The following is a statement made by a satisfied customer

Union Central Life Ins. Co., Lubbock, Texas July 1, 1937

I have had the Regal Royal Typewriter in use long enough to determine its quality and there is nothing about it to indicate that it is a rebuilt typewriter. The alignment is perfect and the touch control adjustment makes it very easy to adjust it to any one's particular desire. It would be foolish of anyone to pay \$115.00 for a typewriter when they can get one as perfect as this for \$69.50.

You may feel at liberty to use this letter in any manner that you desire, as I am glad to recommend this typewriter to anyone who wants a first class typewriter.

two problems pertaining to the production of cream at this season were issued by Mr. Darger. Do not keep cream on the farm too long even in cold weather, he states. If held too long, it is likely to develop old, rancid flavors. A cave or cellar may be of the right temperature for holding cream, but if musty it will likely spoil the delicate flavor. Cooking odors and stored vegetables also affect the flavor and cause the resulting butter to be marked down in grade. Freezing is a second hazard to be guarded against. Frozen cream does not make high-grade butter; the freezing changes the cream so that it results in mealy, oily, undesirable butter. Cream is best kept in a clean odor-proof place, in a temperature above freezing, and must be protected from freezing on the haul to market. BUY U. S. DEFENSE BONDS-

O'Neil has urged the development of guayule as an emergency rubber supply for years.
