

Ground Broken For New Building At Texas Tech College

Dirt has been broken for the \$275,000 chemistry building of Texas Technological College. It is located a short distance northwest of the administration building. The contract was secured by D. N. Loverton of Lubbock and it specifies that the building is to be completed by January 1, 1929.

Although the building is designed to meet the special needs of the science of chemistry, it has been possible by careful planning and adjustment to adapt a portion of this building for temporary use by the departments of physics, biology and geology.

The building is 240 feet long, 62 feet wide, with a wing at the east end extending to the south some 40 feet. A cloister extends along the entire front of the building, and this will ultimately connect with similar cloisters around the court. There are three main floors, a ground floor four feet below the level of the raised court, the first floor and the second floor.

Eighteen-Foot Well Produces Pure Gasoline At Stith, Tex.

Ahilene, Texas.—A well eighteen feet deep which produces practically pure gasoline was the little community of Stith, in Jones County, offers the world of science and discovery.

The well is producing about 100 gallons per day, and the owner has sold more than 200 gallons to motorists, who find it functions perfectly. It is near the store building of the Boney Mercantile Company at Stith and was dug as a water well.

It was at first thought the gasoline was coming from an underground tank but this was taken up and filled with water and failed to show a leak. Taking up of the tank did not affect the flow of the well any.

The fluid seeps into the well and is withdrawn with an ordinary bucket. Scores of motorists have viewed the freak.—Dallas News.

Magnolia Oil Tanks Suffer Damage

Locks were broken from the faucets of the gasoline, kerosene, and distillate tanks of the Magnolia Petroleum Company Sunday night and all three hydrants turned on. Barrels had been placed sidewise under the faucets to deaden the sound.

Harold Wynn, employee of the Continental Oil Company, passed by the Magnolia station on his way to the Continental warehouse and heard the noise of water gushing. He investigated and turned in the alarm. D. A. Dodson, local Magnolia agent, wired the auditor early next morning. Judgment from the amount wasted, it is believed that the faucets had been open for several hours.

So far as is known, no clues have been found.

WHAT'S DOING IN WEST TEXAS

Lakeview—A Farmers Gin Association has been organized here with a membership of 148.

Kenosha—Grain now belonging to J. Williams of this place won the 24 hour butter fat contest at the Plainview Dairy Show.

Fabens—A motorcade from this city was recently run to Carlsbad Caverns with approximately twenty cars.

Brownfield—Brownfield, Taboka and Jordan are getting ready for hosting the south Plains District Convention of the WTCC on Tuesday.

Folett—The towns of Folett and Brownfield are preparing for the convention on Enid, Oklahoma, the second week in May.

Iran—A new telephone exchange has been established here.

Denison—Denison will be host to the annual convention of the League of Municipalities May 7 and 8.

Gorman—Local service of the Texas Electric Division Company have been improved and poles reset here.

Mason—Mason county will ship out some \$450,000 worth of cattle during the month of May.

Hico—The Hico Dairy Plant was inspected by a group of Sweetwater citizens recently, with C. H. Clark, county agent, in charge.

Strawn—Strawn had eight delegates on the Broadway of America tour to Memphis, Tennessee.

Bynum—The Bynum Home Demonstration Club, with fourteen girls as members, is doing excellent community work.

Mineral Wells—Mineral Wells opened its new \$300,000 sanitarium April 23.

Swenson—Stockholders of the Farmers Cooperative Gin Company of Swenson elected new officers May 1.

Roscoe—Planting is underway here and indications are for a good crop.

Turkey—Work is underway on Turkey's fourth gin.

Levelland—Sixteen new business houses are under construction here.

Amherst—A modern tourist camp is being constructed in Amherst.

Port Worth—Prominent statesmen are being lined up as principal speakers for the WTCC Tenth Annual convention.

Coshoma—The town of Coshoma has recently renewed its affiliation with the West Texas Chamber of Commerce.

EPWORTH LEAGUE PROGRAM

MAY 4, 1928
SOURCES OF POWER
Leader: Good Harden
Prayer: By leader

Enthusiasm and Religion—Ruth McCarty.

Use It or Lose It—Rufus Gilbreath.
Business and benevolence.

Mr. and Mrs. J. M. March and daughter, Doris, were in Clovis Monday evening to see the show.

L. Sikes has been ill with flu but is reported much better.

The Eastern Star elected new officers at a meeting held Tuesday night.

Miss Jewel Anderson was the guest of Misses Opal and Jewel Hays the first of the week.

School Board Elect Teachers For Next School Term

The school board met last Monday night at which time the faculty, with the exception of one, was elected for the next term. Teachers elected were as follows: J. C. Jenkins, Superintendent; Miss Annie Woods, Home Economics; D. F. Kendrick, Mathematics; Mr. Fred Boone, Principal; Mrs. W. B. Hicks, Miss Ruth Burton, Mrs. Jay Wyr and Mrs. Ivan Marquis. Other details for the next school term are to be worked out at the next meeting. The school trucks will be in charge of J. M. Marras.

K. K. Smith Now Representative For Frigidaire Co.

K. K. Smith has recently been appointed representative for Frigidaire, one of the most up-to-date refrigerating machines on the market. Mr. Smith states that the demand for these machines is growing every day, and quite a number of orders were placed last week. The machine is a product of General Motors.

Methodist Meeting Closed Sunday

The Methodist Revival closed Sunday night after being in progress for one week. Large crowds attended the services and enjoyed the fine sermons which were delivered by Rev. W. B. Hicks. There were several conversions and additions to the church.

TULL-PEACOCK

Mr. L. E. Tull, of Amherst, and Miss Myrtle Lee Peacock of 11 miles north of Muleshoe, were married here Sunday at the Methodist parsonage, Rev. W. B. Hicks performing the ceremony. The contracting parties are popular young people in their respective communities. They will make their future home in Amherst.

Hides, dry 10c. Green, 11c	
Butter fat	.35
Eggs (subject to change)	.19
We have bought our 3000 turkey eggs.	No more wanted.

BAILEY COUNTY RAISES 70 PER CENT OF SUDAN SEED IN THE COUNTRY

The following is from the Star-Telegram of April 29:

Muleshoe, county seat of Bailey County, and that section of the county within a radius of 30 miles, and included in its trade territory, raises and ships approximately 70 per cent of all the Sudan seed of the United States, according to figures compiled by local elevator men.

Shipments are made to all parts of America and to some foreign countries. One grain dealer alone reports shipments to New York state, Vermont, Minnesota, Nebraska and California, and to the picturesque cherry blossom land of Japan.

Besides the premier position of Muleshoe and Bailey County as Sudan raisers, the section is taking noteworthy lead in production of kaffir and maize and corn. Seed houses in the north and east have purchased a large portion of 190 cars of kaffir and maize shipped from Muleshoe during the past season. Forty-eight cars of corn and seven cars of cane seed are now exporting from the county.

The development of Bailey County, first from a bald prairie land with its bald faced cattle, and second from ranges reclaimed from cattle barons of early Western days, to its present dominant position as an agricultural empire has been little short of an economic marvel.

Though created in 1876, Bailey County was not organized until 1917. Three years after organization it had a population of but 517. The 1927 estimate gives the county a population of 3,906 and gives Muleshoe a population of 800.

Each year of development and expansion of agricultural plantations is seeing the country growing more stable in general production. Business enterprises are expanding, highways improving and population increasing. Successful growing of Sudan and related crops has had more to do with these expansions and with the growing home ownership and settlement of the Muleshoe country than perhaps any other factor. However, the 1928 season will not be equal that of last, as the crop is being curtailed until prices are better. The last year's figure was 5,625,455 pounds of seed, according to reports given out Feb. 23.

Zone Meeting Of Missionary Society To Be May 8th

The Zone Meeting of the Woman's Missionary Society of the Methodist church will be held in Muleshoe on Tuesday, May 8th. Preparations have been made for entertaining quite a number of out of town guests. The program for the day is as follows:

Song.
Opening Session of Worship—By Zone Leader.
Prayer—Rev. W. B. Hicks.
Song.
Welcome Address—Mrs. Hicks.
Response—Amber.
Song and Praise Service.
Histories of Societies.
Orchestra Number—Muleshoe.
Prayer and Co-operation—Mrs. House.
Song.
Non.
Song.
Devotional—Mrs. Franks.
Echoes from Seymour Conference—Littlefield.
Orchestra Number—Muleshoe.
Problems of Missionary Society—Mrs. Dean.
How to Get New Members—Mrs. Stone.
Solo—Miss Opal Haver.
Why I am a Member and What It Means to me to be a Member of the Missionary Society.
Open discussion.
Report of District Meeting—Mrs. Robertson.
Mrs. Hemphill.
Pageant—By Muleshoe women.
Benediction.

LIKES MULESHOE

Mr. Russell, of Turkey, Texas, was a business visitor in the city Monday and was very much impressed by the progress of the revival. Mr. Russell has been here a number of times and says that this section looks better to him every time he comes. He predicts that the Muleshoe shallow water district will be the most productive section in West Texas.

W. M. U. MEETING

The W. M. U. of the Baptist church met in the home of Mrs. Levi Pressly on Tuesday afternoon. There were six members present. Scripture reading and the lesson on "Royal Service" was had. The hour of meeting was changed from 2:30 to 3:30. The next meeting will be with Mrs. Robinson, Tuesday of next week.

MOVES TO MULESHOE

Mr. and Mrs. J. M. McAdams of Valley Mills, Texas, have recently moved to this place to make their home. Mr. and Mrs. McAdams are the parents of J. B. McAdams, rural carrier from the local post office. We welcome them to Bailey County.

Light Shower Visits Community Weds.

A light shower visited this section Wednesday evening, but the moisture was not sufficient to help wheat. As we go to press there are reports of fairly good rains in other section of the Plains.

KNOW TEXAS

The number of miles on Texas farms is increasing while horses are decreasing. The latest figures show 1,973,000 miles valued at \$74,025,000. This is 20,000 more than the previous year.

Chickens and eggs produced in Texas annually are valued at more than \$35,000,000.

There are between 200,000 and 300,000 bee hives in Texas with an annual production in honey valued at more than \$2,000,000.

The source of most of the honey produced by bees in Texas is the same crop that stands at the top of Texas products—cotton. The major part of the honey comes from the cotton stalk.

There are over 138,000,000 acres of uncultivated land in Texas.

VOICE WOULD REQUIRE EIGHT HOURS TO LONDON

If the human voice possessed sufficient volume to carry it from Denver to London, England, it would require eight hours for it to make the journey, according to Bancroft Gherardi, vice president of the American Telephone and Telegraph Company. Mr. Gherardi made this statement during an address he delivered before a recent gathering of Denver telephone men.

The American Telephone and Telegraph Company is now outfitting a billion miles of cable just described. By means of its newly perfected radio and telephone service between America and England, it is carrying the human voice across the ocean in a fraction of a second.

J. T. Fuller and Judge Pressly were in Amarillo Friday on official business.

Two Large Cattle Sales By Local Men Past Week

Cattle sales have been very good the past week from Muleshoe. Saturday of last week John S. McMurtry loaded out 932 head of two-year-old steers, which had been on pasture here. They were sold to Messrs. Young & Egan, of Scot City, Kansas, and brought a record price of \$75 per head. This is the highest price paid for two-year-old steers in this country since the war. These cattle will go to the long grass country of Kansas.

Monday of this week M. L. Steel sold 300 head of cows to Mr. Smith of Bedford, Texas. They were shipped to Hagens, Texas, to grass.

New Equipment For Valley Motor Co.

The very best in service is what the Valley Motor Co. offers its patrons according to K. Stahl, president of the Company. They have recently added a vacuum cleaning machine for cleaning upholstery in cars. Mr. Stahl says that the new machine takes every particle of dirt from the upholstery, making it like new.

YL News Items

We are glad to see our numbers in Sunday school increasing. Everybody come to church next Sunday and bring someone with you.

Some people of the community have been attending the Revival meeting at Muleshoe, conducted by Rev. Hicks.

Mr. Grapp, who stepped on a nail several weeks ago, is slowly improving. Hilda, Misses Dot and Mildred Wilterding, attended the fifteenth wedding anniversary of Mr. Harry Wilterding last Friday at his home.

Mervin Wilterding visited Mr. Hood and family Sunday.

Misses Jessy and Julie Beller visited Mrs. Leslie and Helene Head Sunday afternoon.

Miss Lucy Robinson visited Miss Bertha Lee Boles Sunday.

Miss Zona Mae Shofner visited Miss Kathleen Williams Sunday.

Mr. and Mrs. Harre were visited by Lashbuddy people last Sunday.

Mr. and Mrs. William and family and Mrs. Buhman motored to Clovis one day last week.

Mr. and Mrs. Beller visited Mr. Hupp Sunday afternoon.

Mr. Harry Wilterding and family visited at Mr. W. M. Wilterding's Sunday.

Mr. J. O. Head and wife, on a tour from Colorado to Amarillo, spent Tuesday night with their parents, Mr. and Mrs. J. J. Head.

Mr. and Mrs. Lovelady visited Mr. Meeks Sunday.

Chevrolet Has New Style Sport Cabriolet

Pioneering into the low priced automobile field another distinctive style feature, the Chevrolet Motor Company today announces a new Convertible Sport Cabriolet with body by Fisher, listing at \$695 f.o.b. Flint, Michigan.

Combining all the closed car advantages of the sport cabriolet with the open car freedom of driving conditions, this latest offering of the world's largest automobile producing company is ideally suited to every type of weather under the sun.

Of two to four seating capacity, the convertible cab with the top resembles the sport cabriolet in appearance. The top, however, is fully collapsible and folds so completely out of the way that full vision is possible from the rumble seat. An additional feature is the inclusion of a nickel handing around the windows which gives them rigidity and permits of raising the windows, with the top lowered, as an extra protection against the wind.

Finished in Roman Red, with black body beading striped in gold, and embellished with artistic touches of polish and chrome, the new model sounds a distinctive style note in the field of low cost transportation. The disc wheels are of the same brilliant color combination as the new model sounds a distinctive style note in the field of low cost transportation. The disc wheels are of the same brilliant color combination as the new model sounds a distinctive style note in the field of low cost transportation.

The soft folding rubber fabric is jet black in pleasing contrast to the dominant tones of the body. The body by Fisher retains the sweeping lines that distinguished the former cabriolet while other features are of the same dependable construction that is winning widespread numbers to the Bigger and Better Chevrolet.

PRECINCT DELEGATES TO BE ELECTED NEXT SATURDAY

According to announcement, precinct delegates will be elected next Saturday. Those delegates will meet Tuesday, May 8th, to elect delegates to the county convention.

NOTICE

All members of Odd Fellows Lodge interested in the organization of an Odd Fellows Lodge please meet at the First Methodist Church at Sudan Tuesday night, April 28th.

W. N. U., DALLAS, NO. 18-1928

So brave she was and proud—In worth of womanhood—So like the snow—She, smiling, gave her life To blend the name with With Mother—So.

Sunday in May Given Mother

One day about 100 B. C. a rich Roman woman was visiting Coraella, a Roman mother. The visitor was showing off her rings and her necklaces and her other ornaments.

"These are my jewels." On Sunday, May 9, 1937, Miss Anna Jarvis of Philadelphia told a friend that she had set the day aside to honor the memory of her mother, who had died the year before.

Miss Jarvis made herself a veritable martyr in behalf of Mother's day and the movement spread farther and farther each year. By 1913 it was being observed in England.

Love Without Limit A mother's love is the medium through which we understand God's. It will go to the deepest depths to save. Victor Hugo, in his "Les Miserables," has given us a vivid portrayal of mother's love in the character of Cosette and Fantine, and in Ben Hur and his mother we find another illustration of a mother's love without limit.

Debt to Mother: Hard to Repay

The debt which the world owes to the mothers of America will never be fully known, much less repaid. Their contribution to the history of freedom is one of those intangible quantities not easily defined nor accurately appraised.

Yet it lies back of much of the worthwhile accomplishment that makes the history of our country. Trace the careers of men who built large empires in the building of America and you find woven into their character the influence of mothers who had faith in their sons, faith in their country and faith in their country's God.

Yet it is to mothers individually rather than to mothers impersonally that the devoted tributes of Mother's day are paid. One thinks of his own mother and, if possible, sends her some token of his thought.

Motherhood Universal The dominating impulse of woman is motherhood, whether she bears children of her own or mother's another's; or mother's a community, a state, a reform; or, in her interests and dedication, mothers the whole world.

I SAW a host of nodding flowers, Or fluttering about like morning hours, Or new-green leaves in April showers, On Mother's day.

THEY bloomed in gowns of fluffy white, Two big brown eyes were sparkling bright, Ah, they were such a dainty sight, On Mother's day.

AND yet a tar dropped in my cup When I sat down with them to sup, For no one came to pluck them up, On Mother's day.

Gold Star Mothers

GOD must have some high reward For little Gold Star mothers—They whose hearts have been tried More so than any others; They whose hearts have been tried To bandage thy fingers, Who sang their little boys to sleep When purring twilight hours...

GOD must have some high reward For little Gold Star mothers—They whose hearts have been tried More so than any others; They whose hearts have been tried To bandage thy fingers, Who sang their little boys to sleep When purring twilight hours...

GOD must have some high reward For little Gold Star mothers—They whose hearts have been tried More so than any others; They whose hearts have been tried To bandage thy fingers, Who sang their little boys to sleep When purring twilight hours...

GOD must have some high reward For little Gold Star mothers—They whose hearts have been tried More so than any others; They whose hearts have been tried To bandage thy fingers, Who sang their little boys to sleep When purring twilight hours...

Tribute Paid Mother Love

(With a cup of clear, pure water from the old family well.) Here to Mother, whose name is music, And when that name is in my tongue life's fretful fevers die and an calm. A heavenly peace is in that name. No name of princess or of queen could mean so much to me. Her ministries of tenderness were so gentle as the drops on dew. Something of the Everlasting Mercy is in the nature and the name of mother.

Her faithfulness by day was like the rising sun of morning. Your visits by night and the watching stars lit the skies. Unconquerable was your modest and unobscured bravery. Your gentle smiles were as delightful and as soft as the gentle fingerings of the sunbeams against the pillows. So unpretentiously you dropped your splendors everywhere. Like the apple blossoms of the May your spirit shed a fragrance all around. To your child's eyes your quiet service was as sweet as your voice was sweeter far than morning bells. Mother, on this holy day of memory, it all comes back to you.

Here's to you, Mother, who wakened and watched while others slept; while others rested you toiled on; when other slept forgotten you still remembered, and though wearied with the long day's toil you hovered above my drowsy couch and rested me to sleep by that holy, go-sleeping kiss. I hear the soothing music yet of your sweet lullaby—"Holy angels guard thy bed." And I think in answer to your gentle service, I realize and you must have protected me through all those after years. Much that I hoped and dreamed of as yet unfulfilled, but the light of your love has never dimmed or died. Here or yonder that torch divine in spite of darkness and of storm must never smothered or forgotten. The hand that lit that Star of Love can never forget to guide, and hold, and heal. "That Master Hand is master of all things," says Emerson. Here's to you, Mother, in memory of my cradle days. In memory of my childhood's days of play; in memory of the after years of triumph and dismay; in memory of laughter, of labor, of love, and in memory of those mystic days of sometimes strangely mingled grief and pain; here's to you, Mother, here's to you. My memory of you shall be lasting and long. And on this memory day my full heart is homing to you. I kiss your brow again today or fling a winged kiss across the miles. Here's to you, Mother, here's to you! For you I give up my thoughts and realize the prayer of love. Here's to you, Mother, here's to you—Charles "Coke" Woods, in Houston Post-Dispatch.

Of All Things Beautiful A faithful, loving mother stands at the summit of the beautiful. Climb the stairway of the beautiful, from the purple cup of the violet through the blue and the rose—from the witchery of the forest through the rugged grandeur of the mountain—from the simple beauty of the meadow through the ethereal majesty of the midnight heavens to a mother and her child, and the feet of beauty are ever climbing upward.

Mother HUNDREDS of stars in the pretty sky, Hundreds of shells she there my mother, Hundreds of birds that go singing by, Hundreds of lambs in the sunny weather, Hundreds of daisies to greet the dawn, Hundreds of bees in the purple clover, Hundreds of butterflies on the lawn, But only one mother the wide world over.

Choked All Night From Asthma

Every Sign of the Trouble Gone. Tells How She Got Well.

All who suffer from asthma and bronchitis cough will be glad to learn how Mrs. W. G. Pierson, Route 1, Colby, Kas., conquered her trouble. She writes: "For 16 years I had asthma and nearly retired to my bed before 12:30 a. m. I kept thinking what a relief it would be to get rid of this cough. In February, 1925, in March I felt so much better I returned to Missouri. One night in Missouri used to make me cough terribly, but I don't have a cough now, not even in the rain. Hundreds of other sufferers from asthma, bronchitis and chronic coughs have reported their recovery after years of affliction. Their letters and a booklet full of valuable information about these stubborn diseases, will be sent free by Sauer-McCord Co., 109 State Life Bldg., Indianapolis, Ind. No money or name to receive them. Write for this free booklet today. It may give your life a new meaning."

New Dresses for The School Girl

By MAE MARTIN

Thousands of mothers with daughters of high school or college age, have problems like this Little Rock, Arkansas, mother. She says: "I don't believe I could have put my daughter through the last two years of high school and college without the help of Diamond Dyes. Dresses long out of style and faded were made new with a package or so of Diamond Dyes and the addition of a few dozen buttons and a little braid. Sometimes two dresses were combined and brought up to date in places that gave no hint of their past. People never knew they were redyed when I used Diamond Dyes. They never take the life out of cloth or make it limp. They always make things fresh, crisp and bright."

Diamond Dyes are true dyes, like those used when the cloth was made. Tinting with them is as easy as bluing, and dying only takes a little more time. Insist on Diamond Dyes and save disappointment. They never streak, spot or run.

My handsome new book, "Color Craft," will help you with your clothes and home furnishing problems. Sixty-four pages of dollar-saving suggestions, fully illustrated in colors. It's FREE. Simply write Mae Martin, Home Service Dept., Diamond Dyes, Burlington, Vermont.

Christmas Cards

The earliest example of the art of making Christmas cards is attributed to J. C. Horsley, R. A., who in 1846 made designs of this character. Subsequently the demand for these tokens became enormous, and at present Christmas cards are often of much artistic merit in both design and coloring.

Feel Tired and Achy?

Too Often This Warns of Sluggish Kidneys.

I AMED Still Achy? Sure your kidneys are working right? Sluggish kidneys allow waste poisons to accumulate and make one languid, tired and achy, with often dull headaches, dizziness and nagging backache. A common warning is too frequent, scanty or burning excretions.

Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of bodily waste. Users everywhere endorse Doan's. Ask your retailer.

Lesson for May 6

GREATNESS THROUGH SERVICE

LESSON TEXT—Mark 9:33-37; 10:35-45.
GOLDEN TEXT—For even the Son of Man came not to be ministered unto but to minister and to give his life a ransom for many.
PRIMARY TOPIC—Doing as Jesus Did.
JUNIOR TOPIC—The Way to Be Great.
INTERMEDIATE AND SENIOR TOPIC—How to Be Truly Great.
YOUNG PEOPLE AND ADULT TOPIC—Jesus' Standard of Greatness.

Jesus with His disciples was on His way to Jerusalem for the last time. He was soon to leave for Jerusalem where He was to die on the cruel cross for the sins of the world. He was a man of peace and in order to make clearer to the disciples the meaning of the cross, they were yet unable to understand Him. It was a most pitiable and a sad sight the Son of God facing humiliation and death for man's salvation and even the disciples failing to understand the meaning of His suffering.

1. The Disciples Disputing as to Who Should Be the Greatest (Mark 9:33-37).
1. Jesus' searching question (v. 33). His omniscience enabled Him to discern their secret thoughts. The fact that the disciples were wrangling about official position while Jesus was facing His death shows how completely He was alone in the world.

2. The silent disciples (v. 34). The revelation of the selfishness of their hearts made them ashamed in His presence. The realization that the eye of the omniscient Lord is ever on us is the sure and only cure for selfish wrangling among Christians.

3. The stinging rebuke (v. 35-37). (1) "If any man desire to be first he must be last of all and servant of all." True greatness expresses itself in being willing to take the last and least place and to be a servant of others.

(2) His teaching illustrated (v. 36, 37). This He did by an acted parable of placing a little child in their midst. A little child is a symbol of dependence and ignorance. By word and example He showed that true greatness is expressed in willingness to aid the weak, instruct the ignorant, and serve the needy.

II. The Ambitious Request of James and John (Mark 10:38-45). It was for the positions of pre-eminence in the kingdom Christ had told them of the awful agony of the cross and also of the glory which should follow.

1. Their ambition. By word and example He showed that true greatness is expressed in willingness to aid the weak, instruct the ignorant, and serve the needy.

2. Jesus' reply (v. 38-45). (1) To James and John (v. 38-40). a. Their misconception rebuked. "Ye know not what ye ask." b. Positions of glory in Christ's kingdom are earned, not obtained through favor or arbitrary assignment. The way to honor is through suffering. The way to glory is through service. The way to power is through sacrifice. The way to life is through death.

(2) To the ten disciples (v. 41-45). a. Their displeasure (v. 41). The ten disciples were displeased with the request of James and John. Their displeasure was because they were not free from the same selfish ambition; their action was not prompted by righteous indignation.

b. True greatness declared (v. 42-45). To minister to others is greater than to be ministered unto (v. 43). Among the Gentile nations, greatness was conceded to those who exercised authority over others. This is the world's conception today. Among the disciples of Christ a different standard prevails. The standard of Christ's kingdom is to forget self in devoted service to others, even to the giving of one's life. The supreme example to be followed by all is Jesus Christ Himself. His whole life was spent in going about doing good, and on the cross of Calvary He made the supreme sacrifice in providing a ransom for many.

Foundations Necessary

The wise seek "the city which hath foundations."—Southern Methodist.

Be of Good Cheer
Let us be of good cheer, remembering that the misfortunes hardest to bear are those which never come.—Lowell.

Ministers

The world looks at ministers out of the pulpit to know what they mean when in it.—Occell.

God's Benefits

All eyes see God's benefits, but few thank Him.—Mark Day, Fargo.

Largest Rose Garden Owned by King Boris

King Boris, the bachelor king of Bulgaria, who has just paid a private visit to King George at Balmoral, has royal rights over the biggest rose garden in the world. It is about 40 miles long and 10 broad. The peasants of nearly 200 villages cultivate it. Their women folk get up before dawn to strip it. When a gentle breeze blows they say that its sweet perfume has blown beyond the Thracian plain in which it is situated.

It is this garden which yields the world-famous attar of roses, that delicious perfume which, in olden times, Persian shahs commanded should be used exclusively in their harems. It is said that this even today in India is offered to wedding guests on a little twisted cotton at the end of a short stick.

Attar of roses has long been the costliest perfume put on the market. During the war it ran up to \$50 per ounce, and at present is round about \$15.

The Bulgarian rose grower who does his own distilling does not get anything like such prices.

Race Mingling

In Hawaii, according to the Honolulu Nippo-Jiji, intermarriage between its many races is becoming more and more prevalent. American men in the islands showed the highest percentage of intermarriage in the year ending June 30, 1927, only 152 out of a total of 388 being with women of their own people. Hawaiian women also intermarried frequently, for out of 271 marriages recorded, 156 were with members of other races. The Chinese, in spite of a popular belief that they are inclined toward intermarriage, showed a total of but 42 such weddings out of 175 men who were married. Only 29 out of 706 Japanese men married women of another race, and intermarriages among Japanese women totaled 41 out of 810.

MOTHER!

Child's Best Laxative is "California Fig Syrup"

Hurry Mother! Even a bilious, constipated, feverish child needs the pleasant taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Took Eagle on Hook

The season's best fish story isn't about fish. John H. Pitts, Alabama Polytechnic Institute football coach, cast his line and a big bald eagle, also fishing, nabbed it in midair. The fishhook caught the eagle and Pitts handed him. The bird, measuring five feet, four inches from wing tip to wing tip, was presented to the institute's zoology department.

Modern Demands

Clerk—Hair net? What strength? Girl—Oh, a motor ride and a dinner.

STUDEBAKER

The Great Independent

ERSKINE SIX

40 miles an hour even when NEW! 62-mile speeds later! Here is convincing proof of the engineering genius, quality materials and precision workmanship used in this Studebaker-built Erskine Six at \$795 f. o. b. factory.

Compare this luxurious new Club Sedan with any car in or near its price class. See a bigger, roomier, five-passenger family car. Doors almost a yard wide, rear seat four feet wide, adjustable front seats, generous leg room, arm rests and other comforts. Drive this car which gives you championship performance at lowest cost—in official tests Studebaker's Erskine sedan traveled 24 consecutive hours at better than 54 miles per hour.

Studebaker's 76 years of manufacturing experience stand back of the Erskine Six.

Dealers' Opportunities

Studebaker assists dealers to conduct their business on a profitable basis—sales training—financing—used car merchandising—advertising help—accounting—service—etc. No wonder Studebaker-Erskine dealers make money with these 4 great lines: The new President Eight, \$1985 to \$2450. The World's Champion Commander, \$1465 to \$1625. The new Dictator, \$1195 to \$1395. The new Erskine Six, \$795 to \$955. Write or wire NOW for complete, confidential information if there is no dealer in your town or if you wish to move to a town where the Studebaker-Erskine franchise is available.

FREE "Trip through Studebaker Factories"

Every car owner, every family with children in grade or high school, will want this interesting free booklet, "A Trip Through Studebaker Factories." It pictures how your car is made—complete from molten metal to dynamometer tests of completed cars. If you cannot visit the huge Studebaker plants in South Bend this summer, send for this free book now—use coupon at right. See pictures of great Studebaker foundries where castings are made from molten iron ten times hotter than boiling water. See six-ton steam hammers forge Studebaker crankshafts. Learn how Studebaker springs are forged and tempered. Why Studebaker steel forgings are baked in huge ovens to insure great strength. Understand how a Studebaker steel body can be fused by electric arcs into one strong silent unit. See airplane views of Studebaker's 800-acre Proving Ground. Learn more about the 76-year-old company and the 21,000 men who work your Studebaker or Erskine. Send for this entertaining free booklet NOW! Use coupon.

Gas Can His Credentials

George Niederbauer, a young college student, arrived in Washington, after getting lifts from San Bernardino, Calif., with the aid of a gasoline can. Flaggging motorists with the can and having them pick him up on the assumption he was a fellow-traveler in distress, the drivers would usually laugh when they found the gas container was only the wanderer's suitcase filled with clothing and continue to carry him on his way.

Indian Soldiers

A full-blooded Indian detachment of the United States army, consisting of 16 privates, two corporals and a sergeant, is stationed at Fort Huachuca, Ariz. These Indians lead as far as possible the life as led by their ancestors, living in tents, cooking at campfires and hunting for some of their food instead of drawing it all from the quartermaster. Among the names are Chow Big, Charles Bones and Sincow Riley.

Small Girl Knew All About Wife of Noah

The kindergarten teacher was telling her group the story of Noah and the ark. Suddenly little Isabel waded her hand wildly.

"I know someone's else," she announced triumphantly. "Noah's wife could ride a horse!"

"The teacher was for the moment completely nonplused, and couldn't just then remember whether those were prehorse days or not. To gain time, she asked:

"How do you know she could, Isabel?"

"'Cause I saw the picture and she was ridin' a white horse. An' I know her name, too."

"Again the teacher was not sure whether or not the Bible mentioned Mrs. Noah.

"Well, what was it, Isabel?"

"Joan. I saw the picture of the lady on the horse and daddy said it was Joan of Arc!"—True Story Magazine.

Just Wait!

"My play will be produced tomorrow."
"How thrilling!"
"Yes, the manager said he would produce it for me tomorrow if I would call for it."—Montreal Star.

One of the secrets of enjoying life is not to want more of anything than you can have.

A man's virtue is his thrill.

MAY 13 IS MOTHER'S DAY

We again approach a holiday everyone in Muleshoe, big and little, old and young, is proud to observe. The observance of Mother's Day is not only beautiful in sentiment, but it is appropriate, for where in all the world can we find anyone whose heart has been as close to our own, or anyone who feels as much for our comfort, welfare and happiness?

No shrine has yet been found about which mankind worships as happily as about mother's knee in his tender years, and within the sunshine of her smile as he grows to manhood. No hand can give him greater comfort, no words can sound as sweet upon his ears. The very name of Mother carries all that love and hope and true happiness can mean.

That is why, whether she be living or dead, the honoring of one's mother comes as the nearest approach to that rich reward awaiting all who have known motherhood, wear on this Mother's Day a flower in her memory. If she is living, and yet afar, write her the letter that will cheer her heart and in a way repay her for the anxious hours she spent in guiding your footsteps in the way she would have you go. If she is with you, do what millions of men would now give all they possess to be able to do—put your arms about her and make her know that, after all, you still treasure her love above all else, and hold her dearer as each day goes by.

Mother has lived long years of her life for you. Surely you are glad of this opportunity to live only one day—Mother's Day—for her.

A FRIEND TO ALL

Despite the fact that more money has been lost, and more people discouraged at poultry raising, chickens and eggs still continue to be one of America's greatest industries. In fact, government figures show more people directly interested in the production and consumption of eggs than any other food commodity. While the value of the products of the American hen is always great, in 1927 alone it reached the enormous total of one and one-quarter billion dollars.

While the smaller cities, towns and villages still contribute much to the general success of poultry raising, it is on the farms and in poultry yards that production piles up, and where the "big money" is made. Muleshoe citizens who keep chickens are largely in the business to serve only their own needs. And yet if they will figure a little, they will be surprised to find what a good profit can be had from even the smallest flock. In no other food is as little waste as in eggs. No other food can be eaten in as many ways—boiled, raw fried, scrambled, poached, steamed, shirred or scalloped. And no other food serves as satisfactorily in both sickness and health.

We're paying this little tribute to the American hen because she deserves it. She is the friend of humanity, and one we cannot get along without, since all cooking is based on eggs. Here's hoping her numbers never decrease and that come what may—strike floods, fires or earthquakes—she will always be found on the job.

THE JOYS OF BEING THE EDITOR

Getting out this paper is no picnic. If we print jokes people will say we're silly; if we don't, they will say we're too serious; if we clip things from other papers we are too lazy to write them ourselves; if we don't we are "back on our own stuff." If we stick close to the job we ought to be out hunting news; if we stay in the office we are neglecting our work and need the proverbial tin can.

If we don't print contributions we don't appreciate genius; if we do print them the paper is filled with junk. If we change the other fellow's writing we are too critical; if we don't we are asleep.

And if we print something real bright, like this, we swiped it from somebody else. And that's correct!

Mrs. Nina Elrod and Iris Harden were in Clovis Wednesday staying over for the show, Ben Hur.

Mr. and Mrs. G. W. Bigler were callers at the Journal office Saturday, while here they subscribed for the paper another year.

C. B. Nutt has accepted a position with Lem Chesler on the Chesler ranch north of town.

A number of the Sudan High School students visited Muleshoe Wednesday, via truck, advertising the Sudan play "An Arizona Cowboy" which they will present at the School Auditorium on Thursday evening.

TEXAS AND TEXANS

By WILL H. MAYES

Texas Thoroughbreds
Did you know that there are some two hundred Texans engaged in breeding and raising thoroughbred race horses; that there are several million dollars invested in thoroughbreds in the State, with at least one stable of such horses valued at more than a million and several where the investment runs into hundreds of thousands? Did you know that a large number of the fastest horses on the race tracks of the country are Texas bred and raised, and that a profitable Texas industry is being built up in the raising of such Eastern horsemen? Did you know that horsemen generally regard Texas as about the best state in the country in which to raise and train horses? I did not know any of these things until I spent a day recently at the Brownlee ranch in Burnett county, where I saw some of the best thoroughbred horses and mares in the State and learned something about a business of which I, along with most other Texans, know very little. Hank Brownlee, an Austin lawyer and owner of the ranch, who is also what he terms "acting president" of the Texas Thoroughbred Horse Breeders' Association, was in process of organization, was my host and informant.

Horse racing has been "in bad" in Texas for a number of years and justly so because of the practice of bookmakers and the lack of any uniform, legalized control. Horsemen frankly state that bookmaking, betting, drinking and "tricks" have been responsible for the conditions which the best class of horsemen do not approve, but which they are powerless to control. They believe that State regulations, supervision, and control under proper legislation would make horse racing in Texas the popular pastime and sport that it is in the North and also soon make Texas the greatest thoroughbred breeding and training country in the entire world. They say that it is recognized that soil here underlaid as much of it is, with limestone, produces the grass that makes the best bones; that the dry, sunny climate develops the lungs and heart action; that horses pasture on mesquite grass sod, on limestone subsoil, and trained in the light Texas air have unequalled power of endurance.

Why Regulate Racing?

They regard racing contests as essential to the development of race horses, just as the schools regard football, baseball and basket ball contests helpful in the development of the best athletes. Breeders want to train their horses where the stables fan contest with each other under the protection of the law and free from objectionable practices that have practically ruined public racing, and in a climate such as Texas has in winter, but which can be found nowhere else except in Mexico, where gambling and drinking are part of the work. They want to know in advance what rules and regulations they will have to race their horses, whereas now every racing association makes its own rules and often changes them without a moment's notice and even the most reputable fair and racing associations are at liberty to let the racing privileges to persons who too often resort to questionable methods of increasing their profits. Texas horsemen believe that State control under proper legislation will encourage racing as it has in other states and will bring to Texas thousands of Eastern and Northern horses every winter for training, and that horse racing will become a source of great profit to Texas, as well as a stimulus and encouragement to the thoroughbred industry of the state.

Hereford Ships Mules

Hereford has become a large contractor and shipping point for mules. The North Plains country is producing mules of a kind that are in demand where the best are sought, and large shipments are being made to all sections of the country. More than 70 car loads have been shipped from Hereford recently and buyers are searching the country for more. The tractor is growing unpopular, but those who raise good mules have no fear of competition of the motor driven machine.

Farm Classes Popular

More than 8,000 boys are studying vocational agriculture in Texas in 233 departments, according to a statement recently made by the state supervisor of agricultural education. They are studying in the elementary schools, improved farm methods and practices and fitting themselves to do farming under much better methods than those practiced by their fathers. Many of them are becoming so infatuated with farming that they will seek advanced training at agricultural colleges after finishing the elementary courses.

Menard Mineral Claims

Large deposits of minerals, aside from oil, gas, coal, and lignite, are said to exist in Menard county. Mineral rights recently obtained on 546 acres at \$10 an acre plus a 2 per cent perpetual royalty is the first step taken to develop these minerals. Geologists say that these are all iron-bearing and that the mineral wealth of Texas far surpasses that of the oil and gas which is making Texas so rich.

Geologic Outlook East

The Geologic Inquirer says that

there is no more beautiful spot anywhere in Texas than the County Park, "a pretty retreat nestling on the banks of the San Marcos," and that numbers of tourists from other states are stopping there these days, all of them enthusiastic in their praise of the beautiful park. The tourist travel for the season is already under way, and if a place wishes to have any considerable part of that travel the "beauty spots" must be cleaned up and put in shape to induce the tourists to tarry awhile.

Mr. and Mrs. Walter Witte are the proud parents to a new baby girl.

DIVERSIFIED FARMING IS SAFE FARMING

One-crop farming in the long run will make both farm and farmer poor, says the Sears-Roebuck Agricultural Foundation.

Neither factories nor workmen can hope to prosper unless they are busy the year around. By growing a variety of crops, it becomes possible to arrange the farm operations so as to have field work from spring to fall, and feeding these crops will enable the farmer to turn his winter time to cash.

The farmer who raises only one crop is rushed part of the year and idle the rest. Usually this type of farmer does not grow his own living and, therefore, is in debt when harvest time arrives.

Live stock production leads directly to growing a variety of crops, the Foundation adds. This includes legumes which aid in maintaining fertility.

If the one-crop farmers of the South, collectively, would grow their own food and feed, reducing to cotton the higher price which the staple would bring would go far toward compensating them for the smaller amount they would have for sale.

Most money can be made from lambs produced by farm flocks if they are marketed before the middle of June, states the Sears-Roebuck Agricultural Foundation.

They should be sold at weaning time when three to five months of age while they still carry their "milk" fat.

Spring lambs sold as early as Easter time have brought as high as \$20 to \$24 per hundred pounds.

Lambs held beyond this stage may even lose weight because of weaning, but weather, dip and parasites, particularly because they may become infested with stomach worms.

To have lambs ready for market during the spring, they should be dropped in February or early March.

Last year, due to additional funds received late in June, continued Gen. were able to order, to camp and to train some 500 more than the quota assigned by the War Department.

This year, the situation is different. The Secretary of War has announced that no additional funds will be available, and the quota of 2700 assigned the 8th Corps, AAAA cannot be exceeded.

This means that the young man who waits until the last minute will undoubtedly be disappointed and the only way for him to be sure of a place is to submit his application at once.

Make a cream sauce by melting 2 tablespoons butter, add to it 2 table spoons flour and 2 cups milk. Cook until smooth, then add 3 cups cheese. Cream cheese makes a more delicate dish.

FIGURE IT OUT Add together the year of your birth, the year of your marriage, the year in which Columbus discovered America, your present age, number of years married, and the number 436. The result will be 5,782 in every instance.

ENROLLMENT FOR THE C. M. T. C. PROGRESSING

Enrollment for the Citizens' Military Training Camps to be held this summer in the 8th Corps Area is progressing favorably and in considerably ahead of last year.

To date the six camps are approximately 65 per cent filled, with applications coming in at the rate of about 40 per day.

I am sure the young men of this section of the United States, said General Donaldson, are just as appreciative of the advantages and benefits of the month's training offered them at Government expense, as are their eastern brothers.

DAIRY ORGANIZATION IS NEED OF DAIRYING

(Prepared by the United States Department of Agriculture.) Effective organization in the production and distribution of dairy products, and the development of new markets, are necessary if the American dairy industry is to maintain a satisfactory economic position.

Mr. Tenney outlined the marked expansion in dairy production and marketing in leading foreign dairy countries in recent years. There is a tendency, he said, for foreign production to increase more rapidly than demand, as a result of which producers in the United States are facing increased foreign competition and exportation of greater quantities of dairy products.

Reviewing the world dairy situation, Mr. Tenney declared "the most important of the war developments has been the great expansion of production in new countries of the southern hemisphere. This expansion has continued since the war, and is being maintained in the face of falling prices. Since the seasonal production of these countries places the largest volume of their annual output on the winter markets of the northern hemisphere, this development in the southern hemisphere is equivalent to a great shift to winter dairying by producers of the northern hemisphere.

"This tends to take the peak from our winter market prices, thus reducing the profits of winter dairying. A second outstanding development in production is the rapid recovery and continued expansion in old country production, including the Netherlands, Denmark and other Baltic states."

Exports of butter and cheese from the United States have gradually disappeared since the early '80s. Mr. Tenney said. The export of the surplus of cheese and then of butter, has given way to net importation. The exportable surplus of concentrated milk is being rapidly reduced.

The disappearance of one export surplus of cheese is attributed in part to the rapid expansion of the demand for butter and milk in the United States, as the elimination of the export surplus of butter is due in part to the expansion in the domestic demand for milk.

Records of five years show that it costs \$43 a year to care for a cow. A good dairy cow probably consumes more water than any other domestic animal. The more feed consumed, the more water the cow requires.

BOY THOUGHT DEAF IS TRAINED TO HEAR

"Talked" in Pantomime Until Taken to School.

Indianapolis.—Whether a sturdy little youngster brought to them as a mute is really deaf and lacking the powers of speech, as his parents believe, is a matter which teachers of School No. 9, Vermont and Davidson streets, are trying to determine through methods employed in the atypical department of the institution. The child, who is six, too young to enter the Indiana School for the Deaf, was brought by his parents, both mutes, to the school in hope that he might be educated. His two sisters are mutes, and because the two always talked in pantomime, he was thought also to be a mute. He was put in charge of a teacher in the room known as atypical B which is provided for hearing pupils who are perpetually backward and unable to keep pace with the average child of that age.

The first thing the teacher learned was that the boy could hear, though with some difficulty. This led her to believe that he might be taught to articulate. The fact that he never had, might be attributed to a psychological rather than a physical cause, she believed, inasmuch as all his life he had been associated with mutes.

On the assumption that the child could be taught to understand and express himself in the English language, the teacher first began instruction in lip-reading. As a pupil, he showed unusual attentiveness and quickness of perception. Within nine days he had learned the meaning of nearly a score of words which he understood from the motion of the teacher's lips. Hereafter he could comprehend ideas only through pantomime such as he employed.

Assured of success in this direction, the teacher set about determining how much the youngster could hear. She found that he responded to sound as she continued to work with him, his hearing seemed to grow better and now he hears sufficiently to understand four words—"boy," "girl," "about" and his name—in order to explain to his teacher just how he heard and felt the sound of a piano note when she struck it, he pointed first to the floor, then his shoe, his body and his ear.

Shows Normal Tendencies. In meeting the problem of teaching him to talk, the teacher first began by saying and in turn having him pronounce after her three vowels. This he does with an enunciation that is surprising in view of his history. She has noticed a definite attempt to say words, as his parents have tried to get him to do in their unintelligible way.

The man who thinks he is economizing by buying cheap milk pails is robbing himself. A good pail costs a little more but it lasts far longer and is cheaper in the long run.

Tests at the Minnesota experiment station show that a cow producing 27 pounds of milk daily consumed 3.6 gallons of water while one of the same breed yielding 13 pounds of milk drank only five gallons of water.

Smartly Styled Dresses In this collection of new summer dresses you will see an array of the favored styles, in most pleasing assortment of new materials. Prices are so very moderate that you can well afford one or more.

BROAD-GAUGE POLICIES ESSENTIAL TO BUSINESS DEVELOPMENT

A New York state newspaper, in ridiculing the attempts of agitators to inflame the American people against many of our basic lines of industry, says: "The railroads of the country, which have been made the target for the venom of the small-minded and the demagogue, carry a ton of freight one mile for less than a cent, while in Ben Franklin's day a dollar would ten times the purchasing price it now has. It cost \$8 to move a ton of freight a mile. A taxicab driver would charge about \$10 for carrying a passenger as far as he might ride on a street car in practically any great American city for less than a dime. Yet there is never any political outcry against the taxicab driver—only against the transportation company."

This country has been made a leader in world affairs not by the peasant-stand method of doing business but by the broad-gauge activities of men with vision who have "things" in a big way with vast amounts of capital. The peasant-stand method would never have given every family automobile, a dozen transcontinental railroads, electricity and telephones in every nook and corner of the land, gasoline and lubricating oils at prices unheard of in other nations, banks in even small towns, insurance covering every line of endeavor, and common lowly commodities such as soap in quantities and varieties and varieties which the inhabitants of most other world countries do not dream of. Modern plumbing and sanitation in the home is a thing distinctly American.

America will prosper in proportion as its people understand and encourage broad-gauge policies which aid investment of capital and development of industries, which resulting distribution of necessities and luxuries to the masses, steady employment of industries, with resulting distribution of necessities and luxuries to the masses, steady employment and good wages.

As a compromise we suggest that the wet and dry question be left to the weather bureau.

WAYLAND COLLEGE SUMMER TERM OPENS JUNE 4TH

Plainview, Texas.—Inquiries continue to come in for bulletins of the Summer Session of Wayland Baptist College. Over a thousand bulletins have been sent out and from the interest manifested, indications point toward a large enrollment for the summer term. Wayland this year is offering the same opportunity of certificate extension as any other school up to and including the second year of college work.

The Summer Session will open June 4th, and close August 10th. Classes will meet six days in the week, beginning at 7:30 in the morning and continuing until 12:30 p. m. The afternoons will be given over to rest and recreation and preparation of work for the next day. The term course will be completed in ten weeks.

Elementary and secondary school certificates may be renewed here according to state requirements and the work will be credited on a regular college course. The straight college may be taken, or as many as two high school credits may be obtained. Academy subjects will be taught the same as college courses.

Wayland college has been recognized and established educational institution on the Plains for eighteen years. In all the summer of 1924 the school had not conducted a summer session. The demand for summer work, however, became so great that this phase of the school work was taken up four years ago and the summer sessions have been quite successful. With the college free of debt the outlook for the summer session is flattering and all indications point to a record attendance.

STRAWBERRY CONSERVE

- 1 quart ripe strawberries
 - 1 cup seeded raisins
 - 4 cups sugar
 - 2 oranges
 - 1 lemon
 - 1-2 cup chopped walnuts
- Wash and drain strawberries, put into preserving kettle with raisins, sugar grated rind and pulp of oranges and lemon. Cook slowly for 30 minutes, add walnuts and continue cooking 10 minutes longer. Turn into sterilized glasses or jars.

CHICKEN POX IS VERY CONTAGIOUS

Chicken pox (sometimes called varicella) is a very contagious disease. It makes its appearance in the form of irregular whitish patches or vesicles which later develop into brown spots or crusts (resembling a scab of the sceler) on the crown, wattles, eyelids, and around the neck and nostrils. In severe cases these patches or sores increase in number to such extent that the birds are difficulty in opening their eyes and beaks, and if neglected may well die.

The best way to prevent birds from this disease is by their other disease is to keep all roosting quarters clean, dry, and well disinfected. During the summer, when the disease is most common, a 3 pound of powdered sulphur with each 100 pounds of dry mash, allowing the birds to eat all they want. Chicken pox usually attacks the hatchlings early with yellow and more severely than early hatched ones, which makes it advisable to hatch as early in the season as possible. If, however, a flock becomes infected in spite of all precautions, no time should be lost in treating the birds by applying a liberal quantity of carbolic vasoline to the affected parts. This treatment after a short time will cause the patches or crusts to soften and drop off, when the tissues or sores through which they were formed will be healed.

As soon as the disease makes its appearance spray the affected birds with a disinfectant (preferably some good disinfectant, preferably some good wood preservative or coal-tar preparation), and avoid the drinking fountain, and avoid the water trough with boiling water. Repeat every two or three days until after all the birds have fully recovered.

Poultryman Should Cull All Loafers From Flock

Because egg prices are going down and food prices are going up, poultrymen cannot afford to keep "starboarders," according to the poultry department at the New York State College of Agriculture, which says that about 25 per cent of the hens in the average farm flock in New York state are loafers that do not pay their own way, and at the same time are "stealing" money from the poultry house that the laying hens should have.

For several years poultrymen from the college have spent months of their time during the summer months culling poultry for the farmers in New York state, and last year a total of 25,000 birds were handled. The men who do the culling are trained poultry judges, and the cost of the service to the farmer is about one and one-half to two cents for each bird handled.

On the basis of the number of birds actually discarded, the cost to the poultryman is about five or six cents a bird. The department says that it costs 20 to 30 cents a month to feed a hen, therefore, the saving for the farmer is evident.

Any farmer in the state may have his poultry culled by a poultryman from the college by applying to his local farm bureau agent or by writing directly to the poultry department at the State College of Agriculture at Ithaca, N. Y.

Poultry Notes

- Sell broilers and fryers promptly.
- Keep the poultry house clean and the birds are more likely to keep healthy.
- Chickens to be used as brooders or layers should be provided with plenty of green range.
- Chickens with good capacity and good appetites are the ones that fill the egg basket.
- Produce clean eggs so none will have to be washed to give a good appearance.
- Eggs that have been washed will spoil quicker than those that have not, so produce them clean at the start.
- A green feed is essential to egg production. To raise green feed successfully is one of the greatest pleasures of the poultryman who wishes to have eggs when the price is high.
- Market the surplus cockerels or keep them separate from the pullets for most satisfactory growth.
- The young chickens should be kept comfortable in the nest during the first week, receiving extra heat and causes cooked breast bones.
- A hen cannot very well feed chicks at night if in the daytime and vice versa, much time to lay eggs. Sanitation, plus good feeding and management are all essential for best results.

NOTICE OF SALE IN THE UNITED STATES DISTRICT COURT FOR THE NORTH DISTRICT OF TEXAS, WICHITA FALLS DIVISION.

Universal Oil Products Company Vs. American Refining Co., Inc. et al. No. 228

By E. J. Enby, Receiver

NOTICE OF SALE OF ALL AND SINGULAR ASSETS OF M. J. BASHARA:

HARA:

By order of the United States District Court for the Northern District of Texas, Wichita Falls Division, dated March 3rd, 1923, and filed the 18th day of March, 1923, in the above cause, the undersigned as Receivers of the estate of M. J. Bashara will offer for sale and sell at public auction on the 2nd day of June, A. D. 1923, beginning at 10:00 A. M. at the Court House door Wichita County, Texas, at Wichita Falls, Texas, all and singular assets, rights, claims, properties, real and personal property, including good-will, cash and accounts receivable, and in fact every kind of property belonging to the estate of M. J. Bashara, included in which is the following properties in Bailey County, Texas, to-wit:

Parcel No. 14
Bailey County, Texas.
Being 4427 acres in Bailey County, Texas, consisting of Lease Nos. 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Said sale will be made subject to liens and encumbrances, except taxes due to the government of the United States, as shown on the State of Texas, or any municipal subdivision thereof accruing prior to January 1st, 1923. Reference made to the order of sale made for the conditions (thereof, and schedule of all properties is on file in the office of the Receivers at Room 513 of the City National Bank Building, Wichita Falls, Texas. Witness our hands this 14th day of April, A. D. 1923.

JOHN W. HOOSIER,
E. H. EDLEMAN,
C. MYTINGER,
Receivers for M. J. Bashara.

THE STATE OF TEXAS:

To the Sheriff or any Constable of Bailey County—Greeting:
You Are Hereby Commanded to summon Vaughn Winn by making publication of this citation once in each week for four consecutive weeks preceding the filing of this suit; That plaintiff has lived in Bailey County for more than six months and the State more than twelve months preceding the filing of this suit; That plaintiff was lawfully married to defendant on the 20th day of December, A. D. 1922, her maiden name being Nancy Jim Cox, and that said marriage relation still exists; that they were separated on or about July 15th, 1922, since which time they have not lived together; that prior to their separation plaintiff was confined to a sanitarium on account of ill health; that as soon as she was discharged therefrom she went to the home of her mother to recuperate her health, at the suggestion of her husband, which was estimated to require about two weeks, and while there defendant wrote her to remain there as he was not coming after her, after which he went away and never returned, and she never heard from him again; that plaintiff is of a sensitive nature, and the conduct of defendant mortified her so much that she pine away; the said treatment of defendant toward her constituted cruel treatment of such nature as to render their further living together insupportable.

Herein Fail Not but have you before said Court at its next regular term, this writ with your return thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Muleshoe, Texas, on this 19th day of April, A. D. 1923.

C. C. MARDIS, Clerk, District Court, Bailey County, Texas.
By Lola Lipscomb, Deputy.

FACTS

PREPARING DAIRY FOR COLD WINTER

"The first thing to do in preparing for winter," says Dr. C. H. Beckley, chief of the dairy division of the University of Minnesota, "is to go over your feed situation. If you have slacked on hand and let your barn it will be easy to fix up a suitable grain mixture. If you have oats and barley you will not be to produce the feed alone unless you have some heavy milking cows to feed. If your cows are heavy milkers some concentrate high in protein is needed to balance the grain ration, and the amount needed for the winter should be purchased. It never pays to half feed live stock of any kind. Do not wait to feed in the fall before beginning to house the cows at night and even during the day when the weather is bad. It better that some extra feed be purchased now than during any other month. The owner likes to keep their own as long as possible to save labor and possibly in some instances to feed a cow at a profit. She will not hold up in milk later in the winter because she is uncomfortable. "Housing fattening animals" dairy cows is quite a different proposition. The fattening is well protected from the cold and does not need it. The cow in milk is not protected by a layer of fat. She is sitting out in milk like a turkey. If a barbed-wire fence is nearby good shelter for a dairy cow either day or night during the winter."

Avoid Breeding Heifer Before Two Years Old

Experienced dairymen who have been through this matter will soon appreciate the damage that is done to heifers if they are bred too young. Premature breeding usually results in low interest animals which have a reduced capacity for milk production. Continued breeding at an early age tends to weaken the vitality and health of the cow. The larger breeds of dairy cattle, like the larger breeds of chickens, require more time to mature than the smaller breeds. This means that Holstein should be allowed more time to grow than Jerseys. Even the smaller breeds should not be allowed to produce calves before they are two years old if they are to give the best results. It is generally agreed that Holstein should not be mated until twenty-one months old when Jerseys should be from eighteen, to twenty months; Guernseys from seventeen to nineteen months old and Jerseys from fifteen to seventeen months. This means that the heifers must not be allowed to run with the herd bull, for the calves that come in heat many months before this age is reached.

Ventilating Barn

When building a new barn or remodeling an old one, many factors and problems should be given the very closest consideration. The location of the barn with reference to drainage and its relation to other buildings cannot be given too much attention. The arrangement of the barn and the fixtures that are to be used should be designed to save labor. An abundance of light should be provided, as clean sunlight is a very important factor.

Watch Young Calf

Too often dry pastures, flies and especially insufficient grain and water cause scrawny, inactive calves that never develop into average-size cows. The calf should be eating some grain from the time it is three weeks old and at weaning time this should be slightly increased, especially if the pasture is short. If no pasture is available a little alfalfa hay will be satisfactory. With good pasture, grain is not necessary more than two weeks after weaning.

Centrifugal Force Will Drive Out Skim Milk

Centrifugal force drives the skim milk out of the separator before the milk has time to separate. In fact, the force in speed, therefore, forces more skim milk through the skim milk outlet, consequently richer cream. A decrease in the speed forces less skim milk through the skim milk outlet and the cream, therefore, is thinner. Where different persons operate the separator there is a loss of uniformity of speed unless each person makes an effort frequently to count the crank revolutions by their watch. The use of a gasoline engine or some one else's power will tend to give a more uniform cream test than when the belt drive is operated by hand.

Dairy Squibs

Avoid overfeeding the poor-producing dairy cow. Underfeeding good cows is extravagant waste.

SLOW--EVEN--LONG Tread Wear

MORE MILEAGE IN THIS SUPER TIRE

Most balloon tires develop certain peculiarities in tread wear. They do not wear down evenly in the center of the tread but rather at two points near the shoulder. They are subject to "Cupping" and uneven wear. And this is because Balloon Tires not only have a forward wearing motion but a side-wise "scuffing" wear as well.

In Goodyear's All-Weather Balloon ALL these faults have been overcome. Its new design reduces side-wise "scuffing" to a negligible minimum. Then two sturdy service ribs fortify this tire at points of greatest wear. Its tread wears slowly, evenly—far longer than old style balloon treads.

Let us explain this tread to you. Stop in today! They cost no more.

Fine Alfalfa Chaff Is Excellent for Chicks

The fine alfalfa chaff gathered from the mangers makes an excellent green feed for young chicks, and it is also good scratching litter for the colony brooder houses. Some poultry men believe that it will pay to keep the chicks in the range for about three weeks to reduce the danger from food poisons. They will supply green feed and attempt to make range conditions in the house.

Poultry men who do not have alfalfa for other live stock can buy alfalfa meal for chicks. This varies in price according to the quality. In some of the commercial starting mangers have a little alfalfa-leaf included. In feeding either alfalfa-leaf meal or sprouted oats to chicks, it is difficult to give any exact quantity which should be given. Chicks develop rapidly in weight and their requirements increase from day to day. The practical way of feeding green feed to chicks seems to consist in giving each chick about as much each day as they will clean up in an hour or two without waste. Then the chicks can pick at the sprouts or alfalfa leaves when they wish, and all the chicks in the flock will have a chance at some green-feed.

Poultry Squibs

Cull, and sell squab hens. Remove males from the poultry flock.

Minerals are often limiting factors in egg production.

There is considerable strain on a hen caused by laying heavily every day, even if that production is during the natural season for heavy laying.

A young orchard or a wild plum grove or a grove of sunflowers are ideal places to raise chicks. Some successful poultry raisers grow their young chicks at the edge of a corn field.

Poultry farming seems most efficient of all farming—is it because women do most of that?

While hens will live and even keep in fair health on poor rations, well-balanced, palatable feeds are essential to good egg production.

Some milk, either sweet or sour, and unfermented are especially valuable feeds for young chicks in hot weather, making the diet lighter without reducing its nutritive value.

One of the faults of many feeders is that they do not give their flocks enough feed, raise a few weak, and the others will do best if the weak are segregated. The weak should be removed by the pullets when they can be distinguished.

WHEN PROMOTERS USE "CHARITY" TO DECOY TRUSTFUL CONTRIBUTORS

Investigations of Various Schemes for Defrauding Public Out of Money Disclosed by Bankers Association—Many Kinds of Fake Industrial Promotions Used as Bait.

By W. R. MOREHOUSE
 Public Relations Commission, American Bankers Association

MILLIONS of dollars raised under the disguise of charity go to line the pockets of promoters. Ticket sales on raffles are commonly used, and while the loss to any one person who buys a ticket is small the aggregate loss for the United States runs into millions of dollars. Usually the promoters of these schemes first make a contract with some charitable institution to conduct a campaign for funds on behalf of the institution. They are to run the campaign in the name of the institution and share the proceeds. The whole scheme is often one of deception. To those who have been led to believe that their contributions go practically 100 per cent to charity, the following case we investigated should prove illuminating.

A number of promoters recently contracted with a charitable institution to put on a campaign to raise funds by the raffle of a new automobile. So far as the public could tell from the banners used in displaying the automobile, the full amount of the sale price of the tickets went to the institution. There was nothing to convey any other impression. Apparently it was open and above board and was being conducted by men who were contributing their time gratuitously.

For several days a new automobile, mounted on a truck, was driven up and down the streets, with banners telling about the drive for funds for the charitable institution. One day the truck would go by displaying one of the popular makes of automobiles. A few days later it would parade by displaying some other popular make. Periodically the truck would pull into the curb where it would park for several hours while the promoters pleaded with passers-by to take tickets on the raffle and thereby help a deserving charitable institution to meet its bills.

Thousands "Touched" Thousands of people, touched by the appeal for help, bought tickets, the total sale running into the thousands of dollars. Contrary to the belief of the ticket buyers their contributions did not go 100 per cent to charity. Instead the charitable institution received but 26 cents on the dollar, the promoters getting 52 cents on the dollar as their net profit, or twice the amount received by charity, while the remainder of 22 cents on each dollar represented the amount charged against gross sales by the promoters as expenses.

In other words, every person who bought a 50 cent ticket for the sake of charity, contributed but 13 cents to charity and 37 cents to those promoting the scheme. Whether you give to charity or make an investment it will pay you to get the facts!

Unfortunately there is a general impression abroad that wildcat promotions are confined to oil, mining and new inventions. The truth is, many stock selling promotions are operated under the name of other industries.

False Claims A certain group of promoters investigated offered for sale stock in a proposed woolen mill. In order to sell the stock they resorted to the use of misrepresentation and false claims. After renting space on the ground floor of an office building fronting on a busy street they began their campaign. Orally and by printed advertisements extravagant claims were made for the proposed corporation which were grossly false.

Buck Paid Board Bill

With Set of Antlers

Superintendent J. R. Eakin of Glacier National park is authority for one of the most striking instances of wild animal gratitude recorded in natural history. He relates: "A buck deer with especially fine antlers has been a great favorite at headquarters this winter, and several people expressed a desire for his horns when they were shed, which invariably happens around January. "One morning while feeding this buck on her back porch, a woman residing at administrative headquarters was astonished to see him rub his horns on the wall until they fell to the floor. As she fed him more often than any other person, she believes it was his way of showing gratitude."

STOP THAT ITCHING

Use Blue Star Soap as a cleanser—then apply Blue Star Remedy for Eczema, itch, tetter, ringworm, poison oak, dandruff, children's sores, cracked hands, sore feet and most forms of itching skin diseases. It kills germs, stops the itching, usually restoring the skin to health. Soap, 25c; Blue Star Remedy, \$1.00. Ask your druggist.—Adv.

The Visitor

"We understand that a party of friends came to your house last night to help you celebrate your birthday," said the able editor of the Torch of Liberty. "How did the affair go off?" "Durned if I know!" replied Gar Johnson of Rumpus Ridge. "White went away during the afternoon and took the children along. I crawled into bed at sunset, and when a horraur ariz outside I just turned over and went to sleep. I fowed it might be a mess of Ka Klux come to celebrate something, I didn't know what."—Kansas City Star.

Not His Line

Bill Brennan, Jr., isn't old enough to be a member of his father's firm and be known as a realtor, but he specializes in the same as the W. A. Brennan company does in large downtown leases and real estate deals, having his small sister as his principal client. The other evening Bill, Sr., overheard some of the "business" conversation. The "client" had called by phone and Bill, Jr., answered. "No," he spoke into the imaginary telephone. "I am not an insurer; I am a real estate."—Detroit Free Press.

Your Church or Society can make money. Introduce WATERLESS CLEANSER in your section. For information write H. A. Sanford, Moxville, N. C.

Playmate

Charming—I hear you have a new baby at your house. "Martin—Yes; my wife thought the dog ought to have somebody to play with."

Reason Enough

Mrs. Lee (during the dance)—"Why do you hold me so close?" The Man—"Because you're so distant."—Bost. Transcript.

Room for Millions

Passenger-carrying capacity of all the railroads of the United States if every car and coach were filled, it is estimated, would be approximately 2,612,000 persons.—Gas Logic.

Pleasing Assurance

Patient—Will I get well? Doctor—Yes, sir. You'll get well if it costs you \$50,000.

World's Largest Statue

What will be the largest statue of its kind in the world is to be erected in the bay at Rio de Janeiro, a huge figure of the Christ, 190 feet high, says Popular Mechanics Magazine. It is the work of the Polish sculptor, Landowski.

A good many trains of thought are unable to get off the sidetrack.

That's No Lady

One (at fancy dress ball)—That lady over there has been watching you for ever so long; I bet she'll be asking for an introduction soon. Two—She won't—she's my wife.—Passing Show.

Recalling Old Times

Among those who attended the Martha's Vineyard county fair this year were twenty-two men and women who went to the first fair, sixty-nine years ago.

"Men of the Trees"

An organization started six years ago by an Englishman among African tribesmen in the highlands of Kenya, with the object of encouraging the natives to replant denuded areas, has extended the scope of its operation and is now seeking to educate public opinion throughout the British empire in forestry and to instill love of trees into all sections of the community. To this organization has been given the appropriate title of "The Men of the Trees."

W.L. DOUGLAS SHOES
for MEN, WOMEN & BOYS

JUDGE THEM FOR YOURSELF!

The next time you need a pair of shoes, step into the nearest W. L. Douglas store or the Douglas dealer in your locality. You will be cheerfully shown all the latest styles and we believe you will be convinced that W. L. Douglas shoes are better in quality and style than shoes usually offered at such reasonable prices. Millions of satisfied wearers know this to be true.

More than a hundred W. L. Douglas stores in the principal cities and the most reliable shoe dealers everywhere are now showing the new spring styles. A fair and square retail price stamped on the sole of Douglas shoes is the history, guarantee, honor seal.

REMEMBER: We bought our leather before prices advanced and are passing on to all our customers, old and new, a saving which amounts to almost \$1.00 on every pair of shoes.

Men's \$3 to \$5. Women's \$2 to \$3—Boys' \$1 to \$2
Catalog of New Spring Styles mailed on request.

W. L. DOUGLAS SHOE CO.
1173 South Street, Brockton, Mass.

TO MERCHANTS: If Douglas shoes are not sold in your town, write today for catalog and agency for America's Best Known Shoes.

A Romance of Braddock's Defeat

CHAPTER I

Beginning the Red Road

The little town looked the same as when I last made for Shooter's Hill, fleeing from the ignominy of being hit better than a pauper, it was two years since I had been in Virginia and there were certain outstanding debts which made it embarrassing for me to return.

While the fats were being held to May and October, all persons coming to Alexandria would be exempt from arrests and executions. And it was not yet Maytime, and I went back with out road-belt, as my red friend, the Onondaga, would style innocently from annoyance. I risked great humiliation, but there are certain things a man must do despite the odds, and I had returned because something larger than my personal welfare was concerned.

However, I consoled myself with remembering that much mountain water had flowed down the Potomac since my hasty departure, and that all the colonies were in the midst of stirring times; that the extravagances of Webster Brond would be forgotten now we were at the throat of France once more.

The coming in of many strangers permitted me to remain unnoticed. So it was that my long leggings, my fringed hunting-shirt—its fringes, my necessary and long rifle, my ax beside the hunting-knife in my embroidered belt, gave me assurance against recognition until I should reveal my identity when I addressed my news to Governor Dinwiddie.

It was not from choice that I had left my Onondaga comrade over the mountains and some to town, although the old false pride which had prompted my flight had been washed out by much rough faring and many a desperate plight. It was love for the colony that had drawn me back.

I came fresh from Fort Duquesne and Shanopin, from the distant Ohio where the English were but little known, and there a name of Drouillard, Laforce, de Villiers, Jumonville, and others of the French, already were so many war cries among the Indians along the Monongahela and the Allegheny.

Throughout the hurried journey back to Alexandria, I had told myself the past with me. Webster Brond, the forest-runner, was entirely apart from young Webster Brond who had taken such pride in scrawling in his Chequers Lane address his name with "Gen't." affixed.

And now that I was crossing the market-square and was in time to see the Northern, I met a man from Richmond, draw up before the Royal George before continuing his lumbering journey over the King's post-road to the east. If the call of my ancestry and turned my steps to the house which my father's love had lost to me, along with many other things.

Some families are unfortunate in coats-of-arms and mottoes. My people had been afflicted with the family device of an outstretched hand. My father by nature was congenial and cordial, prodigal with good cheer. He had only needed the appellation "Friend of the open road" and only a few times did I puff up with pride when he explained his light pockets by saying:

"It's a duty we owe the name, lad. We will plant more, but we will never be niggards."

I thank God he passed out before the crash came, that I never shared the bitterness, and that it could be I who was forced to escape petty prosecutions by flight into the wilderness. It would have broken the kind heart could he have known my estrangement from my fellows.

It helped me much to find the place deserted. To have seen others there where my father had kept open house, would have grieved me sorely. I sent my love through the paneled door and passed around to the high garden and looked into the garden. Like the house, it showed the lack of human occupancy.

The place was a riot of untrained growth, where once orderliness and beauty had traced the winding paths. All that was left to remind me of the golden yesterday was the aroma of the snowy cherry blossoms.

Voices close by aroused me and I turned from the gate. Despite my rough schooling from Lake Erie down to the Falls of the Ohio, my heart went pit-patting, just as it had when I wrote first in my school books.

The fellow with her had been my boon companion, and I had never twigged and beruffled shirt, his knee-breeches, buck buckles and slitten hose put my travel-stained garb to shame, and I was for turning back to the gate that I saw a hint of amusement in their curious glances; and, conquering my weakness, I swept off my ragged fur hat with an almost reverent grace and called myself more vividly to their attention. Busby stared blushing, as if I were some fresh-cut creature from the unknown, while she frowned in perplexity; that she rec-

ognized me despite my forest dress and explained:

"Webster Brond?"

Busby stared blankly for a moment, then smiled broadly and cried:

"'Curse me if it isn't! Brond of the open hand! Where did you come from? And when did you get back? And why do you wear that Indian togs?"

"Hush!" murmured the girl.

I affected not to hear her, nor to wince under the old title, and explained:

"I'm going over to his excellency, the governor, I'm waiting for him to return from the Maryland shore. I am from Duquesne, and the country I have covered is ill-fitted for finery."

The shadow of the war was upon us all. Her fair face flushed, and she softly cried:

"You've been to Fort Duquesne Webster? How romantic! Our General Braddock will soon be here. Of course you will wait with him."

"I shall be glad to serve as a scout." For I was in no way inclined to shun myself to stiff-necked discipline.

"Then I may see you along the road, Web. I ride with him," said

Miss Miss Josephine made me a little curtsy as a signal for her companion to be moving. Busby was inclined to shade hands and instinctively obeyed his English blues as starting to do so, then contented himself with a ceremonious bow. The little lady saw everything and with impulsive frankness, which ever characterized her kind heart, she advanced as Busby fell back.

Seizing my hand for a brief moment she softly murmured:

"We were very young but I do not know. Look out for him on the march."

And with another hurried little curtsy she was walking out of my life, with Busby mumbling and muttering in her small ear—possibly asking to be told what confidences she had imparted to me.

I silently said farewell to the house of the open hand and turned back to the market square.

I have seen the town the same, and so it was so far as the yellow white and red chimneys were concerned, for here was the same proportion of white and red. But it was in physical aspect alone that the town remained unchanged, for the life of the streets was vastly different. Those who came to the market square and there were cannon banded up to the post-road. There was a frantic passing back and forth of a new population. As I looked upon the Royal George I was crowded and jostled 'tudy by a great bustling of people.

At last the march was a-hull! Three years before by Lord Fairfax from English bricks—was the same lively animation. Squads of soldiers in scarlet coats—some for, and some in physical aspect alone that the town remained unchanged, for the life of the streets was vastly different. Those who came to the market square and there were cannon banded up to the post-road. There was a frantic passing back and forth of a new population. As I looked upon the Royal George I was crowded and jostled 'tudy by a great bustling of people.

"Joe and I are to be married, Webster. After General Braddock 'Has Finished with Little Business at Fort Duquesne."

Busby, and with that touch of superst ority he ever wore even as a little chap.

Often had I laughed at his porting him, and often had I forgiven him. Must he be caught a remembrance twinkle in my eye; perhaps he thought I was staring too long and intently at his dainty companion, for he abruptly informed me:

"Joe and I are to be married, Webster, after General Braddock has finished his little business at Fort Duquesne."

I smiled and went through the form of congratulating them, but there was a stab in my heart. Not that I had expected to carry a girl's love in my breast during two years of rousing it—and yet I had hoped. She was crimson and angry.

"It's a duty we owe the name, lad. We will plant more, but we will never be niggards."

I thought God he passed out before the crash came, that I never shared the bitterness, and that it could be I who was forced to escape petty prosecutions by flight into the wilderness. It would have broken the kind heart could he have known my estrangement from my fellows.

First to See Value of Big Advertising

Robert Bonner, for whom Bonner Springs, Kan., is named, New York publisher, was the first to use full-page advertising; and the first journal to lay large sums for feature articles.

When Edward Everett was raising funds to purchase Mount Vernon Bonner gave him \$10,000 for 62 articles known as the Mount Vernon papers, and a like sum to the fund. He also started the literary world by buying eight pages of advertising in the New York Herald. When the press room of the New York Ledger was destroyed by fire he inserted in the daily papers of New York, Philadelphia and Boston the following advertisement:

"Unless we are burned out more than

Just a Warning

—Just a minute, son. You've called me 'old man,' 'old scout,' 'old boy' and other expressions without my complaint, but I absolutely object to be called 'old egg'.

Object Lesson
Small Son—Teacher made me star after school today because I couldn't tell her where the Grampians were.
Father—Son, if I had them you would have told her where you put them.

Salt Seller
"So you are a salesman? What do you sell?"
"I sell salt. I am a salt seller."
"Shake."—Boys Life.

once a week the New York Ledger will be ready on the news stands of the United States, the Sandwich Islands, and New Jersey."

His recitation was driving spectators, owning the best in the land—Griffith Bonner in the Plain.

Prospective Ruin
"Hey, Aaron! called Ahaer Applody, 'where you going, all righted out in your new suit of clothes?'"
"Don't tell anybody," replied Aaron Alrod, "but I'm going to ask old man Rackett for his daughter's hand in marriage."

"Hi! Looks like a guy to rula a new suit of clothes that waz."

MARY GRAHAM BONNER

BEAUTIFUL BLOSSOMS

"This farmhouse," said the apple blossom, "is very shabby. It has been needing a coat of paint for so many years. And the people who live inside are so poor they can't afford anything they don't actually need."

"They don't have to have the paint, but they feel badly that they cannot afford to have their house painted, for it would look so much brighter and prettier."

"Well, it has been this same way for so many years. They have had luck with the potatoes and corn every year."

"Something always happens. Bugs eat up the potatoes and a storm is likely to come and hurt the corn just when it would be growing quite perfect."

All these things my trees whispered to me and to all our sisters and brothers.

"The trees said:
"Light blossoms, you are very soon to come out and look at the world.
"You are to appear within a short time because the spring is here, and all are the spring blossoms."
"People love the spring because the

During the Spring Time.

DISHES ONE WISHES

To wish children to like certain foods that are good for them has not been, so far, very satisfactory. Every mother wishes her children to have a healthy child with strong white teeth and bright eyes. If, for any reason, you cannot give your children fresh air and sunlight will make such children.

The first years of school in any child's life are the utmost importance. It is at this time that a child's meals should be carefully supervised. They require a much larger percentage of body-building material than does the adult. Milk, which is called the perfect food, has all the body-building materials except iron. As iron is a most important element, iron must be supplied. We get it in such vegetables as spinach, chard, water cress, carrots and turnip tops, as well as in green peas, green beans, etc.

Some children dislike milk; this fact only makes the problem more difficult. They may, by diplomacy, be induced to drink two or three glasses of milk each day by getting them to take an interest in milk drinking pictures placed on the bottom of the glass and not visible until the milk has been drunk. Pictures of children used by mothers. Milk dishes, simple puddings help along the milk diet, but milk is not enough; the child must also have iron.

Some of the valuable protein foods needed to build body material. Grains such as cereals, bread, and macaroni are the energy-building foods. Fruits are necessary and it is a great mistake to depend alone upon milk.

Colonian Fish Chowder—Cut into very fine dice enough salt pork to sizzle this one portion of a cupful. Fry out in a deep kettle until the scraps are well browned. Add sliced potatoes and layers of sliced onions sufficient to serve four persons with salt and pepper and if the fish is fresh add one and one-half pounds of cod-fish or any other fish at hand. If not fresh use canned fish. Let the chowder be nearly ready to serve. At the last add a quart of milk and milk crackers which have been softened in boiling water. Turn over a cupful of heavy cream and heat hot before serving.

Fish Turbot—To two cupfuls of any cooked white fish, flaked and packed solidly to measure, add one large onion grated, one cupful of cream, one-fourth cupful of soft butter, one teaspoonful of sugar, two teaspoonfuls of capers, one teaspoonful of salt and four teaspoonfuls of pepper. Cook well and turn into a well buttered baking dish, sprinkle generously with grated Parmesan cheese and bake thirty minutes, browning delicately.

Cream and butter are the best form of fat for children and these, too, are very necessary in a balanced diet.

PUZZLES

What kind of a lie lays the longest? A dead lie.

Why does a hen cross the road? To get on the other side.

What is most like a hen stealing? A cock robbing (cock-robbin).

Why is the wick of a candle like Athens? As he light as a house and lighter than a feather? A shadow.

How can you tell the age of a hen? By the teeth (you own, of course).

What is it that has a head and cannot think, one leg and cannot walk? A pin.

If trees grow on the sands, which one should we be most likely to find? The beach (beach) tree.

Why is cold weather productive of benevolence? It makes people put their hands in their pockets.

My second contains my first; and, therefore, it is my whole. Light-house. Why does a duck go into the water? For diver's reasons.

The Kitchen Cabinet

(62, 1928, Western Newspaper Union.)

Human beings have endured inconceivable miseries, and grown strong everlastingly. And they have not only endured all things, but hoped on things, too. No sadness, when it came, has been able to daunt the spirit, which, looking beyond the present grief, has detected behind whatever barrier of this stars at night—Richard Burton.

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sensitive Wash."

The medicine that will do for me what the Vegetable Compound and Sensitive Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound.—Mrs. Cora C. Moogan, R. F. D. 1, Tully, N. Y.

Reckless, Anyway
"Policeman—I'm putting you in for reckless driving, endangering the lives of pedestrians."
Motorist—Why, then, isn't a pedestrian on the street?
"Policeman—All right, then: I'll make it attempted suicide.—Boston Transcript.

Strong the Family Praiser!

Houston, Texas—"I wish to say Dr. Pierce's Favorite Prescription has been a blessing to our family, especially in one daughter's case. She was in a serious condition with woman's weakness as a result of just about past going to the hospital. I decided to try one more remedy we had heard of—the 'Favorite Prescription.' Well, a few bottles of this helped her so she has never had any more trouble of the kind. So it is no wonder that we have depended wholly upon this one remedy ever since for all such ailments.—Mrs. Emma Allen, 212 Horan St.

Send her to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial, please.

Complication, Anyway

"Will you marry me?"
"You haven't a chance. But I rather admire your taste."

A rare piece of acting should always be well shown.

No man, no matter what his prejudices, can hold out long against a man who likes him.

THERE is nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word 'genuine' is red—on every box. You can't go wrong if you just look at the box when you buy it!

STRAWBERRY AND ORANGE COCKTAIL

2 oranges
 1 cup small strawberries
 3 tablespoons lemon juice
 6 tablespoons powdered sugar

Peel and remove membrane from the oranges, cut segments in halves. Hull strawberries and cut in halves. Mix with orange pulp and add lemon juice and sugar.

LEMON JUNKET WITH APRICOT WHIP

1 pkg. lemon junket
 1 pint milk
 2 egg whites
 1-4 cup stewed apricots
 4 teaspoons sugar

Dissolve the junket powder in the slightly warmed milk, pour into dessert glasses, let set until firm, then chill. Beat the egg whites until stiff, add the apricots which have been put through a sieve, add sugar and mix thoroughly. Serve on top of the junket.

L. A. Gease visited friends and relatives at Lorenzo Sunday.

Two of our Bailey County girls, Misses Helen and Ruth Bearden, who are Seniors in W. T. S. T. C. Canyon, have been elected to membership in the National Scholarship Society. They were formerly students at YL.

Mr. Charlie Maxwell of Mexico was a welcome visitor of Mr. H. Sterling over the week-end, and both attended the school program that was held at the Longview school house. We are very glad to have Mr. Maxwell in our community.

The revival meeting that is being held at the Longview school house is being well attended and with good interest.

Mrs. E. J. Klump has been confined to her bed with the flu but is reported to be improving.

Mr. and Mrs. Harlan Wright and little daughter, of Clovis, were in Muleshoe Tuesday.

Miss Maud Milligan and brother, C. W., were attending the show in Clovis Monday night.

TEXAS WEEKLY INDUSTRIAL REVIEW

Levellian--District farm bureau convention to meet here in July.

Levellian--Ten mile extension made to Mail Route No. 2.

Happy--New filling station opened here.

Rosenberg--Humble Oil and Refining here.

Fairfield--New electric gin under construction.

Dallart--Gas turned on in this city.

Northem--Northern hatchery, recently destroyed by fire, now open.

Miles--Holder Number 1 oil well spud in.

Tripp--Work under way, bringing gas line here.

Dilley--Lilley Post of the American Legion to build home.

El Paso--New hotel at Indian Hot Springs opened.

Fabens--Cornerstone of new Baptist Church here laid.

Clovis--Work resumed on the Shoup test well.

Bovina--Texas Utilities Company to build power line here soon.

Farwell--New school building recommended for Farwell.

Alpine--Work under way on \$35,000 new gymnasium for Sul Ross College.

Trade--Dialbe mohair and cattle bring high prices.

Borger--Panhandle Power & Light Company cutover completed raising transmission line power from 13,200 to 66,000 volts.

Million dollar road building program under way in Taylor County.

Pampa--Contract signed for construction of new rail line from here to be known as Clinton and Western Railroad.

Texas is exporting products valued at considerably more than \$35,000,000 monthly.

Rosenberg--Huntington and Robinson constructing new gin on S. P. right of way here.

Haskell--Natural gas will be supplied this place within 90 days.

East Bernard--Highway No. 69 between here and Humberford being graded.

Alvin--Plans making for construction of high school building here.

Pittsburg--Southwestern Gas and Electric Company erecting new poles in this city.

Bremont--Enough subscribers secured to have Community Gas Co. bring gas here.

Van Horn -- World Exploration Co. installs modern machinery in promising Hazel silver mine.

Quitaque--South Plains Lumber Co. will build a fire-resistive lumber warehouse.

Palestine--One firm paid \$30,000 for poultry products bought here last year.

Odem--\$70,000 bond issue voted for construction of new high school building here.

Waco--Southern Pacific laying heavier steel rails from here southward to connect with line laid from Giddings to Rockdale.

San Angelo--New three-story hotel to cost \$100,000 will be built at corner of College and Chadbourne Streets.

Georgetown -- City Council grants franchise to Community Natural Gas Company to operate here.

Borger--Dyke Cullum Motor Company to erect new building at intersection of Washington and Main Streets.

Stinnett--Grading under way for 38 mile extension of Rock Island Railway from here to Gruver in Hansford county.

Stinnett--Construction of a highway line under way.

Bertram--One cream station here paid about \$17,000 to cream producers of county in past 12 months.

Eastland--Old Elks building over on South Seaman being remodelled for occupancy of Hudson and Essex agencies.

Fairfield--Community Power and Light Co. of Texas opens its ice house and cold storage plant at northwestern corner of square.

Alice--New equipment installed in City Bakery.

Jefferson--Walker building underground system and improvements for occupancy of Perry Bros. Variety Store.

Jefferson--New Jefferson Bank and Trust Company opened here.

Framites--\$500,000 new eight-story hotel will be built west of First National Bank building.

Alvin--Local plant of Western Public Service Company connected up with power line.

San Angelo--Building permits issued here since January 1 represent \$1,380,888.

Eagle Pass--Central Power & Light Company representatives are here making power survey in connection with irrigation project.

Throckmorton--Contract to be let for grading highway to Stephens county line.

Elscale Pass--Western Union Telegraph Company rebuilding plant here and adding new equipment.

Pecos--\$75,000 new theatre building will be erected here as business district.

Pecos--\$500,000 power plant, largest of its kind in Trans-Pecos region, being erected by Texas-Louisiana Power Company here.

A fine specimen of the lower jaw of a Stego-mastodon was recently brought to Texas Technological College. The jaw is about three feet long when pieced together and has two teeth and the skull finely preserved. It was found in northeast Dickens county in the bed of a small creek and is probably late Pleocene in age.

It was collected by F. F. Henry, D. W. Hughes, D. P. Christina and M. E. Franklin of that locality, who, realizing the importance of their find, sent it to the college for identification. They have kindly given it to the museum of the department of geology where it is to be placed on display.

H. C. Edmonds was a Clovis visitor Monday.

R. B. Boyle, former editor of the Journal, was shaking hands with old friends in the city Monday. He is now with the Plainview News.

BETTER TELEPHONE SERVICE

The Bell Telephone System will spend more than \$400,000,000 for new equipment and plant facilities in 1928. This is the largest construction program ever contemplated in telephone history. When we consider that this is more than the entire cost of building the Panama canal, a slight idea can be obtained of what this new construction really means in better telephone service to the world.

Plans call for \$50,000 telephone poles, which would be sufficient to construct over 23,000 miles of pole line with 40 poles to the mile. More than 1,000,000 crossarms will be used; and 199,000,000 feet of conductors will be provided for underground lines. Over 17,400 tons of hard copper wire and 5,000 tons of galvanized iron wire will be needed. In addition to 34,700,000 conductor feet of wire in lead-covered cables.

The construction program contemplates additional long-distance circuits in various parts of the country, and progressive development and improvement of local telephone facilities, by the various Bell telephone companies in their local territories.

Mrs. Bucy and daughter, Holly Ann, were in Lubbock Friday. Holly Ann had her tonsils removed.

Mrs. Howard Carlyle is in the Lubbock Sanitarium for treatment this week.

STANDARDIZING GAS APPLIANCES

Leading gas companies are working to develop the gas industry and coordinate its activities so that it may serve to the fullest possible extent the best interests of the public. There are now about 70,000,000 consumers of gas in our country.

The American Gas Association is erecting a new laboratory in Cleveland, Ohio, to test gas-using appliances, and assure greatest efficiency and safety to the public. Commenting on the new laboratory, Oscar P. Frogg, President of the Association, said: "The Association not only demands that the companies furnish gas of the highest standards but it insists that the appliances for utilization of gas be made safe and efficient, beyond a question, in the interest of the best public service."

To The Pupils of Longview School

Well our fiscal year has just passed our school has closed and the efforts of the teachers now go into the hands of the patrons to decide whether or not the children have made the proper progress. Some children are made happy over the outcome of the year's work, but others are made sad, but when we come to look into the situation to find the trouble, we most always find that it is due to our own neglect, that our children did not do better. The greatest reason a teacher gains during the year's work is being able to hand over to some girl or boy the highest rating that he or she might be looking for. It is not the teachers desire to fail any one, but on the other hand is the teacher's desire that every boy and girl might do the best in school.

As teachers of the Longview school, I wish to say that the year's work that has just come to a close has indeed been a pleasure, and the boys and girls have made it such. It has been a year in my life, among many that I shall never forget, the kindness of each child will live long in the hearts of the teachers.

We trust that each and every child that attended school at the Longview School will have for himself, prosperous and enjoyable summer vacation, but during the summer vacation let us begin to look into the things that we intend to try to put over in a good way another year.

"Your Teachers".

Pains Caused By RHEUMATISM

If you're suffering from the excruciating pains caused by Rheumatism, don't delay.

Take **DR. MILES' Anti-Pain Pills**

They relieve the pain quickly and without disagreeable after effects. Try them when you have

Monthly Pains
 Headache Backache
 Neuralgia Toothache
 and pains caused by
 Rheumatism and Neuritis

We will be glad to send samples for 2c in stamps.

Build Bigger Pigs— with Less Feed

one bag Big Chow equals 2 1/2 bags Middlings or shorts

A 100 pound sack of Purina Pig Chow will build as much pork as 250 pounds of midds or shorts—and costs just half as much.

Pig Chow is Easy to Feed

The directions are simple. Feed a double handful night and morning with any feed you have on the place.

Only GENERAL MOTORS can give you the value you get in FRIGIDAIRE

FRIGIDAIRE

Product of GENERAL MOTORS

K. K. SMITH
 Representative
 Muleshoe, Texas

EXAMINE a Frigidaire and note the features that have given it leadership among electric refrigerators: direct frost-coil cooling that maintains a constant cold-storage temperature in the food compartment; patented self-sealing freezing trays that quickly freeze an abundance of ice cubes and that provide low-freezing temperatures for making frozen salads and desserts; and the famous hydrolene-treated insulation. Only engineering skill of the highest order could have produced Frigidaire. And only General Motors could have produced it at a price so low. A small deposit puts Frigidaire in your home. Then pay a little each month under liberal General Motors terms. Visit our salesrooms today. Or write or phone for an interesting illustrated booklet—sent free.
