

The Cisco Round-Up

41ST CONTINUOUS YEAR.—NO. 41.

CISCO, TEXAS, THURSDAY, MARCH 9, 1922.

EIGHT PAGES TODAY

ARMS TREATY INFLUENCED BY WILSON IDEAS

WASHINGTON, March 8.—Renewed reports are heard that the views of former President Wilson are quietly influencing the course of the four-power Pacific treaty in the senate.

At least, the most intimate friends of the ex-President, who supported his futile effort to have America enter the league of nations, are closely in touch with the fight against the treaty, and are more or less indirectly seeking its defeat.

Recently reports that Wilson was actively directing efforts of the treaty's opponents were denied by Senators Pat Harrison of Mississippi, Carter Glass of Virginia and other prominent democratic leaders.

But about that time, Joseph R. Tumulty, Wilson's former secretary and always his staunchest supporter, conferred with Senator Borah of Idaho, leading irreconcilable, Bernard M. Baruch, former chairman of the War Industries Board and one of Wilson's closest friends, also has conferred with Borah, and has been in constant touch with him. Norman Davis, former under-secretary of state and another of Wilson's friends, likewise has communicated with the Idaho senator.

Bases All Opposition.
The opposition of all of these men to the four-power treaty is said to be based on their belief that it is an alliance which is out of harmony with the league of nations, likewise to produce additional alliance and future trouble. This view is said to be in accord with that held by former President Wilson.

Opponents of the treaty are now claiming they have thirty votes mustered against it, a contention which the administration forces will not concede. Twenty-six democrats are said to oppose the pact, to which are added four republicans. This would give a total of thirty negative votes. Counting probable absentees, only two or three more negative votes would be required to defeat the treaty, if the reckoning of the irreconcilables is correct.

Senator Lodge served notice on the senate Tuesday that he would call the treaty to a vote if debate on it did not proceed. He disclaimed a desire to force a vote, but said he felt obliged to press for a decision as quickly as possible. Half a dozen senators, however, are preparing to speak. Lodge, after conferring with the president Tuesday, declared the treaty situation in the senate was satisfactory.

Senator Kellogg of Minnesota, speaking as one of the administration supporters of the treaty, urged its early ratification without reservation or qualification. He declared the treaty does not involve the United States in objectionable foreign engagements and does not commit it to any course of action.

TRY TO REVIVE POTASH TRADE WITH AMERICA

BERLIN, March 8.—Germany's potash industry, disrupted by the war, is rapidly getting on its feet again. Within the last few months, according to recent announcement, Germany has concluded arrangements for resumption of her potash trade with all European countries, except Poland, and also a number of overseas countries including United States. The value of the total potash output in Germany in 1921 is estimated at 2,500,000,000 marks.

In a review of the potash business in the Transatlantic Trade Journal for January published by the American Chamber of Commerce in Germany it is stated that relations with dealers in the United States recently have been re-established. The American consumers now being considered, as before the war, Germany's largest and most important market for this branch of trade.

The report says that Germany, in reviewing the industry, has felt the competition of Alsac-Lorraine, especially in the American market, and bordering countries owing to the favorable freight rates.

Of particular interest to America is the statement of the Chamber of Commerce that the potash industry established in the United States during the war is not considered in the least as a hindrance to the German export trade of the near future.

The Journal estimates that in 1918 Germany exported about 60 percent of its entire potash production while the export trade for 1921 averaged about 5 percent of the business done in the last year.

BAIRD ACTIVITY BEING RESUMED

BAIRD, Mar. 8.—Oil in Lane & Henderson's No. 1 well began showing Monday with the well only 580 feet deep. Work on the well had been suspended during the cold spell and the first few strokes of the tools after resumption of operations brought forth the showing of oil. The drillers are proceeding very cautiously as judging from the logs of the wells in the new pool two miles west nothing should be expected above 620 feet.

Practically no work was done anywhere in the country during the recent cold spell, but again activity is evident in all directions, and the oil men are pushing work on their wells, many of which are headed for the shallow sands.

Caving in the Mobley well on the J. Clark lease is giving trouble, with the well around 450 feet deep. A nice showing of oil is reported from that well.

A new well reported good for twenty barrels has been brought in on the Homan Peoples lease. Unken & Sons, adjoining this lease, have just spudded in their No. 7 well.

The Frank Kirk well on the Scott ranch is drilling below 450 feet. Drilling on the Phippen lease by Arthur McElreath is proceeding around 585 feet.

J. L. Kennedy is drilling around 400 feet and making good progress. Several additional locations have been made in this vicinity since Mr. Kennedy moved the rig on his lease.

Charles Dutton of Ranger Tuesday moved five loads of timbers and machinery onto the Cathey lease, east of Baird. The material is for a new well to be started on that lease, where the oil is found in a 1,700-foot sand. Mr. Dutton will clean out the old Cathey well and bring up the production.

DIFFERENCES DISSIPATED

WASHINGTON, Mar. 8.—The declaration that we are making splendid progress toward the dissipation of agricultural differences, made by President Harding in a letter to Managing Director Meyers of the war finance corporation, was made public today at the white house.

STONE BILL IS SIGNED.
Nor Ross today signed the Stone bill, abating the billion-dollar anti-trust suit recently filed in Covington county against the life, casualty and indemnity insurance companies of the state.

RURAL PHONES ARE INSTALLED

MORAN, March 6.—The Moran Rural Telephone Company is putting in a complete rural telephone system, with 250 patrons, owning their own lines, boxes and central station. By this means they are able to secure more satisfactory service and at the same time cut their rate about 75 percent. It is expected to have the system in full operation next week. By hearty co-operation and utter confidence in each other, our farmers are able to accomplish almost anything they desire.

POWELL OIL CO. ACTIVE AT MORAN

MORAN, Mar. 6.—The Powell Oil Company, which has a number of shallow wells on the Terry lease, four miles southwest of Moran, continues to bring them in. They average about 10 barrels, and are brought in at about 375 feet.

One of the weak producers was shot Saturday and at once responded with 13 barrels natural flow. All the weaker wells will now be shot.

This said that the Powell Oil Company is producing from has been producing for seven years, the Magnolia Oil Company having two wells on the same tract that have been producing on the pump for that length of time.

BAYLOR TEMPORARY CHAPEL TO BE BUILT AT ONCE
Waco, March 8.—Out of the funds provided by the Executive Board of the General Baptist Convention of Texas, Baylor University will immediately erect a temporary chapel and library building. This structure will be located on that part of the campus between the museum and the heating plant. It will be a one story structure, 90 by 150 feet in size. The plans of the architect call for a seating capacity of from 1600 to 2000 people. In this temporary building both the chapel and the library will be housed.

This frame building will serve as a chapel and library building while the new buildings are under construction. The recent meeting of the Executive Board of the Baptist General Convention of Texas recommended the erection of the new chapel and library building at the earliest possible date.

FOREIGN TRADE SHOWS FALLING OFF IN JANUARY

WASHINGTON, Mar. 8.—The decline in the value of America's foreign trade in January, as compared with January of 1921, is further emphasized in statistics as to trade by continents and countries for the first month of the present year, made public Tuesday by the department of commerce.

Exports to Europe totaled \$148,903,246, compared with \$325,213,537 in January a year ago, and they totaled \$219,657,511 for the seven months ending last January, against \$2,440,597,216 for the seven months ending in January, 1921.

Imports from Europe for January, last, amounted to \$98,413,403, compared with \$59,576,643 for January a year ago, and they totaled \$457,170,132 for the seven months ending in January, last year, against \$521,662,233 for the seven months ending in January a year ago.

Exports to South America in January, last, were \$12,893,563, compared with \$61,430,259 in January a year ago, and they were \$102,055,391 for the seven months ending last January, against \$399,744,900 for the seven months ending in January a year ago.

Imports from South America for January, last, were \$23,302,943, compared with \$30,750,498 for January, 1921, and \$154,988,429 for the seven months ending last January, against \$355,431,576 for the seven months ending the previous January.

Exports to Asia were \$46,073,956 last January, compared with \$73,746,635 for the previous January and \$290,354,425 for the seven-month period ending last January, against \$418,191,550 for the seven months ending January a year ago. Imports were \$42,780,631 for last January, compared with \$46,313,526 in January a year ago.

EGYPT ROUSED BY ARREST OF SAID ZAGHLOUL

CAIRO, Egypt, Mar. 8.—The hitherto scattered forces of opposition to British rule in India were consolidated by the arrest and deportation of said Zaghloul Pasha, Egyptian Nationalist leader.

Egyptians—men, women and children—seem to be determined this time to win their independence or die. There are signs that their patriotic spirit has grown stronger.

The country remained without a cabinet after Zaghloul's deportation because there was not to be found in Egypt a leader who dared to assume the responsibility of forming a new ministry so long as Lord Curzon's scheme to maintain Great Britain's grip on Egypt remained hanging over the head of the country, as one paper put it, like the sword of Damocles.

Most of the schools, elementary, secondary as well as those of higher education have been forced to close their portals because their students have gone out on strike as a sign of protest against the deportation of Zaghloul Pasha.

Departments of the government have only the semblance of running concerns, since the natives employed in them have walked out in sympathy with the great army of strikers composed of lawyers, educators, merchants, doctors and cabmen, who have thus registered their dissatisfaction with the present situation.

Great interest is being taken in the subject of convoking a national conference of the representative bodies and other men of opinion in the country with the idea of organizing all the nation in the big fight for freedom.

RICHARDSON IS COMMENDED FOR RADIO SUPPORT

G. C. Richardson, secretary of the Cisco chamber of commerce, has received a letter from J. Austin Hunter, assistant marketing agent of the market and warehouse department at Austin, commending him for the cooperation offered by the local organization in making a success of the radio market news service. The letter says:

"I appreciate very highly your splendid letter of the 27th, in which you assured me of your co-operation in making the Texas radio market news service a success. I am especially pleased to notice your grasp of the importance of this matter, and the concrete steps you have taken to insure the service doing the greatest good, both by the release to the daily newspapers and the use of the bulletin boards in the post-office. This would be ideal."

"I will send you in a few days a copy of a letter from George Andrews of the university, who is our technical adviser in matters of equipment, which will give you information on this line which should prove of interest and value to you. I will also send you a list of licensed amateurs in our vicinity, who, I know, will be very glad to lend their co-operation in making this matter highly successful."

"We are at present sending out over 375 meters at 3 p. m. each afternoon by radio telegraph, regular market releases, and at present are covering the Kansas City market on fruits and vegetables, as well as local markets. Acreage figures, crop and general conditions, also go out, as the information received is deemed of sufficient importance to interest all parties. The radio-phones equipment we hope to have in operation here in the near future, and this will make it most desirable to amateurs who are not familiar with the telephonic code, as no knowledge of the code at all will be required."

Leaders Plan Quick Action On Bonus Bill

WASHINGTON, March 8.—Republican leaders disclosed today that they are considering a plan to put the soldiers' bonus bill through the house under a suspension of the rules which will shut out amendments and limit debate to 40 minutes. Under such a plan a two-third vote will be necessary to pass the measure, but the leaders believe this majority will be obtained with votes to spare.

BROWN TO PUT FORCE AT WORK ON SOUTH ROAD

The board of county commissioners, in special session this morning, adopted the following order:

It is understood and agreed by and between the members of the board of county commissioners, that provision be made for the payment of the \$80,000 in road warrants by setting aside \$80,000 out of the funds derived from the sale of Eastland county road bonds.

A warrant for this amount of money was recently issued in favor of the Smith Brothers, road contractors, who are building the Bankhead highway between Ranger and Cisco, and as the result of so much litigation over the county bonds and the county road work, a large number of people had formed the opinion that this \$80,000 was to stand over them as a debt on which interest would have to be paid. The action of the commissioners' court this morning will dispel that opinion.

Smith Brothers are proceeding at a very satisfactory rate on the building of the road. Of greater benefit to Cisco, perhaps, at the present time, is the announcement that Pet Brown, who has been given contract for Rising Star road, will within a very short time put a full force of workmen on road leading to the south. The finishing of this road to Rising Star will bring to Cisco the trade that she deserves from the territory surrounding the Pioneer oil field.

Mr. Brown and an engineer are going over the Rising Star road today. Mr. Brown is now engaged in the construction of the Leary road.

MOTHER OF MRS. B. S. HUEY DIES AT HOME IN ABILENE TUESDAY NIGHT OF PNEUMONIA
Mrs. P. S. Kauffman, mother of Mrs. B. S. Huey of this city, died at her home in Abilene last night at two o'clock. The cause of her death was pneumonia and she had been ill only since last Friday. Yesterday Mrs. Huey received word that her mother seemed to be improving, and the news of her death was unexpected. Mrs. Kauffman is survived by her husband and three children, Phillip Kauffman, Miss May Kauffman and Mrs. Huey. Funeral services were held this afternoon at Abilene. Mr. and Mrs. Huey went to Abilene this morning.

BANKHEAD ROAD MAY EXTEND ON TO MEXICO CITY

The extension of the Bankhead National Highway from Laredo to the City of Mexico will be taken up at the annual meeting of the association, at Phoenix, Ariz., April 27 to 29, according to a call for the meeting being sent out by Bennehan Cameron, president, and J. A. Rountree, director general of the United States good roads association. The United States good roads show will be held and the United States good roads association will meet at Phoenix at the same time.

The Texas-Mexican division of the National Bankhead Highway, extending from Mount Pleasant to Laredo, has been mapped out and marked, and this route will come up for adoption at the Phoenix meeting, according to Frank E. Morris, secretary-treasurer of the Automobile Club of Texas. Mr. Morris said that President Obregon of Mexico is greatly interested in the extension of the highway to Mexico City and has written the highway association pledging his support to the project.

The basis of representation at the meeting is one delegate for every ten paid members. The minimum delegation from each state is 200 delegates. Each state is entitled to as many votes as she has members, in accordance with the basis of representation. This meeting promises to be one of the most interesting and important that has been held in the history of the association.

The routes of the Bankhead National highway have been recommended by the pathfinders, confirmed by the board of directors and annual meetings of the association and also inserted in the constitution of the organization. These routes have been officially designated by the legislatures and state highway commissions in each state through which it traverses.

EASTLAND WILL FEED VISITORS AT A BARBECUE

EASTLAND, March 7.—Eastland will have a free barbecue on Thursday evening, March 9, according to plans put under way at the Rotary luncheon Monday. Colonel Gordon's Brelford No. 4, which is due to come in by Wednesday night, will be held back and drilled in at that time. A general invitation has been extended to Eastland citizens and to those of the surrounding country to attend this event, and newspapers from over the state will be asked to have representatives here at that time.

This was brought before the Rotary Club by Senator Brelford, who stated that Colonel Gordon had done a great deal towards keeping oil development going in this field at a time when many operators had quit, that the wells being brought in around the lake had proved profitable to those who had drilled them and had also been an immense help to this city in restoring confidence in the stability of the surrounding oil fields.

Colonel Gordon also made a talk in which he called attention to the fact that the Frank Day well, drilled in nearly two years ago, had made more than \$100,000 worth of oil and was now producing 43 barrels per day.

"There is nothing spectacular about these wells around Lake Eastland," he stated, "but they are dependable and have proven profitable to the companies that have drilled them. I would like to continue drilling wells in territory as good as Brelford and adjoining tracts."

SHOTGUN SQUAD FORMED TO RESIST KLUXERS
FRESNO, Cal., Mar. 8.—Aroused by the reappearance of an armed body of men dressed in the regalia of the Ku Klux Klan which last Sunday night visited the Baptist tabernacle at Felton, Cal., residents of Maricopa have organized a shotgun squad and awaiting further developments, according to a story published by the Fresno Republican today.

SIGNING OF PAPER FOR REMOVAL OF MIDLAND CHRISTIAN COLLEGE TO BRITTON HILL IS UP TO TRUSTEES

Members of the Board of Control of the Institution Have Accepted the Proposition of the Cisco Chamber of Commerce, and the Matter Has Been Laid Before the Trustees of the Christian Church Organization of the State—No Opposition is Looked for in That Quarter.

CHINA IS ASKED TO GET MEN WHO KILLED SHELTON

WASHINGTON, Mar. 7.—The American Legation at Peking has requested the Chinese government to take immediately all possible measures to apprehend and bring to trial the robbers who murdered Dr. A. L. Shelton, American Christian church missionary, at Batang, Feb. 17. It was announced Monday at the state department.

Dr. Albert Leroy Shelton, "Shelton of Batang," died at the hands of brigands, as he was on his way into Lhasa, the capital city of Tibet, after waiting 16 years for the opportunity to penetrate that section of the country which has never been visited by Christians. Details of the death have not been received, but it is possible that it was on an occasion similar to many of the most graphic incidents of modern history, which have gone toward making a history rivaling that of Livingsstone in Africa.

In one of his last works the Christian church missionary and surgeon, and one man who innumerable times established peaceful relations between warring factions, begs that American blood be sent to aid the pioneers in the work of educating an Christianizing Tibet, the last great country to be penetrated by Christians.

His life story contained in "Pioneering in Tibet," relates simply and without a hint of a boast, the marvelous accomplishments of his sixteen years in Tibet.

Being the second white man to cross the Himalayas into Tibet, Shelton with his faithful wife and family underwent the hardships, suffered capture by robber bands, and at one time before it was reported the intrepid missionary had met his death at the hands of brigands. A few a captivity of more than seventy days, he returned to Batang, where he was greeted by the entire populace, who almost worshiped him and had the utmost confidence in his religion and his wonderful surgery.

TEXAS FEDERATION OF LABOR TO MEET IN EL PASO NEXT MONTH

El Paso, March 8.—The annual convention of the Texas Federation of Labor will be held in El Paso April 17 to 22. During the same week, the four big railroad brotherhoods, excepting the railway trainmen, will hold their annual meetings here. The trainmen meet every two years and will be represented by committees only.

In addition to these meetings, there will be seven states organization meetings during the preceding week. They are: Carpenters and joiners, plumbers, metal trade workers, allied printing trades council, barbers, painters and sheet metal workers.

El Paso is the only city in Texas to obtain so many labor meetings at the same time, according to W. J. Moran local labor leader, who is helping arrange for the meetings. Every big union that has annual state conventions will meet here except one, the brickmasons, he said.

Special invitations have been sent to Samuel Gompers, president of the American Federation of Labor, serving his thirty-eighth year as head of the federation.

FOUR TO HANG FOR MURDERS IN THIS STATE
AUSTIN, Mar. 8.—Four death penalties were affirmed by the court of criminal appeals today. They were Albert Woolridge for the murder of his wife in Colorado county, Abe Johnson for a Liberty county murder, and Bernardo Mueez and Manuel Padillo for a Kaufman county murder.

The court overruled a motion for a new trial in the case of Jim Thompson, who was given the death penalty for robbery with firearms in Grimes county.

In the final action in the Fisher-Al-Ku Klu Klan which last Sunday night visited the Baptist tabernacle at Felton, Cal., residents of Maricopa have organized a shotgun squad and awaiting further developments, according to a story published by the Fresno Republican today.

Any movement tending to aid the farmer never fails to substantially benefit the merchant.

ONE MORE EXPLOSION VICTIM

KANSAS CITY, Mar. 8.—The total number killed in the explosion of a compressed air tank yesterday mounted to seven today with the death of another victim.

FORTY-FIVE TONS OF RATS KILLED IN WILLIAMS COUNTY DURING LAST YEAR

GEORGETOWN, Texas, March 7.—Forty-five tons of rats, or approximately 87,000, were killed in the rat killing campaign in Williamson county last year, according to reports received from G. L. Crawford, county agent. The cost of cotton ginning to farmers was reduced from \$3 to \$4 a bale, according to the report, while the cotton acreage was reduced about 25 percent and the acreage to feed crops was consequently increased.

Through cooperative buying and selling over \$3,000 was saved to the farmers in shipping livestock and ordering feed and for a while one car a week was shipped from this territory, said Mr. Crawford. Several auction sales of pure-bred hogs have been encouraged and a permanent county fair has been started.

Farmers have been encouraged in testing and weighing their milk, feeding balanced rations and keeping a record of milk production under the direction of the county agents. One farmer at Liberty Hill reported that following the county agent's instructions that he developed every cow in his herd which was a poor producer traced back to one heifer he had produced in 1912, while the outstanding cows are good producers in the herd traced back to another heifer purchased at the same time, and that through this testing and record keeping he had been enabled to discover the profitable and unprofitable milk producers.

GOVERNMENT EMPLOYEES ARE DRAWING BENEFITS THEY SHOULD NOT HAVE
WASHINGTON, March 8.—Approximately 80,000 government employees holding positions under presidential order are held to be not entitled to benefits under the retirement act, in an opinion given out by the attorney-general today. Secretary Fall, announcing the opinion, said that out of 8000 employees who had been retired \$400 had been receiving compensation illegally, and an order was issued that no more certificates of payment be issued.

TODAY'S NEWS TODAY

On yesterday the publishers of the Cisco Daily News inaugurated automobile delivery of the paper to Carbon, Rising Star, Pioneer and Cross Plains. This makes the paper available to the people of these towns almost as soon as it reaches local readers.

We believe that this is a service that will be appreciated both by our subscribers and our advertisers. In this age people want news just as rapidly as it can be disseminated. The publishers of the Daily News believe that this paper can serve one of the richest sections of Texas. Train service to the north makes it possible for the Daily News to reach Moran and Albany on the M. K. & T. and Parks on the C. & N. E. on the afternoon of publication. The addition of automobile delivery to the south will make it possible for the Daily News to serve the choicest territory in the entire West Texas oil fields.

Another new feature that the Daily News is inaugurating today is market reports on live stock and cotton. These two important commodities in some way affect every one of us and business men, ranchmen and farmers, we believe, will be glad to get authoritatively daily reports through the Daily News.

For the last two months the Daily News has been selecting, with great care, correspondents in its territory to furnish news budgets to the paper from the communities in which they reside. Many of these news budgets are already appearing regularly in the Daily News and the Round-Up and more will appear as we are able to obtain suitable correspondents.

In addition to helping the Daily News to better serve its readers these correspondents are bringing closer together entire territory served by these publications. We could be neighbors for ever and never know one another unless there was an exchange of news between our communities.

It is the purpose of the publishers of the Daily News and Weekly Round-Up to serve this territory with the very best daily and weekly newspapers that conditions will permit. We have great confidence in the territory or we would have never attempted at this time a program of expansion involving as much money as this undertaking.

OTHER EDITORS

Shall This Thing Happen?

(Temple Telegram.)

News dispatches from Wichita, Kansas, convey the gloomy and discouraging announcement that the Orient railway system, stretching from Kansas on down through west Texas, faces bankruptcy in such dire form that it may result in complete suspension of the operations of this system of railroad. The Orient has felt the travail of drouth, depressed business through the impoverished condition of cattlemen and the agricultural sections traversed by its lines, in greater degree, perhaps, than any other railroad. The Orient is dependent to a large degree than other roads upon cattle and farm products for its revenues. Deflation and business depression, disastrous price slumps and other financial adversities have afflicted it until its losses are staggering.

The report says that this company lost more than \$100,000 in the month of January and that its losses in operation for the year 1921 reached the tremendous total of \$1,200,000. Although government aid has been extended and the road has been enabled until now to continue operation, the losses have not abated and now with its cash reserves almost exhausted, hope for further government assistance dim if not actually barren, and business still at low ebb the announcement is made that any other operation under present conditions cannot be continued beyond July 1 of this year.

Will this be permitted? Shall the dream of Arthur E. Stillwell, its promoter and builder, be shattered upon the rocks of financial disaster? The road is a valuable property, it was projected to reach the Pacific coast at Topobolampo; it traverses a rich and fertile country, which under favorable weather conditions produces traffic sufficient to assure profitable operation. The financial depression which has hit every interest has hit with unusual severity this property, because of its somewhat isolated situation, but with a reasonable additional investment in extensions the system can be made highly profitable and to become a valuable factor in development of Texas and Mexico. Surely the capital and financial wisdom necessary to bring this road out of the kinks can be found, and will be found.

BOY CROOKS.

(San Angelo Standard.)
A "Baby Robber" gang is arrested in Cleveland after rifling the cash register and pie shelves of a bakery. The gang has three members—5, 9 and 10 years old.

The 9-year-old boy was identified by a patrolman as the lad who some months ago stole a horse and buggy from a freight station.
Discussing these boys, there'll be a

lot of talk about environment. Heredity will be investigated. Psychoanalysts will talk of powers of suggestion, boyhood imitating mature crooks.
All that these boys really need is an old-fashioned father, with a woodshed (or stage setting, armed with a paddle. To make the cure permanent, have a hole in the paddle.

SAVINGS FOR CHILDREN.

(Ranger Times.)
American school children have more than \$4,000,000 on deposit in the banks of the country, the American Bankers' associating announces.

Considered from a per capita standpoint, the amount is small—about 20 cents for each child. Nevertheless, it is an indication that the spirit of thrift is taking hold on the American people, and the larger the amount of school children's savings becomes, and the greater number of such depositors, the more prosperous will the country be. Training in the proper handling of money is perhaps the most valuable education that a child can have, for nine-tenths of his efforts will be devoted to its accumulation and disbursement. An early start in the practice of saving will cause it to become a habit by the time he has reached maturity. And saving or the "having" habit is one that America does not rank very high in. The chief ambition for many years has been to be a "good spender"—an art in which anyone can succeed, provided he has the backing.

Spending may be good or bad, according to how it is accomplished. It can be the greatest enemy of thrift, or its best friend and boon companion, according as the individual is trained to regulate his affairs. Judicious spending may open the way for a larger income, a larger heritage of accomplishment and refinement. But injudicious spending will keep one forever in the whirlpool of stagnation.

For that reason, every child should have a bank account, and be taught to use it properly. He should be encouraged to weigh his purchases; decide if they are worth more to him than the money itself, and why, if they are not, then to refrain from them. Thus the youth will be trained to saving without the ill effects of penny pinching. And temperance in both saving and spending will be a training that will stand him well in later life.

WHAT'S THE USE.

(Fort Worth Record.)
The editor must take unexpected jolts and the presiding genius of the editorial room of the Newton Kansan must have sustained a jar when he wrote: "Did you ever try, by chance, happen to edit a newspaper? If so, no doubt you wrote or published on one or two occasions, an effusion that seemed to hit the mark—that was happily clothed in English, passing fair, and pumped full of sentiment that touched the general subject of the matter in hand lucidly and amiably. While well satisfied with the article your glee was confined to that comfortable feeling which follows a duty well done. But the next day, a man with whom you had been associated more or less for twenty years dropped in and said, 'Well that was a good piece you had in the paper last night, where did you get it?' The fellow who wrote that sure sounded like your typewriter for a shovel and go out and get a job cleaning the streets."

PENN'S SPELLS

Quality

CHEWING TOBACCO

Because Penn's is packed airtight in the patented new container—the quality is sealed in.

So Penn's is always fresh. Have you ever really chewed fresh tobacco?

Buy Penn's the next time. Try it. Notice the fine condition—fresh—Penn's.

FRIED CORN MEAL MUSH

A Delightful Southern Dish

Try it for breakfast some time. Served with cane or maple syrup, it makes an unusual breakfast dish, easily digested yet wholesome. It is very easy to prepare.

In frying mush, however, beware to use Mrs. Tucker's Shortening. It is ideal for this purpose. Being purely vegetable, it blends perfectly, giving no flavor of its own. This you must guard for if foreign flavors creep in it is not near so good. Buy Mrs. Tucker's Shortening and make sure.

U. S. POSITION ON GENOA MEET GIVEN OUT SOON

WASHINGTON, Mar. 8.—The attitude of the United States government toward participation in the forthcoming Genoa economic conference has been formulated and will shortly be announced, it is learned at the White House.

Officials at the White House said that the delay in announcing the position of the United States toward the conference had been occasioned by the absence of Secretary of State Hughes in Bermuda. It was pointed out that the administration believes in co-ordination among the executive branches and that an exact expression of this country's attitude toward the conference would be worked out within the next twenty-four hours by the president and Secretary Hughes.

No intimation was given whether America would actively participate in the proposed conference. Previous intimations by high officials have been to the effect that the United States could not participate at Genoa until the financial situation in Europe had been brought to a point where constructive discussions could take place.

I will be very grateful if, those who have promised to give me or any other who will give me their support in the New's Subscription Campaign, will leave the votes at the News Office.
MRS. W. E. FAIRLESS

MURDERED IN MEXICO.

WASHINGTON, Mar. 8.—Alexander Mathern, an American citizen was murdered at Los Naranjos in the state of Vera Cruz on the night of March 5, the state department was advised today by Vice-Consul Hickerson at Tampico. The dispatch stated that the assailants were unknown.

AGRICULTURAL FUNDS ARE CUT DOWN SHARPLY

WASHINGTON, Mar. 7.—An appropriation of \$34,978,033 to meet expenses of the agricultural department during the coming year is recommended in a bill reported Monday by the house appropriations committee. The total is \$3,710,026 less than the amount appropriated for the current fiscal year and \$1,554,835 less than budget estimates.

Discussing the elimination from the bill of \$300,000 carried last year for distribution of seeds by members of congress, the committee in its report said the budget bureau in submitting estimates did not include provision for seed distribution.

The item of \$2,000,000 carried in last year's bill for loans to farmers for the purchase or seed and grain in drouth-stricken areas is not repeated in the bill reported Monday. The committee reporting that no estimate was submitted for the purpose.

The bill carries \$2,578,800 for the eradication of tuberculosis in animals, \$1,728,800 for the payment of indemnities for tuberculosis cattle slaughtered by the government, \$600,000 for the prevention of the spread of moths, \$547,840 for the eradication of the pink boll worm, \$200,000 to prevent the spread of the European corn borer, \$50,000 for eradication of the foot and mouth disease, \$13,000 for wiping out paratuberculosis and \$25,000 for prevention of the spread of the Mexican bean beetle.

For enforcement of the packers and stock yards act, a \$410,500 appropriation is recommended, while a total of \$103,600 is carried for enforcement of the grain futures trading act.

An appropriation of \$6,532,000 is recommended for the forest service. A total of \$4,825,060 is provided for the state relations service, of which \$1,300,000 would be available for farmers' institutes and \$1,000,000 for co-operative agricultural extension work—\$500,000 less than the amount appropriated a year ago for the purpose.

The bill carries \$483,320 for the bureau of public roads, of \$3,503,583 recommended for the bureau of agricultural economics, \$291,707 is to be expended for investigation and encouragement of the adoption of improved methods of farm management and practice. The committee also recommended an appropriation of \$471,200 for investigation into marketing and distributing of farm products and for cotton testing and cotton standards investigations.

CARDUI HELPED REGAIN STRENGTH

Alabama Lady Was Sick For Three Years, Suffering Pain, Nervous and Depressed—Read Her Own Story of Recovery.

Paint Rock, Ala.—Mrs. C. M. Stegall, of near here, recently related the following interesting account of her recovery: "I was in a weakened condition. I was sick three years in bed, suffering a great deal of pain, weak, nervous, depressed. I was so weak, I couldn't walk across the floor; just had to lay and my little ones do the work. I was almost dead. I tried every thing I heard of, and a number of doctors. Still I didn't get any relief. I couldn't eat, and slept poorly. I believe if I hadn't heard of and taken Cardui I would have died. I bought six bottles, after a neighbor told me what it did for her.

"I began to eat and sleep, began to gain my strength and am now well and strong. I haven't had any trouble since... I sure can testify to the good that Cardui did me. I don't think there is a better tonic made and I believe it saved my life."

For over 40 years, thousands of women have used Cardui successfully, in the treatment of many womanly ailments.

If you suffer as these women did, take Cardui. It may help you, too. At all druggists. E 25

FRUIT TREES, PECANS, BERRIES

AMERICAN SAILOR GETS MEDAL FOR BRAVE ACT AT LONDON DOCK

LONDON, Mar. 8.—Frank Dolan, a quartermaster on the United States steamer Centennial State, has just received an award of medals here for rescuing a comrade from drowning in the Thames last October. His act was described as one of the bravest deeds ever done in the London docks.

He received the silver medal of the Royal Humane Society and an award from the Carnegie Trust Fund. Dolan was serving on the Centennial at the time of the rescue and dived into the water to save a man who had fallen between that ship and the pier at a time when a strong swell was running and Dolan ran a risk of being crushed between the ship and the wharf.

The services of Scotland Yard and the New York police department were engaged in order to find Dolan and make the awards. When he heard that the New York police were looking for him Dolan appeared in a police station in that city much perturbed and declaring that he had "committed no crime."

EFFORT IS MADE TO REDUCE DALLAS STREET CAR FARES

DALLAS, Mar. 8.—A resolution citing the Dallas Railway company to show the reason why street car fares can not be reduced from six cents to five cents was placed before the city commission today for consideration by Mayor Aldredge. The Dallas Power and Light company has already been cited to show cause why its rates can not be lowered.

Wanted Chickens.

Call out those old hens that are not laying and sell them.—Lock up your chickens tonight. Phone us, we will call for them. Market higher on hens today than it has been for three years.

You never knew that Corn Flakes could be so wonderful as Kellogg's

"Say, Captain, let the enemy come on! We can hold out a long, long time with this big box of Kellogg's Corn Flakes! Wish it was time to eat now!"

Kellogg's are a revelation, not only in Corn Flakes, but in cereals! Such delicious flavor, such crispy crunchiness never before was believed possible in corn flakes! You have a great treat awaiting you the very first time you sit down before a generous bowlful of Kellogg's Corn Flakes and a pitcher of milk or cream—and fresh fruit, if it's handy!

It isn't fair to yourself and your family not to share in the pleasures that Kellogg's Corn Flakes so generously spread over the nation—and the world. You are missing a taste-thrill! So, tomorrow morning, serve Kellogg's Corn Flakes for breakfast, or for lunch—or for between-meals nibbles! They're wonderful—and never tough or leathery or hard to eat!

Insist upon your grocer supplying **KELLOGG'S** Corn Flakes—the delicious kind in the **RED** and **GREEN** package that bears the signature of **W. K. Kellogg**, originator of Corn Flakes. **NONE ARE GENUINE WITHOUT IT!**

Don't forget, **KELLOGG'S** Corn Flakes are made by the folks who gave you the **JUNGLELAND** Moving Pictures. Coupon inside every package of **KELLOGG'S** Corn Flakes explains how you can obtain another copy of **JUNGLELAND**.

U. S. NAVAL STATION, GUANTANAMO BAY, CUBA

U. S. Naval Station at Guantanamo, Cuba, near the South-eastern end of the Island, where the Atlantic Fleet, Admiral Hilary P. Jones, Commander-in-Chief, is now in the midst of a strenuous schedule of training. The Flagship, U. S. S. COLUMBIA and the U. S. S. PROMETHEUS are shown anchored inside the Bay, the battleship force being employed in maneuvers outside in the deeper waters of the Caribbean. On shore is the largest small arms range in the world where crews are kept constantly at the targets, also in infantry and artillery drills. Athletic fields are provided where various teams practice in the afternoon for the competitive games held just before the ships start north. The ships of the Navy have been coming to Guantanamo for winter practice since 1903 when this Station, lying in the foothills of the long mountain range in the Oriente was leased by the Government and the flag raised over the Station by Admiral A. S. Barker, U. S. N., then the Commander-in-Chief. It comprises about fifty square miles.

Mrs. J. A. Williams	189,300
Mrs. B. F. Young	5,000

Renewals Of Expirations For March Count Heavily In Today's Totals; No Big Lead

MORE VOTES CAST FOR NOMINEES BY SUBSCRIBERS THAN CANDIDATES CAST FOR SELVES; BIG CHANCE NOW.

Today, the first count in The News' great "Everybody Wins" competition for two big, fast, handsome Essex motor cars and purses of gold and silver is printed.

Hereafter the vote will be changed each day and will include votes cast up to noon the day before.

Many expiring subscriptions have been renewed during the past two weeks. That, of course, made votes. And these votes were cast at the option of the subscriber for some candidate. Sample copies and the announcement of the election, too, have stimulated subscriptions.

That's how it is today. More votes

have been cast by subscribers themselves for candidates than most candidates have secured.

NOT FAIR INDICATION.

Neither the list of candidates or the recorded vote today is a fair indication of how the race will be. Subscriptions and coupons have been turned in for some who as yet have made no actual effort themselves. Another few have tried to skim the cream. Eventually the election will narrow down to the real workers—the real prize winners.

Some contestants there are who will get along very well for a few days. They will bubble over with enthusiasm. But it won't last. They'll go out and "get their ears knocked down" once or twice and they'll be ready to quit. They haven't got the stuff in them that will urge them on. And rather than admit their deficiency they'll come in or write in and say "I find I haven't got the time." Others will be content to let their friends vote for them when they turn in their subscriptions over the counter in the News office. Some will start but will not finish.

MINIATURE LIFE'S BATTLE.

It is just the battle of life in miniature. Some have it within themselves to be successful. Others can become so with the proper urge. Still others lack confidence in themselves and ability to stick and win.

Really, it is regrettable that the votes cast are no more than they are. In truth the present status of this election would not justify the News in putting up more than a cheap diamond ring, a flashy watch and a music box.

The prizes are extraordinary. Never before have such valuable, such handsome motor cars, or such great cash prizes been offered in Texas in a newspaper election. And yet contestants will lag along, hoping by some miracle that the other fellow will also stay asleep and allow them to carry off the prizes without work and without giving a semblance of return to the News. That isn't fair.

NEW NOMINEE COULD WIN.

Why, today an absolutely new contestant can enter this election and with half a dozen or so subscriptions, or three or four good subscriptions by mail, sprint up and gain a clear lead over each and everyone now entered. It can be done.

And a contestant now in can do the same thing. There is no handicap. All are on even terms. Work is the governing factor. Salesmanship, too, helps.

For instance, for every club of \$15 worth of subscriptions turned in the contestant gets 100,000 extra votes over and above the normal votes which the subscriptions themselves provide. These clubs may be of three 1-year subscriptions by mail,

two one year subscriptions by carrier, or any combination you may work out, just so they total \$15 or more.

Two 1-year subscriptions would total 33,000 votes. With the extra 100,000 that would be 130,000. And if they were NEW subscriptions the candidate would get a vote bonus of 50,000 votes, making the two subscriptions count 186,000 votes.

Then, if it is a new contestant, there would be 5,000 votes on nomination and the 20,000 votes for the first subscription. Thus a new contestant with two one-year new subscriptions could today cast 211,000 votes.

CHANCE FOR LIVE ONES.

Is there a chance for a new live wire contestant? Is there a chance for a real worker? You know there is. And there is the same chance for any contestant now entered. All are on even terms.

It is time now to work. Subscriptions mean more votes now than they ever will again. In a few short weeks the votes will be less per subscription. The time to get votes is now—today—when they count for more.

REDUCED VOTE SCHEDULE.

Contrary to the plan usually followed, the News plan calls for a reduction of votes as the campaign progresses. In the News' campaign the last week is the least important because the subscriptions then count for so few votes. Live contestants who are on the job ought to be able to cinch one of the cars within the next few weeks, before the vote schedule is cut. It can be done. Perhaps you will do it.

Remember, Thursday's vote list will include votes cast up to Wednesday noon. The standing published is always for votes received up to 12 o'clock noon the day before.

Now, if you're "in," get to work. Win! If you are still "thinking" about getting in—get in. You can win.

FREE VOTING COUPON

Good for 100 Votes

IN THE CISCO DAILY NEWS AND WEEKLY ROUND-UP

I hereby cast 100 FREE VOTES to the credit of

Miss, Mr. or Mrs.

Address.....

This coupon neatly clipped out, name and address of the candidate filled in, and mailed or delivered to the Election Department of the Daily News and Weekly Round-Up, will count as 100 FREE VOTES. It does not cost anything to cast these Coupons for your favorite candidate, and you are not restricted in any sense in voting them. Get all you can and send them in—they will count.

NOTE—This coupon must be voted before March 21.

FIRST SUBSCRIPTION COUPON

Good For 20,000 Extra Votes

Accompanied by the nomination blank, and your first subscription this coupon will start you in the race for the magnificent Daily News and Weekly Round-Up Prizes, with a grand total of more than 33,000 votes. This coupon may be used only once and is valid only when accompanied by a subscription remittance.

Name of Subscriber

Contestant's Name

Amount enclosed \$.....

This coupon will count 20,000 free votes when returned to the Campaign Manager, together with the first subscription you obtain. It must be accompanied by the cash, and the subscription must be for a period of one year or longer. The 20,000 free votes are IN ADDITION to the number given on the subscription, as per the regular vote schedule.

TO THOSE WHO HAVE ENTERED

What are you doing to insure yourself of one of the really BIG prizes in the distribution. Are you doing YOUR part—or are you sitting back and hoping your friends will do it all? Up to now the majority of the votes that most of the candidates have received have been cast by subscribers who have been coming into the office in the regular course of business, paying up their News and Round-Up subscription, and casting their votes to the credit of some one of the nominees. This should not be the case when the value of all the prizes is considered. Every candidate should be doing his or her utmost towards making THEIR prize as big as possible. If your friends see that you are doing YOUR part, they will jump in and help you pile up a winning total; if, however, they see you are unappreciative and are expecting your friends to do it all, they will throw their support elsewhere. It's up to you, candidates. DO YOUR PART — your friends will do theirs.

TO THOSE WHO HAVE NOT ENTERED

To you who are still considering the Gift Distribution, RIGHT NOW is the time to send in your name and make your start. You never have had—nor ever will have—such an opportunity for making BIG money quickly WITHOUT INVESTMENT OR RISK as you have in this News \$6,000 distribution. Clip out that nomination blank; see that it reaches the Campaign Department immediately. YOU ARE GOING TO REGRET IT IF YOU DON'T. Remember this statement. And ACT NOW.

District No 2

District No. 2 includes participants residing outside of the city of Cisco. One of the big automobiles and just as many cash awards as there are active candidates will be distributed in District No. 2.

The names of present candidates for District No. 2 follow:

Mrs. Oscar Comer, R. F. D. Cisco	73,100
Mr. E. L. Carpenter, R. F. D. Cross Plains	5,000
Miss Willie Erwin, Rising Star	65,000
Miss Della May Oresham, R. F. D. Cisco	65,500
Mrs. W. M. Kirkila, R. F. D. Cisco	86,400
Mrs. B. G. Lindsey, Cross Plains	5,000
Mr. Esal Lieb, Albany	5,000
Mrs. Fay Lockhart, R. F. D. Rising Star	5,000
Miss Maurine Orr, Putnam	73,200
Mr. Earl Strickland, R. F. D. Cisco	18,700
Mr. W. A. Tate, Carbon	5,000
Mrs. O. P. Thornhill, Baird	5,000
Mr. P. F. Trammell, Moran	5,000
Miss Lillie Wragg, Harpersville	5,000

Every \$15 club of subscriptions, either NEW or RENEWALS, will entitle you to 100,000 EXTRA votes in addition to the usual votes issued at the time each subscription (see regular vote schedule) is turned in.

This big 100,000 offer, coupled with the present liberal vote schedule, is the biggest and best vote offer of the entire campaign. Subscriptions are worth more votes these next few weeks than they ever will be again.

A \$15 club may include subscriptions of any length of time up to six years.

A candidate has the privilege of turning in more than one club. Two clubs, for instance, would net you 200,000 extra votes. As soon as you complete your first club, you can start on your second.

Subscriptions may be secured anywhere. Candidates are NOT restricted to their own district. You can obtain subscriptions from friends and acquaintances in any district, any town, city or state.

The \$15 does not have to be turned in all at one time. You can turn in the subscriptions as you secure them. Accurate record is kept at the Campaign Department. The 100,000 Extra Vote Ballots are issued at the close of the offer for the EXTRA votes due.

This 100,000 offer is the biggest and best offer that will be made.

If you have entered the campaign, here is your chance to make a fine beginning, and build your way to success. If you have just started, let this vote offer put you in the lead.

EXTRA 100,000 EXTRA VOTES

HOW BIG ARE YOU?

ARE YOU TOO BIG TO EARN \$1,300.00? ARE YOU TOO BIG TO MAKE \$1,000 A MONTH THE NEXT FIVE OR SIX WEEKS? ARE YOUR FRIENDS REAL FRIENDS? EVERYTHING BEING EQUAL ISN'T IT REASONABLE TO SUPPOSE YOU CAN COMMAND THE ATTENTION OF YOUR FRIENDS? ARE YOU SO BUSY YOU HAVEN'T TIME TO MAKE MORE IN THE NEXT FEW WEEKS THAN THE AVERAGE MAN OF FAMILY MAKES IN A WHOLE YEAR? HAVE YOU TIME ENOUGH TO MAKE MORE IN THE NEXT FEW WEEKS THAN MOST PEOPLE CAN SAVE IN YEARS AND YEARS?

'FAILURE COMES IN 'CANT'S'; SUCCESS IN 'CANS'

Do you belong to that class of people who believe it is impossible to help themselves—to make money—to win cars and cash in a liberal newspaper gift distribution?

If you do, we wish we could show you the records and the prizes won by scores, yes, hundreds, of candidates who have "carried on" successfully in campaigns on the same plan as the News' gigantic "Everyone Wins Something" gift distribution.

HOW MUCH DO YOU WANT TO MAKE?

How much do you want to make? What car do you WANT to win? Set your own goal.

\$200? \$500? \$1285? All right, you can make that amount or its equivalent in big, handsome, speedy motor cars—IF—you are willing to go after them!

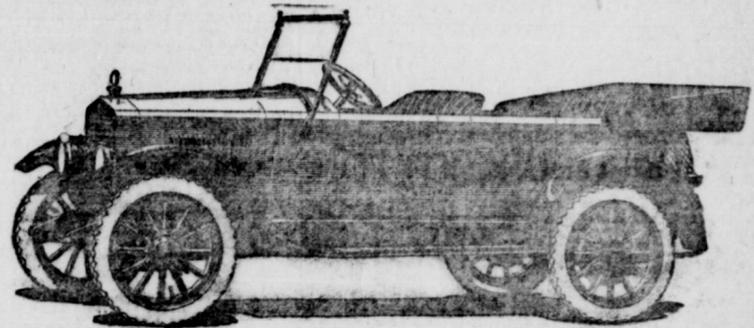

To date the response to the News' great campaign has been meager. Truly, scores are failing to take advantage of their opportunity. With so few "hitting the ball" YOU can get in now and carry on to victory without any extraordinary effort.

OPPORTUNITY IS KNOCKING.

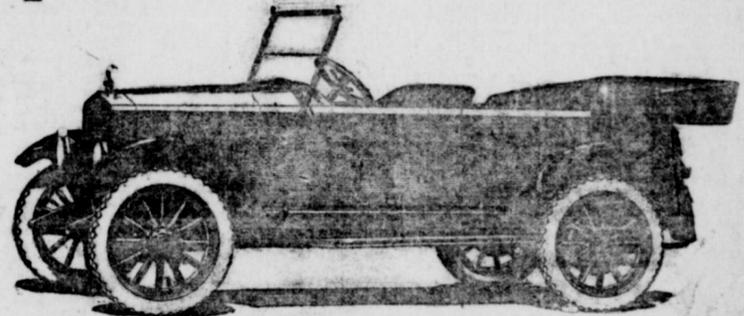

The grand array of cash and cars is absolutely going to be given away irrespective of the amount of business produced. Get in now. Take your pick. Cinch your prize—while the biggest vote schedule of the entire campaign is effective. Never again will you have such an opportunity!

DECIDE NOW! ACT! DO! WIN!

Don't Let Another Day Slip By Without Seeing You Active. Send in your nomination blank today. There are fifty-seven rules for success in placing yourself among those who will make from \$250 to \$1,000 per MONTH each these next 5 or 6 weeks. The first is to wake up and do your best—never mind the other fifty-six.

\$500⁰⁰

Everybody Wins Something

THERE SHOULD BE AT LEAST AS MANY ACTIVE CANDIDATES IN THE CISCO DAILY NEWS AND WEEKLY ROUND-UP'S GREAT GIFT DISTRIBUTION AS THERE ARE PRIZES. NONE OF THIS GREAT ARRAY OF PRIZES SHOULD GO BEGGING. THEY ARE HERE FOR YOU. YOU CAN WIN BIG. YOU CANNOT LOSE.

Then Why Hesitate When You Can Help Yourself So Well

UPON RECEIPT OF NOMINATION COUPON, DETAILED INFORMATION, TOGETHER WITH FREE WORKING OUTFIT, WILL BE SENT; AND A REPRESENTATIVE WILL CALL AND LEND FURTHER ASSISTANCE.

SCHEDULE OF VOTES

First Period	Second Period	Third Period	Fourth Period
Up to and including April 3 the following number of votes will be issued on subscriptions.	From April 4 to April 15 the following number of votes will be issued:	From April 17 to April 22, the following number of votes will be issued:	From April 23 to the close the following number of votes will be issued:
6 months 6,000 votes	6 months 4,000 votes	6 months 2,000 votes	6 months 2,000 votes
1 year 12,000 votes	1 year 15,000 votes	1 year 22,000 votes	1 year 2,000 votes

5 years 300,000 votes	5 years 200,000 votes	5 years 250,000 votes	5 years 160,000 votes

SUBSCRIPTION PRICES

During the time of the gift distribution election the subscription price of the Daily News has been reduced as follows: A six months subscription in Cisco, \$4.25; or \$7.50 per year. Outside of Cisco (by mail) the price will be—six months for \$3.00; or \$5.50 per year. The price of the Weekly Round-Up is \$1.50 per year. Votes will be issued on subscriptions to the Weekly Round-Up in the same proportion as to the Daily News. The above schedule of votes, which is on a declining basis, will positively not be raised during the campaign. A special Vote Ballot good for 100,000 EXTRA votes will be issued with every "club" of \$15.00 in subscriptions turned in. A "club" may be composed of small or large subscriptions totalling \$15.00 worth. No subscriptions for over six years will be accepted from any contestant.

GOING TO THE STORE

GIDDAP, horsie! My, you're slow!
Wonder how to make you go?
If you stumble, stamp and stop.
We will never reach the shop.

Stop your prancing! Trot along!
Now you see you're going wrong!
We don't turn until we meet
Houses in the village street.

Mother's waiting for the flour—
We've been gone for 'most an hour—
And the sugar and the spice—
Don't you think a pudding's nice?

Giddap, horsie! Wish I had
Whips to whip you when you're bad!
Then you'd travel fast I bet—
Mother's waiting, don't forget!

AT THE TANK'S BOTTOM

JOHAN STEEDMAN left his home after supper and turned briskly towards the high school of which his middle-aged friend, Stephen Kermer, was janitor. John and Stephen had worked together in the same factory and John was employed there still. But Stephen's eyes had begun to fall him and he had left the factory and obtained the place as janitor. The city was holding evening swimming classes, open to the public, in the high school pool. Stephen had to be there to let in the swimming pupils and lock up after the classes were over.

John found his friend tilted back in a chair outside a basement door. For some minutes the two discussed an improvement they were trying to make on a machine used in the factory. Then the members of the last swimming class began to leave the building. Their instructor came last.

"All out, Steve," he said. "Good night."

"Wait for me, John," said Stephen. "I'll have to take a look around to see that all's right."

John sat down in the chair Stephen had vacated, his mind busy with the mechanical problem of their invention. How long he sat there he never rightly knew. All at once he came out of his abstraction with a start. What was keeping Steve? All he had had to do was to see that the lights were out. He should have been back by then.

"I'll go see what's keeping him," John thought. "Maybe he's found some work that has to be done, and I can give him a hand."

As he started along the basement corridor John felt no apprehension. But as he went on and turned a corner and the street noises died away he suddenly became acutely aware that the great building was perfectly silent.

might be too late. There was nothing in all the white, bare room to aid him—no pole or grappling hook. If there were anything of the sort about the building he did not know where to look for it. He could not let the water out. No, there was nothing to do but to go down under the water after Stephen and fetch him out.

Before the end of the instant that it took these thoughts to pass through his mind John was throwing off his coat, his devotion to his friend battering down his fear of the deep water. With no pause now he ran to the spring-board and advanced to its outer end. He swung himself over the side and hung by his hands. When he dropped he would strike bottom within a foot of Stephen. He turned himself to face the other end of the tank for he meant to seize Stephen and carry him into the shallow water. Then John drew a deep breath, shut his eyes instinctively and let go. He shot under the water, his feet struck bottom.

Another instant, and instead of grasping Stephen and carrying him out as he had planned, John was fighting, panic-stricken, for his own life. He had gasped and sucked water into his lungs as he went under just as

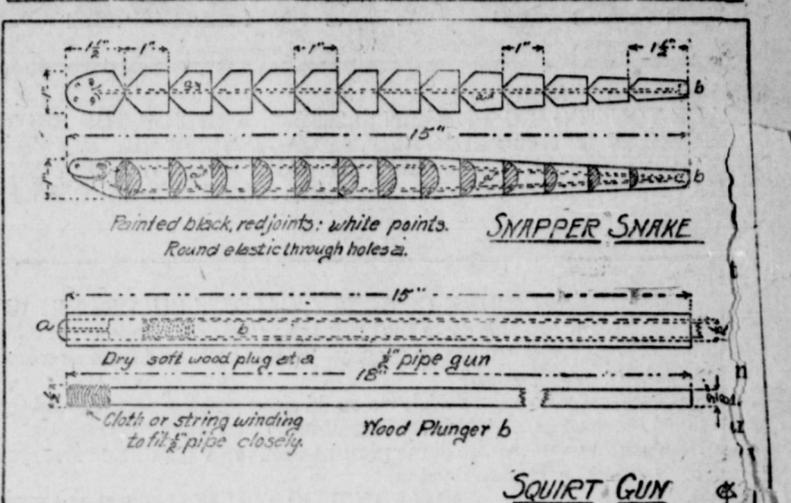

He Came To The Surface Threshing Wildly

Stephen. He put too much muscle into it; a strange surprise went through him at the lightness of Stephen's body. He swayed giddily, almost carried off his feet. But the weight of his clothes, of the things in his pockets and of Stephen's body was enough to keep his feet on the bottom. He stepped forward.

How slowly he moved! He dared not attempt to go more swiftly, so insecure was his footing. His lungs felt as if they would burst; air bub-

The HANDY BOY AT HOME

BY CHARLES A. KING,
STATE NORMAL SCHOOL, PLYMOUTH, N.H.

The "Snapper Snake" has never been classified by any zoologist. It though its habits are sufficiently well known for us to assure every one that it is of a non-poisonous variety.

To make this interesting specimen of natural history, select a piece of soft wood which will whittle easily and make it round and tapered toward the tail, with a head which may be made as ferocious as the artistic ability of the whittler will permit. Measure the joints carefully and cut into the dotted lines a of the top view from each side with a pointed cut as shown. The straight cut may be made with a fine saw and the slanting

cut made with a chisel or a knife. Do not cut through in any place as it will be better to have the full size of the piece to hold onto while working on it. After the cuts have been made, cut through each with a fine saw. Mark the holes a as shown by the dotted lines a of the side view and bore them carefully with a suitable drill; thread a piece of round elastic through these holes, starting at c, and draw it tightly enough to pull the joints together. Tie the elastic and allow the knot to sink into the hole in the end of the tail at b. The snake may now be painted any colors desired, the brighter the better.

It is made by filling one end of a piece of 3/4" pipe with a plug of dry wood, as at a, which will swell when wet and fill the end of the pipe tightly, after which the hole may be bored. The plunger may be made a piece of 3/4" dowel or other round wood or an iron rod if desired, with a cloth or string wound round it to be sure it can be pushed through the pipe and fill it closely, but not so closely that it cannot be moved easily.

Push the plunger into the gun until it reaches the plug, hold the end of the gun under water and draw the plunger back; this will form a vacuum into which the water will be drawn by suction; the gun is now loaded and ready for use. Hold the gun in one hand and push the plunger in quickly, and the water in the gun will be forced through the hole in the wooden plug and be thrown several feet; if used with due respect for the proprieties the squirt gun may be the source of considerable fun, especially if several playmates are armed in a similar manner.

Many Good Positions Are Waiting for the Right Girl To Come Along—As An Applicant, Be Neat, Self-Reliant, Know Your Job.

THE doors of the business world are open today to women as never before. Nor is the petticoated half of the population neglecting its opportunity to enter, as a peep into the reception room of any employment office any morning in the week will reveal. There one will find a whole army of girls looking for jobs, from timid capable Lucy Brown to aggressive self-reliant Marion Emerson. And yet most of these girls stomp their dainty little toes or their sturdy round ones upon the self-same rock.

"Girls are poor salesmen," says Miss Louise McMasters, head of the Employment Bureau of the National Board of the Y. W. C. A., which places more than 10,000 girls and young women every year. "The trouble is that they underestimate the difference between bluff and self-confidence, between boasting and self-reliance."

Self-Reliance Wins
And it is the self-reliant Marion Emerson, with an understanding of the business plumb every time, while the timid self-effacing Lucy Brown wonders why she lost the job for which they both applied. And she lost it, not because she wasn't just as capable as her rival, but because she didn't know how to present her case in a convincing way. More than likely she rushed off the minute she had the address of the firm desiring a secretary, stopping only long enough

FILING IS AN IMPORTANT PART OF OFFICE WORK © Y.W.C.A.

STENOGRAPHERS SHOULD BE NEAT AND ACCURATE © Y.W.C.A.

best of the lot."

This she accomplished by skillfully drawing out her interview, on just what qualities he was looking for, and illustrating how her own achievements met his requirements. She was alert and responsive to everything Mr. Blank said. She was frankly in earnest about landing the job and told him why. When there was a pause, she filled it—to her own advantage! And when the ten minute interview was over she walked out with a warm glow of triumph.

"That girl is a self-starter," was her new employer's comment. "A pretty fine capable sort."

Put Your Best Foot Forward
In looking for a job a girl must remember to put her best foot forward, not only sartorially, but mentally. Worth may speak for itself—or it may not. And it's best not to take chances. Girls rarely realize that what may be the opportunity of making or marring a business career hangs on their ability to make an impression worthy of the abilities and qualifications they possess.

"One of the reasons we are taking on a woman employment manager is that often a woman is better able to determine a girl's real value and ability," said the head of a large business corporation recently when discussing the employment situation. "Our experience is that women are such poor salesmen of their real ability that a man doesn't bother to dig it out during an interview. Most girls will talk more freely about themselves to a woman. Nor is a woman as apt to judge a girl so quickly by her appearance as a man."

But, of course, appearance does count. Clothes express the personality of the wearer, and it cannot be denied that other people react more favorably, even if unconsciously, to a person of pleasing appearance. The girl who is looking for a job owes it to herself to be as appropriately clad as possible. And there is a happy medium between being untidily or shabbily dressed and being overdressed. Either extreme is a big handicap.

Don't Overdress
"Yes, her references and experience are satisfactory enough," admitted an employer, when explaining why he had refused to give a position to an applicant, "but her hat was too big!"

The wearer of the too-big hat was a capable enough girl, and she probably would have registered great surprises if she had known the real reason why she was turned down. But the important thing is that the business man interprets clothes in terms of efficiency. He reasons that an over-exaggerated bit of headgear is apt to cover a head that is equally foggy. The girl who applies for a position rouged and made up as if she belonged to the chorus of a musical comedy, is catalogued as one who would stoop to deceit in her day's work.

Neatness An Asset
On the other hand the girl job-hunter, who is untidy or slovenly in appearance, stands little chance of being employed, for the business man reasons that if she is careless about her personal appearance she will be slipshod about her work. It is the well-groomed girl who has her suit pressed, who is wearing a crisp white blouse, and whose shoes are shined, who spells capability and trustworthiness in the vocabulary of the business man. If she holds her head high, and speaks with confidence and poise she will have nothing to fear.

As to the very important matter of salary, that is the supreme test of salesmanship. The girl who informs her new employer that she has been with one firm for six years at the same weekly salary impresses him immediately as belonging to one of two classes. Either she wasn't worth any more, or she lacked initiative. This type of girl will often "sell down" when taking a new job that sounds pleasant, accepting a smaller pay envelope if her new employer talks glowingly enough about the many advantages to be found in a connection with his business. It will never occur to her to inform herself about the general wage situation or what her grade of work commands in the business market. It is easier just to slide along.

Equally dangerous to the ambitious business woman is the over-optimistic girl who is looking for "easy money," the young woman of independent income who thrills at the thought of a job, and the girl who lives at home and pays no board. In taking anything less than the self-supporting girl must ask they are displaying a certain kind of sex disloyalty.

Respect Your Job
That young women need to practice business ethics more than anything else is the belief of many men of affairs. Girls who are holding down jobs should have a serious responsible attitude toward business obligations and relationships. The carefree but-tortly type who floats in and out of positions, leaves without giving notice, has no consideration for or responsibility toward her employers hurls the cause of women in business everywhere.

Much, of course, depends in fitting the right girl to the right job. But in this day of ever-widening opportunity there is no reason why every girl who enters the business world shouldn't find just the right niche into which her training and talents fit, whether they be for athletics or dramatics, for writing ads or teaching swimming, for nursing or for managing a cafeteria.

If having found the right place she brings a love of the game for the game's sake, she will make good in any job that she undertakes.

STERILIZATION OF COTTON SEED KILLS BOLL WORM

AUSTIN, Mar. 7.—Sterilization of cotton seed to kill pink bollworms has been endorsed by George B. Terrell, state commissioner of agriculture, after tests witnessed by Lea Beatty and W. D. Farris, commissioned by Governor Neff, were found to be successful. Reporting on the tests, the two men stated: "The 135 degree test showed out of 100 worms, one live and 99 dead. The 140 degree test showed 100 dead out of 100 worms. "We recommend that the seed be heated to 145 degrees and immediately cooled. "The sterilized seed have been thoroughly tested in the seed laboratory as to their germination and found to be sound and will germinate when heated to 145 degrees, so there can be no danger in planting these sterilized seed as they will come up equally as well if not better than seed not sterilized. "In conclusion we give our hearty approval of the work of this machine and further state that we know it does its work efficiently. We recommend it to all farmers, seed growers and dealers. "The methods of non cotton zones and regulated zones have been adopted in the fight on the pink bollworm, according to Mr. Terrell. In the non cotton zones the growing of cotton is prohibited by law. Compensation will be allowed for actual loss, he stated. In the regulated zones cotton is grown under regulation prescribed by the department of agriculture. These regu-

lations require that seed planted must be from non infested areas or sterilized before planting and that cotton grown in these zones must be ginned and the seed crushed or sterilized in the zone and neither cotton nor seed can be shipped out of such zone without a permit. "Pink bollworms are usually carried in cotton seed," said Mr. Terrell, "and sterilization of the seed kills the worm as shown by the accompanying report of Lea Beatty and W. D. Farris, commissioned by the governor of Texas to go to Mexico and witness the process of sterilizing cotton seed, as approved by this department. "As a practical farmer and cotton grower, I declined to recommend this as a complete success until I sent the sterilizing machine to Mexico and had it thoroughly tested. I find that it does kill all the worms in the seed and that the germination of the seed is not hurt in the heating process and I give the plan my full endorsement." The tests were conducted at Tlahualilo, Durango, by G. J. Schnell, of the Texas state department of agriculture.

BOULEVARD OF PALMS. BROWNSVILLE, March 6. — A boulevard of palms stretching from Brownsville to Mission, a distance of about 60 miles, is the goal sought by the Lower Rio Grande Valley Federation of Women's Clubs. Plans for the boulevard are being worked out by the organization's good roads committee.

BOUNTY FOR WOLVES. BROWNWOOD, March 6.—As a result of reports from farmers in this section that wolves have been making heavy depredations on sheep, a bounty of \$20 for each wolf killed will be offered by sheep and goat raisers here. The bounty was decided upon at a meeting of livestock men recently.

NEW HAMPSHIRE MAN NAMED WORK'S FIRST ASSISTANT. WASHINGTON, March 7.—John H. Bartlett of New Hampshire was nominated Monday by President Harding to be first assistant postmaster general. Mr. Bartlett, who at present is chairman of the civil service commission, will succeed Dr. Hubert Work, who succeeded Will Hays as postmaster general.

Mr. and Mrs. C. H. Drury, Mr. and Mrs. Chas. G. Walker, Mrs. Mary Davison and Mrs. J. H. Malloy are spending the day in Breckenridge.

RULES LAID OUT FOR OBSERVING HEALTH WEEK

EIGHT COMMANDMENTS IN HEALTH RELIGION

- 1. Cut and burn insect-harboring vegetation. 2. Watch personal hygiene—don't leave germs a loophole. 3. Watch your food supply as far back as you can trace it. 4. Screen your home and place of business against the fly. 5. Drain or fill pools and mud-holes—they breed mosquitoes. 6. Don't violate health ordinances—report violations you see. 7. Clean up premises—you can eliminate fire and health hazards at the same time. 8. Don't take a chance with other persons' health any more than with your own—you know what is right.

These commandments as given above, cover practically the whole field of effort on the part of the citizens to co-operate with the state, county and city health officers in compliance with Governor Neff's proclamation.

The Smith "health commandment" cover a multitude of transgressions against public health, including everything from improper garbage disposal to spitting on the sidewalk. Volumes might be written on the fourth of these tabloid laws—barring the fly. All that has ever been written or will be written, however, never will adequately portray the menace of the common house fly. He is the greatest single carrier of disease known not barring the mosquito, and while each type of mosquito as a rule, carries only one specific disease, the fly will give you any number of things without you so much as asking for it.

It is hardly time to observe the first principle but it will not be long before weeds and other growth begin to menace the health of human beings by the mosquito and other insects they harbor. Cut the weeds. Little needs to be said on the second injunction, as growing personal pride will take care of that.

Health's Golden Rule. The eighth commandment is a sort of supervision of the Golden Rule. Its field covers coughing in public places or wherever there is a crowd; spitting from office building windows or other places where the ultimate destination of the sputum is doubtful; traveling while in a position to communicate disease; as well as many other circumstances in which you may be your brother's keeper.

With the seventh law in mind it is well to remember that not many people see the wall paper and furniture in your house, that those who pass by judge you largely by the appearance of the grounds around your house. Why not have them beautiful? Clean up, paint up and keep it up, beginning March.

Health week, which under a proclamation from the governor started Monday, has been endorsed by the United States public health service which expects far-reaching results from the work. The program for the state as announced from Austin designates health appraisal work for Monday, which includes reports upon specific disease conditions over the state by special committees, with the view of learning the particular local problems of every community on Texas.

Citizens' committees are expected to clean up their communities today, and on Wednesday special attention is given, under the state program, to the destruction of insects, rats and other disease carriers held responsible for bubonic plague, malaria, typhus and typhoid.

On Thursday special attention will be given to the health of the school children of the state and the teaching of health and personal hygiene. Educational literature and prizes will be distributed in many of the cities.

Friday has been designated as pure food day and Saturday as general education and child welfare day.

All of the public health service officers stationed in Texas have been instructed by H. S. Cummings, surgeon-general at Washington, to co-operate in every way in the work.

If congress drags over into midsummer, some political fences will likely be found in bad condition.

APRIL 10 SATISFACTORY DATE FOR GENOA MEETING

PARIS, March 7.—The Italian government Monday informed the French foreign office that April 10 was a satisfactory date for the opening of the Genoa economic conference. This information was in response to the request sent to Italy following the recent meeting between Premier

Poisicaro and Prime Minister Lloyd George at Boulogne.

Babe Ruth's honorarium for this season will be \$50,000, 'tis said. And it isn't a bad deal for the Yankees' owners if he knocks out his usual quota of home runs.

For a climate that never was represented to be that way at all, California has had considerable of it.

May I ask your support in my efforts to win one of the big gifts in the Daily News "Everybody Wins Something" campaign. I will greatly appreciate every vote cast in my credit.

BEATRICE FARQUAR. London papers say Colonel Harvey talked too long. Many on this side do not know how long Colonel Harvey talked, but they are in complete accord with the London papers.

Brighten Up Your Home For The Spring Time With New Curtains And Draperies

We have just received a splendid assortment of draperies, cretonnes and other curtain goods. You can find in our stock anything you need in the way of hangings for windows and doors.

BOLL WEEVIL IS NOT A BLESSING SAYS TANQUARY

COLLEGE STATION, Mar. 7.—History and life habits of the cotton boll weevil were told by Dr. M. C. Tanquary, chief of the division of entomology of Texas A. & M. college, in an article on methods of destroying the pest. Dr. Tanquary called attention to the statement by some persons that the boll weevil is a "blessing in disguise" and stated that this was not true in some sections of the cotton growing states.

"The Mexican boll weevil is one of the most serious insect pests that the people of any country or section of it have ever had to contend with," said Dr. Tanquary. "Like so many of our most important insect enemies in the United States, it came from another country. This self-invented pest came northward across the Rio Grande for the first time near Brownsville, Texas, in 1892. It then traveled northward at the rate of 50 or more miles per year, spreading eastward along the Gulf coast and westward toward northern Texas until at the present time, its range includes more than 91 per cent of the cotton growing area of Texas and extends in a broad belt eastward from Texas and Oklahoma to the Atlantic coast."

"During its sweep over the country, it has taken a toll of many hundreds of millions of dollars from the cotton growers and is now leaving an annual assessment of more than \$100,000,000 from the south."

"In spite of this terrible loss, there are many people who say that the boll weevil is a blessing in disguise, because it is forcing the southern farmer to practice diversified farming. An extreme case of this view is evident in Alabama where the people of Enterprise, Coffee county, have erected a monument in the public square to the insect which brought us prosperity."

"It is true that diversification is one of the most vital needs of the south and that the boll weevil has forced diversification in many places, but it is also true that there are many parts of the south that are so much better suited for cotton growing than for anything else that cotton will always be the big money crop for those sections and the visitation of the boll weevil in such places has been little short of tragic."

"What is especially true where the soil is not very productive, that is, where the land under ordinary conditions and without the boll weevil will produce less than one-third bale per acre. Where the land is very fertile, if the best methods of cotton farming are practiced and control measures are used, cotton can be profitably grown in spite of the boll weevil."

"Like some other insect pests, the boll weevil is very particular in its food habits and restricts itself to one host plant. It will feed and breed only on wild and cultivated cottons."

"When the cotton plant dies at the end of the season and cold weather comes, the adult weevil begins to look around for protected places in which to spend the winter. If there is timber near the cotton field a great many of them find their way to it and hide themselves under leaves, bark, within the Spanish moss and in similar situations. Because of the better protection offered by timber, a much larger number of the weevils successfully pass the winter there than elsewhere, but even there, the mortality is heavy and only a comparatively small percentage emerges in the spring. In the fields, along roadsides, ditch banks, a heavy growth of vegetation and accumulation of leaves, brush piles and trash of any kind, offer excellent protection for the hibernation of the weevil."

"With the approach of warm weather in the late winter and early spring, the weevils begin to emerge from hibernation and when the first cotton plants appear above the ground, Mr. Boll Weevil will be found there ready to welcome them. Unfortunately all the weevils do not emerge at the same time, but they keep coming out over a period of three or four months. This long period of emergence is one thing that makes the control of the boll weevil more difficult."

"The weevils begin feeding at once on the tender foliage and when the first squares appear, the female begins to lay eggs. She punctures the surface of the square, and then lays her egg in the puncture. The egg hatches in a few days and the young grub begins feeding on the tissues inside the square. From six to ten days or even more, depending upon temperature conditions, are spent in the feeding or larval stage after which it passes into the pupal or resting stage, still remaining inside the square. At the end of this period, which is ordinarily but a few days, the pupa transforms to an adult which makes its way out of the square and is soon ready to begin feeding. The newly emerged females do not begin laying eggs for a period of about 8 or 10 days."

"There is a great deal of difference in the length of the life cycle of the weevils, depending upon temperature and other weather conditions. There may be, however, as many as 5 or 6 generations in a single season."

"Control measure against any insect must be based among other things upon the individual and seasonal life history, the food habits and the locations in which the various life history stages are found, as well as upon the characteristics of the insect in its various stages. That is the reason a thorough study has to be made of any insect before the best control measure can be worked out."

"The best control measures now in use against the boll weevil may be divided into two classes—cultural methods and the use of poisons."

"Just as early as practicable in the fall, the cotton plants should be destroyed, in order to destroy all the immature stages of the weevil, thus preventing the emergence of any more adults and also depriving all adults that had already emerged of all food. This would cause all weevils that remained to enter hibernation in a weakened condition and a very small percentage would come through the winter alive."

"In addition to destroying the cotton plants immediately after picking, there is another important thing to be done, that is the burning over of the hibernating plants after the first killing frost, wherever possible."

"In the spring there are certain practices connected with cotton culture which have an important bearing upon boll weevil control. Some of the most important of these may be summed up as follows:

"That the earliest maturing varieties be planted to the region."

"That the soil be kept well worked and healthy growth and maturing of the cotton."

"If all the above practices were followed by all the cotton growers over a large area, the damage by the boll weevil would be reduced to a small fraction of what it is at the present time."

Wanted: Old hens that are not laying and all them—look up your chickens tonight. Phone us, we will call for them. Must be higher chickens today than it has been for three years. CISCO PRODUCE CO., Phone 406.
