Bailey County Makes Good Showing With Tri-State Exhibit

Exhibit To be Enlarged For Show At Big Fairs In South.

Although the exhibit by Bailey County, which was entered at the Tri-State Fair at Amarillo, was gotten up on short notice, it made one of the best showings of the large number entered by Plains counties. Only two days were used in which to arrange the exhibit, which scored 728.9 points out of a possible 1,000. The winner was Randall county with 954.7 points, Hemphill county was second, 919.6 points. Other contestants in order were: Hartley, Wheeler, Gray, Swisher, Roosevelt, N. M., Donley, Collingsworth, Armstrong, Bailey, Hall.

The exhibits were judged by R. E. Dickson, superintendent of the U. S. Experiment Station at Spur; E. W. Thomas, manager of the Livestock Experiment farm, and J. B. Wallace, U. S. Grain Inspector at Plainview.

The judges praised the exhibitors for the splendid quality of the exhibits and for the care and selection shown in preparing them.

It was Randall county's first time to win first place at the Tri-State fair. The exhibit was prepared by W. H. Upchurch, Randall county agent, and was financed by the commissioner's court and the Canyon Chamber of Commerce.

The county exhibits are considered unusually good and many of them will be shown at the state fair at Dallas, where they are expected to uphold the reputation of the county.

Methodist Church

We were especially impressed with the interest that was manifested in the Sunday school last Sunday morning. The study of the lesson should deepen our convictions on the great question of temperance and especially on the prohibition question. We are passing through one of the greatest crises that the nation, the church and the home has passed since we have been a nation. It is high time that we wake up and meet this situation.

Our people have been sleeping. As we sat in the pulpit Sunday and noticed the great number of children in the Sunday school, we began to count the number of parents present and were surprised that a large majority were not there. This should not be. It is just as much the place of the parents to attend the Sunday school. Parents, you are neglecting your duty and it may bring you grief.

Attendance Sunday was good, 139 present. Let us strive to reach 150. We had 207 present in all departments. Come to "The Church With a Glad Hand."

W. B. HICKS, Pastor

Vance Waggon left Sunday for Canyon, Texas, to enter West Texas State Teachers' College.

Mr. and Mrs. W. R. Harper and children, Eva and Naomi, were in Lubbock Sunday. Mrs. Harper and children returned Monday, but Mr. Harper remained for a few days to receive medical attention.

Panhandle South Plains Fair To Open Monday With Week Of Entertainment

Lubbock, Texas, Sept. 25—Next Monday the Panhandle South Plains Fair will open in Lubbock for a week of educational entertainment.

There won't be a dull moment, Dr. I. E. Barr, president of the Fair Association has assured the general public.

Eleven counties and thirteen communities have signed for space in the Agricultural building for an agricultural exhibit. The counties are: Cochran, Crosby, Floyd, Hockley, Lynn, Swisher, Terry, Bailey, Gaines, Dawson, and Leaton. The communities are: Carlisle, New Hope, Union, Grovesville, Caldwell, Idalou, Foster, Shallowater, Canyon, Hardy, Woodrow, McClung and Liberty.

A new live stock building has been constructed for the extra hundreds of live stock that are expected. Largent, Oist, Lillard, Taft Ranch and others who are big live stock exhibitors have entered their herds here again.

CITY TO BEAUTIFY WELL SITE FOR CITY PARK

It is understood that the City officials have recently placed an order for one hundred 5-foot Chinese elm trees for fall delivery. These trees are to be set out on the five acre tract on which the city well is located and arrangements have been made to have them put out as soon as they arrive.

The city 'dads' have set a good example and is one which should be followed by the property owners of Muleshoe. It is hoped that the citizens of our town will cooperate with the officials more, to the end that a public park and playground may be established.

Robinson Will Speak In Clovis Theatre On October 5th

Hon. Joseph T. Robinson, Democratic nominee for vice president, will arrive in Clovis on the morning of Friday, October 5, and will speak at the Lyceum theatre that night, according to perfected plans of the Curry county democratic committee, as announced by J. E. Maudlin, chairman.

Mr. Robinson will leave Clovis on Saturday morning to fill a speaking date at Roswell in the afternoon, returning to Clovis in the evening of the same day to take the west bound train for Arizona where he is scheduled for a number of speeches.

It is understood that the train to which Mr. Robinson's private car will be attached enroute to Roswell, will stop in Portales on the southbound trip and the candidate will make a 30-minute speech in the Roosevelt county capital.

Judge R. E. Hanna, democratic national committeeman from New Mexico, has accepted the invitation to introduce Senator Robinson for his speech here. In addition there will be more than a score of prominent New Mexican democrats here to meet the senator.

Delegations of prominent democrats from all sections of the state are expected to be here for the Robinson speech, as this city, Roswell and Artes are his only stops in the state. Also, he makes no stops in the Texas panhandle or plains country, delegations are expected from many of these counties.

The committee in charge of the Robinson meeting are starting their arrangements to handle a large crowd just what social functions will be planned cannot at this time be stated.

A reception committee from here will probably meet Senator Robinson enroute at some point between here and Amarillo and the same or other committee will accompany him on the trip to Roswell. The democratic committee of Chaves county will send a reception committee to this city to accompany the senator and party to Roswell—Clovis Journal.

John S. McMurry returned Saturday from a several days visit in Amarillo and Clarendon.

The Elite Cafe will serve a Real Kentucky dinner next Sunday.

The Campaign for Votes Is Open

Meeting Friday Night To Organize Red Cross Chapter

The Red Cross, which once had an active Chapter here, is to re-organize. Announcement has been made that there will be a meeting in the Commissioner's Court room Friday night for that purpose. Everyone who is interested in the work of the Red Cross is urged to be present at 8:30 P. M.

BAILEYBORO B. Y. P. U. HAS SOCIAL IN GARTH HOME

Baileyboro B. Y. P. U. members were invited to the home of Mr. and Mrs. C. F. Garth, September 22nd, for a social meeting. Mr. Garth is president of the organization and is working hard to build up a better B. Y. P. U.

There was a show in town on this date, which lowered attendance at the social. A party also attracted some of the members.

Those present had a most enjoyable evening and ate as much watermelon as they could. Mr. Garth had brought a large number of melons from the field for his guests. No one ever goes to the Garth, home without wanting to return in the near future.

Cotton Conditions Report Unfavorable

Washington, Sept. 26.—The department of agriculture's summary of weather and crop conditions for the week ended yesterday says high winds heavy rains and flooded lowlands did much damage to cotton in the more eastern portions of the belt, especially in the Carolinas and southeastern Georgia where crop deterioration was steady, with much shedding, bolts rotting and seed sprouting.

In Oklahoma cotton made fair to good progress. Picking and ginning advanced rapidly. In Texas there is little change in the general situation, except for deterioration in north-west.

W. M. U. MEETING

Mrs. Mollie Griffiths was hostess to the W. M. U. of the Baptist Church for its regular monthly social and business meeting at her home Tuesday afternoon.

We had the nicest time. We had a little surprise for mother Griffiths and mother Hannah just to let them know from time to time how much we love them. Everyone of our women should have been there.

After a short business session, we adjourned to meet next Tuesday at three o'clock at the home of Mrs. J. B. Roberts. Mrs. A. W. Coker will be leader for the afternoon.

Those present at the social were: Mmes. J. L. Alsop, L. S. Barron, A. W. Coker, Byron Griffiths, M. J. Griffiths, W. B. Harlan, Jno. C. Jenkins, Dan Lassiter, E. L. Patton, J. B. Roberts, Eva Shirley, H. B. Strickland and one visitor, Mrs. White; Misses Stella Mae Strickland, Velie Roberts and Masters Loyal Alsop and W. G. Harlan.

W. B. McAdams purchased a new Chevrolet sedan from the Valley Motor Company Saturday. Mr. Mac says there is no doubt but what patrons along his route will receive their mail on time regardless of weather.

Messrs. J. M. March, T. E. Arnold and D. E. Keeney motored to Littlefield Thursday to witness the ball game between that city and Fort Worth. Later in the evening they were joined by their wives and Misses Marie Arnold and Fainnie Arnold.

Mr. Howard Towery was an Amarillo visitor Thursday.

YL Starts School Year With Parent-Teachers Program

With a good crowd and a good, peppy program Friday night, the P. T. A. of the YL School was a success. The program consisted of several readings by the little tots and a pantomime. "And the Lamp Went Out" by some of the High School students.

Special music was given by Vera June Beller, Gladys Burman and Kathleen Willman.

Mr. Jenkins discussed the "Present Day Problems of the Rural School," emphasizing the idea of rapid growth and change in every other phase of activity and pointing out the need of a similar change in the educational system to meet the demands of this new development.

Tech Enrollment Is Larger With 700 Freshmen First Day

With over 700 present for the first day of a three-day orientation period at Texas Technological College it is expected that the number of first year students will reach 1,000 by the time enrollment is completed.

The feature of the first day was an address by President Paul W. Horn on "The Freshman of Today." Much time was taken up with faculty consultations for the purpose of enabling the freshmen to decide just what courses they wanted to take. The new students were given every opportunity to familiarize themselves with the work of the College and student activities.

MUSIC STUDY CLUB

The Carrie Jacobs Bond Club will meet at the home of Mrs. C. S. Holdon Monday, September 31, at 4:00 P. M. Officers will be elected for the ensuing year.

CARD OF THANKS

We most sincerely express our gratitude to friends for the sympathy and financial assistance in this, our time of sickness. Also do we thank them for the beautiful flowers sent us while at the hospital and we pray that the Grace of God rest upon each and every one of you.

Mr. and Mrs. E. A. Beller and Children.

Monty Skipper, of Watson community, was in Muleshoe Tuesday. His brother from Illinois is visiting him.

Local Markets

These prices are furnished by the local buyers, and are for your convenience.

The following prices hold for the week at Muleshoe Elevators and produce houses:

Sudan	\$2.25
Maize	85c
Feather	85c
Wheat	\$1.12

Retail Feeds

Bran	\$2.00
Shorts	\$2.25
Cotton Seed Meal	\$2.75
Cotton Seed Cake	\$2.75
Oyster Shell	\$1.50

Produce	40c
Fryers	20c
Fryers, Leghorns	17c
Light and Leghorn Hens	13c
Roosters	25c
Eggs	20c

SEND MONEY TO FLORIDA STORM RELIEF FUND

Monday of this week a telegram was received from the Red Cross in charge of relief work in Florida, asking for fifty dollars for storm victims. Later it was requested that this sum be doubled. A total of \$82.15 was raised on short notice by Muleshoe people and forwarded to Red Cross headquarters and more will be sent within the next day or two.

It is estimated by officials that the death list in Florida will likely go above 2,000. Bodies are being found in such condition that many are being cremated, while others are being buried where they are found. Entire villages have been completely destroyed and in some instances all the inhabitants killed.

STOCK SHIPMENTS

Lem Chesher shipped three cars of calves to the Fort Worth markets last week and it is understood that they brought a fair price. Market quotations for calves are \$6.50 to 12.00; steers \$5.00 to \$12.50. The top for hogs Wednesday was \$12.60.

One shipment of 1,000 head of stock sheep were received in Muleshoe this week and 3,000 more are expected by Saturday. Cattle shipments are running from one to three cars per week at this time.

WORK RESUMED ON HIGHWAY

Work on the Highway between Sudan and Muleshoe has started again. The finishers of the road will be much shorter. The time is being built and the work is to be completed in about two months.

YL News Items

Miss Opal Stevens left Sunday for Canyon, Texas, to attend college.

Mr. E. A. Beller returned home Monday morning from the Baptist Hospital at Clovis.

Letha Robison spent Sunday with Dorothy Priboth.

Singing was well attended Sunday night.

Edwina Burman spent Sunday with Melvina Bales.

Mrs. F. A. Collins, who has been very sick all the time, was carried to the Lubbock Hospital Sunday afternoon.

Vera June Beller spent Sunday afternoon with Lucy Robison.

The Finley sisters, from Pontiac, Illinois, were in this community on business this week.

There is now a move on foot in the YL community to build a parsonage and to get a half-time preacher. The present indications are that this will be successful as the land has already been given for that purpose.

Mr. Robert Shoffer and children spent the week-end at Levelland, visiting with Mr. Shoffer's father who has recently undergone an operation.

HOME MAKERS BIBLE CLASS

A few members of this organized class met Tuesday afternoon with Mrs. M. J. Griffiths. After some discussion the motion was carried to drop the organized class work for the present. Mrs. Glaze is teacher of the Bible class. Mrs. Lassiter, assistant teacher. Mrs. Shirley is secretary and Mrs. Barron, assistant. Come to Sunday School next Sunday everybody.

REPORTER

Mrs. G. B. Prather and children of Fairview were in town Sunday afternoon.

Emmitt Keeney spent the week-end here with his brother, D. E. Keeney and family. Emmitt is attending Texas Tech this year.

H. A. McCarty, of Sudan, was a business visitor here Thursday.

Mrs. F. A. Collins and daughter, Doris, motored to Lubbock Tuesday to visit Mrs. M. L. Collins who has just undergone an operation for appendicitis.

T. E. Arnold, C. H. Long and Mr. Crow, brother-in-law of Mr. Arnold from Abernathy, were Lubbock visitors Wednesday.

Old Fiddlers' Contest At Plainview Oct. 12th, Benefit Of Boys' Work On Plains

Plainview, Sept. 25—An Old Fiddlers' contest will be staged in Plainview October 12th for the benefit of boys' work in the Central Plains area of the Panhandle, sponsored by the Rotary, Kiwanis, and Elk's Clubs of Plainview.

The contest is open to the world, and already several noted fiddlers of this territory have accepted the invitation that has been broadcasted over the Panhandle-Plains area of Texas and New Mexico. Henry Hopkins, Secretary of the Plainview Chamber of Commerce and Agriculture, has sent several invitations to fiddlers that are known to be in West Texas, and is very anxious to get in touch with others over the country who will participate.

The contest will be staged in the municipal auditorium at Plainview. Judge L. E. Kinkler, veteran boys' work

Bailey County Teachers Institute West Camp

The Bailey County Teacher's Institute will hold their third day of Institute at West Camp, Saturday, October 13th.

The forty teachers of Bailey county are expected to be there, each ready to do his or her part to make the meeting a success. In addition to the teachers, there will be several trustees and other people who are interested in the welfare of the schools present. The following is the program for the occasion:

- | | |
|--|-----------------------|
| 10:00-10:20—Devotional..... | Rev. Strickland |
| 10:20-10:30—Welcome..... | Wallace Response..... |
| 10:30-10:45—Advantages and Disadvantages of Trans..... | Mr. Bryant |
| 10:45-11:00—School Libraries and Their Values..... | Ruth Combest |
| 11:00-11:15..... | Recess |
| 11:15-11:45—Organization of High Schools..... | Mr. Jenkins |
| 11:45-12:00—Cooperation of Trustees With School Community..... | Mr. Luffield |
| 12:00-1:30..... | Noon |
| 1:30-1:50—School Citizenship..... | Grover Carson |
| 1:50-2:10—Dramatics in the School..... | Miss Hart |
| 2:10-2:30—State Aid..... | Dee R. Haingrove |
| 2:30-2:40..... | Recess |
| 2:40-3:00—Importance of County In-habitants..... | Prof. Kendrick |
| 3:00-3:30—Business Session..... | |

Layman's Program Methodist Church September 30th

The following is the Layman's Program which is to be given at the Methodist Church, Sunday, September 30th:

Scripture Lesson..... A. C. Gaede

Religious Activities..... J. N. Green

Special Music..... Orchestra

The Layman's Place in the Church..... W. B. Hicks

Special Music..... Male Quartet

The Stewardship of Money..... W. M. Witterling

Special Music..... Orchestra

The Stewardship of Time..... Prof. Kendrick

Talents..... Mrs. Nina Elnord

EPWORTH LEAGUE PROGRAM

Leader—Raymond Gaede.

Sept. 1—Luke; 10-11-21-24; II Cor. 9:1-11

"God and our Community"..... Mrs. Delmar McCarty.

"Our Community and the Church"..... Mr. Fred Beck.

"The Church and the Epworth League"..... Miss Lele Glasscock

"Our Epworth League and Myself"..... Mr. R. C. Green

"Myself and God"..... Miss Iris Harden

Business Session..... President

Benediction..... By League

SOME FLOWERS

Miss Lela Lipscomb was showing some very beautiful flowers Wednesday of this week, which were raised by Judge Klump at his home here. One daisy flowered seven inches across, which is above the average in size.

Mrs. G. B. Prather and children of Fairview were in town Sunday afternoon.

Emmitt Keeney spent the week-end here with his brother, D. E. Keeney and family. Emmitt is attending Texas Tech this year.

H. A. McCarty, of Sudan, was a business visitor here Thursday.

Old Fiddlers' Contest At Plainview Oct. 12th, Benefit Of Boys' Work On Plains

Plainview, Sept. 25—An Old Fiddlers' contest will be staged in Plainview October 12th for the benefit of boys' work in the Central Plains area of the Panhandle, sponsored by the Rotary, Kiwanis, and Elk's Clubs of Plainview.

The contest is open to the world, and already several noted fiddlers of this territory have accepted the invitation that has been broadcasted over the Panhandle-Plains area of Texas and New Mexico. The Red and the Black

A Romance of Braddock's Defeat

By Hugh Pendexter

CHAPTER VIII—Continued

"Keep ahead of me," I directed. "We're almost at the mouth of the creek and the cabin is close by."

From the opposite bank of the creek came a dense smoke, and I believed we had been sighted. Yet the cry was different from a discovery-cry. It was too ferocious. They had come upon the scalped Frenchmen and were voicing their rage. I am convinced the dead man served us well by slowing up the pursuit until we had entered the natural opening in the middle of which stood Frazier's cabin. The girl gasped and stumbled, and I almost fell over her. Once more I picked her up this time carrying her cradled in my arms and then threw all my energy into my legs. Howls of triumph sounded in the woods behind me and on my right. Guns were fired, but I heard no sound of the lead.

"I'm all right! Let me down!" she begged.

But the goal was too near. The savages began to show at the end of the woods just as we gained the door with me yelling: "Frazier! Frazier! Open for us. There was no response and my heart sank as I pictured a locked door and the savages doing us to death while we made last gasp. Then my heart beat high as I beheld the rawhide latch string. In another moment we were inside and I was thrusting my long rifle through a loophole. I spotted a heavy Huron as he was scrambling back to cover.

"You're powerful strong, mister," the girl shyly remarked.

There was a quality in her voice I had never heard before, and I gazed at her in surprise. The face was enhanced with color. She threw off her hat and allowed her brown hair to tumble about her shoulders.

"You're a mighty brave little woman," I awkwardly replied. "We'll have to get out of this. But we mustn't be taken alive."

"Lor's me! Fall into their dirty hands! Of course not!"

And from her bosom she pulled forth a thirteen-inch Highland pistol. I always held the Highland to be more showy than useful, as its light weight and large bore made its firing roughly and shot inaccurately. Yet it would remove one very quickly from all fear of the torture-stake.

I took time to rummage about the room, at the shelves and stock of trade-goods, at the smith's tools in the corner, and some guns hanging from one wall. In searching I discovered a most vital necessity was lacking. There was no water in the cabin.

I picked up two kettles and unbarred the door.

"You mustn't go out!" she shrilly screamed.

"We must have water. The creek is near. The Indians haven't had time to circle about to the south of us. You have the two rifles. Watch from the back of the cabin. Don't fire an arrow more than one breaks cover."

"I'll follow!"

"Watch out for me."

I was through the door with the kettles and running toward the creek before she could offer more objections. I reached the water and dipped the kettles full before the savages opened fire. My dash to the creek had either taken them by surprise, or else they had withdrawn a bit to hold a paw woe. I believe they had withdrawn with a few men standing guard; for the firing did not become general until I was half-way back. At that distance from the cabin I heard the girl's rifle go off.

Running gently so as not to split any of the precious water, I was pronouncing my race won when a tall savage emerged from the woods on my left and approached at right angles. He fired an arrow while moving at full speed, and then dropped his bow to draw his axe. The girl appeared in the doorway with my long rifle and leaned the heavy barrel against the end of a log. As the whip-like crack rang out, leaving his companions to kill me leisurely.

With a howl of fear and warning, I dropped the remaining kettle and leaped after him. As my foot touched the threshold, the cabin was filled with a deafening explosion and much smoke, and the savage was falling limply into my arms. I hurried him outside, where he fell on his back, his face blown away. The girl was crouching on the floor, her hair partly concealing her face. The Highland pistol clattered in her two hands, and her eyes glared like a cat's. I was reminded of the scene on Herkese-koop.

"Lead the rifles!" I cried. Then passing from the cabin and falling to discover any of the enemy in the opening, I ran back to the kettle and completed my errand.

With the door secured I surveyed the opening from the rear loophole. Something bronze on the grass, a dozen rods from the forest, attracted my attention and finally resolved itself into an Indian.

"Quick with a gun!" I told her. "There's one out there in the grass."

She sprang to my side with my rifle and gave a glance, and then said: "A mister! He won't hurt nobody."

"That's my first shot when you was gone for water."

"My heart stopped pounding when you went with them kettles," she whispered, winking her eyes very fast.

"There was no danger. We must have water. We'll be clogging with

and talking to herself as she worked. She asked herself if she could find some rawhide strips and in the next breath told herself she could at least make some. Then she was cooing in delight. I stole to the door in time to see a bush move near the mouth of the creek. I stopped its agitation with a bullet from my rifle, but doubted if I had done the enemy any damage. Several shots from the opposite end of the cabin took me to the rear loop-hole. I stumbled over a pile of skins in passing, but had no time to observe the girl. Two of three bullets clunked into the logs, but there was no Indian in sight. "Fearing it was a ruse to hold my attention, I started to the door again and remained there while I reloaded my rifle.

"Lor'ful heart! If you wouldn't keep hyspering back and forth," she complained. "Now you can talk."

And she proudly dragged forward two deerkins, hooped together by short sections of rawhide.

"We'll saddle the ridge-pole with these just the same as you'd saddle or blanket a horse," she explained. "That'll be better than pigs. I'll get up on the roof and throw them over the ridge-pole as fast as you pass em up to me."

The scheme was feasible. It was simple. It would require but a few minutes to saddle the horse with hides. There would remain a slip on each side, but these I could reach from the ground with separate sticks. However, I objected to her mounting the roof.

"Your job 's to pass 'em up to me," she sternly retorted. "My part is as easy as slipping off a wet log. I can be up there before you could get started. If they come at us, I can be down and inside the door in a jiffy. If you see separated out so's we can work fast."

Then she unbarred the door. Before showing ourselves we reconsidered from all sides of the cabin. There was not much danger of a musket ball hitting her slim body; and arrows, to hit the roof, must travel so high as to give us warning. I cattered up several sets of the doe skins and threw open the door. The savages must have been puzzled by our appearance. Some shouting along the woods, air were any lead or arrows fired at us. I dropped the doe skins and gave the girl a wink, and she was scrambling up to the ridge-pole before the waters could guess our purpose. I passed up two skins and she deftly draped them over the ridge-pole. I passed up two more. The Indians woke up and began screaming like demons. Guns began banging and I called to the girl to come down.

"The 'ow can you do it?" I asked. "I told the girl to wait while I took her place at a loophole.

"I'm thinking," the girl remarked—the branch of a tree, moved slightly and I watched it suspiciously—"I'm thinking there's more'n one way to stop a fire. She went on, raising her voice to attract my attention to cleft. I told the girl to wait while I took her place at a loophole.

HATS KEEP COLOR SCHEME; YOUTHFUL PARTY FROCKS

HAVING PURCHASED a new coat or dress, or a velvet ensemble, the next step is to betake one's self to one's millinery. In search of a chapter to accurately match the color of the new acquired costume. Fortunately, the perfect color match need not necessarily imply an expensive hat.

Fall Millinery.

The beauty about the millinery program this season is that even the simplest popular priced felt shapes come in rich, handsome colors which accurately repeat the tones and shades of either the new dress fabrics or cloakings or the fur with which they are trimmed. It is not at all unusual for a woman to order several expensive fells, so as to top each of her early fall costumes with a matching hat.

The midish browns and allied shades are foremost in fall showings. When one enters a shop it almost seems as if autumn browns of every degree had taken possession. The range extends from dark African brown to most alluring coppery shades which fairly dazzle the eye with their brilliant highlights. However, the brown tones have much competition, particularly in the deep wine shades which enter so handsomely into the autumn picture. Then there are the new dark greens, jungle green being outstanding. Light canna and plinky beige, too, are widely sponsored.

When midday tours the shops seeking "perfect-match" colorings, she finds three types of hats are outstanding, namely, the beret, the polo-cloche and toques, the latter including many sorts, from cup shapes to those which are intricately draped.

A dark brown velvet beret, such as one as shown at the top of the group

woman who is "fair and frothy" the news of a changing silhouette is anything but welcome. Perhaps one of the reasons the younger set is so delighted with the idea of a raised waistline is that in youth such an opportunity to accept youthfulness. To her elders, whose avardraps is ever a source of wrorment, the young women of svelte figure flutter about in the simple house dresses of faded, and somewhat faded during the summer, were an object of envy. And the pretty, dainty silks, with their short-waisted, scollinling, sleeveless bodices with bouffant skirts sewed on at the waistline, how they do differentiate youth from its elders! In seasons just past, sweet-sixteen and women of mature years dressed alike, the present trend is toward making a decided distinction between styles for the flapper age and those for the matron.

The charming dress illustrated is one whose semi-fitted fashion tunes to young waistlines. In this quaint, frock of lace and cream-colored mouseline de sole, winsome Mary Nolan, a favorite among Hollywood's screen artists, looks her prettiest. The lace caplet is in keeping with the trend of the vogue as is also the slash of very wide ribbon, which ties in huge loops and streamers at the side. The importance of the bow theme in the realm of fashion cannot be overstated. Indeed, bows have become the

A Sour Stomach

In the same time it takes a dose of soda to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has acidity completely checked, and the digestive organs all tranquilized. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just as good for children, too. Use it whenever ever coated tongue or field breath signals need of a sweeter. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitations do not act the same!

PHILLIPS Milk of Magnesia

Woman may be a conundrum, but she always has a ready answer.

To insure gleaming-white table linen, use Red Cross Ball Blue in your laundry. It never disappoints. At all good grocers.—Advt.

We make a great mistake when we think all men have consciences.

NURSES know, and doctors have declared their seeking quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box.

Aspirin is the trade mark of Bayer Manufacture of Monacoeitecdestier of Salzeitstadt

The package may be a squarer, but he never gives anything away.

HELPED DURING MIDDLE AGE

Woman Took Lydia E. Pinkham's Vegetable Compound

Denver, Colo.—"I have taken six bottles of Lydia E. Pinkham's Vegetable Compound and will take more. I am taking it as a tonic to help me through the Change of Life and I am telling many of my friends to take it. I found nothing better for this to help me. I had so many bad feelings at night that I could not sleep and for two years I could not go down town because I was afraid of falling. My mother took the Vegetable Compound years ago with good results and now I am taking it during the Change of Life and recommend it."—Mrs. T. A. Mizlan, 1611 Adams Street, Denver, Colorado.

and talking to herself as she worked. She asked herself if she could find some rawhide strips and in the next breath told herself she could at least make some. Then she was cooing in delight. I stole to the door in time to see a bush move near the mouth of the creek. I stopped its agitation with a bullet from my rifle, but doubted if I had done the enemy any damage. Several shots from the opposite end of the cabin took me to the rear loop-hole. I stumbled over a pile of skins in passing, but had no time to observe the girl. Two of three bullets clunked into the logs, but there was no Indian in sight. "Fearing it was a ruse to hold my attention, I started to the door again and remained there while I reloaded my rifle.

"Lor'ful heart! If you wouldn't keep hyspering back and forth," she complained. "Now you can talk."

And she proudly dragged forward two deerkins, hooped together by short sections of rawhide.

"We'll saddle the ridge-pole with these just the same as you'd saddle or blanket a horse," she explained. "That'll be better than pigs. I'll get up on the roof and throw them over the ridge-pole as fast as you pass em up to me."

The scheme was feasible. It was simple. It would require but a few minutes to saddle the horse with hides. There would remain a slip on each side, but these I could reach from the ground with separate sticks. However, I objected to her mounting the roof.

"Your job 's to pass 'em up to me," she sternly retorted. "My part is as easy as slipping off a wet log. I can be up there before you could get started. If they come at us, I can be down and inside the door in a jiffy. If you see separated out so's we can work fast."

Then she unbarred the door. Before showing ourselves we reconsidered from all sides of the cabin. There was not much danger of a musket ball hitting her slim body; and arrows, to hit the roof, must travel so high as to give us warning. I cattered up several sets of the doe skins and threw open the door. The savages must have been puzzled by our appearance. Some shouting along the woods, air were any lead or arrows fired at us. I dropped the doe skins and gave the girl a wink, and she was scrambling up to the ridge-pole before the waters could guess our purpose. I passed up two skins and she deftly draped them over the ridge-pole. I passed up two more. The Indians woke up and began screaming like demons. Guns began banging and I called to the girl to come down.

"The 'ow can you do it?" I asked. "I told the girl to wait while I took her place at a loophole.

"I'm thinking," the girl remarked—the branch of a tree, moved slightly and I watched it suspiciously—"I'm thinking there's more'n one way to stop a fire. She went on, raising her voice to attract my attention to cleft. I told the girl to wait while I took her place at a loophole.

"I'm thinking," she remarked—the branch of a tree, moved slightly and I watched it suspiciously—"I'm thinking there's more'n one way to stop a fire. She went on, raising her voice to attract my attention to cleft. I told the girl to wait while I took her place at a loophole.

Frack Accentuates Youth.

played by those who create formal modes, who give to them every possible intriguing interpretation. So conspicuous are bows, a single one dominates the entire frock. While it is very smart fashion to wear a huge bow at the side as pictured, of late the sentiment seems to be to move toward the back, which biases strongly of the return of the bustle effects. Soft tafeta ribbon is particularly well liked for the bustle-bow, and they are caught up over the arm while dancing.

Old Year Dead When Harvest Is Gathered?

That the calendar by which we count our days does not fit in but monotonously with the seasons is pointed out by an editorial in Liberty Magazine.

"It has long been obvious," explains the editor, "that starting the calendar on the first of January is all wrong. The year ends with the harvest, when the last grain is in, the berries are fallen, and the earth has gone to sleep. The closing day of the calendar might well be that one on which we turn away from outward things and ask about the chances of having a little steam heat."

"It is sufficiently on the whole, that the calendar makers will agree to end the year with the fall and begin it with the spring, as is most and proper," concludes the editorial. "We must

Corncob Icecream

By soaking dry corncobs in fragrant oils, such as that of sandalwood, cedar, or clove, and then grinding them to powder, an effective icecream has been prepared, says Popular Mechanics Magazine. While smoke and ashes are produced, and the substance is said to be superior to various other kinds.

Most Widely-Used Letters

The letter "e" occurs more often than any other in ordinary writing according to Liberty. The letter "s" is next in frequency.

THE RED CROSS

Efforts are being made to re-organize a Red Cross Chapter in our town. It should receive the support of all the citizens in the town and community. There is no organization more worthy of support. It renders aid to suffering humanity all over the world of every race and color.

In time of disaster it is usually the Red Cross that is first on the job with food, clothing, medical aid and shelter. In Florida today the Red Cross is at its work, relieving the sufferers in the vast area swept by the tropical storm which laid waste to hundreds of miles of country last week.

It is possible that some day Muleshoe might need just this kind of assistance. We hope not, of course, but still one can never tell, and in the event that it did it would not be many hours till a body of Red Cross workers would have the situation in hand.

Longview News

A number of patrons visited our school Friday afternoon to see the work we were doing in school this year. We were glad to have them come out and extend a hearty welcome for them to come back again. Due to the fact that the pupils had just finished taking examinations and were tired, they didn't do any practical work but we watched a basketball game between the school boys and outsiders. The school boys won by a large score over the outsiders.

The pupils were all back in school Monday morning ready for work and service. They are always on the job and glad to do anything to help make the community better.

We are glad to report that Mrs. Tanner, who has been on the sick list for some time, is recovering. We will be glad when Mrs. Tanner gets able to help us in our work again.

Miss Alma Walker, very prominent young lady of the Baileyboro community, left Friday morning for Lubbock, where she will enter Texas Tech College Monday morning. Miss Walker is an ambitious girl and we hope she makes good in her school work.

The Juniors elected a new Sunday School teacher last Sunday. After a general discussion, Mr. Bell was elected. We feel that Mr. Bell will teach the Juniors better than anyone else we could have selected.

Mr. W. C. Gordon, who has been working in Muleshoe, returned home Saturday and gave an entertainment that night for a number of the young people. They played various games, all reporting a good time. The young people are all proud of Mr. and Mrs. Gordon because they are interested in young people, and believe in them having a good time.

Longview is growing fast. Mr. J. M. Williams, owner and manager of the Longview Merchants, is hauling out lumber to build an addition to his store.

Most all of the farmers of this locality are busy stripping cane this week, getting ready to make syrup. Mr. Joe Young is making the syrup for the people, and as Mr. Young is an experienced syrup maker, we are sure that you will be more satisfied with his work.

REPORTER

West Camp News

This week we had a 'norther' which caused a great loss in the farmers' crops.

Mr. J. A. Morgan and family are leaving for Missouri where they will visit relatives.

Mr. J. L. Herrington is attending to some business in Silverton.

Mr. Charlie Sellers visited West Camp community last Sunday.

Mr. Claude Knowles and his brother Mr. Willie Knowles, returned home from a visit to Memphis.

Mr. and Mrs. Morgan and daughter from Memphis, Texas, were visiting in Rev. W. P. Thorp's home Sunday.

Mr. and Mrs. R. S. House are expecting a visit from their daughter, Mrs. Roy McClendon, who is on her way here from Craig, Colorado.

School at this place is progressing nicely.

Miss Radie Williams, accompanied by her sister, Mrs. W. A. Holder and two children of Vinson, Oklahoma, motored to Amarillo Sunday, where Mrs. Holder met her husband and returned with him to their home in Oklahoma Sunday evening.

Mr. D. H. Williams and Mr. J. M. Gibbs went to Portales this week on business.

A number of our singers attended the singing at Oklahoma Lane last Sunday night.

Miss Nora Lee Dotson had the misfortune of spraining her ankle last week, but is able to be in school at present.

Miss Lillian Adair returned home last week from Abilene, where she completed a course at Draughon's Business College.

Ruby Adair will return to Dallas September 26, for observation of her leg which was operated on for infantile paralysis.

Miss Floyd Thorp was a visitor at the school last Monday.

Misses Radie Williams and Vera Adair went to Amarillo Sunday.

We had singing here last Sunday evening, which was attended by a large crowd. Quite a few young folks and Mr. and Mrs. W. H. Lindsey, of Farwell were present.

Ben Pyeatt, of Memphis, Texas, was visiting Dr. and Mrs. Menefee last week.

The Elite Cafe Will serve a Real Kentucky dinner next Sunday.

TEXAS LEGION LEADS

Membership in the Texas department of the American Legion is the largest the organization has had since it was formed. It is leading the whole country in percentage gains, and before the meeting at San Antonio next month it will have reached 30,000. It is expected that fully one half of these will be at San Antonio. Some camps will be represented there with the full membership. San Antonio is making preparations to take care of all who may come and will give entertainment of a kind that will not soon be forgotten. Even public schools will be closed in order that the buildings may be used for housing and feeding visitors. More out-of-state visitors are expected than ever before have attended a National convention of any kind in Texas.

STATE MAY MAKE CEMENT

Data and plans are being considered by the State Board of Control to present to the next legislature looking to a State-wide cement plant to provide the immense amount of cement needed by Texas in its road construction and other work. The sentiment favorable to a State-owned plant is largely attributed to the impression that has been gained that a cement trust exists in Texas, this impression being due to recent investigations by the Attorney General's department of an alleged trust and its methods. Neither the State nor its citizens should ever have to pay tribute to trusts of any kind.

VOICE AND PICTURES NOW SYNCHRONIZE

New Apparatus Made Available for Schools, Churches and Motion Picture Theatres.

Engineers are now at work on a simplified phonograph device suitable for use in the home.

Gen. J. G. Harbord Radio Corporation of America, at the formation of a new company to be known as "R. C. A. Phonograph, Incorporated."

In discussing the formation of the new company, General Harbord pointed out that although the Radio Corporation, General Electric and Westinghouse had been preparing for several years to market apparatus synchronizing voice and music with motion pictures, public introduction of the apparatus had been delayed until the engineers had achieved "complete practicability" so that it would be as simple to operate as a radio set, at the same time, highly perfected.

"The Phonophone," said General Harbord "is both simple and practical. The essential principle is the recording of pictures and sound on one film. While various methods have been devised for 'talking movies,' experience has shown that the most practical is that of recording pictures and sound on the same film. This is the method employed by the Photo phone. It is now possible to photograph the President of the United States—voice as well as action—and to distribute films reproducing the event throughout the country.

Uses and Operation
"Easily operated reproducing apparatus for use in theatres, schools and churches will be nationally available. An entire opera, musical comedy or drama can be electrically recorded on the film, just as it is acted and heard, and then reproduced from the same film. Whatever can be seen or heard, whether it is a nightingale singing or an army in battle, can now be recorded and reproduced for the eye and the ear. Moving picture dramas with complete orchestral accompaniment, or with music and speech, will be available for nation-wide use.

"Standard films without the sound can be used without any change in the machine. The only thing the operator has to do is to close one switch when he is projecting pictures with sound, and open it when he does not want the sound. Any type of 'talking film' can be used in the machine. The type of sound reproduced to be used will vary with the size of the room in which the pictures are to be shown. The reproducer embodies some of the most remarkable new developments in acoustics.

"Sight and hearing have been the two avenues of approach to the human mind for educational, religion and entertainment. Now one medium combines the appeal to sight and hearing simultaneously, with universal accessibility and availability. The complete practicability of the new art has already been demonstrated, and there remained only the need for an intelligent and serviceable system of manufacture and distribution.

"One can only guess at the many varied uses of this invention as an instrument for the spread of knowledge, for uniting the people of the world closer together, and for the advancement of civilization."

AMERICA LEADING IN RADIO COMMUNICATION

The opening of a new, direct radio channel between New York and Lisbon, Portugal, for the transmission and reception of Radiograms was recently announced by the Radio Corporation of America. The inauguration of this radio circuit adds another spoke to the world-wide communication system which has New York as its hub and radiates to England, France, Germany, Italy, Holland, Belgium, Sweden, Norway, Poland, Turkey, Argentina, Brazil, Colombia, Venezuela, Porto Rico, the Dutch West Indies, and Dutch Galiata. From San Francisco other direct radio circuits join the United States to Hawaii, Japan, the Philippines, Hong Kong and Shanghai, China, the Dutch East Indies and French Indo China. To further insure the continued success of the United States trans-oceanic radio communication the RCA is planning additional circuits for the near future to countries as near as Canada and Cuba, and as distant as Spain, Czechoslovakia, Chile and Siberia.

BALTIMORE, Md. — Richard P. Cleveland, son of President Cleveland, is actively engaged in the campaign to elect Governor Smith President. He is in charge of the speakers bureau in Maryland.

POWDERED MILK PLANT AT BRADY IN NEAR FUTURE

A campaign to solicit \$100,000 stock subscriptions for the erection and equipment of a powdered milk plant at Brady recently got under way. The plant is to cost \$200,000, but one half of the capital is to be furnished by foreign interests.

J. T. Sandifer, of Celeste, was a prospector in this section of Bailey County the first of the week.

BOYS "FUTURE FARMERS" AT WINTERS ORGANIZED

The school boys of Winters have organized one of the first "Future Farmers of Texas" chapters in Texas. This organization for boys who are preparing themselves to be tillers of the soil has organizations in nine states.

Mr. C. M. January, of Dallas, representing the Alexander Film Company, was in the city Tuesday looking after business interests.

TEXAS AND TEXANS

By WILL H. HAYES

Fairs Show Prosperity

The county fairs being held in Texas this fall all report large attendance and greater financial success than ever before. These fairs are held at the busiest season of the year, but the people feel that they can afford to take a few days off from their work to see exhibits of the best products of their communities, to meet their friends, and to exchange experiences and ideas gathered from their activities of the past year. The larger crowds indicate larger prosperity among the people. Good roads make it easier to put the whole family into the car and go whatever distance may be necessary to reach the fairs. Good crops at fairly satisfactory prices provide the family with the "spending money" so necessary to a good time.

The Circus Draws Crowds

The big circus is finding it difficult to provide enough tent space to take care of the large crowds it is drawing this season. The ease with which people can go long distances in a short time has made it unnecessary for the circus to make so many "stands." The circus now advertises over a radius of 100 or 150 miles, and draws its crowds from 75 to 100 miles around, whereas formerly it was an undertaking for a family to drive 20 miles to see the "big show." The automobile has been a wonderful boon to all the people, and it has helped to put more money into the pockets of the circus folks.

Texas Marine Foods

Texas people have little idea of the magnitude of the marine food industry of the State. Fish and shrimp compose the bulk of the salt water products. The report of the Game Fish and Oyster Department shows that for the year closing September 5, 3,841,685 pounds of fish and 2,917,955 pounds of shrimp found their way from Texas waters to markets. Corpus Christi led in fish production 1,023,320 pounds, with Point Isabel a close second with 1,018,395 pounds. Port Lavaca kept its usual lead in shrimp marketing, 1,633,120 pounds. Corpus Christi following with 1,116,000 pounds. Galveston is the leading oyster and crab market of Texas. Other places that contribute notably to the marine food production of the state are Aransas Pass, Port Aransas, Port Lavaca, Freeport, Rockport, Matagorda, Port O'Connor, Palacios and Seadrift.

Elgin, Musical Center

Is there a town of the size in Texas that can beat Elgin as a musical center? Its four brass bands seem to entitle it to first place in band music. Band Director Nicholas directs the Elgin American Legion Band, which has a statewide reputation; the Kluwanas Band, the pride of the town and the county; about the High School Band, and the Senior Band, composed largely of young married people. If there is more musical talent to be found in any other Texas town, I have yet to hear of it, and it is used in a way that is redounding to the reputation of Elgin as a place where the people give attention to the better things of life.

Lee County Negro Fair

The county fair given annually by the colored people of Lee county at Giddings is proving that where they are given the right kind of help and encouragement the people of Texas take justifiable pride in their activities. There are a negro agricultural agent and a negro home demonstration agent in the county and largely through the efforts of these, there are 12 negro community clubs in the county around which the annual fair is centered. Prizes are offered for the best community booth, the best decorated community car in the parade, and the best vocational school exhibit, as well as for live stock, farm products, home economics work and other exhibits. The fair is proving of much help to the colored people in stimulating pride in all kinds of efforts for their race, and it has the whole-hearted endorsement and support of the white people of the town and county.

Profits From Hens

That profit can be made from a small flock of poultry is constantly being shown by poultry growers all over the State who take care of their flocks and keep books to show the cost and the returns. A Cameron county renter presents the figures to show that after paying for the feed for 85 White Leghorn pullets, grown from baby chicks he cleared \$2,42½ cents on each during the year and has added 68 more pullets to his flock. The poultry business was in addition to the cultivation of a 50 acre crop.

Pigs Is Money

A Wilson county farmer has three Duroc-Jersey sows that last November farrowed 32 pigs, of which he raised 59. He has sold 20 of them for \$403.19, and still has the other 10. With the exception of six sacks of shorts, all the feed given them was waste products from the farm.

All These—and "Honest-to-Goodness" Biscuit, Too!

It's so easy to bake perfectly delicious cakes—cookies—pies—as well as breads of all kinds—provided, of course, you use the right flour! And the right flour is made right here in the Southwest from our own Southwestern wheat—as fine grain as can be found in the world. The flour your grocer recommends because he knows it's always fresh and good—always uniform in texture!

"A few cents more in the price of the flour—makes dollars of difference in the baking results."

Texas And Oklahoma To Battle Over The "Old Gray Mare"

San Antonio, Sept. 25.—The battle for the historic "old gray mare" is on again. The war has started and Texas and Oklahoma have taken to the trenches. It is expected to reach its culmination during the tenth annual convention of the American Legion at San Antonio October 8-12 when the Oklahoma Legion plays the rollicking tune as its marching song.

Texas' "Old Gray Mare" band of Brownwood, favorite and star of several legion national conventions, will be on hand and say it is going to give the Oklahoma musicians keen competition when they strike up the old army tune.

Pending opening of the convention, the war of words continues with Gen. Roy Hoffman, of Oklahoma, and W. L. Hood, commander of the Texas department of the legion as the principal speakers.

Hoffman says: Capt. R. E. (Doc) Flynn the leader of the First Oklahoma infantry on the border, stationed at San Benito during the Mexican border trouble, composed the music "The Old Gray Mare" song, not claiming originality but taking parts from other pieces and made the present "Old Gray Mare."

It is distinctly our tune and nobody else. We are going to San Antonio to claim it and anybody who interposes any objection to our authorship is going to get an argument on his hands.

To all of which Wood replies, on behalf of Texas, that the "Old Gray Mare" song was originally composed during the war between the states from an incident occurring in Hood's Texas Brigade, commanded by General John B. Hood, a relative of the Texas Legion Commander.

STATE UNIVERSITY DEPARTMENTS ENLARGED RAPIDLY

Austin, Texas, Sept. 25.—Twenty years ago, the Division of Natural Resources of the University of Texas was merely the Bureau of Economic and Technology, but since that time it has grown until now it includes the Bureau of Economic Geology, Industrial Chemistry and Engineering Research.

This Division is maintained by the University for two purposes. The first and main purpose is to add to knowledge of the natural resources of the state, and for this work there are required the services of men who are specially trained, and who are qualified and disposed to carry on original investigations in their particular field. The second purpose of the Division is the dissemination of information on these subjects to the public which is accomplished not only by publication of investigations but also by assembling and distributing through correspondence and otherwise all available information on particular resources and projects.

CULL FOUR TIMES PER YEAR

The year-round system of culling the poultry flock, that is, culling four times a year, is a practical method of getting a check on production since it will indicate what hens are laying during each season of the year even if it is not the exact number of eggs produced. E. N. Holmgren, poultry husbandman Extension Service, A. and M. College of Texas, said in a talk before the poultry group of the Nineteenth Annual Farmers' Short Course.

This culling should be carried on in the fall, winter, spring, and summer the speaker added. At each culling the layers should be banded with a leg band of different colors while the non-layers and other culls are not banded. In this manner each time the flock is culled the layers are given a good mark in the form of a leg band. "With a year-round system of culling the farm flock will contain the Texas 'Four-Band Hen,' the only kind of hen that can be profitable with low-priced eggs, because she will be an all season layer."—Farm and Ranch.

A Jensen and B. K. Murphy, of B-sque County, stopped over in Muleshoe for a day the first of the week, looking over the country. They had been prospecting in New Mexico and were en route home.

SCOUTING FOR PINK BOLLWORM

Field scouting to determine if any new pink bollworm infestations have appeared in the 1922 cotton crop along the Rio Grande is now under way according to George G. Becker, Entomologist in Charge, Pink Bollworm Field Service of the Plant Quarantine and Control Administration, United States Department of Agriculture.

R. W. White and two assistants are in charge of the scouting work, assisted by a corps of twenty-seven trained men who are thoroughly familiar with the life history and the habits of the pink bollworm. These men have been working in the lower Rio Grande Valley and as the season advances will cover other sections in Texas and Arizona where, in the opinion of the Department, there is danger of infestation.

The conditions under which cotton is produced on the Mexico side of the Rio Grande, together with the fact that the bollworm has been known in the past to be known to occur across from Eagle Pass and Del Rio Texas, provide a source of possible infestation which makes it necessary to keep a close watch along the Mexican border to be certain that any stray invasions of this insect are located as soon as they happened to become established.

It has been found that trash removed from cotton by the cleaners at the gin contains a large number of insects of various species and that the pink bollworm will be very likely to show up in this trash when infested cotton is ginned. Supplementing the field scouting, inspectors examine the gin trash at all gins in territory being scouted in order to prevent an extension of the pink bollworm into the main cotton producing areas of the cotton producing states, by scouting to determine the present extent of infestation and by the enforcement of regulations in the quarantined area which will prevent the insect from being carried into new territory.

THE NEW SOUTH—TEXAS

Airplanes, telephones, radio, smooth highways and railroads have made Texas more compact for purposes of government and business than was the smallest of states a century ago, thus practically disposing of the fear that the area of the Lone Star State would prove too great for practical governmental purposes.

Its integrity, as an entity, safe, Texas—powerful rich in land and resources, and daily gaining in wealth and influence by reason of the "Texas as for Texans" spirit of its people—as look forward to a self-supporting population of ten, even fifteen millions, an annual income by these people of as much as fifteen billions and a place of the very first magnitude among the states of the union.

Some day the surplus drainage of other regions will be brought under control and diverted to West Texas, there to irrigate lands now too dry for the best agricultural results.

Some day industry will rank with agriculture and raw material production in that state.

In half a generation Texas has created an artificial port at Houston being developed as a added precaution in movement of some 12 millions tons. In fifty years it has built an inland city at Fort Worth and increased its population some 5000 per cent.

In a short span of time it has created at Dallas one of the best conditioned cities in America.

San Antonio has become an excellent place in which to live and to develop business. And so the record goes. Everywhere progress. Everywhere promise. For Texas, or for the good of any part of the state, all Texas works in harmony.

The drift of cotton production is westward, to the new, virgin flat lands, where mechanical cultivators and pickers will solve the problem of farm labor and materially reduce the cost of production.

PLAINVIEW IRRIGATED FARM BRINGS SUCCESS TO OWNER

Plainview, Sept. 15.—Typical of what a quarter section of land in the Plainview territory will do under irrigation is the experience of B. W. Wilkes, a farmer of Plainview.

Wilkes has a quarter section of irrigated land north of Plainview, and practices diversification in every respect. One month recently he sold \$350 worth of produce, eggs, cream and chickens. He has 50 Poland Chinas and Duroc Jersey hogs, pure bred 250 fine White Leghorn hens and five Jersey cows. Five acres of oats yielded 65 bushels per acre this year, and his wheat made 20 bushels. His cotton crop is among the earliest in the county, and he has some corn that is very early as a result of proper irrigation.

Wilkes has a splendid farm home with every convenience, including electrically operated washing machines, electric lights, running water and the like.

He advocates the best in livestock. A Poland China sow from his farm, bought from C. L. Franz, took first place last year at the fairs at Amarillo, Lubbock, Wichita Falls, Dallas and Beaumont, and was sold at Amarillo to Lillard and Sons of Arlington, outstanding breeders of Texas. He has 15 pigs which are now being fitted for the fall fairs.

MAGNETIC DECLINATION IN TEXAS LAST YEAR

The Coast and Geodetic Survey, Department of Commerce, has just made available a new publication of particular value to surveyors of this state who are required to use magnetic methods in recovering the lines of old surveys. The publication also contains the information necessary for testing compasses at the magnetic stations established by the Coast and Geodetic Survey, descriptions of which stations are given in full in the publication. With this publication, it is possible to find changes in the magnetic bearings at different localities in the state as time has elapsed. The use of this information for every degree of longitude and latitude makes it easy to find the correct values of any given place.

A copy of this publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., by remitting fifteen cents and requesting a copy of Coast and Geodetic Survey Serial No. 417, Magnetic Declination in Texas in 1921.

Marvin Rankin, of Sour Lake, La., was prospecting here the first of last week.

J. T. Bates, of near Olton, was attending to business interesting here Monday. He stated that conditions in his section were very promising.

A. K. Dean, of Plainview, was a business visitor here Tuesday.

Texas has about 450 incorporated cities and towns.

Eyesight and Health

Have you fully equipped that boy or girl in whose future your hopes are centered, to prepare for the keen competition of later life? No doubt your answer is "YES." For, if you thought anything was lacking, you would of course supply it at once. But are you sure nothing is lacking? Are you sure your child is not struggling under the greatest of all handicaps—DEFECTIVE EYES?

Isn't it plainly your duty to have your child's eyes examined? It is so easy to be sure about this matter. So dangerous to lake chances.

BUTLER ATTACK IS COSTLY TO G. O. P.

Educator's Repudiation of Hoover Swings Many Votes to Smith.

The unqualified repudiation of Herbert Hoover by Dr. Nicholas Murray Butler, President of Columbia University, and President of the Carnegie Endowment Foundation for International Peace, has proved, political observers say, one of the most staggering blows suffered in the present campaign by the Republican forces.

Although many prominent Republicans have renounced allegiance to their party since Hoover's nomination, none, it is conceded, has influenced so many votes.

A slightly esteemed leader in Republican party affairs since 1887, Dr. Butler has attended every Republican national convention for 40 years. In 1912, following the death of Vice President Sherman, who had been renominated, Dr. Butler became the Republican candidate for Vice President. He was one of his party's most prominent candidates for the nomination for President in 1924.

The reaction to his ringing disavowal of the principles enunciated by Hoover in his acceptance speech was immediate and nation-wide. His bold and unequivocal declaration that he could not support a candidate who admitted himself to be in favor of the "continuance of the present reign of lawlessness, debauchery and Government-made crime" brought thousands of letters of congratulation from other dissatisfied Republicans.

In a scathing letter, addressed to the editor of the New York Times, Dr. Butler declared he wished to dissociate himself "quickly, publicly and completely on positions on two of the three most important questions now before the American people that were taken by Mr. Hoover in his speech of acceptance."

Noted Authority
Dr. Butler, who has long been in demand by learned bodies as a speaker on questions relating to international relations and the promotion of world peace, ridiculed Hoover for his "wholly false argument" that the squandering of enormous sums on naval armament would cooperate in the maintenance of peace.

"The contrary is now the well-demonstrated fact," asserted the educator. "Mr. Hoover dismisses with a few perfunctory words the truly remarkable treaty just now to be signed by ourselves and all the great powers of the earth pledging renunciation of war as an instrument of national policy." He added that Hoover's position was mere "swagger."

He criticized Hoover for "accepting the formula of that paid band of agitators, lobbyists and persecutors which calls itself the Anti-Saloon League," and asserted that it is "quite obvious that Mr. Hoover has no conception of the real problem by which the country is faced."

"That problem," averred Dr. Butler, "has not to do with liquor, not with social experiments, good, bad or indifferent, but with the structure and functions of the Government of the United States."
Accusing the Republican candidate of "hypocrisy" and "contradiction" which "would be comical were it not so unspeakably tragic," the educator declared: "No one can be in favor of the principles upon which our Government rests, or of the Constitution itself, and at the same time in favor of the Eighteenth Amendment, because the two are absolutely contradictory."
"Literally millions of Republicans throughout the country," Dr. Butler asserted, are "in full agreement" with him.

HOOPER FARM STATEMENT CALLED "CLEVER DELUSION"

"A very pretty Christmas tree for the American farmer, covered with glittering tinsel and little Christmas bells, but without presents--in other words, a clever delusion."

That is how Herbert Hoover's statement on Agriculture is described by William Hirth, of Columbia, Mo., publisher of the Missouri Farmer, and chairman of the Corn Belt Committee. Mr. Hirth adds:

"Mr. Hoover's message to Agriculture constitutes a lot of cleverly put together bunk that will not fool the thinking farmers of this country. When he admits that after eight years of uninterrupted power the Republican party has failed to meet what he now says is the 'most urgent economic problem in our Nation' he is caught in his own trap and now can he confess this indictment against his party in one breath, and then have the nerve to ask the farmers for his 'rote in the next?'"

NORTH CAROLINA FOR SMITH, SAYS DANIELS

RALEIGH, N. C.--Declaring that Governor Smith's acceptance speech rings true upon the fundamentals of democracy, Josephus Daniels, Secretary of the Navy during the Wilson Administration, predicted that "North Carolina will continue in the democratic column."

"Congratulate the Movies While Sitting at Home"

By ELMO SCOTT WATSON

Coming to the movies while sitting at home? It is possible, if not possible, if not possible, it is not only possible, but it is also a thing which is being done in a number of places. In fact, it is being done in a number of places. In fact, it is being done in a number of places.

Recently there gathered in the television laboratory of the Westinghouse Electric and Manufacturing company a group of radio leaders, among them representatives of the Radio Corporation of America, the National Broadcasting Company, the General Electric Company and the Westinghouse Company, who saw motion pictures which, broadcasted from a station nearby and transmitted on radio waves, were picked up on a receiver in the laboratory and reproduced before their eyes. It was the world's first demonstration of radio movies and possibly the most astounding of the many advances in the science of radio announced during the past year.

While radio movies are still in the laboratory stage, the scientific officials, under whose auspices the demonstration was made, declare that the event heralds the day when the radio listener will sit at home and have that most popular form of entertainment, motion pictures, projected by his individual radio receiving set.

The development of radio movies is a triumph of scientific engineering. During the last summer, the idea came to the mind of Dr. Frank Conrad, in charge of this branch of the company's activities and the fact that in barely two months he brought the device to the laboratory stage in the degree of perfection witnessed at the recent demonstration, is said to have set a record. Radio movies are a step beyond previous developments in television and required the invention of a number of appliances in addition to a great deal of scientific calculation, synchronization of various high-speed mechanisms, and accurate control of light and radio waves.

Although the sending of moving pictures by radio, as may well be imagined, required many complicated and delicate pieces of apparatus, the principles of the art as explained by Westinghouse engineers, are not beyond ordinary comprehension. Photography in its simplest form consists of the producing of spots of light and shadow in the same arrangement as they appear in the subject photographed. The screening of a motion picture, of course, requires that a roll of film be operated at a speed which sends sixteen pictures a second before a projecting beam of light. Because of the structure of the human eye, if a series of pictures follow each other at the rate of sixteen or more per second, the human eye sees it as a single moving picture.

All this the broadcasting of radio movies requires, with the addition that the spots of light which are transformed into frequencies, some of which are in the audible range, transferred to a radio wave and broadcast as electrical energy. In receiving the pictures, the process is reversed, and the electrical energy is picked up, and the frequencies returned to lights and shadows, which when viewed presents the radio movie.

In the first step of the process a pencil of light traverses each picture,

1. The heart of the television motion picture transmitter. The scanning disc is clearly shown as well as the dot of light which is thrown upon the motion picture film. Above the scanning disc may be seen the synchronizing tube which keeps this disc turning at a predetermined speed.

2. Dr. Frank Conrad, assistant chief engineer, Westinghouse Electric and Manufacturing company and inventor of the television motion picture projector. The scanning disc of the apparatus is immediately in front of him.

four miles; two miles from the laboratory to the broadcasting station by wire and two miles back to the laboratory by radio.

To turn these radio waves back into light, an arrangement which permits the use of a mercury lamp is used. By this adaptation the weak radio currents control the action of the many times more powerful current operating the arc lamp. This action may be compared to the action of a radio tube, where the weak radio current on the grid of the tube controls the action of the independent and more powerful plate current.

Thus the mercury arc lamp goes bright or dim as fast as the current changes, and its light at any instant is in proportion to the light that the electric eye sees in the same instant. To return the dots of light to their original pattern, another revolving disc or scanner is also used which is similar to the transmitting scanner. The use of a mercury arc lamp permits the radio pictures to be thrown upon a ground glass or screen, the first time this has been done with television apparatus.

Both these scanning discs turn at exactly the same speed; the hole in the receiving disc must be exactly in the same relative position as the corresponding hole in the transmitting disc. In other words, they must be synchronized.

Westinghouse engineers were the first to develop a feasible method of synchronizing, and their method was by means of radio. From transmitting equipment, which may be located in the broadcasting station, they transmit a constant frequency wave of 5,000 cycles. This wave is produced by a tuning fork and transmitted over a special carrier wave from the broadcasting station. The constant frequency note is received on a special receiver and by means of special apparatus controls the speed of synchronous motors, which drive the scanning discs of both transmitting and receiving radio movie equipment. This revolutionary method of controlling equipment industries, in a measure, the extent to which science must go in order to perfect television or radio movies.

But the developments in radio during the past year, and especially the latest development indicates that the word "impossible" is rapidly being written out of the vocabulary of American electrical engineering genius and that radio movies for all who care to enjoy them are an assured fact.

for radionition will spur on the development.—Science Service.

California's Flowers
Some of the wildflowers of California are: Annuals, California poppy, blazing star, baby-blue eyes, white daisy, blue lupine, clarkia elegant and wild Canterbury bells; perennial (indian paint brush, scarlet larkspur, pride of California, scarlet horse sickle, California fuchsia and white evening primrose.

LEGEND EXPLAINS A PETRIFIED FOREST

Navahos Call Stone Trees Bones of Monsters.

Tucson, Ariz.—The Navaho Indians of the southwest have a strange and fantastic legend to account for the great stone tree trunks whose broken columns stand like sentinels in the region of the famous petrified forest.

In the early days of the world, the Indians say, the sun did not ride tranquil and undisturbed through the sky as he does now. At that time there was a black monster that was continually contesting his supremacy. His name was Yletso, and many were the battles that he and the sun fought.

Lived in a Cave.
This Yletso lived in a cave in the big mountains, and from there he would sally forth and contend with the sun. He had long and strongly muscled arms and powerfully clawed hands. And his bones were of stone. When he stood erect he could reach the sun at any place in the sky.

When he was defeated in his fights he would have to rest many days and during those days these disabled, discarded parts, which were of stone, he threw out from the cave over a ridge from time to time as they got his way. And thus he got pose and ages the stone-wood accumulated.

At that time a boy by the name of Kee lived in a grassed feather home with his mother, Shoomah, and his sister, Zannie. One winter it got very cold. Finally, as they had no fuel, Kee went to the mountains for pitch wood. As he set out before he reached the forest he slept out where he was. Then on the next day he went into the mountains and found wood. His grandmother scolded him and told him to throw the bones away.

Bones Instead of Wood.
When he reached his home it was growing dark the second night. In front of his hogan, where Zannie found him still sleeping when she came home in the morning. She also noted the wood, but their grandmother came out of the house. And instead of pitch wood he had brought bones of Yletso; whereupon his grandmother scolded him and told him to throw the bones away.

In time Kee grew to be a great man. One day and again he visited the mountain where the bones were hidden, and he and his sister, Zannie, went to the bone-wood, and there he prayed to the powers of good to aid him in this battle against darkness.

Thus he saw the great black thing leaping above the mountains to the attack. Quickly Kee called the men to his aid. The sun attacked him with his millions and millions of rays, and, aided by the prayers of the then good people of earth, he drove the monster away.

In this battle of all battles the sun's rays petrified Yletso's body, and his blood, on reaching the earth, was spread in lava flows. Finally he fell back to the earth dead, and the sun mounted triumphantly in the heavens, as he spread his invigorating and life-giving rays.

And the plateau region is still incredibly covered with its bones, called by the Navahos Yletsoitlin, the bones of Yletso.

Trappers Dead Fifty Years Found in Cave

Sault Ste. Marie, Ont.—A long-forgotten tragedy of the fur-trading days is believed to have been uncovered. A prospector reported that he had found two skeletons and a number of rusted old-fashioned muskets in a cave north of Bruce Mines.

The skeletons were lying by the side of a small, well-hidden lake and, until he found them, A. B. Frazer, the prospector believed he was the discoverer of the lake.

Frazer said he was positive no one had visited the lake since the men met their death. The muskets were of a type which has not been used in the North for fifty years. No other articles could be found to indicate when the men died or what caused their death.

Amputees Frozen Toes With a Kitchen Knife

Prince George, British Columbia.—A trapper who amputated four of his toes with a kitchen knife when they became frozen last winter has arrived here for a surgical attention, but was told he had done the job so well no further treatment was needed.

While inspecting his trap line on the upper Finlay river, J. Omer suffered frost bite in his right foot. On reaching home he found that his right foot had become so frozen that he had to travel three days to perform the operation. He then washed the wounds in antiseptic and bound them up.

SURVIVOR TELLS OF SUBMARINE ESCAPES

Milwaukee Man Was in Four Disasters.

Milwaukee.—After having been in four submarine disasters in five years with the navy, H. Redding, twenty-eight, Milwaukee, is still very much alive. Throughout his navy service Redding was assigned to submarine duty as an electrician.

Redding was on the S-48 when it went down with an open hatch off Bridgeport, Conn., with 43 men on board, all of whom were rescued after fighting water and gas fumes for 12 hours. The thing that stands out in Redding's mind is the droll attempt of a machinist's mate to sweep back the ocean with a broom.

"The sub went down for a deep dive, but the hatch had been left open," he said. "Water poured in. This machinist mate was sweeping up water with a broom and was unaware of what had happened, as we all were for several minutes. He kept sweeping and sweeping but the water got too much for him. Finally he went into the control room and told the officers he needed a mop. We soon learned what had happened then."

When the U-4 sank in San Pedro (Calif.) harbor in 1922 after some one inadvertently had opened a torpedo door, Redding was just coming on board for the night.

As he stepped on the sub it began to sink and he stepped off into the ocean and swam to a tender lying alongside. Six men who were asleep were drowned but the others were rescued. Redding had his head and face burned when a battery blew up on the S-37 in 1923. This accident also happened in San Pedro harbor. Six men were killed by the blast.

He was also on the L-5 which dove with an open hatch off the coast of California during the winter maneuvers in 1920. The crew of 22 men were rescued.

Lighthouse Built Amid Tempests on Coral Reef

Washington.—A successful end to an 18 months' campaign to plant a lighthouse on Tubatabara reef in the Philippine Islands, marked by a bitter and ceaseless struggle against the elements, was achieved by the lighthouse service of the Department of Commerce.

A low coral reef set in the midst of a open sea, of shoals, rocks, bays and hurricanes-swept, has been crowned with a 120-foot tower to carry the light that will warn mariners.

Work began on the construction in December, 1923. The site was protected by barricades which swept the barren, low islet. Many days the sun, beating on the white coral, made labor impossible during normal working hours.

Water had to be distilled out of the sea to supply the gangs struggling with the elements. The site was a forest of a high percentage of the working force, but the erection of the light has been proven a necessity to safeguard the sea traffic between Manila and Hongkong and Australia, and the Philippine government kept its forces at the task.

Sea Serpent Has Sheep's Head on Body of Eel

Vancouver.—A nameless marine creature about six feet long, having an eel-like body and a head resembling that of a sheep, was on display at provincial police headquarters here at evidence of the existence of a "sea monster" which many people have reported seeing in Lake Okanagan, in the interior of British Columbia.

The strange creature was caught by the young son of Harry Alexander, Vancouver magistrate, while trolling off the shore.

Tales of the appearance of a monster in the lake have been coming from there for two years.

Most Moral Town

Linx, Austria.—This little town, capital of Upper Austria, claims to be the most moral and best governed in the world. Because of the lack of litigation, the law courts here have closed their doors, the police having reported no crimes or misdemeanors of any kind among the 50,000 inhabitants.

Kemists Turn Backs on Traditional Hero

Constantinople.—President Kemal's forerunner of Western culture fashions, has bowled over the George Washington of old Turkey, Sultan Mahomet, conqueror of Constantinople in 1453.

An article in the official press, signed by a prominent Kemalist, depicts the hero of the national idol, charging that his only motto was "conquest and booty."

The attack on the Father of Turkey shows a fundamental change in the national mentality since the war. The author says that if Kemal had been an aide in 1453 instead of the great sultan the European renaissance would have sprung from Turkey instead of Greece and Rome.

HISTORY IS TAUGHT BY MUMMY FAMILY

Scientists Study Remains of Ancient Egyptians.

Detroit.—A family of Egyptian mummies 2,000 years dead are teaching history to a little group of studious Detroiters.

They are telling curious and amazing things about themselves and others of their kind, who walked the earth ten centuries before the beginning of the Christian era, relating strange facts, revealing long sought mysteries, bringing to life again a splendid civilization that vanished generations ago. Dr. E. A. Mearns, Detroit physician, and Benjamin March, curator of Asiatic art in the Detroit Museum of Art, have joined forces in the study of the mummy family. Sanderson has called upon the X-ray to aid him in his search for further knowledge of these silent spokesmen of the past and his results are complete and thorough knowledge of the artistic side of ancient Egypt, to aid in the unearthing.

Resurrection Endless.
This is an exceedingly novel and original experiment and both men insist that they have accomplished very little by the use of X-rays and other appliances. Both believe, however, that the possibilities of the venture are endless, and express the hope that some day of great value may come out of the study.

"If we are to know and understand the men and women of the present, we must know something of those who lived in the past," says Dr. Mearns. "If we took away all the knowledge we have acquired from our study of dead men and vanished peoples we would be like a child," Dr. Sanderson says. "Egyptian mummies are especially interesting to study because Egypt was the great melting pot 3,000 years ago. No other culture, but the old Egyptian was a masterful man."

Some of the mummies are so perfectly preserved that it is still possible to detect the presence of germs in the stomachs of the children and to tell something of their diet. We find grains, an old form of millet and delicate bits of bread. Indeed, the mummies are so well preserved that they will last for centuries.

Two passive bodies lie still and quiet upon the dissecting tables in the art museum but even in their silence and immobility they speak by the secrets in response to the proddings of skilled scientific fingers, the searching eye of powerful X-ray machines.

March describes the procedure of an Egyptian burial. The embalming of the body so perfectly that today, after the lapse of centuries, the muscles and sometimes the skin are to be seen. The vital organs were removed and placed in four canopic jars, each guarded by its particular god and so protected that they would be easy for the whole body to reassemble itself when the time came to enter into a new life.

The mummies accomplished one thing of definite value. It has demonstrated the method by which the brain tissues were removed from the head without injury to the rest of the body. The muscles and sometimes the skin are to be seen. The vital organs were removed and placed in four canopic jars, each guarded by its particular god and so protected that they would be easy for the whole body to reassemble itself when the time came to enter into a new life.

It has long been assumed by many scientists that this was the method, but it needed the X-ray to reveal it in undisturbed actuality. The X-ray plates which demonstrate this method will be loaned to the University of Michigan for class room study.

Holland Turning From Wind to Electricity

The Hague.—Electricity is playing a rapidly increasing part in the industrial life of Holland, as it is being found that, in spite of their plentiful and handsome windmills, the Dutch are falling very much behind in their output capacity. The capital for financing conversions from wind power to electrical power for other purposes is not always available and, therefore, an international finance corporation has been founded, with a capital of 10,000,000 florins, at Amsterdam.

The holders of this capital are Fiebel and Gutmann and Tedera de Mattos of Amsterdam; Chase Securities corporation and Speyer & Company of New York; Dresden bank and Darmstadt; and National bank of Berlin, and Hamburg bank. Activity will not be restricted to Holland, although the idea and the central organization have originated here, but the chief aim is to be able to supply loan capital of either a permanent or temporary character.

How's Hair Sold

Ticonderoga, N. Y.—A lock of hair, preserved as a memento of Lord Howe, who was killed near here, has been purchased by S. H. P. Peil and placed on exhibit in the museum of old Fort Ticonderoga. The lock was divided among the officers of Lord Howe's regiment, but was later collected by the chief clerk to be able to supply loan capital of either a permanent or temporary character.

Rocket Cars Coming

New York.—Rocket cars are being built in Germany for demonstration at Daytona Beach, Fla., next winter, and the inventor hopes to get a speed of 400 miles an hour.

Radio movies will be received in thousands of homes next winter. Thousands of amateurs and radio enthusiasts will build their own radio visors and early this fall ready-made radiovisors will come on the market. Radiovisors will be the novel and really smart Christmas gift this year. These are the predictions of those behind the scenes in radio experimentation.

Improved Uniform International Sunday School Lesson

(By REV. F. H. FITZGERALD, D.D., Dean Moody Bible Institute of Chicago, 160 15th Western Newspaper Bldg.)

Lesson for September 30

PAUL THE MISSIONARY

GOLDEN TEXT—Christ liveth in me.—Galatians 2:20.

PRIMARY TOPIC—Stories of Paul. **JUNIOR TOPIC**—Paul, the Brave Missionary.

INTERMEDIATE AND SENIOR TOPIC—Paul the Dauntless. **YOUNG PEOPLE AND ADULT TOPIC**—"In Labors More Abundant."

In the review of this quarter's lessons, a good opportunity is given for character study. The interests of the quarter's lessons center in Paul, Stephen, Barnabas, Mark, Luke, Timothy, James and Annas. Assignments should be made a week in advance for the preparation of brief essays by the pupils.

Another method would be to lift out the principles contained in the lessons of the quarter and apply them to the important problems of the world. The following suggestions are offered:

Paul's ideal Education; Evidence of Genuine Conversion; What is a True Christian? What is the Real Missionary Spirit? Who Should Go as Missionaries? Should Religious Differences Be Compromised? If so, How Far? How to be Assured of Divine Leading.

Perhaps the most satisfactory method for adults is to summarize the facts and state the lesson to be learned. The following suggestions are offered:

Lesson for July 1, Paul, by birth and education, had much to be proud of. A godly ancestry, a liberal education might be the heritage of every child.

Lesson for July 8, While Stephen ministered in the synagogues of the church he testified of Christ and met with violent opposition. The ring leader in this opposition was Saul. A man may be conscientious and wrong.

Lesson for July 15, Paul in unbelief zealously persecuted the church, even consenting to the death of Stephen. When his eyes were opened by the appearance of Jesus Christ on the road to Damascus he was transformed into a zealous witness for Christ.

Lesson for July 22, The sight which Paul had of Christ was so real that he at once testified of His deity and His living power.

Lesson for July 29, Paul and Barnabas were sent forth by the Holy Ghost to preach the gospel. They were opposed by Elymus, the sorcerer. Spirit-filled men will most surely meet with opposition.

Lesson for August 5, The preaching of Barnabas and Saul was accompanied with such wonderful signs that the people attempted to worship them as gods. The same people soon moved to stone them despite this horrible treatment. Barnabas and Saul carried on their work.

Lesson for August 12, The question of the grounds upon which Gentiles were to be received was bitterly debated. Paul preached that it was to be by faith alone. Certain Judging teachers taught that faith was to be supplemented by the works of the law.

Lesson for August 19, Paul was forbidden to preach in Asia; then called to preach in Berytus. The right of the Jews to elect a king was denied as just as really shown in closed doors as in open doors.

Lesson for August 26, When Paul's missionary work in Berytus was with the unlawful gain of certain men at Philippi, he and Silas were sent to jail. Through their miraculous deliverance and their testimony of the saving power of Christ, the jailer was converted.

Lesson for September 2, Wicked Jews followed Paul to Thessalonica and Berea. They stirred up the people to such an extent that he had to flee. Wherever he went his ministry was accompanied by supernatural signs so as to convince the Gentiles.

Lesson for September 9, Paul preached the gospel in Corinth with such power that many were saved. The gospel the power of God unto salvation.

Lesson for September 16, The church was threatened with disruption through party spirit. The right conception of the gospel, Christian ministers and persons constituting the church will cure sectarianism.

Lesson for September 23, The Christian should abstain from that which might cause his brother to stumble.

Love One Another
Let us love one another whilst we live! I would speak for a kind word on behalf of those who are stirring next you and making your own house glad by their soft fingers and their loving hearts.—Joseph Parker.

Serving God
Serving God just where you are, with what you have, and nothing else God requires nothing more; He will take nothing more. It is yourself in your own position, wherever you are that He wants.—Margaret Slattery.

They Will Be Done
To do or not to do, to have, or not to have, I leave to thee; but the things to be done in me, all my requests are lost in one, "Father, they will be done!"—Charles Wesley.

LITTLE BAND-WAGON JOURNEYS

EDITED BY L. T. MERRILL, JR. (16, 1925, Western Newspaper Union)

Webster's Presidential Aspirations

HAROLD Ivesener for Presidential honors that hour Clay was that other illustrious member of the Whig party, Daniel Webster. Though on two occasions he had to play second fiddle to Clay, he was true with Webster, as with the great compromiser from Tennessee, that too many null party heroes were the chief stumbling blocks to his Presidential ambitions.

Clay was passed over three times by his party for old generals. Webster had to stand aside four times while military men of mediocre political ability became the nominees of his party.

And the bling irony of it is Webster's case was that of one who was thrust away from him what would have meant a term in the White House when he refused to accept proffered nominations for the Vice Presidency.

As the Lincoln-Douglas debates made Lincoln an inevitable Republican candidate in 1860, so Webster's famous reply to Senator Hayne of South Carolina in 1850 on the subject of nullification marked him at once as a Presidential possibility with nationwide fame. However, he stepped aside in 1852 for Clay. The latter's defeat whetted Webster's ambitious for 1852, but when Gen. Winfield Scott and Henry Harrison got the nomination on the strength of his military reputation.

Webster was confident of the nomination four years later. "I think I shall be elected," he declared. But Thurlow Weed, astute New York political boss, expressed doubt. "It looks to me like Harrison," he said. "I would not bet on Webster."

When asked whether he would be a running-mate on the ticket with the general in 1850, Webster promptly declined. Had he accepted, the nomination would have been President a month after the inauguration. For "Old Tip" died within that short time after August 18, 1852.

The nearest Webster came to being President that year was in helping Harrison revise his inauguration address. Webster's military fame was not sufficient to carry him to the White House. He was defeated by Fremont and Fremont was not nominated.

Webster declared he was not a candidate in 1854, but in 1858 he had high hopes of winning the coveted prize. Again he thought he had it within his grasp, but again Thurlow Weed prophesied to him that another Illinois soldier, Gen. Zachary Taylor, would get the nomination.

"Why Taylor is an illiterate from the colonel who hasn't voted for forty years," Webster exclaimed in surprise. Once more it was proposed that he accept the Vice Presidential nomination, and once more Webster declined, his eyes firmly fixed on the higher prize. Again the President died while in office, and Daniel Webster would have been President a month after the inauguration. For "Old Tip" died within that short time after August 18, 1852.

Four years later Webster still fondly cherished the hope of being the Whig nominee but yet another military man blocked the way. Gen. Winfield Scott was the Whig standard bearer in 1852. Daniel Webster, whose famous Seventh of March speech, with its uncompromising attitude on slavery, had alienated large groups of northern supporters, failed to get out of a total of 223 in the convention.

Clay, when thrust aside for Harrison in 1850, nevertheless supported him in his election campaign. But he balked at supporting Taylor. Webster, who had supported both Harrison and Taylor, finally balked at supporting Scott.

The great New England orator took his final convention defeat with at most fervent solemnity. It may have been his death blow, for he left Washington soon afterward and died a few weeks later on his farm in Massa chusetts.

The Whig party was dying, too, and in the next campaign was to appear in the new-born Republican party challenging slavery rising to victory in its second campaign and beginning a long and for the most part successful dual struggle with the Democratic party, which up to that time, had had little really effective opposition for the Presidency.

The Charitable Aunt

Silvius, the Roman tells in his memoirs of an old man who lived at his home for years. He had been an object of charity all her life, she imposed on her parents as a girl, and on a husband when married. For years, she was a task to her children, and other relatives. Silvius says he never found his aunt in tears. Being asked what troubled her, she replied that she was in debt to the government for the poor; she wanted Silvius to give her a great amount that she might be charitable.—E. W. Howes's Monthly.

Encore

"You're the most wonderful girl in the world. You are the object of my dreams the light of my life the hope of my home, my inspiration and my joy. I never have had a dream conquer the world for you. I would do my life for you? Will you be mine?"

"No, you love me, Tom?"

The "Know-Nothings"

NATHAN-FRANCIS FOSTER was the first Presidential year since 1856 when a religious issue promised to attract great attention in a national campaign.

As he looked back to that contest of 17 years ago, it must seem remarkable that the religious issue for the moment almost overshadowed the issue of slavery extension on which opinion had crystallized in the formation of the Republican party.

The religious issue sprang out of the formation of the American party outgrowth of the Order of United Americans, whose members stood strongly for native Americanism and professed hostility to the Roman Catholic church. The order was hush and secret, and its members became popularly known as the Know-Notthings because of ignorance of even the existence of such an association professed by all its members.

At the time when it was at the height of its power, Horace Greeley predicted it would destroy the party in its career rapidly, and vanish as suddenly as it appeared. It may last through the next Presidential canvass; and it would seem a device of the elements of persistence as an antichlorine or anti-partisan party would be.

"Old Horace" was right in his prophecy, but while the American party lasted it wielded considerable influence. It gained increments of strength from the dying Whig party, which was mortally wounded by the election of 1852.

The Whig party was satisfied for death because it regarded the compromise of 1850 as definitely settling the slavery question. That position was not satisfactory to a large group of Whigs. Abolitionists and northern Democrats who united in the new Republican party.

The Whigs hoped that the issue of native Americanism would, for the time, swallow up the issue of slavery but it was a vain hope, for both issues flourished side by side in the canvass of 1852.

The Know-Nothing party carried forward its principles in a platform that demanded denial of public office to any but native-born Americans; demanded the requirement of an American residence of 21 years before naturalization could be granted; and attacked the "free soil" movement of office members of the American party.

The new party presented for the Democrats a challenge as serious as that which they had met in 1852. It was a thing into their midst four years ago by the Klan, with its somewhat similar tenets of faith. But on the issue of condemning secret orders with religious and political objects there was no contest in the Democratic national convention of 1856 at Cincinnati such as evidenced the party gulf that had been opened by the platform of the Union of states having been laid in, and its prosperity, expansion and pre-eminence example of free government in its various parts. The platform of 1856 came out with a series of unopposed resolutions declaring that since "an adverse political and religious test has been secretly organized by a party claiming to be exclusively American and it is proper that the American Democracy should clearly define its relations thereto and declare its determined opposition to all secret political societies, by whatever name they may be called. It is resolved that the formation of the Union of states having been laid in, and its prosperity, expansion and pre-eminence example of free government in its various parts. The platform of 1856 came out with a series of unopposed resolutions declaring that since "an adverse political and religious test has been secretly organized by a party claiming to be exclusively American and it is proper that the American Democracy should clearly define its relations thereto and declare its determined opposition to all secret political societies, by whatever name they may be called. HIGH BLOOD PRESSURE

SAFELY, INEXPENSIVELY REDUCED AT HOME

High blood pressure is the forerunner of apoplexy paralysis and Bright's disease.

Eczema, pimples and rheumatism are the other ailments caused by high blood pressure and impure blood.

REDUC-IT—A Compound of commercial salts, correctly prepared by registered pharmacists is **GUARANTEED** to purify the blood and reduce the blood pressure, or money refunded.

REDUC-IT—is entirely free from potassium iodide or other strong drugs and for that reason positively will not injure the heart or stomach.

REDUC-IT—At only \$2.75 per box, postpaid to any address in the United States, will prove a very inexpensive means of reducing high blood pressure and improving health. Mail orders to

Denver Research Laboratory

P. O. Box 836 Denver, Colorado

Without the slightest obligation, we will be glad to send you a scale showing what normal blood pressure should be between the ages of 20 and 70. Ask for it.

Town Talk

Mrs. M. F. Collins, of Lubbock, was carried to Lubbock Sunday to undergo an operation for an abscessed appendix. The operation was successfully performed Monday morning and latest reports are that she is recovering as quickly as could be expected. She was accompanied to the hospital by Mr. Collins and J. M. March.

FOR SALE—One Jersey cow, young and fresh. See Mrs. J. W. Gregory, 7 miles west of Muleshoe. 1tp

Editor Grady G. Roberts, of the Chillicothe Valley News, and Mr. Albert Curry, shop foreman of the News, were Muleshoe visitors last Saturday, spending Saturday night with Mr. and Mrs. C. S. Holland.

OPREA STAR MAY BE FORCED TO PAY DUTY ON CLOTHES

Washington.—Henry D. Bulkeley, New York attorney, today entered an appeal with the customs bureau against a New York customs ruling that Ganna Walska, opera star, pay duty on about \$2,500,000 worth of clothing and jewelry she brought to the United States.

"Everything in her 18 trunks is necessary for her personal use during her visit," Bulkeley said. "Madame Walska plans to remain in the United States only five and one half months, engaging in a concert tour and visiting her husband at Chicago."

What Does Your Child Want to Know ?

Answered by **BARBARA BOURJAILY**

HOW DEEP IS THE SEA?

The deepest parts are said to be A full eight miles or more,

The average depth the soundings

is nearer three or four.

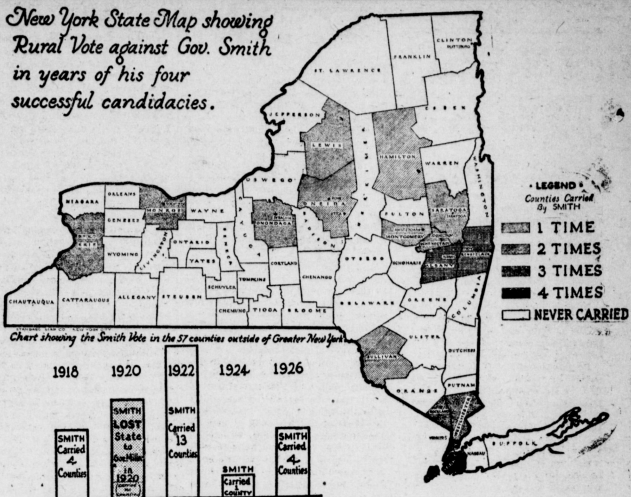

(Copyright)

"Rand" Literally Border

"Rand" is a Dutch word meaning "border or edge." It is used in South Africa to describe the low rounded range of hills. It is specially used as an abbreviated form of the name "Witwatersrand," an elevated ridge in southern Transvaal. The Rand is famous for its gold-bearing reefs and the word is often used as a synonym for the mining industry carried on over a great part of the area; also for Johannesburg, the city which this industry created.

Smith Has Never Carried Rural New York

New York State Map showing Rural Vote against Gov. Smith in years of his four successful candidacies.

An analysis of election returns in New York State in the past 5 gubernatorial elections, made by the research department of the Republican National Committee, shows an abiding strength in his own State. According to these figures Smith at no time has carried more than 13 of the 57 counties outside of Greater New York. This was in 1922, when he was defeated by Miller he failed to carry a single one of these 57. In 1924 he carried one and in 1926 four.

NOTICE TO BIDDERS

The Commissioner's Court of Bailey County, Texas, will receive bids at Muleshoe, Texas, on October 22nd, 1928, for the purchase of one or more 60-horse road tractors and one 12-foot road grader.

Wm. G. KENNEDY, County Judge, Bailey County, Texas
At Muleshoe, Texas. 33-4tc.
September 22, 1928.

DENTAL NOTICE

Dr. Frost, Dentist, of Amarillo, will be in Muleshoe again Monday, October 8th, for three days only.

Mrs. O. N. Jennings was taken to the hospital at Lubbock last Sunday.

Misses Elsie Green and Opal Stevens left Sunday for Canyon, Texas, where they will attend college.

Joe March and family were dinner guests of Mr. and Mrs. T. E. Arnold last Sunday.

CANCER Free Book

Sent on Request
Tells cause of cancer and what to do for pain, bleeding, odor, etc. Write for it today, mentioning this paper. Address Indianapolis Cancer Hospital, Indianapolis, Ind.

THE most surprising feature of the Hoover-Curtis campaign is the type men and women who have been drawn into the political war by personal devotion to the standard bearer, Herbert Hoover.

Men and women who have never participated actively in politics are coming to National Headquarters in Washington, offering to serve in the humblest capacities. Women, whose closest contact with Mr. Hoover during the war was the wearing of Hoover aprons and carrying out his food conservation plans, are giving up their vacations and sitting behind desks in the mid-summer heat, doing routine tasks.

Sometimes I study these people and wonder, "What is the hold which Mr. Hoover has on any man or woman who has ever worked with him?"

The other day I met a man who I knew must have left an important post to his subordinates. I learned that he was spending four days of each week in Washington and three in New York, often working in his home office on Sunday to tie up loose ends. And in Washington he is working unobtrusively, without title, without any particular credit.

Quite frankly I asked him why. He replied with equal frankness: "I don't know that you will understand, but it is this way. When the United States jumped into the World War, I was caught in London, milling around with what seemed to be a million other Americans. My letter of credit was of no earthly use to me. Some one told me that the only man who could help me to get passage home was a chap named Herbert Hoover. I went to see him. A quiet, efficient looking fellow who listened in silence while you presented your case. Usually he cut right through red tape. But not for me."

"Think you ought to go home?" he asked.

"Sure. My firm's got the chance to do an smashing business. I can take them some first hand information. I ought to get something big out of it."

"For a few seconds he made no comment, then—

"Couldn't you make up your mind to stay here? We're going to need men like you. You're strong and you seem to have no family responsibilities. Your firm has other men on the ground. Here there are bigger things for you to do. Service you will never forget or regret. Belgium Relief. Human lives to be saved. Big-ger than dollars."

"I worked with Hoover in Belgium and on the Food Administration. That was over ten years ago, but it did something for me. I don't say I owe my present business success to that experience, though working with Mr. Hoover was a liberal education, but it certainly injected the human element into my business relations. Made my whole life richer.

"So I am back, working for Hoover because he will make the best and most human president we have had since Abraham Lincoln."
