Too Many Pure-Breds?

Grandpap had his chance to go in for pure-breds. "No," he said, "too many already."

Again opportunity knocked at father's door. "The breeding business is being overdone," father declared.

Today the same chance is presented to you. Many persons will still tell you there are too many pure-breds. Don't believe them. It is the same old bogey-the scarecrow with a heart of straw that fooled grandpap and father. LESS THAN TWO PER CENT OF OUR CATTLE ARE PURE-BREDS. These are the facts-the 98% are scrubs or grades!

It is too late for Grandpap; and for father -his chance may be gone; but the road is open to YOU. Join those who have become independent by breeding good cattle. Thousands of men in the United States who went in for pure-breds ten years ago are now independent. Tens of thousands who go in now will become independent during the ensuing decade. Our hope is that you will be one of them. Now is the time to buy, when all prices are low. Get ready to share in future high prices.

For instances showing what purebreds have done for farmers in average circumstances we refer you to the week-by-week articles in THE COUN-TRY GENTLEMAN. It combs the country for every sort of news of interest and profit to farmers, and this very ad is due to its desire to be of service. It is really hard to contrive more pleasure and profit than \$1.00 spent for a year's subscription (52 issues) to THE COUNTRY GENTLEMAN will bring you.
