

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS.

THURSDAY, MAY 4, 1939

VOLUME 17 NUMBER 15

District Court Convened Here Last Monday

Bailey County District court convened here Monday, Judge C. D. Russell, presiding, assisted by District Attorney Herbert Martin and County Attorney Cecil H. Tate. The Grand Jury, previously summoned was empaneled as follows:

D. C. Stovall, A. V. Patton, N. C. Moore, Charles Shaw, Clyde McCormick, D. V. St. Clair, B. M. Seales, J. A. Johnson, Tom Radney, Lonnie Arnold, W. M. Pool, Jr., Wm. S. F. Matthesen. Instructions as to their duty were given by the judge and they were immediately set to work under care of J. I. Bartley, deputy sheriff. Attorney Martin stated there were at least five cases reported to be given investigation.

The Petit Jury has been called to report next Monday. The panel is composed of the following:

D. W. Danielson, E. M. Gates, T. W. Watson, Bentley Gwyn, W. R. Adams, W. B. Wagon, J. L. Aup, John Angel, O. C. Kirk, W. H. Lindsey, J. W. Barber, J. D. Border, E. J. Calloway, L. D. Sanderson, R. L. Brooks, M. S. Childers, James Cox, A. J. Shafer, Arthur Bass, John W. Gunter, J. J. DeShazo, L. W. Edwards, Rufus Gilbreath, Chas. Phipps, Connie Gupton, Carl Hall, J. H. Bomar, Joe Pate, H. B. Mathis.

Both civil and criminal docket are said to be light this term, according to J. J. Williams, district clerk.

RUBY DELONG MATHEWS
Director of the home management supervisors for the Farm Security Administration in the West Texas area is Ruby Delong Mathews, formerly of San Angelo, now in the regional office in Amarillo. Under her direction, twenty-four women working with 2,500 families in the area have perceptibly raised the standards of the farming communities, for instance: 253,865 quarts of vegetables canned, 122,849 pounds of vegetables stored, 92,509 quarts of fruit stored, 1,376 record books kept in perfect order, 1,335,179 chickens raised.

Scholastic Census Shows 1,029 For School Next Yr.

That Bailey schools will have a total of 1,029 pupils for the coming school year, is the total shown following completion of the scholastic census and compilation made this week by Miss Elizabeth Herden. This number is 20 less than the total for last year, all districts throughout the county showing a lower number of pupils for the coming year, except Muleshoe district, which gained four scholastics.

By districts the enumeration is as follows:

Progress	111
Liberty	90
West Camp	111
Goodland	58
Baileyboro	105
Stegall	40
Watson	120
Fairview	129
Lingleview	112
Wilson	124
Circleback	147
Bula	215
Muleshoe	392

There are 22 negroes included in the total enumeration.

WALTON GIVES HEAVY METEORITE TO TECH

James K. Walton Jr., local biological representative and in charge of the Wild Life Game preserve in central Bailey county, has presented to the West Texas museum on Tech campus, Lubbock an Indian meteorite in a perfect state of preservation.

The type of stone of which this meteorite is composed is said not to be indigenous to this area and must have been brought in on the back of some Indians of the early day, according to D. T. C. Holden, museum curator. It is said the stone is too heavy for a man to have carried a great distance.

McDONALD OBSERVATORY BEING DEDICATED

McDonald observatory, located in the heart of Davis mountains, in southwest Texas, will be dedicated Friday of this week, more than 30 scientists, including those from five other nations being present to take part in the ceremony and the astronomical association meeting held in connection.

The telescope housed in this new observatory is of the refracting type, 8 inches in diameter and the second largest in the world. The field of universal observation is greatly widened with this new large instrument.

CO. COURT CALLED HERE MONDAY

The regular Spring term of County court was called Tuesday morning by Judge M. G. Miller, the petit jury reporting for the term, which will continue during this month. The docket is extremely light, the Judge said.

On the jury is Rufus Gilbreath, H. H. Carlyle, Buford Buits, Earl Ladd, A. A. Alexander, H. C. Holt, E. C. McWilliams, J. C. Moore, G. E. Layne, George Johnson, Ray Griffiths, Connie Gupton, Sam E. Fox, R. G. Jordan, Vance Wagon, and J. D. Border.

Too many would mend the world by shattering to pieces.

Construction Of Bailey Co. REA Is Ordered for 249 Miles Of Line; 60 Men In The Initial Crew

Work order of reconstruction of the Bailey County Electric Cooperative association was released Tuesday, according to Cecil McLaury, superintendent, and actual work of construction is expected to begin within the coming two weeks or as soon as material arrives.

J. E. Morgan & Son of Waco have the construction contract. W. T. Vogle is in charge of the project, and J. E. Latham will be superintendent of construction. The line will be 249 miles long, serving approximately 500 customers in Bailey, Lamb, Farmer and Castro counties. The south end of the line will be built first, McLaury said, and when ready for service, power will be furnished by the Texas-New Mexico Utilities Co.

It is now thought it will take about four months to completely do all construction work, however, it is anticipated as soon as the fourth line is finished power may be turned on that segment for customer use although McLaury did not know just how soon that would be. Electrical energy will be taken from the company's two Tocco plant located near Abernathy.

It is stated that about 60 men will be used at the beginning of construction work, and later on the force may have to be enlarged until it is practically doubled. The contractors have agreed to use all local labor practical. The contractor will maintain an office in the rear of the old Panhandle Lumber Co. yard on Main street.

Governor Calls Precinct Meetings For Soil Conservation Committees May 15; Dist. Meet Is May 22

AMARILLO, May 2.—Run-off water not only is taking a heavy toll in soil losses, but is also robbing the Southern Great Plains of millions of dollars annually in lost crop production, according to H. H. Finnell, regional director of the Soil Conservation Service.

Water can be controlled so soil erosion and flood dangers are reduced while crop yields are being increased, or it can be permitted to run off the land muddy with top soil in the form of silt and leaving gullies and reduced soil fertility in its wake, Finnell says.

Texas Panhandle farmers are realizing the value of controlling water and each year more and more farms are being cultivated on the contour, strengthened by terraces where necessary. Many thousands additional acres are being planted on the contour for the first time this year, the Soil Conservation Service reports.

Experience of farmers using soil and water conservation practices shows that rows planted on the contour or around the slope instead of up and down the hill reduce the cutting force of water, prevent gullying, lessen the chances of seeking being washed out of the ground, and give a more even distribution of moisture with the result that crop stands are more uniform and yields are greater.

Where fields are farmed continually up and down the slopes, crops often are washed out and most of the production comes from low spots where run-off water has accumulated. This rush of water down the slopes soon takes much of the rich topsoil from the hill sides and reduces the productivity of the land. Furthermore, water allowed to rush off a field speeds on its way downstream, often adding to damage caused by floods.

Gov. O'Daniel has ordered precinct conventions in each county of the state to be held May 15 to choose the precinct conservation board which will in turn select one of their number to attend the district meeting to be held May 22 at Plainview.

The district boards will name a state board member each, and the state board will hold its first meeting May 29 at Temple.

The soil conservation act will allow precinct majorities to adopt erosion control regulations and enforce them, according to Rep. Bailey Ragsdale of Crockett, the author. Farmers who fail to comply, and thereby cause damage on neighboring farms, may be forced to adopt conservation.

Texas farmers are expected to be aided by federal soil conservation experts.

Home Ec. Teacher And Girls Off To State Meet

Miss Oleta Moore, home economics teacher, Muleshoe High school, accompanied by a group of members from various Home Ec. classes, left Monday afternoon for Galveston to attend the Texas State Home-Making rally being held there this week, beginning Wednesday morning and continuing throughout Saturday.

About 4,000 girls and instructors from over the state are expected to attend this year, there being 3,500 present at the annual rally last year.

Survey On State Highway No. 214 Started Monday

R. H. Archibald, assistant state highway engineer, working under Geo. Garrett, district assistant engineer, Lubbock, is here this week making preliminary survey of an extension of State Highway No. 214 from the north edge of Muleshoe to Friona. He is assisted by Joe Cantrell and Geo. Gabriel.

R. L. Brown and A. P. Stone took the surveying crew out Monday morning, proper stakes for beginning of survey and got them started off properly.

The extension includes about 25 miles of this highway which was authorized some months ago by the State commission for Unit I improvement, which includes grades and drainage.

It is understood the new survey will follow approximately the road as it now runs, eliminating some of the four right-angle turns between Muleshoe and Friona. Contract for the improvement, it is thought will be let shortly after the survey has been completed, blue prints made and details compiled.

COUNTY PLAN GROUPS MEET HERE FRIDAY

The Land Use Planning committees of Bailey and Castro counties will meet in Muleshoe Friday, beginning at 10:00 a. m., under direction of Miss Lida Cooper, district home demonstration agent, and K. J. Edwards, district farm agent.

Committees of farm and home departments are expected to have full representations at the meeting, the purpose primarily being for laying plans for the coming year.

WATER TOWER GETS A NEW DRESS

The Muleshoe city water tower is this week being repainted by E. O. Patterson, painter from Lubbock. He is being assisted with the work by Keith Wiley.

Bailey Co. Fair Materializes For Fall

Plans for the Bailey County fair to be held this fall are gradually taking shape. At the Chamber of Commerce meeting last Friday Cecil H. Tate and E. R. Hart were appointed a committee to look after perfecting of the organization and obtaining charter for same.

Neil Rockey, W. M. McForsie, Finley White and Connie Gupton were named a committee on location and raising of necessary funds to finance the fair. It is understood they already have two or three locations in mind, and a considerable amount of money has already been promised in that direction.

Citizens throughout the county are being urged to begin looking forward to this fall exhibit of agriculture garden truck, livestock, etc., and as planting is done to give special attention to particular products they will desire to exhibit at the coming fair.

ROYAL ENTERTAINMENT FOR EASTERN STARS

Mrs. Zula Carlyle, worthy matron, local Eastern Star organization will entertain with a banquet in honor of past worthy matrons, patrons and present officers of the lodge, Thursday evening of this week.

The banquet will be served at the Harvey house in Clovis, N. M., and about 30 guests will attend, this being the highlight entertainment of the year.

35 4-H Club Girls Complete Goals Pins Awarded

Thirty-five beautiful pins, indicating required accomplishments completed by Bailey county 4-H club girls were awarded last week to girls in various parts of Bailey county, all of whom are greatly pleased with the achievement honor granted them. Their tasks were in the form of goals in planting plans, gardening, bedroom improvement, canning, etc., which they had completed. Those receiving the awards were:

- Bula—Geneva, Undyne and Maurine Berry, Juanita, Verne Dean and Hazel Weaver.
- West Camp—Jaunita, Bernice, Emma Lou, Ila Lee and Zelma Herrington; Juanita and Maxine Hughes; Emma Ruth Miller, Wilma Louise Snider, Peggy Williams.
- Progress—Edna Bell Stokes, Grace Chitwood, Loretta Truelock, Virginia Kennedy, Dorris Walker.
- Muleshoe—Alice Hickox, Dorothy Dell Deering, Pauline Garth, Mary Jane Hill, Helen Holt, Mary Frances Jordan, Juanita Farrell, Nina Mae Starkey.
- Fairview—Mildred Littrell, Edna Hines.
- Watson—Euly Mueller, Wilma Pearl Fine, Lovena Cook, Jane Key, Addie M. Forte.

DR. MEYERS SPEAKS TO THE P. T. A.

Members of the Muleshoe Parent-Teachers association held their last regular meeting of this school year at the high school auditorium Monday evening, there being approximately 75 in attendance.

Dr. Meyers of West Texas State college, Canyon was present and was the principal speaker of the evening. His theme was "The Forward March of Medicine," which was a very interesting and instructive talk.

Following a short business session new officers for the ensuing year were installed as follows: Mr. Lud Taylor, president; Mrs. C. D. Gupton, vice-president; J. Clyde Taylor, treasurer; Miss Oleta Moore, lawrence, secretary and Mrs. J. L. Aup, historian.

Mrs. Lud Taylor, the new president, gave a short talk in behalf of all new officers.

Immediately following closing of the meeting a social hour was held.

200 ACRES CASTOR BEANS IS PLANTED

Forty Bailey county farmers will plant a total of 200 acres of castor beans this spring, according to Finley White, county farm agent. The seed for such planting is now here. Some of this crop will be irrigated and some dry land farming.

Seed for the crop is furnished by the Myrick Investment Co., Lubbock, and the crop has already contracted for at 60 cents per bushel.

The yield is expected, under normal conditions, to run from 50 to 60 bushels per acre, though it has been known to yield much more than that figure.

Seed planted is known as the Brazilian variety, and has had one year's previous growth on the Plains

Dr. Aday Follows Dr. Gibbs As A Physician Here

Dr. L. P. Gibbs, practicing physician in Muleshoe for the past four years, has relinquished his practice here and, accompanied by Mrs. Gibbs, has moved to Lincoln, Arkansas, where they will spend the summer with their daughter and family.

The doctor stated before leaving he had "been on the job" steadily for several years past, and feels he has earned a good vacation, and he came to Clovis about three years ago and established the Aday Clinic in that city.

Dr. Aday is a graduate of the University of Arkansas Medical School at Little Rock and served his internship at the City hospital in Little Rock, after which he practiced very successfully in that city for several years before the western fever overtook him.

He served two terms as Coroner of Pulaski county, that state and is now a member of the Curry County Medical society, a member of the surgical staff, Clovis Memorial hospital, member Clovis Rotary club, also of the First Baptist church that city. He has a wife and two sons, one of whom is now attending a medical school in Los Angeles, California.

BIG CROWD ATTENDS 5th ANNUAL SING

There were a total of 520 music lovers and songsters attended the Fifth Sunday Singing held at Stegall last Sunday, according to actual count of A. L. Carpenter, organization president.

Aside from the fine music enjoyed during the session, an exceptional big dinner, delicious and of wide variety was spread at the noon hour, and with plenty left over for another feast of similar proportions for the supper period.

There were a large number of song leaders present and four quartets of singers from adjoining counties.

The next meeting will be held the fifth Sunday in July at Bula.

MULESHOE BOOSTED OVER RADIO

Following receipt of information relative to the progress and development of Muleshoe and surrounding area, KGNCO, Amarillo, will broadcast such information over the radio station to day, May 4, beginning promptly at 3:00 p. m. The public is invited to listen in.

RACER TURNS TURTLE DRIVERS ESCAPE

Earnest Magby escaped serious injuries Sunday afternoon when a racer car he was driving on a race track north of the depot overturned and rolled over him. The machine was completely demolished, but the driver and his companion escaped with only slight cuts and bruises.

CLUB GIRLS HEAR DISCUSSIONS

During the Muleshoe 4-H Girls club meeting last week there was a discussion regarding best ways of arranging bedrooms conducted by Miss Lillie Gentry, agent, the meeting being held at the High school building.

FAIRVIEW H. D. CLUB HAS NEW MEMBERS

The Fairview Home Demonstration club met with Mrs. Witherspoon April 25, with 17 present, two of whom were new members. Those in attendance were: Mesdames A. C. McNutt, J. H. Liston, A. C. Craig, Arthur Askew, W. A. Simmons, Walter Rector, Everett Wallace, Wayne Marlowe, Bert Mathis, J. C. Williams, N. Jolley, H. E. Schuster, Berta Miller, E. C. Gordon, O. B. Workman, A. A. Jordan, Mrs. Witherspoon, hostess.

We welcomed Mrs. Jordan and Mrs. Workman into our club. We know they will be a boon to the club and the club help to them.

Mrs. Marlowe was able to be with us, for which we were grateful. The club extends deepest sympathy to the Marlow family in the recent loss of an infant daughter.

Several members have made plans to attend Short Course at Lubbock, May 6. A car will be sent by the club, but those going must be prepared to pay for lunch. This is only 50 cents and will be a special treat to Short Course visitors.

Our council delegate, Mrs. Witherspoon, reports the finance committee is urging each club to try to raise \$5.00 for necessary expenses, literature and such to carry on the work.

Club adjourned and were served delicious punch and a two cake course by the hostess.—Reporter

O. E. S. ELECT OFFICERS IN TUESDAY MEETING

Tuesday evening the Eastern Star chapter met in regular session at the Masonic hall. Mrs. Finley White was accepted into the chapter on a transfer from another lodge. Misses Lucille Bartley and Jaunita Coker will be given the degrees of membership at a call meeting Monday, May 8, at which time the District Deputy Grand Matron is expected to be present.

A card from Miss Helen Jones, expressing her thanks for the flowers received from the lodge was read. A committee was instructed to draw up resolutions of respect to be mailed Mrs. Beulah Charles in regard to the death of her brother in California.

Officers for the ensuing year were elected, and names will be printed at a later date, when the incoming worthy matron has selected the appointive officers, the list will be complete.

Columbus' Appearance

Columbus, according to tradition, was of an engaging presence, tall, well formed and muscular, and of a dignified demeanor. His face was long, his nose aquiline, his eyes light gray and apt to kindly. His whole countenance had an air of authority. His hair was white at thirty years of age.

- Mrs. W. A. Burke of Muleshoe underwent a major operation in a Clovis, N. M., hospital last week. She was recovering nicely, according to last report.
- There will be only one more week of actual school work after Friday of this week in the Muleshoe schools. Final examinations will be given in the early part of the following week and closing school programs presented in the same week.
- Among lawyers attending District court in Muleshoe Monday were: E. A. Bills, and Harbert Martin, district attorney, Littlefield; J. E. Dryden, Sudan, J. D. Thomas, Sam Aldridge and E. F. Lokey of Farwell.
- Mrs. S. C. Beavers, Mrs. Bonnie Isaacs and Mrs. Pat R. Bobo were Clovis, N. M., visitors Saturday evening of last week. While there they visited Mrs. W. A. Burke of Muleshoe, who is recuperating from a major operation in a hospital there.
- The District court room in the Bailey county court house was last week completed of an interior decorating job that improved the appearance greatly. All walls and the ceiling were freshly painted and numerous other improving items were finished. The job was completed in time for District court which began Monday morning.
- Mr. and Mrs. Cap Needham spent the weekend at Childress visiting relatives and friends. They were accompanied on their return to Muleshoe Sunday afternoon by Mrs. W. H. Parsons who had been visiting in Childress for the past two weeks with her mother, Mrs. E. L. King who had been ill.
- Mr. and Mrs. A. J. Gardner attended a meeting of Panhandle-Peas postmaster held at Amarillo last Saturday night, the program including a banquet tendered these Junior Uncle Sams, at which time plans were laid for dedication of the new Post Office building at that city, which will be May 17, and at which Postmaster General Sam A. Farley will be the principal speaker.

Garlic-Parsley an Aid in HIGH BLOOD PRESSURE

Medical reports say that Garlic-Parsley concentrate has a double action in reducing high blood pressure. First, it tends to relax contracted arteries. Second, it checks or inhibits decomposition of waste matter in the blood, a contributory cause of high blood pressure. To get maximum benefit from garlic and parsley in odorous, tasteless form, ask for ALLIMIN. These tablets, used at regular intervals, aid in reducing blood pressure and relieving headache and dizziness caused by excessively high readings. To learn what raises your blood pressure and for medical treatment, consult your doctor. ALLIMIN is for sale by all druggists. \$1.50 Large box, 50c. Special economy size, \$1.00 for sale by Western Drug Co.

General News As Reported From Over The U. S.

Farmers of Castro county last week received 250 checks totaling \$87,762.

England has announced new taxes to meet its swollen appropriation budget, the armament tax amounting to \$6,177,600,000.

Five factories last week started work on construction of the first of 3,000 warplanes authorized by Congress.

A large painting of U. S. Senator Tom Connally, this state has been completed by Howard Chandler Christy, noted painter, and will be hung in the U. S. Senate chamber, Austin.

County Judge Lee Thompson of Farmer county sustained a broken arm last week when he stumbled over some liester wheels the children had left in the pathway and he did not see in the dark.

New York leaders predict an open battle between leading business groups and those political will start very shortly. Strategy for control of the Democratic party is already being worked out.

Senator Byrnes, South Carolina.

says he will press for enactment legislation ending the administration's discretionary power over distribution of relief funds and requiring the states to bear a fixed percentage of relief costs.

At the annual meeting of Odd Fellows held at Hereford last week, Border was chosen for the next annual meeting of the Panhandle association. C. M. Spencer, Amarillo, was named president. More than 300 IOOF's and Rebekahs attended.

The economy-minded Texas House of Representatives has trimmed the appropriation bill for state institutions to \$15,854,825, and still it is 12 per cent less than for the past two years, although enrollment has increased.

More than 646 million dollars of borrowed capital is employed by the Texas oil industry, according to a survey made by the Texas Mid-Continent Oil & Gas Association. Texas banks alone are carrying over 51 million dollars of such loans.

While finger-printing has long been in vogue concerning criminals, foot-printing has a coming style among co-eds at State university, Austin, more than 100 having already had their pedal extremities blue-printed. It is a means of testing foot health.

Fraud order is issued and alleged against one Jan Anderson, campaign manager of a concern said to be trying to put over a pension bill for old folks. He is accused of soliciting funds for such purpose. The charges may also involve postal complications. Later he was jailed on a contempt charge because he refused to appear before the House for questioning.

Grant, Sumner on the Outs
Ulysses S. Grant and Charles Sumner didn't like each other and seldom overlooked an opportunity to exchange verbal punches. Once when someone remarked that Sumner didn't believe in the Bible, Grant snapped: "No, I suppose not. He didn't write it."

Steel for Piano Strings
Wire made of carbon steel is used for piano strings. These have a tensile strength of 350,000 pounds per square inch.

Washington Snapshots by JAMES PRESTON

WAR

A three letter word—WAR—dominates the mail pouring in at the Capitol. And this is one subject on which there is no division of opinion. The American people don't want it.

In many cases it is perhaps the first letter some persons have ever written to a Representative or a Senator.

And it's the kind of mail to which Congress listens. Some in on scratch paper probably taken from a school tablet. But that makes no difference. Congressmen know it doesn't require expensive, gilt edged bond to make expressions of this kind stronger. The Secretary of one Senator estimates that of every four letters received—three are pleas against war.

This is the sentiment being conveyed to Washington. And this same sentiment is being expressed by prominent people as well. The size of the pocketbook makes no difference in the love for peace and hate for war.

Among these protests, those from businessmen are stronger than any. One prominent businessman, the president of the world's largest group of manufacturers, said recently:

"I want to make it perfectly plain that American industry has no stomach for war. The colossal expenditures on UNPRODUCTIVE armament, it is true, would give added employment and temporary stimulus to our prosperity, but at such a cost in human lives, suffering and DISLOCATION of our future economy as to be a tragic bargain indeed. We have learned by bitter experience that peace—NOT WAR—hath her victories for industry."

Best opinion in Washington is that as long as the sentiment against war continues to pour in from the people, America won't become involved even if war comes. Congressmen, like their constituents have sons. They don't want war either. And just as long as Congress knows their constituents are back of them, they won't vote for war.

And Washington is having additional troubles as a result of the European turmoil. In fact, it is downright embarrassing for some officials. Center of the new worry is the \$20,000,000 mosaic floor of the new multi-million dollar Post Office Department Building. The mosaic is a large map of the world.

When the floor was laid about 4 years ago, Austria, Albania and Czechoslovakia were countries in Europe. Today they are only memories of mapmakers. The mosaic, however, is a map that can not be altered. Austria, Albania and Czech-

THE POCKETBOOK OF KNOWLEDGE BY TOPPS

IN THE LAST 60 YEARS—

- FACTORY WAGES INCREASED 2 1/2 TIMES
- VALUE OF GOODS PRODUCED INCREASED 11 TIMES
- POPULATION INCREASED ONLY 2 1/2 TIMES
- FACTORY JOBS INCREASED 3 TIMES

WHILE IN THE LAST 60 YEARS POPULATION OF THE U.S. HAS INCREASED ONLY 2 1/2 TIMES, FACTORY WAGES INCREASED 11 TIMES, FACTORY JOBS INCREASED 3 TIMES AND VALUE OF GOODS PRODUCED 11 TIMES.

TAKES PAID LAST YEAR BY A LARGE TELEPHONE COMPANY COULDED \$3.35 FOR EVERY INSTRUMENT IN SERVICE, OR AN INCREASE OF 55% IN 3 YEARS!

PLANT Paymaster COTTON

The Only Cotton Being Bred on the Plains that Is Ginned on a Strictly One Variety Gin

10 Quick Facts About PAYMASTER Cotton

- Early maturing**—Exceptionally heavy poundage on first picking. The Plains country has the shortest growing season in the cotton belt—an annual average of only 198 frost-free days.
- Long staple**—Between 15-16 inch to inch and better—depending on moisture and soil fertility.
- Exceptional lint turnout**—38.3 per cent on the first 100 bales picked in 1938 and 30.6 per cent on "snaps" on first 100 bales harvested in 1938—a high figure for staple cotton.
- Fiber**—A hard fiber of good spinning qualities.
- Big boll**—Average 50 to 60 per pound and over 90 per cent are five-lock.
- Drought-resistant**—A deep rooting hearty plant that stands up well under adverse growing conditions.
- Heavy yield**—A high pounds-per-acre return that spells extra dollars per field per season.
- A strong open stalk of medium height**—with light foliage which allows sunlight to hasten maturity on lower branches.
- Priced** at moderate cost.
- A home product for home need**—At last, the South Plains has a proven strain of cotton especially bred to fit its particular needs.

Editorial

Every Great Attempt is Glorious Even if It Fails

THE AMERICAN'S CREED

By WILLIAM TYLER PAGE

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign nation of many sovereign states; a perfect union, one and inseparable; established upon the principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.
I, therefore, believe it is my duty to my country to love it, to support its constitution; to obey its laws, to respect its flag and to defend it against all enemies."

THE DOGWOOD LEGEND

+++++
The states that advertise to the tourist their added scenic beauty during the months of blossoming dogwood, may be unaware of the lovely legend of the dogwood. A tree expert unearthed this story and we like to recall it.
The dogwood has been known for centuries and the history of it reaches back to Christ's time. Due to the hardness of its wood it was chosen for use in the cross at the crucifixion, the story goes. The dogwood was saddened to be used for such a purpose and the Savior, seeing his distress promised: "Henceforth shall the dogwood grow large enough to be used for a cross. It shall be slender and bent and twisted, and its blossoms shall be in the form of a cross with two long and two short petals. In the center of the outer edge of each petal there shall be small prisms, brown with rust and stained with blood. The center of the flower will be a crown of thorns. All those who see it will remember it as the dogwood that I was crucified on and his tree shall not be mutilated or destroyed, but cherished and protected as a reminder of my agony and death upon the cross."
It is just a legend and history does not back it perhaps, but it is a beautiful way of explaining the markings of the flower and our Journal readers will like it.
+++++

IT IS HERE AGAIN

+++++
The pates are getting a dusting, the whisk-broom brushes off the pitcher's box as throughout the land the small towns organize their baseball nines and the larger towns make their grandstands ready for another season of strikes, hits, runs and a sprinkling of errors. This last is done to make the game more human!
Where is there a home that a radio doesn't roar to the day's baseball scores to many a receptive ear. Baseball scores are always turned up loudly so near and far can hear. Many a fork pauses in journey to mouth until final scores are digested by ardent fans. Everyone must hush, quiet must reign throughout the house—it is score time. The day has passed when this was purely a man's game. Today many feminine voices join in the call to "play ball," and if you think a man can razz a team, just listen to some woman tell a gentleman of the diamond how to improve himself and the game. You should hear it.
There is much fun in all villages with their various Cseays coming to bat and America throws off the fear of guns for the pleasure of bats and balls. It is going to be a good season, so let's play ball!
+++++

REVERSE PROGRESS

+++++
For a half-dozen years the recovery theory practiced in Washington

has been based on an analogy between the national economy and a hand pump. That theory has been that if a hand pump can be made to work by priming it with water, the national economy can be made to function by priming it with dollars.
From the beginning of this experiment with the national economy, learned economists have warned that although priming might work on a hand pump, it could not be made to pump recovery out of the well.
And even the failure of the theory in these six years has not convinced (apparently) the experimenters that the analogy is a false one. They are still pouring billions into the economy pump with no more show of concern than a farmer pouring a bucket of water into a hand pump.
And what have been the rewards of the priming theory? It is the reality that anyone has bothered to count the gallons of water pumped by a primed hand pump, but the National Industrial Conference Board has published these figures after a study of the primed economy pump: For every \$3 poured into the pump, only \$2 has been returned.
During 1934-38, inclusive, this study finds, the administration has increased the national debt by \$14,000,000,000. Those billions have gone for pump priming. But instead of causing a vast increase in the national income which, according to these spend-or-way-out-of-debt advocates, should have resulted, the income was only \$9,000,000,000.
That is what a fisherman might call "catching a two-pound fish, using a three-pound fish for bait!"
+++++

NO BACKGROUND?

+++++
Whenever you hear someone boast of their pet's pedigree and its fancy forebears, you sort of feel sorry for the mutt that just grew up for no reason. Now consider the English non-pedigree cow who has beaten the world's milk yield for 29 days short of a year. The amount was 38,648 pounds of milk—and no pedigree!
This cow, a little red one named "Cherry," is between eight and nine years old. She has had five calves and the owner of Cherry hopes one of the new babies will live to break a record. Then someone will pop up with a song of pedigree and Cherry will feel called upon to produce ancestors from the Mayflower, and spoil the whole thing.
+++++

THEY SUGGEST!

+++++
Bless science, we will get it yet! They inform us that the world is yearning for a genius to discover a process of extracting honey and sugar from flowers instead of leaving it to the bees. We are in need of a process to extract milk and butterfat from foods as are given to cows. They suggest we can use an auto that will skim over snow drifts and ride waves. The next of collecting and storing electricity

SNAP SHOTS

+++++
Plenty of folks could become wiser if they didn't already think they had wisdom.

from lightning and a power axe for chopping down trees, are a couple of "must haves" for us moderns. The idea of a fabricated seat for farm machines, instead of the metal ones which are not so pleasant on cold and wet days, isn't such a bad idea.
What next—?

Jaunty Journalettes

Some Muleshoe men figure that the perfect wife is the one who also knows how to change a tire.
The real farm problem around Muleshoe is how to put the farm surplus into the farm pocketbook.
Don't forget that the files around Muleshoe you failed to sweat in April will live to have a million descendants before August.
Have you ever noticed how much more of a fool a Muleshoe fellow can make of himself when he is before an audience.
The rising generation in Muleshoe may not do much worrying now; but it will make up for it when the next rising generation appears on the scene.
Loyalty is a fine thing and we admire every Muleshoe man who sticks to it; but first better be sure you are picking out the right thing to be loyal to.
There are plenty of Muleshoe folks who go to the post office to buy stamps; but we have yet to hear of the first one who went there just to get to use the new pen.
One thing we have never been able to understand is how a Muleshoe girl works in a restaurant feeding men all day long, can ever get up courage enough to marry one of them.
The old-fashioned Muleshoe wife who was good at baking bread, stewing applesauce and frying doughnuts, now has a daughter whose chief culinary recipe is roasting a husband.
With culture rapidly increasing in Muleshoe, we have just about reached the state when our citizens will be judged socially by whether they call it "perspiration" or just refer to it as "sweat."
A Muleshoe mother called her daughter's hand the other day, saying, "Why daughter, I saw you deliberately put your arms around that young man's neck and kiss him." "Well," replied the non-chagrined young lady, "He had to have it somehow, and he is too honest to steal and too proud to beg."
+++++

Tuberculosis Drops To Seventh In Disease Rank

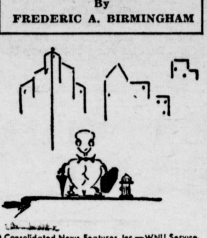

AUSTIN, MAY 2.—"Tuberculosis no longer ranks first among the major killing diseases—a position it formerly occupied not only in Texas but in the entire country. However, despite its now being seventh on the list in 1938, it continues to kill more persons between 15 and 45 years of age than does any other single disease. This is in the face of definite evidence that the majority of tuberculosis patients can be cured if the condition is detected early and proper treatment and living rules maintained," states Dr. Geo. W. Cox, state health officer.
"While the treatment of the individual early case is of great importance it is of even greater moment, from a public health point of view, that the spread of infection to others be prevented. Such prevention is possible. A more concerted attack on this front would mean the saving of thousands of lives."
In every case, when a diagnosis of active tuberculosis has been made, an investigation of the physical condition of the other members of the family should follow. It cannot be too emphatically stated that tuberculosis runs in families solely because it is communicable, the disease being usually transmitted through intimate and prolonged exposure to the 'open' case.
"It has been estimated that 40 per cent of the tuberculosis cases that will develop within the next decade will be the result of close contact with others already infected."
"Routine examination of all high school children, isolation or hospitalization of the active case, discovery of the sources of infection, application of hygienic living principles, periodic examination for all adults, and a careful check-up by physicians and trained workers of all known active cases and contacts represent an invaluable defense against the spread of tuberculosis."

Home of Scientific Nursing

Great Britain is the home of scientific nursing, opening the first training school in 1850. It was the home of Florence Nightingale, noted nurse. Though an age-old profession, nursing proved little better in the United States. Our first school began classes in 1863.

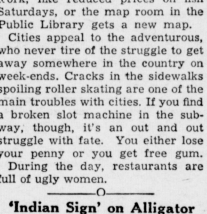

Terry Pin's Tips on CITIES

By FREDERIC A. BIRMINGHAM

In cities, traffic and automobiles come roaring along like a mighty wave from the sea, except that they have no sea-weed, of course, and very seldom turn a star fish upside-down. A lot of people like the shore better than the mountains, probably on account of frozen custard.
A great city like New York is a beehive of activity. If you'll just leave them alone they'll go away without stinging you. Something exciting is always happening in New York, like reduced prices on fish Saturdays, or the map room in the Public Library gets a new map.
Cities appeal to the adventurous, who never tire of the struggle to get away somewhere in the country on week-ends. Cracks in the sidewalks spoiling roller skating are one of the main troubles with cities. If you find a broken slot machine in the subway, though, it's an out and out struggle with fate. You either lose your penny or you get free gum.
During the day, restaurants are full of ugly women.

The new Gas Range thinks for themselves with heat control, temperature signal, minute minders.
Result? You can create, with assured success, cooking and baking triumphs such as you never dared attempt before.
Visit your dealer and see the many handsome new models. You'll be amazed at what they can do—you'll love their beauty.
WEST TEXAS GAS COMPANY
+++++

THERE MUST BE A REASON WHY Electric Cookery IS SO POPULAR

Since electric cookery is designed for women who do their own cooking and cannot afford extra help in the kitchen, electric cookery has to be economical—not only in cost, but to operate. It gives them many hours of leisure while meals cook themselves. Positive baking becomes a pleasure—in spite of the outside temperature. Actually your kitchen is just as cool, clean, and comfortable as your living room.
The popularity of electric cookery is highlighted by many other advantages, too. See the gleaming new ranges on display—and you'll learn why electric cookery is better.
+++++

This \$23.95 set of Aluminum Ware is offered for your old range on the purchase of a new electric range. See this set and the new range today. This offer definitely expires April 29.

Texas-New Mexico Utilities Company

WEEKLY LAY SERMON
WISDOM vs. WEALTH

By JESS MITCHELL

Everywhere there are people trying to get rich. Not that the most of us do not need more of this world's goods; but the wrong comes in their excessive accumulation. I long ago decided no one ought to have any more worldly wealth than was needed for their present comfort and future care when they finally become too old for active work and had to be laid upon the shelf of retirement. I have always been thankful I did not possess that avaricious nature and desire for excessive accumulation.

King Solomon spoke a whole mouthful several centuries ago when he declared "wisdom is better than rubies," and, while there was much in his life I do not approve, yet I heartily agree with him in that statement. It was undoubtedly a wise utterance, and, having much of both wealth and wisdom, I think he was in position to become a competent judge of their relative values. There are plenty of imitation gems in the world—plenty of counterfeit rubies, sometimes requiring the examination of an expert to detect their forgery; but so far as I know the genuine ruby is found only in the province of Burmah, India.

That particular mine is owned and operated under state supervision. Foreigners are seldom admitted to observe it, and when an especially large and scintillating ruby is discovered there is always a great ceremony and mighty jubilation attending its exhibition.

In this country the diamond has become the most popular known jewel, and there are few people today who know that the rose diamond is far more valuable than the white ones, or that real rubies are still more valuable than any diamonds; yet such is the case. No matter the size of a genuine ruby of perfect coloring and composition, its market value is invariably about ten times as much as a diamond of similar weight and size. In its compressed lightnings is multi-brilliance, its electric scintillations, its flashing prisms of resplendent luminosity it sometimes reminds one of petrified blood, frozen fire or congealed drops of flaming sunset, yet withal, there is nothing in this world more valuable than wisdom.

Realizing somewhat my own mental deficiency, I have always had an inordinate craving for greater wisdom. There are so many things in

Life I would like to undertake, but I realize my unpreparedness and inability. I have never been much of a social fiend, and when my day's labor is done my greatest enjoyment is to spend the evening hours in my own library surrounded by several thousand books with which I commune as my dearest and most steadfast friends. I have always appreciated wisdom in any of its manifestations. I like to associate and hold converse with those wiser than myself. Such affiliation brings to my own soul a wonderful inspiration.

In my study of wisdom, its manifestation and influence upon the possessor and others, I long ago came to realize it is the greatest adjunct, the most helpful concomitant, the most desirable concomitant, one can possess for success in this life, for true wisdom is not only mental; but parades of spiritual impetus and perfection, as well. When the sun of prosperity rides high in the zenith of one's life; when everything is favorable to fortune, health and prestige, wisdom lends a zest and exuberant satisfaction impossible in any other cultural attainment, and, when the sun of misfortune has set upon one's career, when the thick shadows of pain, the gloom of accident or sickness descends; when poverty or persecution or misrepresentation; when physical exhaustion seizes upon one, there is always a quickening and overcoming sense of satisfaction in the mental and spiritual wisdom one possesses. It is said that rubies are always more brilliant under the reflection of attenuating light at night time than they are by day, and it is the experience of many that the wisdom they have learned, the spiritual attainments they have achieved are always the more highly prized when the sun of success has set and the night of trouble come on.

It may sound somewhat like a statement of diametrical opposition, nevertheless it is a proven fact that the fires of trouble are a wonderful medium of purification, glorification and accentuation toward infinity. The man who is a real man can and will always grow bigger and stronger under difficulties and persecution. There is just naturally something in maladjustment and misfortune that tempers his mind and enlarges his capacity of soul, notwithstanding abuse. It is amid difficulties that the heroic stuff of which one is made shows itself.

Solomon was certainly right in his statement that "wisdom is better than rubies." I am well convinced wisdom is worth all the labor it takes to obtain it, and it is an acquirement which can never be destroyed; for it is my personal steadfast belief that the development of mental faculties are as immortal as those of a spiritual kind. It is the possession of facts, not things, that count for the most in this life and the life hereafter. No doubt about that! No matter how fine a home one may possess, how beautiful the furnishings, how swift the automobile, how fashionable the wardrobe, none of the material and temporal things can ever compare with the mental endowments and spiritual gains of the soul. My generally quite fluent vocabulary would have to elucidate in contrasts rather than in comparisons to explain the difference, minimizing the one in derisive manner, while magnifying the other in maximum superlatives.

The deep examine of the ruby suggests sacrifice, a much misunderstood word. Sacrifice is a common thing in this life; but so often misinterpreted. Much of today's so-called sacrifice is not real. It is only the manifest desire of some one to do without some particular thing in order to obtain something of more value or greater satisfaction. Real sacrifices come by accident, not by deliberate action. Mark that well! The architect of the great suspension bridge between Brooklyn and New York sacrificed his life for its completion, not premeditatedly; but by accident. Sixty human bodies are buried in the concrete of that massive Boulder dam in Nevada, a sacrifice to its erection, not by deliberate action, but all through accident. Tabulate the statistics of the thousands of mothers who have lost their lives in caring for their sick loved ones. True, they were sacrifices that these loved ones might live; but their deaths were inadvertent rather than deliberate. To sacrifice is to consecrate; to surrender something that something else of greater worth or higher merit may be attained—in all cases it is to give up something already possessed to obtain something more desired or of greater value. Sacrifice does not necessarily indicate unselfishness, for in practically every instance it is fundamentally a selfish motive prompting it. It invariably indicates a present deprivation for a future gain either for one's self or another in whom the sacrificer is greatly interested. I very much doubt if there ever is any sacrifice that does not contain the element of gain in the action.

Even the sacrifice of Jesus of Nazareth on Golgotha's hill near Jerusalem was one for principles. He gave his life that his example and teachings might remain a benefit to his people and to the future generations of all nations who believed in him. His crucifixion was purely incidental. I do not believe it was any act of forethought of God. His life was such. It was a revela-

Typhoid Fever As Preventable May Be Wiped Out

Austin, May 3.—The control of typhoid fever in the United States represents an outstanding achievement in preventive medicine. In 1900 the national death rate from this disease was 31.3 per 100,000 population. Today the rate is 2.1 nationally, but 6.5 in Texas. This marked decrease in typhoid's killing power is based on knowledge of its cause, how it is spread, and the application of scientific control measures, states Dr. Geo. W. Cox, state health officer.

Today no other disease is more vulnerable to scientific attack than typhoid. Indeed, it is no exaggeration to say that, from a public health viewpoint, there should be no typhoid fever.

"Typhoid fever is caused by a germ. The organisms are found only in the excreta of persons suffering from it, or in those of carriers, the latter being persons who harbor the germ but are not ill. It is very possible to prevent people from becoming infected with germs coming from these sources, typhoid would cease to be a problem.

"In cities and towns, thanks to safe water and milk supplies, adequate sewage facilities, and compulsory sanitation, typhoid has been almost eliminated. Unfortunately, sanitary and environmental protection on a community basis cannot be offered to those living in rural areas. While control methods are the same for both city and country, in rural districts it is essential that not only public health officials but the householder become personally interested in them if they are to be effective," Dr. Cox warned.

"If every rural dweller in Texas realizes his personal obligation in the anti-typhoid campaign and conscientiously took the necessary precautions the typhoid rate in Texas eventually would come close to the vanishing point it is an attainable objective. Personal cooperation in eliminating hazards and wide-spread typhoid immunizations are the key.

tion of God himself to his creatures for their eternal welfare. Entirely too much is made of the bloody sacrifice of Christ. His shedding of blood was purely incidental, a result of the method employed in his death. The fact that was positively outstanding, supreme in his death and supereminently transcendent in his sacrifice was the culmination of his divine life on earth in behalf of all humanity for both city and country upon him as the great example of life and living necessary for future felicity with the Creator. Christ not only had no descendants, he also had no counterpart, nor equal. He is the "one name given under heaven to whom men should give glory and praise to know God himself. The uplifted grandeur, glory, love and sympathy; the magnificent teaching and example; the unparalleled character he manifested lifts him up above all other wise men into the realm of the incomparable.

"Yes, Solomon was exactly right, 'wisdom is better than rubies.' I never owned a jewel in my life. I have often admired them as the property of others; but I never was the possessor of any precious stone. I have often admired them as the property of others; but I never was the possessor of any precious stone. I have admired the coral broken from off the ocean reef. Whether white, light blue or a dainty pink, it carries an iridescence truly fascinating. I have admired the sparkling diamond catching in its prisms all the scintillating rays of the rainbow, and it has always been difficult for me to realize that beautiful stone was simply a superior mineral lump of coal. I have admired the opal for its changeable, blushing beauty. The turquoise gathers the colors of the skies to its bosom and refracts them in wondrous loveliness, and the dark red of the ruby is a rubescence no other stone can even imitate; yet if I owned a sample or even many of all of them, I would gladly exchange them, one and all, for greater wisdom and increased spiritual understanding. These are jewels that will fit me for more enjoyable living in both the here and the hereafter, and I happen to be living for two worlds.

MULESHOE STUDY CLUB STUDY GARDENING

The Muleshoe Study club met Thursday evening of last week in the home of Mrs. A. E. Lewis. The subject of the program was "Gardening in Our Town," led by Mrs. Janette Wagoner. The roll call was a picture of a flower.

The program as follows was one of the most interesting of the year. Soil Analysis, Mrs. Mary E. Hart, House Plants, Mrs. Mickey Lewis, Flowers and Shrubs for this Climate and Soil, Mrs. Jackie Tate, Foundation Planting, Mrs. Elizabeth Gardner.

A Border Plan for Continuous Bloom, Mrs. Dee Walton.

The president appointed a library board consisting of Mrs. Jon Holland, Mrs. Lois Lenuu, and Mrs. Mickey Lewis, to serve with a library board from the 1939 Study club.

At the conclusion of the business meeting, the hostess served tasty refreshments. All members were present.

One swallow will eat 3,000 to 4,000 mosquitoes a day.

A hand-woven silk carpet, threaded with silver and gold, intended by the people of Kashmir as their coronation gift to the Duke of Windsor, has been offered for sale in London because it hardly seemed tactful to present it to George VI.

WATKINS FLY SPRAY SAVES!

FARMERS and Dairymen prefer Watkins Fly Spray because it kills flies and lice, repels stable, horn and house flies during milking, leaves stock clean and comfortable, goes farther than many sprays, and will not taint the milk. When sprayed before milking, cows will be quiet, relax and give down their milk.

Stainless and Sweet Smelling

It can be used in the home for killing flies, mosquitoes, ants, roaches, moths, bedbugs, etc. Its use means much in comfort and sanitation, and for stock use it is economy-saver. Insects sucking blood from Cows makes it necessary to give them more feed and such deprivations mean less milk.

MERCEDES REY
Leading lady with Brunk's Comedians, taking important parts in plays to be presented here next week

Brunk's Comedians Come To Muleshoe Next Monday

Henry L. Brunk's Comedians will be in Muleshoe for one whole week commencing Monday, May 8, under auspices of the Fire department. A good line of plays has been selected and special scenery has been purchased to give proper background for each and every night's show. The cast has been so carefully selected that audiences are assured of seeing a series of interesting performances.

The initial play will be "The Gang Buster," which is an entertaining comedy drama, and will give each performer a selected part. Other plays for the week will be "Jed the Country Jitterbug," "Lavender and Old Lace."

There is a variety of vaudeville numbers, which include Dell and Florence Phillips, Buddy Brown, Michael Thornton, Amber Wright, Ralph Blackwell, Lloyd Gilbert and special musical settings by Klinik Lemon's orchestra.

The show starts each night at 8:00 p. m. and the entire program will be changed each night.

Giraffe's Vertebrae

In spite of its extraordinary length, the neck of the giraffe contains only the usual number of seven vertebrae as in nearly all mammals.

FARM TOPICS

PASTURE OUTRANKS DRY LOT FEEDING

Plan Saves Labor, Machinery Costs, Grain and Hay.

By E. T. Robbins, Live Stock Extension Specialist, University of Illinois.

Live stock makes no labor charges for gathering grass. In addition to saving labor and machinery costs as well as grain and hay, pasture agrees with any stock better than dry lot feeding. This fact makes pastures pay even on tillable land that might produce more meat to the acre if grain were grown there and fed to live stock.

However, many pastures serve only as a location for the stock and a poor location at that. Grass is scattered and short, there are no trees and water is some distance from the lane.

Animals on such pastures work hard to gather enough short blades of grass to satisfy them until another day. They do not thrive, give much milk or get fat. More land in pasture, better land in pasture or both would provide the same amount of live stock with a good living and a surplus, easily and quickly secured.

Many pastures are injured by too early grazing in the spring. On well-grown pastures the stock can get an easy mouthful and a quick fill. The final result is faster gains and more meat made an acre.

A number of successful stockmen on prairie land are using a four-year rotation of corn, corn, small grain and mixed clovers, alfalfa and grass for pasture and hay. Most permanent pastures are started by sowing clovers, timothy and blue-grass. Many farms have one field at a time in alfalfa for one or more years.

To avoid bloat in cattle on alfalfa or other legume pasture, this plan is suggested: First, get the stock accustomed to grass pasture. Second, when the animals are full of grass, turn them into the alfalfa pasture. Third, leave them on the alfalfa pasture continuously day and night, rain or shine. Fourth, have water and salt always handy in the pasture.

Grass in a pasture mixture or dry roughage such as a straw stack in a field helps to prevent bloat.

Insect Outbreaks Can Be Forecast With Accuracy

Reliably forecasting the location and extent of insect outbreaks is a relatively new achievement. Based on their predictions on county surveys made in co-operation with entomologists in the various states, the Department of Agriculture entomologists can determine where outbreaks are likely to occur if weather conditions are favorable to the insects.

Experienced workers determine the comparative numbers of eggs laid or insects hibernating in the counties where crop-destroying insects were observed the previous season. "Knowing exactly what stages of the various kinds of insects to look for, and where to look for them," says Lee A. Strong, chief of the bureau of entomology and plant quarantine, "helps greatly to simplify their job."

According to this year's forecast, midwestern farmers may expect a grasshopper plague, the severest infestation being expected in the central and eastern part of the Dakotas, over most of Iowa, and in eastern Wyoming. The survey also indicates that mormon cricket eggs are numerous in northern Nevada, the hessian fly has been found in some early seeded wheat in Missouri, southeastern Kansas, parts of Indiana and Ohio, and eastern Pennsylvania, and the squash bug seems to be more numerous than usual in Minnesota and Iowa.

Dried Egg Whites

Until recently white foam was a waste by-product of the egg-drying industry, but now it is converted into dried egg white as a result of a new process, says the Indiana Farmer's Guide. The foam may total as much as 25 gallons in a 500-gallon fermenting tank in which the egg whites are thinned into a watery liquid for drying. Dried egg white is used principally in the food industries, such as bakery products and confections, but large quantities are also used as sizing on paper, textiles, leather, fur, body for arguments in special varnishes, adhesives for bottle caps, fold leaf, as an emulsifying agent in alum tanning of light leathers, in pharmaceutical preparations, and as a clarifying agent for wines and beer.

Truing a Grindstone

Even with the best of care, the grindstone will become uneven in time. A easy way to true it, according to Wallace's Farmer, is to take a quarter-inch soft-iron round rod and place it close to the stone on a level with the center of the stone edge. The rod will cut away the high bumps and leave the stone round and true. The stone will cut best when dry. Large power stones in machine shops are frequently trued up in this manner.

New Bait and Fly Casting Game May Rival "Skeet" in Popularity

WITH AN ESTIMATED total of 12,000,000 anglers in the country, "Fish-O", a new accuracy game just introduced for fly-fishermen and bait-casters is expected soon to rival "skeet" in popularity. Sponsored by the American Wildlife Institute and the Isaak Walton League of America, it may be played both indoors and out. An enthusiastic booster of the sport, because it simulates actual conditions and rules out special equipment, Tony Accetta (center), U. S. professional all-around bait- and fly-casting champion and star of "Let's Go Fishing", new 2-reel sound motion picture being distributed by the Fisher Body division of General Motors, explains the fundamentals of the fly-casting

game to Dr. Charles A. Wilson, president of the American Camping Association, at the Michigan Sportsmen's and Boat Show in Detroit, while little Larry Baus Long awaits an opportunity of playing his first game of "Fish-O" as developed for bait-casters. The 4 1/2-year-old boy, grandson of the hunting and fishing editor of the Indianapolis Star, shows exceptional ability with the rod and reel as evidenced by the fact that he appeared on the same program with the champion. Hollow metal rings, or bicycle tires, placed at unknown distances from the caster form the targets used in both games. They are scattered from 20 to 40 feet away for fly-casting, and from 40 to 80 feet for bait-casting.

THE NEW ROPER GAS RANGE IS HERE

Amazing New Features Mean Much to You in Terms of Time and Money Saved . . . Full-Flavor Meals Easily Prepared
There's a decidedly worthwhile story associated with these brilliant new Roper Gas Ranges. They are not just ordinary ranges—not ordinary in any sense of the word. They are truly far superior.
To begin with, they are styled in key with the modern tempo. Sleek stream-lined beauties, they fit in with other modern kitchen units and at the same time reflect an individuality that sets them apart.
An excellent assortment can now be seen on the display floor of this company. They are in keeping with our policy of offering the finest appliances available—at prices representing unusual values.
See the new Roper Gas Ranges. Do it soon. Whether or not you are planning to buy a new range at once, look them over. You'll be thrilled to learn about the marvelous advancements in cooking.
THE ROPER FOR COOKING PERFECTION
Many of the new Roper models carry the C.P. seal. C.P. means Certified Performance. This seal can be placed only on ranges fully meeting 22 rigid specifications established by the American Gas Association. The new C.P. Roper represents the ultimate in a cooking appliance.

SENIOR CLASS WILL GIVE PLAY MAY 11
Members of the Senior Class, Muleshoe High school, will present a drama, "Big Brother," at the high school auditorium, Thursday evening, May 11, beginning at 8:15 o'clock.
The cast and students who will play various parts are: Mrs. Crewe, Wilma Atchinson; John Crewe, Wallace Solomon; Lyle Crewe, Leamon Carpenter; Hortense Morton, Dorothy Terrell; Sydney Chalmers, Alfred Coward; Jeanette Laird, Dorothy Mae Schuster; Mr. Morton, Bill Black, and Alice Mehrens, Joe Beth Solomon.
Prof. W. L. Crow is directing the drama, and the public in general is cordially invited to attend.
NELSON WOULD STOP LOOPHOLE ESCAPES
Senator G. H. Nelson, this district, last week attacked on the Senate floor, a bill which would have liberalized pardons and paroles, and through his efforts, final passage of the legislation, sponsored by Senator Burns, was deferred.
Senator Nelson, formerly district attorney from the South Plains Section, called the attention of the Senate to the importance of eliminating any loop holes in the laws, whereby murderers and other major criminals might go unpunished.
LOCAL DRAMATICS ON THE AIR
Members of the Dramatic club, Muleshoe High school, presented the third in a series of radio broadcasts over station KICA, Clovis, N. M., Wednesday at 6:00 p. m.
Prof. W. L. Crow directed the program entitled, "Interview With The Past."
Characters and the parts they played were: Prof. C. L. Sone, Benjamin Franklin; Paul Gardner, Ted; W. H. Awtrey, Jack; Frances Border Betty; Helen Sharp, Doris.
RABBIT DRIVE FRIDAY LAZBUDDY REGION
A rabbit drive is announced to be held in and around the Lazbuddy community, Friday of this week beginning promptly at 9:00 o'clock a. m.
A feature of the drive will be a big free barbecue to be held at the E. B. Whitefield place about 15 miles north of Lazbuddy.
It is stated ammunition will be for sale on the grounds, and everyone is invited to attend.
Enemies and Friends
"A few friends," said Hi Ho, the sage of Chinatown, "are true and many enemies are only imaginary."

THE ADAY CLINIC, CLOVIS, N. M.

DR. LAWSON C. ADAY, physician and surgeon of Clovis, N. M., and operator of the Aday Clinic in that city, announces the opening of offices in Muleshoe, being the offices formerly occupied by Dr. L. F. Gibbs in the Damon Drug Store, who is leaving his practice referring it to Dr. Aday who, in the future will maintain his Clinic at Clovis, spending half time in Muleshoe.
Office hours in Muleshoe will, for the present, be in the forenoon. Dr. Aday has also equipped rooms over the Western Drug Store, in offices formerly occupied by Dr. H. E. Williams, for an operating room and a room where he will be able to take care of maternity cases and tonsil operations.
A PERSONAL MESSAGE TO THE PEOPLE OF MULESHOE AND BAILEY COUNTY!
Due to the fact that Clovis now has a fine new hospital, I feel the people of Muleshoe and surrounding area may be better served by coming to Clovis for their hospital services, and realizing this fact, I have decided to give half of my time to this community, and thus carry my major surgery cases to Clovis, where I can serve you better.—Sincerely yours,
LAWSON C. ADAY, M. D.
Muleshoe, Texas
Clovis, N. M.

The Tower of London
The Tower of London is a relic looking back upon nearly the full length of England's history. It is rich in continuous associations. As a royal palace it outdates the Kremlin in Moscow, the Doge's palace in Venice, the ancient Seraglio in Stamboul, and the Louvre in Paris. The White tower, from which the castle derives its name, was built by William the Conqueror of Normandy. The work was begun in the year 1073. The tower rises to a height of 90 feet and its walls are from 12 to 15 feet thick. The four sides are of different lengths, and there is not a corner angle which a careful surveyor would pass as correct.

Naming the Narcissus
Narcissus was named for Narcissus of the Ancients, who won the love of Echo but did not love her in return. She, of course, faded to a voice. Narcissus used to lie upon the brink of the stream looking at his own reflection. He finally wasted away and died. Nymphs came to remove his body and found only poet's narcissus. The Greeks believe that, if narcissi are placed on coffins madness will result.

Buy At Home!

Home Atmosphere

By **KARIN SUNDEL**
© McClure Newspaper Syndicate. WNU Service.

LEIGH HIGGINS had not been 10 minutes at Pine Crest before its home atmosphere was impressed most forcibly upon his senses. Leigh was a hotel man. He had been born in a hotel, had always lived in one, and expected to die in one. He was accustomed to having at his beck and call porters, bell hops and maids. In fact, the whole hotel force always paid him homage the minute they heard his name, for Leigh Higgins was known as the richest man this side of the Atlantic.

His doctor had ordered him to Pine Crest. He had given him six months, unless he took care of his health. The doctor knew all about Pine Crest. Some distant cousin of his owned the place, and ran it for summer boarders to put her two sons and her daughter through college.

It was late in the season. Except for one or two stragglers, Leigh Higgins was the only boarder there. He had not thought much about the home atmosphere of the place until he had tried to tip the girl that brought him his hot water. She laid the dollar back upon the dresser.

"You forget that this is not a hotel," she said, and Leigh, startled at the culture of her voice, looked at her a second time.

Surely this was no ordinary waitress. Why, she was beautiful! Not many girls in Leigh's social sphere could hold a candle to her loveliness in spite of their silks and jewels. Leigh pocketed the dollar.

"Yes, I forgot," he returned, humbly.

"You see, mother has let all the maids go, now, except one," explained the girl. "And as I am not going back to school, I can help her a bit. I am Valerie Verne. I hope we can make you comfortable, Mr. Higgins. Supper is at five thirty."

She closed the door noiselessly behind her. For some minutes Leigh Higgins stared at the closed door, as if half expecting that she might come back. For the first time in his life, Leigh Higgins was in love.

It was on one of the morning walks that he proposed to her, just as the red sun was gliding over the edge of the hills.

"I know you're only twenty-one," he said to her, "and I must seem an old man to you. But I can give you everything."

Her breath caught in a half sob, as she turned and caught his hand in both of hers.

"No, you can't, dear Mr. Higgins," she murmured. "If I had thought of anything like this, I should have told you. You see, I'm going to be married. You haven't met Richie, because he's struggling so hard to get ahead so we can be married. He's just graduated from law school. The minute he can save up enough, he's going to give me a ring."

And Leigh Higgins, looking at the lovely flushed face before him, and feeling the warm pulsating hands in his, knew that he had never known happiness, and never would.

Two days later he was in town again. He went straight to the office of a lawyer friend.

"I'm interested in—er—a young friend of mine," he began, coming right to the point. "His name is Richard Wells. Fine young fellow. Great stuff. I've traced a relative of his, who died on a Western ranch. Now, I want you to draw up papers, making it appear that this fellow left young Wells sole heir to \$10,000. Here's my check for the amount. Mum's the word, mind you. And—er—it wouldn't be a bad idea to take the young fellow into your office, either."

That was how it happened that Pine Crest had a wedding so soon. Leigh Higgins was invited, although he didn't go. He did, however, send the bride a huge chest of real silver.

The night of the wedding, the doctor found him alone in the spacious suite of his hotel.

"Why'n't you stay at Pine Crest, man?" he asked him, bluntly, feeling his pulse. "I gave you six months if you stayed on in the city working like a fool. I give you no more, now."

Leigh Higgins smiled, wryly. "Say, Doc," he observed. "What odds? You can have all the hospitals you want when I'm gone. And say, I was never happier in my life than I am right now."

"You look it," was the dry response. "And why?"

"I've just helped to create the best bit of home atmosphere the world has ever known," said Leigh Higgins. "And that's that."

All Streets Up or Down
Among the towns, England's Clogwelly is unique. It lies on the home stretch of Cornish cliff where King Arthur built his castle, and is about 40 miles north of Tintagel. All streets in Tintagel go either up or down, and the grades are so steep that vehicular traffic is stopped one-half mile out of town. From that point one proceeds either afoot or burrow-back. Clogwelly begins on the crest of a hill and ends at the ocean's edge.

Measuring Velocity of Light
Efforts to measure the velocity of light were begun in 1676.

White House Had No Bathroom
The White House had no bathroom until 1877.

Legislature Is Confused Over The Sales Tax

Only a few more days and the 46th Texas Legislature will be a matter of history. No immediate special session is regarded as likely. It looks as if the house is with the Governor and the Senate with the Lieutenant Governor. By the time this reaches the reader there's a chance that the old folks will know something.

Observers who are unbiased, openly state the entire session has been puzzling. The most ardent spirits back of the payment of pensions originally urged a constitutional amendment to raise the necessary funds. Soon became evident that any bill contemplating a vote by the people thereon would face rough going. Some pointed out if the bill had to be submitted to the polls it would be gray for the ones who were most outspokenly for it, because it would give them an opportunity to campaign for the amendment in the Texas press, on the stump and over radio—by which they would not only have a good chance to be re-elected, but even go to higher places in the official life of Texas.

The bill for financing old age pensions was scheduled to again confront House members Wednesday, carrying a Senate resolution referring a combination sales and natural resource tax plan to popular vote.

Should it fail, the Senate shows little disposition to accept instead the House-passed plan of a statutory gross receipts-natural resource tax.

Senators already were cancelling leases on apartments they have occupied since the session opened on Jan. 10.

This was taken as an omen that continuation of the session after May 9 on a half-pay basis will not meet Senate approval. Some saw a possibility that the session might be extended to clear up appropriations and seek an old age pension finance agreement, but only if sponsors of other contested bills will agree not to press them after this week.

Prospective procedure includes a House attempt to pass the bill to require the University of Texas regents to establish an R.O.T.C. unit on the campus.

Circleback News

Rev. C. T. Aly and wife of Eldorado, assisted by the pastor, have been holding a revival meeting at the Baptist church. Several members were added by letter or statement, but none by baptism.

Mr. and Mrs. John Cox were in Muleshoe on business, Monday.

Mrs. Roy Kyzer of Bula visited in the Elmora home the first of the week. Her father, W. C. C. Elmore is very ill.

Mr. and Mrs. Lester Elmore have moved to the Charles Wiseman place.

Mr. and Mrs. Charlie Williams' baby who has been very ill, was better the last report.

Mr. and Mrs. Beene and small son have returned from Okmura. They report their father is better. Mr. Beene was stricken with paralysis last week—Reporter.

AGED BAILEYBORO MATRON EXPIRES
Mrs. Clint Duty Sr., 63, died Tuesday, April 25 in a Lubbock sanitarium.

She had resided in Baileyboro community, southern Bailey county for the past five years and for the past three months been in ill health, having been confined to her bed previously to going to the hospital.

Funeral services were conducted the following day at the Baileyboro Baptist church by Rev. Clyde Coffman and burial made in the Baileyboro cemetery. The deceased had been a member of the Baptist church for 48 years.

She is survived by her husband, three sons, Clint Duty, Matador; Claude Duty, Baileyboro; Tom Duty residence unknown, the former two being present for the last rites.

Two other sons preceded Mrs.

Duty in death. Other survivors are two brothers and a host of other relatives and friends who were saddened by her death.

COPLEY TO TEACH THE MARRIED YOUNGSTERS

The Young Married People's Sunday school class of the Methodist church were entertained with a social at the home of Mr. and Mrs. Ferel Little Friday evening of last week.

Howard Carlyle, superintendent of the adult division sponsored the social.

Guests enjoyed games of Chinese checkers, table tennis and a guessing contest.

A short business session was held with Flaudie Gallman, superintendent of the Sunday school, in charge. The following officers were elect-

ed: Ferel Little, president; Jim Burkhead, vice-president; Mrs. J. T. Shofner, secretary and treasurer; Mrs. Ferel Little, chairman of social committee; Buford Butts, chairman of membership committee and A. W. Copley, teacher. Refreshments of ice cream and cookies were served to messrs. and Mesdames J. T. Shofner, Jim Burkhead, Clyde Holt and son, Buford Butts, Howard Carlyle and son, Flaudie Gallman, Jim Sharp, Ferel Little and Mr. A. W. Copley.

CARD OF THANKS

We wish to extend our thanks and appreciation for the sympathy and help given us in the sickness and death of our dear wife and mother and sister.

Clint Duty, Sr., and sons, Jack Duty, J. F. Lindsey, Mr. and Mrs. Layne Jarrette.

AGRICULTURAL BRIEFS
By FINLEY WHITE
Bailey Co. Farm Agent

Since planting time is almost here many farmers are now beginning to think about planting seed. It's too bad some farmers will pay \$2.00 for a tractor and plow tools to make a crop with and then go plant just ordinary seed. Too much stress cannot be put on the importance of quality planting seed. Field crops are not unlike animals—like begets like—both in plants and animals. If we plant ordinary seed we may expect ordinary crops. Good planting seed are as essential to good crops as are good soil and moisture. Don't be a "maybe" farmer; plant good seed and know that if you make any crop it will be good.

One Vairety Cotton

Bailey county has one "one variety" community already assured and another community with about 70% of the farmers already agreeing to plant just one variety.

In the Coyote Lake neighborhood there are about 3,000 acres signed up for Paymaster cotton. Sam Sanders is going to build a gin near Coyote Lake that will gin only Paymaster cotton.

In the Joyland community there are about 40-odd farmers who will plant California Acala cotton. Mr. Gage, who gins in that community, will have special gin days for California Acala. It is hoped that by planting time (or when it rains) that the Joyland community will be 100% for Acala.

4-H Club Calves and Pigs

This week the county agent and two or three ranchers from Bailey county will go to Silverton to purchase about 45 head of club calves. These calves will be selected from the J. H. Barson herd at Silverton. Mr. Barson has over 1200 mother cows, all pure Herefords, and the job of picking 45 good calves from this bunch should be easy.

The county agent went to Tulsa Tuesday and brought back seven registered Poland China gilts from the John Adams farm. These gilts are for 4-H club boys who chose pigs for their 1939 demonstrations. It will pay to watch this bunch for they are out of one of Texas' finest herds.

Interest in 4-H club work this year is running high. It is believed that by June 1, about 400 boys will be lined up in 4-H work. Already there are more than 30 boys in their ark and more are joining every day. June 1 is closing date for enrollment for 1939, and all projects must be started by that date. Over 200 of the boys have already started work on their demonstrations. The demonstrations cover a wide variety of feeding and cropping projects. Some worth while things are expected this year.

**SPONSORS AND PUPILS
PLAY CAT AND MOUSE**

Members of the seventh grade class, Muleshoe school, were entertained with a party Tuesday evening at the school building, sponsors being the home room mothers Mesdames J. L. Alsop, J. J. Williams, Irvin St. Clair, C. E. King and Miss Flora Morris, teacher of the class.

Games of flying dutchman, two deep, cat and mouse, and various others were enjoyed on the school campus, after which the group went to the show at the local theatre.

Refreshments of cookies and frozen malts were served at the Western Drug to the following: Lloyd Alsop, Dainton Bearden, Hubert Clark, Willis Parrell, Virginia Day, Ione Gage, Victor Gate, Nelda Jean Harrison, Bonnie King, Mozell McGee, Robert McHorse, Leda Faye Myers, Buren Robinson, Lowell Irvin St. Clair, Goldie Vaughan, Frances Jewell Williams, Onie Wilson and Anahita Young.

WATSON GIRLS CLUB MEET

The Watson 4-H Girls club met Thursday of last week at the school house with 18 members, including two new ones, present.

Miss Lillie Gentry, demonstration agent gave a talk on bedroom arrangement, imparting much information of interest to the girls.

**\$25 Awards To
Be Given On
Trades Day**

As usual for Trades Day occasion, the population of Muleshoe last Saturday swelled to elephantine proportions as people from surrounding towns and communities began pouring in for the day. One visitor declaring the town had taken on the size of Lubbock or Plainview, while still another who had not been here before, insisted he must have got lost on the road and driven into Fort Worth.

The usual awards of \$25.00 were made during the afternoon as follows: Mrs. Onan Robinson, \$10; M. C. Parnell, \$7; Mrs. G. W. Duncan, W. A. Berge, E. M. Lambert and E. M. Lovelady, each receiving \$2.00 in cash.

Another \$25 has been posted by local business men to be dispensed next Saturday absolutely free.

Sam O'Hara, a nomadic bicycle expert rider, furnished considerable hilarity to the occasion for while with the antics he performed on his "safety" cycle, it generally being conceded he knew his stuff.

An added feature next Saturday will be some jig dancing, three awards being offered for the best terpsichorean shuffler of pedal extremities. The skill will be open to both boys and girls up to 18 years of age, and registration offer entry should be made with R. L. Brown at his office here.

An appreciated feature of the meeting was music furnished by the "Musical Muleeters" orchestra during the festive hour, several appreciated numbers being rendered. Composing the orchestra is Jack Dalton, violin; Dr. Burleson, tenor banjo; Earl Hicks, tenor guitar; Hut Crawford, base violin; Ben Lafor, guitar.

**Y-Ellers And Others
Visit Carlsbad
Caverns Sun.**

A party of several Y. L. folks, accompanied by some from other communities journeyed to the Carlsbad caverns in New Mexico over last weekend to enjoy the sights of that magnificent subterranean vault. Leaving Saturday morning they arrived at Carlsbad at four o'clock that afternoon, where they spent the night, going through the caverns Sunday morning. They all pronounced the magnificent geological sights that greeted their vision as the most marvelous ever beheld. They left for the return trip about five o'clock Sunday night, arriving here shortly after midnight.

J. A. Lumsden, principal of YL school, sponsored the trip, while Mrs. E. T. Embry was chaperon. Those making the trip were: Edith Sims, Bertha Maner, Wanda Lee Maner, Lona Wilterding, Maxine Maner, Bonnie Traweek, Leity Darnell, Margaret Ryan, Alice Abbott Lowery, Maebelle Reeves, Clarence Lee Reeves, Ethelida Ashford, Catherine Lowery, Frances Burge, Everette Maner, Orin Sims, Russell Wayne Bryant, Reece Wilterding, Ross Lumsden, C. A. Reeves, Chester Embry, Delbert Hawkins, Calvin Embry, Anell Ashford, D. W. Burhman.

J. A. Lumsden, Mrs. Evans, Mrs. Traweek and Mr. and Mrs. E. T. Embry of Y L community; Mrs. J. D. Border and daughter Frances of Muleshoe; Mrs. J. T. Lybrand, Burma Lois Lybrand, Mr. and Mrs. Jess Parks, Wilma Jean Kitley and H. A. Markham of Sudan.

**PROGRESS SS MEMBERS
HAVE SANDHILL PARTY**

Progress Sunday school was attended by 96 members and a few visitors last Sunday. All officers and teachers, except one were present. There are at the present 133 enrolled.

After Sunday school was dismissed, everyone went to the sandhills. Two buses and several cars carried the picknickers to the sandhills east of Muleshoe.

After a large picnic dinner was enjoyed by all, the afternoon was spent playing in the sand and amusing themselves with games. Reporter.

Men who feel that they have too much modesty exegrate it.
