and Tigris rivers, the reputed home of the Biblical Eden is fast learning the ways of modern civilization. Over it fly birdmen of three airlines. By it roll the mechanical giants of rail and motor bus transport. Little more than a hundred miles away are the two pipe lines through which oil flows hundreds of miles to Mediterranean ports.

Maple News Items

Quarterly conference was held at the Methodist church Sunday with Presiding Elder E. E. White of Plainview in charge. He gave an interesting, descriptive talk of the visiting conference held recently in Kansas City, Mo. A basket lunch was served at noon. Visitors were present from Enochs and Bala, and Rev. and Mrs. G. R. Port of Lubbock.

Mrs. Wilma Holloway returned Monday from Elstra and other points where she has been playing as pianist for several revival meetings.

Mr. and Mrs. J. L. Kikpatrick entertained relatives over last week-end.

Mr. and Mrs. Drew West and son, Clyde Rex and daughter, Ruth of Peralta, N. Mex., visited Sunday afternoon with Mr. and Mrs. E. B. Fleming and family.

Mrs. M. W. Holloway and Ruby Lee visited Saturday night and Sunday with their son and brother, I. W. Holloway and wife.

L. J. Fleming underwent a tonsillectomy at a Littlefield hospital Wednesday of last week.

Farmers are having to plant over after the two big rains that fell Wednesday and Friday of last week. The hail two weeks ago completely wiped out the cotton in this community. There will be a small crop of late cotton, if it survived the big rains. Some farmers are planting

the fourth time. Richard Finch is attending summer term of college at Tech., in Lubbock.

D. Rector and J. W. Fleming went to Littlefield Thursday of last week after L. J. Fleming, who is recuperating nicely.

Patsy Bennett of Goodland spent last week visiting her aunt and uncle, Mr. and Mrs. Bob Sanders. Reporter.

"Tomatoes of Tomorrow" Pampered Like Babies

In a section of the chemi-culture garden at the New York World's Fair tomato plants are grown in water without the aid of soil. Clifford Kaess, chemist, who acts as their nursemaid is shown checking the official feeding chart. At right is shown a few of the growing plants which yield as many as 28 tomatoes on each vine.

WHAT farming will be in the world of tomorrow presents a new thought to visitors viewing the huge tomato plants cultivated without the use of soil in the Helms Dome at the New York World's Fair.

This type of scientific gardening is known as chemi-culture. The plants in these jars were raised from special pedigreed tomato seeds. They bear continuously over a relatively long period of time and yield a large crop of luscious fruit, considerably more than the average garden variety. The plants in some of the jars which have attained a height of from six to seven feet are held in place by pure white sand without any soil.

Beside each growing jar is the nutrient solution tank on a pedestal. These tanks contain all the mineral elements needed by the plants dissolved in distilled water. The plants, in this way, get all the minerals they need for growth

which they ordinarily would get from soil. There is a constant flow of this nutrient solution into the growing jars because plants change the physical and chemical properties of the solutions, in which they grow.

This renewal is accomplished automatically. About two quarts are used by each plant every 24 hours. The advantage of this method of experimental gardening is that the plants are supplied with the mineral nutrients in scientifically controlled amounts, and the effects of varying the quantities of the minerals can be studied.

Although chemi-culture is not a commercial production method this type of laboratory research takes a healthy peak at the "Tomato of Tomorrow." This so-called dirtless farming has been under experiment over 100 years ago. It was not until recently that it came to the attention of the general public.

quired to perfect the new system, which will go into effect August 16.

In a straw vote taken in Dallas and Hartley counties last week, 36 per cent of the voters thought President Roosevelt should seek a third term, while 47 per cent said they would vote for him if he did run.

A new federal building to house the postoffice at Littlefield and plans for same are now nearly completed, according to report. Contract for construction is expected to be let early in August.

Meade F. Griffin, Plainville attorney and former prosecuting attorney of this district, was made a director of the State Bar Association at its meeting held in Austin last week.

Littlefield is to have another standpipe and 100,000 gallon water tank, to be erected there by the Union Compress Co., the city also have municipal benefit of the service, which will mean further reduction in fire insurance rates.

Frank Phillips, Bartlesville, Okla. head of the Phillips Petroleum Co. has donated \$50,000 to the National Council of Boy Scouts of America. A donation of \$200,000 had been previously made to the Scouts through the Frank Phillips Foundation of New York.

Gov. Odaniel, in his broadcast last week, blamed "interests" for failure to pass a satisfactory old age pension measure, intimating these same interests are urging a special session of the legislature, which he also intimated would not be called.

When electric lights went out at Amarillo a few nights ago, Ken Williams, expert archer, rolled an automobile into position, turned the headlights on to his target, and while Miss Monty Montgomery stood in the glare with an apple on her head he performed the famous William Tell act of shooting an arrow through the fruit, never touching the young lady. He says he wouldn't do it again though, for \$100,000.

A century old debt of \$16,242.80 is about to be paid by Texas, going to R. Young Lovry and Mrs. Mary Nelson Lovry Nolan in full settlement of their claim and title, as representative of Thomas F. McKinney for the "money, property and Credit" he provided for the fledgling Republic of Texas.

Workmen at Santa Fe, N. M., a few days ago uncovered a bucket containing an estimated \$10,000 in gold found in that city while cleaning out an old well in the basement of a curio store operated by John Candelario, grandson of the late J. S. Candelario, pioneer Santa Fe merchant.

General News Over Texas And Other States For Week

The 1st Texas American Legion convention will be held in Waco, August 26-29, about 37,000 members being expected to attend.

Red Construction Service offices have been moved from Amarillo to Lubbock, according to announcement of H. H. Fimmel, director.

Ground was broken last Sunday at Perryville, N. M., for construction of a boys dormitory at the New Mexico Baptist Orphan Children's Home there.

Installation of the new dial telephones by the Mountain States Telephone Co. was started last week at Farwell several weeks will be required to perfect the new system, which will go into effect August 16.

tion of such statutes."

There is more significance than has been pointed behind the announcement of the C. I. O. that it will begin a major unionization drive in the aircraft and shipbuilding industries soon. It is these industries that will carry the heaviest load in the National defense program. And here is the background for the announced C. I. O. drive.

Several weeks ago the C. I. O. almost succeeded in slipping a "joker" through Congress which would have given labor agitators (or even foreign spies) enough power virtually to shut down the nation's defense industries. The "joker" was in the form of an amendment to the National Defense Bill. It would have voided any government defense contract if the firm holding the contract was engaged in any labor dispute. And a labor dispute can

mean a dispute between an employer and a single employee. The amendment was tossed out of the defense bill when, at almost the last minute, the joker was discovered.

Enochs Echoes

Mr. and Mrs. G. P. Howell and daughter, Alyce Marie and Mrs. Eddie Clifton were Lubbock visitors, Tuesday.

Mrs. L. C. Harris and baby daughter left Tuesday for Dallas where the baby will receive medical treatment at a hospital.

Mrs. H. W. Weathers returned to her home Thursday from Hot Springs, New Mexico, where she had spent the past 10 days with her daughter and husband, Mr. and Mrs. Lester Blackstone and child-

ren. Mr. and Mrs. Zed Robinson and daughter, Nelouise, visited in Littlefield Sunday afternoon.

C. C. Hopper and L. H. Bates transacted business in Muleshoe Monday.

Miss Ida Jane Woolly went to Muleshoe last week to visit her grandparents, Mr. and Mrs. J. T. Gilbreath, and will accompany them to Brady to celebrate the 4th with their son, Hubert Gilbreath.

Mr. and Mrs. Guy Berry and children from Lamesa were Enochs visitors last weekend.

Mrs. L. H. Bates, Miss Viola Parker and Mrs. W. A. Snow and children visited in Lubbock last Thursday.

H. H. Snow and Misses Marieta and Viola Parker left Saturday for Ft. Worth. Marieta and Viola will visit their parents at Eastland on the trip.

The world knows Chevrolet passenger cars and trucks are first in value, and that's why the world has placed them first in sales!

Important to every motor car buyer is the fact that Chevrolet, first in passenger car sales, is also first in motor truck sales, because truck buyers select the trucks that pay the greatest returns.

The same qualities that distinguish Chevrolet trucks exist in equal degree in Chevrolet passenger cars. You may choose your Chevrolet solely for its beauty, comfort, or performance—but you will get in addition that all-important extra value.

Washington Snapshots

The 1st Texas American Legion convention will be held in Waco, August 26-29, about 37,000 members being expected to attend.

Red Construction Service offices have been moved from Amarillo to Lubbock, according to announcement of H. H. Fimmel, director.

Ground was broken last Sunday at Perryville, N. M., for construction of a boys dormitory at the New Mexico Baptist Orphan Children's Home there.

Installation of the new dial telephones by the Mountain States Telephone Co. was started last week at Farwell several weeks will be required to perfect the new system, which will go into effect August 16.

Washington Snapshots

The acoustics in Washington are sometimes phenomenal. For instance the drop of a political pin will sometimes make more noise than a boulder dropped from the Washington monument.

So it is that a boulder has been dropped (without much noise) on the toes of the New Deal. In this case the weighty object dropped is a Congressional report attacking the administration's method of issuing rules and regulations. This report contains one of the most pointed barbs written in several sessions of Congress, but it has passed unnoticed in news dispatches from Washington.

The report was written by the Senate's Judiciary Committee which has been considering a bill to place some curb on the power now enjoyed by Federal agencies. The bill under consideration would permit court review of rules and regulations issued by these agencies. Under the present administration set up, the rule makers abide by no rules other than their own, and figuratively thumb their noses at the courts and Constitutional law.

Here is the barb in the committee's report:

... the prime consideration and emphasis has been on strengthening the powers of the Federal Government, so as regulate and control the government with practically no consideration being given to providing means and methods whereby the governors could be governed and the regulators could be regulated. The time has come when some of these regulators consider themselves above the statutes and when they show contemptuous disregard for both the Congress and the courts. Unless this country is to become first a parliamentary and then a totalitarian government, with the States reduced to mere police provinces and with both the legislative and judicial branches of our Government dominated by the administrative agencies must be required to both observe the terms of the statutes and to exercise good faith in their administration of such statutes."

THE ENTIRE COST OF THE C.C.C. COULD BE PAID FOR BY THE TAXES OF THE BREWING INDUSTRY!

The Treasury Department shows expenditures of \$26 million dollars for the Civilian Conservation Corps for the fiscal year of 1938. The brewing industry pays over a million dollars a day in taxes.

What Beer contributes to the re-building of America would fill a great volume

Over 400 million dollars in taxes every year. Over 1,000,000 jobs. A market for 3,000,000 farm acres of produce.

The brewing industry would like to preserve for itself and the people the many economic benefits it has created in the past five years. Brewers everywhere realize that this is a question bound up with the proper distribution of their mild and wholesome beverage through retail outlets whose character will be a credit to the community. Obviously, the brewers can enforce no laws. But they can—and will—cooperate with the local law-enforcement authorities. They will cooperate with every group—friend or critic—to the end that retail beer outlets give no offense to anyone.

Every Great Attempt is Glorious Even If It Fails

A THOUGHT FOR THE WEEK

Be not dejected. God is not mocked: For whatsoever a man soweth, that shall he also reap—Galatians 6:7.

Blessings ever wait on virtuous deeds, and though a late, a sure reward succeeds.—Congreve.

JULY FIFTH!

July 5th is, of course, just the next day after the celebration of the Fourth, famous as our national independence day. Plenty of people celebrate the Fourth, but how many of them commemorate it, or even ever stop to think amid their jubulations for what that day stands.

The next day after is always too late for many of them to recall the events of the day before or that of history which can credit to so outstanding. Even as this is being written, it is known there are now hundreds of celebrators lying cold in death, many others writhing from the pains of accident, while an unnumbered group of friends and relatives are distressed and bereaved because of the adverse conditions arising as result of that day's memorial.

Really, it's better to forego too much celebration of the Fourth and be alive the fifth. Traffic congestions, fireworks accidents and innumerable other liabilities produce more danger and death than they are often worth. All holiday occasions should be enjoyed with due respect to self-protection and self-protection. Reckless swimmers, autoists and fire-cracker poppers should keep in mind a realistic picture of how a morgue would look the next day with their body lying in it on a cold marble slab. We well understand that independence is worth fighting for and dying for, but we are also well assured that self-annihilation and injury through thoughtlessness and carelessness is not the prescribed method for celebrating July 4th.

Much of life's success comes through taking reasonable chances; but after all, life itself is worth more than success per se, for success may be obtained at some future date, while life once lost is gone forever. Dying for American independence was the tragic roll played by our forefathers. They died that their descendants might have freedom from oppressive government, but they had no desire that the descendants should continue the toll simply as a part of the celebration.

We realize perfectly well this is an editorial written on the principle of "locking the stable after the horse has been stolen," but perhaps from this suggestion may come a hint which may linger in the minds of some Journal readers causing them to be more careful in the future and to realize what a blessed thing it is to be alive the next day after a holiday.

INTO ITS OWN:

Starched shirts and silk hats made a good showing during the royal visit, but all of that is past and we are proud that we conducted ourselves in such a respectable and edifying manner. We are not apt to forget one thing about the visit of the King and Queen, and that is the satisfaction in knowing that their majesties could eat with relish and mustard, an honest-to-goodness hot dog. It is comforting to feel that this space between royalty and common folks isn't so great that the lowly frankfurter can't bridge the gap.

These are the days of family and church picnics, family reunions and ice cream socials. There will be found the American hot dogs at the typically American scene. As you eat amid a group of friends, give a thought what it means to be Mr. Average Citizen instead of His Highness. You have a mouthful of bun and are apt to be dribbling relish over your bib, but what a nice sort of life this is! You enjoy your picnic and we bet the crowned heads liked theirs at Hyde Park, too.

The only thing that puzzles us is are they only ate one apiece. Another thing, it wouldn't surprise folks in Muleshoe to find some company putting a frankfurter on the market stamped with a coat of arms as a trade mark and "By Appointment to His Royal Highness" stenciled on each hot dog. That is advertising!

WHY SCARCE WORK

If we're looking for reasons why there is so much unemployment and why there are more jobs for the unemployed, here's one that speaks for itself in tones loud enough to be heard by even the most indifferent observer.

The Standard Statistics Company has just released a report showing that last year 80 representative corporations paid a tax bill of \$203,682,751, and that after paying this tax bill, these companies had an aggregate net income of but \$133,685,202. Reduced to more comprehensible figures, this means that the various governmental taxing agencies took \$20 for every \$13 paid to stockholders. Nor does that tell the whole story. Some of these taxes must be paid whether the corporations are operating or not for the fun of it either.

That just about completes the circle. P. oyle will not invest money in a corporation whose enormous tax bill prevents the payments of dividends, and without such investments, industry is certainly not interested in more comprehensible figures, this means that the various governmental taxing agencies took \$20 for every \$13 paid to stockholders. Nor does that tell the whole story. Some of these taxes must be paid whether the corporations are operating or not for the fun of it either.

Now, it is a well-known fact and a sound theory that employs do not work for fun, and it is just as sound a theory that investors do not put their money into industrial concerns just for the fun of it either.

THESE CARICONS ARE THE ARTIST'S INTERPRETATIONS OF AUTO HISTORY © 1928 BY EMERSON LAMMEL

given a word of advice from Jeff Davis, the King of Hobos.

He warns that already there are about 20,000 youngsters on the road and an expected 50,000 by July. The odd jobs to be found are scarce and the risk of hunger, jail and association with criminals is common.

Folks in Muleshoe will do their best to keep their young off of the road for such traveling is apt to produce trouble and sorrow. It is too often that the paths aren't straight.

A NEW WRINKLE

There are some women who never take an interest in affairs other than those around their home and village. Some say they are too busy to read, but there will be all of these souls aroused when they discuss and make a feminine attack on Mr. Hiller's latest edict.

He feels the lack of manpower wasted in the manufacture of cosmetics and demands a 90% reduced production. This goes far after telling the ladies to have babies, do without bread, join the army. Something will make our women folks interested in international affairs, and this is it! When you place a bet on beauty preparations, "them's fightin' words, Mister".

Jaunty Journalettes

June is the favorite month for some young folks to start in proving that fellow a liar who said two could live as cheaply as one.

This is about the time of year when some fellows in Muleshoe wait until a member of the family gets sick before he cuts down the weeds that breed disease around his property.

We've run across a few people in Muleshoe who are like pins—no use to anybody when they lost their heads.

The Fourth of July has come and gone and there was the same question confronting Muleshoes—how to stay sane and yet act mildly crazy.

The fellow in Muleshoe who has sworn off smoking should surely be given the privilege of bragging about it.

We were told the other day there were not so many Muleshoe women changing the color of their hair as there used to be; but changing of feminine minds is still in vogue.

Occasionally we are reminded that some Muleshoe men are like June bugs. They do a lot of flitting around needlessly, don't do any harm, and then die an early death.

There are indications that plenty of Muleshoe women are quite agreeable about getting married, but that "agreeable" part somehow is forgotten by some of them shortly after leaving the altar.

SNAP SHOTS

Most folks are simply crazy about

Doctor Advises Folks Regarding Summer Sicknesses

Austin, July 5.—As the thermometer shows signs of climbing higher and higher some of the ways by which babies may be kept well and comfortable during the hot weather and may be safeguarded against "summer complaint" are outlined by the Texas State Department of Health.

"The best way to keep your baby well," advises the department, "is to take your well baby to your doctor regularly for advice and supervision, and to follow the doctor's instructions carefully and very faithfully. If your baby develops any digestive trouble, call your family doctor at once. He'll tell you what to do.

"Summer complaint, or cholera infantum as it is sometimes called, and other digestive diseases that are dangerous for babies, are germ diseases. The germs that cause the disease get into the baby's food or in the water given the baby to drink. Babies who are nursed by their mothers and who are given cooled, boiled water to drink are protected from these sources of danger. Care should be taken not to wean a baby in hot weather except under a doctor's orders.

"If mother's milk is not available, the best substitute for it is fresh cow's milk or unsweetened evaporated milk mixed with an equal quantity of water. If sugar or additional water is needed, it should be mixed with the milk according to your doctor's directions. All milk or milk mixtures given to children up to two years of age should be boiled. The feedings should be kept in individual bottles and kept on ice until used. Each feeding should be warmed as needed.

"Always wash the hands thoroughly before preparing the baby's food, and before handling the baby's bottle. All dishes, pots, pans, bottles and nipples should be sterilized by boiling.

"Throw out any milk left in the bottle after feeding. Don't leave the bottle in the baby's crib or carriage. It will attract dirt and flies. Rinse out the bottle; put the nipple aside, and see that both are sterilized by boiling before using again.

"Some of the diarrheal diseases that grown-ups have are catching. Keep the baby away from people—both children and grown-ups—who are suffering from such diseases. "If your baby develops diarrheal trouble, don't let it run on. Call your family physician at once."

LIGHTS NEW OF YORK

By L. L. STEVENSON
Spooks: Recently word spread that an old brownstone house rapidly falling into ruin on the outskirts of the Bronx was haunted. The tale ran that the ghost was that of a woman who had been killed there by her husband many years ago. No one saw the ghost but several persons declared that in the darkness of the night they heard unearthly groans. Finally four young men, all deeply interested in psychic phenomena, decided to investigate. Meeting at midnight, they boldly entered the house. What was taken to be a moan or a groan sent three of them out hurriedly. The fourth remained. His companions waited for him breathlessly and just when they had made up their minds to verify the police report, he came. With him he brought not one "ghost" but two. They were a pair of small owls that had evidently decided that a ruined and deserted house made a fine residence.

Zoological: Friends of Medrano and Donna, Hispanic dancers, observed them sneaking in and out of the vegetarian restaurants lately. As they seldom eat anything but meat, so much curiosity was aroused that a checkup was made. It seems that on their last trip to Argentina, the dancers acquired a pet octoel. It's a gorgeous, sleek animal, closely related to the leopard. When young, it makes a playful and entertaining pet. But when it grows older, it reverts to nature and becomes a fierce, meat-eating beast. So, to keep their pet tame and happy, Medrano and Donna have been endeavoring to fool it with a diet of vegetable and meat balls.

"Red" Johnson says since he has been in business in Muleshoe he has learned it is easier to bowl a girl over if she is right down his alley.

"Where in hell have I seen you before," remarked a stranger to G. O. Jennings a few days ago. "That surely depends on what part of hell you are from," replied G. O.

Judge Miller says that in a long experience with the feminine sex he has discovered that no woman will entirely forgive a man for completely understanding her.

"L. t. me show you something new in a snappy sedan," said Glen Rookley to a charming young lady the other day who was admiring the Ford cars. "Alright, I'm willing for you to try, she replied, "but really I don't think you can."

A young Muleshoe man who shall be named, is said to have taken his lady friend to Amarillo last week to see the animal exhibition. While there they were enjoying a delicious lunch in a private room at a night club spot. As they were just finishing, he said to her, "How about a little demt taste now, my dear?"

Jumping up quickly from the table, she replied: "I knew all the time you weren't treating me nice for nothing."

TEXAN BECKONS

MISS MEMIE BRIGHT, Waco beauty and Baylor University graduate, now on the staff of The Borden Company at its New York World's Fair exhibit, beckons to the passersby to come in and observe the marvels of "The Dairy World of Tomorrow" in which 150 pure-bred, selected from Texas and other States, are milked three times daily on a rotolactor, or merry-go-round platform.

The "Big Stick"

"Speak softly and carry a big stick, you will go far," is a West African proverb. Theodore Roosevelt popularized it. It became a sort of slogan to describe his strong foreign policy and his advocacy of military and naval preparedness. He used it in an address on September 2, 1901, at the Minnesota state fair, when he said: "There is a homely old adage which runs, 'Speak softly and carry a big stick. You will go far.' If the American nation will speak softly and yet build and keep at a pitch of the highest training a thoroughly efficient navy, the Monroe doctrine will go far."

Helping Others
"De man dat neber helps nobody else," said Uncle Eben, "is liable to get whar he ain't evn helpin' himself."

Constipated?
For years I had occasional constipation, awful gas bloating, headaches and back pain. Adlerika always helped right away. Now I eat sausage, ham, turkey, and I never feel better." Mrs. Mahel Schott.

ADLERIKA
Western Drug Co.

WEST TEXAS GAS COMPANY

WEEKLY LAY SERMON

HEREDITY

By JESS MITCHELL

Some years ago a fine young man who had received his college education, was permanently settled in business with a bright future prospect, already having several hundred dollars in the bank, and who much desired a home, told me he had put off marrying for five years largely because he had not yet found the right kind of woman he wanted to become the mother of his children. That young man believed in heredity and was anxious to live in accordance with its laws. Too frequently today it seems young people pay little attention to lineage when they contemplate marriage. There is some other over-ruling factor which influences them.

It is an old saying that "blood will tell" and I am a firm believer in good blood, bad blood, proud blood, heroic and cowardly blood. The manifestation of what blood really is may skip a generation or not manifest itself definitely in some members of a given generation, but it is sure to become known in the long run. Scientists today recognize there are certain tribal instincts, certain habits and certain physical, mental and moral characteristics that are transmissible from parent to child and that many of these potent factors of heredity are distinctly manifest and recognizable.

We can often recognize the national blood of a man by his physical characteristics. Most Germans, Irish Italians and folks of other nations are readily classified because of their physical appearance. Seldom does one mistake a Jew, for they carry their own physical characteristics stamped upon their faces. We learn from the study of history that Roman blood is almost synonymous with conquest, Jewish blood runs to financial accumulation as far back as Abraham. Indian blood means a roaming disposition. Welsh blood is very religious in its nature. Scottish blood is persistent and English blood has much native reverence in it.

Likewise, some families are characterized by their great stature, others by their longevity, still others by their slothfulness of mental acumen, some for their philosophical or mathematical natures, others by their religious fervor. Some seem to be natural warriors, others born diplomats, some quite pronounced in their generosity, while still others are noted for their selfishness. It is also a notable fact that the law of heredity pays no attention to social relationship nor to political status. Environment has its concomitant influence, and often we have met people whom we realized from their speech, mode of action and ideals were not occupying the status in life for which they were designed. Avarice and jealousy often runs rampant in some families and is handed down to their children. Some young folks manifest the violent temper of their parents. Others have rough exteriors, but quite refined interiors. The Bible says something about the iniquity of the past being visited upon the children even unto the third and fourth generation, and if that statement is correct, it may also be true that the virtues of fore-parents are also handed down to future generations.

I am no direct believer in pre-

destination nor in fore-ordination, yet I can not get away from the proven fact of pre-natal and tribal influences upon new born children. The psychologist will go into elaboration of explanation of physical cell propagation and brain cortex arrangement in delineating hereditary influences, yet the manifestation of parental tendencies by the offspring sometimes seems to be inspired by a cause frequently greater and more potent than that. There is some reason to believe there is an all-important spiritual influence which can not be disregarded.

Frequently it takes a mighty force of determination to overcome one's family traits and tendencies, yet it is sometimes done. Aaron Burr's father was a consecrated minister of the gospel and one time president of Princeton university. The father and mother of the renowned Rev. James Thomas, were keepers of a low dive in New York City. Most of us have known men and women who came from the very lowest type of parentage, yet through strict schooling of their natures, the manifestation of grim determination and proper association, they have developed themselves into the very highest type of cultured, refined, influential people.

I presume there never have been any perfect parents, nor maybe never will be. There are, however, multiplied fathers and mothers who strive daily to keep their conduct upon the highest possible level, rearing their children in keeping with lofty ideals. They realize full well the responsibility thrust upon them in the proper rearing of their children and they are bending every possible effort to do it right. Both by precept and example they endeavor to train their children so they will be a benediction to themselves and a credit to the community in which they live. The Lord only knows the multiplied millions of prayers that have ascended to the throne on high from wholesome parents-for the purity and prosperity of their children.

Just now there is much being said regarding the retrogression of civilization. Not a few people honestly believe the mass of folks living today are going backward morally, and some have already begun looking for the signs of "throw-backs." A throwback is a specimen of animal life, human or otherwise, that has all the characteristics of its ancestors. It is insisted that our present easy sort of living is conducive to inefficiency in various ways. Ancient Egyptians frequently killed lions with their bare hands. The Romans were a hard-bitten folk, more than holding their own with the long haired Visigoths. Greece was once noted for its intellectual vigor. The history of practically every nation of the past is to the effect that its civilization became soft, flabby and impotent when it arrived at the point of easy living, such as today exists in America, add all regardless of the recent economic depression, for somehow or other, most of our people are able to buy automobiles and refrigerators, air-conditioning systems and fur-trimmed silks and broadcloths, and passage to picture shows, etc.

Grip, grind and gouge often reach

Funeral Service For A. W. Darness Held Last Friday P. M.

Funeral services for the late Austin W. Darness, 66, for several years a resident of V.I. community, northeast of Muleshoe, was held Friday afternoon of last week. Rev. M. D. King, Methodist pastor of that community, officiating. Deceased had expired Wednesday afternoon from a heart attack. The last rites were held from the Methodist church there and interment remains made in Muleshoe cemetery.

Mr. Darness had had some previous heart difficulty, but his sudden death was quite unexpected, he expiring almost instantly while sitting in his home watching a checker game being played.

He was born at Bedford, Indiana, moving to Oklahoma in 1902, later coming to Bally county in 1932 where he had resided ever since. In 1907 he was married to Miss Ethel Cecelia Marshall.

He is survived by his widow and four daughters: Mrs. Nettie Holman, Hobart, Okla.; Mrs. Grace Francis, Omaha, Nebr.; Misses Lettie Ellen and Bertha Evelyn, both of Muleshoe; two sisters, Mrs. Emma Stotts, Bison, Okla.; Mrs. Lulu Quackenbush, Bedford, Ind.; a half-brother, Ralph E. Callahan, Merced, California, also three grandchildren.

out with cold, clammy fingers to clutch and twist. The thirst for intoxicants has come down through numerous generations. Pugnacity and combativeness characterize thousands of families. Selfishness and covetousness have existed for a long, long time. Tempers seem just as quick today as they were 2,000 years ago. The jungle natives of the Belgian Congo have their counterpart in the jitterbugs of today, surprisingly close to the antics of savages a hundred years ago. It has yet not been so long since we were torturing so-called sorcerers and burning believed-in witches in America. The brutality condoned by some nations at least indicates a recurrence of the Dark Ages.

While most savants recognize the influence of heredity, just how much there is in it no one seems to actually know. It sometimes breeds a generation of culture only breeds a desire for the rude joys of savagery, while on the other hand, generations of ignorance breed longings for knowledge, and this genius is again born. It sometimes follows a mainline life seem, in some unexplainable manner, to gather strength in such dormancy which blossoms forth in acute intelligence and with no apparent known cause. Great mental acumen sometimes comes from the lowest of ignorant parentage. The parents of Wm. Shakespeare, one of the keenest minds the world has ever known, were actually sub-common folks, neither could read or write. The children of great authors, as a rule, do not become noted writers. Genius frequently runs out in a generation or two. Only one president of the United States ever had a son to become president. Extremes often bring limitations and obstructions. In this hectic hurrying and racing of human uplift and downfall, we find ourselves wondering sometimes if Nature really cares or has anything to do with it, for smiles and tears, life and death, success and failure seem to make little difference and the sun shines as brightly on coffins as it does on cradles. It sometimes seems that when Nature produces a genius she holds him close to her breast, whispering into his ears secrets transmitted to his super-understanding brain unknown to ordinary folks. Some one has said "poverty is the half-sister to death," and intellectual poverty is apparently of some real bastard birth. At any rate today, many people, both believing and disbelieving in heredity, fear that humanity is at the crossroads of history.

Franklin Foted in Paris
When Benjamin Franklin was in Paris in Revolutionary days seeking help for America, he received such ovations as the old Spartan had never dreamed of. Parties were given in his honor, at which the most beautiful women were chosen to embrace him in turn. No man of quality was complete without a ring or snuff-box with his medalion. "These," he wrote to his daughter, "have made your father's face as well known as that of the moon, so that he durst not do anything that would oblige him to run away, as his phiz would discover him wherever he should venture to show it."

Moon Not a Star
The moon is not a star because it does not produce any light and does not maintain a relative fixed position. It is not a planet because it does not revolve around the sun. It is what astronomers call a "satellite," or a body revolving around a planet. Some of the planets have several moons, and a number of these travel in the opposite direction to others. Our moon revolves around the earth every 27 1/4 days.

See by Sound
In Lehman Caves National Monument, Nevada, the insects living in the dark cave recesses apparently are insensible to light but are highly sensitive to vibrations.

FARM TOPICS

SUGGESTS ELECTRIC FARM WATERWORKS

North Carolina System Costs About \$100.

By RUSSELL BROADBUDS
A water system can be installed in the farm home for as little as \$100 with the advent of rural electrification throughout the United States.

New opportunities for installing labor and time-saving equipment are offered farm people at a price they can afford to pay, the North Carolina State college has found. The first essential in a water system is a good, clean, wholesome supply in a quantity sufficient for the farm and home needs. A well should be located at least 50 feet from any possible source of contamination.

To keep a water supply clean and free from harmful bacteria, the well should have rock masonry, brick or terra cotta walls from bottom to top. In many cases driven or bored wells with iron castings are quite satisfactory. All wells should have tight, properly-made concrete platforms to keep out surface water.

An electric water system will provide 1,000 gallons of water per hour for three cents when the electric rate is six cents a kilowatt hour. In many cases the small amount of electric current used to pump water will not increase the monthly bill above the minimum charge.

The college recommends that the farm family first install an outlet to the kitchen sink and another to the barn for watering live stock. He says this can be done for approximately \$100. The system can be enlarged as finances permit.

The average farm laborer earns from 20 to 30 cents an hour for his work. Why then should the farmer's family work carrying water at the rate of one-half cent per hour?

Opportunities Offered In Homemade Equipment

Homemade equipment is only for persons who have ideas of their own. A farmer usually sees a neighbor's wagon, inspects it, and goes home to build one for himself, or lets his son do it.

Also, say engineers at the New York State College of Agriculture, rubber-tired tractors have convinced farmers of the practicability of rubber-mounted equipment. In their opinion, a start toward bringing all the equipment up-to-date is the farm wagon which can be made easily and will cost about \$35, without box or rack. Auto running gear, preferably with 600-16 tires, is the best material and easy replacement when the wagon is heavily loaded.

The advantages of tires are lost, it is said, with more than 25 pounds of weight on the equipment. Tires are satisfactory if the wagon is used on the farm and not behind a truck or car on the highway. If used on the road as a trailer, New York law requires that it be equipped with brakes, lights, and a license.

Enslage carts that push easily over litter and other obstructions may be made at a cost of from \$20 to \$25 for material and labor, according to the engineers. A sturdy handy cart for carrying milk cans may be made from old auto wheels, he says.

Suggest Caustic Potash To Remove Cow Horns

In the wild state, cows may have needed their horns for defense, but under modern conditions they are of no practical value except from the standpoint of beauty, say Washington State college dairymen, who recommend that horns be removed from calves at an early age. Horns may be removed with caustic when the calf is about a week old. Caustic potash in sticks may be used for this purpose. Tie the animal securely then clip an area over and around the horn "button" about the size of a half dollar. Cover this area with vaseline to prevent the caustic from burning beyond the horn area.

Wrap one end of the caustic in paper prevent burning the fingers of the operator. Place the stick of caustic over the center of the horn button and rub with a circular motion until the caustic has gone through the skin and to the center of the horn button. Some practice is necessary to achieve the best results.

Do not turn the calf out in the rain for a day or two and do not allow other calves to lick the treated horn buttons.

Turning Eggs

Some authorities assert that when eggs are hatched in an incubator they should be turned three or more times a day from the third to the eighth day. Before the hands are clean and free from oil or grease when the eggs are turned. If hatched under a hen, this handling is unnecessary as the hen will take care of the necessary moving. However, all hatching eggs should be candled on the seventh day and all infertile eggs removed.

SUB DEBS SLUMBER (?) AFTER SKATING

Members of the Sub Deb club of Muleshoe were entertained with a dinner at the home of Miss Lela Mae Barron Monday evening.

Following the delicious meal, the group enjoyed skating, at a rink here, after which they went to the home of Miss Hattie Ray Griffiths for a slumber party.

Among those attending were: Misses Jo V. Gons, Mary Dennis, Billy Jo Ann Damron, Mary Sue Osborn, Betty Jo Jordan, Geraldine Taylor, Frances Border, Juanita Coker, the hostesses Miss Lela Mae Barron and Miss Hattie Ray Griffiths, and a guest Miss Doris Hamilton.

Members of the club met in regular session Thursday afternoon of last week at the home of Miss Frances Border.

GENEVA SCHMITZ DIES OF ENLARGED HEART

Geneva Inez Schmitz, granddaughter of Mr. and Mrs. G. J. Garth of Balleystown community, died June 21, due to an enlarged heart.

The deceased was born August 21, 1925, being 13 years and 10 months old. She had been ill about four and a half months.

She is survived by her parents, Mr. and Mrs. Curtis L. Schmitz and two brothers Earl and Monroe of Crosbyton, her grandparents, Mr. and Mrs. J. B. Schmitz of Cisco, Mr. and Mrs. G. J. Garth of Balleystown, also by one great grandparent, A. P. Garth of Balleystown, a host of other relatives and friends.

Funeral services will be held at 10 o'clock Saturday morning at the home of the deceased.

Fort Matanzas is situated about sixteen miles south of Fort Marion, Fla., and guarded the south inlet of the Matanzas river. It is a small fort about forty feet square located on Rattlesnake island. Having no boat, it could be entered only by the use of a ladder. The word "Matanzas" means "bloody" and the fort takes its name from a gruesome event which occurred about 1565 when the Spanish slew some 300 French Huguenots.

MANSFIELD

4-ply BALLOONS

These new and modern tires with their streamlined center where they handle easily, ride comfortably, last longer in actual service. Made for quick stops and fast starts in traction trends have been enthusiastically received everywhere.

GLORIOUS RAINS!

James Whitcomb Riley—
"Spake a mouthful years ago when he said: 'When God sorts out the weather and sends the rain, why rain's my choice.'"

Sometimes we think the uncertainty of the South Plains weather is its greatest asset, while on the other hand the uncertainty of its citizens may be its greatest liability.

However—
We all have to eat—hot or cold, wet or dry—our tummies get empty and the call of nature for refilling becomes urgent. Don't forget—for years past Henington's has been FAMOUS FOR FOOD. Perhaps some of you have been worrying about the outcome of crops, but now the rains have come, let's all enjoy some good square meals with no corners knocked off.

We sell Groceries and Meats at "live and let live prices." We want to live, but we also want our customers to live—so, while the quality of our foods are high, our prices are always very reasonable.

LET'S EAT AND DRINK A TOAST TO THE RAIN AND BUMPER CROPS!

MOLINE WHEATLAND

LAND AND MONEY SAVERS

Cut your plowing costs in half with the original M-M big disc Wheatland plow—because of its wide cut and light draft in comparison with any mold-board plow. The Moline does a better job of plowing, from 3 to 9 inches deep. It scours well and is remarkably free from clogging with its big 26-inch discs, spaced 10 inches apart. The plowing job compares favorably with a moldboard plowed field that has been nicely harrowed.

It is strong, sturdy and rigid, prepares ideal seed bed for small grain. Farmers say it "can't wear out." Come in and let us give you free literature and explain more fully to you its superior merits.

FAIRVIEW H. D. CLUB REPORT

The Fairview H. D. club met Tuesday of last week in the home of Mrs. G. P. Lansford. The group made plans for a lawn party for the club families. Mrs. H. E. Schusters place was selected for the scene of game and 11 cakes and 15 freezers of ice cream were pledged. The time was set for Thursday night.

We were happy to have several members back with us after weeks of absence, among them Mrs. Everett Wallace, being back from an extended visit to Dallas.

Mrs. R. B. Meacham was present and reported she is moving back to Fairview. She and Mr. Meacham have managed their tailor shop in Turkey the past eight months.

Mrs. B. H. Hunt has recovered from a tonsil operation and was present.

We hope more of the 4-H club girls will come next time. Members present were: Mesdames E. C. Gordon, H. E. Reeder, J. W. Terrell, B. H. Miller, B. H. Hunt, A. C. McNutt, Roy Whittington, Everett Wallace, Walter Reeder, G. P. Lansford, H. E. Schuster, O. W. Morlow, M. E. Finley, Bert Mathis, W. A. Mathis; visitors were Mary

played with the Rural Electrification administration, were transferred to Lubbock the latter part of last week.

● Rev. W. H. Jordan, pastor of the Methodist church in Clovis, N. M., preached in Muleshoe, Sunday morning at the Methodist church, there being a large crowd present. Rev. Jim H. Sharp was not able to fill his appointment due to illness.

● Mrs. Dick Rockey and son moved to Levland the latter part of last week. Mr. Rockey has been there for the past several weeks employed at a garage. Mr. and Mrs. Frank Spring moved into the Rockey residence here, he being manager of the Valley Motor Co.

● L. M. Morgan, connected with the Government wheat insurance program at Amarillo was here last Friday in connection with that administration. He reports many wheat growers signing for insurance and that the policy is being well received.

● Finley Pierson and family left Saturday night of last week for Norman, Oklahoma, for a two week's vacation with his parents, Mr. and Mrs. J. D. Pierson. On their return, they plan driving through New Mexico, and seeing some of the mountainous sights of that state.

● Mr. and Mrs. Tollie Wilburn, daughter Gloria Nell and son, Don Wesley, accompanied by Mrs. Clara Cooper, have been visiting here for the past few days with Mrs. Wilburn's sisters, Mrs. Sallie Hardeen and Mrs. G. A. Nelson, and other relatives.

● Among the more than 600 young men from Oklahoma and Texas attending the CMT camp at Fort Sill, Okla., is John T. Lilly, of Muleshoe. He will join the others in assisting to consume a half ton of milk daily prescribed for those in training during the session which lasts from July 3 to August 1.

● Mr. and Mrs. Chester Mardis and family of Grand Junction, Colorado, arrived in Muleshoe the latter part of last week for a visit with his parents, Mr. and Mrs. C. C. Mardis. They left the first of this week for Roswell, N. M., where they will visit his sister, Mrs. Guy Burkhead and family, and from there they planned going to view the Carlsbad cavern.

● Mr. and Mrs. Harry L. Miller, Mr. and Mrs. L. E. Miller and Miss Mary Miller all of Sulphur Springs, arrived here last Sunday, spending a couple of days visiting with Mrs. Willie Miller, Judge M. G. Miller and Miss Mildred Miller. From here they went to Stamford to attend the rodeo, before returning home. They all journeyed to Clovis, N. M., Monday afternoon.

● Miss Elizabeth Harden and Judge M. G. Miller attended a pie supper at the Progress auditorium Wednesday evening of last week, the Judge being auctioneer for the occasion. Members of the 4-H club of that community sponsored the supper for the purpose of raising funds to send their delegate, Miss Sue Walters, to the Short Course at College Station.

● Mr. and Mrs. Ray C. Moore, Misses Eunice Florence and Mildred Davis, Glen Rockey and Mr. and Mrs. Clint H. Roring of Post, left late Saturday afternoon on a vacation tour through the heights of New Mexico. They stopped at Eagle Nest Dam for a little while to tickle the docile bass swimming in its placid waters, journeyed on to Santa Fe to visit the museum located there, the oldest church and the oldest residence in America, heard the ringing of a bell moulded in 1345, had a drink in the oldest well in America, returning by Alamogordo dam, where they finished (?) visiting their creek with its ichthyological specimens, rolling back into Muleshoe Wednesday night, reporting a coverage of several hundred miles and a very enjoyable trip.

Doyle, Doris Gordon, Mrs. Cl o McCormack.

After an enjoyable meeting, ice cream and cookies was served to all. Mrs. H. E. Reeder will entertain the club, Tuesday, July 11.—Reporter.

HUSBANDS AND BIRTHDAYS HONORED BY CLUB

Members of the N-eddie Craft club entertained with a picnic supper Thursday evening of last week at the city park in Muleshoe in honor of the following members who have celebrated birthday anniversaries within the past few weeks: Mesdames M. G. Bass, H. A. Robb, Arthur Damron, W. M. McHorse and club members' husbands.

A delicious luncheon, including many tasty picnic foods, was spread and a wonderful feast enjoyed by all.

Among those attending were: Mrs. Jessie Wright, Mr. and Mrs. M. G. Bass, Mr. and Mrs. W. E. Renfrow, Mr. and Mrs. Will Harper, Mr. and Mrs. Walter Witte, Mr. and Mrs. H. A. Robb sr, Mr. and Mrs. J. L. Alsup, Mr. and Mrs. W. M. McHorse, Margaret Underdown, Paul Gardner and club member's children.

OKLA. LANE S. SCHOOL ON SAND HILL PARTY

Mrs. Frances Thomas of Oklahoma Lane gave her Intermediate Sunday school class a delightful sand hill party Monday night.

After numerous games were enjoyed, the group gathered around a huge camp fire for a weller roast.

Those attending were Misses Elsie Dean, Dorothy Dutton, Lois Robertson, Mary Dee Christian, Gracie Lee, Alfa Lee, Alma Lee, Ruth Donaldson, Vivian Eason, Nadine Smith, Doris Stevens, Messrs. Raymond Robertson, Henry Young, Austin Young, Carl Deaton, Donald Watkins, Kenneth Watkins and the hostess and her husband, Mothers attending were Mesdames J. C. Robertson, Rochell Christian and S. H. Parish.—Reporter.

Experts estimate management costs of running small businesses to be 16 times greater than those of

It Takes Thought to Make Your Home Pleasant and Safe

By ELIZABETH GORDON and DOROTHY DUCAS
Authors of "MORE HOUSE FOR YOUR MONEY"

A GOOD house is not only a work of art but a labor of love as well. More than the tasteful design of an architect goes into the house that is worthy of being called Home. Meticulous planning of every detail, from foundations and walls and roof to interior partitions, heating and plumbing, makes the difference between a house and a hovel.

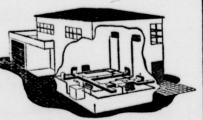

If spring fever has reduced you to listless gazing at every trim, white outcrop you see by the road, turn

walls and chill you through. Nor will you, in summer, be happy as a lark when eating cool, crisp salad in a dining room made warm by uninsulated walls upon which the sun beats twelve hours a day. The ways in which you keep warm in winter and cool in summer are part of the house you want to make your home. You should know how many ways there are to do these things, so you can choose one which fits your needs and your pocketbook. We do not all feel heat and cold in the same proportions, our climates in various sections vary a great deal. Don't let yourself buy the wrong kind of boiler that burns the hardest-to-get fuel or choose undersize radiators.

Consider the top of your house, even though you do not see it except when you walk down the street with the pride of ownership in your blood. The roof on your house is very important, not only for its size and shape and color, but for its ability to resist fire, to throw off snow and rain, and to preserve the barrier between indoor and outdoor temperatures. Fire-retardant roofs are desirable for modern homes. Asphalt shingles, when properly used, not only possess fire-resistant qualities, but have colorful decorative value. It is a constant comfort to know that you need not fear the stray spark that falls on your roof.

Have your house wired properly,

not only for today but for the tremendous power loads of tomorrow! when countless new electrical appliances will be part of daily household equipment. Sit down and locate on a piece of paper where you would put convenience outlets in each room. Think of your living habits. Figure out ahead of time what amount of light you will need for reading, and current for operating a sewing machine, curling iron, radio or waffle iron. Be generous to your eyes when you light for close work. Scientists

Study Plans for Heating Plant...

our dreams into practicable plans by studying the various parts of a house which will make it a sound investment, a lasting delight.

You can build a good house within any architectural pattern. If you know what you want, stylistically, you are only a little beyond the person who is not sure he likes Colonial better than English. For deciding what kind of facade your house will have is a very small consideration in comparison to the sum total of concrete considerations.

For instance, what kind of heat will you put in your house? No matter how beautiful are its exterior lines, how spacious its living room and dignified its dining room, you will never enjoy them if the winter blasts blow through the

Choose Your Woodwork Wisely... say we don't use strong enough light at the present time. These are the little things which lump large in a successful home. The more time and attention you give them the happier will be your days in possession.

Consider the woodwork you put into the various rooms, the kind of flooring, the height and pattern of doors. Many patterns in millwork are available today from large companies who deliver them to your site all ready to be installed. Pore over catalogues. Pick something you really like, something in keeping with whatever use the room has and whatever style you have chosen for your house.

The most important considerations in a house are not alone what the house looks like, but how the house will act, in serving you comfortably and economically for years to come.

also an additional appropriation of \$7,000,000 annually until mid-1944 for the training of another 20,000 aviators each year.

Portland, Oregon, reports a mysterious explosion in the air, believed caused by a huge meteor which rocked that city in earthquake, cracking concrete walls, breaking out windows and doing other damage over an area of about 40 miles. It was accompanied by a vivid flash of light in the atmosphere and by loud reports. Whether the meteor struck earth or was burned in the sky when it contacted atmosphere, is not yet known.

Prof. James Monroe Smith, former president of Louisiana university,

has surrendered to police at Ontario, Canada, and will be brought back to Louisiana in connection with a \$500,000 shortage of school funds. Smith called Canadian officials 26 miles away, following his reading in a newspaper that he was under suspicion. He will be returned by airplane. He and his wife, also charged, both deny any guilt of the charges. They were not jailed, but under guard in their country residence where they had gone for a quiet vacation.

SEWING CLUBBERS POLLYANNAING The Sewing Circle met with Mrs. J. J. Lawler Wednesday afternoon of last week.

Some of the ladies played pollyanna.

These present were Mesdames W. C. Barber, J. L. Wallace, J. E. Day, W. H. Atwey, R. D. Gilliland, S. L. Rollins, Terrell R. Johnson, and one visitor, Mrs. Barber's niece from Texico, N. M.

Club members are glad to have visitors attend and welcome them at any time.

Wednesday afternoon, July 12, members of the club will meet with Mrs. R. D. Gilliland.

Panama Canal Brings Cities Closer The Panama canal makes San Francisco closer to Liverpool by 5,688 miles, a saving of two-fifths of the old journey.

USED CARS FOR SALE!

We have the following good used cars for sale, each of them having thousands of satisfactory unroad miles in them for your pleasure and profit. Call at our storeroom and let us show them to you, explaining their merits.

All's Well

By SMITH JONES
(Released by Associated Newspapers WNU Service.)

HERBERT POLKE left the elevator and walked slowly toward the office of his friend, Adolph Getz. Rita, Adolph's widowed sister, would be there; Rita, in neat dark dress with tasty collar and cuffs, reminiscent of days when such accessories were worn by charming girls. If Adolph were in he would be at his desk nodding in his chair, and both he and Rita would be serene in their confidence that they were important cogs in the business machine.

Rita looked up as the door opened. "Good morning, Herbert; Adolph is not in." Then, as she caught sight of his face, "Why, Herbert, what's the matter?" "Rita," he said brokenly, "I do not get the money Henry Arndt left me."

"You do not get it, Herbert? What do you mean? Why not?" "I will not get any money, Philip just told me so. He says Judge Dedham says the tax will be more than a thousand dollars." "But Herbert," she protested, "how can the tax on a thousand dollars be more than a thousand dollars?"

"Oh, Rita," he burst out in despair, "if Henry had only left me just a thousand dollars; but he left me the amount of all my notes, he held, and then a thousand dollars more, and Philip added in interest on them all, and the tax on that is more than a thousand dollars." His voice rose, "I will never get into the home now—never!"

Rita stared at him stupefied. "So that is the way it is," she muttered to herself. "So that is it!" Her mind went back to the day two months before when Henry Arndt in his last illness had called her and Adolph to him.

"Herbert wants to get into the home," he had said, "and with a thousand dollars more he can do it. The Polkes live long—perhaps it is best." And then the three had discussed ways and means; and, too methodical to consider destroying the notes which represented gifts to the lovable and beloved spendthrift, they finally decided to leave him the necessary thousand dollars over all that he owed the sick man. And so the will was drawn, and now the tax on what was intended to be the legacy of \$1,000 was, through faulty wording of the will, more than a legacy itself.

Rita raised her eyes, swimming in tears. "Oh, Herbert, if I had only known. It is all my fault!" "Your fault?" he protested indignantly. "Your fault? Why, you are the only real friend I have had since mother died; and you were right to refuse me—40 years ago, Rita, 40 years! You could not have made me over; I would have dragged you down, too; but I will never cease to regret."

"Herbert," she began briskly, "if you mean that, it can all come out right yet." Then, in answer to his bewildered look, "You mean me to marry you now, is that it?" "No, Rita," protested the man, bewildered. "How could I ask you, now?"

"With just five words, Herbert," she persisted, laughing, but with crimson face, and hurried on. "You know I have a good home alone and more than enough to live on. He looked at her gravely for a moment. Then, "Rita, will you marry me?" he asked.

So two days later, when the matter came up before the probate court, Rita and Adolph stood with him in the bare courtroom and heard young Philip Arndt testify to the amount of the notes due the estate, to the interest and the costs; then the tax was computed. It was \$1,054. "Is that satisfactory to you, Herbert?" asked the judge kindly. "It is just," said the old man, simply. "And it is satisfactory."

The judge gave him an approving smile. "All right, then; let the record show that the legacy to Herbert Polke is fixed by agreement in open court at \$10,540. Now, Mr. Polke, how do you wish the balance coming to you to be paid?" Again he smiled, and Rita looked at him in entreaty. Surely so kindly a man would not make such a heartless joke!

"Yes," he said in answer to her look, "there will be quite a balance. You see," he continued as they still stared at him open-mouthed, "all but two of those notes are barred by the statute and cannot be set off against the legacy, though they may be used to fix the amount of the legacy. Mr. Arndt assumed that, but he is wrong. There will be something over \$8,000 coming to you."

Philip Arndt was the first to recover his voice. "I object," he shouted. The judge's smile died. "The legacy has been fixed by the court at the amount asked by you," he said sternly, "and it will not be changed." Herbert Polke whispered to Rita, who nodded brightly; then he turned to the angry boy. "Never mind, Philip," he said, "I will take just the thousand dollars your father intended I should have, and you shall make the check payable to Rita; and Judge Dedham shall marry us at once, and then everything will be settled."

'Reveille'

By GRAHAM SAUNDERS
(Released by Associated Newspapers WNU Service.)

HE WAS just a private, Drusilla noticed, as he lounged easily into the drug store and draped his feet against a pillar, waiting attention; but she had to admit reluctantly that he was the handsomest man she had ever seen in all her 26 years. And the daughter of a small-town druggist is likely to see quite a few men in ten years of clerk standing.

With infinite patience Drusilla helped old Mrs. Gordon select a new face powder, some new rouge and several other articles of makeup suitable for a 16-year-old flapper, and when the 60-year-old devotee of the modernists had departed she came quietly up to the tall soldier and asked him what he wanted. "Gosh, sister," he confided in a tone that would have been fresh in another, "all I want just this minute is to feast my eyes on you. I guess I know now, why I stayed single so long!" Drusilla laughed merrily and then said: "Our ice-cream sodas are refreshing, uh, to the memory as well as otherwise!" and he lounged over to the fountain.

Later he discovered that he needed a toothbrush, some shaving cream, shampoo, a special face soap and a box of chocolates. The latter was the cause of their better acquaintance, as he selected a rather inferior brand in a very plain wrapper and after a swift glance she said, "These are very fine. I buy them myself, and the box is sure to please even the most fastidious girl! You know," she added naively, "so many of us like to keep the ribbons as reminders!" "Oh—thanks for the tip. I'm a stick in the mud. Have you a large collection of ribbons?"

"Not too many; none that has any special sentimental attraction, if that's what you mean," she retorted.

Later—it must have been six in the evening—she looked up as the last customer of a rush crowd cleared from the store, and Drusilla was startled to note the large white-wrapped box on the soda fountain table. With a strange thrill she picked it up and saw lettered neatly in one corner her name, and the strange expression and emotion that it was from the tall soldier proved correct, and she paused an instant to ponder how he could have discovered her name.

Opening the package, Drusilla knew a strange thrill as she read the scrawled note within. If she could overcome her scruples against a common soldier on a common private's pay, would she meet him on outside the city, and go canoeing with him? If she would! And Drusilla's eyes shone and her face glowed all the evening until her father finished putting up prescriptions and called out to relieve her. She walked on air as she ran to powder her nose and she laughed shakily as she removed the ribbon from the chocolate box and pinned it with the tiny crescent diamond pin to the front of her dress at the collar. And tucking the box of chocolates under her arm, she went out to the street.

He stood in the shadows, close to her father's shop, and his curly black head was bare as he came eagerly forward to greet her. Ardent admiration shone in his blue eyes as he took her box and touched her elbow lightly, piloted her across town by the big, dimly lit library and down to the river where the boat-houses and canoes were.

Later, as they drifted along under the sweeping willow branches, he hummed, and then at her urging sang in a fine baritone the exquisite words and music to "Girl of My Dreams," and then fell strangely silent. "Why silent?" she teased, and he answered honestly, "I told your boss wouldn't let you off, Miss Dexter!" and she knew a guilty, glad thrill; he didn't know she was the only daughter and heiress to the Dexter drug store—didn't guess she would one day inherit the fortune made by the famous "Bixell" drugs! And then they talked and talked and talked.

"Do you truly have to wait for some one to die for promotion, Terry?" for they had become Terry and Drusilla in four hours of magic moonlight and canoeing! "The regular soldiers have to wait in line, advancement—but I'll never hate reveille any more!" he ended eloquently as he beached the craft skillfully.

"Why?" she asked softly as he helped her ashore. "Because I've heard it for the last time, the real reveille, the awakening to life and love and ambition. I'm on my way, I'm a cliche, hustling for regular promotion!" "You mean you'll quit the army and go into business?" she asked. "Yup," he answered joyously, "I got to hustle now if I'm going to win the one girl!"

"What will you do?" she asked faintly. "Sell bonds and make love to you," he said exultantly. "Do you have to?" she asked softly against the rough tan of his coat as she burrowed her nose deeper into the cigary-scented wool. "You don't answer reveille but once, darling," he said, tipping her face up to his, "and then you've awaked you stay awake."
