

The Bailey County Fair Dates Are Set For September 22-3

Congressman Marvin Jones Principle Speaker Corner Stone Laying

The committee in charge of the program for the corner stone laying of Bailey counties new \$60,000 court house have secured Congressman Marvin Jones to make the principle address for this occasion. The program will begin promptly at 3 o'clock p. m. Monday September 7th. We are very fortunate in having the opportunity of hearing our Congressmen on this great occasion. The court house belongs to all Bailey County and every citizen of the County should be present for the corner stone laying. An opportunity like this may never present itself to the present generation of Bailey county again. Come early and make an inspection of the building. The committee promises to have plenty of music for the occasion.

Did You Ever Stop To Think--

That the city that gets the publicity gets the business?
 That the city that gets the advertising grows?
 That advertising a city is a business, not child's play?
 That people go miles to get a good, live city to trade in?
 That your property will increase in value when the outside world knows your city is wide awake?
 That people from neighboring cities will come where there is something doing?
 That the city that does not seek something better than it now has is going to lose out?
 That now is the time your city and business needs advertising more than ever before?
 That the Journal is going into 1100 homes? That we are doing our dead level best to give our town and county all the publicity we can? Are you doing your part?

Notice Of Dissolution Of Partnership

Notice is given to the public that Pressly & Thomas, Attorneys have dissolved partnership. This has been occasioned by Mr. Thomas removing to Farwell and taking up his residence there. Hereafter each will maintain their legal matters separate and apart from the other.

Levi Pressly
J. D. Thomas

Harrold Mardis underwent an operation at Clovis, the first of the week. He is reported doing nicely at this time.

Thomas Hoodenpyle, an old timer of this place was here the first of the week visiting friends.

More Tourist In West Texas Than Ever

The West Texas Chamber of Commerce reports that the number of tourists in West Texas this summer is larger than ever before. It is stated that many of these are enroute to the mountains, but that a large number are simply seeing West Texas. Tourist have come from a larger number of states than ever before. The Camps for tourists have been filled to overflowing all the summer. Many of these people, after seeing West Texas, have made purchases of land and are now preparing to move to this section. plains Journal.

Five Football Games For Lubbock Fair

Five football games will be played at the Panhandle South Plains Fair which will be held here for the twelfth annual time September 30, October 1, 2, and 3, according to Judge Jas. H. Goodman in charge of the athletic program at the fair. Four high school games with eight of the best high school teams playing will be staged in addition to a game between the Texas Technological College, and McMurray College, of Abilene.

The first game of the fair will be between Slaton and Spur high schools. The second game is between Plainview and Lamesa high schools. Lubbock and Floydada high schools will play the third day and Lorenzo and Littlefield will play the fourth day of the exposition in the morning and the Texas Technological College and McMurray College will play in the afternoon of the closing day.

Each of the eight high school teams are coached by capable athletes and they have been making rapid progress in this section in the past few years. Each of the four games will be a good battle for honors before large crowds. Winners of the four contests will be cheered by throngs of West Texas football fans.

The Tech game will be the first time that that college will fling her colors to the breeze and the eleven West Texas lads who will line the gridiron when the initial whistle blows will be the first athletes to battle for the honor of the Texas Technological College.

The eyes of many coaches, football players and football fans will be turned toward Lubbock watching to see what Freeland is going to be able to put on the gridiron in his first year here with the Tech.

"The football card of our fair is going to rival that of any other regional fair in Texas," Goodman said yesterday.

Epworth League Program For Sept. 6th

Subject—Our Chapter A Community Friend.
 Leader—Beth Mardis.
 Scripture Reading—Matt. 5:13-20.
 Our Responsibility — Lottie Huke.
 The Young People Revival—Ethel Kistler.
 How To Make The Chapter A Community Friend—Good Harden.

New Real Estate Firm Organized

We understand that Dan Winn and Sim Lawler have organized a real estate business and will run it in connection with their present business. We were informed that they were doing their best to secure the services of D. O. Smith, as special agent for the firm. At the time of going to press D. O. had not joined the firm. More details of the organization will be given in next week's paper.

See the Chautauqua! Its real!

Sweet Potato Growers Must Register At Once

If we are to secure the services of an expert sweet potato grower for this district, the farmers who are going to plant sweet potatoes must register at the office of R. L. Brown now. Mr. Bradley, of Portales, N. M., wants to come here and be one of us. To actually grow them himself, and assist us in the establishment of the potato in a big way here, in the Shallow Water Valley. From all indications up to this date the potato industry is the crop to raise in sand irrigated district here.

Lakeview Men Here Finishing Store Building

F. E. Davis and W. B. Durham, of Lakeview, are here this week to finish the store building of H. M. Davis, of Lakeview, Oklahoma. F. E. Davis is a son of H. M. Davis, who will conduct a general store in the building when finished.

J. H. Johnson Erecting Building

J. H. Johnson let the contract to E. E. Robinson, the first of the week for the erection of a frame building just east of his hotel building to be completed by the 10th, of this month. It has been rented to W. B. Crawford, who will go into the grocery and meat market business. Mr. Crawford has only been in our city a short time, conducting the American Cafe, which he sold last week. Watch for his announcement next week.

Civic Club Invites Ladies Of Bailey County

The Civic Club of Muleshoe invites the ladies of Bailey county to meet with them in a short business session, Monday afternoon, September 7th immediately after the Corner Stone laying, in the court room to discuss the organization of a County Federation. The purpose of the County Federation to be as follows:

First the organization of a ladies club in every school district in the County so we can work with the County Health Nurse, for if we are to get the greatest help possible from this nurse we can not only help her but ourselves by a united effort. Second, with the rapid development of our county there never was such a time for the women to do a lasting benefit in their work for better schools, better community centers and the great work of encouraging the nation wide movement for more modern and beautiful homes. In the beautiful homes work we have the greatest opportunity of any place on the plains for in the shallow water belt the planting of trees flowers and seeding of lawns can be done with the assurance that the drouths will not destroy our work.

We hope to organize a County Federation that will be of help to every woman in the County so be sure and be there so you can get this work started with the beginning of the school year.

Mrs. M. C. Cochran was in Amarillo, the first of the week visiting friends.

Muleshoe Ships Car Of Hogs To California

Wm. S. F. Matthiesen and C. F. Hannegan, two progressive farmers of this territory shipped one car of fat hogs to the California market Wednesday. The hogs will average about 250 lbs., around. They were fattened on alfalfa and grain. This combination puts them in excellent condition. They are of the Poland China and Duroch Jersey breeding.

Several cars of hogs will be shipped from here this fall by these progressive farmers. They both have large herds of high grade hogs and are making good money. Alfalfa and hogs in the Shallow Water Valley of Bailey County is attracting many of the farmers.

Irrigation wells on these farms are only 16 feet deep, flowing 2,000 gallons of water per minute. Centrifugal pumps are used.

Water Melons Making Good

T. H. Chandler who lives near Mills Switch and has 110 acres in water melons shipped his first two cars the first of the week. They weighed from 30 to 50 lbs. and will bring him 75 cents per hundred.

Mr. Chandler broke his land in April and started planting on May 14th, using sprouted seed. The seed to plant the 110 acres cost him \$30, the famous Tom Watson is the melon he is raising. He expects to gather about ten cars of 30 to 40 pound melons. The balance of the melons will run as low as 20 pounds. He stated they would make about a car to the acre. A car of melons weigh 25,000 lbs., at an average of 75 cents per hundred if you are good in figures will let you know what he will make from his melon crop.

School Will Begin Monday Sept. 14

The Muleshoe school will begin on Monday September 14th. Everything is being put in shape for the opening of one of the greatest school years ever held in this city. The school board has selected a fine corps of teachers. A body of trained men and women, that every tax payer should be proud of, and should co-operate with them to their fullest extent; in every move they may see fit for the betterment of the coming generation.

Start the children in on the first day and let them have a fair chance with the balance of the children.

Let's determine to make this the best school year ever held in the city. Every parent should co-operate with the teachers and school board and by so doing we can have just the kind of a school we want.

H. C. Pipkin representing John N. James, and H. M. Kimbro representing E. K. Warren and Son, both of Amarillo, were here the first of the week meeting with the YL School board of equalization.

Hey! The Chautauqua is here!

Mighty Texas Is Attracting Much National Publicity

The United States realizes what a gigantic empire of overwhelming possibilities in wealth, opportunity and territory it possesses in the State of Texas. All the forty-eight States combined show in last year a trade balance in our favor of more than a thousand millions, and Texas led all the States, including proud New York, and rich Pennsylvania with her great steel industry.

The fact that Texas possesses the greatest cotton-producing area in the world contributed to her overwhelming exports. But what Texas does now in cotton she will soon do in a dozen other directions.

If you want to see the biggest thing in America, in the real meaning of the word "big," go to Texas and stay there long enough to know the State.—Arthur Brisbane, in The New York American.

Oklahoma Men Carried Away With Country

L. D. Weaver and John Dorton, of Turkey, in company with S. T. Wise, of Stigler, Oklahoma, C. R. Adams, C. J. Clark and W. T. Kelton, of Kenima, Oklahoma, were here Monday looking at the country. C. R. Adams purchased a quarter section of land in the sandy country and the others stated they would return soon to buy lands here. Mr. Adams will read the Journal for the next six months. They were delighted with the wonderful crops, and especially the water melons in the sand below town.

Journal Editor Is Presented Fine Potatoes

Tuesday morning Mrs. F. G. Rice called at the office and delivered to the Journal folks a generous sample of sweet potatoes, tomatoes and Irish potatoes. One of the Irish potatoes weighed one and three quarter pounds. The entire bunch averaged three-fourths of a pound each. The sweet potatoes were of standard size, and is further evidence that this is a wonderful potato growing section. Mr. and Mrs. Rice have two acres of sweets and they promise a wonderful yield. They have about a quarter of an acre of tomatoes just starting to ripen. Mrs. Rice has promised us a report on her tomato crop. Their Irish potato patch was only about half an acre. Next year you will likely find a large patch of both kinds of potatoes on this farm. Mrs. Rice also raises the White Holland turkeys and sells them for fancy prices for breeding stock. Plenty of alfalfa and feed is found on this farm. Many thanks for the sample Mr. and Mrs. Rice.

The Journal force this week is placed under lasting obligations to Harry Wilderding, one of our most successful farmers for a nice lot of grapes including four varieties. Its always a pleasure to be remembered by your friends. This is a wonderful grape country. Plant more grapes, folks.

Fresh City Bakery bread, daily at all leading groceries.

Final arrangements have been made for a County Fair for Bailey, to be held in Muleshoe, September 22-23. A complete program will be printed in this paper next week and circulars will be scattered over the entire country during the next few days. Liberal prizes will be given, totaling something like \$300. Below you will find the various committees and chairmen of the communities.

Executive Committee: Taylor White, F. H. Mathews and R. B. Boyle; Finance Committee: E. R. Hart and A. V. McCarty Sr.; Grounds Committee: M. P. Smith, Good Harden and Less Jones; Community Chirmen, Y. L. O. N. Robinson; West Camp: C. E. Dodson; Hurley Common School Dist. 1: W. A. Milligan; Baileyboro: T. G. Gaddy; Longview: O. C. Essary; Davis School: L. D. Winn; Circleback: W. C. C. Elmore; Figure Two: Rex Stegall; Progress: Josh Blocher; Beulah: Sam Huffman.

Each community chairman is expected to appoint his various committees and get the exhibit here. Liberal prizes will be given on Community and farm exhibits, with good prizes on individual entries. Get a circular at once and see the program.

New Commandments Our City Should Keep

We want Muleshoe people to stick to the original ten commandments, but here are a new ten now going the rounds of the press that one can observe with profit:

1. Honor thy town and keep its sanitary laws.
2. Remember thy house-cleaning days and keep them holy.
3. Love thy children and provide for them the best schooling.
4. Thou shalt not keep in disorder thy alley, yard or street.
5. Thou shalt not endanger thy neighbor's health by disease-breeding weeds or filth.
6. Thou shalt not let the deadly house fly live.
7. Thou shalt not steal thy children's happiness from them by neglecting their health.
8. Thou shalt not bear false rumor and gossip in thy neighborhood.
9. Thou shalt keep fresh air in thy house by day and by night.
10. Thou shalt not spit on the side walk, nor on the floor, nor in any public place whatsoever.

E. M. Wilder, district manager of the Bennett Mfg. Co. with headquarters at O'Donnell, was here the first of the week, looking after this local yard.

Another Building Starts Up Tuesday

Joel Lee and A. L. Cope let the contract for the erection of a frame building Tuesday morning. The building will be rushed to completion and will be occupied by the above named parties, who will engage in the real estate business. The building will be located between C. D. Gupton Grocery and the Racket store.

These gentlemen are both well known here, and need no introduction to the public. They are well acquainted with all the lands in the territory and are sure to do good business. Watch for their announcement in this paper. The Journal joins their friends in wishing for them a fine business.

MAINTENANCE MEN TO STAY AT MINES

ANTHRACITE WORKERS EX-
PRESS OPPOSITION TO
STATEMENT.

OPERATORS POLICY SCORED

Union Men Balk at "Perpetual Con-
tract and Sliding Scale."

Philadelphia, Pa.—Anthracite oper-
ators and miners, after a twenty-
four-hour deadlock, have agreed on
terms under which 10,000 pumpmen,
engineers, electricians, watchmen and
other maintenance men will remain
on duty in the mines during the sus-
pension which the union ordered for
Sept. 1.

Union leaders at once mailed a
supplemental suspension order to the
325 locals in the region which are
rallying points for the 158,000 men
involved in the walkout. After notifi-
ng the men that maintenance ar-
rangements had been completed, the
order commended the agreement as
"an advanced step" and one which
fully protected "every interest" of
the union.

Meanwhile the mine owners de-
veloped another hostile reaction from
the miners by issuing a statement
of future policy which, according to
the minutes, called for "a contract
of perpetuity and the sliding scale."
Their opposition to both was ex-
pressed as "eternal."

This provocative announcement
came in the course of a meeting at
the headquarters of the anthracite
operators' conference here, at which
the operators' scale committee ren-
dered an accounting of its steward-
ship during the recent negotiations of
115 coal corporations. The report
was presented by W. W. Inglis,
president of the Glen Alden Coal
Company, and chairman of the com-
mittee, and declared in conclusion:

"In view of the present situation,
your committee strongly recommends
that the operators maintain a firm
stand for arbitration of the present
differences, to prevent a recurrence
of interruptions such as the one about
to start.

"It believes that any settlement
effected should be of a permanent
nature, providing for a readjustment
of the wage scale from time to
time, to allow prices for our product
that will enable it to move freely
in competition with other fuel."

In the final outcome the miners
won a pledge from the owners on
one point, that where regular main-
tenance men were available their
places would not be filled by others

MAY SETTLE THE RED RIVER BRIDGE FIGHT

May Buy Present Wichita Structure
and Not Erect New One.

Austin, Texas.—Differences over
the construction of a free bridge
across Red River at Burk Burnett
may be compromised by the purchase
of the present toll bridge, thus avoid-
ing the threatened injunction to pre-
vent the use of State and county
funds in building such a structure.
This probable move was indicated in
a message received at the Attorney
General's Department from E. P.
Walsh, county auditor of Wichita
County, asking if county funds could
be used in the purchase of an inter-
state bridge. A reply was made by
Assistant Attorney General L. C. Sut-
ton reading as follows:

"In reply to your telegram of
even date, you are advised that
Wichita County alone is not author-
ized by law to purchase the bridge
now being operated across Red River
between Wichita County and Coton
County Oklahoma. The bridge con-
templated by Senate bill No. 253
could be constructed upon the site
and right of way of the Burk Burnett
bridge and assuming Oklahoma au-
thorities have as much authority in
this connection as Wichita County
has, such site and right of way could
be acquired notwithstanding the
location of the present bridge thereon.
In acquiring the site and
right of way the necessary damage
could be paid, including the value of
the existing bridge, but the county,
in accordance with the terms of the
act above mentioned would be lim-
ited in the amount expended upon
the project to 25 per cent of the
total cost and maintenance of the
bridge."

The State Highway Department
could put up the remaining 75 per
cent, making the Texas side con-
tribute 50 per cent of the cost of
the structure.

American Flyers in Action.
Quezzan, French Morocco.—The en-
tire group of American aviators here
made their first fighting flight over
the enemy tribesmen's camps Fri-
day, dropping 240 kilograms of
bombs and scoring many direct hits

Girl Battles Bandit Youth.
San Antonio, Texas.—Knocking
down a 17-year-old girl who blocked
his path, a boy bandit fled from the
Lone Star Bakery at Cherry and
Commerce streets with \$1,000 in cash.
The bandit was frightened away be-
fore he saw \$1,000 in gold and cur-
rency in another compartment of
the cash drawer. He left a trail of
money which spilled from his pocket
as he fled down the street. The girl
Miss Alice Peters, daughter of the
proprietor of the shop surprised the
boy as he was rifling the cash drawer.

GOVERNMENT WORKERS WANT MORE PAY

Salary Raises Demanded Would
Amount to Over \$5,000,000
a Year.

Washington.—President Coolidge's
economy program is under fire from
another quarter. Government em-
ployees are seeking a raise in
pay, asking a minimum salary of
\$1,500 a year. This would increase
Uncle Sam's annual pay roll by sev-
eral million dollars.

Many salaries now are under \$1,000.
The average pay of 75 per cent of
Government employees here in the
capital is \$1,325 a year and there are
several times more workers in the
field service than here with about
the same salary range. There are 64,
000 Government employees in Wash-
ington.

The campaign for higher wages will
be taken before the annual conven-
tion of the National Federation of
Federal Employees in Boston, begin-
ning September 7. This federation is
the union of Government employees.

The increase asked would mean
around \$5,000,000 a year among em-
ployees here in the capital and sev-
eral million more among the field
employees, who are scattered through-
out the country serving in one ca-
pacity or another.

Several weeks ago there was un-
easiness in huge Government build-
ings here when it was indicated that
many employees would be dropped in
carrying out the economy program.
It was said that the Government pay
roll would be lowered by \$1,000,000
during the year through reducing
forces at the Shipping Board.

The number of employees in Wash-
ington, however, has remained prac-
tically the same through replace-
ments and increases in other bu-
reaux.

The federation apparently is taking
things now in its own hands, and will
force the battle for the thousands of
Government workers whom it repre-
sents before another movement
comes from the other direction.

It is no secret that Government
salaries are low. Neither is it any
secret that the services of many
capable persons, including scientists
of the first rank, have been lost to
the Government because they were
offered much bigger pay outside.

The Treasury has been one of the
biggest losers. Attractive offers from
outside houses have lured many able
men during the last few years. Every
few weeks an announcement comes of
some such withdrawal, not only from
the Treasury but from other depart-
ments.

PROPOSAL MADE TO AID COMMERCIAL AVIATION

Cays President in Favor of Plans to
Help Development.

Swampscott, Mass.—Establishment
of a Bureau of Air Navigation in the
Department of Commerce to foster
commercial aviation has been pro-
posed to President Coolidge by Sen-
ator Bingham (Rep.), Connecticut.

Senator Bingham has just com-
pleted an inspection of air stations on
the Pacific Coast and in Alaska,
and he declares it is time for the
Government to aid in the develop-
ment of aviation. He frowned, how-
ever, upon a request for use of the
airship Los Angeles in transconti-
ental commercial aviation. Because
of its limited speed, he said, the Los
Angeles could not compete success-
fully with express trains, whereas
it would be successful in transporta-
tion over water. He suggested this
airship be used between Honolulu
and the Pacific Coast as an experi-
ment in commercial work.

In the plan he will propose to the
next Congress Senator Bingham
would have the Department of Com-
merce establish lighthouses on land
for the guidance of airplanes and he
would set up a Government inspec-
tion service for all commercial air-
planes.

Senator Bingham reported that the
President looked with favor upon the
suggestion and was anxious that the
Government aid in the development
of commercial aviation by every
means possible except through direct
subsidy.

American Request Refused.
Oslo.—The Foreign Ministry has
officially informed the American Leg-
ation that the Norwegian Govern-
ment is unable to comply with the
American request for the recognition
of customs attaches as diplomatic
agents.

Copper in Berlin.
Berlin.—Senator Arthur Capper of
Kansas, on arriving from The Hague,
declared that the outlook was favor-
able for the United States partici-
pating in the world court. The issue
probably will come up in the Senate
Dec. 17, he said.

Says Next War in the Pacific.
Honolulu, T. H.—Major General S.
M. Lewis, Headquarters Department
of Hawaii, told the annual conven-
tion of the American Legion that the
next war would be in the Pacific. He
said the Hawaiian defenses would be
the national defenses and those en-
gaged "would not only be engaged in
protecting their homes and families,
but also the United States from attack."
The next war will be a maritime war
and Hawaii will be the great outpost
until it is reduced.

CONDENSED AUSTIN NEWS

High marks in gross receipts tax
collections were made during the
quarter ending June 30, according to
report made by Comptroller Sam
H. Terrell, who found the total was
\$1,686,830.

Brief of the Texas Attorney Gen-
eral's department, supporting the
application of the Fort Worth & De-
rver City to build 202 miles of line
on the South Plains of Texas, will
be filed at once with the Interstate
Commerce Commission.

Clem Calhoun of Jones County has
been appointed by Gov. Ferguson as
District Attorney of the Thirty-Ninth
Judicial District to fill the vacancy
caused by resignation of Tom Davis
of Haskell County. The appointment
is effective at once.

Requisition was issued by Governor
Miriam A. Ferguson on the Governor
of Florida for extradition of Warren
Brillinger, charged in Falls County
with assault to murder and with
transporting liquor. Brillinger is now
in custody in Miami.

Negotiations for rebuilding the
Lake Austin dam may be started
by an Eastern company if a source
of revenue for power can be found.
It was learned following a confer-
ence between an Austin banker and
Harry L. Haynes, commissioner of
the Finance Department.

The State prison system popula-
tion, reported at the Governor's office
shows a steady decline in the
number of convicts. It also disclosed
the fact that the number of men on
the Neff honor farm has been re-
duced to seventy-four from the original 150

W. J. Womack, auditor, has been
assigned by the State Board of Con-
trol to check in Dr. W. J. Johnson
as superintendent of the San Antonio
State Hospital so that Dr. Charles W.
Castner will be relieved in ample
time to become head of the Wichita
Falls State Hospital on Sept. 1.

There is a little girl down in the
Canal Zone who wants the Governor
of Texas to help find her father,
whom she reports in this part of
the world. Her name is Melva Mer-
rill and her father's name is given as
Lon Merrill. She wrote a pathetic
letter in a plea to help find her
daddy.

Announcement has been made by
Attorney General Dan Moody of the
appointment of R. B. Cousins, Jr., as
an Assistant Attorney General. This
appointment was not made to fill any
vacancy by virtue of any resignation
but is due to the fact that since
assuming office General Moody has
never had a full complement of as-
sistants.

Invitation to hold its next meeting
in Texas has been extended by Gov.
Miriam A. Ferguson to the National
Conference of State Park Commis-
sioners. The meeting is to be held
in May, 1926, and will have an atten-
dance of at least 250 delegates, ac-
cording to D. E. Colp of San Antonio,
chairman of the Texas State Park
Commission.

A shift has been made in the duties
of some of the Assistant Attorneys
General following the resignation of
Wright Morrow as First Assistant.
C. A. Wheeler of Texarkana, who has
been handling misdemeanor matters,
has been given the bond desk, one
of the most responsible in the de-
partment. During one year nearly
\$100,000,000 in securities are present-
ed to that desk for investigation.

Senator J. D. Parnell of Wichita
Falls, after a conference here with
Turner E. Hubby, State Game, Fish
and Oyster Commissioner, said he
had been assured by Mr. Hubby that
the Game, Fish and Oyster depart-
ment will establish a State fish
hatchery at one of the lakes in the
Wichita Falls territory. Definite
designation of a site has not yet been
made. Mr. Parnell said, but he added
that it is planned to expend \$30,000
on the hatchery. It will be the third
State fish hatchery to be established
in Texas.

State's funds on hand and depos-
ited with reserve and depository banks
amounted to \$10,354,687, as compared
with \$9,945,538 on hand Aug. 1, ac-
cording to a statement issued by
State Treasurer W. Gregory Hatcher.
While expenditures during the month
have been heavy, Mr. Hatcher pointed
out that receipts had been large. The
amount received from gross receipts
tax since Aug. 1, was \$1,132,753, this
being the largest single source from
which the State has received funds
this month.

Gov. Miriam A. Ferguson has re-
ceived a letter from Mrs. William
Jennings Bryan, from Coconut Grove,
Fla., acknowledging receipt of the
Texas executive's message of con-
dolence sent Mrs. Bryan on the day
of her husband's death. "Among the
many messages of respect and affec-
tion for Mr. Bryan that have come
to us, the one from you has touched
us deeply," the letter from Mrs.
Bryan read. "Mr. Bryan loved the
people of your great State and we
greatly appreciate this evidence of
affection for him."

CHAPTER XX—Continued

Brand Fair heard it in the strange dark passage far down in the heart of Mystery ridge. Rod Stone, climbing the stiff slopes, heard it, and so did the boy on the staggering horse a little farther over toward Sky Line. He altered his course a bit toward the west.

"What do you mean?" said Arnold sharply, "would you kill her before she signs the paper? Or after—and have the finger of the law point at the new owner of the flats? Use your wits."

"Kill her—and the old woman will take the boy and go," said Kate, "she's the stubborn element. I warn you now—she must never go out of this place alive. She knows us now."

"Unless she goes down the Pipe with this morning's drive—the boys should soon be here to start."

"She will come back."

"Not if I send Basford to take her over the Line."

"Enough!" said Kate, "I'm uneasy about the whole thing—the brushed-out tracks at the mouth of the Pipe—"

"A trifle. And the boys will soon be here. Hark—they're coming now. There was a sound in the rock face, a shout and a rumble of horses' feet hurrying."

The man and the woman looked that way—to behold Big Basford come boiling from the narrow opening with a string of men behind him.

"It's fire!" whispered Cattle Kate Cathrew.

Like a Nemesis, Bossick and the ranchers behind him pushed Big Basford down the sloping floor of Rainbow's pot.

"A plant!" screamed the latter.

"We're caught!! We're caught!!"

A hundred feet away Bossick stopped.

His angry eyes flashed over Arnold and the woman beside him, then scanned the green basin where the powerful cattle lay.

Bossick threw back his coat. A star shone faintly in the light.

"You can thank Sheriff Selwood's tireless work for this," he said, "and so can we. The whole country's deputized. Your work is known. You may as well give up without a fuss for us."

He stopped, for an odd sound had become apparent—a deep, echoing sound, as of many waters beating on a hollow shore.

The roar of waters became the rumble of hoofs and up from the bowels of the earth came Brand Fair and his men.

"Good morning, Katherine Fair," he said.

"You!" screamed Cattle Kate, "You! You! It was you who did the trick—not that fool Selwood! I might have guessed!"

"Sure you might have guessed," he said, "When you and your paramour there robbed the Consolidated and wound the coils of guilt around Jack Fair—you might have guessed that his brother would follow you to the ends of the earth to get you. And he's got you—got you dead to rights."

He, too, showed a deputy's star.

"Jack Fair died in prison—of shame and of a broken heart. For three years I worked in New York to get the goods on you, Arnold, and never could—definitely. Then I hired a better man who could—and did. I have a precious package in a safe place with enough proof in it to have sent you over long ago—but I wanted you both—together—a grand finale. It has been a long trail—long—for me—and for Sonny, the child whom you abandoned, Kate, five years ago.

"I've lived for months in Blue Stone canyon. It was I who found where the willows blow out from the wall.

It was Sheriff Selwood who took his life in his hand to help your men drive Bossick's steers into Rainbow cliff. It was all of us together, as you see us now, who put two and two together and you determined to get you—and to get rustled—you and all your outfit of lawmen—all of whom owe something to me—since Arnold yonder. We've hunted the mouth of your passage into Blue Stone and would have caught you there—your father at Marston, where I have had arrangements made for some time. We've been holding off for Selwood's word—he's worked too faithfully all these years to lose the credit now."

Not once had Fair taken his eyes from Kate Cathrew's face, else he might have seen in the tragic figure by the wall at the right, the grotesque woman whose blood-stained features worked with hysterical laughter.

"Brother!" whispered Nance Allison to herself, "it was his brother—not himself! Oh, Lord, I—thank Thee!"

Neither did he see the newcomers streaming through the cut into the

basin—the men from Cordova under Rod Stone.

There was one other actor in the small drama whom no one noticed—Bud Allison, on foot now, since Big Dan stood at the base of the last rise, completely done—Bud Allison dragging his lame foot wearily, his puppy's old gun on his shoulder.

The boy stood between the last riders and the wall, looking at them all with puzzled eyes. Brand Fair continued:

"While we are about this we'll finish it completely. I want the men of Nameless and the Upper Country to know just what sort of criminals they have been dealing with—to know that Lawrence Arnold there is a clever New York lawyer who defends guilty men and frees them—by buying juries. That he is getting rich by selling through agents and aids the cattle which you, Kate, steal here, drive into the river, up to the cliff, down this wonderful underground passage into Blue Stone canyon and out across the desert to Marston for the shipping. It has been an amazing system in a more amazing setting. The mystery of the steers that left no tracks is solved by the fact that every time you stole a big herd you drove them up the night before you drove your own brand down—therefore, they left no trace. Also, I want to say here and now before these witnesses, that all the money you brought with you into the Deep Heart hills belonged to poor Jack Fair, the father of your child—the man you betrayed into prison through the devilish legal trap laid by Lawrence Arnold—and that is why I've followed you. Sonny Fair has a right to his father's property—and I intend to see that he gets it. Have you anything to say?"

Lawrence Arnold, trapped and conscious of the fact, wet his thin lips and glanced desperately around. He saw only stern faces, cold and angry eyes.

But Cattle Kate Cathrew was made of different stuff. She flung up her clenched fists and shook them at the clear skies where the rose of dawn was spreading.

"You—!" she swore, "I always hated your narrow eyes and that mouth of yours! So you are the prospector, Smith, who has been so inquisitive at Cordova!"

"And it is you who've done all this! Oh, d—n your soul to h—!"

She dropped her hands, caught the rein hanging on Bluefire's neck, struck her heels to his flanks and quick as thought whirled him away toward the cut. The group between her and the entrance fell floundering apart before the stallion's charge.

With a dozen leaps she almost reached the wall.

"You can't get away with this, Brand Fair!" she screamed, "I'm a match for you!" and jerked at her rifle in its loops.

In her rage she was inept, so that the weapon caught, hindering her purpose for a moment.

Nance Allison, standing in her trampled spot, knew that the moment she had dreaded for so long was come. Knew that danger threatened at last some one whom she loved—the stark danger of death—and as if something broke within her, the "stirrings" crystallized. Without taking her eyes from the frantic woman on the big blue horse, she began to feel with her foot for something in the grass—something long and dark and cold, but which seemed to her now more precious and to be desired than anything upon the earth—namely, Sud Province's rifle.

Gone was all the stern restraint, the earnest supplication to be kept from spilling blood. The hatred which had smoldered in her leaped to its fulfillment.

She had believed in the hand of God that had been her shield and buckler, had been patient in adversity, meek in her dogged courage.

Now, as Kate Cathrew clawed for a weapon to kill Brand Fair sitting on his horse at the cave's mouth, she became a killer herself, joying in the fact.

Her foot touched the rifle. She bent and took it up.

As Cattle Kate straightened in her saddle, Nance dropped stiffly to her knee and raised the gun.

Her blue eyes caught the sights and drew down steadily upon the woman's head.

Just so had those forgotten Allisons drawn down upon their enemies in the Kentucky hills.

Her finger touched the trigger.

And here the hand of destiny reached down—or was it the hand of God?—and ordered the puppets playing out their little tragedy in the heart of Rainbow cliff.

As Kate Cathrew flung up her gun the furious rage that fired her stiffened body in the saddle, shot her bolt upright, standing in her stirrups.

Perhaps some unaccustomed pressure of her posture angered him—perhaps the excitement of the moment loosed something wild in his hybrid heart—perhaps it was something else.

The bearded man from Upper Country said afterward it was.

At any rate, with the woman's spectacular and dramatic action, Bluefire, the stallion, who hated her but obeyed her, gave one scream and rose with her.

It was a magnificent leap, high spread-eagling, with the flowing silver cloud of his mane tossing in the rosy light.

From the peak of its arc the woman, a good rider though she was, but taken by surprise, fell loose from her stirrups, cascading in a flare of booted feet straight down his hips and tail.

At the same moment two shots rang out—her own and Nance's both gone wild with Bluefire's interference.

Still on his hind feet, the stallion

whirled, turning once more toward the cut in the wall, and came down—his shod forefeet full upon her breast. He leaped over her body and was gone, his empty saddle shining with its vanity of silver.

A silence of death fell for a moment in the peaceful pot.

Then two men moved.

McKane, the trader who leaped from his horse and knelt by Kate Cathrew, and Big Basford who flung up his arms and shook his clawing fingers toward the western wall.

"You killed her!" he shrieked, "You yellow devil—you've killed Kate Cathrew! And I'll kill you!"

He kicked his horse viciously and shot forward.

Bud Allison, the boy whom none had noticed, raised his puppy's gun and fired.

Big Basford toppled to the left and slid out of his saddle with an audible grunt. He rolled over, shook his good fist toward the serene skies, and was still.

Slowly the group drew in to look at Cattle Kate lying so quietly after the storm.

McKane was holding her hand between his own and murmuring foolish, endearing words. Lawrence Arnold pushed him aside with an oath.

But Brand Fair turned his eyes for the first time toward that farther wall. For a moment he did not recognize the creature which knelt there, the smoking rifle across its knee, its face covered with both hands.

Then something familiar in the drooping shoulders, the ragged veil of shining hair, struck home to him.

Without a word he went forward and dismounted.

Incredulously he stooped and took the hands away.

Wide eyed he looked at her.

"Nance!" he cried in horror, "Nance—Nance—Nance! Good God Almighty! What's this?"

"I am forsaken of my God," said the girl piteously, "I had to kill her—or she'd have killed you!"

"You didn't," said Fair sharply, "the stallion killed her. Your shot went wild."

She looked at him dully, uncomprehending, and Fair repeated his words. As she realized their import her lips began to quiver, she rolled down upon the trampled grass with her face to the sod, and wept.

Brand Fair, knowing that this matter was between her soul and his Maker, wisely did not attempt to comfort her.

He sat with his hand on her heaving shoulder and watched the tragic scene.

Bossick and his men surrounded Arnold. Big Basford was dead. And here was Nance Allison in Rainbow's pot at dawn, ghastly with blood and weariness.

A thousand questions burned in his brain, but he waited.

From the right Rod Stone was coming forward, followed by the half-breed girl and the rest of the men from Cordova.

Bossick took Stone into custody and called to Bud Allison, who came limping forward, his blue eyes glittering with defiance.

Fair stooped and lifting Nance bodily carried her into the heart of the group.

"Men," he said, "here's something more to add to our score against Sky Line. Look!"

They looked in astonishment.

"Great Scott!" said Bossick wonderingly, "It's Miss Allison, ain't it? What's she doing here?"

"That's a question I'll ask Lawrence Arnold," said Fair in a voice like a blade, but the bearded man from the Upper Country spoke up promptly.

"I think young Stone and Minnie Pine can answer that, since that is why we're here. Speak, Stone."

The rider shook his head.

"Let Minnie," he said, "she was first to know about it."

All eyes turned to the Pomo girl, among those of Lawrence Arnold, still holding in his arms the body of Kate Cathrew, and they were cruel as a hawk's.

"I listened," said Minnie calmly, "I always listened when there was devil's talk at Sky Line. I've heard much. This time the Sun Woman yonder stood in the inner room where they had brought her, and gave back in their teeth the words of the boss and the master. They wanted her to sign her mother's name to a paper which would give to Kate Cathrew the homestead on Nameless."

"Great Scott!" said Bossick again.

"She wouldn't," went on Minnie, "and so they gave her to Sud Province to keep all night in Rainbow's pot, with Big Basford standing guard outside."

There was the sound of an indrawn breath from Fair.

"We know Province, Rod Stone and me," continued the girl, "and so we went to Cordova for help to get her out. We had to wait so long to get away from Sky Line—"

"Hold hard, Smith—Mr. Fair," he said, "not in your condition. Jermyn—go see what you can find. In the meantime—there's Big Basford. The boy was quick—"

Here Rod Stone broke in, speaking frankly.

"I'd like to say, men, that when young Allison knelt Big Basford he got the man who threw his father down Rainbow cliff and stretched the rope that lamed the boy. John Allison had found the only outside way to the rim and was looking down into the Pot here, when Basford went to meet him."

For a long moment there was silence.

"It would seem to me," said Bossick slowly, "that there has been a deal of justice done here this day—a very great deal of justice. It's destiny."

Nance Allison looked up at him with a light in her blue eyes.

"It's the hand of God, Mr. Bossick," she said gravely, "no less."

The rancher nodded.

"Maybe," he said, as Jermyn and several others who had accompanied him, came back across the basin with Sud Province among them.

One look at the man was sufficient.

"I guess he's had all that was coming to him for the present," said Bossick grimly, "Take him along to the house. We'll go farther in the rest."

And so, in the gully, with the risen sun touching all the tapestried slopes of Mystery with gold, Cattle Kate Cathrew went back to her stronghold under the tinted cliff—went in state with a retinue behind her.

She had died as she had lived, spectacularly, and her turbulent soul should have been satisfied.

With her went one man who had loved her after his selfish fashion, another who would have crawled in the dust to kiss her feet, while a third, borne rolling limply on a saddle, followed after more closely than any other.

The young cowboy from the Upper Country absent-mindedly rolled a cigarette.

"She was worth it," he said softly to the bearded man beside him, "in spite of all!"

"H—!" said the other, "look yonder! One square foot of his satin hide was worth her whole body! I always thought he'd get her, some time, some way. I'm going to dig up my last dollar and buy him from whoever owns him now."

Bluefire stood against the cliff, watching with interested eyes this strange procession passing.

On the broad slopes, the towering slants, the conifers sang their everlasting song, tuned by the little winds from the south.

White clouds sailed the vault above leading their shadows for a little space upon the soft green country.

Another spring was smiling on the Deep Hearts hills.

On the wide brown flats by Nameless the young crops were springing, vigorous and safe, and some few herds browsed peacefully on the rugged range.

In the doorway of the cabin by the river, Nance Fair sat with Sonny in her lap, watching the slope beyond.

"Won't Brand be coming soon?" the child wanted to know. "The Rainbow cliff is shining, so it's getting late."

"Soon—very soon, honey," said Nance smilingly, "I heard Dirk bark in the buck brush yonder a little while ago."

In the room beyond Mrs. Allison rocked contentedly.

"Nance," she said, "you know this here carpet always makes me think of the floor of the woods, somehow, with its brown an' white. It's so fresh an' fair an' soft."

"That's why I got that warp," said Nance happily, "I felt it would—and it does so. Yes, it does so. Run, Sonny—yonder's Brand and Bud!"

Brand and Bud, riding up from the waters of Nameless in the evening haze, Diamond and Buckskin drawing long breaths of satisfaction at the sight of home.

Nance rose and waited for the lean dark man who swung down and came to her with Sonny in his shoulder. As he stooped to lay his lips to hers he looked long and tenderly into her blue eyes.

"Heart of my heart!" he whispered.

"How's all, Brand?" called the mother as she spread a cloth on the scoured table preparatory to "feeding her menfolk" as she phrased it.

Brand hung his hat on a nail and turned to the well as Bud came whistling up the path.

"Fine, Mammy," he called back, "everything at Sky Line's doing well. Rod and Minnie make things move, and I can trust them. The only thing that jars is old Josefa who never fails to tell me that all half-breeds are fools, and that white men can't be trusted. And then she bakes an extra pie for Rod and smiles at Minnie proudly. Yes—all's well. All's well on Nameless, eh, old-timer?"

And swinging the boy once more to his shoulder, he followed young Bud in across the sill.

[THE END.]

Jar 4,000 Years Old

A jar full of beads of agate, china beads, beads of crystal, baciets and medals has been found at Byblos. On a disc is the name of the camel driver who, 2,000 years B. C., transported Pharaoh's offerings to Byblos.

Husky Norwegians

The breadth of chest of Norwegians enlisted in the Union army during the American Civil war was greater than that of any other nationality.

TEXAS NEWS

Freestone county is in the middle of her cotton harvesting season. It is estimated that she will make approximately 75 per cent of the yield last year, which was 23,000 bales.

The cotton crop of Fort Bend County is rapidly being picked. Gins are running day and night and the early cotton crop soon will be gathered.

The fall convention of the Texas Butter, Poultry and Egg Association will be held at Fort Worth, October 19-20.

Erection of a sweet potato curing plant at Lindale with a capacity of 10,000 bushels is in progress.

Approximately 25,723 bales of cotton have been ginned in Nueces county to date.

An issue of Anton independent school district bonds of \$80,000, bearing 5 1/2 per cent and maturing serially, has been approved by the attorney general's department, this district being in Hockley and Lamb counties.

The Jackson county commissioners have set the 1925 tax levy at 93 cents on the \$100 assessed valuation and have placed the occupation tax at 50 per cent of the amount charged by the state.

A state fish hatchery will be established in the Wichita Falls district. The hatchery will cost approximately \$50,000 and will be devoted to breeding purposes, either in Lake Wichita or Lake Diversion.

An issue of \$5,000 Lawrence (Kaufman County) independent school district bonds, bearing 5 per cent and maturing serially, has been approved by the attorney general's department and registered in the comptroller's department.

Work of asphalt surfacing or topping of 47 miles of highway in Harris County, which had been held up temporarily, will be resumed by the contractors. Authority for resumption of the work has been given by the state highway commission.

A freight rate of 50c per ton on carload lots of sand from Beaumont to Port Arthur and West Port Arthur on the Texarkana and Fort Smith railway has been ordered by the Texas railroad commission, the rate to be effective immediately.

Possibility of a petition asking for a \$350,000 bond issue election for the construction of two hard surfaced highways in the Yorktown section looms as a result of the action of the state highway department recently in designating two new highways through that town.

Although planted and cultivated entirely by motor power, a 23-acre tractor demonstration farm, one mile south of Tyler, will yield from 12 to 13 bales of cotton. Except for a scattered stand of cotton in some spots, a result of dry weather at planting time, the farm would produce a bale to the acre.

Texas will receive the one-eighth royalty paid on oil produced from state lands at the market price of the oil at the wells, it was held this week by the attorney general's department, in an opinion written to Land Commissioner J. T. Robinson, by Assistant Attorney General R. J. Randolph.

Caravans of families from West and Central Texas are arriving daily in sections of East Texas, where they are readily obtaining employment in cotton fields. Thousands of cotton pickers from the drought stricken sections of the state are at work on cotton farms in Smith, Rusk, Gregg, Cherokee and Titus counties.

The number of cotton spindles in place in Texas on July 31 was 239,596, of which 208,212 were active in July, figures announced this week by the bureau of census of the department of commerce showed. The active spindle hours in Texas in July was reported as 115,039,123, or an average of 211 hours per spindle in place.

The railroad commission has authorized a rate of 7 1/2 cents per 100 pounds for the transportation of carload shipments of crude oil in tank cars from Mirando City to Laredo. The rate is not to be used as a basing rate in arriving at or in fixing division rates of, rates to, or from other points. It is effective September 8.

State's answer to the application of the Texas and Pacific railway for rehearing by the interstate commerce commission for authority to abandon and dismantle the Midland and North western Railway from Midland to Seminole, 65 miles, was filed Friday with the interstate commerce commission by Assistant Attorney General Ernest May.

The citizens of Jackson county are jubilant over the fact that the road running from Hallettsville through Edna and LaWard and on to Blessing in Matagorda county, has been designated a state highway. The new highway, designated by the highway commission at a recent meeting, will cover about 75 miles of territory, 45 of which will be in Jackson county.

W. F. Magee of Georgetown has been selected state prison auditor by the prison auditors board.

Printer's Sick Stomach and Headaches Almost Cost Job

Mr. K. M. Collins of Woodhaven, N. Y., says, "Instead of plodding through my work wearily on account of sick headaches and sour stomach, I now enjoy good health and ambition, can do more and better work and life is worth living. I have never before given my name to advertise a medicine, but you cannot imagine how different I feel since I discovered Carter's Little Liver Pills."

Carter's Little Liver Pills tonic the whole system through the liver and bowels. They act as a mild and effective laxative, in a gentle manner without any bad after effects. Recommended and for sale by all drug stores.

He Owes His 40 Years of Constant Good Health to Beecham's Pills

Billy Daniel left Tuesday for Plainview where he will enter Wayland College. Billy was one of the graduates of the High School last season.

Tom Gooder, of Colbert, Okla. was here the first of the week looking over the valley with a view of buying land.

J. B. Beard, Jr., of Frederiek, Oklahoma, was here the first of the week prospecting.

J. M. and C. B. Craig, of Abernathy, were here the first of the week looking for a location.

Miss Edna Williams spent the week-end with homefolks in Plainview.

Mrs. J. D. Rankin and son, J. D., of Pleasant Hill, N. M. were here the first of the week visiting old friends and relatives, also her parents, D. W. Dodson and wife.

B. L. Evans, was here this week from Celest, visiting his son, M. L. Evans, out North of town.

Miss Floye Johnson, of Lubbock, is here this week the guest of Miss Opal Johnson.

Miss Opal Johnson was visiting in Lubbock Friday, returning home Saturday.

Taylor White, Miss Ethel Kistler, Mrs. Curtis Taylor and Mrs. Frank Jones are attending the Institute in Lubbock this week.

-LOCAL ITEMS-

Miss Madge Long, of Level-land, has accepted a position with the Faulkner & Vance real estate office.

N. L. Lamar and family left Monday for Lubbock and points below the cap rock on business. He will return the later part of this week.

Walter Reed, of Frederiek, Okla., was here Monday looking at the country with a view of locating.

Ryan Steinbock was in the city with a broken arm Monday. He received his injuries while working on a tractor.

W. D. Johnson, the barber, is reported doing nicely in the Lubbock Sanitarium, after an operation.

Mr. Vance, father of E. J. Vance is home after several days visit at the Lubbock Sanitarium, where he underwent an operation. He is doing fine now.

Mrs. Elmer Hoskins was operated on at one of the Lubbock Sanitariums Tuesday morning. She is reported doing nicely at this time.

J. L. Bratcher and two sons, of Loving, are here this week visiting in the J. J. Scribner home.

J. H. Shepard and Harry Baker, of Roswell, N. M. were here Sunday visiting the editor.

Taylor White and wife returned from Austin where they have been for the past few weeks, attending a short course.

Riley Culbert, of Longview, was here Tuesday with a load of melons.

Mrs. H. C. Henington returned from White Deer, the first of the week where she has been visiting her mother, Mrs. Skaggs, who has been very ill.

J. A. Hutto and family returned from Lorenzo' Monday where they have been visiting friends and relatives.

Elmer Hoskins is the new owner of a Ford Coupe, purchased from the Green Motor Co.

M. L. Steel purchased from Sam West 400 steers this week, thru Joe Rutherford.

D. G. Wiley, of Whitesboro, was here this week looking at the country.

ROAD NOTICE

STATE OF TEXAS,
Bailey County.

We, the undersigned Jury of Freeholders, citizens of said Bailey County, Texas, duly appointed by the Commissioner' Court of Bailey County, Texas, at its March 14th, Term, 1925, to view and establish a First class Road from the Southeast corner of Section No. 27 in Block "X"; Thence West on the Section line about 3 miles to the Public Road on the North Side of the Railroad and having been duly sworn as the law directs, hereby give notice that we will, on the 26th day of September 1925, assemble at the beginning point and thence proceed to survey, locate, view, mark out and establish said road, beginning at the South East corner of Section No. 27 in Block "X"; Thence West on the Section line about 3 miles to the public road on the North side of the Railroad.

And we do hereby notify E. K. Warren & Son, Wm. Winklehake, Theo. M. Knoop, S. H. Withers, C. K. Warren, Jno. B. Miller, Chas. J. Quante and any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us as a written statement of the amount of damages, if any, claimed by them.

Witness our hands, this 25th day of August A. D. 1925.

C. H. Long, Louie Geisert, W. H. Kistler, S. E. Morris, A. J. Scott, Jurors of view. 28-32.

"A Heart to Heart Talk With Your Chiropractor About" "Rheumatism"

The question is asked why are we so confident that Chiropractic will get results in rheumatic cases, where the experience is that nothing has been of any real benefit.

The victim of rheumatism suffers such agony that he is not to be blamed for trying anything and everything that is offered. The reason Chiropractors are so confident of results in rheumatic cases is because Chiropractic is utterly different.

No matter what else you have done or what variety of methods may have been offered, there was not one of them that would do the work of our Chiropractic Health methods.

For Chiropractic there are no substitutes.

Rheumatism is due to failure of the organs of elimination. When the normal waste of the kidneys and bowels are not properly expelled from the body, due to deranged function, the poisons from the waste matter is taken up by the blood stream and carried through the body.

With our Chiropractic Health methods we remove the mechanical interference that causes this deranged function.

Thousands have found this to be true.

J. E. HANLEY Chiropractic Masseur at Hotel James

There's a difference-- You know the reason!

Unless you are an experienced judge of nursery stock, it is almost impossible to buy trees and be certain of getting value for your money. But you need take no chance. SINNERS IN HEAVEN

PART FOUR—Continued.
—17—
IV

By CLIVE ARDEN

Copyright by The Bobbs-Merrill Co.

To Barbara, that evening seemed never-ending, her false position intolerable. She craved yet dreaded, the morning when she could talk with Hugh.

Once by themselves, the women's tongues buzzed over their coffee cups concerning the latest local scandal. Mrs. Rochdale proceeded with a garrulous account of a household treasure, possessing all the virtues, in whose room four empty whisky bottles had been found, during her absence on holiday! As she had been a frequenter of temperance meetings and had taken the pledge, this was in itself a terrible sin, even though she had never been seen drunk. Whether to allow her to return, or to write and denounce her forthwith, exercised her mistress' simple mind to the exclusion of sleep. After much discussion, it was decided to ask the vicar.

The girl shrank into her chair, sick at heart, old talks with Alan in her mind. What key, she wondered, did these people use in substitution for the true one given to the world and lost again? "Charity suffereth long and is kind," they read glibly; or "He that is without sin among you, let him cast the first stone." What did half the righteous souls, judging everybody in their own smug conception of Christianity, know of temptation, sin, the meaning of the word love with all its manifold sub-keys; consideration, understanding, sympathy.

"My dear," broke in old Mr. Rochdale's voice, as he seated himself beside her, "we must bring back the roses into your cheeks!" He took her hand and patted it. "You mustn't brood over the past. It was a terrible experience—terrible! But it's all over now. Forget it, Barbara, like a bad dream, and cheer up again."

The words were, to the girl, like blades of steel thrust into sore bleeding wounds. "Over. . . . Forget!" They seemed to reverberate in her mind, and her very soul turned sick and faint as, gripping the arms of her chair, she heard her mother's voice:

"Her time will soon be full again until her wedding, with all her old duties—"

Then Hugh came up and chatted, in his usual cheery way, and somebody played and sang. . . . But all the time those two words beat upon her brain. God! was it true? Was this not once more to capture her? Was this nightmare to become the reality, and the splendid real—all the very essence of life—to fade into the dream?

The morning was cold and bright. After a pretense at breakfast, she put on her coat, Hugh not being expected before lunch, and her mother not yet down.

A craving for freedom from stone walls, for vigorous action, had seized her. The cold air stinging her face, the wind buffeting her skirts, dulled momentarily the agony within. The lake glistened in the sunshine; here and there sprigs of ling still showed purple amid the russet of dead hawthorn and bracken upon the common; the white sandy paths were crisp with frost.

At the corner where the lane joined the main road, she paused. Here, she and that other had first met. With exquisite pain, memories of those far-off first encounters seethed into her mind. She saw again the half-mocking smile upon his lips; remembered his teasing words and her own annoyance, after speaking of her heart's desire. . . . She understood, as she turned hurriedly away, how, from the first, those keen eyes had read into her heart, penetrating to what she was but vaguely conscious of herself.

Her heart's desire? Ah, how changed it all was now—how changed. . . . Since treading last these familiar, heathery paths, a lifetime seemed to have elapsed. She looked back with wonder upon the inexperienced girl dimly yearning after an intangible something beyond the daily horizon. . . .

Presently she turned her steps to the house where so many happy hours had been spent. The garden looked deserted now, the tennis court frost-bound and dreary. But the housekeeper welcomed her warmly; and the few school teachers installed there for Christmas holidays looked at her with ill-concealed curiosity. She hurried away, up to Mrs. Field's little den. Its owner being one of those whose arrivals ever had the charm of unexpectedness, the room had a cheerful fire and was fragrant with hothouse flowers. As Barbara looked round at the buff walls and deep-blue velvet curtains, the soft chairs built for comfort, and shelves stacked with books, other memories of confidential chats and cozy teals caused her again to realize the gulf yawning between herself and the girl of long ago.

She turned to the book shelves, then restlessly back to the fire. . . . Once she caught, with a little the back of a chair, as her eyes she loved and had lost to her own, with the old straight penetrating look. . . . She ran forward and picked up the photograph. Here the uniform of an air force officer, and his face was set in the lines of a stubbornness when unpleasantness was afoot, which she knew well. . . . The vivid likeness was blistersweet.

"It's a d—d nuisance—get it done!" she said, almost hear the thought she read behind the grim lips. . . . Then, as she raised upon the familiar fea-

tures, all the past rose up and enveloped her; the comfortable English room faded. . . . Once more, in a far-away hut, she prepared strange food for her mate, ever and anon running to look for his return, seeing little black figures at play on the sand. . . . And presently he came striding down the sunny slope, fresh from a dip in the river, laden with fruit, his dear eyes searching for her. . . . She hurried to meet him, taking some of his burden. . . . Again she felt the warm touch of his lips, heard the laughter in his voice as he made some teasing remark.

The ringing of a bell brought her sharply back to reality, the sudden cruel contrast cutting her like a whip. With a low moan she sank upon a couch, throwing herself face downward among the cushions, her lips pressed to the unresponsive portrait. Despair again clutched her in its remorseless claws. . . . She lay inert in her blind tearless abandonment, oblivious to all things. . . .

The opening door and quick footsteps crossing the room did not disturb her. At the touch of an arm about her shoulders she started violently and raised a drawn face. Hugh stood beside her, consternation in his eyes.

"Bab!" he exclaimed, shocked by her expression. "My dearest! what ever is the matter?"

She sat slowly upright, the portrait still clasped with both arms, regarding him dumbly.

"I managed to get away this morning—Martha said you were here—she stammered. 'What is it, Bab? I—I thought something was wrong.'"

It occurred to her that anybody less stupidly dense and unimaginative would have guessed the truth long ago. Then, swiftly chasing the thought, came the knowledge that it was his genuine simple trust in her and all

his fellow-creatures which blinded him. Suspicion was as foreign to his honest nature as subtle changes were beyond his ken. She recognized, with a warm rush of sympathy, that her affection for this old companion remained unchanged; she alone was to blame for mistaking it for anything more, with the inevitable suffering she was about to cause. She stretched out her hand; and he took it in both of his.

"Hugh! Everything is—wrong."

"Tell me all about it," he urged, sitting beside her. "We can probably put things right between us."

She shook her head, with a catch of her breath; then drew her hand gently free again.

"I'm—I've got to hurt you—horribly. Oh! my dear! I can't bear doing it." Rising impulsively, she walked to the window and back, her face working with emotion. "Can't you—guess, Hugh? Can't you realize that—that—everything is different, now?" she cried, looking straight into his bewildered face.

Apprehension was spreading over his features. His brown eyes, with their dawning sense of trouble, resembled that of a faithful dog not understanding the meaning of some unexpected chastisement. The girl could not bear to see it. She looked involuntarily down at what was still clasped to her breast. His glance followed hers, and the apprehension deepened.

"Guess—what?" he muttered. "What's that, Bab? A photograph?" She nodded. He suddenly stepped toward her. "Whose? What—I—oh, lord! Tell me straight!"

It was the cry of one upon the borderland of tragic discovery. Feeling like an old-time executioner who let the ax fall upon the quivering neck of his victim, ending the hopes and affections of a lifetime, she silently handed him the photograph, and again turned to the window.

Looking with unseeing eyes at the frosty landscape, her thoughts reverted to a curiously similar scene in the past, wherein the situation was reversed. Hugh's portrait had played its part in that little drama. Alan, she remembered, had, with characteristic vehemence, torn it into shreds. . . .

then claimed her for his own, by the only bonds which constitute real possession of a woman. There may be other lawful ties, honorably recognized and adhered to; but, whether near in physical presence, or sundered by countless miles of sea and land, even by death itself, only the man to whom a woman's heart belongs holds her in true possession. None other can turn the key which unlocks the real fountains of her soul.

Hugh did not tear the cardboard to fragments. After a few moments' pregnant silence, he laid it upon a table and followed the girl to the window. His face was pale, and his voice toneless. "You mean, Bab that—"

"I—I can never marry you."

He caught at a chair, but said nothing. "I—care for you—as much as ever," she went on hurriedly, seeing the look on his face. "But—it was never love! I have learned that, Hugh. I know now—"

"You mean—" he asked again huskily, as her voice faltered. "Croft?"

She nodded. The color ebbed still more from his cheeks, and he laid a hand on her arm. "But—my poor Bab! he is—dead—"

"Oh, I know! I know!" She clasped her hands in anguish. "But—you shall hear all the truth, Hugh—it is your due. He—I—he was my husband."

Hugh started violently and dropped his hand. She stood motionless before him. For several long moments the ticking of a little clock and the crackling of the fire were the only audible sounds. In his slow fashion, the man was trying, gropingly, to adjust facts.

"But—" he began at last. "I don't understand! You were only together a few weeks before the wreck. Where did you get—married? Why didn't somebody write? I don't understand," he repeated, bewildered. "I thought you disliked him."

She looked silently into his agitated face. It was evident that the truth was still far from his grasp.

"Hughie," she said very quietly, "it was impossible to write. We were not married during the trip—not until we had been on the island for—over a year."

He gazed at her, speechless, his bewilderment gradually changing to dismay and dawning horror.

"On the island? For a year?" he echoed. "But—how on earth could you get married—"

Suddenly the blood rushed to his temples and the horror grew and deepened. He caught her arm, gripping it fiercely. "You—my God! Barbara! you don't mean that you—you, of all people—and Croft—"

Abruptly he swung her arm free, his face blazing as she had never seen it. "The swine! the—rotten swine!" he choked, at a loss for words. "I trusted him. He gave me his word—"

"And he kept it," she cried quickly. He faced her, something nearer to a sneer than she had ever seen curling his good-natured lips. "In what way? By betraying the greatest trust one man can put in another? By dragging you down—"

"Be quiet, Hugh!"

The anger in her voice silenced him. He turned away, dazed. Sinking upon the couch, he covered his face with his hands.

The girl was trembling with indignation. Her back to the room, she struggled with the hot anger seething within until her woman's understanding won the victory. Then she turned round.

"It was my doing," she said.

"You—doing?" He sprang to his feet and walked about agitatedly. "What d'you mean? You were not the sort of girl to encourage— For God's sake, explain everything!"

"He kept his word to you," she repeated. "He saved my life at the risk of his own. In every possible way he looked after my safety and comfort; nobody could have done more. Although he—cared—all the time, I never even guessed it! He—he thought I—belonged to you!" She paused, shading her eyes.

"Then—"

"Months went by, and no rescue came. Then—I—oh, Hughie, I couldn't help it—I realized—I loved him, and—he—knew it, too. . . . I meant to wait—and tell you. But months passed again, and—the position became impossible. You can't understand here. But there we had to face facts—quite differently from ordinary standpoints—to make our own laws. He left the decision to me. . . . At last, after months again of struggle and—uncertainty—I became convinced that it would be right to make our own marriage, too—" She touched her finger. "This was the only ring he had."

Her words went into silence. A faint relief replaced the look of horror in Hugh's face. To an essentially clean-living British sportsman, the idea of wantonness between the girl he loved and the man he had trusted was unbearable. That hasty judgment was contradicted by her words. He could not, as she surmised, clearly comprehend the magnitude of the forces to be contended with upon the island, any more than a man learning swimming strokes in still water can realize the difficulties to be encountered, by the same movements, out in the open sea. But the simplicity of her explanation, offering no excuses, brought with it the force of truth. Evidently, however incomprehensibly, each had acted in accordance with deeply weighed convictions. . . .

This was Hugh's first plunge into such complications; he was utterly lost, adrift from every mooring.

Barbara, watching him, half held out her hand.

"You must not think hardly of Alan," she appealed wistfully. "If he had not behaved honorably, I should not have loved him—as I did. Surely you believe that, Hugh?"

Mechanically he took her hand. "Oh, lord!" he ejaculated. "What a mess it all is!"

"It's hell for me!" she exclaimed, a bitter agony in her voice that startled him. He looked at her strangely, amazed. This tragic-eyed woman who had suffered so much, learning to love with such fierce intensity, was far removed from his old girlish companion. He felt in a turmoil: full of pity for her, though still half incredulous, chaotically uncertain of his feelings toward Croft. Dropping her hand, he picked up the photograph once more. Then the full realization of his own loss—to be faced for the second time—surged up in his heart, as he looked at the pictured face. He put it down hurriedly, and passed his hand across his forehead.

"It's a—d—d world now for us both, Bab! I—I'd better go—it has rather bowled me over—" He turned away, stumbling a little. "It—will be such a blow to the old people," he muttered huskily.

The girl watched him, helplessly, with aching heart. As he reached the door, she caught the suspicious glint of misery in his eyes which seemed to break down all barriers. Her defensive attitude melted into sympathy, as ice melts at the touch of hot coals. In her impulsive way she ran to him and seized the lapels of his tweed coat.

"Hughie!" she cried, tears raining unheeded down her cheeks. "Forgive me! I couldn't help it. It—it breaks my heart to hurt you like this."

His hands closed upon her arms, but he could not speak.

"I—couldn't bear to—betray your trust," she sobbed. "Believe me, Hughie, I tried not to—I tried to keep loyal to you—"

"Oh!" he interrupted vehemently. "Don't make it harder. If you suppose I should have wanted you to marry me from—duty? out of loyalty?" He paused, regarding her thoughtfully for a moment. "There's one thing, Bab—"

"Yes?"

"When you tell—your mother or anybody of—things—being over between us, don't mention your marriage! They won't understand, and it will be rough for you."

She threw back her head, with something of Alan's old arrogance, and drew away.

"I know you mean that kindly, Hugh; but it's impossible! It would seem as if I were ashamed. It would be implying that our convictions were wrong."

"People are not overcharitable about here, as you know," he urged. "You may both have acted according to your convictions, and they may have been right; but all the same it was—unorthodox, and— They will simply throw mud at you and—especially—him! Bab," he came back to her, speaking with unusual insistence. "I can't bear to think of you facing that! For my sake, as well as your own—and—his, don't tell them."

She remained silent. The truth of his words, as applied to Alan, struck her forcibly. The contemplation of his name suffering calumny had already, that morning, proved unbearable.

"It would be an awful trouble to your mother and my old people," he added, with his usual thoughtfulness. "They will be upset, as it is. And—they couldn't understand."

She suddenly turned and caught his shoulders.

"Hughie! do you?" she asked earnestly. "Ah! you must! I can't lose—your faith, too."

Then he acted in a manner that astonished them both. Passion and a sense of the dramatic had ever been far from his nature. Involuntarily, however, his fingers closed around her wrists. Raising her hands, he pressed his lips upon them.

"Heaven knows what was right or wrong," he declared hurriedly. "But—oh, my dear! God help you!"

The door slammed, and he was gone from her life—this man who had been friend and brother, playmate or lover, all her youth. . . . She stood gazing drearily through the window at the desolate tennis court, where they had played so often together, and an extra wave of lonely bitterness swept into her heart. . . . She saw Hugh, with bent head, cross the grass to the garden gate. . . . Then she sank into a chair before the fire, crushed by an overpowering sense of physical weakness.

(TO BE CONTINUED.)

"Chameleon Lakes"

It is well known that the water of many lakes exhibits characteristic colors. Lake Geneva, at the western end of Switzerland, is blue, while Lake Constance, at the eastern end of that country, is green. Blueness implies purity, since the natural color of water is blue. A green lake has its water slightly clouded with impurities.

It is said that green lakes sometimes become absolutely colorless for a time, and it has been found that this sudden change of hue is due to the washing into the lakes of mud colored red by oxide of iron. Red is complementary to green, and the result of the mixture is that the green color of the water becomes for the time being neutralized.

Wigs Long Worn

Wigs date back 100,000 years, if the curious covering of a prehistoric woman's head carved in ivory, found by M. Piette in a cave in the Landes, may be interpreted as a wig of the Stone Age.

THE PASSING DAY

WILL H. MAYES

Former Dean

Department of Journalism
University of Texas

Eastern Mills Seek Texas Location.

It is reported that many Eastern cotton mills are anxious to move to Texas. They offer to have their plants appraised by engineers satisfactory to themselves and the places to which they propose to move and to move their plants to Texas points that subscribe capital stock equal to the appraised valuation, the new stock subscriptions to be used for buildings and operating capital. The reasons for desiring to move to Texas are that working conditions are better here, 20 per cent can be saved in operating expenses, and the \$7.50 required to move each bale of cotton to the factory is also saved.

This should be a good proposition for Texas points desiring cotton mills, provided they take the precaution to avoid buying out-of-date machinery. Junk machinery in a manufacturing plant is dear even if given away.

Should Learn Lesson From Drouth.

It is said that in Caldwell county at least nine million dollars short of the crop of 1924, which means that the drouth has cost that much in cotton and nearly as much more in other crops—certainly not less than fifteen million dollars. Fifty other Texas counties have suffered as much or almost as much as Caldwell. Such a condition is likely to occur at any time in almost any part of the State.

Fifteen million dollars, the amount lost to Caldwell county this year, would go far toward preparing to irrigate a great part of the county. Texas is slow at learning lessons if movements are not started at once to store water for irrigation wherever possible. Even in years of average rainfall irrigation would largely increase the crops.

Texas Rice Crop Is Good.

Texas is making the best rice crop it has ever produced. Texas rice is made by irrigation, for which advance preparation is always made. Therefore, rice growers do not worry about getting enough rain to make a crop. The price is good this year too, and rice growers are prosperous.

A few decades ago this country depended almost altogether on Japan and other foreign countries for its rice. It was even thought that good rice could not be grown here. Now Texas and Louisiana are growing great crops of better rice than we have before been accustomed to.

We are learning that Texas can grow many things we once thought impossible. It is no idle boast to say that we can feed and clothe a great part of the world, and can furnish most of the world with its luxuries. We can't do this, though, without plenty of water stored for our crops.

Much Ado About Nothing.

A great ado is being made about placing a bust of Lincoln at the Texas Technological College as one of a group of the five greatest Americans. Lincoln may or may not have been one of the five greatest and his bust in the group will not settle that question or force the acceptance of Lincoln as among the greatest upon those who see it. It merely means that those to whom the selection was left agreed to place it there. Doubtless they did not agree among themselves as to who are entitled to such recognition. It would be difficult to find a group of five persons who would be in entire accord as to the five greatest men in America's history. The fact that the objectors have suggested at least a dozen to take the place of Lincoln shows that there can never be entire accord on this subject. Those who are opposed to Lincoln's bust at Texas Tech. should base their objections on artistic grounds. All will agree Lincoln was not much for looks.

Hard Schedule in Texas Schools.

Headlines in Texas papers tell us almost daily that there is a hard schedule this fall before almost every Texas school. Naturally unsophisticated readers conclude that students are going to have to work pretty hard to make their courses, but a reading of the articles always shows that the difficult schedule refers to the football games. Nearly all of the advance newspaper information about the schools has reference to athletic rather than to educational affairs.

Are Texas educational institutions getting athletically top-heavy? Is education becoming a physical sport rather than an intellectual training. I do not attempt an answer, but merely ask the question for your consideration. There are times when the conscientious teacher is made to wonder if he is merely holding his classes together to furnish rooters for the athletic contests.

Florida Now Leads California.

A report from Miami, the Los Angeles of Florida, states that a real estate dealer recently made a profit of \$8,000,000 in eight hours on a \$1,000,000 investment. Los Angeles will now be heard.

Paying Out Three for One.

The report of the Texas Insurance Commissioner shows that in 1924 insurance companies of all classes collected in Texas in premiums \$133,768,222, and paid out in losses only \$44,427,012—three dollars received for every dollar paid out. The question arises: "Where does the other two-thirds go, and who gets it?" Another equally interesting question is: "How long will this unequal ratio of receipts and disbursements be permitted by the people of Texas?"

LIVE STOCK

FLUSHING EWES TO INCREASE LAMBS

Those who have ewes to breed this fall may well be thinking about getting them in good physical condition before the mating time arrives. It is a well-known fact that when ewes are in a gaining condition at the time of breeding that the lamb crop will not only be larger, but the individual lambs will also be stronger and healthier. Putting ewes in a gaining condition is spoken of as "flushing" them.

Some years ago the United States Department of Agriculture carried on a number of tests with flushing ewes just before the breeding season and came to the conclusion, after six years of experimentation, that flushing increases the lamb crop about 20 per cent. The Kansas experiment station calls attention to lambs it has secured in tests with 17 groups of ewes. The ewes that were not fed grain during the breeding season gained about 1.7 pounds per head and had a lamb crop of 119 per cent, whereas those that received one-half pound of grain a day prior to breeding gained 8 pounds per head and had a lamb crop of 147 per cent. In other words, on that basis every hundred ewes that were flushed produced 28 more lambs than those that were not liberally fed prior to breeding. It isn't so important that a ration of a definite composition be fed. Any good feed that will cause the ewes to gain in flesh will turn the trick. A good bluegrass or alfalfa pasture without grain is all right.

A very good grain ration, however, is composed of one-third part by weight of corn, oats and bran. One-half corn and one-half oats will also make a good ration or oats alone will do very well indeed. Nor should a great deal of grain be fed. One-half pound per day per head is usually enough, although ewes that are in a run-down condition will do better if fed as much as three-fourths of a pound per head per day for a period of 14 to 18 days before breeding.

There are other advantages in flushing the ewe flock aside from getting a larger and stronger crop of lambs. Flushing tends to cause the ewes to come in heat. Thus the flock can be bred in less time and the lambs will come within a range of about two weeks of each other. A short lambing season in the spring is preferable to a long season because it lessens the labor of caring for the youngsters. Besides, as the lambs grow up they will be more uniform in size, which is an advantage when running together in one flock. They will also be ready for the market at the same time and practically all will be uniform as to weight when sold. These are factors of considerable importance.

Avoidable Waste in Hog Raising in Kansas Huge

"Kansas raises four hogs per litter and eight pounds of pork per bushel of corn," said Dr. C. W. McCampbell, head of the animal husbandry department at the Kansas State Agricultural college, in his talk before the Kansas swine breeders' association. "Kansas can raise eight hogs per litter and 16 pounds of pork per bushel of corn," he continued. "Kansas loses more hogs than she raises. For every four pigs raised nine are farrowed. About 88 per cent of the deaths may be traced directly to the farmer. It may be due to neglect or to ignorance. In either case it can ill be afforded and can usually be avoided with a reasonable amount of care and precaution.

Live Stock Hints

Don't let animals go thirsty. Breed ewes for early spring lambs. Don't allow dairy cows and laying hens to become fat. Don't feed animals of different ages and sizes in the same pen or lot. Plan to show your hogs at the county and community fairs. It is not advisable to pasture sheep and hogs together in a small pasture. When the ewes are turbed out of the individual pens, those with twin lambs should be kept separate from those with only one lamb. The rugged, stretchy, growthy, fast-growing, heavy-boned, deep-bodied, big-type hog is best for pork-production purposes. The feeding of too much grain, especially corn, is very apt to cause the sows to take on flesh rapidly, and produce a sluggish condition of the system.

"ONLY CHILD" IS UNDER HANDICAP

Fated Not to Succeed Well in Life.

In a discussion of the "Influence of Early Environment on Personality," before the members of the New York Academy of Sciences, section of anthropology and psychology, Prof. William Ogburn of Columbia university presented the results of his research into one specific phase of the general subject, but added that some additional data were not quite ready for presentation.

Taking for granted that a repeated stimulus in the life of the child interests the personality of the child, Professor Ogburn expected to find some objective evidence of this factor in a study of family life. He therefore decided to study "the intelligence quotients" to see if they varied with the position of the child in its particular family; that is, to see in what manner the oldest child, the youngest child and "the only child" would be affected by the investigation.

He said that in this way he could study the emotional stability of the child, its achievement in school, and the teacher's estimate of the child's personality. His first consideration, he said, was to define the position of the child in its family, and in this procedure he used fifty different categories, which included differentiations according to age, taking a period of five years as the dividing line, and also considering differentiations according to sex. But the data in the matter of the sexes had not been completed, he added.

Selecting "Who's Who" as a criterion of success, Professor Ogburn said that by analyzing the data given here in reference to the position of the child in the family, he might compare his results with the statement of Doctor Brill and other psychoanalysts who claim that "the only child" does not succeed very well in life, that it tends rather to fail in the struggle for existence.

Three thousand names were selected at random, the professor stated, covering three separate lines of endeavor, namely, 1,000 artists, including painters, actors, musicians, authors; 1,000 scientists of all grades, and 1,000 of a more general classification, including statesmen, business men, journalists and others of "good mixing qualities." In these questionnaires, he said, the position of the individual in his family was requested, and there was no classification for females, since there were only a few listed. From the 1,700 replies received he endeavored to see whether a certain type of child appeared in the lists of "Who's Who," with the following results:

Of these families of "Who's Who" were found 577 individuals who were the oldest males in the family, each of whom had a brother less than five years younger, and all of them living; 342 of them were in "Who's Who," making a proportion of 59 out of 100. There were 398 of these who were the youngest children with a brother five years older; 155 of them were found in the lists of "Who's Who," representing 39 out of 100. Regarding the intermediate children, that is, between the oldest and youngest, 729 were discovered and only 237 of them in "Who's Who." These results, Professor Ogburn concluded, seemed to favor the intelligence of the oldest child, with the youngest next and the intermediate child in last position. He found these data the most significant of the many categories.

Sting in It

Edward S. Harkness of New York, congratulated on his recent gift of \$1,000,000 to Yale, laughed and said: "Philanthropists never like to hear any allusions to their philanthropy. These allusions are always well meant but they are somehow apt to resemble the butler's speech more or less."

"A Lady Bountiful, famous for her charities, once declared to her butler that if the townspeople persisted in their design of building a garage right opposite her bedroom windows she would leave the town."

"That's what I told 'em, ma'am," said the butler excitedly. "I told 'em that at the town meetin'. And I asked 'em, ma'am, if they wanted to lose the goose what laid the golden eggs."

Cannibals Still Exist

Until the recent murder of the Canadian explorer, Charles Penrose, in New Guinea, by cannibals, the fact that man-eating humans still existed was not generally realized. This tragedy revealed authentic modern records of the cannibalistic tribes in the outreaches of civilization. In New Guinea they live in the extreme interior where the country is thickly forested and the tribes are difficult to locate. No traveler has dared to go too far into this interior although neighboring tribes have given out information on their less sociable neighbors.

Mimic's Fun Ended

For some time at Pasadena, Cal., V. K. Fisher enjoyed his ability to imitate a police siren to perfection with his voice. He fooled the traffic policemen as he drove his car down the street at a terrific rate, emitting siren-like screeches. At each corner, the policeman would wave traffic to a stop and would give the youth the right of way. Fisher met his Waterloo when a motorcycle officer heard the siren and followed to see what was happening.

Cartier, the Pioneer

The first effort to cultivate the soil of Canada was made by the discoverer, Jacques Cartier, who, in 1541, had an acre of land cleared near where Quebec now stands, and had it planted with turnips, cabbage and lettuce seeds. The first public garden was Adam's garden in Halifax, N. S., established in 1753. The present public gardens in Halifax are the pride of the city and the admiration of all visitors.

The Planet Mercury

Mercury is the smallest planet, and the nearest to the sun. Owing to its proximity to the sun it is difficult to see it with the naked eye. Its mean distance from the sun is 36,000,000 miles, while that of the earth is about 94,000,000 miles. Mercury completes a revolution of its orbit in 88 days; it is about 3,000 miles in diameter; and its mass is only about one-eighth that of the earth.

Cats Without Tails

In most Manx cats the tails are represented merely by a tuft of hair without any remnant of bone. This strain is met with in many parts of Russia and there is a very general opinion that it originally came from Japan. Unless the jungle cat, which is a nearly whole-colored species, can claim the position, the ancestry of these Manx-Malay cats is still unknown.

Observations on Rivers

There are a large number of stations reporting on the daily stages of the rivers, probably from 500 to 1,000, and in addition there are other stations maintained to study the general climate of the country. These are known as co-operative weather observing stations and probably number between 4,000 and 5,000, well distributed over the United States.

Was Said by Jefferson

The original quotation said of officeholders that few die and none resign, is from one of Thomas Jefferson's letters, as follows: "If a due participation of office is a matter of right, how are vacancies to be obtained? Those by death are few; by resignation, none."

Her Observations

Bystander—"Did you get the number of the car that knocked you down, madam?" Victim—"No, but the hussy that was driving it wore a three-piece tweed suit, lined with canton crepe, and she had on a periwinkle hat, trimmed with artificial cherries."—Everybody's Magazine.

Developed Own Talent

Meissonier, the great French painter of military subjects, was practically self taught, having received only very meager instruction from teachers. His "Retreat From Moscow" was sold for \$170,000 in 1890.

Camphor for Stains

Camphor removes many stains. Fruit juice will often disappear when rubbed with a dampened bit of camphor; and a few drops of camphor on a soft duster removes some marks from a mirror.

Value of Politeness

School yourself to be polite and courteous under all circumstances—under trying circumstances. Politeness is one of the strongest allies one can have in dealing with his fellow men.—Henry Clews.

Cause and Effect

"Do you always think before you speak?" "Yes," answered Senator Soghum; "but not as hard as I am sometimes compelled to think afterward."—Washington Star.

Ended Sunday Pastimes

Due to the collapse of a large theater on the Sabbath day in the reign of Queen Elizabeth, a general prohibition of all Sunday public pastimes followed.

First English Book

The first book printed in the English language was the work of William Caxton, who, in 1474, issued the "Recuyell of the Historyes of Troy," a translation of Raoul de Fevre's work.

Hard Labor

Ethel—"So Dick presented you with that splendid engagement ring?" Clara—"Presented nothing—I earned it!"—American Legion Weekly.

Shopping Hint

Be careful while selecting the experience you want. You can't get your money back if not satisfied.—Columbia (S. C.) Record.

Inferiority Complex

Inferiority complex—Being awed by a man who knows things you don't know and doesn't know things you do know.—The Duluth Herald.

Vanderbilt Had Vision

of Aviation, in 1849

Back in 1849, when most adventurous souls were yielding to California bonanza allurements, the original Cornelius Vanderbilt, he was not yet acclaimed as the commodore, wrote this note to a Kingston (N. Y.) editor who had been his Staten island boyhood friend:

"Dear John: Of course, I can't take any long vacation like you write about. You come down to New York for a week. I will take good care of you at my house, if I do have to work shirt-sleeved all day, and we, anyhow, can have the evenings together."

"Maybe I will find a way to show you how still some day we can find a way to do what your heart's set on, going out to the Pacific. I am working on something that's wonderful—not my own individual notion, but what a man who has been teaching school over at Hoboken has in his mind. Folks over there promised to support his ideas, but then turned and laughed at him."

"I would mighty well like you to see him and talk with him. I have already backed him some and intend to keep along. He has a plan to make a real flying machine, and I reckon he is a pretty real calculator."

"Well, John, if he does make good, you and I can be going to California soon in a proud way, not paddling down and round the Horn, but in our own wagon prancing up in the clouds across the rivers and looking down on the Rockies and reaching our landing right at Sutter's gold diggings, all in a few days, John, instead of taking a whole summertime journey."

"I wouldn't wonder if you will be bewitched, too."—Wall Street Journal.

His Determination

"I'm going to resign my office and let the darn postmaster's slide!" said the official at the crossroads. "I've got plenty of d—n reason for it, too! One is that the emulsions of the office is too puny for the responsibilities, and another is that the fleas are too plenty. A fellow that takes the only daily paper that comes here from the city has started shooting at me b'cuzz he wants his darn paper before I'm through reading it. A passel of skunks has took to rendezvoozing under the building, and the atmospheric disturbance is so thick you can cut it with the flat side of a barrel stave. Tuther day an unreasonable cuss who wanted his mail came right in through the side of the office with an ax, just b'cuzz I'd gone off fishing. And I sorter hear it whispered that the K. K. K. is figgering on calling on me on general principles, as it were, and I've decided that it is time for me to step down and out."—Kansas City Star.

To Pole by Airship

Fridtjof Nansen, the famous Arctic explorer, is returning to the North pole country after nearly thirty years spent in other work. He has announced that he is to head a German expedition which will make a long flight across the polar regions in a specially constructed dirigible of 5,000,000 cubic feet capacity, or something like twice the size of the Los Angeles. A crew of fifty men will be carried and the flight from the Murmansk coast, north of the White sea, to Alaska and back is expected to occupy four weeks. The principal objectives of the voyage will be scientific. Photographs to become bases for maps of the Arctic regions will be taken, soundings made in the ocean and other data assembled. It is hoped that the expedition will be able to start in 1927.

Reason a Snuff

Little John, age four, always said the unexpected. One day he was playing ball with his handkerchief. Repeatedly he threw it at Aunty who was trying to read. Hoping to regain peace, Aunty seized the handkerchief and placed it in her book. Immediately John began to tease for it.

"Do you want it very badly, John?" Aunty asked, and there was an affirmative nod.

"How badly do you want it?" Just what Aunty expected her small nephew to answer is unknown, but her surprise was evident when with puckered lips and wrinkled brow, John burst out:

"W-e-ll, I want to blow my nose."

Gypsy Trips for Girls

Everygirl's, the magazine of the Camp Fire Girls, recommends gypsy trips in answer to the call of the wild.

"The girls borrow or rent a cart and horse and just follow the road that calls," says Everygirl's. "You walk part of the time, ride part of the time, cook your meals over a camp fire beside the road or in the bend of a shady brook, sleep under the open sky or in the hayloft of a friendly barn; you watch before the fire in the quiet of the night hours; you take a dip from the sandbar of an inviting river or halt your caravan at the foot of a mountain and climb up to the view and the sunset."

Has Einstein Manuscripts

The new Hebrew university at Jerusalem, which Lord Balfour opened with so much ceremony a few weeks ago, has already one great monument of intellectual achievement in its archives. Doctor Einstein has presented the original manuscripts of his work on relativity to the library of the university. We hope the ability to give a lucid explanation of the learned doctor's theory will not be made a requisite for a degree.—Youth's Companion.

HENRY WILLIAMS

Henry Williams, reformed burglar and author of "In the Clutch of Circumstances," the story of his own life of crime and reformation, whose recent speech in Hartford, Conn., aroused protests from the head of the Connecticut state prison board. Williams, now a successful business man of Brooklyn, is crusading against the contract labor system and advocates the use of state prisoners to build state roads. He is known as "Mark Twain's burglar," as it was for robbing the home of the author at Stormfield, Conn., that he was sentenced to prison.

Editor Attends Press Meeting at Amarillo

Twenty-two members of the Panhandle Press Association attended a called meeting held at the Board of City Development in Amarillo yesterday to consider entering the Texas Weeklies, Inc., an association organized for securing national advertising for the weekly newspapers of Texas.

H. L. Grable, of Dallas, manager of the Texas Weeklies Inc., represented the new association and eight more of the Panhandle papers entered the organization. In his talk before the Panhandle newspaper men, Mr. Grable stated that he had secured \$17,000 in advertising for the papers he represents since they organized the Texas Weeklies Inc., two months ago. There are now 136 publications in the association, Mr. Grable said. The organization maintains offices in Dallas, and will send representatives to the East to sell the advertising space of Texas weeklies to the national advertisers.

For the convenience of the advertisers Texas is grouped into 31 districts. Amarillo is in the 31st district which now contains 15 weekly member publications. A membership fee of \$25 is charged when a paper joins the organization, and dues of \$1 a month per 1,000 circulation are charged.

The weeklies in the organization have a combined circulation of 250,000. The reader interest is greater in the weeklies than in any class of publication, and the advertisers knows this, Mr. Grable said.

The national advertiser will not take the time to look up newspapers in every county of the state and arrange for a contract with each individual paper. In the Texas Weeklies Inc., the advertiser can blanket the state with only one transaction if he wishes to do so, or he can place his advertising in a dozen papers in a particular district, said Mr. Grable. Besides, the papers have representatives in the field selling the space.

There are 37 weekly papers in the Panhandle, 30 of which belong to the organization. Officers of the organization which Mr. Grable represents are R. H. Nichols, Vernon, president; J. L. Spencer, Mart, vice-president; Sam P. Harben, Richardson, secretary-treasurer.

Twenty two attended the meeting Saturday. They were: Seth B. Holman, Hereford Brand; Clyde K. Hemmen of the Intertype Corporation; Sam M. Braswell, Clarendon News; R. H. Nichols, Vernon Record; H. L. Grable, Dallas, Texas; Bob Brashears, Panhandle Herald; Paul I. Odor, Briscoe County News, Silverton; M. B. Adams, Lockney Beacon; E. O. Perry, Plainview News; Oran Kelly, Spearman Reporter; R. B. Boyle, Muleshoe Journal; C. W. Warwick, Randall County News; Homer Steen, Floydada Hesperian; J. S. Engleman, Tulia Herald; Henry D. Wells, Wellington Leader; J. W. Cheney, Southwest Plainsman; Miss Ida Farrell and Miss Mildred Nation, San Jacinto Booster.

The Woman's Missionary Society of the Methodist church met with Mrs. Roy Elrod, September 2nd. Brother Farmer conducted a very interesting lesson in the new study book. Next week the lesson will begin on page 11 and the meeting will be held with Mrs. I. W. Haaden. The ladies of the church will serve ice cream and cake, Monday, Sept., 7th, at the laying of the corner stone of the court house.

A. J. Anderson, C. M. Hurst and wife and Miss Maude Anderson, of Roaring Springs, were here Wednesday looking at the country.

Fresh City Bakery bread, daily at all leading groceries.

Rope of Sand

A rope of sand is an illusion; something having the appearance of strength, but in reality useless. The phrase came into the language about the year 1600. There is a Latin proverb which runs: "Ex arena funiculum nectis" which, freely translated, is "You are weaving a rope of sand," that is, you are engaged in an impossible task. This comes from an ancient proverb recorded in Harper's "Latin Dictionary," edited by Lewis and Short.

Canadian Confederation

The first legislative step toward a federal union of the provinces of British North America was made by the legislature of Nova Scotia in 1861, when a motion in favor of such a union was adopted by the house of assembly by unanimous vote. Six years later confederation was an accomplished fact, having been established by the four provinces of Nova Scotia, New Brunswick, Quebec and Ontario.—Family Herald.

Alligators' Teeth

Alligators in the rivers of Florida are rapidly decreasing in numbers, so, to supply enough reptiles for marketing, a breeding farm has been established. The 'gators are long-lived, several hundred years claimed for many in captivity and many more years for those in the wild state. When the reptile's teeth wear out a new set grows, the average 'gator grinding down twenty sets during its lifetime.

Early Glass Making

Glass is said to have been brought to England in the year 674 A. D. by Benedict Biscop, but the first glass factory in England was established at Crutched-Friars in the year 1557. Glass-plate for coach windows and mirrors was first made in England at Lambeth, London, by Venetian artists under the patronage of the duke of Buckingham in the year 1673.

Britain's Oldest Clock

The oldest clock in Britain is now at the Museum of Patents at South Kensington. It was made at Glastonbury abbey by one of the monks in 1325, and in Elizabeth's reign was removed from Glastonbury to Wells cathedral. It worked there until about forty years ago, when it was laid aside to make room for a new clock.

Engagement Ring Is Gift

Louis Peterson applied at a San Francisco police court for a warrant for the arrest of a former fiancee who would not return her engagement ring. The magistrate denied the request on the ground that an engagement ring is a gift and not a trust.

Ibsen Voluntary Exile

Ibsen, the Norwegian dramatist, after failing to stir up his countrymen by his "A Brother in Need," to rally to the aid of Denmark, left Norway in voluntary exile, and remained away until 1891.

Protection for Big Game

Sleeping sickness and malarial fever will perpetuate big game in Africa; the realization has been forced on hunters that they cannot defy microbes when they invade the haunts of the big mammals.

Enjoyment on Tour

Tony—"What sort of time is Frank having on his motor tour?" Jim—"Great! I've had two letters from him—one from a police station and the other from a hospital."—Good Hardware.

Of Spanish Origin

Ranching is a term derived from the Spanish-American word rancho, originally meaning a place where herdsmen eat and sleep, but gradually extended to mean a grazing farm.

Origin of a Name

How many people know that serge takes its name from China, when it was introduced into England in 1690? The Latin name for China is Seticum, which gradually has changed into the modern word serge.

South African Mines

The mining industry spends \$150,000,000 a year in South Africa and provides directly or indirectly 40 per cent of the union and provincial revenues.

Expensive Cup of Coffee

The first cup of coffee made in France was drunk by Louis XIV about 280 years ago. The price then was about \$25 a pound.

Brother Williams

You'd better git through with de housecleanin' in dis little old worl' befo' you tackle de bigger problems of de universe.—Atlanta Constitution.

Dr. Dodson Dentist—from Amarillo, will be in Muleshoe, Sept. 1st, to 5th, inclusive. 27-28-29c.

The W. M. U. of the Baptist church met Wednesday in their regular study of the manual. There were 8 members and one new member present, also one visitor. The ladies met with Mrs. Motherall. After a short business session the ladies adjourned to meet next Wednesday with Mrs. Bud Morris.

FALL HATS MAKE THEIR BOW; VARY COATS OF HEAVY CREPE

SING hey the merry maiden!—the merry, merry maiden—who is in the midst of a joyous vacation that must soon end. Hats for college girls are peeping over the millinery horizon, the first harbinger of returning school days and a warning that the outfitting of college girls must be undertaken.

So far as her headwear is concerned the choice of new things for the school girl will prove a pleasant occupation. The new modes are delightfully well suited to youth. There is nothing startlingly different in the hat shapes, from those that have proved so becoming and popular during the sum-

ommended, and they may be had in a variety of shapes. The soft-stitched silk hat and the felt or velours hat will stand up under much wear, if bought in good qualities; the very cheap ones are not durable.

All the heavy crepes, crepe satins and satins used for coats, have established themselves so firmly in the esteem of women that designers concern themselves only with ways of varying them. Every woman, old or young, looks well in these silk outer-garments and it is the business of stylists to turn them out in versions that are dignified or piquant or tal-

SOME FALL MILLINERY

mer, but there are some very novel trimmings, the like of which we have not seen before. They are the queer-looking ornaments and decorations done in the "ecubist" or "futuristic" manner, that make one think of a crazy-quilt pattern. Paris started this style, which may become a vogue, by taking inspiration from the "International Exposition of Decorative and Industrial Arts" now in progress there, where the art of the "modernists" is on display. But in millinery this new art only appears in little touches—easy to get used to—if not to understand.

The group of four hats shown here includes four distinctly different shapes

ored, to meet requirements of many kinds.

Here is a coat of heavy silk crepe that will make itself very useful in the interim between summer and winter. It is a straight-line garment with fulness let in at the skirt portion by means of wide plaits at each side. The banding which finishes the bottom and sleeves and makes the collar is made of a fancy weave in black silk that suggests fur at a glance—but appears to be like parallel rows of shirred tucks. There are many pile fabrics and plushes that may be used in this way.

A coat of the heavier silk fabrics, lined with crepe, and interlined, will make itself useful nearly all the year round and for afternoon or evening wear. Black and dark brown are the usual choice in colors with black always in the lead.

Among new arrivals from authoritative designers there are crepe de chine

COAT OF HEAVY CREPE

among popular types of millinery and leads off with a small off-the-face model of silk that is soft and close fitting. It is made with a sectional crown and pointed upturned brim, both covered with rows of machine stitching in silk. As a rule these hats are made of black, or dark-colored, silk and stitched with a bright contrasting color or several colors in silk thread and this stitching gives them the required texture. They need no frame. Applique motifs of stitched silk and an ornament supply the trimming.

At the left another silk-covered hat has rows of pin tucks in the silk and a velvet facing, with soft brim edge. Loops of ribbon and an ornament trim it. At the right a small velours hat has an upturned brim and a simple strap trimming. It announces itself as a smart herald of new modes with brim edge and strap trimming bound with gilded kid. A wide-brimmed dress hat of soft felt finishes the group. It is adorned with velvet leaf motifs, veined with gold paint and edged with gold ribbon and a small ornament.

For daily wear hats of the same type as two of those pictured are rec-

or crepe meteor coats in dark color, including navy blue—all of them, practically, introducing the flaring skirt line with fulness at the sides or toward the front. Some of these coats have rather small fur collars or short bands, or patches, of fur used in their decoration. But the furless models, with scarf or tie neck finishes, are even more original and quite as attractive.

JULIA BOTTOMLEY. (©, 1926, Western Newspaper Union.)

Recovery From Influenza Hastened by PE-RU-NA

Mr. C. A. Allen, R. R. No. 2, Bondurant, Iowa, gives testimony to the healing power of Pe-ru-na. Influenza left him much run down in health with catarrh of the nose, throat and bronchial tubes punctuated with attacks of asthma. He writes:

"While recovering from the Influenza I was so weak I could not gain any strength for two months. The latter part of the winter, I bought six bottles of Pe-ru-na and began taking it. My weight increased to 175 pounds, the most I ever weighed.

My usual winter weight is 155. If you can use this letter for any good, you are perfectly welcome."

Such evidence cannot fail to convince the rankest unbeliever of the merits of Pe-ru-na.

Insist upon having the old and original remedy for catarrhal conditions.

Sold Everywhere Tablets or Liquid

That Good Old Pine Tar Soap

Genuine Pine Tar is very healing—that's why GRAND-PA'S WONDER SOAP is so good for the skin. It is fine for bath or toilet and is the greatest hard water soap you ever saw. Splendid as a shampoo, keeps the natural luster of the hair and is highly recommended for dandruff. It is mildly deodorant.

Sold by all dealers in two sizes—medium and large—at popular prices.

ROAD NOTICE

STATE OF TEXAS,
Bailey County.

We, the undersigned Jury of Freeholders, citizens of said Bailey County, Texas, duly appointed by the Commissioners' Court of Bailey County, Texas, at its August Term, 1925, to view and establish a 40 ft 1st class Road from the Southwest corner of Section 23 and the Northwest corner of Section 36 to the center of the South Half of Section 6 Block F Hale County School Land, and having been duly sworn as the law directs, hereby give notice that we will, on the 26th day of September 1925, assemble at the beginning point of this road and thence proceed to survey, locate, view, mark out and establish said road, beginning at the Southwest corner of section 23 and the Northwest corner of section 36; thence East along the lines of Sections 24 and 37, 25 and 38, 26 and 39; thence North between Sections 26 and 6 to the center of the South half of Section 6; thence East to the Hale County School Land in the center of the South half of Section 6, Block "F"

And we do hereby notify A. A. Lumpkin, V. E. Ochler, S. T. Harrison, Hall M. Hailey, W. M. Sweitzer, Fidelity Trust Co., W. H. Leiser and any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damages, if any, claimed by them.

Witness our hands, this 20th day of August A. D. 1925.

K. H. Green, A. L. Holt, T. G. Gaddy, W. K. Stegall, J. D. Nickels, Jurors of view. 27-31

NOTICE TO BIDDERS

Notice is hereby given that the Commissioners' Court of Bailey County will, up to 2 o'clock p. m. Sept. 14th, 1925, receive and open in public bids on furniture and fixtures both wood and steel for use in the different rooms and offices in the new Court House at Muleshoe, Texas the same to consist of the following: Steel filing devices for vaults and offices, counters, desks and tables for offices, court room furniture for District Court and County court rooms. Each bidder to submit plans specifications and unit prices on furniture and fixtures bid on by him.

Each bidder to furnish actual samples of desks, chairs, tables and court room furniture and window shades, etc.

Each bid to be accompanied by certified check payable to Wm. G. Kennedy, County Judge for 5 per cent of his bid. Successful bidder to make bond for full amount of contract. The Court reserves the right to accept or reject any and all bids or any part of same. Payments to be made by County for the furniture and fixtures by Cash or its equivalent in Legally Issued County warrants.

Mrs. J. W. McCombs, of Rotan, mother of Elmer Hoskins is here this week taking care of things while Mrs. Hoskins is recovering from an operation in the Lubbock Sanitarium.

Long's Dairy, Phone 45-2R.

NOTICE TO BIDDERS

Notice is hereby given that the Commissioners' Court of Bailey County will, up to 10 o'clock a. m. September 14, 1925, receive bids for the furnishing and installing of plumbing, heating and wiring of the new County Courthouse Building of Bailey County and for the furnishing and installing of steel cells of the County Jail, in accordance with plans and specifications adopted by the Commissioners' Court of said County which plans and specifications may be had upon application to the Clerk of said County or to the Architect, The Butler Co., of Lubbock, and at said hour of 10 o'clock a. m., of September 14, of 1925, all bids received will be publicly opened and considered and all bidders will be required to deposit with the Clerk of this Court or with the Architect \$50.00 as a guarantee for the safe return of the said plans and specifications, and each bid shall be accompanied by a certified check of five per cent (5 per cent) of the amount of such bid, and the successful bidder will be required to give bond in the full amount of the contract.

All bids shall be addressed to Wm. G. Kennedy County Judge of Bailey County in a sealed envelope with the words "Bid of -----" such blank space containing the name of the bidder. The Court reserves the right to reject any and all bids.

ROAD NOTICE

STATE OF TEXAS,
Bailey County.

We, the undersigned Jury of Freeholders, citizens of said Bailey County, Texas, duly appointed by the Commissioners' Court of Bailey County, Texas at its March Term, 1925, to view and establish a First class Road from the East line of Section No. 18 in Block "X" where it crosses the County line between Parmer and Bailey Counties and having been duly sworn as the law directs, hereby give notice that we will, on the 26th day of September 1925, assemble at the beginning point and thence proceed to survey, locate, view, mark out and establish said road, beginning at the East line of Section No. 18, in Block "X" where it crosses the County line between Parmer and Bailey Counties; thence South on the Section line to the Public road on the North side of the Railroad at a point where said public road crosses the Section line between Sections Nos. 20 and 25 in Block "X".

And we do hereby notify C. K. Warren, F. C. Wells, Jacob Braun, H. D. Huyck, Chas. J. Quante, J. W. Bowman, Geo. W. Van Camp and any and all persons owning lands through which said road may run, that we will at the same time proceed to assess the damages incidental to the opening and establishment of said road, when they may, either in person or by agent or attorney, present to us a written statement of the amount of damages, if any claimed by them.

Witness our hands, this 25th day of August A. D. 1925.

Had Overlooked Something

Mrs. Newlywed was a good cook and housekeeper and very proud of her home. One day her husband went hunting and brought home a wild duck. She determined to excel all previous cooking and consulted a cookbook. She read: "Cook duck 20 minutes." So she prepared it and baked it in the oven for 20 minutes, placed it on the table with the rest of her dinner and called hubby to the feast. The bird was raw. She looked again in the book and read: "Cook duck 20 minutes for each pound."

Italy's State Railroads

State railways of Italy that showed a deficit of \$200,000,000 two years ago will have a profit of nearly \$2,000,000 this fiscal year.

DAIRY FACTS

FEEDING GRAIN TO COWS ON PASTURE

Does it pay to feed grain to cows on pasture? The answer is that it depends largely upon how much milk the cow gives and how good the pasture is.

If a cow is producing less than a pound of butterfat each day, the necessary food can be obtained from a good pasture. If she produces more than this, some grain can be fed with profit. This means that a Holstein should be able to get food enough from grass alone to make 25 to 30 pounds of milk daily, and a Guernsey or Jersey about 20 pounds. It will pay to feed grain to all giving above this amount as it is impossible for the animal to gather sufficient feed in the form of grass.

To produce a pound of butterfat daily requires at least 25 pounds of dry material. Fresh pasture grass contains only ten to twelve pounds of dry matter in a hundred pounds, making it necessary for a cow to gather and digest from 200 to 250 pounds of grass to produce from 20 to 30 pounds of milk. It is clear from this that it is impossible for a really high-producing cow giving 40 to 50 pounds daily to do so long on grass alone.

A cow yielding a pound and a half of fat daily should receive about five pounds of grain, and about seven or eight pounds of grain for two pounds of fat. When not more than five pounds of grain is needed, it may be corn, barley, oats, or any combination of grain that is cheapest. The grass supplies a good amount of protein so the danger of a shortage of this necessary material is not serious. With a high-producing cow requiring more than five pounds of grain daily, a small amount of bran, linseed meal, or other high protein feed should be added.

These recommendations hold good only when pastures are good. In mid-summer it will often be necessary to feed more grain to high-producing cows or to give some silage or green feeds to help out the pastures.—C. H. Eckles, chief of the division of dairy husbandry, University Farm, St. Paul.

Successful County Fair.

I didn't go to the county fair at Fredericksburg, but I liked the newspaper reports of it and want to pass something from those reports on to the many other counties that are going to have fairs this fall. The characteristic feature of the fair was the friendly feeling shown all the visitors by the people of Fredericksburg and Gillespie county. There was not only an atmosphere of good will among the home folks, but it was extended to all visitors from out of the county. They were made to feel that they were the guests of the county people and not that they were there just to be separated from as much money as possible. Somehow when one enters most fairs he instinctively feels that he has to guard against being fleeced in a small way. People at the Fredericksburg fair felt that they were with friends that were genuinely glad to have them see what the town and county could do in the way of a fair.

Fleeting Was Not Licensed.

The Gillespie County Fair did not give outsiders a license to fleece the fair guests. There were no carnival distractions on the grounds to interfere with Gillespie county hospitality and to tempt the public to pay out money to look at things they really should not have seen. There were no catch-penny gambling devices there. It was a sure-enough, honest-to-goodness county fair conducted in the interest of the people and not, like too many fairs, a small county exhibit shown at the expense of the exhibitors as a nucleus to gather the people for the purpose of allowing carnival petty gamblers to rid them of their money.

The people who were there seemed to have a good time despite the fact that they did not have the privilege of being gouged and robbed in a small way.

LIVE STOCK NEWS

IMPROVE METHODS FOR RANGE SHEEP

Do you remember when the only investment a sheep man had was in his camp outfit and in his sheep? Such a business could be managed to yield a profit by methods which would spell ruin if owned by the range sheep man today.

The sheep man of today must own or lease land to stay in the business. This land must be purchased or leased to maintain watering places, to control and be assured of sufficient range, or produce feed for feeding. It is even necessary to own improved ranch property before a permit will be granted upon the national forests. Investments have also been made in dipping vats, warehouses, storehouses, lambing sheds and the like. All of these mean increased capitalization. A man with 800 to 1,000 breeding ewes can easily have an investment in his range business of \$12,000 to \$14,000. Such an investment requires managerial ability, and the adoption of modern and approved methods of range sheep management, which was not needed in the old days.

Aside from an increase in capitalization, there has been an increase in the operating expenses. The sheep have been crowded out of the land which formerly afforded range, and now they must be fed hay during the winter. Labor charges have advanced, due to advances in the wage scale and also because the flocks have decreased in size.

In order to realize a profit from the business it is necessary to increase the per cent of lambs dropped. A great loss of lambs is suffered from dropping to docking time. A range sheep man on the Colorado National forest had 20 per cent lamb loss during this time. He plans a lambing shed to reduce this loss. Many range sheep men have found that the saving in lambs soon pays for the cost of the lambing shed.—B. W. Fairbanks, Extension Service, Colorado Agricultural College.

Community Building

Resident of Small Town Needs No Pity

The little town, says the New York Evening Post, does not invite the condescension of outsiders. It has its own public opinion and civic pride. The manager of a chain of rural stores comments on the revolution wrought in country life by the easy access to the city. Radio, autos, and national magazines have been part of the interweaving forces of a shuttle constantly at work between the larger and the smaller communities. He might have mentioned the power of women's clubs to raise the cultural level by lectures on current events, by the encouragement of gardening, by the provision and furtherance of music.

The little town does not live by the mere sufficiency of the city. Nor does it run to the city for every good thing to eat, to hear, to wear. It is aware of books and abreast of fashions. It has churches served by ministers who are compensated by the devotion of a flock for their relatively modest income. Moreover, that income is not always small when weighed in the balance with the cost of city life. One of the peculiar satisfactions to the small town dweller is the neighborhood consciousness—the knowledge that next-door neighbors and those beyond next door at infinitum will eagerly mobilize to help in time of need.

The little town offers its own abundant compensations, best known to its own citizens.

SOME MIDDLE-AGED WOMEN ARE AILING ALL THE TIME

Mrs. Ackerman and Mrs. Mayer Tell Women How Lydia E. Pinkham's Vegetable Compound Helped Them at This Trying Period

MRS. ELSIE ACKERMAN CONVOY, OHIO

Convo, Ohio.—"During the Change of Life I was weak and run-down and could hardly do my work. By reading your advertisements I found out about Lydia E. Pinkham's Vegetable Compound and it has straightened me right out and made me feel like a new woman. By the time I had taken eight bottles I was well and could do my housework on the farm without trouble. I recommended it to my daughter-in-law after her second baby was born and it did her a wonderful lot of good. I told her to try it and if it didn't help her I would pay for

it, and before she had taken one bottle she said to me, 'You won't have to pay for it! It is helping me wonderfully!' And she took three bottles of it. You can use my testimonial if you wish."—Mrs. ELSIE ACKERMAN, CONVOY, OHIO.

Mrs. Mayer's Experience

Litchfield, Conn.—"I have given your medicine a fair trial (I am on my fifth bottle) and can truthfully say that it has helped me. I am at the Change of Life and was not able to sleep nights, had indigestion, palpitation of the heart, pains in my right and left sides (more so if I hurried), had a rapid beating in my left ear and dreaded to see night come. I felt smothered if I lay on my left side, I had gas dreadfully, at times felt as if some one had me by the throat, had hot waves through me and sometimes I would shake in spells of nervousness. I am taking Lydia E. Pinkham's Vegetable Compound and I cannot praise it enough. I can say it does all it claims to do and I can recommend it to my friends. I can sleep much better, the pains in my sides are gone, I am not so nervous, my digestion is much better, and I very seldom have the hot waves. I must say that the Vegetable Compound is the best medicine for women's ills and I will answer letters from women asking about it."—Mrs. JOSEPH MAYER, SR., Box 36, Litchfield, Connecticut.

Don't scratch that rash—it's dangerous! Stop the itching and clear away the trouble by using Resinol

Good cream is clean cream cooled.

Let the milk scales judge a cow's worth.

Milk and cream are in great demand and have always received good prices.

The successful dairyman is ever on the alert and keeps a close watch over his herd throughout the year.

No farm, however small, operated by the owner or a tenant, should be without a few milking cows properly cared for and fed.

A good high-producing cow has a tremendous capacity for feed and it is economical to give her the feed that she can handle. This means that she must have a balanced ration with a sufficient proportion of concentrates.

Dairy Calves Need Right Feed to Make Best Growth

Dairy calves should be taken from their mothers when twenty-four hours old. They must have their dam's first milk in order to get started off right. Place them in a clean stall or pen and teach them to drink by letting them suck your finger until they get a taste of the milk. Feed two or three pounds of whole milk morning, noon, and night. Do not neglect the noon feed. If you do they will gulp down the night ration, and the result is scours and other intestinal trouble.

When a month old drop the noon feed and begin to add separated milk, about four pounds at a feed. After feeding the milk, put some bran and corn chops before them in a pan. This will keep them from sucking each other to some extent though when several calves are being fed it is better to tie them separately or put them in stanchions.

Keep plenty of pure water before the calves and nice bright hay or pasture grass. It is surprising how much water they will drink. Provide shade in summer, be kind and gentle in handling them, and if you have any foundation at all you will raise a real dairy cow.

Why Fifty-Dollar Scrub Is Most Expensive Bull

Usually they figure "What is a pure-bred sire worth?" That is fine, but useful when you are buying a bull. A scrub bull costs his owner, United States dairy bureau figures show that scrub bulls cost 13 dairymen a decrease of 56,848 pounds of butterfat, and \$29,762.42 in decrease in sales. This is a cost to each owner of the scrub bull of \$2,289.47. Wouldn't that money buy a dandy bull? The cost of these scrub bulls to the 13 dairymen, when computed on a cow's basis, was \$56.15 per cow. Is a \$290 pure-bred bull an expensive bull in a herd? Absolutely not. The expensive bull is the \$50 scrub sire that we pick up because he is cheap.—B. W. Fairbanks, Extension Service, Colorado Agricultural College.

Dairy Hints

Good cream is clean cream cooled.

Let the milk scales judge a cow's worth.

Milk and cream are in great demand and have always received good prices.

The successful dairyman is ever on the alert and keeps a close watch over his herd throughout the year.

No farm, however small, operated by the owner or a tenant, should be without a few milking cows properly cared for and fed.

A good high-producing cow has a tremendous capacity for feed and it is economical to give her the feed that she can handle. This means that she must have a balanced ration with a sufficient proportion of concentrates.

Valuable Farm Lesson

This has been an unusually dry year in Gillespie County, it being in the Texas drouth area of the year. At least one farmer over there showed how to defeat a drouth. Ben Hagel and his family displayed 250 different kinds of home-grown farm products, and said that if the season had been favorable he could have shown 350. He showed that even in the driest of years a farmer who works hard and exercises good farming sense in caring for what he makes can live on the luxuries of the land without having to go in debt. He has his living safely housed and is not worrying about hard times.

He would not be so comfortable, however, if he had grown only cotton, or corn, or any other single crop. A movement to Ben Hagel's Texas should be started by some philanthropist.

Teacher With a Hobby

Alfred Nefendorf is a Fredericksburg school teacher with a hobby. It isn't golf or tennis or fishing. It is canning. He has an idea that a teacher should try to help the people to live now as well as to teach children how to live after awhile, so he started a small cannery four years ago. He operates the cannery in the summer and fall months and will can anything that Ben Hagel or any other farmer grows. He will can their products himself for a specified sum, or for part of the products, or will show the people how to do it and let them can their own produce.

He has doubled the business every year and hasn't been fired yet by the school board for doing something useful when not teaching. Nefendorf is doing something of which Fredericksburg should be proud and the town should give him a public dinner or do something to show that it appreciates him and his work.

San Saba to Profit From Drouth

It is said that there is full compensation to be found for every adversity if only we will seek it eagerly enough. San Saba, with a great abundance of water going to waste, is suffering from drouth. The people have organized to dam the water and to irrigate the fertile valleys. If their ardor is not dampened by the next good rain, the drouth will prove a great blessing to them. The productivity of the soil of San Saba county is marvelous when plenty of water is provided, but as in most other parts of Texas, the rains are seldom seasonable even though plenty may fall during a year.

Almost every stream in Texas has numerous places where its waters may be impounded without extraordinary cost in comparison with the returns, and we know that we cannot depend on rains to make maximum crops even in the most favorable years, but most places are too short-sighted to vote bonds for irrigation.

Following the Lead of Others

If San Saba's irrigation project is carried through to completion, it will not be a year before neighboring counties will follow its example. Most people are ready enough to follow the lead of others, but few are progressive enough to initiate movements or to favor them where they have no personal knowledge of their operation. This is true as to all kinds of improvements, and applies everywhere. Having seen the great irrigation construction at Wichita Falls, people of Amarillo and surrounding country are now holding meetings to plan a great irrigation movement.

Hogs Require Shade and Clean Water in Summer

Shade and clean water during the summer months are essential to successful pork production. All kinds of hogs must have shade. Too much direct sunlight and heat is a frequent cause of hogs falling to thrive and is often the cause of hogs dying. During July and August small pigs often blister on the backs and about the ears which causes, in some cases, severe infections and bad sores.

Expensive shelter is not necessary. Shade trees provide ample protection. Where no trees exist temporary shade may be provided by the covering of a frame with canvas, under which the hogs may go for protection. Some producers build individual hoghouses with sides that may be lifted to provide an increased amount of shade during the summer months. This plan furnishes shade for hogs where only a few are kept.

Clean fresh water for drinking and wallow is equally as important as, or more important than, shade. The old-time wallow hole covered with acum, which was once also the drinking fountain, is no longer in favor with the successful hog breeder. Hogs must have water to drink, and if they cannot get fresh, clean water in the trough or fountain, they will drink where they can find it, regardless of its condition. This fact has caused some to believe that hogs prefer nothing better, but they do, and will demonstrate the fact when they are able to get fresh water from the well.

Live Stock Notes

- Don't feed moldy, or spoiled slage.
- Don't put fresh feed in dirty or sour troughs.
- Don't forget to salt all animals regularly.
- Don't feed milk from tuberculous cattle to your animals.
- Keep the brood sows on the farm—hogs are going to be high the coming year.
- Supplement pasture with sufficient grain to keep the hogs in good thrifty condition.
- Protect cattle, horses, and mules from the torment of the biting fly and the horn fly by using fly repellants.
- About 62 per cent of pure-bred live stock is marketed directly for meat purposes.
- Low ceilings for hoghouses save heat and lumber. But don't overlook the necessity of ventilation—and sunshine.
- Two litters of not less than seven pigs each, raised to maturity each year, more than double average profits from hogs.
- The ewe with twin lambs should produce much more milk and consequently needs more feed than is best for the ewe that is feeding only one lamb.

Community Built Up by Organized Effort

A fine example of community effort that gets results is found in the work of improving the streets that is being carried on in Columbiana. It is also a demonstration of the manner in which such an organization as the Exchange club can render its best service. Some weeks ago at a meeting of the club a fund for street improvement was started. In this, however, they were preceded by a group of citizens who, cooperating with Mayor Leonard, were at work cherting the street leading to the Southern depot. Other citizens joined the Exchange club with their contributions and now the depot street has been completed and good progress is being made on College street. There is enough money pledged, it is said, to chert every street in town. There are other things to be done in Columbiana and there are similar things to be done in every other community in the county. Let our people organize themselves and take hold for still greater effort at community building.—Shelby County (Ga.) Reporter.

Tremement to Suburbs

The tremendous growth of American cities and the resultant growth of the suburban zones around them have reached such proportions that the whole conception of cities and their regulation requires revision. The standards by which everything regarding cities was judged a generation ago are no longer adequate, and some radical changes in the physical aspect of cities and their administration may be expected. Decentralization of cities is already under way, and the results are apparent in the real estate market in an unprecedented demand for acreage around the fringes of the cities. In the Chicago area this activity is apparent for 30 miles or more in all directions.

Plan for Beauty

The city that is planning ways to make itself more beautiful is going to grow more rapidly than the city which does not care, a speaker at a real estate convention at Detroit asserted. I would like to think that the real estate men of this country are becoming more and more an influence for right living and right thinking. If we do so, dividends will be returned to us one hundred fold. Let us have cities that are clean—clean morally and clean physically. Let us do away with the things that mar and disfigure their beauty, that stop growth and retard wise city development.

City Managership

There are now 14 states in which any town or city may adopt the city manager plan by a referendum of its people. They are Massachusetts, New York, Virginia, Ohio, Oklahoma, Kansas, Idaho, Montana, North Dakota, North Carolina, Wisconsin, Louisiana, Indiana and New Jersey.

The plan has made greatest progress in Michigan, where 34 cities and towns have adopted it. Texas, with 23; California, with 18; and Virginia, where every city over 25,000, with the single exception of Richmond, is under city management.

Gilbert's Witty Sally

Sir W. S. Gilbert was a member the "Liver Brigade," a group of London men who rode daily for their health in Hyde Park. His sallies at ways kept the equestrians in good humor. On one occasion he rode up to a man that for years had been in the habit of walking his horse in the park, and said: "Frank, Frank, you will be arrested—the police have their eye on you. 'I, old fellow? Good gracious, what for?' 'For furious loitering.'"

CAREFUL ATTENTION NEEDED IN CANNING

Use Only Fresh Product in Canning.

(Prepared by the United States Department of Agriculture.)

Safe canning requires careful attention to every step in the process. Only clean, fresh, sound fruits and vegetables should be used for canning. "Two hours from garden to can" is a good slogan. All material showing any signs of spoilage should be discarded for canning purposes.

Circular Explains.

General directions for canning fruits and vegetables and time-tables for processing are given in Miscellaneous Circular 24, issued by the United States Department of Agriculture. Before beginning any canning it would be well to send for a copy of this circular, as it explains very carefully how each product should be handled through the canning operation. The "hot-pack" method is recommended, and the use of the pressure canner with all vegetables except tomatoes is strongly advised. The "hot-pack" method consists of precooking the product and then packing as near boiling hot as possible into clean hot containers.

CANNED TOMATOES ARE VERY USEFUL

Do Not Spoil Easily if Given Proper Care.

(Prepared by the United States Department of Agriculture.)

Tomatoes can probably be prepared in a greater number of ways than any other common vegetable. They form the basis of many soups and are used in sauces for fish or oysters. As a vegetable they may be used in many ways. Tomatoes are one of the standbys in salad making and the combinations made with onions, pepper and spices are almost endless. Canned, they do not spoil easily when reasonable care is exercised in the work.

One of the best methods of canning tomatoes is: Select only sound and ripe tomatoes. Dip them in boiling water for about 1 1/2 minutes or until the skins loosen. Remove skins and, with a slender-pointed knife, cut out the core without cutting into the seed cells. Have in readiness jars which have been boiled 15 minutes. Pack the whole tomatoes into the jars as rapidly as they are peeled. Add one level teaspoonful of sugar and one-half teaspoonful of salt to each quart. Put on the cleansed rubber which has been dipped in hot soda water and top which has been boiled 15 minutes. Half tighten the top. If hot-water bath canner, either commercial or homemade, is used, place jar on false bottom with sufficient water to process the jars. Boil 30 minutes after the water starts boiling vigorously. Remove jars, tighten tops, invert to test for leaks and store in a cool, dark, dry place.

Another procedure which is more economical of space is to fill quart jars with peeled whole tomatoes and then pour in a thick tomato sauce. Each jar will have whole tomatoes for salads or baking and a tomato puree for soups or sauces. This sauce is made by cooking the small or broken tomatoes until tender. The seeds are then removed and the pulp concentrated by boiling to about the consistency of catsup. Process quart jars for 30 minutes.

If desired, all of the tomatoes may be cooked to a pulp and a more economical utilization of space within the jar will be obtained.

Sweet Cherries Favored for Making Fruit Salad

Sweet cherries are excellent in salad, either mixed with other fruits or as one of the prominent ingredients. Large, firm cherries should be selected and pitted. The cavity may be stuffed with cream or cottage cheese and served on lettuce leaves with any preferred dressing. Cherries and pineapple combine well, and the stuffed cherries may be added to pineapple salad or the two fruits used in a mixed fruit salad. This suggests the United States Department of Agriculture.

Another way of using cherries with cheese and pineapple is to pit the cherries, cut them in small pieces and mix them with an equal amount of cream cheese, adding a little salt. The mixture is served piled lightly on lettuce leaves, with a dressing, or made into balls and served on a slice of pineapple, either with or without lettuce and dressing.

The important steps in canning may be briefly summarized:

Clean and prepare the fruit or vegetable.

Precook, parboil, or scald products that require it. If the vegetable or the fruit is to be peeled, dip it in cold water after scalding or parboiling. If no preliminary cooking is needed, put it at once into jars.

Pack products in jars or cans that will seal airtight.

To jars or cans of vegetables, add salt and hot water if there is not sufficient liquid to fill the containers. To fruits, add sirup or fruit juice.

Adjust rubbers and tops of glass jars or seal tin cans and place them in the canner as soon as possible.

Process at the given temperature for the required time.

Remove jars or cans from canner. Seal the jars airtight at once and place them out of drafts. Cool the products in tin by plunging them in cold water.

Keep all canned products under observation at room temperature for at least a week.

SIMPLE PLAN FOR CANNING PEACHES

Lye Method of Peeling May Be Found Useful.

(Prepared by the United States Department of Agriculture.)

In canning peaches sort the fruit and select firm, sound, uniform peaches. The soft or broken ones may be used for jam. Remove the peel with a knife, with boiling water or with a boiling lye solution. If boiling water is used, immerse peaches about one minute or until the skins slip easily. Remove and plunge for an instant into cold water. Slip off the skins, cut in halves and pack at once into jars which have previously been boiled 15 minutes.

Some peaches have skins which will not slip off after treating with clear boiling water. For them or for any peaches, the lye method of peeling may be used when they are firm, perfect and not too ripe. Have ready a boiling lye solution (4 tablespoons of commercial concentrated lye to 4 quarts of water). Drop the peaches into this for about 20 to 30 seconds. Lift out and drop into clear boiling water for 30 seconds. Remove and place for an instant in cold water. The skins will then come off easily.

Before preparing the fruit, make a sirup of 7 cups of sugar to 4 quarts of water or, if a richer sirup is desired, use 11 cups of sugar to 4 quarts of water. Allow one cup of water for each quart jar. Put one cracked peach pit for every quart of sirup into it. Boil sirup for five minutes.

The peach halves should be placed in the jar in overlapping layers, concave surface of each half facing downward. Sometimes very small peaches are canned whole in a sirup. These are called melba peaches. When the jar is full of peaches, fill with hot sirup and, with a wooden paddle or knife, carefully remove air bubbles.

Partially seal the jars (with mason tops, screw half way on; with glass tops, put top wire ball in position). If a hot-water bath canner, either commercial or homemade, is used, place the jars on a false bottom with sufficient water in the boiler to process them. The water should cover the tops of the jars.

Lye Is Very Useful to Clean Washing Machine

One of the bugbears of the housewife's washday is cleaning the washing machine. The suds unites with the free perspiration oils contained in the pores of the fabric to form a compound insoluble in water. This deposit, or scum, collects on the cylinder and tub and is usually removed with kerosene or cleansers. This requires the removal and replacement of cylinder, which is a strenuous operation. Cleaning the washing machine thoroughly after doing the washing can be easily accomplished without unnecessary work. Drain the dirty water and dissolve a heaping tablespoonful of lye in sufficient clean water to cover bottom of cylinder two inches. Start the motor and let it run for two or three minutes. Cleaning the washing machine by this method will save you time and effort with extremely satisfactory results.

COLORFUL FROCKS FOR FALL DRESSING SMALL CHILDREN

"THE melancholy days are come"—to a time in their history when it's no use trying to be melancholy any longer, for just ahead of them comes one brilliant style show after another, setting forth the most cheerful, sensible and interesting apparel for fall—not a melancholy note in it! These new fall garments put every holder in a good humor; they reveal an advance in the art of designing and making beautiful clothes suited to the needs of American women. There may be a few freakish things among them, but the discriminating new-fangledness is not to be feared. In colors there are some new shades and several old favorites revived. Among the first there are: Stylists who have themselves to children's clothing to be having little "difficult" days with the reaches of the fashion stage, anywhere from the early teens, the majority of the clothes are very simply designed and sensibly made. It is the designer's mission to give her freedom to be as creative as she will, and to keep her more or less unconscious of what she is doing. When occasion requires other things her clothes are still simple as to line, but much ingenuity is lavished on them in order to give them distinctive and charming style touches. Paris offers the two chic frocks shown in the picture, among dressy

Beautiful Costume for Fall.

fee, rosewood, reddish purple, several strong blues and soft rose shades, warm browns and golden pheasant, and with them are navy, gray, wine, fuchsia and black. Metal brocades and gold embroideries or gold buttons provide touches of splendor and are used with the proper restraint. In dresses skirt lines are fuller, but in those designed for the street the fullness is introduced by means of plaits, and the straight silhouette preserved. There are also numbers of straight-line models. Sleeves are long, in afternoon frocks often decorative, and in neck treatments there is so much variety that no one style frocks for late summer, and, with longer sleeves, they may be developed in wool fabrics for fall and winter, or in the heavier wash materials—plain linens, cotton broadcloth and similar weaves. The scarf-collared in the frock at the left, finished at the ends with peasant embroidery, promotes its chances as a popular fall model. It has a pointed, embroidered pocket supporting a little silk tassel—which little detail has a very French accent. It would be pretty in any of the plain colors in flannel—almond green, pencil blue, buff, burgundy or red, or in the staple navy and brown shades. A fancy braid and buttons

Suitable for Miss Six to Twelve.

dominates, but the trend is toward higher neck lines. A conservative herald of fall modes appears in the tan-colored flannel dress, with navy figures, shown in the picture. It is bordered in dark red, the border outlining the skirt, which is split at the sides and finished with red buttons. The narrow girdle is made of the figured flannel. This three-color combination is very pleasing, and there are many well-balanced combinations of navy with the different red, copper and fuchsia shades in the new frocks. provide adornment and furnish color for the trim dress at the right. "Paris" is written in the clever strap which extends across the "V" shaped neck opening and slips through a slash at one side. Tub frocks, for every-day wear fill much more of the horizon in children's styles than their dressier things. These, in gingham, cotton broadcloth, English prints and other dependable weaves, are popular in simple designs with bloomers to match. (Continued on page 25, MULESHOE JOURNAL, a Newspaper Union.)

The Old Standby in a New Dress

—the same dependable remedy that over a period of more than fifty years has been found so reliable in the treatment of catarrh and diseases of catarrhal nature.

The outside of the package only has been altered. To facilitate packing and reduce breakage in shipping, the paper wrapper which has identified the Pe-ru-na bottle for many years has been displaced by a substantial pasteboard carton.

Pe-ru-na cannot be made any better. Three generations of users testify that Pe-ru-na is the best remedy in the world for catarrh and diseases of catarrhal origin.

The remedy our fathers and grandfathers used with so much satisfaction is still the standby for the ills of everyday in thousands of American homes.

PE-RU-NA The Original and Reliable Remedy for Catarrh

Pine Tar Good for the Skin

It's been almost fifty years since Grandpa's Wonder Soap first made its appearance and won immediately the lasting friendship of our people by the almost amazing manner in which this good old Genuine Pine Tar Soap performs its function. But, we must all realize that the real reason why this friendship has endured is because the product on which it was founded has so splendidly stood the rigid test of time. There are thousands of Southern grandpas who point with pride to the fact that for four generations they have been using nothing but "that good old Pine Tar Soap." One reason for this is the known fact that Genuine Pine Tar has properties that are soothing and healing to the skin. It's great for grease; fine for shampoo; grabs any dirt quickly and lathers freely in hard water; good for the skin, and is also mildly deodorant. Most all Grocers and other dealers, too, sell this soap in two sizes, medium and large, at popular prices.—Adv.

The Muleshoe Journal

R. B. BOYLE, Editor
\$1.50 per year

Nobody cares very much what the average Muleshoe man believes, so long as he doesn't irritate the whole town by discussing it. Every man is entitled to his beliefs no matter how peculiar they may be. He is entitled to a reasonable expression of them; but the fellow who is so ignorant he can't even realize his ignorance; who has a constipation of ideas and a diarrhea of the mouth; that is constantly running off with no other motive other than to stir up strife and enmity, that man would do well to move out into the wilds of nowhere. He is of no constructive value to any town.

Longview Capers

We are all rejoicing over the good rain that fell through this part of the country.

F. C. Carpenter's son and wife from Wichita Falls, visited him last week. They just made a trip to Santa Fe, N. Mex., and other parts. O. C. Essary joined them on their trip. He reports a fine time.

Mr. Cox of this community is away visiting.

O. C. Essary is working on an adobe house in the Davis community this week.

Grandma Leach is staying with her niece, Mrs. Myrtle Sullivan in the Davis community.

Ross Maxwell and wife from the Figure Two, visited Joe Essary and wife this week.

Mrs. Roberts and son have moved back to Motley county where she will teach school this winter.

The writer has been so busy, the news is rather short this week.

CHEVROLET

The Coach \$695 F. O. B. Flint, Mich.

The Public Acclaims this the finest Low Priced Coach

Built on the new Chevrolet chassis with construction typical of the highest priced cars—powerful motor; a new disc clutch, the easiest-acting you have ever handled; extra strong rear axle; long semi-elliptic springs—this car provides a remarkable combination of strength, power and comfort.

But in addition it is a beautiful car. Its fine Fisher body meets your ideals of fine appearance and comfort. It is finished in sage-green and black Duco whose lustre and color last for years. For such a coach to be priced so low is truly an achievement in motor car manufacture. See this car today.
