

THE MULESHOE JOURNAL

Muleshoe, Bailey County, Texas, Friday, March 19, 1926.

No.

MARTIN SCHLIMPERT

Martin Schlimpert, who has just arrived in Washington to take up his duties as the new secretary of the German embassy in the capital.

Able Judges Be Here In Track Meet

Word has just been received from Mrs. T. U. Reeves, Canyon, that the following would act as judges in the Interscholastic League County Meet to be held here March 26-27.

W. E. Lockhart is well known in this section as he has been with us before. He has had much experience in handling County meets.

Mr. and Mrs. J. R. Cooke will also be with us. Mr. Cooke is with the Education Dept., of the W. T. S. T. C., Canyon. He holds an M. A. degree and is well qualified to help in the county meet. Mrs. Cooke also holds a degree and is in the training school at Canyon.

Mrs. H. A. Douglass is driving a new Studebaker.

Mrs. W. T. Wright is here this week from Blair, Oklahoma, visiting friends and relatives.

Mr. S. E. Axtell has returned from a trip into Kansas visiting his wife and friends at Movane.

Fred Pierce was in the city Wednesday hauling out material to erect a modern blacksmith shop at Progress.

Miss Zula Harding, of Texico, is here this week visiting her sister, Mrs. Klump.

Mrs. Lilly Daniel was taken to Lubbock, Wednesday where she will have an operation. Mesdames R. L. Faulkner and W. C. Bucy accompanied her.

Miss Ruth Burton left Monday for Canyon, where she will enter school.

The American Legion dance was held last Friday in the Legion hall with about thirty couples present. They all report a wonderful time. The Legion expect to have regular dances at the hall.

EOR SALE—Everbearing Strawberry plants for sale. Price 50c per hundred. J. H. Dean. Eleven miles West of Muleshoe.

J. A. Hutto and family spent the first of the week in Tahoka. Mrs. Hutto returning the latter part of this week.

Carl and Tom Elrod were business visitors in Lubbock, Wednesday.

L. L. Martin, Dentist, of Baylor University, now located at Lubbock, will make our city twice a month and can be found at the McCarty Building with Dr. Matthews. He is connected with the

Clinic Held At YL School House

The Baby Clinic at the YL community was well attended on Friday, March 5th. There was a total of eighteen children present. Following is a condensed report of same: 18 children examined, 12 children defective, 28 defects found, 5 children 10 per cent and more underweight, 2 children with rickets, 5 children with enlarged tonsils, 1 child with anemia, 1 child with eczema, 5 children needing special care in feeding.

There was a dental inspection held at the same time and this was for the school in general and following is a report of same: 63 children examined, ages 6 years to eighteen, 10 with irregular teeth, 8 with unstained teeth, 11 with diseased gums, 52 with health gums, 41 cavities in temporary teeth, 5 cavities in permanent teeth, 7 extraction indicated, 17 cases needing prophylaxis for mouth hygiene.

This examination was made by Dr. Martin, of Lubbock, and in connection with the Texas Dental Association, and the State Board of Health, it is hoped that we can have an entire dental inspection of all the schools in the county and also not only the school children but the pre-school children as well.

The Home Going of John Willie Potts

The passing of Bro. Potts, of Muleshoe, March 11th, 1926 brings to our hearts, sadness, but our loss of a friend from this world is his gain.

Bro. Potts was born in Hunt county, Tex., Sept. 30, 1887, residing there with his parents until their death. His father went to be with his Lord in 1922, his mother in 1923. Since then Bro. Willie Potts made his home with his sister, Mrs. Menefee who moved to this part of Texas about one year ago, besides this sister, he leaves a sister in Hunt county, Mrs. Fraser.

Child of God, well done, Rest from thy earthly employ, The battle fought, the victory won, Enter thy Master's joy. (A Friend.)

Epworth League Program for March 21 Subject—Stewardship Our Time. Leader—Miss Dorothy Wentland. John 9-1-5. Rom 13-11-14. 1 What is Christian Stewardship—Miss Wentland. 2 Christian Stewardship in Action—Mrs. Nina Elrod. 3 Special—Alva Douglass. 4 What shall be our decision—Mills Barfield.

George M. Clark and wife came in Saturday afternoon and will make their future home in this city. George will have his old position with the Muleshoe Journal. Mrs. Clark will be remembered as Miss Virgie Mae DeBord.

At Brooks Theatre Friday and Saturday

"The Side Show of Life," a three ring circus of laughs and thrills.

Screen play of Locke's novel, "The Mountebank" all that and then some.

Fine story of a great fun-maker who becomes a military genius—Ernest Torrence in the most unusual single portrayal ever put on the screen. Since 1906 people have talked about "The Beloved Vagabond," making it the most famous book William Locke ever wrote. Now they are talking about "The Mountebank" with no less enthusiasm, for it is the story of a man who is probably the most "beloved" of all the wonderful characters Locke has immortalized. See this picture Friday and Saturday, or you will miss a treat.

E. R. Hart Buys Bennett Mfg. Co.

A deal was made last week whereby E. R. Hart Lumber Company took over the interests of the Bennett Mfg. Co., of this city. The material will be closed out at the present location, and later on the building may be wrecked and used in enlarging the Hart Yard.

A. L. King left last week for Bledso, where he will take charge of a branch office of the Hart Lumber Co. It will be known as the Hart Bro. Yard.

Texas Utilities To Turn On Lights About April 20

In conversation with the head lineman of the Texas Utilities Co., he stated, "Tell the people of your paper that we expect to turn the electricity on in Muleshoe about April 20th." This is fine news, for the people have been wishing for this for some time.

Muleshoe Working Girls Organize Social Club

The Working Girls, of Muleshoe met at the Legion Hall last Monday evening for the purpose of organizing a club. The following officers were elected: President, Miss Dorothy Wentland, Vice-President, Miss Gertrude Tucker, Secretary and Treasurer, Miss Katherine Neal.

After much discussion the club was named the M. B. G. Club. The purpose of this club is to help one another and to provide some clean amusement for the Working girls.

We are going to make this one of the liveliest little clubs in this part of the country, and all working girls are invited to join us.

The charter members are: Misses Leona Brown, Hellen Carles, Lottie Huke, Lola Lipscomb, Katherine Neal, Eunice Paige, Sue Snider, Amelia Spencer, Dorothy Wentland and Gertrude Tucker.

The club will meet next Monday evening at 7:45 with Miss Hellen Carles and all members are requested to be there.

At Brooks Theatre Friday and Saturday

"The Side Show of Life," a three ring circus of laughs and thrills.

Screen play of Locke's novel, "The Mountebank" all that and then some.

NOTICE

The next Bailey County Singing Convention will be held at Longview, second Sunday in April the 11th. Each and every one is invited and especially the singers are urged to attend.

ONLY BARD IN HOUSE

Representative Charles E. Winter of Wyoming holds the distinction of being the only "bard" in congress. He is author of the Wyoming state song and also a chronicler of the West in his historic novels. He is shown singing the state song, "Wyoming State March."

C. of C. Has Good Meeting Tuesday

The Chamber of Commerce met Tuesday night in regular meeting and the main subject of discussion was to assist the farmers in a big diversified program this year. Full details will be worked out by an able committee and submitted to the farmers of the county. Regular meetings over the county will be another plank in the Chambers work this spring.

Civic League To Beautify Court House

The Civic League, of Muleshoe, met at its rooms at the court house March 15, with Mrs. Connie Gupton presiding. Nine members were present. Wednesday, April 21, was designated as the day for beginning to set grass and shrubs and plant flowers on the courthouse lawn.

Every citizen of Bailey county is invited to be present with his family and a well filled lunch basket on this date and put in the day at setting and watering grass and shrubs and planting flowers.

People everywhere who are interested in this work and have shrubs and bulbs and flower seed that they can donate are requested to do so and to take part in this work. It is your county and town no matter what part of county may live in.

Other organizations as well as each individual will be invited to take part in this work and a great day is expected. The next meeting of the club will be March 29 at the club rooms at the courthouse.

C. C. Mardis Out For County Clerk

C. C. Mardis requested the Journal to make his announcement for County Clerk subject to the action of the Democratic primary in July. Mr. Mardis needs no introduction to the public as he has been our County and District Clerk every since the county has been organized. This year closes his third term. Mr. Mardis has made us a fine Clerk, faithful to the office and efficient in his work. Mr. Mardis wants the place again and if you can come to the polls and cast your vote for him he will endeavor to merit your trust.

The American Legion and the Civic League are perfecting plans to put on a big celebration at

Revival Open Methodist Church

A revival will begin at Methodist Church next Sunday night at 7:45 p. m. Every has a cordial invitation to attend the Revival and help save souls of our sinner friends are astray. Christians we counting on you. Without co-operation of God's people will not prosper. Please member the date, Sunday, March 21st, 7:45 p. m. Let's do this to heart and save Muleshoe on hand at the first service and prepare to continue during the duration of the meeting.

B. Y. P. U. Social at Lawler Home

The Union has been plan for several weeks to have a Social. It seems that every time we have a date that something happens. But we have set the date for Friday night, Friday March 19. We have invited the League to come over and share a good time with us. But whether you are member of the League or not, Union you are invited to come and have a good time. Don't forget the date, Friday, the 19th. Remember that everyone is invited. It will be given at the home of Miss Louise Lawler.

B. Y. P. U. Elected New Officers Sunday

The Baptist Young People's Union in their meeting last Friday night March 14, elected a new bunch of officers. The following officers were elected: President, Dorothy Bell; Vice-President, Darel Dale; Secretary, Bessie Lester; Assn't Secretary, Harold Griffith; Correspondent Secretary, Louise Lawler; Quiz Leader, Mr. Byron Griffiths; Chorister, Taylor White; Pianist, Mrs. Ray Griffiths; Group Captain No. 1, Leona Brown; Group Captain No. 2, Verbie Griffith; Reporter, Sherman B. Vrnice.

The new officers will take their place in the Union, March 21, and carry the work right on. Some of the old officers have taken up the work in a different place. The entire Union feel that the new officers will so conduct the Union in such a way that it will be a place of Christian training for all the young people in this community.

NOTICE

To the patrons of R. R. No. 2, running West and Northwest of Muleshoe, Tex., have approved mailboxes erected and ready for tri-weekly mail service starting May 1st, and all patrons on R. R. No. 1, will have daily service except Sundays and Holidays beginning April 1st.

Beulah W. Carles, P. M.

LAST CALL

This issue of the Journal will be the last issue sent to all delinquent subscribers. We have sent notices and blue penciled papers that are not paid in advance. We take for granted that you do not care for the Journal another year and we do not want to send it to anyone that don't want it. If you do not receive your paper next week, don't blame the post mistress or the carrier it's your own fault.

The Muleshoe Girls Are Victorious Again

Last Friday night the Muleshoe Sextett closed an undefeated season by overcoming Canyon 36-25. This was one of the best played seasons and proved that the real athletes through the entire season.

The team played sixteen engagements and proved to be the best team in each of 534 points showed the team to be especially strong on the offense; and a score of 176 for their opponents, showed that they always presented a formidable defense.

To point out individual stars would be difficult, because of the co-operation of each player made the team as successful as it was.

The girls deserve praise for their untiring efforts during the season; and another season all of their members back to find them practically, impossible to defeat.

HOW TO GET RID OF CATARRH

A Simple, Safe, Inexpensive Method That Clears Out the Head, Nose and Throat.

There is no disease more offensive or disagreeable or no disease that will lead to as much serious trouble as catarrh. You can now get rid of it by a simple, safe, pleasant home remedy discovered by Dr. Blosser, a catarrh specialist.

Dr. Blosser's Remedy is composed of medicinal herbs, flowers and berries, which you smoke in a dainty pipe or cigarette. The smoke-vapour is inhaled into the passages of the head, nose, throat and lungs and carries medicine wheresprays, douches and salves cannot possibly reach. Its effect is soothing and healing and is entirely harmless. It contains no cubes or tobacco, and may be used by women and children as well as men.

BED BUGS

Let Tanlac restore your health

If your body is all fagged-out and run down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into the nearest drug store and get a bottle of this world-famed tonic. That's the first important step back to health and vigor. Every day's delay means unnecessary suffering, for Tanlac starts to clean out and tone up the system right away. And

by acting promptly you will avoid further loss of energy and weight due to your present condition. Take Tanlac Vegetable Pills for constipation.

Your New Home

should be made artistic, sanitary and livable.

These walls should be Alabastine in the latest, up-to-the-minute nature color tints. Each room should reflect your own individuality and the treatment throughout be a complete perfect harmony in colors.

The walls of the old home, whether mansion or cottage, can be made just as attractive, just as sanitary, through the intelligent use of

Alabastine

Instead of kalsomine or wallpaper

It is absolutely necessary if you expect Alabastine results that you ask for and secure Alabastine.

Avoid kalsomines under various names and insist on the package with the cross and circle printed in red. That is the only way to be sure you are getting the genuine Alabastine.

Alabastine is easy to mix and apply, long in its results, and absolutely sanitary.

Alabastine is a dry powder, put up in five-pound packages, white and beautiful tints, ready to mix and use by the addition of water, and with full directions on each package. Every package contains the genuine Alabastine has cross and circle printed in red.

Better write us for hand-made designs and special suggestions. Give us your problems and let us help you work them out.

TETE-BOULE

SYNOPSIS.—With David, half-breed guide, Brent Steele, of the American Museum of Natural History, is traveling in northern Canada. By a stream he hears Denise, daughter of Col. Hilaire St. Onge, factor at Walling River, play the violin superbly. He introduces himself and accepts an invitation to make the post his home during his stay. He finds the factor worried and mystified. The "log chateau" is a real home. From St. Onge he learns of the mysterious creature of evil, the Windigo, and the disappearance of a canoe and its crew, with the season's take of furs. Then at night the Windigo gives a weird performance. Even Steele is mystified. David, Steele's Indian, and Michel, St. Onge's head-man, leave for the scene of the canoe's disappearance in an attempt to solve the mystery. St. Onge tells Steele that Lascelles, the company's manager at Fort Albany, seeks his ruin in order to compel Denise to marry him to save her father. Steele and Denise fall in love. Steele finds the track of the Windigo—huge and much like a bear's. David finds the same thing.

CHAPTER IV

As he met Denise at the door of the factor's quarters, Steele said quietly: "Let's not talk of the bear trail tonight, mademoiselle." And the grateful look she gave him was ample reward for his tact.

"As I feared, monsieur, the men found nothing down river," said St. Onge as they sat down to the simple meal.

Not knowing whether Michel had as yet confided in the factor, Steele didn't mention the strange trail.

"It is certainly a puzzle, Colonel." "Yes, a riddle which will be solved in only one way, monsieur—by time. Some day when we have left the Walling River we may hear of the fate of my men."

"Then you have no faith in the Windigo theory of their disappearance?" Steele boldly challenged, with a curl of the lip.

The tired eyes of St. Onge twinkled. "So far as our Indians are concerned, monsieur, the Windigo will drive us out of the valley. But I am not prepared to say that the Windigo have my fur."

Brent Steele was narrowly on the point of demanding that his host put his cards on the table face up. St. Onge's failure to take his guest fully into his confidence was irritating to a degree. As he ate in silence, the American promised himself that there should shortly be a showing of hands or he would go south at once. Then the brooding eyes of Denise St. Onge met his and he realized what it would mean to leave Walling River to its fate—what memories he should leave behind when he started south for the Nepigon.

That evening, three men, heads together, smoked on the beach. Slowly and in detail Michel and David told Steele of their search and discovery of the strange footprints.

"What were they like, Michel?" "They were long lak' de bear, but no bear een des countree mak' dem so big."

"Queer t'ing de bear w'at mak' de track," broke in David, "was starv' for dey not seek fur een de mud. An' he have seex-seven toe on fore feet."

"Just like the ones I'll show you in the morning!" exclaimed Steele. "And you found no trail of the men with the canoe?"

"No sign but 'round de camp—no trail in muskeg."

"Well, Michel, what do you think? Could the brute that made the track you saw, howl like the one on the ridge here?"

The Iroquois' small eyes narrowed to slits. He puffed hard for a space before answering. "De howl on de ridge was no bear—bear onlee yell w'en he get hurt. Michel not know w'at howl on de ridge but he fin' out before de long snow melt."

"What do you think made the trail, David?" Steele grinned into the set face of his friend.

David shook his head. "I nevalre see so beg bear track."

Then Steele told of his search of the ridge for signs of the night walker, and of the tracks he had seen that afternoon. But endge their brains as they would, the three men were at a total loss for a solution of the riddle of their origin.

The night shut down but the three men on the river shore still sat smoking, hard at their council of war. In the middle of a sentence, David suddenly stopped, raising his head as though listening. Then, silently rising, he plunged into a clump of alders close by! A low curse—the sound of a scuffle.

"By gar! W'at you got, Daveed?" demanded Michel as he and Steele followed to the brush.

"I show you something!" was the muttered reply, as the dark shape of the Ojibway dragged an indistinguishable, struggling mass from the alders.

"Tete-Boule!" gasped Michel, peering into the face of David's prisoner.

"W'at you do dere?"

"So you t'ink to hear something, Tete-Boule?" growled the angry voice of the Ojibway shaking the man he held in the vise of his two hands as a husky dog shakes a rabbit. "You cravi lak' de mink, but I smell you lak' de wolf smell de wood mouse," and the man from Nepigon shifted a

hand to Tete-Boule's throat. The mouth of the trembling eavesdropper gaped for air.

"Now I geeve you something to leeson to, Wabeno! Shaman! Maker ov de Beeg Medicine! Eef you don't be ver' careful, David, de Nepigon Wolf, will tear de devil out ov your t'roat!" And with a wrench he sent Tete-Boule sprawling on the beach.

"Guess he won't eavesdrop again in a hurry!" laughed Steele, as the cowed Indian disappeared in the shadows. But Michel seemed so strangely silent that the American asked:

"What's the matter, Michel, don't you like to see him handled so roughly?"

The Iroquois made no reply.

"Wake up, Michel, and tell us what you think?"

"I t'ink," said the head-man slowly, "dat de long snows will be red in dees valley."

"What, you don't think that fool Tete-Boule will make trouble?"

"Tete-Boule ees no fool." He would say no more.

The house was silent when Steele, filled with the events of the day, went to his room. Late into the night his thoughts were busy with the hours on the ridge with Denise St. Onge, with memories of her flushed response to his emotion, of her abandon to the feeling which had swept her when she played her "Farewell" of her residence and yet her desire to make clear the situation which her father seemingly feared to reveal to Steele.

Then the matter of the tracks in the mud; what manner of beast could be loose in the "bush"? In the morning they would take up that trail and follow it, but when they lost it in the dry going, what next? Well, they had a plan for the next month, but the Frenchman would first have to show his cards. If he refused, there was nothing to do but get on to Nepigon.

On the way there was Ozoke and Monsieur Lafamme. That ought to be interesting. But little did Steele realize as his drowsy brain dwelt for an instant on the call on Monsieur Lafamme, free-trader, just how interesting that visit was to be.

At daylight three men were bending over tracks which ran through a wet hollow less than a mile from Walling River.

"Well, Michel, did you ever see a black bear that would leave these behind him?" asked Steele as David and the head man carefully inspected the peculiar trail.

"Ver' beeg track but ver' strange bear," laconically vouchsafed the kneeling hunter.

David bared a set of strong teeth in a characteristic smile.

"W'en we start up river for de Nepigon, I tell you. You laugh at me eef I say w'at I t'ink now."

Michel took up the trail forward while David and Steele followed it back only to lose it shortly in the dry birch leaves. On their return they found Michel waiting.

"She don't run far," he announced. "I don't followed eet far in de dry bush."

Then the three made a wide circle, but failed to pick up the elusive tracks. Disappointed, they were returning to the post by another route than the trail to the ridge overlooking the "Vale of Tempe," when Michel, who was leading suddenly stepped in his tracks, raising his hand in warning.

Stiff as the spruce around them, the three stood listening. Faintly to their straining ears came a low chanting, accompanied by the rhythmic beating of what sounded like a drum. Steele turned a questioning face to David, who grinned broadly, nodding his head in time to the far drum beats.

"What in thunder!" queried the curious scientist.

"You hear dot down on de Nepigon, one tam," dryly returned the Ojibway.

"It sounds like it. Somebody doing some conjuring, eh?"

"Tete-Boule, de beeg shaman, mak' heseff some medicine dees morning."

"Is he driving away the Windigo, or is he trying to get you bewitched for shaking him up last night?"

"I t'ink he try to call de Windigo for to mak' de beeg medicine togedder," laughed David.

"Do the post people know that Tete-Boule is a Wabeno, Michel?" Steele asked of the silent man who had vouchsafed no comment.

"Tete-Boule mak' medicine for long tam, to drive away de Windigo. De people t'ink he ees beeg shaman, for sur."

"Well, the first thing for St. Onge to do is to get rid of this nuisance, Tete-Boule. He keeps the post Indians stirred up with his mumbo-jumbo, and ought to be kicked out. What do you think, Michel?"

For answer, the tall Iroquois drew an ugly skinning knife from his sheath in his belt. Then he said, "It be good t'ing eef I put dees een bees back?"

"No, not without orders from your chief," replied Steele, amused at the literal interpretation given to his suggestion. "But this Tete-Boule will make trouble all winter with his sorcery."

As they talked, the low drumming

continued, accented by the beating of the drum.

"Let's see what he is about," suggested Steele, and they crept forward.

Within a hundred yards they made out a small, round skin tipi from which the sing-song emanated.

"Naske awass, Windigo!" moaned the voice inside. "Ahuah! ahuah!"

"He tell de Windigo to go away," whispered David to Steele.

Then Michel wormed his way to some small balsam near the tent, while the others watched.

Presently a low mewling from the Iroquois stopped short the waiting in the tent. Then from the balsam rose the caterwauling of a lynx in the mating season.

The drumming started furiously, accompanied by vociferous shouting. The scream of the lynx rose to a maniacal shriek. The drumming ceased, and the mauling cries of a creature frenzied with fear filled the tent. Presently the flap was thrust aside, and a grey-faced Indian scrambled out and fled like a deer in the direction of the post, leaving behind him a white man and an Ojibway doubled with laughter, and beside them, his face set like stone, a tall half-breed deep in thought.

"Why did you do that, Michel? He will only make things worse at the post."

"I try eef he scare ov de Windigo, heeself."

"Well, are you satisfied?"

"Yes. Eef ees ver' strange he ees so scare." And the head man shook his head doubtfully. "He talk to de Windigo, an' w'en he cum, he run."

Back at the post Steele related to St. Onge the events of the morning.

"This Tete-Boule, Colonel, is only a source of trouble here. He is filling the minds of the Indians with the Windigo, and then makes medicine to drive him away, doubtless for a consideration."

St. Onge shrugged with indifference. "It will not matter. I am expecting a packet from Albany any day ordering me to abandon the post."

Steele stared at his host in surprise. Where was the old fighting blood in this veteran? What hidden cause had paralyzed his nerve? And his love for his daughter—that at least should drive him to fight through to the bitter end.

They were on the river shore and alone, so Steele grasped the opportunity for which he had waited. The matter between them had to be cleared up if he were to give his best efforts and those of David in the days to come.

"Colonel St. Onge," he began, "I am deeply interested in your situation here. I have offered the services of David and myself, in an attempt to aid you in your trouble; but I must say, candidly, that you are not meeting me half way. If I am to put in the next three weeks in an effort to run this thing down, I must first have your full and complete confidence. I must know—what you know—and think. This is due me. If you cannot take me into your confidence, I shall be compelled to thank you for your hospitality and bid you goodbye, deeply as I shall regret it."

St. Onge listened patiently, as the speaker thought, hopefully, to the ultimatum.

"Let us sit down and talk it over, monsieur," he replied.

The two men moved to a rock and lighted their pipes.

"Monsieur Steele," began St. Onge. "I am in a net from which I see no escape. You came here a stranger, claiming to be a scientist, interested in the study of Indian customs and folk-lore. That is all I knew about you. As it was, I told you too much that first night."

Evidently this Tete-Boule has something to do with the Windigo. Who is back of him?

(TO BE CONTINUED.)

Crude Hooks in Use

by Early Fishermen

In France several caves have been found in which men are believed to have lived about 200,000 years ago. In these were found what are probably the oldest fishhooks so far known to have been used by man.

These first-known hooks consist of a stone ground down into the shape of a small banana with a ridge cut in the middle, the string, or whatever was used for a line, having been tied around the stone in this ridge. Cave-men of ages ago took this banana-shaped stone and covered it with meat. Then they kindly allowed a fish to swallow the whole thing.

Then the fisherman would give a pull on the string, or whatever it was. The "hook" would straighten out horizontally and therefore refuse to come out of the water without the fish, so when the fisherman hauled in, the fish with the hook caught in his gullet, would keep the crude fishhook company.

Around the lakes of Switzerland scientists have found various kinds of hooks considerably later than those crude relics from France. Many of the Swiss hooks are of bronze, some having barbs, but the really ancient ones were barbless and consisted of two hooks at right angles to each other.

President Polk was the oldest of ten children.

Greater Length of Wool Staple

Possibilities of Increasing Average Fleece Weight by New Method.

(Prepared by the United States Department of Agriculture.)

Profitable wool production depends to a considerable extent on the weight of fleeces. A century ago the average annual fleece weight for wool in the United States was less than two pounds, but there has been a gradual increase in the weights of fleeces for American sheep until now the annual average is about seven and one-half pounds.

Possibilities of Increase.

"There are still possibilities of increasing the average fleece weight a considerable amount," says D. A. Spencer who is in charge of the sheep and wool investigational work of the United States Department of Agriculture. The increase so far has been brought about, he says, by the use of well-bred, heavy-shearing breeding rams, the culling of inferior, light-shearing ewes, better feeding and improved methods of sheep management. Further progress can still be made by these methods, but they will need to be applied in a more exact and scientific way, he says.

The department has just completed a three-year study of the different factors which influence the weight of fleeces of Rambouillet sheep under range conditions. It finds that while both length of staple and density of the fleece influence the weight of clean marketable wool, length of staple is of considerably more importance than density because of the greater value per pound of the longer staple.

Leverage for Increase.

Also, length of staple offers a much greater leverage for increasing the fleece weights than selection for density. Fleeces having a staple over 3 inches in length were 22 per cent heavier than the average, while fleeces having a density 95 per cent of perfect yielded only about 2 per cent more than those of average density.

The result of these experiments show that breeders can maintain satisfactory density while they are breeding for greater length of staple in Rambouillet fleeces.

Lengthen Life of Posts by Creosoting Methods

Creosoting posts and timbers by the hot-and-cold-bath method is best. In this method the posts are left in the hot oil one to three hours. They are then taken out and plunged at once into a tank of cold oil or they can be left in the first tank until the hot oil gets cold. Although this method of treatment costs more and takes more time, it soaks the post more thoroughly in the oil and lengthens the life of it accordingly.

Dipping the posts into hot oil is perhaps the next best method. This plan requires some type of a vessel such as a small oil tank or an empty oil drum in which a reasonably large quantity of creosote can be heated. The oil penetrates every crack and crevice of posts plunged into this bath and a complete covering with the preservative is assured.

While the brush method of creosoting is the simplest and the least expensive, it likewise is the least effective. The creosote should first be heated to a temperature of 150 degrees Fahrenheit or more. Several coats of it should then be applied with a brush, each coat being allowed to dry before the next is applied.

Rag Doll Test for Seed Corn Plainly Described

Special Bulletin No. 101, "Rag Doll Test for Seed Corn," has just been issued by the agricultural extension division, University of Minnesota, and can be obtained without cost on application to the Division of Publications, University Farm, St. Paul. The bulletin tells how individual ears may be tested for germinating power and disease infection by the use of the modified rag doll germinator. Directions are given for making the doll and for analyzing the results after the corn has been under test. Agriculturists agree that some effective and practical plan for testing all available seed corn must be put into effect in Minnesota. The new bulletin has been prepared to help along the campaign for seed corn selection which it is expected will clear up the rather critical situation confronting Minnesota corn growers.

Live Stock Improvement Through Improved Sires

With more than five hundred pure bred bulls placed through the efforts of extension workers during 1925, Kentucky is rapidly improving its domestic live stock. Farmers in Campbell county, Kentucky, replaced 42 grade and scrub bulls in slightly more than a year and a large number of pure-bred sires have been introduced through efforts aside from those of county agents an extension workers. A report to the United States Department of Agriculture from Wayland Rhoads, field agent in animal husbandry of the Kentucky College of Agriculture, states that all the counties having county agents are doing some extension work in live stock improvement through improved sires. In counties without agents similar work is going forward through the influence of banks and other agencies.

Alsike Clover Will Stand for Wet Feet

Ohio Experiment Station Tells of Recent Test.

The Ohio experiment station tells of testing alsike clover to show its ability to go through life with wet feet. It was a drainage test. The clover was seeded in the same manner on a piece that was not drained. It was given the same care along with oats and wheat. The good drainage nearly doubled the yield of wheat; where the average yield of the undrained land was 17 bushels, on the drained part, it was 32 bushels to the acre. In much the same way oats were increased in yield 37 per cent by drainage. On the other hand, alsike clover on the undrained or wet land yielded an average of more than two and a half tons of hay per acre, or about 15 per cent more than on the drained land. This may seem strange to those who are not familiar with alsike clover, but those of us who have tried it thoroughly, know of its ability to thrive and grow on land that is not fit for red clover or alfalfa. There is certainly something about the alsike which gives it ability to grow under these wet conditions. The alsike will also grow on land that is quite sour, and strange as it may seem, it also does well when lime is used. In fact, it often happens that the use of lime will increase the yield of alsike. Much the same quality is found in red-top grass. It will frequently grow and produce a good crop on land so wet and sour that timothy would fail. While timothy would stand a wet soil very well, it appears to be absolutely in need of lime in order to make a reasonable yield.

Guinea Fowl Is Useful as Substitute for Game

Guinea fowl are growing in favor as a substitute for game birds, with the result that guinea raising is becoming more profitable. Guinea fowl are raised, usually, in small flocks on general farms, and need a large range for best results.

Domesticated guinea fowl are of three varieties, pearl, white, and lavender. The pearl is by far the most popular.

Guinea fowl have a tendency to mate in pairs, but one male may be mated successfully, with three or four females. The hens begin to lay, usually, in April or May, and will lay 20 to 30 eggs before becoming broody. If not allowed to sit they will continue to lay throughout the summer, laying from 40 to 60 or more eggs. Eggs may be removed from the nest when the guinea hen is not sitting, but two or more eggs should be left in the nest.

Ordinary hens are used commonly to hatch and rear guinea chicks, but guinea hens and turkey hens are used successfully, although they are more difficult to manage. Guineas are marketed late in the summer, when they weigh from 1 to 1½ pounds, at about 2½ months old, and also through the fall, when the demand is for heavier birds.

Some Excellent Tips on Raising Ideal Potatoes

Too few farmers appreciate quality in potatoes. They have become so accustomed to planting common seed on any kind of ground that happens to be available that the idea of growing smooth, fine-grained, finely flavored potatoes seems too absurd to give consideration.

Excessively heavy soils bear large crops of soggy, flavorless potatoes. The light sandy or gravelly soils produce smaller crops of delicately flavored, floury potatoes. It is only the man who plants good seed and gives his potato rows ideal care and cultivation who appreciates the superior flavor of quality potatoes.

Most of the common diseases may be avoided by selecting seed and soaking it for two hours in a solution composed of one pint of liquid formaldehyde and 15 gallons of water. For leaf blights spray the plants with bordeaux mixture. By putting an ounce of paris green in every ten gallons of bordeaux mixture you get a combined insecticide and fungicide which will kill the familiar potato bug as well as help to control the blight. You can probably secure a spraying calendar from your state experiment station. It tells when and how to spray everything.

FARM FACTS

Replace those sagging gates with new ones.

Put a new bottom in that leaky old wagon box.

Look your farm business over for leaks and wastes and to figure out ways of stopping these drains on your earnings in 1926.

The wise feeder knows that hunger is the best sauce, and that his stock will gain faster if they are always able to eat just a little more than he gives them.

The Ohio farm family, averaging four members, spends \$200 a year on clothing and clothing accessories, judging by the records 26 farm women have kept this past year in cooperation with the Ohio State university.

An Age of Lawlessness

By REV. C. H. BENSON
Director of Religious Education Course,
Moody Bible Institute, Chicago.

TEXT—In those days there was no king in Israel. Every man did that which was right in his own eyes.—Judges 21:25.

In the land of Canaan the children of Israel seemed to have reached the Utopia of their existence. They were of one family, one language and one religion, with a unity of historical associations and a uniformity of conditions and customs that were favorable for a perfect democracy. But no democracy in history has proved such a dismal disaster.

In a word the book of Judges spells trouble. The children of Israel had thrown off the industrial laws of Egypt, the religious laws of Moses and the military laws of Joshua. "Every man did what seemeth right in his own eyes." Every man was an outlaw.

The contrast between the days of the judges and the present time is striking. It is a lamentable fact that the era of prosperity and progress that we enjoy is an age of lawlessness. Principles, ideas, motives, ideals, are all clashing. Men are turning consciously or unconsciously against established thought. In every relationship of life some of the commonly accepted opinions have been thrown on the scrap heap. Any method or idea that is old is under suspicion. There is a revolt, not organized as yet, against authority of any kind. Lawlessness is the spirit of the times. Analyze every expression and you will find it an unwillingness to be controlled.

The spirit of lawlessness prevails in the home. There is practically no discipline in many English-speaking homes. Every child is a law unto himself. In the majority of homes if there is a voice of authority it is the voice of a child. School is often a jail sentence between good times.

The spirit of lawlessness prevails in society. Despite our vast and expensive system of education America today is the most criminal nation in the world. Every nine minutes a major crime is committed. Every second thirty dollars is stolen. One out of seven marriages ends in a divorce. There is no restraint of tradition because there is no tradition. There is no restraint of modesty because there is no modesty. Men refuse to be controlled by any custom or conventionality.

A spirit of lawlessness prevails in religion. Back of all the unrest and spirit of revolt is the question as to God and the church. The right and ability of God to speak in the affairs of men is questioned. Church discipline must be harmless to be helpful. Church doctrine must be apologetic to be acceptable. The spirit of today is expressed in the words of the psalmist: "Let us break their bands asunder and cast away their cords from us."

When we study astronomy and contemplate the obedience of a multitude of suns and systems to divine law, or remember the marvelous submission of a myriad of glorious angels to the word and will of God, we are astonished that puny, insignificant man alone of all God's creatures should say, "I will not be controlled."

As a matter of fact, all men are controlled. When they imagine they are liberated from the laws of God and are outlaws so to speak, they are still subject to the laws of nature and the laws of men, which are ordained by God. They will not be controlled by God so they are controlled by sin, which is the transgression of the law of God. They are out of harmony with heaven, but they are not out of the control of death, which is the penalty of all transgression of the law. Just why men should be outlaws and prefer the control of sin rather than the control of God is hard to imagine. God is an intelligent being. Therefore his control will be for an infinite, wise end. God is a perfect moral being, therefore his control will be for a good end. God is a powerful being, therefore his control will be for a glorious and victorious end.

"Be wise now, therefore, all ye kings, be instructed ye judges of the earth, serve the Lord with fear and rejoice with trembling. Blessed are all they that put their trust in Him."

Truth Seekers

The truth-seeker is the only God-seeker. No matter where you are, no matter in what age of the world, no matter how far from the central point of any religion, no matter how feeble you are, you are all God's children; and, if there is a wish in your heart for the truth, that wish instantly brings the Omnipotent to your side. Every wish for truth is a wish for God.

The Service of Sin

No vassalage is so ignoble, no servitude so miserable, as that of vice; mines and galleys, mills and dungeons, are words of ease compared to the service of sin; therefore, the bringing sinners to repentance, is so noble, so tempting a design, that it drew even God Himself from heaven to prosecute it.—Baxter.

Baileyboro Buzzings

The school here closed Friday, March 5, after a very successful seven months term. A program was rendered Friday night which was enjoyed by all present.

Prof. J. W. Slone, principal in the school here left Saturday for his home near Causey, N. M.

Miss Edith Jackson left here Sunday for Matador, where she will visit a few days with friends and relatives before returning to her home in Uvalde, Texas.

Misses Grace, Vesta and Annie Mae Brannen, of Littlefield, spent the week-end with relatives in Baileyboro.

Stella Nichols spent Sunday with Mr. and Mrs. Dewey Tribble.

Rollin Artley, of Crosbyton, returned to Baileyboro, Friday, and spent several days here attending to business matters concerning his place.

H. B. Brannen was a business visitor in Arch, N. M., Saturday afternoon.

Faye Calvert and Velma Duncan were Sudan visitors Saturday.

Oetha Williams spent Sunday with Ellen Coffman.

Lois Harvey was the guest of Linnie Hulse Sunday and Sunday night.

J. D. Bayless and Fred Nichols were callers in the Ed Hulse home Sunday afternoon.

A large number of people from this community attended singing at Longview, Sunday afternoon.

D. B. Judy, of Causey, N. M., was a Sunday afternoon visitor in the home of Mrs. M. J. Harvey.

A. L. Hall and family, of Arch, New Mexico, are moving to their farm near here this week, and expect to make this their future home. We are very glad to welcome them to our community.

The prospects for an oil well here are very promising now. Geologists have been surveying this vicinity and have located several places for test wells.

W. H. Heach and wife, of Ralls, Texas, returned this week and moved their household supplies to their home there.

B. B. Holland, of the Mistletoe Creamery Co., of Amarillo, was here Friday, installing a cream station in the store.

**The Austin Nursery
Makes Announcement**

There is a good season now for planting, the best in nine years. Plant a commercial orchard and let people come and pick their fruit. They will pay more than if you deliver it.

Plant peaches, plums, pears, figs, apricots, nectarines, pecans, grapes, jujubes, berries and other fruits. We have new sure bearing varieties like Smith, Carpenter, Leona and Best June peaches and thirty other good ones.

Bruce, Excelsior, Burbank, Happiness, Advance, Santa Rosa plums and fifteen others.

Haupt blackberries and Carman grapes.

Let us make your home grounds beautiful for ever with evergreen shades, and shrubs arranged the right way.

Plenty of old sorts like Altheas, Crape Myrtles, Japan Quinces, Hibiscus, Bridal Wreath, Nandina, Roses and many sorts of climate proof Native shrubs of West Texas.

Stop the northers and the view of your neighbors back yard with Evergreens. We have thousands of Ligustrums, Chinese Arbor Vitae, Amoor Pivot and twenty others.

We make plans for planting your home grounds or parks. We send drawing paper by mail. Fifty years constant improvement. Catalogue. We pay express. Agents wanted.

Y L Community News

Miss Lela Bickel entertained several couples at a weiner roast, Saturday evening.

Several young people of the Y L were present at a party given by Miss Jimmie Pickard, of West Camp, Saturday night. Many interesting games were played then refreshments consisting of cake and hot chocolate were served. A few more games were played and the party broke up at a late hour.

Misses Jimmie and Marie Pickard and Inez Farrell spent Sunday at the Bearden home.

Several young people met at the Y L school house Sunday afternoon and enjoyed several interesting games of tennis. Ruth Bearden and Inez Farrell were victors over every team they played.

C. C. Bearden, wife and son were guests at the home of Mr. Bearden's parents Sunday afternoon.

SENIOR PLAY AT Y L

The Senior Class of Y L will offer a play entitled, "Mother Mine," Friday night, March 19. The admission of 25c for children up to twelve years of age and 35c for those over twelve will be charged. Reserved seats are 50c. The proceeds from this play will be used to help defray the expenses of the class.

This is the first year that Y L has had a Senior Class. There are five in it, three girls and two boys. As there are not enough in the class to put on the play so they have asked the help of some outside boys and girls.

The class will appreciate it very much if you will come and give them your support and they assure you that you will get your money's worth.

Rev. J.E. Payne was looking after business in Clovis Thursday afternoon.

**Filling Your Grocery
Basket Here**

Is a real pleasure, for you know that first of all, it is not going to cost you more than it should and secondly, you can be sure that whatever you place in it will be of the best quality.

**Henington Cash
GROCERY**

**Pure Half and Half
Cotton Seed**

In the 1925 State Cotton contest five farmers made over 3 bales per acre, four of the five planted half and half seed; one of the four won.

If we have a dry season this year, for instance like 1922 and you have little or no grain to sell, you can have cotton as it is a drouth resister. Plant one fifth of your crop in cotton and play safe. But don't plant bad or doubtful seed or long season variety of seed and therefore throw away your early moisture and your opportunity to have good pure short season seed like half planted early.

Absolutely pure half and half seed are now on sale at Bailey County Elevator Company, Muleshoe, Texas. The seed are culled, graded and tested and will be sold at \$2 per bushel. Cash or bankable note

Book your seed now by communicating with

Circleback Gossip

Last Wednesday night while returning from the movie Arthur Damron turned his car over, injuring Tommie Berry, and knocking Arthur unconscious for several hours. George Garner escaped without a bruze. Tommie received a broken leg.

Misses Lela Glasscock and Beatrice Coney have been suffering from the flu. On account of their illness school was dismissed last week but we hope to begin again Monday.

Last Monday morning the Death Angel called in our midst again and this time took one of the beautiful flowers of our neighbors home. The infant son, of Mr. and Mrs. Dudley Kent.

God sent his Death Angel to the home of Mr. Neal and took their Darling mother and wife. But we must remember in our sorrow that death is only a dream and we will meet our loved ones in that Blessed land called Heaven.

A group of young folks spent February 29th, with Miss Ruby Damron.

Mrs. Walter Damron and Henry Damron and wife had business in Lubbock last Saturday week.

Several young folks enjoyed a party at the home of Mrs. Nina Mitchell's Saturday night.

Several young folks gathered at Mr. and Mrs. Walter O. Workman's Saturday night and enjoyed themselves.

Willie Davis entertained the young folks with a party Thursday night.

The school pupils are going around with a frown on their brows all because next week is examination week. Isn't it awful to not know just what you ought to?

Friday night March 12th, the Circleback High School students will put on the play entitled "Safety First." Everybody invited. Admission 15 and 25c. Come it is a real thriller.

Several girls spent Sunday with Miss Lexie Hall.

Ruby Damron and Willie Davis spent Sunday with Virginia Hall.

Bro. Oaks preached for us Sunday in our new building.

Everyone enjoyed a fine sermon by Bros. Payne and Booth, Sunday afternoon at Fairview. Several Circlebackians were there.

Miss Ona Mae Perkins is just up from the chicken pox.

Jack Campbell is visiting Mr. and Mrs. Gorden Sharman.

After many days of illness God saw best to take our Darling neighbor and friend, at twilight Monday afternoon she soared away to Hights unknown. We rest with the assurance that she will greet us on the other shore. We join the husband and little son in sympathy in their hour of sorrow. Mrs. Dudley Kent will be laid away to rest Tuesday afternoon at the Sudan cemetery.

The young folks spent Sunday with Alta Bea Robb.

Jess Garner and wife spent Sunday with W. C. C. Elmore and wife.

Everyone enjoyed a fine singing Sunday night.

Miss Ruby Damron spent the week-end in Portales, N. Mexico.

Mr. and Mrs. Kay Anderson, of Wichita Falls, spent the week-end with Ha Robb and wife.

Willie Davis spent Sunday with Pauline Kyzer, of Beaula.

Miss Rosa Hammock, Erick Allan, Oland Grissom and Geo. Garner spent Snday evening with Thomas Berry.

Mrs. Berry is up again after a long spell of illness.

Reporter.

Animals and Insects

Prepare for Winter

Ants, bees, wasps, flies and many other insects protect themselves during the winter by securing food supplies and constructing retreats.

The wonderful work done by ants, bees, wasps, spiders, butterflies and worms has been studied by many naturalists and researches have been charmingly described by Lubbock, Fabre, Maeterlinck and other able writers. The underground apartments and terraced homes of the ants, their domestic life, social organization and thoughtfulness, are among the great wonders of nature.

These extraordinarily intelligent insects not only store away an abundance of food for winter, but also they provide aphides to be milked and they cultivate fungi gardens and manufacture many food substances while passing the winter months underground.

Genius, individuality and temperament in animals enable them to solve all the problems of winter which they may at any time encounter. These vary in individuals of the same species. Among any group of young animals or birds or insects you may notice individuals varying in fear, timidity, curiosity, suspicion, sociability, aggressiveness and initiative. Hardly two will be found with similar characters and temperaments. They differ as widely as the members of a single human family. The strong and fearless members of any species give the leadership and develop the customs which enable them to meet the conditions of winter.

Birds and Mankind

of Long Association

The association between certain birds and man is immensely ancient, says the London Times. As with sheep and oxen and horses, and even more with the dog, the attempt to assign a date to the origin of our farmyard birds is foiled by the mists of antiquity.

The scanty company of farmyard species has been recruited in very different ages. The turkey could not join us until we discovered America, and probably far the oldest is the rock-pigeon. When man learned how to grow grain, the dove found a new attraction in his company.

When man became a builder in stone, he built also for the swallows and doves. The swallow finds a home today in the cowsheds that mimic his ancient caves, while the house-pigeon, like the house-martin, clings to the outside of man's mimic rock faces and builds its nests on his triumphal arches and against his cathedrals.

Gregorian Calendar

The present calendar was adopted in the sixteenth century, the Julian or old Roman calendar having become greatly erroneous. Luigi Lillas Ghiraldi, frequently called Aloysius Lilius, a physician, of Verone, projected a plan for amending the Julian calendar, which, after his death was presented by his brother to Pope Gregory XIII. To carry it into execution, the Pope assembled a number of prelates and learned men. In 1577 the proposed change was adopted by all the Catholic princes, and in 1582 Gregory issued a brief abolishing the Julian calendar in all Catholic countries, and introducing in its stead the one now in use, under the name of the Gregorian or reformed calendar, or the "new style," as the other was now called the "old style." The Gregorian calendar was not adopted in England until 1752.

Men of Great Strength

It is difficult to compare strong men. Each has his own special tests, at which he is superior to the rest. A recent newspaper article stated that unquestionably the strongest man of modern times was Louis Cyr of Canada, who was considerably stronger than Sandow. Breitbart, who died in October, 1925, is said to have come nearer emulating Sandow than any of the latter's many imitators. Certain strong men excelled Sandow in specific feats. For instance, Arthur Saxon was the best lifter of weights ever produced. Steinbach, Inch, Ashton, Travis, Rolandow and Lurich, each had some unusual performance to his credit.

Forces That Control

The tone of society is the result, not so much of the deliberate attempt of the members of it to influence each other, as of the unconscious action and reaction of their characters. Nor can anyone easily measure how great his own contribution has been to the good or evil spirit that prevails around him, or how, by casual deeds or actions, or even looks, he may have influenced the lives of others. We do not carry on our warfare at our own charges, but the whole weight of the evil that is in our society is dragging us down, and the whole force of the good that is in it is helping us up.—Edward Caird.

Lace-Making Old Art

Lace-making, embroidery and fine needlework in general are credited to the Greeks, and its antiquity goes back to mythology almost. Minerva is said to have originated the art of pictorial needlework. Many books on lace-making and embroidery have been traced back to the Middle Ages. The Greeks are thought to have brought it from Egypt, and the Chaldeans, whose civilization was earlier than that of the Egyptians, had developed it to a fine degree also. France gave it wide popularity after the Christian era.

When You Catch Cold Rub on Musterole

Musterole is easy to apply with the fingers and works right away. Often it prevents a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster without the blister.

Musterole is a clean, white ointment, made of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frost-bitten feet—colds of all sorts.

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

EAT DANDELION GREENS IN EARLY SPRING

Dandelion Greens Are Useful in Many Ways.

(Prepared by the United States Department of Agriculture.)

On almost any pleasant April or May morning, in the parks or grassy vacant lots in eastern towns, foreign-looking women may be seen gathering dandelion greens in huge bags which they carry on their backs. They are probably Italian or French women who have a dietary tradition about eating dandelion greens in the spring, when they are not more than two or three inches long, before the plant begins to flower.

Apparently these Europeans are better acquainted than Americans with the value of dandelion greens as food, or they have less objection to the characteristic bitter flavor of the leaves, or know how to overcome it. Dandelion greens are useful in about the same ways as other green-leaf vegetables, when properly cooked, which is the shortest possible time, or not at all. They supply vitamins and needed minerals, and those who are accustomed to their flavor find that they afford an agreeable change. The time to gather dandelion leaves is very early in the season when they are young, tender and least bitter. The crown, roots and large outer leaves are discarded.

Many methods of preparation have been tried to modify the bitter flavor of dandelion greens. The method of long boiling in several waters is not recommended by the United States Department of Agriculture, as most of the valuable food matter in the greens is then thrown away. A better method is to combine the dandelion greens with other vegetables or flavors which modify the bitterness.

Raw dandelion leaves or those cooked without water are less bitter than those that have been boiled. Vinegar or acid dressings help, and so do foods of strong flavor, such as celery and some meats. Crisp salt pork or bacon is frequently served with dandelion greens for this reason. Blends of dandelion and other greens are better than the dandelion alone. The recipes below indicate some of the ways these valuable greens may be used:

Wilted Dandelion Greens With Bacon.
2 qts. or 1 lb. dan- ½ cupful water or delion greens less
½ lb. bacon 4 teaspoonfuls
½ cupful vinegar 1 sugar
or less 1 teaspoonful salt

Panned Dandelions With Cabbage and Salt Pork.

¼ lb. dandelion greens finely shredded cabbage	¼ to 1-3 lb. salt pork streaked with lean
1½ to 2 teaspoonfuls salt	

Clean the leaves thoroughly. Cut rather fine with scissors, to avoid stringiness. Fry the bacon until crisp and delicately brown; pour off all but four tablespoonfuls of the fat. Add the water, vinegar, sugar and salt to the remaining fat, bring to the boiling point, pour over the dandelion leaves and serve. Slices of hard-boiled eggs, or boiled beets or carrots may be simmered for a few minutes with these greens. If eggs are used, the sugar is omitted.

Dandelion and Turnip Greens With Boiled Mutton.

1½ pints dandelion leaves	Salt, pepper
2½ pints turnip greens	2 tablespoonfuls melted mutton fat or butter
¼ lb. (¾ cupful) diced boiled mutton	4 tablespoonfuls fine sifted crumbs (may be omitted)
1-3 cup strong mutton broth	

Boil the greens in salted water to cover for 10 minutes. Drain, mix with the cooked meat, broth, fat, seasonings and crumbs. Cook for a minute or two and serve.

Dandelions in Blends.

Dandelion greens may be panned or boiled in blends with other greens, the proportion depending on the mildness of the dandelions and the kind of other vegetable used. Turnip or mustard leaves, kale, or cabbage sprouts, make good combinations with dandelion greens. Four or five times as much of any of these should be used as of dandelion, when the blend is panned; from six to eight times as much if it is boiled. The dandelion, it will be found, adds to the flavor of the blend.

VACUUM CLEANER IS HANDY DEVICE

Few Articles Need Be Moved and Dust Is Avoided.

(Prepared by the United States Department of Agriculture.)

When a room is cleaned with a vacuum cleaner, says the United States Department of Agriculture, the room is first dusted, then the vacuum cleaner is used on upholstery, hangings, walls, and carpets or rugs, and finally the floor is dusted. By this

method of cleaning fewer articles need to be moved, no dust is scattered, and more dirt is actually removed. A vacuum cleaner, therefore, saves labor, even though with some types part of the work is harder than sweeping.

Good Tooth Wash
A dash of lemon juice in water makes a good tooth wash and sweetens the breath.

Kind of Cookstove Used Is Determined by Fuel

The kind of cookstove chosen will be determined largely by the available fuel supply, and its size by the amount of work to be done with it. It should be of reliable make, not only to insure good construction but also to make sure that parts can be easily renewed as needed. A larger range than is needed for cookery is often selected in homes where the kitchen fire is used for cooking and also for heating in cold weather. It would be wiser in many cases to use a liquid-fuel stove in summer for cooking purposes, or else to have a small range for cooking and an additional heater for warming the kitchen in winter, thus saving fuel and avoiding the overheating of the house in summer. In houses that have a furnace or other central heating system, the kitchen should be provided with a radiator or hot-air register for heating purposes. It will then be possible to use a liquid-fuel stove for cooking in winter as well as in summer, and the price of a kitchen stove or range may be saved if desired, as both types of stove will not be needed.

Apples Cooked in Sirup Excellent Dinner Dish

Make a sirup in the proportion of one cupful of sugar to two cupfuls of boiling water. Flavor slightly with vanilla or lemon. When the sirup is boiling drop into it as many whole apples as will be needed, after washing, coring and paring them. There should be enough sirup to cover the apples. Cover the saucepan and allow the apples to cook slowly, until they are tender. Remove them to a serving dish with a skimmer, and fill the centers with jelly. Serve hot, says the United States Department of Agriculture, with the sirup or with hard sauce, made as follows:

Cream half a cupful of butter with one cupful of powdered sugar. Add two tablespoonfuls of cream, blending it thoroughly, and half a teaspoonful of vanilla or any desired flavoring. Pile on a dish and set aside to become

LIVE STOCK

WASTE MILK GOOD FOR BROOD SOWS

There is no feed better than milk for the brood sow during the two months or six weeks before farrowing. The size and strength of the pigs will be determined by the kind of feed the sow gets during this period and she should have some protein feed from animal sources. Skim milk, buttermilk, fish meal or tankage furnish such nutriment.

"In the absence of milk, either the fish meal or tankage may be used," says Prof. W. W. Shay, swine extension specialist at the North Carolina State college. "Experiments conducted by Earl Hosteller of the experiment station staff show that the difference in feeding value is small. It is mostly a question of cost. The same is true of skim milk or buttermilk unless there is too much rinse water in the buttermilk."

"However, unless milk can be bought at about 38 cents per hundred pounds, it would be profitable to buy the fish meal or tankage; otherwise, the feeder would be giving the milk producer a share in the profits from the feeding. On the other hand, when the milk producer sells his milk for hog feed at 38 cents per 100 pounds, he is letting it go for 44 cents less than hogs would pay him for the same price. This is based on corn at \$1 per bushel and the price of fish meal or tankage at \$70 per ton.

"Here we have a situation where skim milk or buttermilk is worth 82 cents per 100 pounds to the producer and only 38 cents per 100 to the hog feeder and that much only when the ratio and high level of corn and hog prices obtain, and he feeds the milk in the proportion of three pounds of milk to one pound of corn."

Mr. Shay states that the man who buys milk must also consider the greater weight and poor keeping qualities of this product as compared to fish meal and tankage.

Carrying Unproductive Sows Is Very Expensive

Pork producers go to considerable expense in carrying sows and gilts that fail to return their owners a profit, according to records gathered by the farm organization and management department of the college of agriculture, University of Illinois, from 25 McLean and Woodford county farms. The records from these farms for one year show that only 85 per cent of the sows and gilts which were bred weaned litters.

The 25 farms from which the records were obtained averaged nearly 19 sows and gilts a farm, or 470 in all. Of this number, 16, or 3.4 per cent, died between the time of breeding and the time the litters were weaned. Twenty-eight sows and gilts, or 6 per cent of the total number on the 25 farms, proved to be barren or aborted. Between farrowing and weaning time, 26 of the sows and gilts, or 5.5 per cent of them, lost all their pigs from various causes, leaving 400, or nearly 85 per cent, which produced pigs for the feed lot.

"While a 100 per cent pig crop can hardly be expected, the overhead cost of carrying unproductive breeding stock may be greatly reduced," R. C. Ross of the farm organization and management department pointed out. "The early removal of nonbreeders from the herd and the practice of feeding them out for an early market reduces feed cost and takes advantage of a market which is usually favorable. The greatest saving, however, may be made by reducing losses after farrowing and thus securing profitable litters from a larger proportion of the sows bred."

Live Stock Items

Hogs following cattle in the feedlot are generally handled at a profit.

Nothing is more important to successful hog raising than clean, dry quarters for the breeding herd.

Charcoal for hogs is one of the essentials in the feed lot, and one of the most neglected. Hogs that are off their feed can usually be brought into condition quickly, with a few chunks of charcoal.

Experiments at South Dakota State college have shown that lambs do a good job of picking when turned loose in the cornfield. They will not only pick the silks of ears, leaves of corn and shucks on the ear, the parts of the corn plant usually wasted, but they will also find and eat weeds for variety.

Clover hay makes an ideal roughage for pregnant sows.

When spreading manure or other fertilizer around orchard trees, apply it evenly to an area about twice the spread of the branches, which is the feeding reach of the tree.

Two or three pounds of corn silage a day makes a good addition to the legume hay for nursing or pregnant ewes. An all-silage ration is poor stuff. Timothy hay is not recommended for sheep.

CENSUS REVEALS ASTONISHING FACT

8,549,511 Working Women in United States

MRS. W. M. BAILEY
R. F. D. No. 5, BOX 27, ATLANTA, GEORGIA

Many Say Lydia E. Pinkham's Vegetable Compound Helps Keep Them Fit to Work

8,549,511 women would be a vast army. According to the 1920 Census of Manufactures, that is the number of women and girls employed in all trades in the United States.

Napoleon said, "An army travels on its stomach." This army of women travels on its general health. Every working girl knows that time lost through illness seldom is paid for and seldom can be made up. Employers demand regularity. If she

wants to keep her job or hopes for a better one, she must guard her health.

Atlanta, Ga.—"My system was weak and run-down, and I was tired. I was this way for five years or more. I read your advertisement in the papers and I decided to try your medicine, the Vegetable Compound, but I did not begin to take it regularly until after I was married. I got so much good from it that I feel fine and have gained in weight. I work in a broom shop, but my work is not so hard on me now, and I keep my own house, and work my garden, too. I am telling all my friends of Lydia E. Pinkham's Vegetable Compound and how it has helped me."—MRS. W. M. BAILEY, R. F. D. No. 5, Box 27, Atlanta, Georgia.

Missouri Woman Helped
Parkville, Mo.—"I am proud to recommend Lydia E. Pinkham's Vegetable Compound. I was so ill that I could not lie down at night. Then I got my husband to go to the store and buy me a bottle of Lydia E. Pinkham's Vegetable Compound and I was up and around before the first bottle was gone, although I only weighed about ninety pounds. I took six or eight bottles and was able to do all my housework, washing and ironing, take care of my five boys, and tend to my chickens and garden, where before I had to hire my washing and part of my housework."—MRS. ANNA COLE, R. R. 2, Parkville, Missouri.

It isn't necessary to go to a foreign land to do good.

TWEED CAPE-COAT IS POPULAR; MATCHING OF SCARF AND HAT

HAS the new coat you are visioning for spring a cape or at least a capelet effect? If not, why not? For 'tis to ignore a style decree to appear capless this season.

Having decided that for daytime wear in country or about town the cape-coat's the thing, what question is next in order? Material! A word of five letters gives immediate answer—tweed! For further suggestions as to an ultra-smart springtime utility coat study the model pictured here-with. It's the very latest, in every detail.

Handsome colorings inject a note of enthusiastic interest not only in the season's tweeds but in woolen fabrics in general. Swagger tweeds which have a decidedly mannish character—stout bold checks and stripes. Contrasting these are tweeds in lovely

A Springtime Utility Coat.

heather and moorland tones which tune in so charmingly to springtime beauty. It's the fashion, too, to wear a bright scarf with the tweed coat which but accents the spring color scheme.

If you are wanting a fur collar on your coat of tweed you will find the mode in perfect accord with your wish. If you prefer, a separate fur neckpiece is considered quite as smart.

Unique tailoring features many a tweed coat, such as for instance, a wide plaited skirt section introduced across the back of the coat, with a stitched slot seam extending from the neckline between the shoulders halfway to the waistline at the back. Some straightline models have a subtle flare

shown to the right at the top is developed of plaid taffeta bordered with machine-stitched solid-colored silk. Of course, the color tone is vividly brilliant, designed, no doubt, to be worn with one of the very smart navy blue tailored suits or possibly with a navy rep coat-dress of swagger style.

As the season advances grows the conviction that we are at the threshold of an era of wide-brimmed hats. Also dresser types are forecast. These will be accompanied with handsome hand-worked scarfs and neckpieces, after the manner of the charming models here pictured.

Exotic coloring marks the richly embroidered scarf of georgette with hat of crocheted straw illustrated to the left,

Scarf and Hat Matched.

Introduced at the sides by means of plaits which declare themselves only as one steps back and forth.

Among novelty woolen coats, a conspicuous featuring of black and white effects gives zest to the mode. Black and white plaids are boldly patterned, the idea further developed with either white or black fur edgings with fur collars to match.

Various clever details contribute to the interest of the spring tweed coat. An attractive touch of color, for instance, is supplied with bindings of braid or pipings of cloth in a solid shade. The garment here pictured was thus colorfully detailed. Another new finish instead of piping or hemming is to button-hole the edge with wool yarn.

It is accessories of this handsome mien which will elaborate the coming summer costume.

It is an all-over conventional patterning which contributes a colorful splendor to the millinery set of scarf and hat centered in the picture. An almost solid darned stitch is used working out an effective multicolored motif.

The latest Parisian idea is for the hat to repeat the color of the frock with which it is worn.

The latest style note in millinery is the brimless hat, shaped to the head and expertly draped, preferably of colorful gros grain ribbon.

WHITE-TAILED DEER

"It's most interesting," said the White-Tailed Deer, "to belong to our family. We change so from place to place."

"Whatever do you mean?" asked the Sinaloa White-Tailed Deer, a small and delicate little deer known as Whitey.

"I mean," said the White-Tailed Deer, "just what I say."

"But what you say might mean almost anything," said Whitey. "Pray tell me more, and explain yourself more clearly."

"I will do that for you, Whitey," said the White-Tailed Deer, "because I like you very, very much."

Whitey looked very happy and smiled sweetly.

"You see," said the White-Tailed Deer, "I am usually known as the Osceola White-Tailed Deer. When my family and relations live up North they are strong and powerful. Their horns are larger and stronger, too."

"Then as the different relations move down further south they become less strong, more delicate, and when they reach way, way South they are very tiny and very delicate, that is, they are very small for members of the deer family. They aren't small like ants and flies, for instance."

Whitey laughed and so did the White-Tailed Deer.

"I didn't imagine you grew as small as all that," said Whitey. "I believe I am a member of your family, too."

"Yes, you're a relative. Well, I am glad you didn't think that as my relations moved on down South they became so small that one couldn't see them. But they do grow smaller as they move South—that is the branch of the family are smaller down South than the branches of the family who live up North."

"That is most interesting," said Whitey, "but I always have to stop and think when you speak of branches of a family. I always think of branches with trees, or trees with branches."

"To tell you the truth I do, too," said the White-Tailed Deer, "but I try to use the word in other places."

"My Beautiful Child," She Said.

too, and not make the poor word feel it only has one place in the whole world."

"You're good to it," said Whitey. "I believe in being nice to everything I can," said the White-Tailed Deer, "even to words!" And Whitey smiled.

New Mrs. White-Tailed Deer was talking to her child. She was also known as Mrs. Doe.

"My beautiful child," she said.

"You're my beautiful mother," said the young deer.

"Ah, you're my young dear, you are," said his mother.

"I suppose I am. In fact I don't see how I could be anything else and be your child," said the young deer.

"Thank you for paying your mother such a nice compliment," said Mrs. White-Tailed Deer.

The young deer looked at his mother in surprise.

Then Mrs. White-Tailed Deer smiled. "You did not know what I meant when I called you a young dear."

"I meant you were a dear young thing, a sweet young thing, and you thought I meant you were a young deer which is spelt in another way."

"Of course you are that, too, for you belong to the deer family. But you see I thought you, understood and so I thought you were paying me a compliment as I was paying you one."

"I see," said the young deer. "I do wish to pay you many compliments for I love you, Mother Deer. But won't you tell me a story—about the ways of our family?"

"Yes," said Mrs. White-Tailed Deer. "I will. You know we are given a special name of white-tailed deer, and we live in the wild forests. So wild are they that we are rarely captured."

"There are other deer families which are often mixed up with us, but you must remember that our family is strong and knows how to look after itself."

"But you have come to me in the zoo and we are treated well and given a good time. Some animals don't care to have their children born in the zoo, but we don't feel that way about it, we white-tailed deer mothers."

"We know the zoo life will agree with our darlings and we will have their beautiful companionship."

"But it is late now and that is all for this time!"

"I'll tell you why they wouldn't insure you—"

"You allowed constipation to become chronic—until finally it resulted in organic disease."

"People don't realize how insidious constipation is. Its first effects are hardly more than annoyances—headaches, loss of appetite, sleeplessness and the like. But in time, as the body is subjected to continued intestinal poisoning, it may lead to high blood pressure, rheumatism, diabetes or even Bright's disease."

"Stop constipation if you wish to live long. Take a little Nujol every day—that will keep you regular."

Nujol relieves constipation in Nature's way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is safe, gentle and natural in its action.

Nujol makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

Nujol
THE INTERNAL LUBRICANT
For Constipation

Mother! It's Cruel to "Physic" Your Child

DR. W. B. CALDWELL AT THE AGE OF 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated infants and children had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all children's little ills, he did not believe that a sickening "purge" or "physic" was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which helps to establish natural bowel "regularity" even if the child is chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy

bowel movement, but, best of all, never gripes, sickens or upsets the most delicate system. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine and just see for yourself.

It's only \$1.50 per year

If you want an honest man for commissioner of Precinct No 1 Bailey County Texas. Vote for Joshua Blocher.

Mrs. R. B. Boyle received 1000 Rose Comb White Wyandotte baby chicks last week.

If you want an electric motor of any kind or a fan let me give you my prices. We handle lamp globes in all watt sizes. In motors we can give you the General Electric, Western and Century. See me before you by. T. B. Fry.

Time to swat the fly.

YOU MAY HAVE PELLAGRA

AND NOT KNOW IT
EARLY SYMPTOMS—Nervousness, stomach trouble, despondency, shortness of breath, burning feet, constipation, brown or rough skin, tingling sensations, smothering spells, diarrhea, loss of sleep, loss of weight, dizziness or swimming in head, general weakness with loss of energy.
You do not have all these symptoms in the beginning, but if you have any of them YOU MAY HAVE PELLAGRA. My FREE BOOKLET, "THE STORY OF PELLAGRA," will explain. My treatment differs from all others, and is endorsed by a State Health Department, physicians and hundreds who have taken the treatment. Write for Questionnaire and FREE Diagnosis.

Garden Seed, Bell Brand

Buy Seed in the bulk

We now have a complete line of bulk garden seed. Come in and look them over.

Bailey County Elevator

"YOU ARE ENTITLED TO KNOW THE FACTS"
DODGE BROTHERS, INC.

Over a Cliff in this STEEL BODY without injuring the DRIVER!

A careless driver . . . A triple somersault over a cliff . . . and this is the car—a Dodge Brothers all steel safety car.

A triple somersault over a cliff with the car you see in this picture! Such was the experience of its owner, who came through the fall uninjured.

After an hour of repair work, he drove the car from Montana to Minneapolis—a more sensible driver and much wiser.

All steel construction saved his life, as it has saved many other lives in the past, and will save thousands more in the future

Dodge Brothers print this advertisement because they believe motorists are entitled to all steel safety and should insist upon it.

That's why Dodge Brothers introduced all steel construction more than eleven years ago—and recently announced additional all steel safety features.

The streets are swarming with 20,000,000 motor cars—millions more are on the way.

Safety is the issue. Armor yourself and your family with steel.

Dodge Brothers Motor Cars—both open and closed—are all steel in the strictest sense of the term. Steel reinforced by steel—framed, braced and buttressed by steel—with all seams solidly and permanently welded together by electricity.

Slim steel pillars replace the old bulky wooden corner posts—permitting unparalleled driving vision—a safety feature of the first importance.

Compare such bodies with the usual wood, or wood-and-metal body, and you will be astonished that every automobile builder has not adopted this advanced safety construction.

Remember, also, that safety is the watchword of Dodge Brothers construction—throughout, as witnessed by Dodge Brothers exceptionally large, quick-action brakes, and the exceptional ruggedness and dependability of Dodge Brothers axles, frames, steering parts, and other vital units.

This car will continue to be a "four".
