

THE LUBBOCK AVALANCHE

VOLUME XXIII, No. 31.

LUBBOCK, LUBBOCK COUNTY, TEXAS, TUESDAY, JUNE 13, 1922.

PUBLISHED TWICE A WEEK

JUDGE INSISTS THAT PARENTS BE CAUTIOUS ABOUT CHILDREN

UNSPEAKABLE CRIMES OF YOUTH ARE CAUSED BY THEIR NEGLIGENCE AND COURTS ARE FORCED TO ACT

COURT CONDITIONS GREATLY CHANGED

Morality and Modern Habits Do Not Mix, and the Young Generation is Being Called to Account For the Greatest Crimes of the Times—Time Now to Call a Halt.

One of the most important matters that has come up to the people of Lubbock for many months, was realized Monday morning, when the June term of District Court convened.

Judge W. R. Spencer, in his charge to the jury, delivered a most forceful address, urging that the jury take some concrete action to call a halt on the carelessness of parents in bringing up their children, to which he attributed the commission of such extraordinary crimes, as will have to be brought before this term of court. Judge Spencer is not "hard boiled" by any means, but when a stern problem that seems to confront the entire population of Lubbock County is brought to view he throws himself into the work of offering a practical solution, which was thoroughly demonstrated in the charge he made to the jury.

It is time that someone call a halt on the younger generation, and Judge Spencer hit the thoughtless, criminally inclined youngsters a hard one when he compared court cases of ten years ago with those of today. Ten years ago, he pointed out, the larger majority of criminals were of middle age and older, whose rough lives merited attention and punishment, whose long criminal experiences taught them the lessons of law dodging, which was hard indeed for the officers to cope with, and who, when caught, were often dealt with in the most severe manner. He emphasized the fact that the Grand Jury should make all investigations with determination to uphold justice in the extreme sense. To dismiss all cases where doubt was in favor of the defendant, and to have brought before the court, as examples, such cases as the majority thought needed intervention of the strong hand of the law. What the judge was interested in most is that the younger generation be called upon to show for their wickedness, in order that the eyes of parents be opened to the need of closer association with their children, and anyone familiar with the cases that are to be brought up in this term of court, especially the most important one so far as criminality is concerned, will realize that Judge Spencer is touching a vital question, of interest to every mother, father, boy and girl in this county. Not that all children need the close scrutiny of their parents, but that some parents at least wake up to the fact that through their carelessness more than two-thirds of the cases which the courts have to consider are dealing directly with young men and young women in their teens, some barely entering that age.

We are heartily in sympathy with the parent who, through thoughtlessness and unwillingness to care for their children, see them brought before the courts for the most conspicuous crimes of the present day, but sympathy for them will not open the eyes of their neighbors, and this the Judge seemed to thoroughly realize, and urged that action be taken which is designed to make them think.

The courts of the country within a few years will be overrun with such cases as the one the writer has in mind, if parents everywhere do not take the advice of the District Judge, and others who are in a position to know, and take immediate steps to curb the restlessness of the coming generations. Courts and stern justice are to have to bear, but it is up to either the courts or the parents, and what the parents fail to do, the courts are compelled to do, not merely for the satisfaction of prosecution, but for the protection of society as a whole.

Judge Spencer is a man of years and experience, whose knowledge of human nature, and the perils to which it is subjected, equips him well to master the present situation, and it is his opinion that the parents have the control of their children in their hands, and that the courts are too far down the line to offer much sympathy or assistance to the criminally inclined youths, and that about all the court can do is to administer justice in the most able manner, letting the individual remain as an example for those who are to walk in the same steps of life in the days that are to come.

Modern habits and morality don't seem to walk in the same path, and the inclination of the individual to work to the interest of the forces that be for destruction of the human soul shuns morality in the cruelest fashion, and style and customs fit themselves too perfectly into the program of the mischief maker for the courts of this day to do anything less than take a leading role in the oppression of crime. Parents where are your boys and

girls? Don't force the courts to answer.

List of Jurors For June Term District Court

J. A. Rix, foreman, C. T. Adams, J. T. Brown, T. B. Duggan, Geo. W. Foster, J. S. Johnson, C. E. Maedgen, A. V. McCarty, H. W. Stanton, A. V. Weaver, H. R. Porter, and A. B. Jones.

PAINTERS AND CARPENTERS BEAUTIFY AUDITORIUM

A glimpse at the city auditorium will convince one that Lubbock was not satisfied to have just a nice auditorium, but wanted a good looking one as well.

Those carpenters certainly knew their business, and the painter too is onto his job, from all appearances, as that is now about the best looking building in all Lubbock, among those of its class.

A beautiful towered top, which tapers down to the windowed observatory adds greatly to the appearance of the structure, making it appear in all its bigness, substantial, neat attractive.

Lubbock is proud of the new auditorium, and it is with great admiration it is viewed by a large number of Lubbock people, through whose efforts and free-heartedness it was made possible.

TAHOKA MAN VISITED IN LUBBOCK SATURDAY

H. W. Pennington, of Tahoka, accompanied by an old friend, Oscar Grimes, of Coleman County, was in Lubbock Saturday transacting business, and called on the Avalanche to have his subscription date pushed a few notches ahead of time.

Mr. Pennington said everything in the Tahoka community was getting along fine and dandy, and that he was going to try to persuade Mr. Grimes to come to the Plains, where farming can be made a profitable business, and where good health, good friends, wonderful climatic conditions and prosperous times make life worth while.

CROSBYTON MAN BITTEN BY THE RADIO "BUG"

One of the most seriously afflicted radio fans that has been bitten by that dreadful, enthusiasm creating insect, Radio "bug," that has visited this city for some time was E. H. Hendricks, of Crosbyton, who visited radio expert McDaniel, wire chief of the local telephone station, Saturday.

Mr. Hendricks owns and manages the telephone system running from Crosbyton to Matador, back to Roaring Springs, to Spur, connecting several smaller towns in that section with his system, and has made good in that work from every angle, and now that he is to become a Radio enthusiast we are sure he will take a conspicuous place in the development of broadcasting messages by Radio in West Texas.

From all accounts Radio enthusiasm is a lot like the itch, one gets it unknowingly, and doesn't get rid of it until several years have passed at continuous meddling with the instruments, and learning the news from all over the world, one of the most enthusiastic men in Lubbock being Butterflake Martin, who told an Avalanche reporter several days ago that as many as four to six hours are spent uninterruptedly with his receiving set, during which time he is so intensely interested and fascinated that time for eating regular meals is spent in "listening in" on the various messages that he is enabled to pick up.

Mr. Martin has become so enthusiastic about the work that he has equipped his store with a complete stock of Radio parts, and added some of the most complete and expensive machines made to the stock.

We had the pleasure of having these machines, the work they do, and how it is done, explained to us by Mr. Martin a few days ago, and from what we learned we don't find any room to blame the fellows from becoming so enthusiastic about the wonders of those extraordinary machines.

FEEDING SHOWS TO BE PROFITABLE AT AMARILLO

Amarillo, June 12.—Panhandle feed marketed on the hoof is the correct way to dispose of it. This was demonstrated one day this week when C. E. Collins of this city marketed a load of 661-pound baby beefs on the Fort Worth market, securing \$9.69, by far the top price of the day on that market. The calves were raised ten miles from this city and fed on kafir corn and some meat.

90th Division Officer Will Speak Here Wednesday

Through the courtesy of Mr. Rowley of the Lindsey Theater, Lieutenant Colonel E. R. Coppock, of the 90th Division, U. S. Army, will speak to all ex-service men, Reserve Officers and any other who may care to hear him at the close of the first show Wednesday night at the Lindsey Theater. The subject of his address will be along the lines of National Welfare and will be of interest to all former service men and citizens of the town.

The American Legion has had notice that the Colonel will arrive Wednesday morning and he will be the guest of the Legion officials and the press of the city at the Rotary luncheon Wednesday noon. The Reserve officers living in Lubbock (Captains Marvin B. Hillburn and Noah L. Peters and Lieutenants Cyril E. Waddock and Forest L. Robbins of Ralls) have been notified to meet the Colonel while he is here.

Wants Gap Filled Between Spur and Crosbyton

A washout on the Double Mountain River between Old Glory and Sagerton put the folks on the N. W. section of the Stamford and North Western rather on the bum Saturday, Sunday, and Monday although mail and passenger service were kept up by using a freight that happened to be on this end of the line when the washout came.

Folks never appreciate their many blessings until they are deprived of them. Which reminds us that it would be a wonderful blessing to the entire country between Lubbock and Stamford if some plan could be worked out whereby the gap between Spur and Crosbyton could be connected and through train service could be had between the east and the west. A move is under way to connect the gap between Midland and Seagraves which would connect with El Paso and the closing of the gap between Spur and Crosbyton would make a thru line from El Paso to Stamford where connections would be made with all points North and East. The closing of two short gaps would convert three branch lines into a trunk line and be worth more to this part of Texas than any other one thing that might come our way. A united effort of all business and farming interests along this line will do the trick and Stamford, El Paso and Lubbock should unite and lead the movement. If they will every other interest along the way will fall in and do their part. —Jayton Chronicle.

W. E. EDWARDS OFF ON BIG FISHING TRIP

W. E. Edwards, manager of the Leader left Sat. for a 2-weeks fishing and hunting trip along the Devils river, and into Old Mexico, a trip he has been making regularly for the past several years.

Mr. Edwards has been working mighty hard the past several weeks, having come to Lubbock one month ago, and took over the leader management, and through his efforts the store has enjoyed a wonderful patronage, the bankrupt stock having been cleared away, and there are now many shelves full of nice new goods which are being offered to the public on a close margin.

Mr. Edwards has had an aggressive as well as a progressive policy of conducting that business. He didn't shoot at the people with one little half-hearted attempt, then expect them to fall over themselves getting to his store in response, but kept a constant bombardment of circulars, page, half page and quarter page advertisements and more circulars and bigger advertisements going in their direction, until they were finally convinced of the merits of the sale, and the sincerity of the management in their attempts to dispose of the goods, and as a result called at the store to look over the stock, which further resulted in the nice report Mr. Edwards made to his friends a while back in an Avalanche ad reading somewhat like this "Sale is off, all the bankrupt stock is gone, but there is plenty new goods on sale at bargains," which showed that his aggressiveness had gotten him in very little time.

We are mighty glad to note that he is leaving Lubbock for only a short stay, for we like to have men like Mr. Edwards in town, for they are needed here, not that there is a scarcity of that kind here by any means, but that the more the better. It will be heartily welcomed on his return from the hunt.

Rev. F. R. Pickens and family left Saturday for Dawson county where Mr. and Mrs. Pickens will visit for a couple of weeks, while Mr. Pickens attends the Summer school of Theology at the Southern Methodist University for two weeks.

Miss Grady Murfee, daughter of Mr. and Mrs. J. E. Murfee, is visiting her brother, George Murfee and family in Abilene.

Howard Pierson of Abernathy was here visiting his mother Saturday and Sunday.

Lubbock to Have Senior and Junior Band Organization

All good towns the size of Lubbock should have a well organized band. The Chamber of Commerce has employed Mr. Ward V. Croft to re-organize our Lubbock Band, and also to organize a boys' band and a girls' Saxophone Band. Mr. Croft comes to us well recommended, and has been leader of the Portales Band for the past two and a half years. Lubbock is indeed fortunate in getting a band leader with the experience Mr. Croft has, and the people of Lubbock can anticipate some peppy band concerts from these organizations.

Mr. Croft will put Lubbock on the map musically, and it will be a satisfaction to know that we will have music for all special occasions. We trust that the people of Lubbock will give Mr. and Mrs. Croft the glad hand and make them feel that they have a part in the making of "The Hub of the Plains."

There is nothing that will put a town to the front more quickly than a good band. The Girls' Saxophone Band will be quite a novelty and the only one in this part of Texas. With the co-operation of the parents of the boys who will be in the boys' band, there is no reason why we should not have a Boys' Band in Lubbock with a state-wide reputation for good music. Let's everyone who is a lover of good music co-operate with Mr. Croft in the organization of these bands.

A notice under another heading in this paper will give the time and place for all those who wish to join the different bands to meet Let's start Mr. Croft right, and we know we will all be repaid by the good music we will have from the organization of these bands.

ANOTHER CROP DAMAGED BY HAIL AND RAIN

W. B. Ray was in Lubbock Saturday from his fine farm two and a half miles northeast of the Carlisle school house.

The heavy rain of two weeks ago has necessitated much work on his place, and he has been just as busy as it was possible for him to be. One hundred and twenty five acres of crops were destroyed, which he immediately set to work to replant, and from all accounts he has made much progress in that work.

He was in the Avalanche Saturday, and said that with the ground thoroughly moistened, and the fine germinating weather, the newly planted crop would make a showing before many days.

GIRL SCOUTS TO MEET WEDNESDAY MORNING

The next regular meeting of the Girl Scouts will be held Wednesday morning at 9 o'clock, at the Methodist Church. Mr. Mowery has promised to be with us again, if possible, to teach drilling. Those who could not come last week missed the best meeting we have ever had.

A good program has been arranged and it is hoped that every scout will be on time.

LUBBOCK MEN ATTEND RALLS BANQUET FRIDAY

C. B. Musgrove and W. E. (Tarzan) Lyle, manager and salesman for the local Radford Grocery Wholesale house, returned Saturday from Ralls, where they attended a get to gether meeting of the live business men of that place at the Methodist Church Friday night.

A wonderful feast was spread, many interesting, enthusiastic and instructive talks were made, and one of the best meetings of its kind the people of that growing Plains city have ever held was enjoyed throughout, according to reports brought home by the Radfordites.

Those fellows know how to enjoy eating groceries as much, or better, than they enjoy selling them, they claim, and if their word is true we wish to impress it upon the minds of their entertainers that there were two happy Lubbock men at Ralls Friday night. Musgrove and Lyle are live wires, and know how to show themselves a good time, and no doubt the assistance given them by the Ralls enthusiasts in getting something out of that meeting accounts for their willingness and ability to boost that place.

This, according to Mr. Musgrove was the third meeting of its kind the Ralls businessmen have enjoyed and it is planned to have those meetings once a month regularly, as a means of inserting pep into their systems, and acquainting them one with the other, which we recommended as the most feasible route possible to their getting closer together for a hard efficient pull on the ropes of destiny to the end that Ralls might prosper.

We heartily appreciate the efforts those men are making for the advancement and welfare of West Texas, and are glad indeed to have had Lubbock represented at that live meeting by the Radford officials.

\$8,000 RESIDENCE IN SAN ANGELO BY WESTBROOK

San Angelo, June 12.—J. W. Westbrook has let a contract to Harry Wright of San Angelo for a \$8,000 home in Park Heights. It is known as Hamilton Terrace. It will be an attractive home.

LOCAL PLANT FURNISHES POWER FOR PLAINVIEW AND OTHER CITIES

IS THE MOST UP-TO-DATE PLANT IN WEST TEXAS AND WILL ASSIST IN OUTSIDE DEVELOPMENTS

HAS ICE CAPACITY OF FORTY TONS DAILY

The Building is Fireproof Throughout, and Equipment Large Enough to Serve All Adjoining Towns, Which Will Prove a Great Help to the Development of Lubbock, "The Hub of the Plains"

MR. JONES THINKS THERE IS PLENTY TIME FOR COTTON

In a letter to the editor of the Avalanche, R. D. Jones, of Paducah has this to say regarding the cotton situation in the Lubbock section:

"It seems to me that your people are stopping the planting of cotton too soon. Your first frost is usually our first one, and we always have much good cotton planted the last of June and the first of July, which always makes some cotton.

"With the season you have and the prospects we have for high prices I feel you farmers are overlooking a bet in not planting more, especially in the hailed out districts. One hundred pounds of seed cotton promises to be worth as much as a ton of maize, and there is yet an excellent chance to plant and grow one thousand pounds of seed cotton to the acre."

Mr. Jones has given the cotton raising question quite a deal of thought and studies it from every angle, and his ideas along this line are no doubt well founded. We pass this bit of information to our readers for their consideration, hoping that it will be of some real worth to them, which we feel that it will be, should they heed it.

REV. SHEARER TO TEACH IN SUMMER SCHOOL, THEOLOGY

Rev. Geo. W. Shearer, accompanied by his wife and two sons, Charles and John, leave Tuesday for Weatherford. They will make the trip in their car. Mrs. Shearer and boys will spend two weeks in Weatherford at the home of Mr. and Mrs. R. L. Hobbs, Mrs. Shearer's parents, and Rev. Shearer will go on to Dallas, where he will be an instructor in the Summer School of Theology, at the Southwestern University, which begins there next Thursday. Rev. Shearer has been on the teaching staff for three years and teaches the young preachers in their fourth year course.

Rev. F. R. Pickens of the Lubbock Mission and Rev. J. E. Yates of the Crosbyton circuit will attend this summer school from this part of the country.

SCHOOL CLOSING AT CARLISLE FRIDAY, JUNE 16TH.

The Carlisle school, after an eight months' term, welcome the public to an exhibition on Friday night, June 16, 1922. Come out Mr. Candidate and get acquainted. Come early and avoid the rush. Music and singing will be the feature of the program.

BOY SENDS \$5 TO PAY FOR CHICKENS HE ONCE STOLE

Brownfield, June 8.—Lee Walker, Brownfield citizen, received a money order for \$5 recently covering amount of theft of chickens by a former Brownfield lad now residing in California. The lad asked forgiveness.

LUBBOCK COUNTY HAS NO EQUAL, SAYS COOPER

G. C. Cooper, one of Lubbock county's diversifying farmers, was in town Saturday transacting business. Mr. Cooper has farmed in West Texas for many years, and said that he believes the Plains the best producing section anywhere, as his crops are always above the average in other countries, and livestock does better here than in other parts of southwest Texas, where large tracts of land are devoted exclusively to that industry.

Several weeks ago he sold fourteen barred rock hens to the South Plains Poultry and Hide Company, which averaged seven and a half pounds each, the fineness of the birds being attributed to the ideal conditions in which they were raised as much as to the thoroughbred stock.

"It rains enough, is cool enough, never too cold, is never too hot, and a hundred other favorable facts, notes and nevers that make the Plains the greatest place in the world to raise everything from fine crops to thoroughbred chickens," he said.

We are mighty glad to see Lubbock county farmers taking an active interest in the industries that go to making the Plains richer and more prosperous in every way, and are assured they will benefit themselves much through this activity.

BROWNFIELD PASTORS FORM ASSOCIATION

Brownfield, June 7.—Ministers of Brownfield have formed a ministerial association and elected Rev. M. Baughman president, and Rev. E. M. Wheatley, secretary. Matters pertaining to the religious activities of the town will be discussed at meetings.

One of the most modern and best equipped ice and Power Plants in West Texas is nearing completion in Lubbock, with one of its large five hundred horse-power motors now at work, furnishing power for all transmission lines into Plainview, and for all the lines in Lubbock.

The engine is of the very latest type, is housed in an all steel, brick and re-inforced brick building, and will furnish all the power needed in this section for many years, and there will be another unit installed within a short time, as workmen are now busy working on the foundation which work will be completed within a few days.

A visit to the plant will convince one that the owners, the Texas Utilities Company, has decided to spare neither money nor time in making Lubbock the center of power for the Plains, and the manager, Mr. Allen, expressed the opinion that as the towns adjoining Lubbock grow the demand for power will grow, making the large plant absolutely necessary for the advancement of commerce in these towns.

The company will complete a line to Ralls soon, which will also supply the towns of Lorenzo and Idalou with power, which will become a great factor in the development of those towns.

The ice manufacturing plant will be ready for work within ten days, it is believed. The plant will have forty tons daily capacity, as compared with fourteen tons every twenty-four hours of the old plant, gives one some idea of the convenience and largeness of this plant. The people of Lubbock indeed have something of which to be proud. The great investment this plant represents will certainly open eyes to the value of the Texas Utilities people to Lubbock, and the fact that about twenty-eight local people are given permanent employment in the plant, and in the ice delivery service, certainly is a favorable angle from which to view the situation.

The process the water of which the ice is made goes through is something absolutely new to the Plains, as the equipment in this department is also of the latest type, and is not made into any other plant in West Texas, and to appreciate this machinery one must go through the plant, and have the process explained in detail, a feature which the writer enjoyed Monday.

The water is run through four thicknesses of blotter paper, eighty-four hours time required to place enough water through this equipment to start the manufacture of ice, but as the plant has storage rooms of one thousand tons capacity, the time required for this work does not, in any manner, retard the service the company can give the many customers in West Texas.

It is good to note that another powerful business institution is nearing completion in Lubbock, which will have its effect upon the development of the entire section of West Texas and as the building is fire-proof throughout, it will last throughout the future, a gigantic assistant to the builders of the Plains.

METHODIST CONFERENCE IN LUBBOCK IN SEPTEMBER

Owing to the fact that the muddy roads kept many Methodists from attending the meeting of the Lubbock District Northwest Texas conference at Matador last week, a small part of the business that was brought before the body was transacted, and the meeting adjourned to meet in Lubbock in September, where all matters will be disposed of.

Rev. C. N. Ferguson, pastor of the First Methodist Church, Geo. W. Shearer, presiding elder of the Lubbock district, M. M. Dupre, J. C. Turner, J. M. Slagle, F. E. Pickens and C. W. Mallard, of Lubbock, attended the meeting at Matador.

Inasmuch as Lubbock is centrally located, it is believed that the September meeting will be well attended, and that much good will be derived from the conference.

BIG WOOL DEAL IS MADE AT BERTRAM

Bertram, June 8.—L. D. Ater of Ater and Company, reports having purchased 130,000 pounds of wool, prices ranging from 35c to 42c.

Practically all of the wool has been brought in. The firm has not shipped out any wool yet.

Mrs. George A. Barnett and little daughter Joan, of Post returned to their home after spending several days as guests at the home of Mrs. and Mrs. E. C. Simmons. Mrs. Barnett is a sister of Mrs. Simmons, and Mrs. May from the Simmons home. She will be in town for a few days.

AROUND THE CLOCK

Starlight and Sunshine Lighting Life's Pathway.

1. The man who makes the most noise talking makes the least noise thinking.
2. Cheerfulness is about the only contagious thing we are not afraid of.
3. The cost of aspiration is perspiration.
4. It is no wonder a man loses his power of speech when he is talking to a girl who is "too sweet for words."
5. No one appreciates the perils of motoring quite as much as the pedestrian.
6. Don't skim the cream off the milk of human kindness before peddling it out.
7. Beauty is only skin deep—and most of the pretty girls haven't much depth.
8. It makes a man feel like a sucker to see the kisses he has coaxed for wasted on a little pup.
9. Better parents mean better babies, and better babies mean better parents.
10. If we could see ourselves as others see us, others would not see us that way long.
11. Some men are shown up at a showdown.
12. Cupid gets a great deal of credit that belongs to those modern styles.

Folks and Flowers

Mrs. Pokes—Those new neighbors of ours must be rich, judging from the swell clothes they wear.
Mrs. Jabbs—That's a poor way to judge, my dear. Some of the most gorgeous flowers haven't a scent.

Rhyme It Yourself

Old man Hubbard went to the cupboard
To get a bit of a dram,
But when he got there the cupboard was bare,
And, of course, any fool knows what he said.

Moral Hens

A young married woman who moved into the country considered the keeping of hens a pleasant and profitable occupation. As she grew

more absorbed in the pursuit her enthusiasm increased.
During one of her animated descriptions of her success, a friend inquired: "Are your hens good at laying eggs?"
"Oh, yes," she replied, in a delighted tone, "they haven't laid a bad egg yet."

Following the Fashion

There are fashions in operations as in everything else. Fashionable operations move up and down the body with as little regard for location as the waistline. People pay as much attention to what is the vogue in interior removals as the vogue in interior decorations. They are as much the slave of the London specialist as of the Paris designer.

Who ever Lucile announces that the bodice will be cut low, some surgeon announces that tonsils will be cut high. If Paquin insists upon the split skirt, some fashionable physician declares for a cleft palate. They are always discovering a new place to knife you.

A man with an appendix is a curiosity nowadays. A little while ago you couldn't be fashionable without an appendicitis operation. If your corns ached, or you had dandruff, the trouble was in the appendix, and out it came.

Just now the teeth are the fashionable point of attack. As we have said, a few years ago it was the appendix. You really couldn't get into the Four Hundred without leaving your appendix behind, and you couldn't leave your appendix behind without leaving four hundred with the surgeon who did the removing.

After the appendix, it was the tonsils. And now, as we observed, it's the teeth. The next point of attack will probably be the brain—if any. After that, we expect that the feet will come in for attention and amputation, as the increase in motor cars makes the feet more or less useless, and anyway, with shoe prices as they have been the last few years, one would be better off without feet.

However, returning to the subject, dentists have decided that teeth are responsible for a great many things besides chewing. Whenever you get an ache or a pain, instead of giving you a prescription, they give you an X-ray examination. Then they announce that a tooth is causing the pain, and must come out.

If you prove unwilling and point out that you've had the tooth quite some time and are very much attached to it, they inform you that all the regular folks are having theirs extracted. That makes it perfectly regular, of course.

For every ache or pain they extract a molar.
For every molar they extract your week's salary.
By the time your salary is gone, your teeth are gone.

And so, the next time you get a pain, you have nothing to blame it on and nothing to run up a fancy dental bill with.

Gradually the pain subsides. But the ache remains. It's an aching void—in the region of your heart.

This is a funny world. In order to get in the push you have to get in the pull.

Safety First

"And would you love me as much if father lost all his money?"
"Has he lost it?"
"Why, no?"
"Of course I would, darling."

Where Genius Is Necessary
Marrying a widow has its disadvantages. Think of the hard game a man is up against trying to invent excuses that she's never heard.

It Is To Be Glad
Let us take out of life its sadness. Let us add to its quota of joy. The earth has no dearth of gladness. It is merely with you, my boy. It is only a question of seeing. It is only to tune the ear. And then from your harmonious being
The note rings harmoniously clear.

Caught you ever a sound of sighing
When the pine trees were singing their song?
Except as your own heart crying
Hath heard its own echo of wrong?
Nay, the rose as it sheddeth its petals
Sheddeth a fragrance as delicate, too,
For it knows not a thing of regrets.

SERIOUSLY—

You can't expect imitation to be as good as the original—because the original had to earn its way on sheer merit and the imitation was a result of the fine qualities of the original.

WHAT ARE WE TALKING ABOUT?

FORD PARTS—Yes sir! Made by the Ford Motor Company—the company headed by Henry Ford—the man who made automobiles for the average, honest, intelligent and ambitious American citizen—the car which numbers its owners above the 6,000,000 mark;

BECAUSE of the unanimous confidence in the Ford—in its construction—there has arisen numerous imitators of "PARTS" for Ford cars—somebody trying to clean up by "imitation methods"—imitating Ford Parts.

BUT THERE IS PROTECTION FOR YOU!—The only thing for you to do—a very simple thing, but effective, nevertheless—and that is to buy the Parts for your Ford from the agency that the Ford Motor Company authorizes!

HOT ROLLS AND COOKIES

DELIVERED FROM OUR STORE WITH GROCERY ORDERS.

PHONE 594 INMON GROCERY CO.

We stake the prices and quality of our groceries against anybody's. Better give us some Business.

To God only it giveth its due.

Then up from your feeble repining!
Count the gamble as worthy its cost.

Your strength is not found in reclining,
Trust ye surely that nothing is lost.

With effort your forces are doubled
With faith in yourself you are true,
It is only the doubters are troubled,
Be joyful and remember it's you.

Household Hints
Vinegar placed in a pot of dried glue will not make it fit for anything much.

Never use soiled suds for washing colored clothes unless you expect them to be muddy looking.
If your rugs insist upon rolling up at the edges, turn them over, apply a good coat of glue and replace them. You will not be troubled again.

To prevent jelly or milk boiling over, don't let it get so hot. Banana peelings placed on the stairway at night will prove a fine burglar alarm.
A simple remedy for a squeaking door hinge is to stop up your ears so you can't hear it.

Why Is It—
Knees rhymes with breeze?
Bliss rhymes with kiss?
Strife rhymes with wife?
Spoon rhymes with moon?
Peach rhymes with beach?

POST CITY GOLFERS COME TO LUBBOCK TO PLAY

C. A. Quail, of Post City, accompanied by his sportsman friend, George Scotchman Gopher Samson, builder of the Lubbock links, arrived in Lubbock Thursday morning to spend the day on the local links trying out their abilities in that work. They had a wonderful day from all accounts, having played local golfers, Reed and Germany. Both men are favorably impressed with Lubbock and expressed a desire to visit here often.
With a splendid town here, combined with the most complete arranged play house and grounds, Lubbock will soon be the center of attraction for the people of West Texas.

NEW HOPE NEWS ITEMS OF THIS WEEK

We had another big rain Sunday night, accompanied by some hail, but not enough to do much damage.
The following were among the Lubbock visitors Saturday: Messrs S. P. and Ealy Eoff, J. L. Floyd, C. F. Cox, S. D. Pate, Henry Nunley, Ashcroft, S. D. Stewart, L. C. Boyd, J. C. Roberts and Gus Haven.

Mr. Vern Osborne has a new farm hand at his home, who arrived some week ago, mother and son are doing nicely.

Mr. S. C. Borland has a case of mumps.
Mr. and Mrs. J. L. Floyd and little son, Cyril and sister, Vinetta Eoff, spent Tuesday at the home of their sister and aunt, Mrs. J. C. McDale.

Mrs. Virgil Cowart and little son, Marvin spent Tuesday at the home of her parents, Mr. and Mrs. S. D. Pate.

Mrs. Shotwell visited at the home of Mr. and Mrs. J. C. McDale Monday afternoon.

The New Hope ball team went to Woodrow Friday and beat them in a game of baseball. "Hurrah" for New Hope.

Mr. S. P. Eoff had the misfortune of letting his team run away Tuesday and done some damage to his buggy.

Misses Ettie Lorena and Stella Mae McDale and brother, J. C., visited at the Cox home Sunday afternoon.

Miss Elsie Cox spent Friday night at the home of Mr. and Mrs. Lee Nix.
Mr. and Mrs. L. N. Barber, of the Wilson community. The hail ruined

ed Mr. Barber's crop and Ealy is helping him re-plant it.
Mr. and Mrs. Ealy Eoff are visiting at the home of her parents, Misses Veda and Luena McDale—spent Sunday afternoon at the home of their grandparents, Mr. and Mrs. S. P. Eoff.

Every great man has a genius for solitude. The biography of the world draws that line of demarcation through the human race.

How to Control Poultry Varmints

(By F. W. Kazmeier, Poultry Husbandman, A. & M. College)

Each year chicks are killed and eaten by various kinds of varmints. These losses, if not checked will make serious inroads on the profits. Of all the most harmful pests, no doubt the rat heads the list especially in some sections of Texas.

RATS: Rats kill considerable numbers of small chicks. To control them is quite a problem because they sometimes come from neighboring places after all have been killed out on the place. The first thing to do is to destroy the breeding places. Clean up around the place. Replenish all tuber piles and raise them from the ground so that the rats cannot harbor beneath. All buildings that are not on concrete foundations should be blocked up from the ground about 10 to 15 inches so the cats and dogs may go underneath. Permanent buildings should be placed on concrete foundations and floors. Portable buildings should be blocked up from the ground. Rats not only kill chickens but consume large quantities of feed grains and mash. Several ways of killing rats have proven fairly successful. We have found that a few good cats will keep down the rats. Traps may also be used to advantage but they should be located where the chickens cannot get into them. Scald the trap after a rat has been caught in it. Several good traps are on the market. Home-made traps may also be used to advantage. Rat poison is also very satisfactory but unless extraordinary precautions are taken, the chickens, cat or dog may get some of the poison. It is generally best for one person to place the poison out and then to gather it in again the next morning. Poison must be handled very carefully. It may be purchased at any local drug store.

CROWS AND HAWKS: In some sections of the state, crows are a great pest and destroy thousands of growing chicks. We have found the intelligent use of a shot gun

one of the best ways for controlling crows. It is a good idea to shoot at them every time one comes near even though too far away to be killed. It is especially important to do this before they have started killing and eating the chickens. Shooting has a tendency to frighten crows and hawks away. Another good way of keeping hawks and crows from bothering the chickens is to place a trap on a pole elevated 10 to 15 feet above the ground to which bait has been added in order to catch the bird. After being caught, the dead bird should be allowed to remain in the trap on the pole.

We have also found a teaspoonful of musilage and mixing it with a small amount of strychnine, placing it on top of the head of a small (preferably a white) chick is a good way to kill hawks, etc. Place the chick in an out of the way place from the house where the crows and hawks are apt to find it.

STRANGE DOGS AND CATS: Dogs and cats sometimes start eating chickens. The best family cat may be the guilty culprit. If they are especially valuable, confine them until the chicks are a good size. In the case of dogs, muzzle or chain them. In case of strange dogs or cats, forget your conscience and take good aim with a shot gun. We have found it necessary to do this on several different occasions and have never regretted the fact. One time we found 35 partly eaten grown chickens dead in an orchard, scattered about in all directions. Careful watching showed up the culprit and we did the rest. In case of a valuable dog, we recommend notifying the owner of the first offense. The second offense would make a clean out of a blooded dog.

OWLS (Great Horned): Owls have a tendency to kill chickens. One night to make sure we tied a chicken to a stake and about midnight saw an owl swoop down and proceed to kill the chicken until he was shot at. Owls have a tendency to eat the head and neck. In that case, we recommend keeping the chickens confined at night.

The great horned owl should not be confused with the smaller owls that are beneficial. The great horned owl will destroy many of the small game birds and animals. Owls may be trapped by locating traps as previously described on a pole. The only objection is that the smaller owls may be caught. It may be best to keep the chickens confined.

SNAKES: Chicken eating snakes sometimes make serious inroads on the small chickens. About the only thing to do is to kill the snake. Look under the coop, boxes or boards. Tall weeds also sometimes hide these large snakes.

THIEVES: Thieves cannot be classed as varmints. We believe it pays to invest in padlocks and keep the hen houses locked at night. Better do it now, only to put it off and regret it later. Copyrighted, F. W. Kazmeier, 1922

THE CLAUENE ITEMS OF THE PAST WEEK

Now, if my words are run together, you may know it is because they are just about dissolved. We've had so much rain, but so far we have been very fortunate in not having any hail to ruin the crops.

Bill Murray, Ullis King and Weldon Teague made an intended business trip to Lubbock Tuesday. But their business trip was only a sight seeing trip as they found practically every business house closed on account of it being Memorial Day. A ninety-mile trip, for only sight seeing, at the present cost of gasoline is expensive.

T. C. Swofford made a business trip to Lubbock Tuesday, returning Wednesday.

Wilsie Teague spent Tuesday night with Annie Lou Thorp.

Mrs. Gentry Murray and daughter, Justine, spent Thursday afternoon with Mrs. C. R. Teague and children.

Mrs. Lillie Swofford and children called on Mrs. White Friday. Messrs. George and Leonard Thorp transacted business in Meador Friday.

Messrs. J. L. Thorp, Pearl Thorp and Mrs. Wesley Williams were calling on Mrs. Havens Thursday.

Fred Reeves sustained quite an injury to his neck while playing ball the other day. He was run-

ning backwards to catch a fly ball when he fell on his head receiving such an injury as rendered him unconscious for several hours.

Messrs. King and White were Brownfield visitors Wednesday.

Mr. and Mrs. Williams spent last Tuesday night with her parents, Mr. and Mrs. J. L. Thorp.

Bob Slaughter, one of the owners of the Slaughter ranch, and Edd Green who is foreman of the same ranch passed through our village Saturday.

Mr. Saddler of the Dr. Dean ranch called on the Claene barbers Friday.

Charlie Fergus was taken to the Doctor at Brownfield Monday to have his hand dressed, which he had gotten badly burned.

Mr. Nickell's family visited the family of J. L. Thorp Monday.

Mr. Thorp and Wesley Williams were gone several days on a business trip to Slaton. They returned Sunday night. They report quite a hail storm in the section through which they passed. They say that cotton was ruined by the hail.

Clay Walker, Earl Nickell and Annie Lou Thorp took Sunday dinner at Prof. Teague's house.

Mr. (Scoops) Cosby and a banker of Wichita Falls, were looking over this section Wednesday. Mr. Cosby sold a labor-of-land here to Mr. Teague. Mr. Cosby also reports twelve families moving in to our community this fall.

Prof. Teague closed a very successful term of school Friday. He says that only one pupil, who went the full term failed to make their grade.

Walter Bailey of Mills, and Roy Bailey of Brownfield, were to see Mr. White Sunday. The Bailey brothers were competitors of Mr. White's in cotton buying last fall. Both men are full of praise for the Moody land.

Weldon Teague, who took an automobile course this winter thru a correspondence school has just received a statement telling him he had passed a successful final examination. He will soon receive his diploma. During the whole course Weldon never received a grade below 95. His general average was 98 percent.

LAMESA CHAMBER TO NAME OFFICERS

Lamesa, June 5.—The Lamesa Chamber of Commerce will hold an open meeting Thursday night on the ground-leased-for-a-park. A basket supper will be served, a program rendered and officers and directors elected. The Civic League will render part of the program. Out-of-town speakers have been secured.

CARLISLE NEWS OF THE PAST WEEK

Brother Tennyson preached two interesting sermons Saturday night and Sunday morning. The subject Saturday night was "Courage," Sunday morning "Will A Man Rob God." Sunday evening he was to preach on "Leading Men to Christ" but on account of another cloud-burst, did not get to hold it.

Mr. and Mrs. Guy Casey of Caldwell, spent Saturday night with her uncle, Mr. Bill Casey.

Miss Octa Ray spent Friday night with Miss Thelma Hinson.

Mrs. C. H. Jerden spent Monday in the Hinson home.

Miss Opal Burroughs spent the week end with Mrs. Coffey.

Mr. Oscar Waltman, wife and baby of Woodrow, spent Sunday in the W. L. Altman home.

Misses Thelma Hinson, Octa Ray and Messrs. J. W. Williamson and L. J. Sims, motored to the Boyd ranch Sunday.

Ona Ray, Jewell Moon, and Carl Ray and Joe Moon, spent Sunday night in the Wood home.

Mr. B. W. Casey and family, spent Sunday with his brother, John Casey in the Caldwell community.

Miss Thelma Hinson spent Saturday with Miss Octa Ray.

Mr. and Mrs. Esco Casey spent Thursday night in the Hember home.

Mr. J. W. Willingham spent Sunday night in the Pevehouse home.

Mr. and Mrs. J. W. Bevell, spent Sunday with their parents, Mr. and Mrs. J. E. Hinson.

Mr. and Mrs. O. P. Thompson and three small children, of Canyon, and Mr. and Mrs. Gaither of Lubbock, spent a while Sunday afternoon in the Hinson home.

Mr. and Mrs. O. H. Jerden, and Mr. and Mrs. Homer Guin, Jr., were dinner guests at the home of H. H. Guin, Sr. Sunday.

Mr. and Mrs. C. C. Casey and J. A. Burroughs spent Thursday night in the Bush home.

Miss Ted and Mr. Tommie Sims spent Saturday night in the Coffey home.

Mr. and Mrs. Will Price and children, spent Saturday night with relatives in the Ideal community.

HUPMOBILE DEALER WANTED IN THIS TOWN

We advertised for dealers in fifteen papers last month.

We made nine new Hupmobile contracts. Our dealer organization sold more Hupmobiles last month than have ever been sold in any one month in Western Texas.

Either you did not read the advertisement or else you do not know the value of a Hupmobile agency.

If you are a business man and want to make money, here is your opportunity. Everybody knows the Hupmobile.

J. R. OVERSTREET, DISTRIBUTOR

Fort Worth, Texas
225 Thockmorton St. Phone Lamar 5518

night with Miss Opal Burroughs.

Mrs. Clifford Bond and baby, spent Monday with her parents, Mr. and Mrs. Bond.

Miss Octa Ray left Tuesday for Canyon, to attend the Summer Normal.

Mr. DeShazo returned Thursday from Snyder, where he had been called to the death-bed of his father.

Mr. Johnnie Hefington spent Sunday night in the Bond home.

Mrs. Esco Casey was unable to teach school Friday, on account of illness.

Most farmers whom the hail missed Thursday night, were hit Saturday night. Everyone is buying seed to replant as soon as possible.

Melvin, the son of Mr. and Mrs. W. B. Ray, is on the sick list this week.

Mrs. R. L. Sides was operated on in a local sanitarium the first of the week. Her many friends will be glad to learn that the operation was a success from every angle, and she is regaining strength rapidly.

STOP THAT ITCHING
Use the reliable Blue Star Remedy for all skin diseases such as: Itch, Eczema, Tetter, Ringworms, Cracked hands, Old Sores or Sores on Children. Sold on a guarantee by Lubbock Drug Co. (6-10-22)

Wallace Bains, of the Arkansas Cigar Company, of Little Rock, was in Lubbock Wednesday and Thursday transacting business, and visiting his wife. He has many friends in Lubbock who were mighty glad to welcome him home, but who

hated to see him cut the visit so short. Everything in the "City of Roses" is going along fine and dandy, with the businessmen enjoying good patronage, as conditions were enlightened there considerably within the past few months.

THINGS TO REMEMBER

Advertisers, contributors and all parties interested in the Avalanche please remember these things: We print the Tuesday Avalanche on Monday, press hour, 8:30 p. m. Friday Avalanche on Thursdays, press hour 3:30 p. m. Please have copy for local notices in not later than noon Mondays and Thursdays. Ad changes and copy should not be later than 8:00 a. m., Mondays and Thursdays. It takes a schedule like this to get your ads in the paper in good shape, and helps us give our readers better service, which means that the paper will be of better service to you, which we earnestly desire it to be. We do not want to be exacting but we must demand some things of you, if you expect us to come up to the notch.

PAT NEFF IS OPTIMISTIC

"If you go out to do anything worth while" Gov. Pat M. Neff told graduates of Baylor College in an address at Belton, "someone will hand you a lemon. I get a bunch of them every now and then, but you know what I do with them? I make a lemonade of them."

Mr. Neff has the happy disposition of turning the sour to sweet, and is making many friends by his happy way of doing things. He seems to work upon the theory of doing what he thinks best, regardless of the consequences, and who and what it is.

There is a growing sentiment throughout the country to combine Armistice and Thanksgiving Day in one great holiday. The two holidays come so close together, and the sentiment being very much the same, there seems to be good and sound logic in the plea of those who favor the movement. Armistice Day is truly a day of thanksgiving legalized in honor of the great achievements which humbled earth's proudest empire and put an end to the domination of autocratic government. Armistice Day is a day of international thanksgiving, a day which marks the lifting of the burdens of the world and the enfranchisement of millions of liberty-loving people. It marks a change in the policies of the nations, the crumbling of empires, the fall of tottering thrones and the freedom of nations. Thanksgiving Day is a purely American institution, commemorating the achievements of the Pilgrim Fathers at Plymouth, and is a national harvest festival, fixed by proclamation of the president and the governors of the States. Thanksgiving Day could easily be combined with Armistice Day and then not only the United States but the whole world would rejoice together, pray together and thank Almighty God not only for the mercies of the closing year but for human freedom throughout the world.

Read the orders of election published in this issue of the Avalanche, as they contain valuable information about the proposed bond issues that the City Commissioners are looking forward to as the best means with which to accomplish the work of extending the city water and sewer system. This is a very important election and should have a representative vote of the people of the town. The passage of this bond issue will mean much to the town, and its future development and it will furnish the much needed water and sewer service to the hundreds of homes that do not at this time have it, and cannot have until an extension of the service is made. And then too, the water system for fire protection is woefully inadequate, and gives comparatively little protection to property owners, hence the additional insurance that many are having to pay. In fact, the entire town is penalized on account of it. Both these bond issues should pass by an overwhelming majority, and then on top of that a small extra tax should be voted to equip the fire department with the necessary and enlarged equipment. This is all needed and needed badly.

Retail prices of food are declining in many cities; not much to be sure, only two-tenths of one per cent, since September 15th. This may not be an easy item to compute; but so long as the prices are not on the increase we have cause to be thankful. The one objectionable feature is that the difference between the price received by the producer and that charged the customer is altogether too great. The middle-man's profits, that have been a matter of discussion, need adjusting upon the basis of justice. If there is any man in the world that deserves to be well paid for his labors it is the producer, who takes all the chances. As business is done today the producer takes what the jobbers give him; which is to often a small part of the cost of production, and for this reason there are many farmers who will not be able this year to show even a half day's pay for a full day's work. If there is any class on earth that has good reason to strike it is the farmer; but he lacks organization. If there is any class that needs to be struck, it is the speculators who wax rich upon honest men's labors.

Lubbock craves a Federal Building, and if Uncle Sam had to get him mail at the Lubbock Post-office, and had to do the work that the Lubbock postal clerks have to do under the conditions that exist here, the old man would certainly speed matters up. We are doing business of a city of over six thousand people with the small town equipment. The receipts of this office entitles us to more consideration, and our congressman should see that we are given more attention.

District court is in session this week. This is the beginning of the fall mid-summer term, and while the docket is not as crowded as it has been at times before, there is plenty of business on hand yet. The grand jury is in session, and there will in all probability be some interesting investigation before that body is finally discharged.

The Childress Index last week celebrated its thirty-third anniversary under its present management. Its establishment in Childress was made when there was considerably less than a thousand people in the town, and the circulation was small, as was the paper, but it has grown out of all classes of littleness, and has expanded in usefulness, and its pages are larger and more of them. It is published twice as often as then, and the plant has been enlarged and increased until it now ranks among the best in the West, and that's very complimentary, indeed, as we believe the newspapers of this section of the State are far ahead of anywhere else in the State of Texas or many other states. We read the Index with much interest twice each week. We wish it much success in the future.

Women's dresses are coming down. Fashion has so decreed, and soon the short skirt will be in discard. Not only will they be longer but wider, and this means the consumption of more cloth in their manufacture, and as more goods will be needed there will be greater activity in the textile mills, a greater demand for labor, and a better market for wool, cotton and other materials that enter into the construction of women's raiment. As a war measure we were asked to economize, and the women of America have economized. Now that the war is over and the country settling down to business-like re-construction, women's dresses are to be included in the expansion program.

We hope there will be some way found whereby there can be a lot of this good farm land put on the market for homeseekers this year. There is too much of it tied up in large tracts now. We cannot blame the holders of the land exactly for not selling as the income tax as it stands now would take all the profits and leave no money in the country, but can't there be a lot of it improved and placed under cultivation, so that those fellows from the other sections of the State and other States may come here and begin farming, and begin to live happily. It will make your land worth a lot more money, and it will develop this wonderful country as nothing else can do.

West Texas is getting a lot of very valuable advertising these days, and it will mean a great deal for the future of this section of the State. The East Texas newspapers are having a hard time this year convincing the people of their section that there is nothing in this Western country, but rattle snakes, vinegarroan and cactuses. They are about to make a stampede, and once they break away from that one crop, boll weevil-eaten section of Texas, they will never go back. Better hold them fellows as long as you can. Once a West Texas citizen, he is pretty nearly always one, if he can stand the progressiveness of this attitude.

Lubbock is not in the runt class. She responds promptly to proper nourishment. You do not pour your tax money out for useless things, but when a tax of any kind is placed on the property it immediately gets results, and the benefits are noticeable at once. It will not hurt anyone to pay the little extra tax that bonds for extending the sewer and the water system will necessitate. And again it may not cost anything. Lubbock City bonds will be easily disposed of on the market, and in all probability they will bring a bonus of enough to pay all interest for several years.

The people of Sweetwater recently voted a two mill tax for maintenance of the fire department in that city. That is a good idea, and something of the same nature would not be bad for Lubbock. We have outgrown our present fire fighting equipment, and it is dangerous for this department to be inadequately supplied with fire-fighting paraphernalia.

It will be necessary to extend the city water and sewer lines to the new high school building, and the bond issue which will be voted on soon will enable this as well as furnish city water and sewer service to many new homes, which are modern in every way save for these two things. Vote for the bonds, and keep Lubbock in the growing class.

Out in the Dakotas they have wind storm that are the real thing. During a severe snow storm in Redfield, South Dakota; twelve automobiles were blown into the lake. In the East it does not require a gale of wind to slip an automobile into a wattery grave. An innocent document as an insurance policy frequently accounts for the plunge.

We stated some months ago that this looked like it was going to be a mighty good year for flowers in Lubbock, and we do not believe we missed our prediction at all. We believe that there are more pretty flowers in Lubbock this year than we have ever seen in the city before, and they add much to making it a city beautiful.

Paris has a plague of horseflies. If something is not done to relieve the famine sufferers in Russia there will come out of that country a plague far worse than horse-flies. It will be the genuine article, the real old-fashioned plague, that has from time to time broken its bonds in Asia and Russia and spread over the world.

We doubt if Texas will stand for electing a man to the United States Senate who has to run on his wife's name. If a fellow has been so far away from the right path that he cannot get back under the same name he should not impose on the public by bobbing up unsolicited, and trying to play the game under a nondeplume.

It's about time we're getting ready for that big fair this fall. There is nothing to hinder Lubbock from having the greatest fair this year that has ever been pulled off on the Plains. Our fair last year was a hummer and this year it should be a humdinger. Let's go!

Lubbock needs several miles more cement sidewalks, and a lot of folks are busy these days putting in these much needed conveniences.

Mail the Avalanche a check for \$10, \$15, \$20, \$25 or \$100, and let's finish up this armory fund this week.

EDITORIAL BACKFIRE

Said and Resaid With Comments Pro and Con.

A SQUARE DEAL FOR TEXAS PRODUCTS

The Texas division of the Southern Tariff Association has sent the following telegram to Senator's Culbertson and Sheppard: "The time has come in the South when we can no longer buy in a protected market and sell in a free one. The prosperity of our cotton and peanut growers, our cattle and sheep raisers and other agricultural products are seriously affected by the tariff and we feel that we are justified in insisting that our representatives in Congress vote for and urge equal treatment for raw material as is accorded to the manufacturers."

The endorsement of our position by the unanimous vote of the Texas Bankers' Association in convention here last week should be the best possible evidence of the soundness of our contention. Will you please see that your constituents get a square deal? The continuation of vegetable oils and hides on the free list will do irreparable injury to these industries."

A resolution also was adopted at the meeting held here Tuesday setting aside June 10 as "Tariff Day." It is proposed that meeting be held in all sections of the State on that day for a discussion of the question of whether or not Southern raw materials should be given the same protection extended to manufactured articles in the tariff bill now pending in Congress.

Meantime, arrangements have been made for the circulation of petitions to be signed by all those who believe that Texas products should not be discriminated against.

We have said repeatedly that the real tariff question is what kind of a tariff bill is to be passed. The present Congress is going to pass a tariff bill. It will place protective duties on manufactured products. It is up to the people of Texas to say what they think should be done with respect to Texas products. The telegram sent to our Senators reflects intelligent opinion in the State. But the wide observance of tariff day, and the signing of petitions by voters who want a square deal for Texas products irrespective of politics will do much toward obtaining recognition—Farm and Ranch.

The time has come, in fact it has been here a long time, when farmers must have more protection. The fact that they have no idea what they are going to get for their produce, when it is ready for market is certainly taking a leap in the dark. Some times they land in the right place, but most always they hit the rocks, and are dashed to pieces. Farmers have just as much right to know what their produce is going to bring them as the government knows what their two-cent stamps are going to sell for. When the farmer comes to town with produce there should be a stabilized price for his eggs and butter, and he should know within a few cents of what poultry is worth. As long as the farmer has to grabble around in a benighted manner, he cannot make the success that he should.

WHAT OTHERS SAY AND HOW THEY SAY IT

REGRET

There is not a word in the English tongue which signifies more than the word regret. If expressed every degree of pain in the scale of sorrow, from the childish regret for the lost play-thing to the remorse which can only look forward to a wasted life. Each person has felt its effects; no age escapes it and such will be the case as long as it is human to err. The deepest sorrow is not brought upon us by the world, by its bitterness, its malice, or its persecution. These effect us, however, and make us wiser, more weak, or more brave. We can, if we choose, repel the world's wrongs, we may laugh at the injuries inflicted upon us, or if we cannot command this spirit, we may patiently endure what we do not resent. But, the sorrows we bring upon ourselves by our own lack of discretion are those which cause us to experience what real sorrow is. We can not then repel its attacks with indifference, for regret is the heart's sorrow for past actions—the soul's expediency to better actions. To escape regret, it is necessary to form the habit of doing our whole duty and avoiding impulsive actions. Pause before you say a hasty or cruel thing; think before you raise a confidence, and then deceive it, for there is nothing more likely to cause regret than this. When life is nearly ended we shall

all think of the past—wonder at our actions, and sigh for the days of youth. They will not come to us again; therefore, let us make the best of them now. "For of all the sad words of tongue or pen, The saddest are these, 'It might have been.'" —She Optimist.

REAPING AS WE SOW.

As a people we Americans are too indifferent in matters of national concern.

We are indifferent because we do not enter actively into the discussing and shaping of affairs. We have no time to devote to the national welfare because we are engaged almost exclusively in the accumulation of money for our necessities and our pleasures.

This trait is not found only in the republican party, or in the democratic party, or among any certain class of people. We are all tarred with the same brush, and the tar is thick and black, and sticks.

If things don't go to suit us in Washington we roar chestily for a day or two, and then forget all about it. We don't follow up the roars with definite action.

GHOUGHPHTEIGHTTEAU

No, this is not the name of that animal they are hunting for in Patagonia. It is merely the word potato spelled in English according to the following system: gh for P as in the final letters of Hicough.

ough for O as in Dough. pth for T as in Phthisis. eigh for A as in Neighbor. tte for T as in Gazette. eau for O as in Beau.

Result: POTATO.

It is said that J D Y Z are the only letters in the English language that are not silent in some word or other.

The following paragraphs may be an editorial indiscretion, but we just can't keep from speaking up once in a while.

There are those who say the English language is eventually going to be the universal language for all peoples of the world. If this is true, it is not all the more reason that the present users of the English language should make some effort to simplify its spelling before they pass it on to the rest of the world.

If we are going to give the world something, let's give it in the best of shape and form.—The Rotarian.

"Cultivation of health through proper habits of the mind and the cutting out of bad mental habits is one idea those working on the insanity problem hope to put into the public's head. Brooding over being snubbed by others, or misfortune and injuries, is the thing the ex-

perts want people to stop doing. Work, instead of day-dreaming; these experts say, is a pretty good way to prevent getting lopsided between the ears."—John C. Strong of New York state charities.

"We believe that the one agency most necessary to the success and welfare of our commerce is adequate and efficient transportation. We received excellent support during the distressful war period and are receiving it now. The simple, but all-comprehensive, reason is embodied in the single term, co-operation," to which we pledge ourselves in our by-laws."—John M. Monteath, president Arkansas Cotton Trade association.

THEM OLD CAMP MEETING DAYS

The times ain't as they used to be and every thing is changed. The good old fashion of the past are sadly disarranged! And while I hope the world is getting better all along, It seems to me, that much of this new folderal is wrong; But maybe it is possible I'm boy-ish of late,

And things to which I fondly cling may be out of date; Yet I can't believe that religion, with its cold new fangled ways Can ever reach our hearts as did them old camp meeting days.

They used to gather in the woods, from all the country 'bout, And plant the Gospel batting, and put old Satan out; They'd wash their robes of glory in the Jordan clean and nice, And get their home-spun garments full of cucle burrs and beggar-lice.

They tried to get enough grace before they left for home, To last a year 'till next Camp meeting dates should come, And tho at times they stumbled into Satan's thorny ways, They got a new start every year, at them camp meeting days.

No more in thunder tones the preacher huris his threat at will, In homeopathic doses served on little chips of ice, He rolls out grace and glory with a niceness so profound, You'd think he feared there wasn't quite enough to go 'round, And so I sadly listen as my mind goes back to when,

They all joined in the service each shouting our Amen, No wonder that I sometimes sigh as memory fondly strays, For just a sight or touch from them old camp meeting days.

—Lou Warr.

Mrs. Neal Douglass Jr. left Monday morning for Pochontas, Arkansas, to visit her parents, Dr. and Mrs. W. E. Hughes. Dr. Hughes has been at Hot Springs, taking a Post Graduate course in surgery for the past month, and will meet his daughter at Little Rock and accompany her to Pochontas.

E. C. Young and family left Saturday for Benjamin and will visit relatives in Wichita Falls and other places in that vicinity, before returning home. They will be gone several weeks.

THE LUBBOCK AVALANCHE

William Green Sterett Writes About the Country Called West Texas and Tells of It's Wonderful Resources

"Out West" used to be a term employed by North and East Texas people to define all that world which stretched itself, say from Weatherford to Jacksboro, to the setting sun. In Europe, or rather in France, Germany and England, there are geographical terms which are changed, or more clearly defined, as information in regard to countries and their people increases. For instance, from immemorial the term "the East" has been applied by the countries mentioned to India, and, in fact, to all lands lying east of the Black Sea. But now, that the world knows more of itself, we have in those same countries the terms "Far East," which is applied to the India and China and Tibet, and "Near East," which is applied to Turkey, Persia and Arabia. So we have come to the use of the terms "the West" and "the Far West" when we desire to define what part of the West in our State we have in mind.

The "Far West," in the minds of the people of East, South and North Texas, is that part embraced in what is known as the Panhandle or formerly known as the "Staked Plains." Montague, Wise, Clay, Archer, Young and other counties of their latitude and longitude were formerly in the "Far West," but today no man would think of embracing them in the accepted meaning of that term. Again, this "Far West" is divided into two distinct localities by the people who inhabit it, that is, the "Upper Plains" country and the "Lower Plains" country. Sometimes they are called "North Plains" and "South Plains."

This accepted division of the country is partly, perhaps, due to the presence of a phenomenal geological

formation known as the "Cap Rock" or elevation which runs southeast from Childress county to Andrews county. This rock, which in many places rises abruptly to several hundred feet, is as a great wall, with an elevated plateau behind it, on the north, and lowlands to the south. But this "Cap Rock" in its meanderings does not define the lines of the Panhandle, for, as has been said, it goes in a southwest direction from Childress county, lying on the southwestern lines of Oklahoma to Andrews county, lying on the southeastern line of New Mexico.

Influence of Altitude.
The true lines of the Panhandle lie between the thirty-fourth and thirty-seventh degrees of latitude and the one hundred and seventh and one hundred and fifth degrees of longitude. The altitude of "Above the Cap Rock" is 3,370 feet, speaking generally, as that is the altitude above the sea at Plainview. Of course there are localities of lesser and of greater altitudes, since at Dalhart, in Dallam county, it is 3,700 feet.

At the recent meeting of the West Texas Chamber of Commerce, I has been said in a former article in The News, people from every part of the "Far West" and "West" were present and one had the opportunity, not of seeing the vast domain mentioned, but of talking to representatives of every neighborhood of it.

It was in the "Plains" country that I was most interested, since it was a section that I had never before visited considerably, although I had been to Abilene, to San Angelo and to Amarillo. Naturally I sought out the people of the Plains country for information, and I could also look about me, being in it, and observe the lines of industrial endeavor and the results of it.

Men are made what they are to a great extent. If not wholly, by meteorological conditions and the "face of nature" or the terrain where they exist. The meteorological condition in Central Africa, under the equator, where the sun for ever scorches, and meteorological conditions in the Arctic, where ice and snow forever cover the earth, have made the inhabitants of each just what they are.

Now, this Panhandle country is, as I have said, somewhere near 3,300 feet above sea level, or at least 2,800 feet greater than the elevation of Dallas and its surrounding country. The rainfall in the Panhandle, is said to be twenty-two inches a year, basing the calculations on five-year periods. The rainfall of North Texas, with Dallas representing it in this matter, is thirty-eight inches per annum.

Agricultural Differences.
We have floods and droughts in North Texas as they have them in the Panhandle, and in mentioning the rainfall in both localities, as I have done, I mean the normal rainfall. The difference in such rainfall, as mentioned, and the difference in the tillable character of the soil, if I may call it that, and the difference in the adaptability of vegetation to such soil and climatic conditions, all go to make a great difference in agricultural pursuit. Ordinarily in illustration, our Indian corn is the stable and reliable crop of our country. But on the Plains and further south and west this is not the case, simply because the rainfall is not sufficient.

In its stead are the maize crops, such as kafir corn, which is a plant

adapted from semi-arid regions. In the Plains country and the West it is the "sire" crop, because it is drought resisting, and the elevation relieves it of that humidity common to lower altitudes and gives it at all times a dry climate, and the grain best matures under such a climate.

Now, say in North Texas, this grain will not do well, because there being more humidity in the air the seed is afflicted with a mold that destroys it. It is not meant here that our Indian corn can not be grown in the Panhandle and the West, or that kafir corn and its kindred plants can not be grown in North or any other part of Texas. Rains in the Plains country and the West will make good Indian corn crops and dry weather in all the parts of the State will make good kafir corn crops.

A farmer living in the Plains country not far from Plainview told me that he raised as fine if not a better corn crop last year than he ever raised in Hill county, where he came from.

Use "Go-Devil and Header."
"I planted it and cultivated it with my 'go-devil,' by throwing the dirt from it one time, and after the plants grew a little I put in my 'go-devil' and threw the dirt to the plants and that is all I did," he explained.

On further inquiry I ascertained that this agricultural implement which he called a "go-devil" was a drag on the sides of which were two small disc plows. This fact conveyed the information that the soil was loose and dry because the use of such an implement would be impossible where there was much moisture in the earth or where the land was not loose. And that is the character of the land generally all over the Plains country.

And the climatic conditions are further illustrated by the employment of the header and thresher, combined in the harvesting of the wheat crop. When such harvester reaches the end of its journey across the field the grain which it has cut is in the sack. There appears to be no shocking and stacking of the smaller grains, as far as I could learn.

Barley and rye crops appear to be as common crops as wheat crops. Around Plainview the main crops are the small grain crops, that is the maize and wheat and barley and rye crops.

Last fall, say in September, the wheat crops were planted. The seed lay in the ground all winter without rain moistening the earth. In March a rain came. The result was that it came too late and only a small percent of the acreage planted will produce a crop. But where the soil was damp or a shower fell when the grain was first planted the crops are good.

I walked through several of these fields, and was surprised at the height of the plant and the size of the heads. I am sure that some of these fields will yield as high as 25 bushels to the acre.

Base of Speculation.
And at this point it is well to call attention to the fact that one of the handicaps to this new country has been the introduction into it of people who bought their lands as a sort of "flyer" or who were too susceptible to the promoter or "booster" who secured his "commission" for selling and was not conscientious in his representations when he did it.

One of the prominent men of Plainview told me that in many cases land had been sold in the North to people in cities and towns, such as clerks in the stores and the like, who did not have the most remote idea of farming, but who had saved enough money to buy the land and enough to start in its cultivation. In their ignorance of farming in any place, and particularly in this country, they bought the combined reaper and thresher on credit when they planted their crops. In many cases, as he said, farmers from such States as Iowa, Wisconsin and Missouri had moved in and insisted on following the methods of their old States instead of adapting themselves to soil, climate and other conditions of the new country of which they were profoundly ignorant.

Naturally, there were many failures. But those who were patient and who were content to take things as they were and learn more about them, succeeded beyond the successes of pioneers. Near Plainview I saw and walked in a wheat field of several hundred acres and was informed that it was one of the many that the owner possessed. The crop had been planted early in the fall and a light rain has fallen on it at one time. I am sure that it will produce at least twenty bushels to the acre. I was told that this man had for years raised a fine crop every year and he had become rich.

One of his methods is to break his land the moment he cuts his crop from it. This, they call "summer fallowing." In other words, the broken land is exposed to the summer sun for months and the weeds do not grow. Thus the strength of the soil is preserved and when sowing time comes in the fall, the ground is in fine condition for the sowing.

Letting Land Rest.
Another farmer who has become rich in growing wheat told me he never failed to raise a crop and usually a bumper one. He said his method was to drag disc plows behind the power with which he cut and sacked his grain. The straw from his moving thresher is scattered and played in by the breaking disc behind.

In some cases, as I was informed, the land is permitted to "rest" for a year after being broken.

Whether it is the altitude of the Plains or the cold and dry climate which prevents the advent of the boll weevil, no one seems to know. But that destructive insect has not

yet appeared in the Plains country, and probably will never appear, since enough time has elapsed since its arrival from Mexico, with its natural expansion or extension to enter this Plains' country if it will ever enter it.

Thousands of farmers from North Texas have settled in this section and they have brought with them their reference for and knowledge in growing the cotton crop. The result is that it has become one of the chief crops of the locality. Parenthetically, the chief crops appear to be grain of the maize family, wheat, oats, barley and rye, Sudan grass and sorghum. The lesser crops are melons of all varieties, Irish potatoes and all garden truck, including celery.

This year, on account of the short acreage in wheat, because of the winter drouth, there will be a great increase in the cotton acreage. It being a dry country, it is especially adapted to cotton growing. Possibly cool nights may reduce the yield below that of the country further south to the coast line, but the absence of the boll weevil would offset this vantage of the warm nights. Frequent rain this spring promises, from all I could hear from the people, a fine and very large cotton crop.

The "New" Look.

That which attracts the eye of the visitor is the "newness" of things. In, say, a town like Plainview, every house looks as if it were just painted, and the yards and trees proclaim the attention they have had from their owners. There is a home pride, visible everywhere. The blue grass of Kentucky grows here as it does in the land of its origin. The yards are blue-green with it. Locust and ash trees appear to be the chief forest trees utilized as shade trees along the sidewalks in the towns. The gardens contain all the vegetables and the fruit trees are of the apple, peach, pear and cherry varieties. The currant, gooseberry, raspberry and strawberry grow as in the Middle States. Celery and cabbage are cultivated as crops.

An inexhaustible supply of water is available. The beauty of the place. On the occasion of the late meeting of the West Texas Chamber of Commerce, it was observed that there was not a shade tree along the sidewalks in the town that was not whitewashed. The people had determined to impress visitors with their civic pride and at a meeting it was resolved to whitewash all public shade trees. Every home owner in the place complied. When it was discovered that a church foiled them in their deter-

REV. W. E. HAWKINS, Jr. Now Holding a Co-operative Revival Meeting at Brownfield

JOINT REVIVAL BEING HELD AT BROWNFIELD

W. E. Hawkins, Jr., of Fort Worth, passed through Lubbock Saturday enroute to Brownfield where he started a Revival meeting, lasting over a period of two weeks, beginning Sunday morning.

Rev. Hawkins was in Lubbock four years ago when Evangelist D. L. Coale held a revival meeting in Lubbock, which was successful throughout and in which Rev. Hawkins took an active part.

Rev. Hawkins will hold a co-operative meeting at Brownfield, assisted by the pastors of the various churches, and a singer, Mr. C. G. Spindler, of Tulsa, Oklahoma, well known throughout West Texas, and this meeting bids fair to be a religious feast for the people of that vicinity.

Rev. Hawkins is a forceful speaker, and well armed with a full and complete appreciation of divine law, courage, faith and will, to do his dead level best at all times, will accomplish much good work for the churches in Brownfield.

Having held a meeting at that place three years ago, Rev. Hawkins went to Brownfield with a hearty welcome greeting him from every heart and home, which will be a great assistance to him in making this meeting a success.

While in Lubbock he extended an invitation to the people here to go to Brownfield at any time through the meeting, and said it would be his pleasure to have a large delegation from here at one meeting, and designated the day "Lubbock Day."

We were glad to have Rev. Hawkins call on the Avalanche while in Lubbock, and wish him success in this meeting.

COWDEN HALL OF SIMMONS COLLEGE TO BE REBUILT

Abilene, June 12.—Cowden Hall at Simmons College, destroyed by fire several weeks ago, will be rebuilt as a result of the action of the board of trustees of the institution. The new dormitory will be larger than the burnt structure, modern and fireproof throughout, and will cost about \$150,000. It will be ready for occupancy by the September, 1923, term of school. The fine brick building now under construction, it was said, will be ready for service in September this year.

The Blue Weed and Its Eradication

By R. E. Karper, of the State Experiment Station, Lubbock.

Weeds are comparatively an unimportant factor in farming in West Texas, which largely accounts for the large acreage that can profitably be farmed by one man. They are, however, an important factor in cultivation, as experiments at this station have shown that, where other conditions were equal, weed growth alone has taken an average annual toll of 50 per cent of the grain yield of a crop of milo for a period of four years.

The blueweed is the worst weed pest inhabiting this section and causes a greater annual loss of yield in crops than any other weed. A clearer understanding of the habits of this weed and of the means of eradicating it will lead to systematic effort in dealing with this pest both on cultivated farms and on new lands.

Description
The blueweed (*Helianthus ciliaris*) usually grows to a height of one to two feet. The leaves are mostly opposite, long and slender, and much crinkled and bristly along the margins. The flower head is yellow and otherwise similar to that of the ordinary sunflower, except in size, the diameter of the head being an inch to one and one-half inches. The disk or central part of the flower is of a dark brown color and contains fifty to one hundred and fifty seeds. This disk is filled with chaff, which is quite apparent late in the season.

The seed resemble small sunflower seed, and are of a brown color. The weed bears 1 to 50 seed heads to the plant.

The plant is of a peculiar blue-green or gray-green color, due to the white powdery substance which is found on the stem and leaves. The crushed leaf or stem has a rather peculiar strong odor resembling that of the sunflower. This pungent odor is characteristic and is easily detected when the atmosphere is heavy. When traveling along a road, one often gets a whiff from a nearby patch of this weed.

As will be seen from its botanical name, the blueweed is a near relative of the common sunflower. The root is perennial and sends out underground stems upon which buds are present every few inches.

Distribution
This species of blueweed is found in West and Southwest Texas, Western Oklahoma, and in New Mexico and Arizona. In Texas it is distributed quite irregularly from Dalhart and Lipscomb counties in the extreme northern tier of counties in the Panhandle south to the Rio Grande. The blueweed is quite general throughout the Panhandle and South Plains section, where it is the most destructive and difficult weed pest to contend with that inhabits this region. Lesser infestations are found in the "Breaks" or broken country east of the High Plains and are again present in

troublesome quantities to the south and east in and about Tom Green, Concho, and McCullough counties and south and west in the Rio Grande and Pecos valleys. In general the blueweed is a common and troublesome weed over that portion of West Texas lying on the west of the 100th meridian.

The blueweed is native to this section and grows more or less unobserved in the pastures until the land is sodded and put under cultivation, when it rapidly spreads and comes into prominence. Cultivated fields which have been poorly farmed and become thickly set with blue weeds, if left to go back to grass, will, in a few years, be almost completely occupied by weeds—the blueweed having been crowded out and rendered quite inconspicuous in the sod again.

While this weed normally seems to prefer the low ground and is found usually in the "sinks" or shallow lake beds, and on their margins growing on soil of the Randall Clay series, its growth is by no means confined to soil of this type nor to low spots or lake beds. It thrives and may be found growing in sandy loam soils as well as on the more heavy phases, but not usually on very light or deep sand. When present it is usually on the best land and is seldom found on shallow soil or chalky or gravelly areas.

Habits of Growth and Reproduction
Being a perennial the blueweed propagates itself by its underground roots which live over from year to year, and it also produces seed. The root system consists of both running rootstalks and feeder roots. The running, or propagating roots are more or less horizontal and are found at a somewhat shallow depth, while the feeder roots penetrate the ground to a greater depth. The soil is filled with a network of roots and rootstalks, on each of which are borne numerous small fibrous roots. It is largely from these running roots that the blueweed spreads and reproduces itself and this point must be borne in mind when its eradication is attempted. Every few inches at irregular intervals on these underground stems buds are formed from which new plants grow and find their way to the surface of the ground, where they grow and produce seed and store up energy and food whereby the running roots are able to further extend themselves and form new plants. When these plants are cut off new stems and leaves are put out immediately below where they were cut off and growth is resumed.

In cultivated land the pest appears mostly in patches which have a somewhat rounded form, are quite regular in outline, and vary in size from a small fraction of an acre to several acres. It does not spread very rapidly but is more inclined to concentrate its efforts in making a dense growth, crowding out cultivated plants and other vegetation. There is a common opinion that the blueweed "poisons" the land. It is not known that any toxic substance is given off by this weed. The failure of crop growth in such areas is due for the most part to this weed's robbing the crop of available soil moisture. In years of abundant rainfall fair crop yields are made from infested areas while in dry seasons little or no crop yield is produced, but the blueweed continues to thrive.

In the native pasture the blueweed is necessarily a shallow rooted plant to take advantage of the moisture in the top soil in competition with other weeds and the native grass. That it thrives with culture is shown by its behavior in cultivated lands, only moderately well tilled where it has persisted for years and is apparently getting thicker and spreading in many of cases. When the land is put into cultivation and moisture penetrates to greater depths it sends its roots down deeply, obtaining a firmer hold and is able to more stubbornly resist efforts to eradicate it.

The best time to combat it, therefore, it would seem, is when new land is first put into cultivation and before the weed has had an opportunity to establish such a deep root system. If these areas are thoroughly plowed and cultivated from the time the sod is first broken, eradication may be much more quickly and economically accomplished.

One of the first plants to put out growth in the spring is the blueweed. It sometimes appears as early as January or February. It grows throughout the summer, and forms seed heads in June and July, and maturing them in August or September. The tops die with the first killing frost in the fall.

A large crop of seed is matured but very fortunately the seed are of extremely low viability. The writer has had this pest under close observation for the past five or six years and has not yet seen it naturally propagate a seedling from its seed. If it reproduces at all from seed it is certainly only to a very small degree, as otherwise in this region of high winds, the spread of this pest, owing to the large number of seed produced, would soon have reached such proportions as to have infested practically all cultivated areas. Most perennials propagate themselves both by seeds and underground parts and it is indeed encouraging to observe that in a warfare against the blueweed reproduction from seed seems to be a negligible factor. In such case this would mean that once eradication of a patch of this weed is accomplished completely new and serious infestations are unlikely to occur.

Germination of the Seed
In order to gain more definite information relative to the germinability of blueweed seed, germination tests were made under various conditions, of twenty-two samples of seed, results of which are given in the accompanying table. These determinations were made by the Seed Analyst of the Experiment Station. The samples include seed produced in both the seasons of 1919 and 1920. Out of the twenty-two samples including 1950 seeds

only nine of the samples and twenty of the seeds showed any germination. It will be seen that in general the seed require a long period for germination and when they do sprout it is at very irregular intervals. In one case after passing 100 days in the germinator one of the seeds responded.

Germination was uniformly low in all cases. In the case of four samples the light seed was blown out and only the heavy seed tested. These four samples show a much higher per cent of germination than the others, which, of course, raises the average. Considering the whole number of samples tested, there was an average germination of only 1.7 per cent and when the selected samples of heavy seeds are omitted the per cent, was considerably less than this amount. Considering the low viability shown by these tests under ideal artificial conditions, it would seem that very few natural seedlings are produced, which fact is further borne out by the apparent lack of such seedlings in infested areas where abundant seed is produced. Seeds which are collected and planted in the open ground and irrigated to give maximum conditions for growth gave no seedlings.

An examination of the seed shows them generally to be light and of doubtful appearance as to germinability, frequently many of them being empty and some having been eaten out by an insect. When the seed is fully developed but still slightly green and yet retained in the head they have a plump appearance. It is probable that deterioration of the seed takes place quite rapidly, or that there is an "age" or temperature factor concerned or some other requirement which if properly fulfilled would induce more perfect germination.

Experiments in Eradication and Control

With the view of gaining more knowledge of the habits of the blueweed and determining some practical and efficient methods of its eradication and control experiments were conducted in the season of 1917 to 1919 at Substation No. 8. This station is located at Lubbock in the South Plains region. The soils of this section belong for the most part to one of two classifications, the reddish soils of the Amarillo series, and the brown or dark brown soils of the Richfield series. The blueweed grows on either of these soils as well as on the Randall clay which occupies the numerous lake basins scattered throughout the Plains.

The station farm itself does not contain an area thickly infested with the blueweed, and of sufficient size to conduct tests of this kind. In order to obtain a suitable and representative area a piece of land was selected some four miles from the station. The soil of this area was Amarillo clay loam. Scarcity of labor at this time and the distance from the base of operation made it somewhat difficult to conduct the work in an altogether satisfactory manner, but information of practical value was obtained relating to the eradication and control of this pest and the merits of various cultural operations for this purpose established.

A location was selected which had a thick and uniform stand of blueweeds and was divided into one-twentieth acre plats to receive treatment as follows:

- Plat 1. Cut weeds with weeder-blade attached to cultivator.
- Plat 2. Plowing and replotting seven inches deep.
- Plat 3. Plowing and replotting four inches deep.
- Plat 4. Listing and relisting seven inches deep.
- Plat 5. Listing and relisting four inches deep.
- Plat 6. Listing and lister planting cotton in 3-foot rows.
- Plat 7. Listing and lister planting cotton in 6-foot rows.
- Plat 8. Listing and relisting to keep down weed growth until June 15, when milo was listed planted.

The first five of the above plats were thus followed, growing no crop, but receiving treatments as specified without any other intervening tillage.

Six smaller plats, one square rod in size, were laid off as check plats. One was hand-weeded, one was smothered, one was treated with salt, and the others were treated with other chemicals.

This project was started in the fall of 1917, but the fall and winter were so dry that cultural operations on the plats could not be done before the following spring. The whole field, including the platted area, was thoroughly disked in the winter of 1917-17 and listed early in April, 1918, and these operations should be counted against the treatment of the plats of this season. The season of 1918 proved to be an extremely dry year, which was of assistance in subduing the weed, but made cultural operations difficult. For this reason also stands of the crops planted were difficult to obtain on plats 6, 7, 8, and because of the further fact that they were too distant to be given timely cultivations they were dropped from the test.

Treatments were given on all plats on uniform dates as follows: May 22, July 6, and September 24, 1918, and April 15 and June 5, 1919.

Cutting With Weeder-blade.—A "weeder-blade" had been devised on the station for cleaning roadways, weed paths, and fallow areas. The attachment consists of a long, straight, heavy blade similar to a go-devil blade but heavier, which is fastened to the shaft of a riding cultivator and set nearly flat with the ground. This is let into the ground the desired depth with the rollers, cutting clean low the surface. This implement covers the ground rapidly and does good work, especially where the land is free from trash and in good till.

Plat No. 1 received treatment with this implement. At the end of the season of 1918 this plat still showed a large number of weeds uniformly over the area, but they were thinned out somewhat and

WHEAT CROP BENEFITTED AT WHITE DEER BY RAIN
White Deer, June 12.—Recent rains benefitted the blooming wheat crop 25 percent. The average yield is expected to be around 20 bushels. One-fourth of the acreage, however, was damaged by "green bugs." The strawberry crop is unusually large this season.

COTTON

For December delivery is worth more than 22c per pound on the New York Exchange and still climbing.

A good stand of cotton planted now will mature as early as a poor stand planted earlier and requires less work.

Most of our seed were grown after the middle of June. It is bred for early maturity, length of staple and acre production.

We have just received a stock at Lubbock by express. Price \$2.25 per bushel. Also a few Mebane at \$1.75 per bushel.

Sensational Campaign for Members to be Launched by American Legion July 1st—Local Men to Take Part

"Yo, ho, Buddy! Forward March! Let's go!" is the call that will be heard from the local post American Legion, July 1st, when the national drive for membership is waged, and that the Lubbock "bunch" will have a hand in this affair is seen from the fact that Adjutant Bennett Slagle is already aligning his forces, making inspections as to their standing in the legion, hustling them up to get their names on the dotted line, and into the local post, urging them to assist in every manner possible to make the first day, "Lubbock Day" in the national affair.

Those fellows have all the local distinction necessary for their going as they have the confidence and best wishes of all Lubbock, and now comes a national membership week, and they have gotten ambitious to make a showing, and as the figures are based upon population we are sure those fellows will be heard from.

The Lubbock post membership represents almost every line of service the States had to offer—army, navy, marine and all the auxiliary services, are represented at meetings of the local post by men who "made good" at the job they were given while in that service.

Yes, another drive is on and the entire personnel of the ex-army is in line to make one of the most sensational showings the newspapers have had occasion to report

Baylor University Commencement June 14th to 16th

The Avalanche acknowledges receipt of an invitation to attend the Seventy-seventh Annual Commencement Exercises of Baylor University, at Waco, which will occur June 14th to 16th, and the following is the events of the week:

10:00 a. m. Commencement Exercises. Address by Judge William Pierson, B. L. '96, Austin; Confering of Degrees; Granting of Diplomas; Announcing of Scholarships and Honors.

ALEXANDER BROTHERS ARE GOING AFTER LAND BUYERS

When an Avalanche reporter went into the office of the Texas Land Exchange Friday and noticed that all hands were busy, mailing out letters and circulars setting forth the advantages of the Plains country, we made a bit of inquiry as to what it was all about, and learned that they had worked up a keen system of collecting a mailing list, and were busy answering the mail brought in that day, sending printed matter (all off Avalanche presses) to parties requesting some light on the possibilities of the Plains.

Several weeks ago the Alexander brothers, owners and managers of the Texas Land Exchange, decided that they needed a mailing list gathered from among the farmers of other sections who had their eyes on the Plains, and immediately made out a card on which names of prospects could be written, and mailed them to many people over West Texas, who in turn, filled the cards to full capacity of names of men who would possibly come to the Plains, and returned it to the office here. Wonderful results have been obtained through this method, get the idea that there was printers ink on those cards, and a large stack of them well filled,

Many a good man lived a hard life because he thought that fortune would come through luck.

There are men who become independent on the information secured through the failures of others.

SAFETY THRIFT

Are the fundamental principles of independence. You know that but are you cashing in on what you know?

The Lubbock State Bank

Capital and Surplus \$165,000.00

having arrived on the morning train, was the cause of the extra rush in that office.

The Texas Land Exchange bunch are a working force, and they have worked so hard throughout the past several months that really good work has been accomplished for Lubbock, inasmuch as they have brought some of the most substantial citizens to this section through their persistent method of staying on the job, boosting Lubbock county in every way possible, always being conservative enough to let their prospectors find after arriving here, that everything they had claimed for Lubbock would prove true.

MT. PLEASANT MAN MAY LOCATE IN THIS CITY

D. Y. Holcomb, of Mt. Pleasant, Texas, was in Lubbock last week prospecting, and while here visited the Barrier Brothers, friendship with whom was cemented in the days those young men resided in Mount Pleasant.

Mr. Holcomb, after looking about Lubbock and the surrounding trade territory, expressed great surprise at the rapid developments made on the Plains, and declared it his intention to locate here at the very first opportunity.

We are mighty glad that Lubbock is attracting the attention of outside businessmen, and frankly believe that the friendliness of our citizens is the greatest drawing card in the deck, outside of the wonderful opportunities offered here for the man who will mix earnest effort with gray matter in the operation of business enterprises.

Lawrence Martin, who has been attending the State University the past few months, will return home Sunday. His many friends will be glad to know of his return.

NOTICE OF ELECTION

ORDINANCE NO. 206

An Ordinance calling an election whereby the duly qualified voters of this City, may determine if Bonds of the City of Lubbock, Texas, shall be issued in the sum of \$100,000.00 for the purpose of rebuilding, extending and improving the Sanitary Sewer system of this City, fixing the date of such Bonds, their rate of interest and the several maturities of such Bonds, the date of election on such proposition, the officers and the place to hold the same, notices for such election, the manner of voting; provided, that if such proposition shall be carried by a majority of the votes, that a tax shall be annually levied sufficient to meet the interest and create a sinking fund to retire the Bonds at their maturities, and declaring an emergency account of insufficiency of the present system being dangerous to health of the citizens.

Be it ordained by the City Council of the City of Lubbock, Texas:

Section 1. That an election shall be held at the office of the City Secretary of the City of Lubbock, Texas, on the 18th day of July, 1922, at the usual hours for holding elections, whereby the properly qualified property tax paying voters of this City shall determine if Bonds of the City shall be issued in the amount of \$100,000.00, for the purpose of rebuilding, extending and improving the Sanitary Sewer System of this City.

Section 2. The following persons shall hold said election, as judges: W. S. Clark, R. T. Penney and L. H. W. Perry, and same shall be held in conformity with the general laws of this State governing elections. Those desiring to vote in favor of the issuance of such bonds shall have written or printed on their ballots "For the issuance of Bonds in the sum of \$100,000.00 for the purpose of rebuilding, extending and improving the Sanitary Sewer System, and levying a tax to pay the interest and create a sinking fund to redeem such"; those opposed to the proposition shall have written or printed on their ballots, "Against the issuance of Bonds in the sum of \$100,000.00 for the purpose of rebuilding, extending and improving

the Sanitary Sewer System and levy of a tax to pay the interest and create a sinking fund to redeem such."

Section 3. If a majority of the legal voters voting at such election shall vote in favor of the issuance of such Bonds, same shall be issued in the sum of \$100,000.00 each, be dated the first day of August, 1922, bear interest from date, payable semi-annually not to exceed six percent per annum, and shall mature in numerical order three Bonds each year, beginning the first day of February, 1925, and continue to mature in like number and sequence for a period ending first day of February, 1956, the two Bonds next in order shall mature first day of February, 1956, the two next in order the first day of said month, 1957, the two next in order the first day of said month in 1958, and one bond each year thereafter on the first day of said month thereafter until the remainder have matured; and a tax on all property subject to taxation within the City shall be levied, each year sufficient to pay the interest as it accrues and to create a sinking fund to retire such Bonds at the several maturities.

Section 4. The Mayor and City Secretary of this City shall give notice of the holding of such election by causing to be published for

the time required by law a duly certified copy of this Ordinance in a newspaper published within the City.

Section 5. The fact that there is not adequate protection to the health of the people of the City because of insufficient sewer service, creates an emergency and public necessity that the rule of the Charter which requires an Ordinance to be presented at two several meetings before adoption be suspended, and that this Ordinance be passed at the meeting of its introduction, and effective upon its approval.

Approved: Percy Spencer, Mayor.

(Seal) J. R. Germany, City Sec.

City of Lubbock, Texas.

THE STATE OF TEXAS.

City of Lubbock.

W. H. Spencer, Mayor.

J. R. Germany as City Secretary, of the City of Lubbock, Texas, a municipal corporation, hereby certify that Ordinance No. 206, of which the foregoing is a true copy, was regularly passed by a unanimous vote of the City Commission of said City of Lubbock, 8th day of June, 1922, was approved and is of record in Vol. 3, page 56 of the Minutes of said City as shown.

Seal. PERCY SPENCER,

Mayor, City of Lubbock, Texas.

Attest—J. R. Germany, City Secretary of City of Lubbock, Texas.

A thought for today:
Grief should be like joy—
Majestic, equable, sedate, sedate,
Confirming, cleansing, raising, making
free,
Strong to consume small troubles,
to command
Great thoughts, grave thoughts,
thoughts lasting to the end.
—Butler.

Miss Lula Mae Craven is in Waxahatchie, where she will take a post graduate course in expression, in the Curry Method. She will be there thru June, after which she will study in Boston, Mass., for two months, and upon returning to Lubbock on September the first, she will take up her class at home.

1911 Needle Club
Miss Delia Wilkinson and Mrs. Friend were club hostesses to the nineteen eleven needle club on Thursday afternoon. A pleasant afternoon was spent and delicious refreshments served before the guests dispersed. A good attendance was reported.

Mrs. J. O. Smith and Miss Margaret have returned from Wichita Falls, where Mrs. Smith has been visiting her sister, Mrs. Jones. Miss Margaret has been attending school there during the year, taking special work in music, as well as her regular studies.

Mrs. Smiley Wilson has returned to the city after a pleasant vacation with relatives and friends in Dallas. She was accompanied by Miss Mary, her little daughter.

In all the affairs of human life, social as well as political, I have remarked that courtesies of a small and trivial character are the ones that strike deepest into a grateful and appreciating heart.—Henry Clay

HOCKLEY AND COCHRAN COUNTIES:

For Tax Assessor:
W. G. FRAZIER,
LEONARD C. TOW.

For Sheriff and Tax Collector:
J. A. STROUD, (re-election)

A number of Lubbock folks were week end visitors at Post, where they enjoyed the camping facilities that Post affords, and came back much refreshed after the delightful outing. Among the party were Mr. and Mrs. L. T. Martin and Mr. and Mrs. Fred Oliver and son.

Mrs. W. O. Stevens will entertain with a forty two party on Wednesday afternoon, at the Cova.

Mrs. M. L. Leach of Waco, is visiting her daughter, Mrs. G. W. Scott of this city.

Mrs. B. L. Barnes from Boston, Mass., is visiting Mr. and Mrs. W. F. Parkhill of Lubbock and will remain here several days.

Mrs. Russell Boyd of Aspermont is visiting her sisters, Mrs. G. K. Germany and F. N. Payne of this city for a few days. Miss Lucile Payne returned with her aunt, Mrs. Boyd, from Aspermont, where she has been visiting since the school holidays began, bringing with her Miss Vivian Kelly of Aspermont, who will be her guest for several days.

Friday Needle Club
Mrs. W. H. Long entertained the Friday Needle Club with a delightful afternoon in special homelike surroundings. Mrs. Hoyt Agnew. Following an evening of sewing and social conversation a delicious luncheon of salad, sandwiches, olives, ice tea, date pudding and ice cream was served by the assistant hostesses Misses Lois and Marie Long and Ruby McBride to the following guests:

Mesdames Hunt, Fluke, Waters, Spikes, Leache, Scott, Alexander, Lindsey, Pryor, Westlake, Parkhill, Barrows, Walker, Bryan, Murphy, Twitty, Jones, Hicks, McSpadden, Hall, Mitchell, R. A. and Frank Barclay, Fite, Hornsby, and Hayne.

Loge Parties

A number of delightful loge parties have been rumored during the past week but the Society Editor has not been able to find anyone that would give a report of these parties and of course cannot write them from her imagination. They were dainty and delightful, no doubt, for the Lindsey has indeed been made into a pleasure house that is both unique and delightful and reflects great credit upon the manager, Mr. Rowley. We predict many delightful loge parties for the coming summer months, in this cool spot for the hot afternoons and we will appreciate having a report of such parties phoned in to 45-J any afternoon of the week and any morning except Monday, Wednesday and Saturdays.

Mr. and Mrs. T. H. Ellis entertained a few of their friends last Thursday evening with 42 and a delightful evening was reported.

Mrs. Quillen presided at the Punch Bowl and assisted in the entertaining.

We are glad to publish clipping from Shawnee Morning News:

Miss Groce Honors Miss Bacon
A big home, a big crowd, a big time and a hostess with a big heart made the evening a big evening for memory's sake when Miss Bertie Lee Groce entertained informally at dancing and bridge Monday evening at 8:30 o'clock in her home, 519 South Oak street, complimentary to her house guest, Miss Blanche Bacon of Lubbock, Texas, who during the past school year was a student of Ward-Beimont, Nashville, Tenn.

The rooms were gay with a riot of roses of pink and white and large baskets of fernery, while the lights peeping through their gorgeous shades of pink casting their gorgeous rays about the dining room, revealed the gay and festive spirit of spring time while the guests danced to the select music of the unseen players.

One of the big features of the evening was that of the solo dance, given by "Doc" Allen in his exquisite and charming manner.

But lo! this was not all for at a late hour came the dainty and delicious ice course with colors of pink and white predominating and sweet peas as favors, served by the hostess who was assisted by her mother, Mrs. B. A. Carter.

The guests of the evening were: Misses Blanche Bacon, Corinne Givens, Annabel Atkins, Marguerite Atkins, Helen Legate, Margaret Red, Wilma Howell and Elizabeth Phillips.

Messrs. Stanford Childers, Carl Givens, George Eckles, Doc Allen, Byron Williams, Clyde Campbell, Johnnie Gilmore and Everett Meador.—(Contributed.)

Miss Bacon is now home with her parents for several weeks and the young people in Lubbock welcome her again into their midst. We wish for Miss Bacon a most delightful summer's vacation.

Thursday afternoon Mrs. C. L. Quillen entertained with bridge at the home of Mrs. T. H. Ellis, the most enjoyed game. Mrs. H. H. Griffin won high score. The house was prettily decorated in roses and a luncheon served consisting of chicken croquettes, potato chips, sliced tomatoes, bread and butter, sandwiches, fruit salad, strawberries, cream and cake to the following guests:

Mrs. C. S. Griffin, Earnest Conley, Elmer Conley, Wheelock, Germany, Payne, Hutchinson, Denman, Winn, Slaton, Cooper, Woods, Krue-

ger, Merrill, Lindsey, Stephens, Hurlbutt, Hilton, Simpson, Pierce, Faulk, Mass, Cockerell, H. H. Griffin, Misses Winnie Bates, Mary Meador, and Margarette Gunther of Canyon City.

Mr. and Mrs. T. H. Ellis entertained a few of their friends last Thursday evening with 42. Mrs. Quillen presided at the punch bowl and assisted in entertaining.

Mrs. C. S. Adams received a message from her sister, Mrs. Tom Thornton of Lubbock Wednesday, stating that they had lost their home and entire contents by fire, the fire being caused by the explosion of an oil stove. Mrs. Thornton received several burns but not of a serious nature.—Dublin News.

HOUSEHOLD

Pancakes-on-the-Table—Put into a bowl a cup and a half of sour milk (or more or less, depending upon the size of the family and the amount of milk you want to use up) and break into it as many bread crumbs as it will possibly absorb and let stand for three or four hours. When you are ready to use the pancakes, add enough flour into which you have sifted one-half teaspoon of salt, to make a proper batter, and one egg. Dissolve one-half teaspoon baking soda in a very little sour milk and add that last of all. Fry on the electric plate on the table and serve with maple sugar. These cakes are much lighter and far more digestible than cakes made with flour as the only means of thickening. They are also a good way to use up dry bread and sour milk.

Philadelphia Salad—Arrange four cheese balls, made from Philadelphia cream cheese, moistened with a little cream and rolled in chopped nuts, on crisp head lettuce for each serving. One square of cheese will make eight to ten balls. Serve with a French dressing highly seasoned in which a small sized raw peeled onion has been standing for three hours. This will give a very delicious flavor to the dressing, without the inconvenience of eating onion itself. Remove the onion just before serving and add a hard boiled egg, cutting the white into small pieces, and putting the yolk through a sieve. This is a good salad to use when you wish to use fruit elsewhere in the menu.

Baisert—Arrange on a pretty dish four meringue kisses for each serving and cover with a cup of cream, whipped, and let stand in the ice box during dinner. Just before serving, sprinkle with one-half cup of grated, sweet chocolate. This is a very pretty dessert, and very easy to prepare.

Helpful Hints
To Estimate Weight of Block of Ice—A close estimate of the weight of a block of ice can be made by multiplying together length, width and thickness of the block in inches, and dividing by thirty. This gives very closely the weight in pounds.

Example: A block 10x10x20 inches multiplied as above gives 200; divided by 30, gives 30 pounds as approximate weight. A block 10x10x6 would estimate 20 pounds.

To Bleach Muslin—For fifteen yards of muslin dissolve one-half pound of chloride of lime in a quart of rain water (if attainable). Soak the muslin over night in warm rain water. Wring out the cloth and put in another half rib of warm rainwater in which the solution of lime has been poured.

LEST YOU DO NOT KNOW RANGE SLANG

A "dogie" is a calf whose ma is dead and whose pa has gone away with another cow.

A "sleeper" is the calf of a stray cow, whose ears have been slit by a fellow who did not have the nerve to brand it at the time, but hoped to brand it in the future when there was less danger of being caught up with.

A "cottonpicker" is an imitation of a cowpuncher. He wears a big hat, chaps, big spurs, a red neck handkerchief, a wild look and couldn't ride a stick horse with safety. His pictures are often found in magazines and the movies.

A "coosie" is the man who cooks and wakes up the boys in the morning by hollering "chuck."

A "hot roll" is the roll of bedding of a cowpuncher.

"Bulldogging" is the act of throwing an animal down by main strength and awkwardness.

"Case of rings" is when a member of the outfit "rings and jars" at the "coosie" the wrangler, and fights his horse.

The boss is the man who keeps the time, carries the check book, and tells the boys when to "head in."

BARBECUE AND CELEBRATION PLANNED AT BUFFALO GAP

Buffalo Gap, June 12.—June 28 has been fixed as the date for an immense barbecue and picnic for I. O. O. F. Lodges of Abilene, Buffalo Gap, Ovalo and other towns in this section. The festivities will be held in the beautiful live oak park here.

J. L. Benton, one of Lubbock County's really big farmers, who has made a business proposition of managing his place, was in Lubbock Friday transacting business. His place is ten miles southeast of Lubbock, and that section was fortunate enough to have been missed entirely by the hail, and the rain injured the crops very little, which we are mighty glad to hear.

Dan B. Meyer, of Sealy, Texas, was in Lubbock last week transacting business matters.

Express Packages and Shipping Boxes

The Leader is receiving new goods every day. No certain shipment—just a variety of everything that is needed to make our stock the largest, newest and most complete on the South Plains.

—And we are buying in quantities so that we can sell our goods to the public at the lowest possible prices.

—If you have not paid the Leader a visit recently ask some of your neighbors about the change we are making.

—As we have stated before, our prices and the quality of our goods will create a volume large enough to justify our faith in the people's desire to lower their living cost.

—In Men's Clothing, Shoes, Piece Goods, Hats, Shirts, etc., we are securing a generous patronage from those who come in to see us.

—And we are further rejoiced to find that those who do come in "shopping" make purchases. Especially is this so among the women of Lubbock.

—Men's Work Clothing in our store is meeting a popular demand for long wear at modest cost. A few minutes of your time will convince you that working people appreciate our efforts along this line.

—And the "Nobby" Suits for young men and men who stay young, are moving steadily. There is style, and the very latest, good cloth and long wear, in the suits we offer.

—The fact of the matter is: You would be surprised to learn of the variety of goods we offer at prices that make selling an easy matter.

—So, the new things that are coming in daily will supply you with the many things you have probably been wanting but couldn't get in Lubbock. Come in often and see. We'll be glad to show you and to serve you in the most courteous manner.

ONE-HALF PRICE

ROTARY NOTES

(By L. T. Martin.)

The Kiwanis Club are good losers, and entertained in a royal manner the Rotary Club in payment for the contest between the two clubs at baseball, when he Rotarians won over the Kiwanians with a score of 12 to 8. This game was played square and fair, notwithstanding the fact that Smiley Wilson, in his address of welcome to the Rotarians at the luncheon held in the Robinson building, stated that Red Kuykendall was unfair in his decisions as an umpire. We will have to stick up for Red in this instance, and exonerate him from all blame in any decisions he made in that game. He showed that he was unbiased by the fact that when L. T. Martin, mascot for the Rotarians, caught a pop-up by Rotarian C. L. Griffin, he immediately called Griffin out.

George W. Foster responded for the Kiwanians to the subject "Mutual Benefits to Accrue From Such a Meeting as This." He at first was of the opinion that there was no mutual benefit in meetings of this kind, especially as it was the result of a baseball game which the Kiwanians claim Red Kuykendall decided in our favor. However, when he saw the smiles of satisfaction on the faces of the Rotarians after eating such an elaborate spread as they had put on for us, he decided that it was well worth the money, and that it was good to live in a town where the Kiwanis and Rotary spirit meant more than just an existence, and where a home meant more than a place to go and sleep. Citizenship in a town like Lubbock carries responsibilities with it in which the confidence of the business men in each other is without price.

Weather and Crop Condition From Many Texas Points

Spur, June 8.—Cotton is growing rapidly, and it is expected at this time that the largest crop ever gathered in this section will be harvested this fall. The five gins are getting in shape to take care of the big crop expected to be ginned here. Some estimate that between 20,000 and 25,000 bales will be shipped from Spur this season. Pecos, June 8.—Farmers in the Northern Pecos county district whose crops were damaged by the usual hail storm Saturday are replanting. The prospects are that section will be able to get the stalks up in time to make a good yield. A good stand is assured in the district. Round Rock, June 9.—A heavy rain fell here Tuesday night. It will be helpful to corn, cotton and gardens. La Grange, June 8.—Almost every section of the county has received a good rain during the last several days. Unless there is a storm or hail, a good yield of corn is assured. While cotton was not suffering for rain, it will also be benefited. Temple, June 8.—This section was visited by an inch rain Wednesday. The corn crop is practically made as a result. Young cotton, and that just planted will receive great benefit. Older cotton will likewise profit by the rain, as in many places the plant has been attacked by lice. No damage was done to grain.

WEEVIL LOOMS AS SERIOUS MENACE

New Orleans, June 8.—Never before in the history of the cotton industry has a crop been so exposed, as is this year's crop to the possibility, if not probability of serious damage on the part of the boll weevil. Owing to the extreme backwardness of the season and because of the unusual early appearance of the weevil, at some points one month earlier than last year, and in abundance, destruction of the crop is threatened in event of their becoming actively destructive during the fruiting state of the plant. As the season grows older, weevil are apt to increase in numbers. The present is only the first of five broods of a year. If they become destructive during the summer months there is no telling how high prices may go. That the situation is serious there is no doubt, and the continuance of unfavorable unsettled weather inland makes the outlook all the more threatening, so far as the probable final outcome of the crop is concerned. Meanwhile the stock at all United States ports today is only \$57,000 bales against 1,600,000 one year ago, and stocks at the 39 counted interior towns last Friday was only 580,000 bales against 1,237,000 last year, making a total at the ports and counted inland towns only 1,437,000, compared with 2,840,000 last season, with the new crop reported two to four weeks late.

Would You Want to Drink This Kind of Bootleg Whiskey After You Read What Official Says About Where It's Made

In a signed statement Mr. A. C. Manning, County Attorney, Major County, Oklahoma, gives some really remarkable information showing the fearful character of the whiskey made by moonshiners and sold by bootleggers at exorbitant prices. Mr. Manning declares that most of this whiskey made of rotten grain or other materials, and that it is usually in buried barrels which have been found on various occasions to contain as much as a gallon of flies, with butterflies and other bugs for the sake of variety; and sometimes a crow or ground squirrel in a bad state of dissolution. Mr. Manning's statement is as follows: "I have personally visited a large number of illicit stills during the past year and in that time I have seen what is called whiskey in every stage and form imaginable. Stills should be of the very best grade of copper, very few 'moonshine stills' are, many of them have never seen copper, though most of them have a few parts of copper, the balance being rubber hose, galvanized iron, well pipe and even tin. How It is Made. "The cooker or retort in which the mash is placed and from which the heat drives off the alcohol and fusel oil, is usually a very dirty filthy can, round or square or oblong. Some were ice cream cans, some five-gallon galvanized oil cans, some teakettles, some coffee-pots some wash-boilers, while others were iron oil barrels. They were covered with dirt, soot, and mash that boiled over, or out through a leak, run down the sides and had become burned into the outside. "The insides of these retorts were much worse, if possible for them to become more dirty and filthy, for there is no way to clean them since the tops are soldered on and only small openings left for the steam to go into the coil and another small opening through which the retort is filled with the raw mash. Old rotten mash collects on the sides, becomes encrusted there and each time it is used another layer is added to the fifth already collected there. "The coils are sometimes masterpieces consisting of a piece of common rubber hose running from five to twenty feet in length, sometimes a piece of galvanized well pipe, sometimes the gasoline line pipe from 'Henry' has been twisted into a spiral and answers the purpose, sometimes a tin box with the lid soldered on, sometimes a sure enough copper coil that has answered its purpose in a discarded soda fountain, sometimes 'Old Trusty' (incubator) has been robbed of its hot water pipe. "The mash is a wonderful thing, consisting of rotten grain, fruit or even syrups, mixed with water, yeast and sugar, and with a smell that would put a glue factory to flight. This mash is usually mixed in common barrels, although sometimes in old stock-tanks, and they must be hid for the officer on trail of a moonshiner, has finished his search when he comes to the mash. Amazing Filth. "We have found them buried in the earth with only a small piece of pipe sticking out of the ground, sometimes these buried barrels are found in the center of a large brush heap, with only a few inches of well pipe sticking out to let the air in, sometimes in an old building, sometimes in a cellar, again they may be found in straw stack or hidden out in the pastures. "I have seen all kinds of things in these barrels. On one particular occasion I saw more flies than could be put in a gallon bucket on each barrel of mash; butterflies and all kinds of bugs gather over the stinking stuff and finally drown in the 'spirits.' I have made other discoveries, too; for instance, 'Old Crow,' I have found how that 'notable stuff' came by that name. During the summer of 1921, in company with the sheriff and deputy sheriff of our county, we made a raid on an established moonshiner and took possession of several barrels of mash; when we emptied the barrels to destroy them, in the bottom of one was a large, fat, black crow. How long he had added his carcass to the manufacture of 'Old Crow' I am unable to say. Then again we often hear of 'Squirrel Whiskey.' For a long time I thought that was a kind of whiskey which would cause a person under its influence to want to climb fence posts, telegraph poles and other objects, but that is an erroneous idea, for we have found innocent looking little brown coated animals, known as fox squirrels, in the bottom of other barrels of mash. In other barrels we have found numbers of sparrows."

HOBOES MUST WORK IF THEY STAY IN WILBERGER

Vernon, June 10.—County Judge E. L. McHugh has declared war on all vagrants in Wilberger county. He has issued pro-employment orders that persons in camp-wagons and hoboes be picked up and made to work. The practice of campers remaining on county roads without any visible means of employment apparently engaged at nothing is not to be permitted, he says. A death of farm labor is now reported. Little Miss Christova Sawyer of Brownfield, returned home last week after an extended visit with her sister, Mrs. Raymond Barrier of this city. A. M. Guinn, was here Friday of last week from his home in Dallas.

KANSAS LADY VISITS PARENTS IN LUBBOCK

Mrs. A. J. Mangelsdorf arrived in Lubbock Friday from her home at Atchison, Kansas, to visit her parents, Mr. and Mrs. A. B. Ellis. She was accompanied by her baby, John Ellis, and it is needless to say both received a hearty welcome on their arrival. After spending about three weeks here, Mrs. Mangelsdorf will leave for Wichita, N. Y., to join her husband, who will enter Cornell University at that place. Mr. and Mrs. W. B. Sawyer of Brownfield, visited at the home of their daughter, Mrs. Raymond Barrier, last week.

Guy Hufstedler Says the Plains Country Is "On Top of the Earth" and Has Many, Many Valuable Advantages

After a visit to his old home place, the home of his kid-hood days in Hood County, which he enjoyed very much, and which had a tendency to create within him a greater respect and higher ideal for Lubbock County, Guy Hufstedler is back at home better pleased with Lubbock than ever.

Just to show some of his friends who have never had an opportunity to acquaint himself with the Hon. Mr. Etem Up Boll Weevil, he has brought several of the creatures home with him, in a well sealed bottle, which is guarded with absolute care that they may not get

away, and start their activities in Lubbock County.

While Guy has always been a good Lubbock booster, and needed no incentive to prompt him to speak bold admiration of West Texas, he is boosting louder than ever at this time, and told an Avalanche reporter Saturday that all human beings who are fortunate enough to live on the Plains should thank their God for their deliverance from those pests.

Cotton there has not started fruiting as yet, and the insects are living on the leaves, absolutely blanketing every field from row to row, the full length of them all. A mechanical device which offers a possi-

bility of some re-life, however, has been put into use. It is a furnace drag, about four feet long, which is pulled by one horse, somewhat in the same manner a cart is pulled, and as the drag is moved along, it automatically turns a bunch of suction fans which carries the insects into the furnace, where they are burned to death, but whether this method is absolutely successful or not is unknown at this time, but it is sure to do a great deal toward exterminating them.

"That whole country is absolutely hopeless" according to Guy, who declares that what crops that are not being riddled with insects have been washed and re-washed by the heavy rains and are not growing well, and the prospects are "positively discouraging," he said.

With thousands of acres of the finest land anywhere, far removed from the ravaging boll weevil, leaf worms, cut worm, and a thousand other crop ruining parasites, the Plains is "on top of the earth," where the farmers, unmolested by drouth, and more suitably located than any people on the earth, carry on their work with a firm grip on life, and a buoyant spirit that ever challenges their better efforts to do the big work set out before them, prosper year after year, making rapid developments and creating industries that are designed to become lasting monuments to the work they have done.

We are mighty glad to have Guy at home again, but regret that those who are unappreciative of Lubbock were not with him. Guy has always been a Lubbock booster and such trip was not necessary to keep kindled that fire of municipal patriotism in his heart, and inasmuch as there are many here who have done very little but knock on the town, its people and the things that have been accomplished, about the best sentence we could issue them would be a six months' stay in the boll weevil infested section of Texas.

Come to the Plains where crop failure is seldom experienced, and where the children have to read about crop parasites to know anything about them.

TEXAS AND PACIFIC RY. BALASTING ROAD BED

Baird, June 10.—Rock ballasting of the Texas & Pacific railroad from Baird to Sweetwater is proceeding rapidly. The ballast has been put under the track almost to Abilene. Large gangs of Mexican labor are being employed in this improvement work. Heavier steel is being laid as the track is ballasted. In a few months the Texas & Pacific will have one of the finest tracks in Texas from Fort Worth to Sweetwater, a distance of approximately 203 miles. The work of ballasting this line was started during the Ranger oil boom, a rock crusher being erected and operated near Ranger.

CORPUS CHRISTI COTTON GROWER VISITS LUBBOCK

J. C. Baldwin and family, of Corpus Christi, and Mrs. Stovall of Waco, are spending a few days here guests at the J. C. Wayland home north of Lubbock. Mrs. Baldwin is a sister and Mrs. Stovall is a niece of Mr. Wayland. They are out on a three months vacation and outing, and are traveling in an automobile specially equipped for traveling, having a large body built specially for comfort and convenience, and some ten or twelve people can be comfortably seated in it. It has a closed-in top, with windows, shades, etc., and makes traveling a real pleasure. After they leave here they will go to Amarillo, thence to Roswell and down the Pecos Valley through the Devil's River section and back home.

Mr. Baldwin is one of the extensive cotton growers of the Corpus Christi section, and reports cotton conditions very favorable this year. The plant is a little late, as a rule, but it is healthy, and no trouble is being experienced by the weevil, and the prospects for a good cotton yield is real favorable. He says, however, that this condition is confined mostly to that particular section, as a hundred miles this way puts them almost entirely out of the cotton growing zone, the balance of the country the crops are washed out and very poor prospects for anything is found till you get to West Texas.

HARDING SEEKS MONEY FOR REFUNDING CERTAIN TAXES

Washington, June 6.—President Harding asked Congress to day for a deficiency appropriation of \$28,122,500 for refunding taxes illegally collected during the finance year ending June 30, 1921.

NOTICE OF ELECTION ORDINANCE NO. 205

An Ordinance calling for an election whereby the duly qualified voters of the City of Lubbock, Texas, may determine if bonds of this City in the sum of \$50,000.00 shall be issued by it for the purpose of building, extending and improving the water works system of the City of Lubbock, Texas, fixing the rate of interest such bonds shall bear, said bonds to be payable serially beginning 25 years from their date and to mature all bonds forty years from their date levying a tax to pay the interest and sinking fund thereon to discharge same at their several maturities, fixing a date for such election, appointing officers to hold same, providing for notices thereof and fixing a polling place; and declaring an emergency account of insufficient water supply. Be it ordained by the City Council of the City of Lubbock, Texas: Section 1. That an election shall

be held at the office of the City Secretary of the City of Lubbock, Texas, whereby the properly qualified property-tax paying voters of this City shall determine if bonds of this City to the amount of \$50,000.00 shall be issued for the purpose of building, extending and improving the water works system of the City of Lubbock, Texas, on the 18th day of July, 1922, at the usual hours for holding elections under the general laws of this State, and W. S. Clark, R. T. Penney and L. H. W. Terry are hereby appointed as judges to hold such election, conformable to the laws regulating same. Section 2. If a majority of such voters voting thereat shall vote in favor of the issuance of such Bonds there shall be issued and sold by the City such amount of bonds, all to be dated the 1st day of August, 1922, and of \$1,000.00 each, shall bear interest at a rate not greater than six per centum per annum, payable semi-annually on the first days of February and August, each year thereafter until the bonds are severally retired; such bonds shall ma-

tured as follows: Nos. 1 and 2 on the first day of February, 1925, and the two bonds next in numerical order shall mature on the first day of February, 1926, and continuing two bonds next in order each year on the first day of said month until 1938, when bond No. 27 shall mature, thereafter one bond each year in consecutive order until all have matured.

Section 3. In the event said proposition shall carry, as mentioned in Section Two, a tax will be levied on all property in the City subject to taxation, sufficient to pay the interest and create a sinking fund to retire each bond as the same shall mature.

Section 4. The Mayor of this City and the City Secretary thereof, shall duly authenticate a copy of this Ordinance and cause the same to be published as provided by law for notices of bond elections, in some newspaper published within this City, and the publication shall continue until due notice has been perfected, and at the election those desiring to vote in favor of the issuance of such Bonds, shall have written or printed on their several ballots, "For the issuance of Water Works Bonds in the sum of \$50,000.00 and levying a tax sufficient to pay the interest and create a sinking fund to pay and retire same"; those opposed to such Bonds being issued shall have written or printed on their several ballots, "Against the Issuance of Water Work Bonds in the sum of \$50,000.00, and levying a tax sufficient to pay the interest and create a sinking fund to pay and retire same."

Section 5. The fact that the City is not adequately supplied with water for domestic consumption and for fire prevention creates an emergency and public necessity that the rule of the Charter requiring an Ordinance to be read at two several meetings before enactment, shall be suspended, and that this Ordinance shall be passed and effective at the meeting of its introduction and first reading, and is so ordered. Approved this 8th day of June, 1922.

Percy Spencer, Mayor, City of Lubbock, Texas.
Attest—J. R. Germany, City Secretary, City of Lubbock, Texas.
THE STATE OF TEXAS,
City of Lubbock.

We, Percy Spencer as Mayor, and J. R. Germany, as City Secretary, of the City of Lubbock, Texas, a municipal corporation, do hereby certify that the foregoing is a true and correct copy of Ordinance No. 205, passed and approved by the City Commission of said City on 8th day of June, 1922, at its regular meeting, as appears from the Minutes of said City, Vol. 3, Page 55, and that same was passed by unanimous vote.

Witness our hands and the Seal of said city, this 8th day of June, 1922.

(Seal) Percy Spencer, Mayor, City of Lubbock, Texas.
J. R. Germany, City Secretary, City of Lubbock, Texas.

Schedule of the Amarillo Trade Trip Which Will Begin June 14th And Continue Through the 16th

Amarillo, Texas, June 9th, 1922. Dear Sir or Gentlemen: Herewith a schedule of Amarillo's Annual Trade Extension Trip to be

held June 14th, 15th, and 16th, which we respectfully request that you give due publicity to the people of your community. This is final and authentic, and you may make any plans you care to accordingly.

We greatly appreciate the favors extended to us in the past, indicating your willingness to co-operate with us in movements of this kind, which we hope will result in a closer acquaintanceship between the business men of Amarillo and of the Southwest territory.

The business men making this trip will be very appreciative of any courtesies extended to them by the people in any of the cities and towns through which their train will pass.

Yours very truly,
O. V. Vernon, Secy.
Board of City Development.

We Give Standard Willard Service on All Batteries

With our experience and equipment we have a notion that we could work out a pretty fair sort of battery service without much help.

But we also have an idea that it wouldn't measure up to the brand of service developed for our use by the Willard Storage Battery Company.

As Battery Headquarters we have the benefit of their years of experience, and of the definite national standards of service they have been able to develop as a result.

Come in! No matter what make of battery you happen to have it needs the sort of attention provided by the Willard Standard of Service.

SHERIFF'S SALE

THE STATE OF TEXAS, County of Lubbock.

Whereas, By virtue of an execution Order of Sale issued out of the District Court of Eastland County, Texas, on a judgment rendered in said Court on the 17th day of May, A. D. 1922, in favor of Ed Hall, Commissioner of Insurance and Banking and against Dan W. Powers, No. 8582 on the Docket of said Court, and to me, as Sheriff, directed and delivered, I did, on the 9th day of June A. D. 1922, at 4:00 o'clock P. M., levy upon the following described tracts and parcels of land situated in Lubbock County, Texas, and belonging to Dan W. Powers, to-wit: Lying and being situated in Lubbock County, State of Texas, and described as being three hundred thirteen and thirteen one-hundredths (313 13/100) acres out of the north half of section No. 129, Cert. 309, Abst. 138, E. L. & R. R. Ry. Co., being all of said north half with the exception of the right of way of the Crosbyton South Plains Ry. Co., lying along the north side of said section, consisting of 6.81 acres and described as follows: Beginning at the N. W. cor. of said section 129, thence East along the North boundary line of said section a distance of 5,282 ft., more or less, to the N. E. cor. thereof; thence South along the east boundary line of said sur. a distance of 51 ft. more or less to a point which is distant 50 ft. southerly measured at rt. angles from the center line of the C. & S. P. Ry. Co. as the same is located and staked over and across said sur., thence west along a line which is parallel to and distant 50

ft. southerly from the center line of said Railroad a distance of 2733 feet; thence south at rt. angles with said center line of said railroad 25 ft.; thence west along a line parallel with said center line 75 ft. from same 1140 ft.; thence north 25 ft. to a line 50 ft. southerly from said center line, thence west with a line parallel with said center line and 50 ft. southerly, 1409 ft. more or less, to the west boundary line of said sur.; thence north with said west boundary line a distance of 52 ft. more or less, to place of beginning, on the 4th day of July A. D. 1922, being the first Tuesday of said month, between the hours of 10 o'clock A. M. and 4 o'clock P. M. on said day, at the Courthouse door of Lubbock County, Texas, in the town of Lubbock, I will offer for sale and sell at public auction, for cash, all the right, title and interest of the said Dan W. Powers in and to said property.

Witness my hand, this the 9th day of June, A. D. 1922.
C. A. HOLCOMB,
Sheriff of Lubbock County, Texas
31-4T

ROUTES TWO AND THREE TO BE TRAVELED DAILY

More than twelve hundred people in Lubbock county will be glad to know that, beginning the fifteenth of this month, daily mail delivery will be made on routes two and three, which run north and northwest of Lubbock. Dr. Deering, postmaster of the Lubbock office, received notice of this action having been taken by the postal department several days ago, and arrangements are completed for the mail carriers to make the route each day.

Lubbock county farmers deserve every service available, and we are glad to know that these routes are given the daily service.

Tri-weekly service has been given the people along that route, which will continue until the fifteenth.

Marriages, Wedding Anniversaries, Deaths, Public Improvements, Local News Items and Other Things from Slaton Slatonite

The plan of the West Texas Compression and Storage Company is progressing at a satisfactory rate, according to R. H. McCarty, superintendent of the construction and who will have charge of the plant after it is completed. This is a class B compress, and the largest in West Texas west of Abilene. It required seven railroad cars to move the machinery, 15 cars of lumber, 2 cars corrugated iron, 3 cars common brick 1 car cement, and when finished the platform will have a shed 200 by 240 feet, with a large platform outside, trackage capacity of ten cars, 70,000 gallon tank on a tower 105 feet high, with nine standard fire hydrants. This plant will employ about fifty men while being put into operation, and will be running by next cotton season.

The city water and sewer system is now in operation and running good. The water rate has been set at a minimum of \$1.50 per month for 2,000 gallons, 50c for the next 1,000, 40c for the next, and 25c per thousand gallons for all over five thousand. The city will sell meters to the customers direct, or rent them at 25c per month. A service deposit of \$10.00 will be required from all water consumers.

The sewer rate was fixed by an ordinance published some time ago. It is \$1.00 per month for everybody except hotels, boarding houses and other large users, which rate will be \$2.50 per month. If you want water and sewerage see W. E. Olive, City Secretary, and get permits for connections.

S. E. Staggs was elected Secretary and Manager of the Slaton Chamber of Commerce at a meeting of the board of directors last Monday. Mr. Staggs has been connected with the Santa Fe offices in Slaton for the past two years and knows the local conditions. He is well qualified for the place he has accepted, and we feel sure that the board made no mistake in their choice out of a large number of applicants.

Mr. and Mrs. A. M. Watson received a surprise last Tuesday evening that surpassed any since the time that Mr. Watson "popped the question" to Miss Navarro Uvalde Dyer at Lipan, Hood county, twenty-five years ago. Their daughter, Miss Cleffie Watson, assisted by her aunt, Mrs. Robert Dyer, planned a surprise for them on their silver wedding anniversary, from 7 to 8 o'clock. Rev. John P. Hardesty, Baptist minister, was let into the secret, and he deceived Mr. and Mrs. Watson away from home about 6 o'clock, telling them that he had a matter of vital importance to discuss with them. They went for a drive and the most important things discussed were the weather and Slaton's smooth streets. With perfect confidence in their pastor's truthfulness and honesty, they drove about the city until 7 o'clock, returning home. Entering they were surprised to find a large crowd assembled, all togged out in their Sunday clothes. Mr. Watson said, "What's this about?" Some one replied, "We are going to have a wedding." Mr. Watson turned red in the face and looked at his daughter and said, "Well, she hasn't told me anything about it. Some one then suggested that Mr. Watson tell what he was doing twenty-five years ago, but he couldn't remember much about it until Mrs. Watson prompted him. Others were also asked to tell experiences of their courtship and wedding, and in nearly every instance the good wives had to furnish

the dates and other information. Yesterday afternoon the news quickly spread over the city that Felix, 10-year old son of Mr. and Mrs. J. W. Hood, had died at 3:55 o'clock and caused sadness to many hearts. Felix had been sick for about six weeks, suffering from diabetes, but his condition did not become serious until last Sunday. Felix was in the high fifth grade at school, and was a studious, manly little fellow. He is survived by his parents and two smaller brothers, Mrs. J. W. Mathis of Lockney, mother of Mrs. Hood, was present at the little fellow's bedside when the end came. Other relatives from a distance are en route and expect to arrive here in time for the funeral, which will be held from the Methodist church at 2 o'clock Friday afternoon, conducted by Rev. John P. Hardesty, pastor of the Baptist church. Burial will follow in the Englewood cemetery.

John Sodeberg and Mrs. Mamie E. Loyd surprised their many friends in Slaton Sunday when they motored to Lubbock and were quietly married. Rev. Ferguson, pastor of the Methodist church, there officiating. Their only attendant was Mrs. Bertha Brooks, a friend of Mrs. Loyd's, of Duncan, Oklahoma, who arrived here Saturday to be present at the marriage. Mrs. Sodeberg before her marriage, was engaged in the millinery business, connected with the Gates Dry Goods Company, Inc., coming here about four months ago from Duncan, Okla., where she was an accomplished musician. The groom was a dispatcher on the Santa Fe railway. They have gone to Ralls, where they will make their future home.

Erwin S. Richards of Lubbock and Miss Roberta Dell Johnson of the Union community, were united in marriage at the home of the bride's father, F. P. Johnson, at 5 o'clock Wednesday afternoon. Rev. Jno. P. Hardesty, pastor of the First Baptist church of Slaton, officiated in a very impressive manner. The wedding was unusual, in that the groom was convalescing after an attack of illness at the home of Mr. Johnson, where he had gone a few days before to claim his bride, and he was still confined to his bed when the ceremony was performed. The bride is a charming young woman and has many friends in Slaton, she having attended school here the past year. The groom is employed as bookkeeper for the West Texas Gin Co. at Lubbock, coming there from Waco. The newlyweds expect to leave soon for Waco on a visit to relatives of the groom, after which they will return to Lubbock to make their future home.

H. H. (Aught) Conner and Miss Edith Reed were united in marriage on last Sunday morning at 8:30 at the home of Rev. Phillips of near Union, who officiated at the wedding. The bride and groom were attended by Guy Reed, brother of the bride and Mr. and Mrs. Otho Owen, the latter named being a sister of the groom. The bride is a daughter of Mr. and Mrs. W. H. Reed, residing one and a half miles west of town, and was a 1922 graduate of Slaton high school. The groom is a son of Mr. and Mrs. J. F. Conner, living in this city.

A. B. Edwards and Miss Clark Rhodes, both of this city, went to Lubbock Thursday last week and were married, Rev. Julian performing the ceremony. The bride in this happy event is the daughter of Mr.

and Mrs. A. J. Rhodes, and until her marriage was an employee of the Santa Fe offices. The groom, who is a son of Mr. and Mrs. J. E. Edwards, of Munday, Texas, is a carpenter and followed his trade in Slaton during his residence here. The newlyweds will leave soon for California to make their home.

Are We Right Or Are We Wrong About Farming

An Avalanche reporter, through the courtesy of the management and several friends who happened to be making automobile trips about over the county, has had an opportunity to observe the Lubbock county farmer's methods of doing things, and right here let us say that it is hard to find a country where the farmers are more industrious or even equal, those of Lubbock county.

Fine crops are growing under their care, making rapid developments; in fact so well is everything going along that criticism is absolutely uncalled for, and we do not want this to be taken as such, and mean it as merely a suggestion, but the rank growth of various weeds at the turn rows, along the fences, and other places where crops are not cultivated, but where they are very close to the crops, are maturing millions of seeds each summer, which are blown into the fields by the fall and winter winds, to germinate and grow up among the crops the following spring, and necessitates much extra work, which could be eliminated after a few years concerted effort by the farmers of each neighborhood.

Of course it is generally known that the wire fence is soon to be a thing of the past, and when we discussed this question with an old plainsman recently, he expressed the opinion that within ten years few farms would be fenced, and all turn rows could be cleaned of these weeds with plows, but instead of this, there are a good many weed patches allowed to grow where the land could be cultivated, a suggestion of this kind is altogether appropriate and fitting, inasmuch as we are of the opinion that no one is more interested in the welfare and development of Lubbock county farms than is the Avalanche.

Friend farmer, let's look into this matter. If your fence corners and turn rows are growing up with weeds the seed will be blown into adjoining cultivated lands another year, and the weeds will have to be combated in the spring. Isn't this another case where an ounce of preventative is more effective than a pound of cure? Isn't there some method of keeping rank growths of weeds from wounding your entire crop? We believe there is something to this matter, that it is worthy of your looking into, and that a little concerted effort on the part of every farmer in Lubbock county can soon make the weed demon clear out of the fields of the Plains, and take growth somewhere where industrious farmers are not at all times after his goat.

Are we right, or are we wrong? Is the matter of any importance to you?

We believe there is a field for considerable work here, which, if properly studied and worked out, will save thousands of dollars which are lost to the farmers of the Plains in unnecessary work of weed elimination every year.

Let's go after the weeds in the summer, and they will not be so numerous in the spring.

FIVE LISTERS WERE GOING ON ANDY WILSON'S FARM

Andy Wilson has been about the hardest working man in this territory the past several days, as the recent hail and rain wiped out one hundred and twenty-five acres of cotton on his place, and he has been making every effort to get the crop replanted. He called at the Avalanche Friday night and reported that arrangements had been made to have five listers going on his place Saturday, which proves that he is going after this work on a large scale to have the crop back to normal in the least possible time.

Lubbock is proud of the work that Mr. Wilson has accomplished here, it being a pleasure to see his large, well bred teams in action—they look more like circus horses than farm teams, and Mr. Wilson says it pays to have the very best animals possible to any job, as they are more capable of doing the heavy work without hurting themselves, and cost no more to keep up.

We are sure that at the present rate of replanting his crop, it will be thoroughly gone over within a few days, and the ideal weather will have the crop make a showing in little time.

Mr. Wilson's farm is in the Shallowater community.

GOLF CHAMP HERE FOR VISIT AND EXHIBITION GAME

Geo. "Scotch" Sampson, golf champion of West Texas, and Chas. Quail, both of Post, were here yesterday from that place for a visit among their friends and a friendly game with some of the locals. Mr. Sampson recently won the championship of West Texas and Mr. Quail second place.

They are both golf enthusiasts, Mr. Sampson being the man who laid off the course on the County Club. While here they attended the baseball game between the Hubbers and Ranger.

Perium Connelly, operator at the R & R Lindsey in a local sanitarium under treatment of specialists, having crushed a foot in an accident the first of the week. We are glad to report he will be able to resume work before many days.

NEWS ITEMS FROM THE LAMESA NEWSPAPERS

The Reporter: Mr. Joe A. Reid died at his home in Lamesa, Wednesday, May 3rd. He was buried in the Lamesa cemetery, services were conducted by Rev. Shipley. Mr. Reid was born in Mississippi in 1854 and moved to Texas in 1819. He was married to Miss Elizabeth Jones, Jan. 3rd, 1872 and ten children were born to the family, seven boys and three girls, eight of whom survive him. 2 boys died in infancy. He has 26 grand children and 5 great grand children. He was a member of the Primitive Baptist Church.

It is reported here that the country between Wilson and Tahoka was visited by a disastrous hail on last Thursday night. It is said that the crops were totally destroyed and even the mosquito trees were stripped of their branches. All fruit was totally destroyed. Lightning struck the home of Guy Simpson in the west-end town, on Sunday night and burned the paper along the wall and tore up a dressing table which was sitting against the wall. No one was hurt and otherwise no damage was done.

The new West Texas gin is now under course of construction and is being pushed to completion. This, when complete, will be one of the finest gins in West Texas. The power will be furnished by a 150 H. P. engine and it will be modern in every respect. Its capacity will be about 75 bales per day and will not only be fast but will be highly efficient. When you get ready to gin that big cotton crop this fall don't forget that the West Texas gin is running on the east side of the railroad and one near the school building and will appreciate a share of your business.

J. A. Morrow traded his home place, near Fairview, to G. B. Hutchins. In the trade, Mr. Morrow comes into possession of the business house, the residence of Mr. Hutchins.

Lamesa is taking a steady growth that cannot be denied. New dwellings and new business houses are going up and with all the stranger is compelled to say, "there's a coming town." Get in the collar and let's all pull for a bigger and better Lamesa. What say ye?

GRAIN SORGHUM VERSUS CORN FOR FATTENING LAMBS

"Can the grain sorghums which are produced to the extent of 144 million bushels annually in the United States, be substituted in the place of corn in the ration for fattening live stock in the grain sorghum areas?" is the question raised in Bulletin No. 285 just issued by the Texas Agricultural Experiment Station, A. & M. College, and which is available for distribution to those requesting it.

The bulletin recites that Texas, in its western and northwestern areas, is producing annually 60 million bushels of grain sorghum, which is conceded to be only a partial showing of the possible production, because the area planted to this crop is limited to the popular annual estimates of the farmers, as to how much production the market will absorb. It is further noted that the tests described in the bulletin and other similar tests heretofore indicating that the grain sorghum has practically the same feeding value as corn, though market quotations for December, 1921, valued Texas corn at 54c per bushel and grain sorghums at 41c per bushel. These facts indicate that feeders of lambs could have saved 24 per cent of their grain bills by using grain sorghum in the place of corn in the ration.

The bulletin contains 16 comprehensive tables from which almost every phase of feeding can be examined; and it summarizes former work on the project.

Discussing the highly satisfactory gain of 100 lbs. for each 273 pound kafir, and 48.6 pounds cottonseed meal and 461 pounds roughage, which is not excelled substantially in any feeding district with any ration, J. M. Jones, Chief of the Division of Animal Industry, and author of the bulletin, said: "The conclusions from these tests point to the opportunity for building up in the grain sorghum producing regions an extensive and profitable feeding industry. The corn belts of the middle west and north have enjoyed such an industry and Texas stockmen have patronized them freely, but already some of the best feeding concerns are feeding in Texas using the grain sorghums in their rations and the indications are that they will extend their operations into the grain sorghum growing districts. This means the growers themselves will eventually be engaged in the feeding business, along with their production business."

The Composition and Value of Wheat By-Products

An elaborate and valuable discussion of wheat by-products will be found in Bulletin No. 282 of the Texas Agricultural Experiment Station, A. & M., which has just come from the press. Those interested in these products for feeding stuffs or other uses should read this bulletin. It is a complete discussion of the subject and can be had upon request addressed to B. Youngblood, Director, College Station, Texas.

NORMAL WILL OFFER COURSE IN COACHING

Canyon, June 7.—West Texas State Normal College will offer a course in coaching consisting of one lecture period per week and four hours per week of actual demonstration for the teachers attending the summer normal who expect to coach in high schools next year. Three hours college credit will be allowed for those completing the course. This is the first time the Normal has ever offered such a course.

Come to Lubbock.

These Little Girls Want to Own the Border Queen, Jr. Kitchen Cabinet

—to be given AWAY in connection with our Border Queen Kitchen Cabinet Club Contest.

Here are the names of contestants who enrolled the first day, Thursday the 8th:

- Twilight Baker, Shallowater, age 10 years
- Maurine Mullican, Lubbock, age 12 years
- Mary Lois Julian, Lubbock, age 12 years
- Edith Eileen Hicks, Lubbock, age 13 years
- Mary Cosby, Lubbock, age 11 years
- Kate Burrus, Lubbock, age 12
- Annie Snyder, Lubbock, age 12
- Lucile Davis, Lubbock, age 12
- Nancy Collier, Lubbock, age 10
- Gladys Harkey, Lubbock, age 13
- Doyle Blankenship, Lubbock, age 13
- Hollycon Campbell, Lubbock, age 12
- Irene Neves, Lubbock, age 10.

Girls, now is the time to join and get an even start with these other little girls. You will be "ticked to death" with the "Border Queen" Cabinet, Jr.

Will You Help Them?

THEN FILL OUT THIS COUPON AND BRING TO OUR STORE THIS WEEK.

BORDER QUEEN KITCHEN CABINET CLUB CONTEST
SIMMONS FURNITURE COMPANY
(Authorized Dealers)

Your Name _____
Address _____

1. I do not own a Kitchen Cabinet.
2. I have a good Kitchen Cabinet.
3. I have an old Kitchen Cabinet.
4. I have a built-in Cabinet.
(Mark check after the one that applies to your case)
To be recorded in favor of _____

Contestant's Name _____

This Coupon is printed here for the benefit of those women who have not been interviewed by some one of these little girls in this contest—Cut it out, fill in and bring to our store in person (do not mail) on or before July 15th, 1922, and the contestant for whom you vote will receive votes as follows:

- 300 votes when returned.
- 500 votes if you do not own a cabinet.
- 1000 votes if you examine the Border Queen.
- 100 votes for each dollar spent if you buy a Border Queen Kitchen Cabinet.

(You cannot vote but once and for not more than one little girl in this contest.)

SIMMONS FURNITURE & UNDERTAKING CO.

FAIR DISCUSSED BY BROWNFIELD MEN

Brownfield, June 7.—Business men and farmers are called to meet at the courthouse June 10 for the purpose of discussing and taking action on the proposed Terry County Fair this fall. According to directors, efforts will be made to make this exposition representative not only of the surrounding counties but of counties in New Mexico. Agriculture will be stressed in the departments.

RANDALL COUNTY TO BUILD SPRING BRIDGE

Canyon, June 7.—At a cost of \$4,400 Randall County commissioners have let a contract for the erection of a reinforced concrete and steel bridge across Spring Branch at the foot of the big hill north of town, where the former bridge was washed out in a recent freshet.

The new bridge will be 60 feet long—ample for all flood waters.

600 EPWORTH LEAGUE DELEGATES EXPECTED

Clarendon, June 5.—Six hundred delegates are expected at the Epworth League Convention, which convenes here June 6 to 11. Preparations have been made by local people to care for the visitors.

HUBBERS CONTINUE WINNING STREAK THURSDAY

Cantrell was in great form Thursday when he beat out the Ranger Nitros 10 to 2, making the third straight taken from them in this series of four games. The contest was slow from the beginning probably caused by the continual contesting of decisions of the Ump on the part of the Ranger Club. Neither team was able to score until the second when the locals squeezed in one. Then in the second frame Lybrand was gotten to for a total of three runs. Then again things settled down and looked as if it was going to settle to a nice exhibition, but the locals got away again in the fifth when by five hits and three errors they stacked up six more against the visitors.

Although eight hits were gotten off Cantrell they were well scattered, and netted them only one earned run. Lybrand was hit freely. The score:

Lubbock	AB	R	H	O	A	E
Speagle, 1b	4	1	1	15	2	0
Earnshaw, c	5	1	3	3	0	0
King, cf	5	2	1	0	0	0

Summary: 2 base hit, Dockery, Craig, Flagg, E. Gober; struck out Lybrand 5; bases on balls, off Lybrand 5; stolen bases, Speagle, Earnshaw, Gober, Brown; two double plays, Speagle to Earnshaw, Flagg to White to J. Gober; wild pitch Cantrell 1; Lybrand 1.

NINTH INNING RALLY BEATS RANGER FOR FOURTH GAME

Although Lubbock was out in the game Friday on the local park, the Hubbers beat out the Ranger Nitros 7 to 6. The visitors got a two run lead in the seventh on a hit and three errors, and looked as though they were going to walk off with the game, but the Hubbers clubhounds were in their usual form, and came back in the 8th for one run, but yet lacked one of tying the count. Alberts, having relieved Woodridge in the seventh, allowed one run in the first half of the eighth, but held them scoreless for the ninth. In the last of the ninth with two men down, the wrecking crew came up headed by "Skipper" Allen himself, who singled with a hot one to left. Alberts

Galveston	55	25	32	.418
Shreveport	53	16	37	.302

followed, and after three balls and two strikes, placed one between the pitcher and short, that was too hot to handle, advancing Allen. Then came Brown with a nicely placed two-bagger to left field, scoring Alberts and Allen, and retiring the Nitros to another defeat.

This is the fourth straight taken from Ranger in this series, being the closing game of the series. Woodridge was not in usual form, having been in bed the day before, but held them to nine hits, but the Nitros made them count for runs. He was relieved in the seventh by Alberts, whose work was largely responsible for the win. Sam Langford hit a single and a two bagger out of three trips to the rubber. The score:

MOTHER OF BART GREEN DIES IN ABILENE

Thursday evening word was received by Bart Green from his family in Abilene that his mother was not expected to live through the night. Bart left on the night train for that place, and arrived before his mother passed away, she having died there Friday afternoon at 4:15.

ABILENE DROPS FIRST GAME TO HUBBERS

The Hubbers took the first of a three-game series from the Abilene Eagles on the local lot Saturday, 8 to 2. By two infield errors and a wild pitch the visitors scratched their first run in the opening inning, and added another to this in the fifth on a two-bagger by Sain, and another wild pitch by Swenson. The locals started counting in the second when Gober walked, Brooks laid out a three-bagger to right, scoring Gober, then scored on Allen's sacrifice. In the third Brown walked, took second on Earnshaw's sacrifice, King struck out, Langford walked without a trial, Gober set out a three-bagger over right field, scoring Brown and Langford, and Gober scored when Miers dropped Battle's long fly to center.

In the fourth two more were counted. Allen singled, Swenson whiffed, Brown singled, and on a bad throw to first by Burch, Allen and Brown crossed the plate. Whitehead then relieved Scruggs on the mound and held the locals scoreless for two frames. In the seventh Earnshaw tripled and scored on King's sacrifice.

Swenson pitched air-tight ball, allowing eight scattered hits, and would have had a shutout but for errors, and although the locals only got six hits, three of them were for two extra bases, and were made to count. Jimmy Battle's sensational pick-up of a hot one with his bare hand featured. The score:

BOBBY SPEEGLE HAS RETURNED FROM TAYLOR

Bobby Speegle, left handed "first sacker" of the Hubbers returned Sunday from Taylor where he has been since Thursday looking after business matters that could not be postponed.

HUBBERS COMING GOLF HOUNDS-ENTHUSIASTIC

Recently some of the Hubbers have gotten the Golf Bug to such an extent that it is almost impossible to get their minds off that line of sport long enough to play a game of baseball. "Manager" Allen himself has been bitten, and hardly a day passes but what he resorts to the great national sport for a certain portion of the day.

HUBBERS LOSE SECOND OF SERIES TO ABILENE

The Hubbers dropped the second of a three game series here Sunday to the Abilene Eagles 3 to 1. The game was snappy from beginning to end, and was a pitchers battle except for the fifth frame, when the visitors counted three runs on four hits, one a two-bagger.

Some Day You'll Own a De Laval Cream Separator

**Easy to operate
Easy to clean**

The De Laval bowl can be completely taken apart for washing. The discs, bowl parts and tinware have no tubes, crevices, holes or corrugated surfaces which are hard to clean.

The De Laval discs are washed as a single piece and the whole machine can be thoroughly cleaned in five minutes.

There is no part of the De Laval bowl which cannot be easily reached and seen, so that the operator can always tell whether or not every part has been properly cleaned.

The ease with which the De Laval can be thoroughly washed and kept in a sanitary condition is one reason why practically all creamerymen prefer De Laval, and is also one of the reasons why butter made from De Laval cream scores highest at the National Dairy Show.

Practically all the creameries in the country use De Laval Power Separators.

DO YOU WANT TO LEARN TO SWIM?

The TUMBLE N POOL has an opportunity to secure the services of Miss Anna E. Hall, of Brownwood, who holds a degree from the University of California, Swimming department, to come to Lubbock and teach swimming. She teaches both beginners and advanced swimming and guarantees that you can swim, dive and float at the completion of the course.

This is a big opportunity for those wishing to learn to swim and swim properly, for Miss Hall is certainly an expert. For Miss Hall to agree to come she must have a class of at least 30 pupils at any age from 4 to 60 years.

The cost of the entire lessons is \$5.00 so let the management know at once and if as many as 30 desire to take the lessons she will be brought here.

REMEMBER THE MORNINGS ARE FOR LADIES AND SMALL CHILDREN ONLY AT THE POOL.

THURSDAY, FRIDAY and SATURDAY June 15, 16 and 17, 1922

WHAT IS A ONE-CENT SALE?—It is a sale where you buy an item at the regular price—then another item of the same kind for 1c. As an illustration: The standard price of Rexall Tooth Paste is 25c. You buy a tube at this price, and by paying 1c more, or 26c, you get two tubes. Every article in this sale is a high-class standard piece of merchandise, just the same as we sell you every day at regular prices and have sold you for years.

A NEW WAY OF ADVERTISING—This sale was developed by the United Drug Co., as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell you a full size package of high standard merchandise for 1c. It costs money to get new customers, the loss taken on this sale will be well spent if the goods please you.

Committee to Select an Appropriate Name for Goat Meat That the Public Will Adopt and Use in Selling the Meat

Dr. B. Youngblood, Director of the Texas Agricultural Experiment Station, A. and M. College, has accepted the appointment on a committee to decide on the most appropriate name to designate the meat of the goat. The Sheep and Goat Raisers' Association of Texas is conducting a contest in which a prize of a high class Angora buck is being offered by Mr. B. M. Halbert, a prominent Angora breeder of Sonora, Texas, to the person suggesting a name for goat meat which will be accepted by the committee as the most appropriate.

In comment Dr. Youngblood said: "I think it is very desirable to decide upon an appropriate name for the meat of the goat. The meat of the sheep, the pig, and the cow have long had designations which have no doubt assisted in popularizing those meats commercially, as well as served to conveniently designate the meats when writing or speaking of them. I am glad to see the Sheep and Goat Raisers' Association giving immediate attention to an appropriate name for goat meat which has been growing, and will continue to grow, into popular favor as a wholesome, nutritious table delicacy. There is a popular misconception, due to lack of information, that the meat of the goat is not so palatable as other meats. The facts are that this meat, when properly dressed and prepared, is not only the equal of other meats, but is considered by many people, who know how to prepare it, as superior to mutton or beef. The Spanish-American peo-

ples are especially favorable to goat meat; and having established partiality for it, furnish a brisk demand in these sections of the State where they have settled.

"The ranchmen of West Texas have learned the art of properly killing and dressing the goat for table use, and the delicious dishes which they enjoy and in which the meat of the goat figures conspicuously, are well known to all who have partaken of West Texas hospitality."

The name will be selected by the committee at the Sheep and Goat Raisers' Convention in June from those submitted to Mr. James T. Elliott, Editor of the Sheep and Goat Raisers' Magazine, San Angelo, Texas. Other members of the committee are: B. H. Martin, President Sheep and Goat Raisers' Association of Texas, Del Rio, Texas; Robert Davis, President, American Goat Breeders Association, Rio Frio, Texas; Jack Turner, President, National Angora Record Association, Junction, Texas, and Claude A. Broome, Chairman, Show and Sales Committee, San Angelo, Texas.

PARENTS AS EDUCATORS

Hungry Children
By Lydia Lion Roberts

A mother was looking over a box of old photographs and her little boy was an interested watcher by her side. As one picture came into view the boy exclaimed, "Whenever I see a picture of Auntie Gertrude it makes me feel hungry." Afterwards he explained that it was because she brought him so many good things to eat.

The Aunt referred to, was a very busy woman, yet she always managed to find time to slip a gingerbread man, or a popcorn ball, or a surprise package into her bag for the children where she visited. Another child never forgot a basket trimmed with colored tissue paper, holding home baked cookies that her aunt brought to her after she had been sick.

Food plays an important part in a child's life and a mother may teach by it as well as by other things. All children love surprises, and little faces brighten on stormy days when a raisin cake baked in their own little pan appears, or a lunch-box dinner is placed on the playroom table with dainty sandwiches and fruit, and maybe a bit of candy or a few nuts.

Any little boy or girl likes to learn to cook when mother is cooking and though that is not an especially good time for mother in one way, yet in another way it is the best time, for children are happy when busy and learn quickly when interested. When mother makes bread, the little tot should have a ball of dough and a raisin or a bit of jam to make a biscuit. If the child has dishes big enough—and this is important, for there should be a small pan or unbreakable dish to do the cooking in,—the work can be done exactly as mother does it and therefrom come the first lessons in cooking.

"I could turn those doughnuts," suggested a small boy to his grandmother, who was making the toothsome goodies. She started to turn him away, as she was busy and a bit nervous, but thought better of it and showed the child just how

carefully it must be done. Consequently he turned every single one in a most grown-up way and informed the family proudly that night, "Grandma and I made doughnuts today."

The ten cent store has many a small tin and enamel pan that would make a start towards a little girl's cooking set, and would give her much pleasure and profit if she learned to take care of the pans and to cook simple things in them. The best way of all is to suggest to a child that a biscuit be made for daddy's supper, or a tiny cake as a surprise for a playmate. Thus the lessons in cooking and giving, planning and unselfishness are learned together.

IMPROVEMENTS BEING MADE ON STREETS OF LUBBOCK

We are mighty glad to notice that workmen are busy on the streets at the corner of Broadway and M filling in some of the large holes with white clay, gravel and small rocks.

The streets of Lubbock have been in need of some working for some time, and it is indeed gratifying to note that our city officials are taking every opportunity to make them better.

There is plenty of room in this town for improving streets, and we are glad they are starting the work at this time.

Big Baking Powder Value

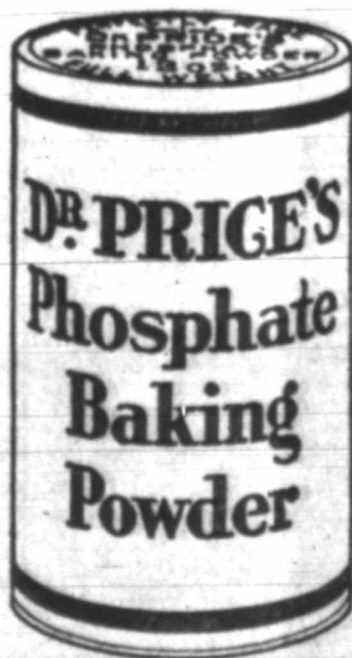

If there were no other reason for using Dr. Price's Phosphate Baking Powder, its well-known high quality would be sufficient. But in addition to this, think of these other advantages!

Dr. Price's is sold at the low price of 25c for a large can of 12 ounces. It is pure and wholesome and imparts a fine, appetizing flavor to the food.

It contains nothing to leave a bitter taste—no ingredient which is not in itself wholesome.

DR. PRICE'S PHOSPHATE BAKING POWDER

Large can, 12 ounces, only 25c

New Cook Book Free

In the New Dr. Price Cook Book there are 300 delightful recipes for all kinds of cooking and baking—some of them the most famous recipes in use today. Every housekeeper will value a copy of this book which can be had free by addressing—Price Baking Powder Factory, 1003 Independence Boulevard, Chicago, Illinois.

SPECIAL!

Some grocers may have a few cans left of Dr. Price's bearing the label with the special advertising offer recently announced for a limited period. A big value at its regular price, Dr. Price's is an unparalleled bargain at this special sale price. Don't fail to see if your grocer has some left!

OVERSTREET SAYS NEWSPAPERS DID IT!

"A Hupmobile a day" is the way J. R. Overstreet, West Texas Distributor of Hupmobile cars with headquarters at Fort Worth describes the way the famous "Hup" has been selling during the past month in his territory.

"Yes, better than a car a day," declared Overstreet, "for our actual sales in this territory have totaled just 33 Hupmobiles in just 30 days and in addition to this splendid record of retail sales, we have added nine new, live-wire dealers to our list of Hupmobile sellers in the same period of time."

"I ascribe the astonishing record to the last 30 days almost directly and exclusively to the use of the Printer's Ink," he continued, "for we have sold these cars and secured these new dealers in territories covered by the advertisements we are now running in the local papers and in practically every instance the sale or contract was traceable directly to the local paper."

NEW GRAIN RATE TO TEXAS POINTS

Washington, June 10.—A new basis for rates on grain, grain products, hay and straw moving from Oklahoma points to Texas consuming centers was prescribed today by the Interstate Commerce Commission which held in deciding a case brought by the corporation commission of Oklahoma that the present schedules are unreasonable and prejudicial.

The commission in general found that rates from Oklahoma producing points on the commodities named were higher for equal distance to destinations in Texas than similar rates over similar distances entirely within the state of Texas. The commission also found that a group plan of constructing rates in effect

on the commodities named was resulting in rates slightly too high for short distances and slightly too low for long distances in the traffic involved.

A detailed plan was laid down in the opinion for the railroads to follow in altering the rate schedules to prevent prejudice to Oklahoma shippers and preference to Texas shippers. The general effect of the decision will bring about small reductions in the Oklahoma-Texas rates. The commission remarked that "this proceeding is not sufficiently broad in scope for the accomplishment of exact justice and possibly there should be a general investigation of rates in the southwest."

If you want to really be happy cut out your needless wants.

Man Warned to Refrain From Use of Bootleg Whiskey and Abusing Mother and Wife by Ku Klux Klan

Thursday night of last week three young men of Lubbock started on a fishing trip on the canyon, but on reaching the graveyard found that the Ku Klux Klan had decided to interrupt the trip a bit, as four Klansmen stopped the car and requested that one of the party get out, and instructed the other men to return to town.

It is reported that on the approach of the masked men the one who had been accused of abusing his wife and mother to such extent that the neighbors were often molested by their screams for help, cried out to the other men in the car: "There's the Klan, and they are after me," showing that his conscience had gotten the best of him, and his guilt of abusing his people crept out to the service.

As we understand it, the other men returned to town as per instructions, and the Klansmen took their man with them, but inflicted no physical punishment. However, they gave him a good lecture, and got his promise to live better, report to the next grand jury, the places and from whom he had bought the bootleg whiskey, on which he was intoxicated when most of the trouble with his wife and mother was started, and warned him of their close watch over him, and that most keen physical punishment would be inflicted upon his first offense.

The accused man has been employed as one of the plasterers on the Bush building, where he has done exceptional good work, and it was regretted by the men with whom he was employed that he would abuse himself and family by too much use of bootleg whiskey, and we learned after the warning by the Ku Klux Klan he has been making a better hand in every way, has stayed at home closely, tending strictly to his business, and extending many heretofore unknown affections and kind assistance to his wife and mother.

This is the first appearance the Ku Klux Klan has made in Lubbock, and the recent knowledge of their entering a church in Slaton was the first account they had made of themselves in the county, and the experience the man had with them was a great surprise to Lubbock, not that the necessity to call a halt on his method of conduct was not realized, but that the Klan was unknown.

Between fifteen and twenty masked men were reported to have been at the place this fellow received his warning, while only four of them participated in stopping the car.

Mrs. Young, of Abilene, is here this week, visiting her daughter, Mrs. Marcus Helber.

AT THE CHURCHES

Bible Learners' Entertained
On Tuesday afternoon from 3 to 7 o'clock, Miss Belle Mills delightfully entertained her Sunday school class, the "Bible Learners" at a lawn party at her home with Mrs. A. M. Rankin. Those present: Inez Hensley, Ruth Hearrell, Mary Cosby, Alene Dean, Opal Clark, Ollie Berry, Lorene Waldorf, Lillie May Loyd, Burns Kittrell, Elbert Rankin, Robert Rankin, Mrs. A. M. Rankin, Miss Belle Mills.

Methodist Church
Four hundred and eighty persons attended Sunday school, the opening and closing services were made very interesting and beautiful through the children's assisting the president and song leader in every way possible.

The pastor had made a proposition to the school that as soon as three of the members recited the books of the bible in rotation, he would recite the same backward, but as little Miss Dorothy Rylander, of the junior department, was the only one present who attempted the part, the pastor was not called upon to recite the books backward, and the members will be given an opportunity to try carrying out their part again next Sunday.

Rev. C. N. N. Ferguson has been making his sermons exceedingly short since coming to Lubbock, but such was not the case Sunday, as he had some very important things to impress upon the minds of his people, and as a result both services were a bit longer than usual, and much interest was shown in what was said.

Cumberland Presbyterian
Sunday school attendance was mighty good, one hundred and eleven of the one hundred and twenty members were present, good lessons were reported from all the class rooms, and an interesting service held throughout.

Rev. Baker preached to a large congregation at the morning hour, while the evening service was not so well attended, there was an attentive audience, however, and the meeting was a success.

Church of Christ
A splendid sermon by Bro. Smith was well received by a full house. Rev. 1 and 2: 1-6 was read with text taken from Verses 4 and 5. A strong appeal to the church to return to its first love—to awake from formality and warm up to a whole hearted service with fervent zeal for God.

If this is done the house will be full, not at one or two weekly meetings of the church but at every service.
At the evening hour Bro. Ishigero, a Japanese, who has just received his degree from Abilene Christian College, having brought two diplomas from schools in Japan and who expects to spend next year in University of Tennessee to further prepare himself, spoke of his homeland, religions of Japan, and of his plan to establish a school in Japan to teach the young the Bible. Bro. Ishigero said Buddhism teaches all is vanity, life is empty—Shintoism, that God is fierce and awful, but thru curiosity he read the Bible and found that God is love—at last, he, like Paul after persecuting Christians, was forced to accept it.
He told with interest of the missionaries work and problems in Japan and spoke of the importance of Christianity, growth in Japan, saying his country is a leader in

Cultivators and Go-Devsils

You can get the weeds if you've got the kind of implement you need. Here is what we have and the prices:

- Emerson 2 row go-devil (with knives) \$110
- Emerson 1 row Slide go-devil \$31

the Orient—once Japan is converted, she will teach other countries to find true happiness.
An offering of thirty dollars was made. Edwin Martin acted as interpreter.

ORDER OF COMMISSIONERS COURT ON BALL GAMES

THE STATE OF TEXAS,
County of Lubbock.
The Commissioner's Court in special session on this 7th day of June, 1922, came on to be considered the proposition of special permit of the Lubbock Baseball Club to play as many as seven Sunday ball games at the Lubbock County Fair Park. Upon motion of Claude Denton, seconded by Crawford, it was ordered by the court that the Lubbock Baseball Club be permitted to play as many as seven Sunday games in said Fair Park beginning on the 11th day of June 1922, and it is so ordered by this court.
Yes—Tally, Crawford, Denton.
No—Wheeler.

NOTICE TO ALL PEOPLE WHO ARE INTERESTED IN BANDS OR BAND MUSIC

Mr. Ward V. Croft has been employed as leader for the old band, the Boy Scout's band, and a girls saxophone band. GRADUATE SWIMMER TO TEACH AT THE TUMBLE N

Miss Annie Elizabeth Hall, a graduate swimmer from the University of California, has been engaged to teach swimming at the Tumble N Pool, and many beginners and advanced swimmers will be given an opportunity to develop their knowledge of the art.
Claude Hurbut, owner and promoter of Tumble N has left nothing undone for the amusement and welfare of his guests, and the Tumble N is becoming one of the most popular play grounds on the Plains.

Hasten slowly—don't lose heart. If you have to put your iron on the anvil twenty times, what's the difference—just so the weld don't break.

Take a Flashlight With You

—Wherever you go this summer—with the automobile, on the outing or camping trip—you need a flashlight—the safe, dependable light for all emergencies.

—For quality and practical service get a Winchester Flashlight. It's finely and durably made and has special features not found in ordinary flashlights.

—Winchester batteries are scientifically made to give bright and long life. They fit all standard flashlights.
