Spur's "Younger-Generation" To Rule City For Day

Near 400 Delegates, Visitors Expected To Attend 2-Day Meet, Opening Friday

Rotary Sponsoring Week Honoring Spur Younger Generation

"A little child shall lead them," Isaiah 11: 6
Things are going to be different in Spur Thursday, April 30th, Civic and public affairs are going to be conducted just as they will be ten or twenty years from now when the "citizens of tomorrow" take over the generalship of this fair city.
A school boy will reign as mayor, another as chief of police and another as city judge. Business of the entire city is to be turned over to the boys and girls of Spur. Some will act as traffic cops and others as commissioners. Even the local school system will be under the supervision of school boys and girls. Seven elected student trustees will choose three, boy or girls to serve as principals of the Senior and Junior highs and the East Ward, and one to act as superintendent.

Boys and Girls' Week, a dedication to the younger generation, is an outgrowth of Boys' Week which was started by the Rotary Club of New York City in 1920. It is now sponsored by a special committee headed by Walter H. Head, President of Boy Scouts of America.
Youths of Spur, like other parts of the nation, will be given the spotlight, their needs will be brought to the attention of the public, and plans will be formulated for improvements and character building agencies. This occasion of being "rulers for a day" is a one-day training period for the men of tomorrow, sponsored and made possible in this city by the Rotary club.

"Modern Times", constructed as all Chaplins have been, is a succession of gags and funny business, beaded along the gossamer thread of a plot as slight as a Shubert operatta, according to advance publicity. Mr. Chaplin takes the part of a tramp in this his first appearance in five years, and press reports indicate that he is still the same personality he was with his first screen appearance twenty-three years ago.

Local Resettlement Office Announces Latest Loan Service

Mr. Dale Campbell, district supervisor of the local Resettlement office, announces that applications are in order for this district's part of the additional \$150,000 allotted resettlement work in the state of Texas. The total amount must be incurred by the first of June, and there is no set figure for this area, composed of Dickens, Motley and Kent counties.
The new allotment of funds is to be used for community and cooperative services, where loans are made to one individual, who cannot be a resettlement client, through the support of a number of community signers. The borrower may, upon recommendation of the county agent and the local resettlement supervisor, secure a loan for the purchase of either implements or pure bred stock to be used jointly by the cooperative signers of the purchaser's agreement.
At least twenty-five per cent of the signers, however, must be resettlement borrowers. The property is to be kept, at all times, available for those persons who have entered into the agreements, according to information from the administration office at Washington.
The loans are to be made on the rate of three per cent interest, and to cover a time period necessary.

Lester Ericson Is Named President Of Local Chamber

The annual meeting of the Spur Chamber of Commerce was held Monday evening in the basement of the Bryant-Link Company store with a very fine attendance. The meeting was under the direction of Lester Ericson, vice president of the organization, the president, Henry Alexander, being ill and not able to be present. The meeting was started right, beginning by all present assembling around a long table and enjoying a service of coffee, ice cream and doughnuts. No one can doubt the judgment in starting a meeting in that manner.

After refreshments the secretary was asked to read the annual report. He stated that the expenses of the organization for the past year, closing with April 1, 1936, amounted to \$2,635.33. A detailed account of these expenditures were read which included quite a long list of accomplishments during the year. The secretary stated that at this time the organization has the largest membership in five years. The attendance at the meeting Monday night proved that many of the business men of the town are supporting the work of the Chamber of Commerce.

Among the forty odd accomplishments listed for the past year was included the new city park and swimming pool which is just being completed. This also embraced the rebuilding of the golf course, the whole project being a WPA program which has furnished employment for a great number of people in the community. Another project was the improvement of the local school grounds which also furnished employment to a great number of local people. These two projects were purely Chamber of Commerce work and has been invaluable to the community from a financial standpoint. There are many other projects helpful to the entire community on the program of accomplishments the past year.

The president then stated that the election of officers was next on the list. No nominating committee was appointed and all nominations for officers and directors were made from the floor. Lester Ericson was selected unanimously for president for the next year. Cap McNeill was then elected vice president and H. P. Gibson was selected for treasurer.

On the list of directors Joe Long, E. D. Engleman, V. V. Parr, W. F. Gilbert, Ray Taylor, Clifford B. Jones, and W. B. Lee were nominated. Just seven men were asked for by different ones and when additional nominations were called for by the president no one responded. The seven men were elected on the board by acclamation.

The president then asked if there was any further business to be attended to. Dewey Granberry asked for a leave of absence for two months to assist the West Texas Chamber of Commerce in the All West Texas exhibit at the Texas Centennial. He was granted a release for the period asked for.

Then the president asked if there was any one who had anything further to bring before the meeting. Some one asked that the president-elect make a talk outlining his policies. The chair ruled this out stating that since the presiding officer is the president-elect that the fine spirit of the evening should not be ruined by any speeches and adjourned the meeting.

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in
the Morning Rain! to Go
The liver should pour out two pounds of
liquid bile into your bowels daily. If this bile
is not flowing freely, your food doesn't digest.
It just decays in the bowels. Gas builds up
your stomach. You get constipated. Your
whole system is poisoned and you feel sour,
sunk and the world looks punk.
Laxatives are only makeshifts. A mere
bowel movement doesn't get at the cause. It
takes those good, old Carter's Little Liver
Pills to get these two pounds of bile flowing
freely and make you feel "up and up". Harm-
less, gentle, yet amazing in making bile flow
freely. Ask for Carter's Little Liver Pills by
name. Stubbornly refuse anything else. See

Peacock Woman Dies Local Hospital

Mrs. Fred Estes, 31, telephone exchange manager at Peacock, died in a local sanitarium Tuesday evening of pneumonia after an illness of about one week. She and her children went to Roaring Springs Friday to spend the week end with her parents, and when she arrived there she had high fever. A physician was summoned and a nurse secured, and all possible was done to relieve her of the condition. She was brought to the sanitarium here Tuesday afternoon but was dying when she arrived.

The body was taken to Campbell Funeral Home at Roaring Springs and prepared for burial. Webber Williams did the embalming here and then the body was carried to Roaring Springs. Funeral services were held Wednesday afternoon at the First Baptist Church in Roaring Springs, Rev. D. G. Reid, of Roby, and former pastor at Roaring Springs conducted the services assisted by Rev. A. V. Bradley the present pastor. Interment followed in Campbell Springs cemetery with Mr. Campbell in charge.

Mrs. Estes, whose maiden name was Miss Lola Simpson, was born in Haskell July 1, 1905. She was the elder daughter of Mr. and Mrs. B. F. Simpson who moved to Roaring Springs many years ago. She attended the high school at Abilene one year and then graduated at Roaring Springs after completing the full high school course. She and Mr. Estes were married about six years ago. They have three children in their home: Freddie Marie, 4; Robert Benjamin, 2; and Richard Dale, six months.

Others surviving are her parents, Mr. and Mrs. B. F. Simpson; one brother, Marion K. Simpson of Lubbock; one sister, Mrs. G. N. Fuller of Matador and some uncles and aunts. Mr. Estes was in Arizona acting as field supervisor for the Pre-Cooling Fruit Company and Mrs. Estes and her children had planned and loaded their car to go to Mr. Estes when she became ill. They drove to Roaring Springs to spend the week end with her parents. Mr. Estes arrived here late Tuesday night for the funeral Wednesday.

Rumfield Leases Gulf Station

Tom Rumfield has leased the Gulf Service Station formerly operated by M. C. Briley and is now in charge. Mr. Rumfield stated he will be glad to have his friends visit him and use "Good Gulf" gasoline in their cars. The station is located just north of Brazelton Lumber Company yard.

Spur Scholastics Reported Short

J. R. Laine, scholastic census enumerator for Spur Independent School district, reports that there are not as many children enumerated here for school purposes this year as were enumerated in former years. He reported 747 white children in the district and 104 colored children of school age. This makes a total of 851 scholastics in the district reported for school purposes.

If there should be any child in the district that the enumerator failed to list, please report them to Mr. Laine or to O. C. Thomas, superintendent of Spur schools, at once. They can be included in the supplementary report. Each child of scholastic age, if reported to the State Department, brings \$17.50 each to Spur schools for next year. This helps greatly in financing our schools and it is needed at this time.

Mr. and Mrs. M. D. Ivey and Mrs. W. P. Stewart Shugart are in Mineral Wells this week attending the State Baptist Sunday School convention.

CARD OF THANKS

We want to thank our friends and neighbors for their kindness during the illness and death of our mother, sister and aunt. Your kind words and helpful acts were of untold value to us and meant so much to us. We want you to know we appreciate all you did.

Church, joining at Dry Lake. She was a member at Soldier Mound where she and her husband were faithful in all church services. Mrs. Robinson served as pianist for the church. She was always faithful, zealous and loyal to any duty the church placed upon her.

The great number of friends who love and appreciate her bespeaks the life that she lived. She was a loving, attentive mother to her children and a faithful devoted wife to her husband. Her many neighbors held her in high esteem and there was nothing she would not try to do to help them

“The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made

AND ITS UP-KEEP COST IS THE LOWEST”

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For the fact is, it's way down the list.

The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor.

Check up and you will find that the difference between 17 and 19 miles a gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car:

- More value for every dollar you pay.
- Lower cost for repairs and service.
- Long life. Slow depreciation.
- Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.

\$25 A MONTH WITH USUAL LOW DOWN-PAYMENT, BUYS ANY NEW FORD V-8 CAR ON NEW UCC 1/2% PER MONTH FINANCE PLANS.

Chicken dinner to starboard!

"Here comes a rooster, floating by on a chicken coop! The repairman is rowin' out to catch him... we'll have chicken stew for supper!"

In the flood-swept little river town, only the telephone operators remained, keeping the lines open for levee workers fighting the angry torrent. And at sundown, by long distance, the marooned office reported all well... and a chicken dinner in sight!

Good times and bad, it takes people to give you telephone service... men and women with the ability to do a good job in fair weather, and the courage to stay at their posts when emergencies threaten.

The entire specialized organization of the telephone system... this company, the expert staff of American Telephone & Telegraph Company, Bell Laboratories, Western Electric—exists for one purpose only:

To help the men who patrol the lines, and the women who work at the switchboard, do a better job of giving you good, economical telephone service.

Our Opinion Is

That if many of us would let thought instead of notions occupy our minds that we would be much happier and more useful.

No Doubt of His Correctness

EDOUARD HERRIOT, former premier of France, recently expressed his fear that his country had lost the support of the United States by France refusing to pay her war debt to us. Individuals who refuse to meet their obligations lose their business prestige—why should not the same rule apply to nations? France has allocated millions of dollars to the building of war ships, air planes and supporting armies and ignored her obligations to us. She led the field in refusals, and her influence was responsible for Germany not meeting her treaty obligations. England followed suit and so did Italy, and the others, and today that portion of Europe that is not already engaged in war is on the verge of a heated turmoil.

We feel that President Roosevelt is doing the right thing by keeping the United States out of the mixup of European affairs. And the next time France and England pick a quarrel with Germany just let them settle it in Germany's way. If the people of the United States feel that a German-American as President would be to our best interests, the chances are that he would be elected. Yes, the United States tried to be a friend to France and the other allied nations. Our entry into the World War saved those countries years of suffering. The funds loaned to those nations enabled them to carry on to victory and to place Germany under close restrictions. Those nations had the confidence of our country. Yet they refuse to pay, and twelve billions of hard earned money of the people of America went out of circulation. Why censure Germany for calling treaties scraps of paper when France and the other allied nations have looked upon their honest obligations with so little concern. It looks as if France has justly lost the respect, confidence and support of our country.

It May Be Needed Later

It soon will be time for spring rains for planting purposes to visit our country. In fact, everybody would welcome a good old fashioned "drizzle-drazzle" right now. But are we making arrangements to use the rain when it comes? What about planting a good feed crop and filling two, or three, or more trench silos with that good luscious silage which makes dairy cows give as much milk in winter as they do in summer; or that makes baby beeves look as sleek in December as in May.

Wonder if it would be more profitable to grow feed on the farm at around ten dollars per ton and save it, or to buy it from some other farmer at twenty-five to thirty dollars per ton? Trench silos are no experiment any longer. They are tried and found good. They have saved feed for years, and if farmers will fill a few of them as they produce the feed, probably the great overhead of farm operation will be greatly reduced. Let's try it.

Bits 'o Nothing from Nowhere!

Parents and Teachers are not the only one to enjoy the organization's conference here—think of the kids. They get a holiday while mothers and instructors plan ways to keep the brats in school. It's a funny world.

After hearing much about old age pension, but never seeing a person who has yet been pensioned, we have looked the word up in Webster's and find "Pension—sometimes followed by 'off'". It looks as if "off" is the word in the case of some of these political investigations.

A statistician estimates tourist visiting Texas Centennial year will spend \$466,225,700—an average of \$7,500 for each man, woman and child in the state. The question is shall we sue for our part now or let the poor folks have it without a struggle.

All these memorial occasions and contribution drives, honoring various late-famous, are very nice tributes to those who have passed on, but how much longer must we, who are left, continue contributing before we are "memorialized"? This can't go on.

Some one entered the Speer's 5-Cent to 5-Dollar Store Saturday night by way of a back window and helped themselves to the cash in the cash registers. The store enjoyed a very good business Saturday and burglars took all the cash taken in during the day's business. No clues have been discovered yet and it looks as if whoever did the job was experienced in

the business.

Better Work AND MORE OF IT

with a John Deere General Purpose Tractor and John Deere Middlebreaker-Lister

Right through the season—on every farming operation—bedding, listing, planting, cultivating, haying, harvesting—you'll save time, labor, effort, money with a John Deere Model A or B General Purpose Tractor.

These are general purpose tractors in fact as well as name—rear wheels adjustable 56 to 84 inches without the use of extension axles... individual rear wheel brakes for short turns... hydraulic power lift... narrow, compact design for perfect vision in cultivating... wide, roomy platform to enable you to stand as well as sit... four speeds forward... straight-line draft... not a thing has been overlooked.

And like all John Deere Tractors, they have the two-cylinder engine design that

enables you to burn the low-cost fuels. Matching the John Deere Model A and B Tractors in terms of convenience, simplicity, ease of operation, and soundness of construction is the John Deere two-row middlebreaker and lister, which forms a unit with the tractor. With it you can do all the jobs you want to do with this type of equipment. Lister is lifted and dropped with the power lift on the tractor. Two gauge wheels and vertical hitch adjustment control the depth and in planting furnish the drive through a chain hook-up. Come in, inspect the John Deere General Tractors and complete line of integral equipment that makes farming easier, better, more profitable.

BIG SOFT BALL GAME

One of the most interesting games of soft ball was played Monday afternoon on the local diamond between Pa's bunch and Dr. Alexander's line-up. The contest was hot from the beginning and every one engaged in the game put his best into it. At the close of the seventh inning it looked as if the old heads, piloted by Bill Kinney, had taken a walk over on the younger boys. However, Dr. Bob and his players made a rally and run in four scores the last two innings which made the game more evenly balanced. The final score was 11 for Pa's bunch and 7 for the younger set.

This is the first time the older boys have been able to win a victory over Dr. Bob and his line-up. One side says they were just off that day while the other side stated they were just getting into the spirit of the game.
