COUNTY AND STATE OFFICERS

Regardless of political beliefs or of personal favor for one presidential candidate or the other, the most important one while every citizen of voting age can perform on November 6 is to go to the polls and vote. It is the one day in every four years when one voter's personal say-so is just as important and has just as much weight as the voice of any other man or woman in the United States.

There is another reason why every voter should go to the polls on November 6 besides that of voting for or against a candidate for president. All United States congressmen will be elected on that day as well as all members of the house of representatives and half of the senators in the state legislature. There are offices to fill on the state supreme court and on the state court of criminal appeals.

Besides all of these there are county officers to elect, including the sheriff, the treasurer, the county attorney, county judges and the county superintendent of schools.

It is important what kind of men we send to congress and to the state legislature and to preside over our courts. It is even more important what kind of men or women we put into our county offices. We have to live with these county officials. They enforce our laws or fail to enforce them. They run our schools. They look after our roads. They spend most of our tax money. We should make no mistake about selecting the best man or woman for each one of these offices regardless of which side the ticket he happens to be on.—Carl Williams, Editor, Oklahoma Farmer-Stockman.

UNDOUBTEDLY FAST

"The fastest stenographer I ever had," remarked the languid business man, "was able to jump up from the arm of my chair and be sitting sedately in her own, ten feet away, exactly three seconds before my wife entered the office."

A SINGLE VOTE THAT COUNTED

At this particular time it is worth mentioning the following quotation from the political observations of Richard T. Greener:

"In 1811 a Rhode Island farmer failed to release his pig from a fence and arrived at the polls too late to cast his vote. The Federalists lost that precinct by one vote; as a result a representative who favored war with Great Britain was elected to the legislature, which in turn by a majority of one elected a United States senator who favored war. Then the Congress, by a majority of one declared war generally known as the war of 1812."

Mr. and Mrs. D. E. Keeney and Mr. and Mrs. J. M. March attended the Halowen festivities at Clovis Wednesday evening.

A REAL OCTOBER SALAD

Do not allow yourself to get away from the daily salad habit, now that the weather is getting colder, and some of the usual salad ingredients are not at hand.

Health demands plenty of green vegetables and fresh fruit, in winter time as well as in summer. Here is an exceptionally good little salad that may be prepared at this season—at very little cost, too.

Peel oranges and remove all white skin. Cut into one-fourth inch slices and cut each slice into halves. Dice celery and apple and mix with mayonnaise. Arrange a circle of half-slices of oranges on a lettuce-covered salad plate, fill center with apple and celery mixture, and garnish with celery tips.

Fruit Muffins And Pancakes

FROM hot cross buns for Easter to pancakes on Shrove Tuesday, quick breads maintain a proud position in our menus. Every one loves the airy popover, the luscious muffin, or the tender biscuit. But sometimes—for instance, when company comes—you want to have something just a little special, something more unusual than a plain hot bread. So why not dress them up in party clothes by adding a little fruit to the batter? You can't imagine how good the fruit biscuits and muffins will be until you try them. And they are simple to make, too.

Prideful Economy

Here are a few recipes which were worked out by an enthusiast for canned fruits.

Pineapple Pancakes: Mix and sift two cups flour, one-half teaspoon salt, and four teaspoons baking powder. Add one beaten egg, mixed with one and one-fourth cups milk,

one cup crushed Hawaiian pineapple and one tablespoon melted fat. Bake on a hot greased griddle.

Blackberry Muffins: Mix and sift two cups flour, three tablespoons sugar, four teaspoons baking powder and one-half teaspoon salt. Add two well beaten eggs mixed with one cup milk; stir in three tablespoons melted butter and three-fourths cup drained, canned blueberries. Bake in greased muffin tins at 400 degrees F., for twenty to twenty-five minutes.

Wholesome Cherry Muffins: Beat one egg, add two tablespoons sugar and one cup sour milk. Mix and sift one cup flour, one and one-half teaspoons baking powder, one-half teaspoon soda and one-half teaspoon salt, then stir in one cup whole-wheat flour. Mix with the egg and milk mixture, and add four tablespoons melted butter and one-half cup drained, canned red pitted cherries. Bake in a hot oven for twenty to twenty-five minutes.

Speedometer in Use Long Before "Autos"

It may surprise those complacent people who think that everything that counts was invented within the last century, to hear that speedometers—and they seem pretty modern devices—were brought into use centuries ago.

Admittedly they did not tell, by themselves, the rate at which you were traveling, but with a clock hung alongside them you could make a guess good enough for olden days, when speed limits and police traps were unknown.

Evelyn, in his diary, writes in 1657: "I went to see Colonel Blount, who showed me the application of the way-wiser to a coach, exactly measuring the miles and showing them by an index as we went on. It had three circles, one pointing to the number of rods, another to the miles, by 10 to 1,000, and still the subdivisions of quarters; very pretty and useful."

What would Evelyn have said if he could have foreseen the pace the modern speedometer has to register, when holiday makers race home and tell the magistrate, a few days later, they were doing 15 miles an hour?—Continental Edition, London Daily Mail.

Small Boy Definitely Eliminated From Game

Several little girls were "playing house" on a side porch when Albert, three years old, emerged from his home on the opposite side of the street in search of excitement. He was at once greeted with enthusiastic shouts.

"Come on over, Albert! We're having a lot of fun."

After looking up and down the street for approaching motor cars he stalked slowly across, but his face bore a look of evident disgust when he perceived the nature of the entertainment offered him. A small table had been set with doll dishes and he was told he was to be somebody's "little boy" in the domestic scene about to be enacted.

For a time he stood about, silent and making no effort to join in the proceedings. Then he deliberately walked to the little table and laid it in a vicious shove, upsetting it and scattering the little dishes all over the porch. In the horrified silence that followed this crime, he an unspoken solemnity.

"I'm a bad boy and I've gotta go home."—Kansas City Star.

Fashions' Odd Origins

Many and various are the causes which have brought certain fashions into vogue. Some are whimsical and even boys have contributed to bring about a style of dress which flung (for a time) and then passed into the realm of antiquities. It is even a battle has been the cause of setting a fashion. At the battle of Steinkirk, fought on the morning of August 3, 1622, the French were victorious and to commemorate that victory it afterward became the fashion to wear the neckcloth in a regular manner. Hence the origin of the Steinkirk cravat, as it was named.

Happiest Men Married

Who is the happiest man known as the happiest man in "anterie, a suburb of Paris, was married recently. His wife gave the popular bridegroom a fitting celebration. Grinman and his bride were conveyed to the mairie in a wheelbarrow that had been decorated with leaves. Signs on it told of the approaching ceremony. As Grinman pulled the vehicle through the streets Grinman was compelled to wear a fantastic cap, huge goggles and scarf and to carry a cushion basket filled with edibles and other gifts. Other wheelbarrows carried the guests.

Remarkable Resemblance

In one of the Indianapolis high schools, on the first day of school, a teacher was calling the class roll. Being absent-absolutely at the boy who had responded and remarked: "Didn't I have your brother last semester?"

Student (who had failed and was repeating the course): No, sir. That was I.

Professor (still absent-absolutely): Remarkable resemblance! Remarkable resemblance!

Earliest Photography

The daguerrotype photographic process was named after its discoverer, Louis Jacques Mande, Daguerre (1788-1851), who revealed that "the time required to procure a photographic copy of a landscape is from 7 to 8 hours, but single monuments when strongly lighted by the sun, which are themselves very bright, can be taken in about 3 hours." From this to the motion picture of today one can estimate the progress made in this art during the century.

Valuable Paving

Lendville, Colo., is paving its "streets of gold" with concrete and the Portland Cement association announces that assays during the grading showed the earth actually contained gold. Its source was supposed to be the sifting of the lines of ore-bearing wagons of gold boom days, and the gold mine material with which it was paved originally.

TEXAS AND TEXANS

By WILL H. HAYES

Good Roads and Hotels

Ten or more years ago most people thought that the building of good roads would ruin the hotel business in the small cities and towns of Texas—that everybody that travelled the roads would want to get to the large cities to spend the nights. The cities began building larger and better hotels and found them filled with travelers. Some of the progressive small cities decided they would compete with the larger places for the tourist trade and erected better hotels. These at once proved profitable. The hotel building quickly extended to most of the towns located on improved state highways, and it has been found that wherever hotels are erected in progressive towns on good roads they pay from their opening. It seems to be almost impossible to build too many hotels, if only they are modern and prices are reasonable. Even in towns where the old and antiquated hotels have long been unprofitable, the new hotels make money.

New Braunfels Builds

For a long time people who have occasion to go to New Braunfels have wondered why so good a town on a much travelled road has been so long without a modern hotel. It is true that the hotel there—a good one of its kind—is seldom crowded, but those who know the history of hotels and thought a modern hotel there would pay as well as at any other place of the size in Texas. At last the town is to have such a hotel and it is confidently expected that it will be filled with guests who will want to tarry in the beautiful and quaint old town.

Lampasas Offers Bonus

Lampasas was once noted for its large hotel overlooking one of its beautiful parks. People were drawn there from all over the state to enjoy the comforts of the hotel and drink the sulphur water for which Lampasas was a well-known health resort. The hotel burned and was not rebuilt. Visitors quit going to Lampasas in large numbers. The parks were neglected and soon had a dilapidated look. The growth of the town almost stopped, and it was thought centered there was drawn to more progressive neighboring towns. Lampasas has the appearance of being half asleep most of the time. Its citizens are beginning to wake up and they are now offering a bonus to get a modern hotel, in the hope of getting back much of the town's lost prestige. It doesn't pay a town any more than it pays an individual to become too contented.

Root Rot Losses

A trip through the best cotton section of Central Texas reveals something of the immense losses from cotton root rot, there being thousands of acres on which no cotton has been produced this year, although the land was well cultivated. It looks like poor business judgment to keep these lands planted to cotton. Farmers should at least for a time stop planting the infested spots to cotton and try to build up the soil with legumes or such crops are susceptible to root rot. Experts are doing their best to combat root rot, but it can't be done in a year or two and certainly the soil that has not produced any cotton this year can hardly be expected to prove profitable in cotton next season.

Heavy Train Trucks

The next session of the legislature will likely be called on to do something to regulate the weight of motor truck loads on the roads. Heavy gas tanks of three trucks in one train may now be seen on the Texas highways. These are said to haul as much as 6,000 gallons of gas in one train. It is not infrequent to see trucks with trailers loaded with 20,000 or 25,000 pounds of cotton. These trailer trucks are dangerous to travel and especially on the sharp curves on some roads. They are "road hogs" that are difficult to pass or to meet with safety. They wear away the best roads and bridges out of all proportion to their value to commerce and the part they play in building and maintaining the roads.

San Saba Fertilizers

Mixing and shipping fertilizers is expected to become a leading industry of San Saba, when the plant now in operation gets under way. Texas has been spending thousands of dollars for fertilizers, but geologists now say that the fertilizer industry is soon to become as profitable as the oil fields of Texas.

Flatonis Box Factory

Flatonis reader writes to say that San Antonio is by no means the only place in Texas where boxes and crates are manufactured for the use of Texas gardeners and fruit growers and that Flatonis has an industry of that kind starting an extensive business. This columnist is glad to spread the news and to add that there are several other such factories in the State, all of which are prospering.

Between Your Brakes and The Road

Suddenly, desperately, down goes your foot on the brake! What happens?

Does every part of the braking mechanism function perfectly—only to be nullified by the failure of the tires to grip the road?

This won't happen if you ride on Goodyear Balloon Tires with the new All-Weather Tread.

Between your brake pedal and the road is a positive connection—the big, tough, sharp edged blocks in this famous Goodyear tread pattern. These blocks are placed in the center of the tread where they belong. They are deep-cut and rugged so that their non-skid effectiveness lasts for thousands of miles.

The Greatest Name in Rubber

When you need to start or stop, they bite down through the sand or mud or snow to firm footing beneath, *seize* and *grip* and *hang on*, carrying your car forward or bringing it to a stop as the need may be. Goodyear Balloon Tires are surefooted, skidless, safe, and they are long-wearing, smooth-running, good-looking as well. This rare combination of desirable qualities has given them their present position as "the world's greatest tire."

FARM AND RANCH SEEKS PROTECTION FOR GOOD NURSERYMEN AND FOR THOSE WHO BUY TREES

As a companion to its campaign for the protection of Southwestern farmers and the producers and distributors of good agricultural seed against the seed bootlegger, the dishonest seedman and the indifferent distributor, Farm and Ranch has taken a determined stand for better nursery stock. It will not let up one iota in its fight for better seed, but will conduct the campaign with ever-increasing energy. At the same time, Farm and Ranch will undertake to render the same kind of service to the buyer of fruit trees, shrubs and other nursery stock.

There are some fine nurseries and some good nurserymen in every Southwestern State, and Farm and Ranch would protect them from unscrupulous growers and dealers, as well as protect those who buy trees, flowers, shrubs and vines, only to be disappointed after several months or years of careful nursing. Farm and Ranch will devote considerable space to planting and care of trees and vines for every failure cannot be charged to bad or diseased stock. Many farmers have purchased good trees and have set them out with their own eyes and neglect them and permit them to die of disease.

The laws of the various States in the Southwest appear to be adequate for the protection of nurserymen and those who buy. The enforcement of these laws is inadequate because the Legislatures of the various States have failed to realize the importance of the industry and have not provided for sufficient inspection. Texas, with 2,000 nurseries within its borders, and with hundreds of nurserymen shipping their stock into the State, has four inspectors. J. M. Del Curto, chief inspector for Texas, says that fourteen inspectors adequately paid would not be too many. Oklahoma has only one inspector and the most of his time is taken up in the office. Oklahoma could use four or five additional men. The same handling exists in other States, and until this is remedied there is little opportunity to improve the situation. All that we can hope to do is to uncover the frauds and dishonest transactions and send out warning to our readers against the fly-by-night salesmen who are long on promises and short on performance.

Another source Farm and Ranch will render more efficiently, if possible, than in the past, will be found in an effort to keep its columns free from any advertisement that might be misleading to its readers. Farm and Ranch has always endeavored to protect its readers in the purchase of plants through its advertising columns. Further safeguards will be thrown around this class of advertising and the protection extended to all kinds of nursery stock. Advertisers will be required to sign a specific agreement which will insure that they deliver exactly what they advertise and to make good any mistake or error which may be made in filling orders, either by replacing the plant, shrub or tree, or by a prompt return of the buyer's money.

It will also be the policy of Farm and Ranch, as in times past, to exercise its right to refuse advertising from persons or companies who cannot provide evidence of their responsibility. It must be understood that in the classified columns where from 200 to 300 individuals advertise, it is physically impossible to make personal investigation of each. Nevertheless, Farm and Ranch will exercise more than ordinary care in accepting classified advertising and will refuse space to any individual or concern upon receipt of evidence that they are not keeping their word with buyers.

Editorially, and in its news columns Farm and Ranch will encourage home orchard plantings and home beautification, rendering the farmers of the Southwest such assistance as is within its power in the practical promotion of this work. To that end, articles will be published from time to time on various phases of the subject. Information will be given on the planting of trees, vines and shrubs. Articles on the care of home orchards will be used in proper season, and such other help will be given as within our power.

About Ford Radiators

In the Highland Park plant of the Ford Motor Company at Detroit, there is a machine which tries with all the efficient finishedness of an engine of destruction, to shake the life out of a Ford automobile radiator in the shortest possible time.

Ten hours is the time allotted to this machine, known as an "agitator," to do all within its power to ruin a water-filled Ford radiator. At the end of that period the much abused radiator is taken off the machine and examined by experts for any signs of damage and a brand new Ford radiator, also filled with water, is put on for another ten hours of torment.

This agitator device is part of the testing equipment for radiators that are being built for the new Model "A" Ford car. When you watch it jiggling and jolting and shaking the surging radiator, you have a feeling that no automobile driver could drive a car over roads and at a speed which give it such a severe-shaking up and still hold on to his wheel and his seat.

Then the factory foreman tells you that within the period of ten hours this agitator gives the new radiator more and severer jars and jolts than the average Ford "A" will get in its whole lifetime of service.

And he tells you also that the great majority of radiators tested on this agitator come through the ordeal without a sign of injury. Those that spring even the smallest leaks are rare indeed.

Then the foreman takes you through the radiator factory and shows you why this is so. He shows you that every part of the radiator which is touched by water is made of either copper or brass, which will not rust and which will resist corrosion to a high degree. He shows you also that the construction of the entire radiator is rugged and strong—parts welded and soldered together in such a manner that engine vibration and road jars cannot shake them apart.

To make sure that the finished radiator is free from leaks or potential leaks, as soon as it comes off the assembly line it is given a severe compressed air test. Filled with air under high pressure and sealed, the radiator is submerged in a tank of water. If there is the slightest sign of bubbles due to escaping air, the radiator is thrown out as faulty.

The foreman points out to you also the features of this new Ford radiator which make it an unusually efficient unit of the cooling system. The upper and lower tanks are large. The openings through which the water flows from the tanks into the radiator tubes are bell-shaped, thus providing faster flow and faster circulation of the water. The tubes of copper and the fins of brass permit very rapid radiation of the heat and therefore quicker cooling.

Throughout the radiator of the new Ford car has been built in keeping with the greatest business speed and durability of the Model "A" Ford.

Unemployed Teachers and College Students, Why Don't You Enter Business?

There is a wonderful opportunity in business for the unemployed teacher or the college student who by force of circumstances had to drop out of college. Because of your unusual education, business concerns prefer you. You make better trained-of employees. No matter what your circumstances are, you CAN have a business training.

We have a novel yet simple plan that is helping hundreds of young people through our school—a plan enables them to pay their greater portion of their expenses after they are placed on a business man's payroll.

No need to wait till after Christmas to begin because any one who desires a most pleasant home at least ten days during the Christmas holidays. So, if you enter now, you will be just two months ahead of the fellow who waits until after Christmas to start.

You will be surprised at what we can do for you for just a few dollars and a few months of your time. To learn of our plan, clip the coupon and mail it for our catalog, "Achieving Success in Business." No obligations on your part if you don't enter school.

LIGHTS INCREASE EGG PRODUCTION

There are several ways, according to the Oklahoma Farmer-Stockman of November 1, in which lights can be used to help the farm flock lay more winter eggs.

The primary benefit of lights is to increase food consumption by giving the birds a longer time to eat and a shorter period when it is necessary for them to go without feed. More feed means quicker maturity, less time to molt and a heavier rate of egg production.

With late-hatched or slow-maturing pullets, the use of lights can be made to shorten the time required to get the birds started to laying, and if the ration is properly planned, there is no particular danger of injuring the birds by this stimulation. Since the chief virtue of lights is to stimulate feed consumption, it is just as easy to get the pullets to eat more grain which will give them plenty of body substance as it is to increase the amount of mash to hasten sexual maturity.

With old hens lights can be used either to delay the molt or to hasten the birds back into production after molting. With such birds, increasing the consumption of mash prolongs their laying season and delays the molt.

More than a half million barrels of cement is manufactured and sold in Texas every month, and by far the most of it is used in the construction of Texas buildings, roads and bridges and the various industries. The cement industry in Texas is something of comparatively recent development.

Women Workers Back Hoover For a Full Week's Wages

Women's Trade Union Leader Declares He Alone Can Prevent Lowering of Living Standards Throughout the Nation.

By Alice Fox Pitts

Whether or not the average American wage-earner can take home a full week's pay envelope every Saturday night in the next four years depends on the election of Herbert Hoover, according to Mrs. Raymond Robins, who will spend several weeks at Republican National headquarters directing campaign activities among industrial women of the nation.

Mrs. Robins was president of the National Women's Trade Union League for fifteen years, president of the International Congress of Working Women for six years, and also served on the committee on education of the American Federation of Labor.

The abolition of poverty has always been the hope of disinterested but keen observers. Mrs. Robins points out, however, that a practical statesman set out to prove how, to a very large measure, that idealistic state can be attained. As Secretary of Commerce, Herbert Hoover has stimulated our foreign trade. Commissioners have gone abroad with samples of goods and brought back orders. This has meant more work for our factories, more jobs for our men and women. By showing manufacturers how to eliminate waste in production, he has put their business on a sounder basis, once more increasing the wage-earner's chance of getting a job and keeping it.

Since one woman in every five in this country works, Hoover's activities affect millions of women directly in this way. People as a whole do not realize the extent to which women are employed in factories today. Mrs. Robins says, "When capitalism was done by hand, women could not engage in that occupation because they did not have the physical strength for it. Now doors, window sills and other parts of houses are turned out by machinery, and such machines are run by women. The same is true of many other occupations.

To these factory women, the elec-

tion of Herbert Hoover is of prime importance, for it means the preservation of their jobs, according to Mrs. Robins. They must vote for him to prevent their standards of living being lowered to European levels. That is the argument Mrs. Robins will have her workers hammer home.

No Real Proof That Meteorites Are "New"

A German scientist has recently endeavored to prove that meteorites are a relatively recent introduction into our system. He asserts that as meteorites have ever been discovered among our coal deposits, or found embedded in our rocks. He says that they evidently did the earth at the period of the Stone Age, or traces would have been found. His conclusion is that meteorites entered our parts of space some 100,000 years ago, and may have been due to the disintegration of a small star.

This theory has apparently little to support it. If meteorites did not exist, it is hard to see how comets could exist. Some of the latter revolve in periods of 10,000 years, some 100,000 years, and others of several millions of years. They and their coexisting meteorites have probably been revolving within the boundaries of our solar system as long as nearly as long as the planets. If imbedded in carboniferous deposit meteorites would easily escape discovery, being dark, like the coal, and no attempt being made to analyze the fragments of iron and the like, found, they would be thrown on one side or burned up as useless, and their real nature never discovered.—London Times.

Good Housewife Knows What Display Meant

It sounds too good to be true, but it was true, nevertheless, and got the big laugh of the year. There were some wonderful paintings on display at the recent exposition at Long Beach and among those who passed to view them was a family from Iowa who had never seen the ocean until they came out here to California and saw the steamships in Los Angeles harbor.

Now, at the exposition, they stopped in front of a splendid picture of one of the old square-rigged frigates under full sail, a sight which they had never seen and a type of ship they had never heard of.

"What's that man?" demanded the youngest member of the party.

"Silly, Johnny, don't show your ignorance," mother whispered. "It's wash day on the ocean."—Los Angeles Times.

Pauper Savant Found

In St. Pancras Home for the Poor has been found the most learned pauper in England. At sixty-five he is bearing Greek. He knows Latin, speaks German fluently, and several of his translations from the French have been published. He can discuss by the hour the relative merits of Bach and Scarlatti and is familiar with the styles of all the most famous opera singers of the last forty years. The man's favorite authors are Stevenson, Hardy and Conrad. He has been in the institution since 1921. In 1922 he broke away in an attempt to make his own living, as he did in his younger days, but after sleeping on Hampstead Heath in the winter and contracting a serious illness he was obliged to return to the poorhouse.

Strawberry Paradise

Deep down in the basement of a building in Copenhagen there is a cellar known to every Dane. It is called "Anderson's Cellar" and an summer-time visitor to Denmark's capital can claim to have seen "all the sights" without having descended into its cool depths. There is no limit to the things that he can see. The center of the place gleaming under its weight of dishes piled high with strawberries. Quantities of cream, partly whipped, are great bushes of sugar—and molasses. And there to find that for the modest sum of about 12 cents one can eat a fill one is not likely to forget to the end of one's days.

Prospecting by Radio

Precious metals are being discovered by a "radio" apparatus claimed to have been invented by a Catholic priest of France. "Every metal gives off a definite wave length, and an instrument is adjusted to pick them up," the priest explained. Gold, platinum and silver will be found. It is hoped in large quantities within a few miles at the Franco-Swiss border and in the Pyrenees. A dozen such sets each containing a different metal, were buried at various points in a field from 10 to 100 feet deep. The instrument not only revealed the depths, it is said, but identified the metals.

Pyro Stains

Pyro developer stains are extremely difficult to remove from fabrics, but it is sometimes possible, to do so, by the use of hydrogen peroxide. This should be followed with a weak solution of aspartic acid, and then rinsing in cool water. The oxidant should be exposed to strong sunlight. The trouble is that what will remove a pyro stain will generally remove the dye of the fabric as well.

Salts Cause a Crisis

Nearly every one has noticed the white formation that sometimes discolored brick walls, particularly after a season of damp weather. The crisis is caused by the solidification on surface of various kinds of chemical salts that become dissolved with the

CHEVROLET MAKES TEST TRIP

It was perhaps only fitting that during the same year that a woman for the first time flew the Atlantic another woman should record what is claimed to be the all-time woman's record for a transatlantic automobile journey. At any rate, Miss Telle Glyndon, of Atlantic City, driving a Chevrolet sedan, completed on September 26th, the 3668 miles that separate her native city from San Francisco. The expired time for her non-stop journey was eight days, eight hours and fifteen minutes.

Miss Glyndon was accompanied by brother-in-law, and a friend, neither of whom has ever driven an automobile. Alone, it was up to her to drive every inch of the distance, and this she did.

"It was an endurance test solely," she explained when she checked in at the San Francisco ferry. "I did it to prove that a woman's endurance is as great as man's and I think the result of my journey has done this."

Miss Glyndon's trip was given official endorsement by Mayor Anthony J. Bufo, Jr., of Atlantic City, who timed her start and bade her bon voyage with a message of greeting and the official key of Atlantic City for delivery to Mayor Ralph of San Francisco.

"I got so sleepy at times, especially the third night out, that I thought I would have quit," Miss Glyndon said. "I don't feel as though I ever again would to drink a cup of coffee or inhale from a bottle of smelling salts."

"It was the detours that delayed us. Out of Pittsburgh was a terrible stretch of road, necessitating a long detour. Also, in certain sections of the far west, we encountered more than one heavy breaking tour."

"Not once during the trip did Miss Glyndon enter an hotel for food or sleep. Ten minute naps at the wheel sufficed for rest. Sandwiches and coffee eaten with one hand, while the other steered, were her only refreshments. She is an experienced driver, and for the last six years has driven Chevrollets exclusively. Just before the trip she purchased a new sedan and drove it 1200 miles before starting. The only stops the car required were for gasoline, oil and water. No change of tires or adjustments of any description were necessary.

HOW TO SERVE ORANGES

Now that the breakfast orange is a habit in millions of homes, housewives may be interested in various methods of serving it so that the healthful appetizer may appear in a new garb from morning to morning.

The juice may be served in an attractive glass—preferably set in a dish of crushed ice. The orange may be served in two halves, with the pulp loosened so that it may be lifted with a spoon.

Orange slices may be served one day, while orange segments may be served the next. The orange may be even cut into small sections and served with skin attached to each segment so that each portion may be lifted and separated from the skin with the fork.

Or, as a special dish, Sliced Oranges, Canadiana, may be served, where slices of oranges are placed in a glass sherbet dish covered with two tablespoonfuls of maple syrup. Both fruit and maple syrup should be very cold.

Mr. and Mrs. B. C. Arnold have recently moved here from Laguna, Arkansas. Mr. Arnold is a brother of T. E. Arnold, of this city, and has accepted a position at the Muleshoe Elevator.

CAMERA-MICROSCOPE SHOWS CHICK GROWING

An interesting development in scientific research which would not have been possible without continuous electric service and the individual electric motor, is a series of experiments which are being conducted by Carl D. Clark of the University of Maryland. He has succeeded in constructing a machine which takes motion pictures of the home life of a germ or the growth of a flower or a chicken which has not yet been hatched.

This machine is a combination of an electric motor, an eight day clock, a regulation motion picture camera, and a high powered microscope. The clock is set at intervals and regulates the filming, while the camera is cranked by the motor which in turn is controlled by the clock. After the clock has been set, and the power turned on the machine requires no more attention. Mr. Clark has recorded the growth of irises and roses and also the beating of a turtle's heart.

Every purchaser of a new Ford is entitled to Free Inspection Service for the first 1500 miles

THE modern automobile is a finely built piece of machinery and it stands a lot of abuse. Considering the work it does, it gives surprisingly little trouble. But there isn't a car made that will not run better and longer if given proper care.

Inspection Service at 500, 1000 and 1500 miles:
Check battery
Check generator charging rate
Check distributor adjustment
Check carburetor adjustment
Check lights
Check brakes
Check shock absorber adjustment
Check tire inflation
Check steering gear
Change engine oil
Lubricate chassis

The first few hundred miles are especially important because that is when the mechanism of your car is being broken in. Proper attention during this period will lengthen its life and prevent unnecessary trouble later on.

We are particularly interested in this matter because we believe it is our duty not only to make a good automobile, but to help the owner get the greatest possible use over the longest period of time at a minimum of trouble and expense.

With this in view, the entire Ford dealer organization has been specially trained and equipped to service the new Model A car.

Furthermore, we have instructed every Ford dealer to give the following Free:

A checking-up by experienced mechanics, together with oiling and greasing every 500 miles, will add months and years to the life of your car and mean more economical and pleasurable motoring every mile you drive.

FORD MOTOR COMPANY

Grocery Savings on Everyday Needs
Make this store your headquarters for all your grocery needs if you would set an unusually good table at a saving of cost. Standard Groceries and Foodstuffs only occupy our shelves, and are sold at the same or lower prices than inferior goods elsewhere. If your groceries are purchased here you may rest assured that there will be no disappointment as to quality.

Los Angeles Boy Needed Help

Leroy Young, 1111 Georgia St., Los Angeles, is a "regular fellow," active in sports, and at the top in his classes at school. To look at him now, you'd think he never had a day's sickness but his mother says: "When Leroy was just a little fellow, we found his stomach and bowels were weak. He kept suffering from constipation. Nothing he ate agreed with him. He was fretful, feverish and puffy."

"When we started giving him California Fig Syrup his condition improved quickly. His constipation and biliousness stopped and he has had no more trouble of that kind. I have since used California Fig Syrup with him for colds and upset spells. He likes it because it tastes so good and I like it because it helps him so wonderfully!"

California Fig Syrup has been the trusted standby of mothers for over 50 years. Leading physicians recommend it. It is purely vegetable and works with Nature to regulate, tone and strengthen the stomach and bowels of children so they get full nourishment from their food and waste is eliminated in a normal way. Four million bottles used a year shows how mothers depend on it. Always look for the word "California" on the carton to be sure of getting the genuine.

Ancient School Reader

M. A. Dunlap, farmer living northwest of Ponca City, Okla., has an old reader which he believes is an improvement over the modern type. It is called "Murray's English Reader," published in 1822. The book was used by Dunlap's father back in Virginia many years ago. It was published by James E. Smith and company of Philadelphia and is made up almost entirely of excerpts from the classics.—Daily Oklahoman.

To some people, only dissipation is recreation. If it is, that's their business.

Dr. Hartman Said:

Fight Off INDIGESTION

and Mr. Powell says:

"I AM a circus clown and about two years ago began to have severe attacks of indigestion—I thought I would have to give up. I lost weight and my appetite was bad. (Anyone who has suffered attacks of indigestion can understand just how Mr. Powell felt.) "A friend told me about PE-RU-NA, so I bought a bottle and started taking it. I have now taken three bottles, my health is restored and my work a pleasure." (For over 30 years, PE-RU-NA has been the key to renewed health and vitality for hundreds of thousands.) "My earnest desire is to help others through me to make this statement." (Signed) Albert Powell, Louisville, Ky. (PE-RU-NA is now available through drug stores—thousands recommend it to others. All druggists have it; get a bottle today!)

RICHLY FURRED VELVET COATS; TWEED FOR THE SPORTS COAT

AUTUMN has ushered in an era of elegance which becomes more and more apparent as the season's social activities get into full swing. The thing that perhaps impresses most of all is the luxuriousness and unusualness of the new coats. When the smart set assembles at this or that luncheon rendezvous, or as it wends its way to matinee or afternoon bridge, it is a delight to the eye to observe the handsome colorings of the coats worn. The glowing wine shades, dark subtle greens, ruddy au-

tom toned browns, vibrant blues. In cloth and velvet mark an innovation which brings a note of thrilling interest into the style parade.

Dressy afternoon coats of velvet especially present a winsome picture of striking color, enhanced with trimmings of rich fur. The vogue for the elaborate goes so far, at times, as to introduce a bit of metal embroidery such as the coat in the picture features onto the sleeves in connection with wide bands of fur. This attractive wrap is of lustrous brown velvet, which is collared and cuffed with lynx. Many types of velvet are used for the colorful coats now so fashionable, including chiffon, transparent rayon, heavier silk velvets, and each importance is also attached to the better grade velveteens.

Perhaps the most unique among velvet coats are those quilted, sometimes all over and then again the habit-stitching patterns merely a wide border, together with collar, cuffs and pockets.

To carry out the color scheme to a nicety, fashion decrees that shoes, hat and handbag be matched to the velvet of the coat. A story of rich tonality is told when a wine-velvet coat is complemented with shoes of like-colored kid together with a claqueau, perhaps of the same velvet as the coat. Now that the component parts of a costume are expected to match, one is expected to wear colorful footwear, which accords for the presence of the handsome shoes one sees in the shops, stressing exquisite green, wine, brown or other fascinating shades.

It is, indeed, a tweed-clad public which is cheering the football teams on to victory. The grandstand display of tweeds is as bewildering an array of weaves as it is unusual.

the material. Add to color and design the bewildering array of new fur treatments applied to these smart woads, and you have three of many reasons why tweed is receiving a landslide vote as the fabric ideal for fall outdoor activities.

The tweed short-jacket suit is the sensation of the day. These suits, each of which consists of a skirt topped with a jacket which may vary from bighat to knee-length, are distinguished with handsome and unique fur treatments.

Luxurious Winter Coat.

The furs employed include begruiling novelties in both long-haired and flat types. There is really nothing in the way of a sports costume which exceeds the smartly furred short-jacket tweed suit. The shaggy furs usually are expressed in shawl collars with deep cuffs while the flat pelts are used in endless novel ways, often like fabric, buttoned down boxes, made into kerchief caplets, and staging endless unique effects.

Many of the full-length tweed coats adopt self-fabric scarf treatments as pictured. The fur which cuts this model is badger, a pelt which is more than popular this season. Note that it is placed so as to show a border of the tweed about the wrist. So to position fur above the wristline is one of fashion's outstanding whims. Attention is called to the handbag

Comfortable Coat of Tweed.

which this smartly cloaked fashionable is carrying. Its design is thoroughly moderate, which is characteristic of the new bags. If this young woman had chosen she might have flaunted a bag made of the tweed of the coat, the vogue for which is stressed this season.

Lesson for November 4

WORLD'S TEMPERANCE SUNDAY

LESSON TEXT—Romans 13:1-14. P. 112. Epistle to the Church. I. PRIMARY TOPIC—Obedience to Law. JUNIOR TOPIC—Obedience to Law. INTERMEDIATE AND SENIOR TOPIC—Reasons for Prohibition. YOUNG PEOPLE AND ADULT TOPIC—Standing for Law Enforcement.

I. The Christian's Obligation to the State (vs. 1-7).

The believer in Christ is a citizen as well as a Christian. Intelligent Christians will be loyal to the state as well as to the church. Failure to recognize this has brought Christianity into disrepute in many quarters.

1. Obedience to rulers (vs. 1-4).

The obligation is upon all Christians. The reason is that civil government is ordained of God and rulers are His representatives. To refuse obedience to civil authority is to resist God. This does not mean that a Christian at the behest of the state should do that which is inherently wrong. Submission to rightly constituted authority is the law of the believer's life, not only because God is the source of civil authority, but because it was organized for beneficent ends (vs. 4). The spirit in which the Christian renders obedience to rulers (vs. 5). He should regard it as his obligation, not merely because it serves a good purpose, but because it is morally right. It is a conscientious obligation to obey lawful rulers.

3. Method of expressing this obedience (vs. 6, 7).

(1) In the payment of personal and property taxes.

The citizen who enjoys the benefits of government is morally bound to support it.

(2) Payment of duty upon merchandise and license fees.

The business exchange between nations must be regulated. For such regulations expense is incurred, for which benefit the citizen should pay.

(3) Veneration of magistrates ("fear to whom fear.")

Those who have the fear of God in their hearts will venerate their rulers, God's representatives.

(4) The spirit in which officers should be honored because of their service.

II. The Christian's Obligation to His Fellow Citizens (vs. 8-10).

This is summed up in the word "love." This obligation is perpetual. The only debt which is right to owe to that of love. The discharge of this obligation forbids:

(1) Defrauding in matters of property (vs. 8).

(2) It forbids going into debt with the certainty of being able to meet one's obligation.

(3) It forbids defrauding in matters of moral purity (vs. 9). Where the life is under the power of love, industry cannot be committed.

(4) It forbids murder.

(5) It forbids stealing.

(6) It forbids coveting.

(7) It forbids the working of any ill to one's neighbor.

III. The Supreme Motive Governing the Life of the Christian (vs. 11-14).

The attitude of the Christian is not of eager expectancy. There is no time for slumber or indifference. The time of salvation is drawing near. The salvation here mentioned is not that which we obtain in justification and sanctification, but is that which we get when our redemption is completed in glorification at the second coming of Christ. Redemption is threefold:

1. Justification through faith in the blood of Jesus.

2. Sanctification through the obedience of the Word.

3. Glorification, when the fullness of redemption shall be realized at Christ's second coming.

The reasons for this attitude of expectancy are that the night of Christ's absence is far spent and the day of His glorious appearing is at hand. The proper conduct in view of this is:

1. To put off the works of darkness (vs. 12), which are revelling, drunkenness, chambering, wantonness, strife and jealousy. The child of light will not walk in drunken carousals, will not practice licentious acts and debauchery, neither engage in strife, nor be under the spell of jealousy.

2. Put on the armor of light (vs. 12). The figure here is of the Roman soldier who arose from sleep and put on his stunner robes and put on his gleaming armor.

3. Put on the Lord Jesus Christ (vs. 14).

This means to enthroned Jesus Christ as the Lord of the life, to bring the life under His control.

Be Thou an Example
Let no man despise thy youth; but be thou an example of the believers in spirit, in conversation, in charity, in spirit, in faith, in purity.—Paul.

The Lord Dwells There
Every home may be a vestibule of heaven because the Lord dwells there.—A. C. Dixon.

Fighting and Praying
He fights best who prays best.—J. W. Lee.

Cascara is Your Doctor's Choice

When physicians pronounce cascara the PERFECT laxative—why experiment with things that lull the system into action? Cascara, you know, is the bark of a tree. A natural and normal stimulus to the bowels.

The Indians, who used to chew this bark, had no word in their language that meant "constipation!"

Perfect regularity is possible today, and to all of us. We have cascara in ideal form; the very delightful-tasting candy Cascaret gives us pure cascara. It has helped at least a million people to habitual regularity. Millions of others, unfortunately, have stuck to

stronger things and acquired only the laxative habit.

Your first Cascaret will demonstrate how THOROUGH this gentle laxative is, after all. Your next surprise will be the length of time before you need another. Eventually, you'll see that cascaring tends to make the bowels move thereafter of their own accord!

A modern druggist must stock many laxatives, but for your own good the druggist would rather have you ask for the inexpensive little box of Cascarets than anything else.

CASCARETS They Work While You Sleep!

Fear Dad

Harold—Did you wire your father about your debts?
Mazie—Yes, I sent him a live wire—he'll be shocked when he gets it.—Vancouver Province.

Short Even for That

"So the whole game Jonah up."
"I suppose it was only a summer engagement."—New York Sun.

A had ending follows a bad beginning.—Euphrates.

Happy Part Is All Right

The Man—I like to see a girl with a shilshing, happy face.
The Maid—She doesn't. That's why she carries a compact.

Red Cross Blue Blood

Red Cross Blue Blood should be used in every home. It makes clothes white as snow and never injures the fabric. All good grocers.—Adv.

True charity is spontaneous and finds its own occasion; it is never the offspring of importunity, nor of emulation.—Hosea Ballou.

Kill Rats Without Danger

A New Exterminator that is Wonderfully Effective yet Safe to Use!

Stock, dogs, cats, poultry, and all other domestic animals are not harmed. Kills rats and mice every time.

Avoid Dangerous Poisons
K-R-O does not contain arsenic, strychnine, barium carbonate or any other deadly poison. Its active ingredients are equal in recommended by the U. S. Dept. of Agriculture and listed under "Rats and Mice Control."

Many letters testify to the great merit of K-R-O. I bought a five dollar case K-R-O and gave it to my neighbor. He said it was the best rat and mouse poison he had ever used. He says it is safe to use around children and pets. Sold on MONEY-BACK GUARANTEE. 25c per ounce or direct from us at \$1.00 delivered. Large sizes (four ounces each) \$2.50. K-R-O Co., Springfield, Ohio.

K-R-O KILLS-RATS-ONLY

The Cat's Meow

Myrtle—"Believe me, there's no fool like an old fool." Judith—"What have you done now?"—Life.

His Partner

"What's your handicap in the fourth some this afternoon?"
"He hasn't arrived yet!"

Why do we all want to make human nature better? Because it irritates us? Selfishness, again.

There is always room at the top, but in case of fire it is better to be at the bottom.

10 minutes ago—

Remember all the things people used to do for headaches? Today, the accepted treatment is Bayer Aspirin. It gets action! Quick, complete relief—and no harm done. No after effects; no effect on the heart; nothing in a Bayer tablet could hurt anyone. (Your doctor will verify this.) For any sort of headache, neuralgic pains, rheumatism just try Bayer Aspirin. Taken soon enough, it can head-off the pain altogether; even those pains many women have thought must be endured. At all druggists.

Aspirin is the trade mark of Bayer Manufacturers of Monoaceticester of Salicylic Acid

The October issue of West Texas Today, official magazine of the West Texas Chamber of Commerce, was a Panhandle North Plains special number and contained stories on a number of counties towns and industries of the northwestern part of the state.

J. E. Johnson of Rotan will have his creamery and ice cream factory in operation within a short time, it is expected. Part of the creamery machinery is already at the location and is being set as it arrives.

The Galbraith-Foxworth Lumber Company of Dalhart has started work on a 50 by 140 foot warehouse building, which will give Dalhart one of the most modern lumber yards in that section of the state when completed.

Stanton's third annual poultry show will be held December 6, 7 and 8 this year. A large increase in entries is anticipated for the show this year.

NOTICE
THE STATE OF TEXAS

To the Sheriff or any Constable of Bailey County—Greeting:
YOU ARE HEREBY COMMANDED That you summon, by making publication of this Citation in some newspaper published in the County of Bailey, if there be a newspaper published therein, but if not, then in the nearest County where a newspaper is published once a week for four consecutive weeks previous to the return day hereof, T. J. Broom and the unknown heirs of T. J. Broom, J. A. Enswinger and the unknown heirs of J. A. Enswinger, and Wm. E. Thomas and the unknown heirs of Wm. E. Thomas, whose residence is unknown, to be and appear before the Hon. District Court at the next regular term thereof, to be holden in the County of Bailey at the Court House hereof, in Muleshoe, on the 31st day of December, 1928, then and there to answer a Petition filed in said Court, on the 27th day of October, A. D. 1928, in a suit numbered on the docket of said Court No. 469, wherein Hale County is plaintiff and T. J. Broom and the unknown heirs of T. J. Broom, and J. A. Enswinger and the unknown heirs of J. A. Enswinger, and Wm. E. Thomas and the unknown heirs of Wm. E. Thomas are defendants. The nature of the plaintiff's demand being as follows, to-wit: In two counts, the first of which is a trespass to try title suit, plaintiff alleging that he is the owner in fee simple of tract No. 3, in League No. 170, Hale County, School lands located in Bailey County; that on the 15th day of June, 1923, the defendants unlawfully entered and took possession of same and withold possession from the plaintiff, who is the owner of said land and entitled to possession of the same. Plaintiff sues for title and possession of said land.

The second count alleges that the plaintiff was the owner of tract No. 3, League No. 170, Hale County School lands located in Bailey County, Texas, on June 13th, 1916 and on said date sold same to T. J. Broom, and in said deed reserved a vendor's lien to secure a note executed by said T. J. Broom to plaintiff in the sum of \$1204.82 bearing interest at the rate of 5% per annum, and providing for 10% attorneys fees. Said note provides that interest is payable annually as it accrues, and that in default in the payment of any installment of interest matures all of said indebtedness. That the other defendants are claiming some sort of title to said land under a pretended conveyance of said land but which claim is inferior to that of the plaintiff. Default having been made in the payment of six installments of interest, plaintiff has matured all of said note and placed it in the hands of an attorney for collection. It prays for judgment on its note and for a foreclosure of its lien on said land, and for judgment declaring its title superior to any of the defendants pretended claim. Said Petition has indorsed on the back thereof, suit to try title as well as for damages.

HEREIN FAIL NOT, And have you before said Court, on the said first day of the next term thereof, this Writ, with your endorsement thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Muleshoe, Texas, this 27th day of October, A. D. 1928.

C. C. MARDIS,
Clerk District Court, Bailey County, Texas.
