

THE MULESHOE JOURNAL

VOL. 4

MULESHOE, BAILEY COUNTY, TEXAS, FRIDAY, JANUARY 27, 1928

NUMBER 50

Bailey County Teachers' Institute Met

Bailey County Teachers met in their last Institute day at Watson School House Saturday, January 21, 1928. The following program was carried out:

Song, "The Old Church in the Valley." Mr. Thurman Bailey, Invocation, A. L. Stringer. Welcome, by Jay Sloan. Responses.

Miss G. H. Stringer discussed "The Mulehoe" at the 5th, 6th, and 7th grade grammar grades. Miss G. H. Stringer discussed the program with the teachers and holding the teachers in the morning. Mrs. Dyer talked on Teaching Phonics.

The County Unit School was discussed by A. L. Stringer. The Institute was honored by having Dr. Ross of Hereford, Texas, who gave a splendid lecture on "Building a Community."

The teachers were also entertained with a good basket ball game between Watson and YL. YL winning by two points.

On account of so much business to attend to, several numbers of the program were omitted and the Institute took up the business.

It was decided to have the basket ball tournament at Muleshoe, on the 18th of February, 1928.

The interscholastic meet will be held at Muleshoe on the 23rd and 24th of March, 1928. The students are urged to get busy for the meet. Let's make it the best we have ever had.

The teachers enjoyed a beautiful dinner served by the patroness of the Watson community. Reporter.

"South Of Santa Fe" At Brooks Theatre

The newest Art Mix production, "South of Santa Fe," which comes to the Brooks Theatre on Tuesday and Wednesday, January 26th and 27th, is hailed as a noteworthy contribution to cinema production, particularly the so-called "western" productions of the silver screen type of entertainment. Denver Dixon, the producer and director of "wild west" shows knows his subject better than any other Hollywood director, having spent his entire lifetime either as a cattle man or director of "wild west" motion picture subjects. Mr. Dixon has taken the best of creative work when, about fifteen years ago, he was asked to write a short story of cowboy life for a large magazine. His story toward the pinnacle of fame has been marked with unusual contributions toward literary and screen betterment.

JUNIOR B. Y. P. U. PROGRAM

For January 29th.
Subject: "Getting acquainted With the State Missionary Society."
Leader: Eva Harper.
Song.
Prayer.
Introduction: Leader.
Secretary of Missions: Charlie Morris.
Sunday School Secretary: Mary Lois Miller.
The B. Y. P. U. Secretary: Joe Bill Alsop.
The W. M. U. Secretary: Juanita Coker.
The Editor of the State Baptist Paper: Jim Alsop.
Superintendent of the Orphanage: Roy Coker.
Group Captain Speaks: Eva Harper.
"All Juniors Welcome."
"All Visitors Welcome."

BEAUTY A TOWN ASSET

In spite of the apparent commercialism of the age in which we live, it is evident to the observer that the American people are rapidly developing a greater appreciation of the beautiful. This is not confined to the wealthier classes, but extends to the great masses in the towns and villages in the rural districts.

New towns and new sections of the older ones are being laid out with wide streets, with provision for large lawns, more trees, shrubbery and flowers, and a more attractive setting generally.

Beautiful built houses show better architecture and greater harmony with their surroundings, while unsightly yard fences have already disappeared.

The result of all these modern improvements is beauty. And aside from the satisfaction which it affords the eye, it pays in dollars and cents.

Beautiful cities, towns and villages attract people, they attract tourists, they attract trade. It is natural that a person choosing a town to live in will choose a town that is beautiful and clean in preference to one that is unsightly and dirty, if other conditions are anywhere near equal.

GOODSON ANNOUNCES FOR COMMISSIONER

I wish to announce to the voters of Bailey County that I am a candidate for the office of Commissioner of Precinct No. 1, subject to the action of the July Primaries. Your vote and influence is solicited.

M. A. GOODSON.

New Building Completed At Texas Tech

Lubbock, Texas—The Home Economics practice house of the home economics school of Texas Tech has been completed and will be occupied within a few days. The building and furnishings cost about \$25,000. It is one of the most beautiful structures on the Tech campus, being of the prevailing gray brick and Spanish design. It has the appearance of a fine two-story Spanish bungalow.

Eight young ladies of the senior class of the home economics school will occupy this building at a time together with a member of the school's faculty. These young ladies will put into actual practice the things they have learned about cooking, keeping house, entertaining guests, and many other things required of a successful home-maker. Each graduate will have the privilege of "living" in this house before leaving Tech.

The building will be formally opened to the public on January 30, 31, and 32. The faculty of the school will attend a house warming party on January 31, and the students of the home economics school will receive the students of the entire college in a reception.

The building will be formally opened to the public on January 30, 31, and 32. The faculty of the school will attend a house warming party on January 31, and the students of the home economics school will receive the students of the entire college in a reception.

Muleshoe Basketeers Win One, Lose One

The townsmen of Muleshoe fought the Dimmitt boys on Monday night at the City Court. The game was fast and snappy from start to finish, and was tied in the third and fourth quarters. The final score was Muleshoe 24, Dimmitt 20.

The score was 23-17. Lady Luck was not so good to the team Tuesday, however, as the Otton boys stepped out for a 37-10 local court net Monday night.

The Muleshoe team, however, won the Otton game, 24-10, on Monday night, February 4th. This promises to be an interesting game.

West Camp Items

Lawson Horington and wife moved from our community to the West Camp last week.

Charles Schelton, down a road, was arrested for a 30-day term in the County Jail. Brother H. H. Copeland preached Sunday night.

Our teachers attended the Teachers' Institute at the Watson School last Saturday. They report a pleasant time and lots of dinner.

Mr. and Mrs. Olen Burch have moved from our community to near Muleshoe.

Frank and Henry Morgan have returned to school after an absence of several weeks.

Mr. and Mrs. Ernest Hughes spent Sunday in Rey. Thorpe's home.

The party at Mr. Jennings Saturday night was enjoyed by the young people of West Camp.

Annie Walker and Goldena Thorn spent Sunday afternoon with Floyd Thorn and wife.

Faulline Adair is absent from school because of toothache.

LEAGUE PROGRAM

For January 29th, 1928.
Subject: "Take Time to Be Holy."
Leader: Jewell Haney.
Introductory Remarks by Leader.

"Take Time to Be Holy." Miss Monell "Speak Oh, With the Lord." Ruth McCarty.

"Abide With Him Always." Jeff White "Feed on His Word." Mills Barfield. "Make Friends with God's Children." Mrs. Nina E. Erwin.

"Help Those Who are Weak." Ray Buzard. "Spend Much Time in Secret." Rufus Gilbreath.

"Let Him Be Thy Guide." Ila Mae Glascock.

"Still Follow Thy Lord." Irene Corrie. "Be Calm in Thy Soul." Opal Morris. Vocal Music.

H. A. DOUGLASS ANNOUNCES FOR RE-ELECTION TO OFFICE

I hereby announce my candidacy for re-election to the office of Sheriff and Tax Collector of Bailey County, subject to the action of the Democratic Primary.

In announcing for re-election, will say that if my past service has been satisfactory and you care to keep me longer, I will appreciate your support, and in return will promise you honest and impartial service.

H. A. DOUGLASS

Mr. H. C. Livingston of Ottawa, Kansas, is in the city this week. Mr. Livingston has extensive interests in Bailey County.

Mrs. Faulkner, Misses Lipscomb and Wentland were in Lubbock, Monday.

NEW COMPOSING MACHINE NOW ON JOB AT THE JOURNAL OFFICE

With a great deal of satisfaction, the editor of The Journal announces the installation of a new Linotype. This mechanical marvel enables us to serve efficiently the large number of persons who look to our publication for quick, lightening and entertainment, and who patronize our job printing department.

The rapidly increasing circulation of The Journal together with our desire to place at the command of our advertisers and others the highest grade of typography, induced us to invest in a fine composing machine for the quick and accurate and pleasing presentation of local news, and the production of superior job work.

Our new Linotype enables us to set machine many forms of composition that previously necessitated tedious hand setting. Our plant is now equipped with a fine composing machine of correct type faces in many different sizes, and the change from one size to another is made very quickly.

This installation is beneficial to the prosperity of Muleshoe and vicinity. And that the good people of the community are truly appreciative of our efforts to serve them in all departments of the printing business is

manifested by the compliments received from individual patrons since the arrival of our new machine.

The accompanying illustration will give our readers some idea of the marvelous mechanism of the Linotype, a composing machine on which are assembled matrices for little brass molds and lines of type cast—lines such as you are now reading.

Besides enabling the operator to set various faces and sizes of type, our Linotype makes it possible for him to produce the rules and dashes and borders which are used in various advertisements in each issue of our publication. When employed in the composing of advertisements, newspaper headings, booklets, catalogues, and various other kinds of printed matter, our machine enables one operator to set in the same time more type than ordinarily could be produced by hand—and the composition is incomparably better.

While for a long time we have received the patronage of a host of subscribers, the following day and the Hot front Gate. Mr. Taylor is also having his shop remodeled inside.

A new and modern Filling Station has been built on the Highway near the Burrow Lumber Company for Oliver Jones, and is going to be one of the best equipped stations in this section of the country. Gasoline, oil and tires will be handled and modern camp cottages will be built in time for the tourist travel this spring and summer.

Mick, The Auctioneer, Giving Prizes Tree Planting Time Is Almost Here

Mick, The Auctioneer, is putting plenty of pep into his sales these days. He is offering handsome prizes to the ones guessing the closest to the amount of a sale.

At the C. M. West sale last week, Mrs. R. T. Jenkins of Lariat, held the winning prize. The sale brought \$1398.10 and her guess was \$1375.00. The highest guess was that of Roy Mix of Farwell, \$1807.00, and the lowest was \$675, made by W. J. Coffman.

MERCHANTS' INSTITUTE AT LUBBOCK THIS WEEK

Lubbock, Texas, Jan. 26—A special meeting is being planned for merchants and other business men in South Plains towns at Lubbock Friday afternoon at three o'clock at the office of the Lubbock Chamber of Commerce with Fryer Irwin, national business counselor and investigator in charge.

Twin, who has been brought to Lubbock at considerable expense to conduct a "Better Business Week," which is a Merchants' Institute has suggested the meeting since his arrival here.

KNOW TEXAS

One hundred and fifty-three new enterprises in Texas were granted charters in a single month recently. This is a sign of the times.

The Democratic national convention goes to Houston. A great many persons in the north and east now realize for the first time that Texas has cities large enough to entertain a national convention.

Texas has the longest press news wire in the world. It reaches from Tearkam to El Paso, and from Amarillo to Brownsville and more than 2,400 miles long. It is operated by the Associated Press.

Texas is adapted to a wider range of climates than any other state. The entire Gulf area with wild ducks and wild geese and has been pronounced the best adapted section in the country for preserving bird life.

Mr. Cox of Dublin was in the city Wednesday.

Local Hatchery In Operation This Week

The Wiseman Hatchery began operations in earnest last week. The first of the battery of large incubators was started about ten days ago, and according to Mr. Wiseman, he expects his machines to be at full capacity in a few days. This is evidence that there are good times in store for Muleshoe. Chickens, dairy cows and hogs are continuing to pay for many months in Bailey County.

Mr. Wiseman gives the following suggestions for taking care of hatching eggs:

Furnish the laying house with clean nests at all times, as soiled eggs do not hatch.

Gather them often on cold days to keep from chilling and be sure the eggs are gathered and kept in clean baskets.

Turn eggs every day. This can easily be done by keeping eggs in an egg case and leaning one end up against the wall at about 45 degrees, and the other end next day.

Roll out ALL underlays, rough, and thin shell, dirty eggs above all.

Valley Motor Co. Delivers New Cars

Valley Motor Company reports the following deliveries of the "Bigger and Better" Chevrolets the first two weeks of January.

A. D. Floyd	Truck
D. E. Leeway	Coach
C. H. Whitehead	Coach
Don Thomson	Coach
Oliver Jones	Cabriolet
C. A. Anderson	Sedan
G. T. Abbott	Sedan
Gord Herdian	Coach

Another load of cars is expected by the local dealer any day now, and from all reports that can be gathered they are all sold. The new car has certainly won the approval of everyone here, and we should be at all surprised to see lots of the "Bigger and Better" Chevrolets.

Muleshoe Making Many Improvements

Muleshoe is making many new improvements the past week. The residence of E. H. Wood in the west part of town is nearing completion. This is a combination house and garage.

New concrete walks are being put in front of the buildings occupied by the Barber shop and the Hot front Gate. Mr. Taylor is also having his shop remodeled inside.

A new and modern Filling Station has been built on the Highway near the Burrow Lumber Company for Oliver Jones, and is going to be one of the best equipped stations in this section of the country.

Gasoline, oil and tires will be handled and modern camp cottages will be built in time for the tourist travel this spring and summer.

Big League Pitcher Improving Farm Here

Wiley Moore, Big League pitcher has been here the past two or three weeks, busy with making improvements on his farm south of town. Moore gained fame last season with the Yankees through his pitching abilities. The following is taken from a leading daily paper:

Chicago, Jan. 11.—Wiley Moore, the Yankees' 30-year-old "rookie" pitcher of the American League, made his best ball last season, official averages released today showed.

Though his work consisted mostly of relieving distressed mates, Moore pitched 213 innings, holding his opponents to an average of 2.28 runs per nine innings.

He pitched six complete games. His win and lost records give him 19 victories and seven defeats for an average of .731.

Progress News Notes

From last week:

Joshua Blocker and Jim Tucker were Amarillo visitors last week.

E. H. Barger and wife were Muleshoe visitors Tuesday afternoon.

Mr. and Mrs. Vaughn Johnson moved to their new home northwest of Progress, Wednesday.

Little Elmer McMahan has been sick for the past week with pneumonia.

Mr. and Mrs. E. R. Barger entertained with a dance last Wednesday evening.

J. L. Atkinson and family and Gus Maddison and family spent Sunday with Oliver Atkinson.

Bro. Bailey preached last Sunday at 11:00 o'clock hour.

Fred Griffin visited with Edward Gross last Saturday evening.

S. E. Morris has been very ill this week, but last reports were that he was better.

Mr. and Mrs. Lawrence and Mrs. Daniel were in Clovis Wednesday.

More News Of Interest For You

With the installation of our new typesetting machine we are preparing to give our readers a much better paper. In the past it has been almost impossible to run as much local news as we wished to. However, we will be in position by next week to handle all local matter, and in connection will have a section of interest to farmers and poultry raisers. There will be a feature story each week and items of interest to the housewife. If you are not a Journal reader, subscribe now and get the benefit of every issue.

Also you will note that today's issue of the Journal is set in a new style type recently brought out by the Messinger Linotype Company. As is clearly shown, the new type appears much larger yet gives as many or more words in the column than the old type heretofore used in our paper.

This type meets the demand for larger print without any reduction in the amount of news matter in the column.

In line with its policy of giving its readers the best there is, The Journal is one of the first papers in the country to adopt this new and more readable type.

"Algeria" New Feed Gains In Popularity

"Algeria" is the name of a new feed as large as alfalfa and is a soft family that has been bred up over the past seven years by Claude B. Hurst, of Lubbock, who believes the grain will make a feed that compares in feed value to the corn yields of the northern corn belt.

Farmers scattered over the entire state are now getting the grain during the past two years and letters have been received from practically every section of the state telling of the high yields. One of the remarkable features of the grain is that it has proven to do well in the lower sections of the state where they have great difficulty in growing the old type.

The new feed is a careful cross-bred of milo maize and kaffir. It produces from two to three times as much as alfalfa and is a soft grain. It has a husk like milo maize and does not slatter easily.

The leaf of Algeria is very large being about the size of the corn leaf and each stalk contains from 2 to 3 times as many leaves as does maize or kaffir. The stalk and root are similar to corn, excepting that the root goes straight down instead of spreading, thus enabling it to withstand the very driest weather.

A number of farmers around Lubbock have been raising Algeria and find that it makes a heavier yield and a better feed for stock than the other grain crops and its introduction is expected to place the South Plains in the agricultural limelight again within the next few years in the same manner that the raising of corn had did several years ago when it was thought that Lubbock and the South Plains were suited only for a ranch section.

Weaver Brothers, wholesale grain company of Lubbock are handling the grain wholesale and are filling orders all over the state to retail dealers who have had calls for the feed.

E. Y. P. U. PROGRAM

Chicago, Jan. 11.—Wiley Moore, the Yankees' 30-year-old "rookie" pitcher of the American League, made his best ball last season, official averages released today showed.

Defying all efforts to capture him, after a long series of murders and robberies...

CHAPTER III—Continued

It was too much. Miss Cornelia found vent for her feelings in crisp exasperation. "What's the matter with you anyway, Lizzie Allen?"

hours had not been hours but years. "Miss Dale would be home for half an hour," she said reflectively.

"Maybe," said Billy blandly. He seemed quite unperturbed. "Well, what was the reason?"

your mind to that. I'm going to find out what's wrong with this place if it takes all summer. I came out to the country for a rest and I'm going to get it.

"You'll get your heavenly rest!" mourned Lizzie, giving it up. She looked pitifully at her mistress's face for a sign that the latter might be weakening—but no such sign came.

The Muleshoe Journal

C. S. HOLLAND, Editor

\$1.50 per year

NEWS 200 YEARS AGO

In connection with the 200th anniversary of the Maryland Gazette which was celebrated at Annapolis a few weeks ago, some early copies of that paper were exhibited.

The news and advertisements of that day were naturally quite different from what is found in current newspapers, as they reflected the customs and beliefs of their times.

One of the stories from Vienna told of the burning of several persons convicted of witchcraft, among them "a midwife who had baptised 2,000 children in the name of the devil." A local item related the experience of a negro slave who struck a white man in an argument over a dog fight. The negro was sentenced to have one of his ears cut off, "pursuant to the law in such cases."

Among the advertisements was one announcing the arrival of a cargo of "about 20 choice slaves, which will be exposed for sale on Thursday the 22d of this instant."

The Maryland Gazette was frequently suspended for varying periods, but is still published and is credited by the Librarian of Congress with being "the dean of present-day American newspapers."

WHAT'S DOING IN WEST TEXAS

FORT WORTH—Major John P. Hawley, Dr. P. C. Coleman of Colorado, J. A. Kemp of Wichita Falls, W. P. Hallmark of Dublin, and Clifford B. Jones of Spur, are committeemen appointed at the West Texas Chamber of Commerce Executive Board meet to make recommendations in the troublesome water rights case.

CLAUDE—Ditch lines for natural gas are being laid here.

WEATHERFORD—Four of the five major objectives for 1927 work of the Weatherford Chamber of Commerce are now accomplished, facts, and the fifth, securing county agent and demonstrator, is expected to be a reality shortly.

SILVERTON—Installation of a \$35,000 water system will start here at an early date.

PLAINVIEW—A three day contract for the Staked Plains Turkey Growers Association was proposed on motion of T. R. Gall, recently, the association has just completed a five year period of successful operation.

CHANNING—Business men have come in for a 100 per cent affiliation with the West Texas Chamber of Commerce.

SWEETWATER—A fund of \$7,200 will be raised to combat wolves in Nolan County for a period of one year.

ANTON—Anton is among the towns to affiliate with the West Texas Chamber of Commerce this month. It is located in a good farming region where diversified farming is practiced.

IDALOU—Business property in Idalou has been purchased by F. E. Perry of Bledsoe, who has moved here to take charge.

TUSCOLA—February 7th, has been set as the date for the Masco annual banquet. President R. W. Haynie and Manager Homer D. Wade of the West Texas Chamber of Commerce have been asked to attend.

EASTLAND—Work will soon get under way on Eastland County's \$260,000 court house.

MORAN—A \$50,000 sewer system is under construction here. Bonds will be voted on February 13.

SPUR—Spur ginned 17,754 bales of the 1927 cotton crop, according to figures made public here. A few bales remain to be picked.

COLORADO—Plans are under way for the district convention of the West Texas Chamber of Commerce to be held here in February.

ROTAN—Nearly every business house in town was represented at the annual banquet of the Rotan Chamber of Commerce held recently.

MULESHOE—The Muleshoe Chamber of Commerce will pay \$300 to help repair the road between Highway 1 and Ballymore.

OLTON—The Muleshoe-Olton mail route has been changed to serve more rural residents.

W. M. S.

Mr. A. V. McCarty was hostess to the Methodist Missionary Society January 25th.

The devotional was led by Mrs. Stone. After the business session the zone meeting at Sunday School was discussed. We are planning on a good attendance from Muleshoe. There will be cars enough for all of the members of the Society who will attend. Meet at the Drug store Wednesday, February 1st, at nine o'clock.

Dainty refreshments were served to Mesdames Hicks, Stone, Wallace, Carl Elrod, Nani Elrod, and Holland, our new member, and Wyer.

The Society will meet next time on February 8th, with Mrs. Stone.

Mr. C. H. Burrow of Canyon, Texas, who is general manager of the Burrow Lumber Company, was here in the interest of the company's business Wednesday.

Miss Gladys Fuller spent the weekend in the home of Mr. and Mrs. S. E. Morris Jr.

Mr. Jackson of Roaring Springs, was in Muleshoe Monday. He purchased a farm south of town.

Mr. Wayne Ashley of Lubbock, was in Muleshoe this week.

TAKE A YEAR TO COOL GLASS DISK

Bureau of Standards Undertakes Big Task.

Washington.—Some time about next February scientists at the bureau of standards here will know whether they have the largest disk of optical glass ever cast in the United States. During the war, when European sources were closed, the bureau began to make optical glass. Last May these experiments reached a climax with the casting of a disk of glass 70 inches in diameter and 1 1/2 inches thick. This is the largest disk that has ever been cast in the United States and one of the largest in the world.

But such a disk is not finished when it is cast. Glass conducts heat very poorly. It is very hot when cast, for then it is in a molten condition. If simply exposed to the air as soon as it begins to harden, the outside would cool much more quickly than the interior. In doing so it would shrink, and the result would be that the disk would soon be merely a pile of small pieces of broken glass. Even if cooled more slowly strains might be set up in the disk that would cause it to crack as soon as efforts were made to grind it into the dish shape of a reflecting telescope mirror.

Accordingly, it is necessary to extend the cooling period over many months. In making such a big disk it is carefully incased in sand and fine clay, so that it takes nearly a year to cool. This is called annealing. By February, 1928, the 70-inch disk at the bureau will have cooled sufficiently for the scientists to uncover it. Then they will know whether they have a disk or some pieces of broken glass.

Annealing is not always successful. The largest disk that has ever been cast, from which the 100-inch mirror of the Mount Wilson observatory was made, was completed only after a number of attempts. This was made at St. Gobain, France, where, before the war, the principal factory for large disks was located. Time after time disks were cast, only to find months

later that they had cracked in annealing. Even the one finally used was not perfect, as it was cast in three layers and when completed showed two layers of bubbles, like the filling in a layer cake. So it may be that the American optical glass workers will find in a few months that they have to try again.

Nevada Leads All in Per Capita Wealth

New York.—Nevada, with less than 80,000 inhabitants, had a greater share of wealth in proportion to its population than any other state in the Union, according to a computation made by the National Industrial Conference board on the basis of 1925 estimates. Although the total wealth of Nevada is only \$465,000,000, less than that of any other state, its per capita share is \$7,250.

New York state, harboring one-tenth of the population of the United States with a total wealth of \$49,108,000,000 or nearly one-eighth of the total for the nation, ranks fourteenth in per capita wealth, which for 1925 is estimated at \$3,583.

Mining and agricultural states in the Far West, Northwest and Middle West show the greatest per capita wealth. Nevada, Wyoming, South Dakota, Iowa, Oregon, Nebraska, California and North Dakota ranking highest in the order given.

The great industrial states show the largest total shares in the national wealth, but none of them shows a per capita figure high enough to be included within the first eight states. The per capita wealth of some states is as follows: Connecticut, \$7,512; New Jersey, \$6,011; Massachusetts, \$5,346; Pennsylvania, \$3,382; Illinois, \$3,280; Ohio, \$3,231; West Virginia, \$3,211; Indiana, \$3,115; Michigan, \$3,031, and Kentucky, \$2,777.

FOR THE GOOSE—

Your neighbor has'nt been keep your eye on him from looking beautiful. But it will you.

It's better to pay too much to your fish man than your druggist.

It's hard to know what to do with a kid that lies, a man that speaks after he's been blind and a woman that keeps on eating onions.

FOR THE GANDER—

The more a woman tells you about her troubles, the less she needs your sympathy.

You might love a man you was afraid of, but never one you was ashamed of.

No matter how high a hawk flies it don't turn into an eagle. (copyright.)

CAUTION BEST FOE OF MONOXIDE GAS

Motorists Warned of Cold Weather Perils.

Washington.—With the return of cold weather the specter of carbon monoxide poisoning again haunts automobile drivers. Unless humanity has had a sudden access of caution, they may expect occasional news items about untucky persons, warning up their motors in closed garages, being overcome and killed by this insidious, odorless, invisible gas.

Carbon monoxide is a product of imperfect combustion. When a fuel is burned under ideal conditions it is not produced. The only products of perfect combustion are carbon dioxide and water. But ideal combustion conditions are almost never realized, certainly not in even the best of automobile engines. The average of analyses of exhaust gases from 101 different makes of cars by the United States bureau of mines showed 7 per cent of carbon monoxide.

In one experiment a dog was left in the driver's seat of a car in a tightly closed garage, with the engine running slowly. In 29 minutes the dog was found unconscious. The air in the garage was analyzed and found to contain 1 1/2 per cent of carbon monoxide. Had a man been in the dog's place the results would probably have been the same.

Gives No Warning.

Because it has neither color nor odor, carbon monoxide frequently overcomes its victims with no warning winter. The first symptom is a severe pain in the back of the head; but if the concentration of the gas is too high, the victim may lose consciousness before he can act on this warning. Small doses may have no effect, but to cause severe headache, but a heavy "gasping" is an exceedingly serious matter, and convalescents from carbon monoxide poisoning should be kept in bed even when they protest that they are "all right."

The best cure for carbon monoxide is not to have it happen at all. It needs no more than good ventilation in the garage, even at the expense of a cold motor, to make the place perfectly safe. Carbon monoxide is

Oil Well Drillers Find Gay-Lined Earth

Russell, Okla.—Geologists are able to explain the appearance of earth formations of various colors found in the drilling of an oil well on the O. B. Grayson farm near here. The first strange formation was a green mud. Deeper drilling brought forth sands and limes rivaling all colors of the rainbow. Specimens have been sent to laboratories for examination.

FEEDS HENS MILK OR MEAT

Hens are high-grade animals. It takes a lot of protein to keep them going and to furnish the protein necessary for high egg production. The first improvement in feeding farm poultry came when we learned the importance of providing animal protein.

Feeding bran, shorts, alfalfa, clover, soybeans, field peas, and other vegetable products rich in protein lessens the amount of the more expensive animal protein needed, but vegetable protein will not take the place of meat. Milk is the best protein for chickens. It makes the laying hens lay more eggs; it helps to keep hens looking healthy; it makes better hatching eggs; it promotes growth in chicks.

Milk can be fed sweet or sour, but do not feed it over one day and sour the next. Sour milk is preferred by many because it is a favorite.

Milk has a large percentage of water. Used as an only source of protein, it is too bulky to procure best results from high production hens. Even when plenty of milk is available, it is a good practice to put some beef scraps in the ration.

All the milk the hens will use plus soybean or pea meal in the ration also gives good results.

Semi-solid buttermilk, drier milk, and dried buttermilk, and other by-products that can be bought to good advantage in many sections of the country.

Beef scraps should smell sweet and fresh. It should not smell tremendous when water is added.

When beef scraps is the only source of animal protein, it is used at the rate of 16 or 20 pounds per 100 pounds of mash.

When milk is available, about ten pounds of meat scrap per hundred of mash is sufficient.

If milk with soybean meal or pea meal in the mash is used as the protein feed, a mineral mixture of bone meal, limestone and salt should be added to the mash. Two pounds of bone meal, one pound of salt and one or two pounds of limestone to each 100 pounds in proportion.

News Of The Schools

Last week we were so handicapped from the fact that new machinery was being installed that it was impossible to run the news notes from the High School. We extend apologies and promise to do better in the future. The following notes are from last week:

FRESHMAN

The Muleshoe Home Economics girls organized a Club January 16, 1928. They have not decided on a suitable name yet. The following officers were elected: President, Juno Glascock; Vice-Pres., Alice Ragsdale; Sec.-Treas., Lowene Rice; Reporter, Jane Bucy. Program committee: Juno Glascock, Mildred West and Mourne Fears.

The Basketball boys and girls are going to Bovina Wednesday afternoon to play ball and we hope that they come marching home with good news of winning both games.

The Freshman class is progressing fine and we hope to have more to join it soon.

The basketball boys and girls are going to play ball again Friday night. The girls are going to play Littlefield and the boys will play YL. We hope to administer a good thrashing to them.

Jack Lee and Paul Lawrence were absent from school Tuesday afternoon.

SENIOR SAYINGS

Mr. and Mrs. Jack Lawler were interred Friday morning in chapel that they would be dismissed from chapel if their friendly conversation was not postponed.

In English Class, Miss Chapin—All of you remember the story of Aladdin's wonderful lamp! Jack Lawler: "No, we don't. Tell it to us."

Mrs. Delma McCarty has returned to school after a week's absence. On the evening of Thursday, January 12, 1928, the Muleshoe basketball girls played the Liberty basketball team in the Muleshoe gymnasium. The score was 51 to 26 in favor of Muleshoe.

Louise lost a comb the other night, and when someone asked her where it was, she said it was in someone's vest pocket. Better be careful boys, where you put your combs. You may be the guilty one.

The Seniors certainly miss Mrs. (Bob) Kennedy from school, especially chemistry class.

Some of the Seniors seem blue this year. Wonder why?—Because last year's seniors are not in school here.

Opal Morris, Velma McDorman, Mildred West and Elizabeth Welch are learning how to cook. A pretty wise idea, for this is leap year.

Seniors, beware! Or you'll lose two more of your class members. Opal Morris and Velma McDorman were overtaken while on their way to town by two handsome gentlemen not of this town, and invited to ride with them.

REPORTER

SOPHOMORE NEWS NOTES

Woodrow Cooper returned to school this week.

Opal Harris was absent from school Tuesday.

Mary Wainsey has returned to school after a long absence.

The Sophomore class had a meeting Tuesday morning. Leonard West is moving and we elected Woodrow Cooper as Secretary and Treasurer of the class.

We would like to have some more in our class.

WASHABLE FROCKS FOR TOTS; GOWNS FOR THE MODERN BRIDE

Colonel Lost No Time Taking Up Rash Offer While Col. Frederick Van Rensselaer Dey, better known as Nick Carter, sat one afternoon in a cafe with Mickey Finn, genial word-juggler, the two engaged in mellow conversation, relates Joseph Van Hauke, in the Century Magazine.

A Charming Washable Frock.

WELL, it is time to start on the home-sewing program. All signs point to a season which will give prominence to novelty wash fabrics. According to the forecast of the mode, children are going to revel in quaint prints both cotton and linen, and they are going to be made up in new and unusual ways.

So it behooves the mother whose ambition it is to get her little fates sewing done and out of the way, to study up on "what's the style" in the juvenile realm. The attractive dress in this picture offers several new suggestions. First it emphasizes the use of a plain with a patterned material. This tendency is outstanding in fashioning children's clothes.

Another "idea" emphasized by the model illustrated is its two-piece styling. The ensemble note is being conspicuously featured in the juvenile dress design. In the instance of the frock illustrated, printed cotton crepe is used for the plaited skirt and sleeves. The tunic or blouse is a plain crepe. Here is a practical suggestion—why not make a one-piece dress of the patterned fabric, with several slip-on pieces of various color? Thus little daughter could appear fresh and neat each day by changing the sleeveless overblouse.

Two-piece jacket costumes are prominent among the advance new showings of frocks for the junior miss. A pretty ensemble uses linen in a pretty tunic as well (if chosen) for a sleeveless dress which has a shallow plaited skirt sewed to a long-waisted blouse. A cunning short-sleeved jacket of any material linen is destined to be worn with the ensemble theme is carried out by applying motifs on the dress which have been cut from the printed fabric.

Yes, the trend of the 1928 wedding gown is decidedly toward the ingenu type and that is why the skirt of the bridal dress in this picture is so youthfully short and full with a headful of tulle to add an engaging fascination. That is why, also, the bodice is semi-fitting, accenting the lithe figure, and why the waistline is normal—all details which define youthfulness. Then, too, this young

Strong the Family Praise!

Houston, Texas.—I wish to say Dr. Pierce's Favorite Prescription has been a blessing to our family, especially in one daughter's case. She was in a serious condition with woman's weakness and just about past going when we decided to try one more remedy we had heard of—the "Favorite Prescription." Well, a few bottles of this helped her so she has never had any more trouble of the kind. So it is no wonder that we have depended wholly upon this one remedy ever since for all such ailments.—Mrs. Emma Allen, 313 Hogan St. Send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg.

Vanadium Once a "Cure"

That vanadium, today an element essential to the manufacture of steel, was once considered to have value only as a "medicine" is revealed by a writer in the Boston News Bureau. At one time, according to the writer, it was considered a cure for many kinds of ills. The Flannigans of Pittsburgh then contained vanadium. They believed it contained valuable chemical properties. A quarter of a century or so ago they erected a big sanitarium in Cambridge Springs, Pa., at a cost of \$200,000 or more. It was at one time, according to the writer, well patronized for a time, but the building was sold many years ago, and is now used for other purposes.

For your daughter's sake, use Red Cross Ball Blue in the laundry. She will then have that dainty, well-groomed appearance that girls admire.—Ad.

Word "Incurable" Hit

Dr. Ernst P. Boas, director of the Montefiore hospital, New York, declares that the word "incurable" is to be "stricken from the dictionary." In the 30th anniversary address, he claims, the pronunciation of the sentence "incurable" on a patient places a serious responsibility on the physician and implies a greater knowledge than he possesses. The acceptance of the verdict by the patient and the community not only cruelly quenches all hope, he says, but checks every further effort at physical rehabilitation. Such diagnosis is often mistaken and frequently an "incurable" can be restored to comparative health and economic usefulness.—The Pathfinder.

Doctor Found What is Best for Thin, Constipated People

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "cure" were on women, children and babies. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated. In the course of his 47 years' practice (he was graduated from Rush Medical College back in 1870), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it had in the doctor's private practice. Now, the third generation is using it. Mothers are giving it to their children; who were given it by their mothers. Every day some one is striking day come one somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year. Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that

It is current, coin that purchases all the pleasures of the world cheap, and the balance that sets the king and the shepherd, the fool and the wise man even.—Corvantes.

FAVORITE DISHES

A cake that is a little different and one that will be enjoyed is: Lightning Cake.—Cream half a cupful of butter with one-half cupful of sugar until well mixed, add four beaten egg yolks, three tablespoonfuls of milk and one cupful of flour sifted with...

Frosting for Lightning Cake.—Beat four egg whites until light, gradually add three-fourths of a cupful of sugar and a half cupful of blanched almonds. Spread on the uncooked cake and sprinkle with sugar and cinnamon. Codfish Balls.—Put hot boiled potatoes through a ricer—enough to make two cupfuls. Have ready one cupful of salt codfish, parboiled and light and fluffy. Shape into balls, roll in egg mixed with three tablespoonfuls of cold water, then in crumbs. Fry in deep fat. Drain on brown paper. If the balls are made the day previous to serving they will cook better and keep their shape.

Ginger Cream.—Make a custard of the yolks of four eggs and the whites of two, four tablespoonfuls of sugar, two tablespoonfuls of sirup from preserved ginger and one pint of milk. Just before the custard is done add a tablespoonful of dissolved gelatin. Stir until well dissolved and turn into cold molds to chill. Sprinkle each mold with chopped preserved ginger. Occasionally serve a few raisins mixed with cracked nuts for dessert. It is easier and less expensive of time than more elaborately made dishes.

Nellie Maxwell THE KITCHEN CABINET

Not be alone who slay the foe To win his country's fame For some great unreckoned deed Great's name an honored name.

THE GOOD OLD PEANUT

As a substitute for butter, peanut butter is a most agreeable one. It may be used in various dishes, adding flavor and nutriment. Broiled Sweet Potatoes With Peanut Butter.—Select medium sized potatoes (yams preferred), steam them in their skins. Remove the skins and cut the potatoes lengthwise into one-inch thick slices. Spread with peanut butter, dust with a trace of nutmeg and brown in a hot oven.

Peanut Leaf.—Take two cupfuls of breadcrumbs, three-fourths of a cupful of peanut butter, one cupful of cooked rice, one teaspoonful of salt, pepper to taste, one teaspoonful of poultry dressing, one teaspoonful of parsley and minced onion. Combine and form a loaf. Bake one-half hour and serve with tomato sauce.

Peanut Butter Souffle.—Boil one cupful of sugar and one-fourth cupful of water until a thread is formed. Four over the well beaten white of an egg, add one-fourth cupful of peanut butter and place over the heat. Cook until the sugar is a little dry around the edges, then beat until thick and spread over the cake.

Peanut and Tomato Cook.—Put two cupfuls of peanut butter into a sauce pan, moisten two tablespoonfuls of cornstarch with a little water and add to it two cupfuls of thick tomatoes, one and one-fourth cupful of bread-crumbs, salt and pepper to season. Mix and steam in a mold two hours. Serve surrounded with creamed onions.

Sunday School Lesson

(By REV. P. H. FLETCHER, D.D., Dean Moody Bible Institute of Chicago.)

Lesson for January 29

THE GROWING FAME OF JESUS

LESSON TEXT—Mark 3:7-12; 6:52-54. GOLDEN TEXT—"The common people heard him gladly." PRIMARY TOPIC—Jesus Followed by Crowds of People. ADVANCED TOPIC—The Growing Fame of Jesus.

INTERMEDIATE AND SENIOR TOPIC—Why the People Followed Jesus. YOUNG PEOPLE AND ADULT TOPIC—"The Secret of Jesus' Fame."

1. Jesus Ministering by the Sea (3:7-12). Why He withdrew. It was because of the murderous plotting of the Pharisees against His life. So violent was their hatred against Him that they conspired with the Herodians, who were regarded as traitors to their nation and country, to put Him to death. Their opposition was aroused when Jesus claimed to have power over evil forces (2:10)...

2. To whom He ministered (3:7-12). A great multitude, representing a wide stretch of territory. They came from Jerusalem and Idumea on the south, from beyond Jordan on the east, and from Tyre and Sidon on the northwest. Jesus was the magnet of attraction—the hero of the hour. The interest of the whole country centered in Him.

3. The result (vv. 9-12). So great was the pressure that lives seemed endangered by the thronging of the multitudes. Some came out of curiosity when they heard what great things he did (v. 8). Others came for physical benefit, to be healed of their diseases. To escape from the throng He ordered the disciples to secure a little boat for Him.

(2) The unclean spirits protested themselves before Him (vv. 11, 12). They confessed Him as the Son of God. They had no doubt about His deity. This testimony He refused to receive because (a) the time for His "glorification" was not yet ripe; (b) they were not the beings to make Him known. He would not receive tribute from such a source. He would be proclaimed only by those who loved him best of all.

11. Jesus Ministering at Gennesaret (6:53-56). Jesus recognized (v. 54). The people quickly recognized Him because they had witnessed His mighty works. The feeding of the 5,000 was doubtless still in their minds. Perhaps they had seen the things he did (v. 8). Others came for physical benefit. They had doubtless heard Him teach also. He was recognized when ever he went. When He rates in the lives of believers today, those who come into touch with them recognize the fact. They take knowledge of them that they have been with Jesus (Acts 4:13).

2. The people ran to see Jesus (v. 55). They did not go about this in a half-hearted way. Those who really come into touch with the Lord Jesus Christ have called forth from their unusual energy. The degree of reality of our contact with Him is expressed by our enthusiasm.

3. They searched the whole region for those in need (v. 53). Those who were carried to be sick and in need were found in beds to Jesus. Those who have come to know Christ will be about earnestly seeking for the lost to bring them to Christ. It matters not what effort is required.

4. They were made whole by His touch (v. 56). The only touch which is needed for the healing of the human soul is that of faith. When the individual is brought into touch with Him by a vital and living faith, sin is vanquished and sickness and death lose their power.

Honor is like the eye which cannot suffer the least impurity without dimness; it is a precious stone, the price of which is lessened by the least flaw.—Basset.

The "Yes" and "No" You are what you are today because of what you were yesterday. You are the product of the "Yes" that you have said, and the "No"—Margaret Slatery.

Good Christians, Citizens Whatever makes men good Christians makes them good citizens.—Daniel Webster.

Stepping Stones Men may rise on stepping stones of their dead selves to higher things.—Tennyson.

The Library of God Few, but full of understanding, are the books of the library of God.—Luther

WHAT A DOCTOR KNOWS ABOUT CONSTIPATION

There is a way of overcoming the tendency to constipation. And here is how you can PROVE it. The next time your bowels need my assistance, don't take the first laxative that comes to mind. Take one the druggist can assure you is made with CASCARA. Just as effective as using force, and it's good for the system. Indeed, it helps make good blood. For cascaria is nothing but the bark of a tree. The Indians chew this bark, and to an old age without a day's sickness.

So the only habit you get from cascaria is that of natural and normal regularity. How different from things one must usually repeat on the morrow! Cascaria is the ideal laxative; and the familiar little candy cascarets are doubtless its ideal form. Children beg for these tasty tablets, and many men and women would not think of taking ANYTHING else for the purpose. And EVERY druggist has them.

CASCARETS They Work While You Sleep!

Big Esperanto Library Saratov, Russia, a provincial city on the Volga, claims to have the greatest Esperanto library in the world. It contains about 10,000 volumes, compiled by a prominent Esperantist, David, and confiscated at the beginning of the revolution.

Lightening the Burden Tom—Do you understand how she carries her years so lightly? Dora—Yes. She drops so many.

Call a man a diplomat instead of a liar and he will be well pleased; yet it amounts to about the same thing.

MOTHER! Look at Child's Tongue if Sick, Cross, Feverish

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once. When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sour, breath bad; has stomach-ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Fig Syrup," and in a few hours all the foul, congested waste, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless, "fruity laxative"; they love its delicious taste, and it always makes them feel splendid. Ask your druggist for a bottle of "California Fig Syrup," which has directions for babies, children of all ages and for grown-ups plainly on the wrapper.

Caution. Beware of counterfeits sold here. To be sure you get the genuine, ask to see that it is made by the "California Fig Syrup Company." Refuse any other kind with contempt.

Painter's Philosophy "The fact that yesterday I may have painted a good picture means nothing," says William Lathrop, the artist. "I am worth no more than the picture I can paint today and tomorrow."—American Magazine.

periority Complex "How do you account for the crime wave in your community?" "I make no attempt to account for it," answered Senator Sorghum. "My position requires me to appear too polite and high minded to notice it."

In the New English dictionary, which after 55 years of work is nearing completion, 22 columns of references are devoted to the word "put."

It doesn't do a particle of good to yawn when some people talk. Be optimistic, but don't overdo it.

After Colds or Grip One's Kidneys Must Function Properly to Eliminate the Waste Impurities.

DOES winter find you lame and achy—worried with backache, headache and dizzy spells? Are the kidney secretions scanty and burning in passage? These are often signs of improper kidney action, and sluggish kidneys permit waste poisons to upset the system. Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and aid in the elimination of waste impurities. Are endorsed by users everywhere.

Doan's Pills A Stimulant Diuretic to the Kidneys

The bright eyes, the clear skin, the splendid step, the active mind, are the right of healthy man. Keep your kidneys, liver and bowels in good condition and you will be active and vigorous at 70—as at any age! For seven generations—since 1696—the Hollanders have relied on their "Dutch drops" for aid in keeping up their health and vigor. They will do it for you. Try them today. Look for the name GOLD MEDAL on every box and accept no imitation. At all druggists, in 3 sizes.

CUTICURA Promotes Loveliness Of Skin And Hair

Daily use of the Soap, assisted by the Ointment when required, keeps the skin fresh and clear and the hair healthy and glossy. They are ideal for the toilet, as is also the smooth, cooling, fragrant Cuticura Talcum.

INDUSTRY FACES RUIN IN RUSSIA

Soviet Cannot Make Mills and Factories Pay, Says Observer.

Riga, Latvia.—Both entering and leaving Russia is an experience. Traveling in the guards, his tongue immediately upon hearing the train. The comrade existing between travelers is slightly strained. One subject is taboo and that is Russia. Upon leaving Russia as soon as the train crosses the frontier a change is noticeable among the passengers. It seems as though every one has heaved a sigh of relief. People who were friendly before become even charming. Tongues wag and before the train arrives at Warsaw, Buda or Rome, the case might be all the passengers in the car have become friends.

Leaving Moscow my neighbor in the compartment went to bed before I did and in the evening we did not see each other. In the morning, after we passed the Latvian frontier we both seemed to feel a load lifted from our shoulders. The peculiar mental depression which affects visitors to Russia was gone. We invited each other for breakfast and began to get acquainted. We had both been in Russia for three months and visited widely separated districts.

Visited Industrial Centers.
He turned out to be a German engineer who had visited all of the industrial districts in Russia, from Leningrad right down to the Caucasus. Representing one of the big German industrial companies but not bound to Russia to investigate industrial conditions and discover what chance there was of establishing a large plant in there. He talked with workers, foremen and managers. He was bringing back a pessimistic report and personally he was disillusioned about doing business in Russia. He also had met and talked with many Americans.
"After the Rapallo treaty was signed we Germans had illusions about exploiting the Russian market and gaining control of the Russian industry," he said. "Today we know better. We have discovered that the trade relations existing between Germany and Russia are not for the improvement of trade and commerce but for the furtherance of Bolshevik politics."

Politics Ahead of Business
"Russia, we found, does not do business with countries where she can sell the most profitably and buy the cheapest. Today in Moscow the hotels are filled with American tourists and other nations at the various communist parties and are taking out officials of the various soviet trusts, syndicates and co-operatives in dinner. They are receiving encouragement, just what we got before the Rapallo treaty was signed. They are going to learn just what we have learned during these last three years."

"The reason why there are so few representatives of German concerns in Russia today is not because we are not interested in the Russian market. Neither does it mean that we have capitulated to American competition. It only means the soviet government is not doing everything possible to convince Americans that business can be done and that there is much more business awaiting around the corner just as soon as they can force the United States to recognize the soviet regime. They worked the same game successfully with Sweden, Germany, Italy, England and France and now they are trying it on America."

Purchase Few German Articles.
"At present there are very few German concessions operating in Russia. The soviet favors trade monopoly is being almost no licenses permitting the import of German goods. I called on many trusts attempting to sell the many varieties of machinery we are in special permits to import them from the trade monopoly, and if after long negotiations such a permit was received, then it would take several additional months before the order would be officially placed by the soviet trade delegation in Berlin."
"But now the strict delegation in Berlin is not buying because there is no profit in doing business in Germany. They would rather buy their pieces in the United States in hopes of obtaining political recognition and huge loans and credits in the future."

"The second reason for the poor business in Russia is the extreme poverty of all soviet institutions which all demand credit. These soviet syndicates, trusts and co-operatives are bargained to the last penny and after endless bureaucratic negotiations and streams of requisitions one discovers they can buy nothing. If business is finally transacted there is no profit because of the expenses on allied."

State Factories Losing Money.
"Heavy industry is buying the most abroad. The purchases include consist of replacement machinery for mills, factories, mines, railroads, all of which need new equipment. The oil, coal and metal industries are buying abroad. In regard to the electrical industry I found many of the old works in operation and a few new ones. Some hydro-electric stations have been built and they are making slow progress in the process of electrification. Chinese are smoking, workmen come to the mills and in the offices em-

ployees calculate endlessly for reports.

"The metal press is full of articles about industry, the industrialization of the country is the latest slogan. There are lots of meetings and conferences. They are going to make everything they need, irrespective that is, when they get the machinery they need to start this miracle working program. The plan one has seen in all one has the impression of looking at a dead body being galvanized into action by an electric current. This is because all of the mills and factories are working with worn-out machines. Under state monopoly, having a protected market, still all these concerns are losing money and are continually in need of new subsidies from the government.

Jobless Army 2,500,000.
"Nationalized industry in Russia is a luxury which the soviet government can ill afford. If tomorrow the present Russian industry were placed in a position where it could compete with European industry, still it could not exist. Imagine six weavers on an island having a monopoly. Suppose one weaving machine started to work there. What would the other five weavers do? Russia today has more than a million and a half unemployed skilled workers and another million unemployed unskilled and white collar workers. Industry in Russia is so old fashioned that it cannot be compared with any industry in more progressive countries.

"What is more amazing is that all industry in Russia is operating at a loss. It is not helping to increase state revenues, but exists because it is supposed to support itself, and it does not do this. I obtained the impression that one of the chief reasons why industry is continued in Russia is as an advertisement to show that industry actually can exist under Communist government. This is an expensive advertisement.

Chaos for Industry.
"The peasant pays. He is paying for the present government. He is paying for the new government which he and he pays the demoralized workers who are so busy engaged in balling water with a sieve. The government appropriations to purchase new equipment are not a drop in the bucket of Bolshevik need.
"The enterprise themselves, including foremen and even former stockholders are a sad sight to an industrial man. The management is without experience or education. They have been appointed chiefs of enterprises which, even though they may not be modern, still are large and the heads of which should have theoretical and practical education and culture.

"It is true they are now trying to remedy this situation by calling back the 'specialists' those who were the brains before. But they are doing this only in an advisory capacity. If the Communist direction wishes to demonstrate three times each week against Germany, England, or America, he calls out all the workers and gives them a half holiday to listen to his speech. With proper encouragement he will talk all afternoon. He frequently does this, and his worker production falls off.

High Prices for Poor Products.
"In many of the mills they are trying to produce superior articles. And this is the only standard of measure. It is hardly necessary to speak about the awful quality of the goods produced, but it is necessary to remark also that the prices are the highest in the world today. Such is the soviet nationalized industry which is being managed by a bunch of incompetents."

"And despite the terrific loss in operating this industry the soviet government is now engaged in trying to cut down prices. This is more serious policies. How can prices be cut when industry is being operated at a loss? When prices are cut quality of the goods is reduced. It means the discharge of more employees, and as I have mentioned, the unemployment problem is serious enough without making it more serious. It means the discharge of more employees, and as I have mentioned, the unemployment problem is serious enough without making it more serious. It means the discharge of more employees, and as I have mentioned, the unemployment problem is serious enough without making it more serious.

Fines, Deductions, for Workers.
"There is a system of fines which cut into the worker's pay, and from his pay envelope is also deducted between one-fourth and one-fourth his entire wages for the aid of various government and community enterprises, such as the Aviation Chemical society which is preparing Russia for the next war, the International society, trusts with incomes in left; the fund to aid the homeless children, etc., without end.

"There is supposed to be an eight-hour week. He averages between nine and ten hours, with a military drill in the evening three times each week, lasting an hour. However, the Communists I talked with never mentioned war. It is not a popular subject. The workers and employees have a hopeless look, which depresses one. There is nothing to be found in Russia. A laugh strikes the hearer. "The government is not popular, but the people seem too apathetic to hate."
"My final conclusion? Well, I'm not a politician. I am an engineer and mechanic. I know my line. I also know that it is possible to have trade unions, but I believe that political trade cannot exist. Political trade is the crowning absurdity of Russia today."—Chicago Tribune.

There is only One way to save money on Motor Oil

NEVER let your crankcase receive a drop of oil that you do not absolutely know to be able to protect every moving motor part and to keep your motor running smoothly at any speed. Thereby you get real value in long motor service. Thereby you avoid costly repairs. You cannot make this economy if you buy cheap or unbranded oil. Rather, you face quick depreciation, scored cylinders, unnecessary carbon, burned bearings, loose pistons. Economize by insisting on Conoco Motor Oil—a known product, unvarying in quality. Refined to save cars. Each dealer has a Conoco Motor Oil chart showing the correct grade for your car and model.

CONTINENTAL OIL COMPANY
Producers, Refiners and Marketers of high grade petroleum products in Arkansas, Colorado, Idaho, Kansas, Missouri, Montana, Nebraska, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming

CONOCO MOTOR OIL [The same assurance of excellence in a 100% Pure Pennsylvania Oil comes with the use of Conoco Amalite]
