### Both Tax Issues Carry In Election

(EDITOR'S NOTE: Final tabulation of ballots in this election were not available in time to be published in last week's edition.)

Both tax issues carried by a large majority in a light balloting Saturday, August 25, as Dickens county citizens went to the polls to vote on the revocation of county hospital bonds, and the reallocation of county funds.

The county hospital bond election of last December was revoked by the voters by a majority of 291 to 27.

The reallocation of county taxes for certain county projects and maintenance carried by a 289 to 29 vote. This election, according to County Attorney Alfred Walker, will not alter the present set-up in the allocation of county taxes, but merely authorizes the commissioners court to continue under the present set-up for another six years.

### Visitor Comments On City Oil Leasing

Congratulations to Spur citizens for leasing their city lots for \$25 under the utilization plan were expressed by Paul T. Vickers, chamber of commerce manager at McAllen, who was here this week with his wife to visit her father, J. B. Richburg and sister, Mrs. Jack Rector. Vickers was chamber manager at Midland 10 1/2 years while that city was experiencing its first oil development.

Vickers said the \$25 offered at Spur was the highest he ever heard of in Texas for city lots in a utilization plan. He said McAllen property owners gladly leased their lots for less than \$10. He did not recall the exact figures, but said Spur people were receiving at least 250 percent more than was paid at McAllen.

McAllen now has two gas-distillate wells inside the city limits, making money and doing no harm, as people are in no wise bothered by the wells.

"People are smart to lease their lots, not only because they get the \$25, plus possible later income on the unit basis, but also because they are helping the possible development of Spur as an oil town. I can't see how any property owner can ever expect to lead the price offered here, as \$10 for as much as an acre is a good price for wildcat land. Moreover, if oil is discovered, property owners in Spur or any other town offered such an opportunity will likely see their property double in value," the McAllen man said. Vickers said he leased his own lot for \$10 or less, and later was offered more than twice as much for his house and lot as he paid for it.

Vickers and his wife left Thursday for a visit at Midland. The former West Tevan has served twice as president of the Texas Chamber of Commerce Managers, was formerly oil editor of the Amarillo Daily News, and is a past president of the Lower Rio Grande Valley Chamber of Commerce Managers Association. Mrs. Vickers formerly lived here.

### Many In Town For Treasure Hunt Wed.

Spur's first Treasure Hunt was acclaimed a success at the close of business yesterday with merchants reporting a large number of treasure-seekers in and out of their stores.

Chamber of Commerce manager Grady Elder states that the chamber is well pleased with the turn out for the first of the town-wide events. He adds, however, that for next month's Hunt, it is hoped to have a much larger number of "lucky numbers" in the city.

Due to the large number of cards mailed out and the relatively few winning numbers, a good many of the Treasure Hunt numbers were never found. With more numbers next month, there will be more merchandise given away.

The Treasure Hunt merchants and the Chamber of Commerce expressed their appreciation to the many shoppers who visited the different places of business Wednesday.

### LIGHT BUT SCRAPPY SPUR ELEVEN READY FOR OPENING CONTEST

The Spur Bulldogs open their 1951 play tomorrow night, Friday, September 7 against the Matador Matadors at Matador. Game time is 8:15 p. m.

Following a week of strenuous workouts Coach Sam Hawkes states that the boys will be ready for the opener and are talking about a victory.

"We're short on experience and weight," states Hawkes "But we've got a bunch of hustlers who like to play the game. We'll make mistakes, probably lots of them, but we'll try to profit by them."

The opening of school brought several more boys out for football, according to Hawkes, and now 45 are suited out each day. Of these 45 boys only five are seniors. The seniors on the squad are Charles Grimland, Charles Watson, Orville Cloude, Paul Simmons and Gordon Simmons.

As a tentative starting line-up, Coach Hawkes lists the following team: Left end, Charles Watson; left tackle, Hershey Wade; left guard, Harley Bingham; center, Joe Bell; right guard, Larry Smith; right tackle, Toby Williams; right end, either Dean King or Orville Cloude; quarterback, Chester Lindsey; left half back, Charles Grimland; fullback, Paul Simmons; and right half back, Bobby George.

### Mexican Nationals Available to DCFB

A number of Farm Bureau members inquire about getting Mexican nationals to assist in the crop gathering.

The Dickens County Farm Bureau has an application filed with the government for a large number of Mexican nationals. They are to be ready for us about October 1, and will be available to any Farm Bureau member in the county provided there is not sufficient local help.

The farmer will not have to make bond this time as he has heretofore. He will pay just a straight fee on each national and will have no further responsibility. If you wish to get some of these to help in your crop gathering you must apply through the Lubbock employment office at once.

With the new law that went into effect last week the farmer can no longer have his gasoline dealer fill out his tax refund application. The Farm Bureau will be glad to assist you with this matter. This service is free to Bureau members.

Blue Cross members have been extended a very beneficial service through efforts on the part of Bureau officials. Watch closely your individual letter for the quarter which is being sent out this week.

A bi-district meeting will be held Thursday, September 13, in the Lubbock hotel, in the banquet ball room. The program is one of the high lights of the year. Included will be the Bureau choral contest and the major accomplishments given by some of our best entertaining speakers.

Everybody who has attended this bi-district meeting each year agrees that to hear these speakers is worth anyone's time. Several are planning to go from this county. This meeting is for the entire membership and those who are not members and we guarantee you will not regret attending.

"This is the nicest bunch of youngsters I've ever worked with," states the new principal, "And there is every indication that the children have come from good homes and families."

He adds that the teachers and parents have offered him wholehearted cooperation and all indications point toward a successful year for the Spur schools.

## F. F. A. Chapters To Be Loaning Agencies For Farm Equipment

The directors of the Duck Creek Soil Conservation District recently turned the equipment owned by the district over to the F. F. A. chapters which will act as loaning agencies for the district.

The equipment will be serviced and repaired in the Vocational Agriculture Shops located in the following schools and counties, Post, Garza County; Jayton, Kept County; Afton, McAadoo and Spur in Dickens County.

Equipment which will be available for use for farmers in Dickens county will include 150 gallon power stock sprayer, whirlwind terracer, grain drill with fertilizer attachment, grass drill and land plane. This equipment will be loaned with a small rental fee charged to keep the equipment in repair. The equipment may be borrowed in all three counties which comprise the Duck Creek Soil Conservation District, and the farmers living on county lines may rent equipment that is most convenient to them.

The rental of this equipment can be arranged with the local F. F. A. Chapters and the user of this equipment will be responsible for it.

Equipment should be returned to the shop in the district from which it was borrowed. It should be taken to the shop for inspection and repair if needed. The inspection and repair will be a service rendered to the county by the F. F. A. Chapters.

The directors urge the use of this equipment as it is a service offered to farmers by the district.

But in these critical times, defense is your job, too. And one of the most important parts of that job is maintaining the economic strength of America, as the sailors are working to maintain her naval strength. How can you do that? By buying U. S. Defense Bonds—buying them now and buying them regularly. So go to your pay office and join the Payroll Savings Plan or sign up at your bank for the Bond-A-Month Plan. But do it today!

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better investment than ever. Buy now every Series E Bond you own and interest every year for 20 years from the date of issue. **"Best of The Badmen" Dramatizes Thrilling Events In The Southwest Showing Sunday and Monday At Palace**

Telling an exciting and picturesque story of the lawless days in the Cherokee Strip following the Civil War, "Best of The Badmen," in color by Technicolor stars Robert Ryan, Claire Trevor, Jack Buetel and Robert Preston. The adventure-packed drama presents a vivid conflict between heroism and villainy in a lawless period of American history.

Ryan plays a Union officer who persuades a group of outlaws, formerly in Quantrell's Confederate command, to surrender, take the oath of allegiance and get a fresh start in life. Preston, as in unscrupulous detective anxious to collect rewards offered for the capture of the bandits, unsuccessfully tries to interfere, and in revenge has Ryan framed on a murder charge and sentenced to death. He escapes with the help of Preston's bitter and disillusioned wife, as played by Miss Trevor, and, with a price on his head joins the outlaw group in order to strike back at Preston. The ensuing enmity between the two men leads to the stirring climax

of the RKO Radio picture. Buetel portrays the youngest member of the outlaw group, which includes members of the James and Younger clans. Walter Brennan is in top featured support, and also prominently cast are Bruce Cabot, John Archer, Lawrence Tierney and Barton MacLane. William D. Russell directed the screenplay by Robert Hardy Andrews and John Twist based upon Andrew's original story.

of the Texas Department of Public Safety, today announced his intentions of calling upon the State's newspapers and radio stations to assist his Department in putting the "damper" on the false rumors and misinformation that is currently being spread in some circles concerning Texas' new Motor Vehicle Safety Responsibility Law.

Garrison emphasized that the State will conduct a thorough educational program in November and December to acquaint the public accurately and adequately with the purpose and requirements of the law which will become effective next January 1st. At the same time, Director Garrison warned the public not to believe statements that the statute is now in effect or that it is a compulsory insurance law. He emphatically pointed out that the law will have no effect upon motor vehicle owners and operators until January 1st and declared that under no condition or circumstances will it compel motorists to carry liability insurance.

or injury, or property damage exceeding \$100, must furnish proof of his ability to meet claims up to \$15,000 or have his motor- ing privileges suspended until he does. Proper insurance may be accepted as sufficient proof of such financial responsibility but the law also offers several other choices of furnishing such proof.

Among these are the posting of a bond with the Texas Department of Public Safety or the depositing of satisfactory security with the Department. Also, under certain conditions, individuals or firms may qualify as self-insurers under the terms of the law. The alternatives will be clearly set forth by the Safety Department as a part of the education program beginning in November. All such information released by the State will be clearly identified as such, and it will be official, according to Garrison.

In calling upon the press and radio for assistance, Garrison stated: "I am asking the public-spirited newspapers and radio stations of Texas to cooperate with the Department of Public Safety, on behalf of the State, in a plan to give our people all the true facts. I am confident that they will do so. This educational program will begin November 1st, two months before the law becomes effective. In the meantime, I hope the people of Texas will not permit themselves to be misled again about this new law, which was enacted for their greater safety and financial protection."

**TRAIL BLAZER— with plenty on the ball**

**H**ow long since you lifted the hood of a car, and took a good look at what's beneath? We like to have folks do that with a Buick. You'll find that broad bonnet isn't put there for show. It's packed with horsepower—high, wide and handsome—more horsepower than normal drivers will ever use in full. And—if you're up to date on modern features—you'll find that this bonnet is packed with these too. Do you know, for example, that every new engine introduced or previewed in recent years is built on the valve-in-head principle? Score one for Buick. No Buick engine has ever been built in any other way. Do you know what it takes to make full use of high compression? A valve-in-head engine!

Score two: Buick has been stepping up compression ratios for years. But Buick has blazed one trail which other engines still haven't followed—don't ask us why. Every Buick has a Fireball Engine which, as we've said before, is like having a string of comets by the tail. Fact is, in every flame-packed cylinder there is a comet—rolled into a swirling ball by a special turbo-top piston—touched off by a flashing spark every 5 inches you travel in a Buick. That's why we're proud to show folks that Buicks have a Fireball Engine—and prouder still to have them take one of these thrilling performers out on the road. Want to try it? Come in and see us soon.

Equipment, accessories, trim and models are subject to change without notice.

**F. F. A. Chapters To Be Loaning Agencies For Farm Equipment**

The directors of the Duck Creek Soil Conservation District recently turned the equipment owned by the district over to the F. F. A. chapters which will act as loaning agencies for the district.

The equipment will be serviced and repaired in the Vocational Agriculture Shops located in the following schools: Jayton, Kent County; Afton, McAdoo and Spur in Dickens County.

Equipment which will be available for use for farmers in Dickens county will include 150 gallon power stock sprayer, whirlwind terracer, grain drill with fertilizer attachment, grass drill and land plane. This equipment will be loaned with a small rental fee charged to keep the equipment in repair. The equipment may be borrowed in all three counties which comprise the Duck Creek Soil Conservation District, and the farmers living on county lines may rent equipment that is most convenient to them.

The rental of this equipment can be arranged with the local F. F. A. Chapters and the user of this equipment will be responsible for it.

Equipment should be returned to the shop in the district from which it was borrowed. It should be taken to the shop for inspection and repair if needed. The inspection and repair will be a service rendered to the county by the F. F. A. Chapters.

The directors urge the use of this equipment as it is a service offered to farmers by the district.

**Defense is your job, too!**

Swabbing down their cruiser's forecandle deck or passing ammunition to her eight-inch guns, it's all in the day's duty for these young American seamen. Day or night, fair weather or foul, they're on the job, keeping the United States Navy our First Line of Defense—for America and for you.

But in these critical times, defense is your job, too. And one of the most important parts of that job is maintaining the economic strength of America, as the sailors are working to maintain her naval strength. How can you do that? By buying U. S. Defense Bonds—buying them now and buying them regularly. So go to your pay office and join the Payroll Savings Plan or sign up at your bank for the Bond-A-Month Plan. But do it today!

**The U. S. Defense Bonds you buy give you personal financial independence**

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan. Don't forget that bonds are now a better buy than ever. Buy now every Series E Bond you own and interest every year for 20 years from the date of issue. ### "Best of The Badmen" Dramatizes Thrilling Events In The Southwest Showing Sunday and Monday At Palace

Telling an exciting and picturesque story of the lawless days in the Cherokee Strip following the Civil War, "Best of The Badmen," in color by Technicolor stars Robert Ryan, Claire Trevor, Jack Buetel and Robert Preston. The adventure-packed drama presents a vivid conflict between heroism and villainy in a lawless period of American history.

Ryan plays a Union officer who persuades a group of outlaws, formerly in Quantrill's Confederate command, to surrender, take the oath of allegiance and get a fresh start in life. Preston, as in unscrupulous detective anxious to collect rewards offered for the capture of the bandits, unsuccessfully tries to interfere, and in revenge has Ryan framed on a murder charge and sentenced to death. He escapes with the help of Preston's bitter and disillusioned wife, as played by Miss Trevor, and, with a price on his head joins the outlaw group in order to strike back at Preston. The ensuing enmity between the two men leads to the stirring climax

of the RKO Radio picture. Buetel portrays the youngest member of the outlaw group, which includes members of the James and Younger clans. Walter Brennan is in top featured support, and also prominently cast are Bruce Cabot, John Archer, Lawrence Tierney and Barton MacLane. William D. Russell directed the screenplay by Robert Hardy Andrews and John Twist based upon Andrew's original story.

of the Texas Department of Public Safety, today announced his intentions of calling upon the State's newspaper and radio stations to assist his Department in putting the "damper" on the false rumors and misinformation that is currently being spread in some circles concerning Texas' new Motor Vehicle Safety Responsibility Law.

Garrison emphasized that the State will conduct a thorough educational program in November and December to acquaint the public accurately and adequately with the purpose and requirements of the law which will become effective next January 1st. At the same time, Director Garrison warned the public not to believe statements that the State is now in effect or that it is a compulsory insurance law. He emphatically pointed out that the law will have no effect upon motor vehicle owners and operators until January 1st and declared that under no condition or circumstances will it compel motorists to carry liability insurance.

According to Garrison, the new regulations bear no resemblance to a compulsory insurance law. He pointed further to the fact that only one state has such a law but that Texas became 35th state to enact a security-type Safety Responsibility Law. It is true, according to Garrison that, beginning January 1st a motor vehicle owner or operator who is involved in an accident resulting in death

or injury, or property damage exceeding \$100, must furnish proof of his ability to meet claims up to \$15,000 or have his motor-vehicle privileges suspended until he does. Proper insurance may be accepted as sufficient proof of such financial responsibility but the law also offers several other choices of furnishing such proof. Among these are the posting of a bond with the Texas Department of Public Safety or the depositing of satisfactory security with the Department. Also, under certain conditions, individuals or firms may qualify as self-insurers under the terms of the law.

The alternatives will be clearly set forth by the Safety Department as a part of the education program beginning in November. All such information released by the State will be clearly identified as such, and it will be official, according to Garrison.

In calling upon the press and radio for assistance, Garrison stated: "I am asking the public-spirited newspaper and radio stations of Texas to cooperate with the Department of Public Safety, on behalf of the State, in a plan to give our people all the true facts I am confident that they will do so. This educational program will begin November 1st, two months before the law becomes effective. In the meantime, I hope the people of Texas will not permit themselves to be misled again about this new law, which was enacted for their greater safety and financial protection."

# TRAIL BLAZER - with plenty on the ball

How long since you lifted the hood of a car, and took a good look at what's beneath?

We like to have folks do that with a Buick.

You'll find that broad bonnet isn't put there for show. It's packed with horsepower—high, wide and handsome—more horsepower than normal drivers will ever use in full. And—if you're up to date on modern features—you'll find that this bonnet is packed with these too.

Do you know, for example, that every new engine introduced or previewed in recent years is built on the valve-in-head principle?

Score one for Buick. No Buick engine has ever been built in any other way.

Do you know what it takes to make full use of high compression? A valve-in-head engine!

Score two: Buick has been stepping up compression ratios for years.

But Buick has blazed one trail which other engines still haven't followed—don't ask us why.

Every Buick has a Fireball Engine which, as we've said before, is like having a string of comets by the tail.

Fact is, in every flame-packed cylinder there is a comet—rolled into a swirling ball by a special turbo-top piston—touched off by a flashing spark every 5 inches you travel in a Buick.

That's why we're proud to show folks that Buicks have a Fireball Engine—and prouder still to have them take one of these thrilling performers out on the road.

Want to try it? Come in and see us soon.

Equipment, accessories, trim and models are subject to change without notice.

The secret of Fireball Power is in the use of dome-and-dip design of the piston shown above.

Here's the piston inside the cylinder. As it moves down, the fuel charge rushes in—sets up a swirl when it hits the piston top.

The piston moves up—compresses the swirling fuel into the comet shape shown here. "Compression ratios" are simply a measure of how much the fuel is compressed.

The ball of fuel is compressed around the spark plug—lets loose its pent-up charge when the spark is fired—delivering a higher percentage of power from each charge of fuel.
