

# Lubbock Morning Avalanche

VOL. 1. NO. 218.

LUBBOCK, LUBBOCK COUNTY, TEXAS, THURSDAY, JULY 12, 1923.

UNITED PRESS SERVICE

## FRANCE RATIFIES THE NAVAL PACT

### BREAK FEARED BY FRANCE AND GREAT BRITAIN

#### BELIEVE ENGLAND SEEKING SEPARATE SETTLEMENT REPARATIONS

LONDON, July 11.—Slight danger of a break between France and Great Britain over the reparations question, was indicated in semi-official circles today, after the British cabinet had given final approval of the statements on the subject which Premier Baldwin and Chancellor Curzon are to make in Parliament tomorrow.

#### France Moves to Prevent Rupture.

LONDON, July 11.—France is making preparations today to prevent the threatened rupture between France and Great Britain on the eve of the announcement of the new policy of Great Britain regarding the reparations settlement, which policy is believed to be one of a separate settlement with Germany. It is understood that France has offered to recede from her aggressive stand of reparations collections.

The French government has twenty-four hours in which to forestall the announcement in the House of Commons by Premier Baldwin of the "one hand" policy of England toward Germany.

#### PICNIC FOR DAWSON CLUB BOYS AND GIRLS

LAMESA, July 11.—On Friday July 13th the Dawson County Boys and Girls Clubs will hold their annual picnic. The program will begin at 9:30 with a band concert played by Lamesa Chamber of Commerce Band. Dinner will be served in the tourist park. The Chamber of Commerce is furnishing the club members with all the free lemonade they can drink. In the afternoon the program will be continued at the Majestic Theatre with pictures of educational values. The conclusion of the program will be a live stook judging contest and will be on the city square.

#### Four of Dawson County's Club Boys will attend the Farmers Short Course July 23rd to 28th inclusive.

#### NORTH ROBY SCHOOL TO BE ENLARGED SOON

ROTAN, July 11.—Another room is to be added to the North Roby School due to congestion and increase in scholars. At the election June 30, bonds in the amount of \$1600 were voted for the purpose, as well as the authorization of a \$1 maintenance tax for school purposes. Not a single vote was polled against the bonds or maintenance tax.

### E. Studeman Elected President Of The Citizens National Bank; W. O. Stevens To Remain On The Board Of Directors

Lubbock people are gratified with the progress that is being made in interesting capitalists from other sections of the state in local institutions, and have every right to feel that the future holds great possibilities for the development of the South Plains in every way.

As was announced in an issue of the Avalanche several months ago, the principal stock of the Citizens National Bank has been sold, and the purchasers are taking active interest in the institution at this time.

#### At a recent meeting of the board of directors E. Studeman, of Moulton, Texas, was elected president to succeed W. O. Stevens, and France Baker was promoted to active vice president.

Wm. Dickson Green, was elected cashier and Joe Tom

### MISS ROBERTSON FINDS WELFARE WORK NOT BED OF ROSES

MUSKOGEE, Okla., July 11.—Miss Alice Robertson, former Congresswoman from this state, is finding life as a welfare worker at the soldier's hospital anything but a bed of roses, according to hospital attaches.

The animosity and ill will of the veterans confined in the hospital, flared up when she declared that the nurses must abolish short skirts and bobbed hair, and must do more work.

The World War veterans declared it was bad enough to be crippled up and have to remain in the hospital, without having to face the return of long dresses and bobbles.

However, the attitude of the ex-soldiers does not worry Miss Robertson any and she is continuing her work unaffected by the sentiment expressed.

### TWO PROSTRATED WHEN MERCURY REACHED 103 IN OKLA.

OKLAHOMA CITY, July 11.—As a result of the mercury climbing to one hundred and three degrees, two prostrations have occurred in this city, and the balance of the state is sweltering in the heat in comparison.

### RUSSIA SEEKS RECOGNITION BY JAPAN

TOKYO, July 11.—The so-called preliminary negotiations which are under way here between A. A. Joffe, the Soviet Ambassador from the Far East, and Toshihiko Kawakami, the Japanese Foreign Office, marks an attempt to start the third Russo-Japanese Conference which is named at the recognition of Russia by Japan.

Japan is planning to give concessions and privileges and opportunities in Siberia and Russia, but wishes to evade a full diplomatic recognition of the Soviet Government.

The final outcome of the Conference is most uncertain and may drag along for many weeks.

### LOVE AFFAIR CAUSES SUICIDE OF YOUTH

LONDON, July 11.—Disappointment in love affairs caused the sensational suicide of Angus Patrick Bowes Lyon, a cousin of the Duchess of York, according to the father of Bowes.

He was a member of the most exclusive set of London society, and his engagement was recently broken with Miss Fredda Parsons, a daughter of the late Major General Sir Charles Parsons.

No matter what happens at a prize fight somebody knew it would.

### TRACE FOUND OF MAN REPORTED KILLED IN WAR

#### TELEPHONE CALL DISCLOSES TO MOTHER THAT MAJOR STILL ALIVE

HOUSTON, July 11.—Search is being made here for Major Henry Whipple, of San Antonio, formerly an officer in the 141st Infantry. He was reported killed during the war, but is thought to be living here now with his mother a blank as a result of his experiences during the World War.

The mother of the disabled Major received a telephone call from a Mrs. Taylor, who is living in Houston, who said that she was a friend of Major Whipple and that the Major had asked her to call his mother. At this point the conversation was broken and the mother heard no more regarding her son.

### DALLAS FIRE POLICE PERFECTS FIRE SERVICE

DALLAS, July 11.—An invention for hoisting fire hose to higher stories of tall buildings, which can be used for life saving, has been perfected by Louis Turley, commissioner of Fire and Police here.

The "emergency elevator" as explained by Turley, is a combination of hooks and ropes which hold a line up the side of a building, and operates the need of several men holding the hose and running it up.

A hose can be run up in about a minute by three men with the aid of the device, whereas it now takes six or eight men from eight to twenty minutes to carry a line up four stories.

### CONVICTED MURDERESS ATTEMPTS TO TAKE OWN LIFE IN JAIL

CHICAGO, July 11.—Unable to understand that she still has a chance to escape the gallows, Mrs. Isabelle Nitti Crudelle, who has been convicted for the murder of her husband, tried to end her life by beating her head against the iron bars of the cell.

Following her refusal to eat or take nourishment of any kind, the jailers forced orange juice down her throat to keep her alive. She does not understand English, and therefore believes that she will go to the gallows Saturday, however, her case has been appealed to a higher court.

### ROUTE PATRONS TAKE GOOD CARE OF BOXES

DE LEON, Texas, July 10.—H. B. Billamy, fourth assistant postmaster-general, in a letter, received by local rural postal carrier, J. W. Jones, commends patrons on route number two for painting and properly lettering their boxes, ascribing the good work to the energy and appeal of Jones.

### DOCK WORKER AT HOUSTON TAKES OWN LIFE

HOUSTON, July 11.—A. N. Thornton, a dock worker, 45 years old, shot himself to death here today with a double barrel shotgun before the eyes of his two young daughters who were in the room with him at the time.

According to one of the little girls, the father came in from his work, and asked how they were then picked up the shotgun and blew off the top of his head, as a result of which he died on the way to the hospital.

### "DAWN TO DUSK" AIRPLANE FLIGHT ORDERED ABANDONED

DAYTON, O., July 11.—For the good of the air service and all others concerned, the "dawn to dusk" transcontinental airplane flight of Lieut. Russell Maughan has been abandoned for this year. It was ordered today by Major General Barlett, of the Air Service.

### CANARY SINGS BETTER TO CLINKING OF CASH

DETROIT, July 11.—A never-failing prosperity barometer lives in a little restaurant on the east side here. It is a diminutive canary bird, with a very musical whistle, the property of Aluzo Galdias, owner of the restaurant.

"Chiquita" hangs from the ceiling of the little restaurant, directly over the cash register. When the bell in the cash register chimes, "Chiquita" sings. The faster the bell, the happier the bird.

### COAT OF GREASE AND FEATHERS GIVEN BOY

HOUSTON, July 11.—Roy Baker, 12, was greased and feathered and held prisoner for several days according to his report to the police this morning. He said that he was called from the Western Union office where he works, about 2 a. m. Tuesday, and was forced into a small automobile, after which he was chloroformed, and a cloth placed over his face.

When he regained consciousness, he found himself tied in a barn near his home, and was nude except for a coat of grease and feathers, he said.

His captors returned and released him late Tuesday, but they wore masks, he said, and he could not recognize any of them. He believes that the "party" was for a joke, but means the loss of his luxuriant hair, which was cropped off close some time during the escapade.

### WISCONSIN ADOPT NEW PLAN OF TRAINING

MADISON, Wis., July 11.—Wisconsin school kids will get bodies trained, as well as minds, starting next fall.

A new law just signed by Governor J. J. Blaine requires in all public schools above kindergarten, a minimum of two and one-half hours a week of "physical education," which is defined to mean "practice in the art of physical exercise and hygiene."

### TWO SECTIONS OF GRASS BURNED NEAR EL DORADO

EL DORADO, July 10.—Town volunteers recently went out to the aid of ranchmen south of town when a prairie fire got a start. Before extinguishing the flames ranchmen lost 1220 acres of grass.

### MAYFIELD FIGHT TO RE-OPEN IN NOV.

HOUSTON, July 11.—The fight to unseat Earle B. Mayfield in November from the Senate, to which he was elected in the last primary, will make the "Newberry case" look like "small potatoes." It was predicted here today by Scott Woodward, a personal friend of George E. B. Paddy, who went down to defeat before Mayfield in the last election, on the Independent ticket. Woodward has been in Washington watching the formulation of preparations for the fight.

### JACK DEMPSEY MAY MEET HARRY WILLS

CHICAGO, July 11.—Jack Kearnes, the manager of Jack Dempsey, said here today that Dempsey would meet Harry Wills, a negro at any time.

Kearnes is on his way thru here to attend the Willard-Firpo fight, and says that Dempsey is in great shape following the Gibbons scrap, but refused to make any comment on the bank failures at Great Falls, following the 4th of July bout. He only smiled when he was asked his opinion in the matter.

### WILL ENFORCE LAW REGULATING SALE OF FISH

AUSTIN, Texas, July 11.—(United Press.) To enforce the new law prohibiting the sale of bass, crappie and cat fish which will effect 48 cents a pound, the state deputy fish warden are to be placed on duty in all the restricted districts. It has been announced by W. W. Boyd, state game, fish and water commissioner.

The finest fresh water fishing districts in Texas fall under this new law which will put many market fishermen out of business. Persons in the interior will be forced to buy salt water varieties that are shipped inland.

### DAY BY DAY FRANCE KNOWS COUE LESS AND LESS

PARIS, July 11.—Day by day, France knows Coue less and less. Emile Coue, the apostle of the auto-suggestion whose name is known in every household in the United States, is apparently a prophet without honor in his old country.

Although he has opened an institute in Paris, the patronage is very small as very few Frenchmen ever heard of him. France did not know she had the famous Dr. Coue, at all until he made his trip to the United States.

### OIL WELL PRODUCES IN JACKSBORO VICINITY

JACKSBORO, Texas, July 10.—Despite the fact that it came in as a producer more than a year ago with a flow of fifty barrels, the Roxana Petroleum Company's William's Brothers well, 10 miles southwest of this place, continues to make 60 barrels a day.

### SENATOR BAILEY WILL DEDICATE SHERMAN PARK

SHERMAN, July 11.—Former Senator, Joseph W. Bailey, will dedicate the new auditorium in Old Settlers' Park here August 21, it has been announced.

### ASSIGNMENT MADE TO THREE CLUBS OF CITY TO FORMALLY OPEN CLEAN-UP CAMPAIGN FRIDAY

Assignments are being made by Rotary Club Chairman, the Junior Chamber of Commerce Chairman and will today be made by the Kiwanis Club Chairman in the clean-up campaign that gets under way starting this afternoon and continuing until the City of Lubbock is the cleanest it has ever been in the history of the town.

The assignments of territory to these three clubs were made thru the drawing of numbers by interested parties for each of the clubs. The town has been divided into three sections. Everything east of Avenue H was placed in Section 1. Everything west of Avenue H and south of Broadway was designated as Section 2 and the remainder of the town comprises Section 3. The Kiwanis Club drew Section 1, the Junior Chamber of Commerce Section 2 and the Rotary Club Section 3.

At the regular meeting of the board of directors of the Junior Chamber of Commerce Wednesday morning Chairman Raybon outlined his plan of action and will make assignments for this work to the various members of the Junior Chamber of Commerce Wednesday night. Each man has been assigned from one to three blocks over which he will have full authority and will be held personally responsible. In this way the work is more evenly distributed and can be completed without any great inconvenience to any one man if each man will do his part right.

### BILL PASSES SENATE BY OVERWHELMING VOTE

#### PLACES FRANCE SOLIDLY BEHIND WASHINGTON CONFERENCE

PARIS, July 11.—The French Senate today ratified the Washington Naval Pact by a vote of two hundred and seventy-three to three, and also unanimously ratified the Pacific Accord Pact drawn up by the five Major Powers at a recent Conference at Washington.

The vote completes the process of ratification which was begun when the Chamber of Deputies approved the naval treaty last week by an overwhelming majority.

The French Government, on account of this move, now stands solidly behind two of the foremost decisions of the Washington Disarmament Conference, having ratified the two pacts without reservation, as a result of which it was declared a reinforcement of the friendship between the United States and France would be brought about.

### BROADWAY FAVORITE IN-DICTED ON CHARGE OF JURY-FIXING

NEW YORK, July 11.—William J. Fallon, the fair-haired boy of the Broadway cabarets, has been indicted here on a charge of jury-fixing in connection with a Federal stock fraud case.

Fallon is the young lawyer who suddenly leaped into prominence along Broadway a few years ago, as the man who bore a charmed life in criminal courts and he is credited with having saved many from prison through his resourceful ability to take advantage of legal technicalities.

### AMERICANS WILL NOT RELINQUISH THEIR CITIZENSHIP

PARIS, July 11.—Although there are more than 25,000 Americans living in Paris permanently, very few of them renounce their citizenship to become citizens of France.

Of the 4,588 persons who are naturalized here during the last year only one was an American. Included in the number were 148 Germans, most of whom fought in the French army during the war.

### Chairman Jed Rix of the Rotary Club and each member, whether present or not, was assigned from one to five blocks and is expected to take care of them.

It is useless to insult the intelligence of the citizenship of Lubbock to again stress the absolute importance and necessity of making this a real clean-up. If you want to know how Lubbock looks in comparison to the rest of these contending towns—take a half day off and visit Plainview. Ask about Coleman. Investigate Snyder. Sweetwater and a dozen other towns—then come home and get busy.

The town is divided into three sections as outlined above. Each section is assigned to one club with a chairman in charge of the section. The Mayor, the Chamber of Commerce, nobody has any authority over these sections since they have been assigned to the club. That part of town is their responsibility and they are to be held responsible for the appearance of that section when the locating committee arrives.

The chairman of each club or organization assigned certain blocks to the different members of the club—and they are absolutely responsible for the cleaning up of the assigned blocks. They are to get the work done any way they can. See the residents on their blocks—be sure that they get on.

#### WEATHER

Louisiana: Thursday partly cloudy, light showers in south west portion.

Arkansas: Thursday partly cloudy, with local showers in northwestern part of state.

Oklahoma: Thursday generally fair.

East Texas: Thursday generally fair with light showers on the coast.

West Texas: Thursday, partly cloudy, probably thunder showers in the Panhandle.

Shriners at Washington

Trains, automobiles and airplanes brought thousands of Shriners to Washington, D. C., to their national convention. Photo shows Imperial Potentate James McCord being greeted upon his arrival.

Even New Yorkers Have A Great Time On The Beach

By the United Press. NEW YORK, July 11.—The summer visitor to New York gets the impression of endless miles of baked brick houses, heat sizzling asphalt, white glaring sunlight, hot and rushing people sweltering in noisome subways, "Black Hole of Calcutta" flats and picnic luncheon littered parks.

He doesn't see and doesn't know the life of the New Yorker who, right at work at the office every day, spends his summer evenings camping under the stars, canoeing on moonlit waters, catching fish in front of his tent; and going to sleep beside a roaring campfire to keep off the midnight chill.

Sounds improbable when one talks of doing this—and spending the summer in broiling old New York at the same time.

But hundreds of New Yorkers do it.

The answer lies in the "Canoe Beach Tent City," right across the Hudson river from upper Manhattan, but sacred to nature thru the laws of the Palisade Interstate Park.

Half an hour from Broadway one comes to the primeval wilderness. The office worker, jammed sardine-like in the fetid subway, arrives at 125th street with wilted collar, ragged temper, and discheveled mein. He hies himself to a canoe club, pushes the canoe into the water; takes off his office coat.

Twenty minutes of paddling he has reached the opposite bank of the Hudson. Above his head rise the 400 foot towering Palisades. At their foot is a broad, sandy beach, dotted with khaki tents.

There are hundreds of these tents along the shores. Before each one the evening campfire gleams. Bobbed-hair friend wife stands in shirt waist and riding breeches, frying eggs for supper. Baby is cooing under his mosquito net. Bubby shakes his office clothes for a bathing suit, dives into the stream, comes out to dine, and then sitting in the doorway of the tent, watches the moon rise, calm and silently over the mad, frenzied blaze of light, two miles away, that is wicked, and oh, so hot old Broadway.

Next morning he paddles back to another day at the office. Thru-out the summer, from May until November, New York families thus lead the simple life.

LIGHT RAIN AT RAILS WILL HELP THE CROPS

Special to the Avalanche. RAILS, July 11.—A light rain fell here Tuesday which will help the early feed crop. The rain was heavy north of Rails and several showers have been reported in other communities.

Emerson and Sam Halpin of New York City, were in Lubbock Tuesday and Wednesday. Sam Freshman and A. C. Billingsly were here Wednesday from Dallas, transacting business.

Floyd County Is To Have A Big Exhibit At The State Fair

Special to the Avalanche. FLOYDADA, July 11.—Floyd county will have a comprehensive agricultural exhibit at the Texas State Fair at Dallas this year according to announcement made by the Board of Directors of the Floydada Chamber of Commerce Tuesday. Maury Hopkins, secretary of the Floydada Chamber of Commerce has already begun the assembling of the exhibit and is very optimistic over the outlook for a great exhibit this year. In addition to the exhibit at the Dallas Fair, Secretary Hopkins has been selected by the West Texas Chamber of Commerce to carry the All West Texas Exhibit to the Oklahoma State Fair at Oklahoma City again this year. This exhibit will not be confined to Floyd County products but will be composed of products from all parts of West

Texas. He will be assisted in assembling the Oklahoma exhibit by B. M. Whitaker, exhibit manager of the West Texas Chamber of Commerce who is in the territory now lining up the exhibit program of that organization.

MEMBERS OF THE CHRISTIAN CHURCH WILL MEET AT FLOYDADA

Special to the Avalanche. FLOYDADA, July 11.—The Northwest Texas Camp Meeting of the Christian church will convene in Floydada from August 17 to 26th. This meeting was an annual affair up until the war and attracted hundreds of people annually from all sections of West Texas. Cots and tents will be provided by the local Christian church for all who will attend and camp out. The services will be conducted under the City Park Tabernacle and ample camping space will be provided close

by. It is estimated that seven hundred and fifty will attend the encampment and all churches in West Texas are being urged to encourage their membership to take this opportunity and spend their vacation in Floydada attending a real, old-fashioned camp meeting.

FERGUSON TO SPEAK AGAINST KU KLUX KLAN

DE LEON, July 11.—Former Governor Ferguson will reach De Leon July 16 to make an address against the Ku-Klux Klan, according to information received here. It is said that the impeached governor is coming at the solicitation of friends here. He is making a tour of the state, speaking Saturday at Bend, near San Saba.

YOU'LL HAFTA PEP UP!'. The man replies 'THAT'S ALL RIGHT! I AMN' SO SLOW!'. The child says 'AW, GIT OUT!'. The man says 'YESSIR! THIS IS IT I GOT ON!'.

Hugo National Comp

By the United Press. BERLIN, July 11.—The Hugo National Competition is being held in Berlin. It is a contest for the best national flag in the world. The contest is open to all nations and the winning flag will be flown in Berlin. The contest is being held to commemorate the centenary of the German national flag.

# Hugo Stinnes Becomes Giant Of International Finance; His Ruhr Holdings Comprise Small Part Of The Interests

By the United Press.  
 BERLIN, July 10.—Such an economic disturbance as naturally resulted from the occupation of the Ruhr by the French meant little or nothing in the sum total of Hugo Stinnes' activities.

Hugo Stinnes—no longer merely a German industrialist but an international business giant, the network of whose interests stretch around the world—merely turns his other business lost in the Ruhr into his other holdings and quietly but regularly collects his dividends just the same.

Hugo Stinnes owns at least seventy big foreign enterprises, has heavy interests in at least seventy more and through them and other agencies has indirect interests in many more, not only in Europe, but in America and the Orient as well. In London, Zurich, Madrid, Vienna, Christiania, Cape Town, Johannesburg, Bucarest, Stockholm, Valparaiso, in Japan and the United States, Stinnes' money is invested and Stinnes' influence is felt. The Ruhr is but a tiny bit of what Stinnes has to worry about—if he ever worries.

When his Ruhr holdings were made impotent by the French occupation, Stinnes' concerns in other sections of Germany, in Austria and elsewhere—holdings which up to that time had been doing only normally well—branched out into honest-to-goodness concerns, increasing their output, taking on new employees and adding materially to the profits which go into the pocket of Hugo Stinnes.

**Unworried by Blockade**  
 And this internationalization of Stinnes' money made it possible for him to continue practically untouched by the French blockade of his Ruhr properties. For instance, the Austrian Alpine Mining and Smelting Company owned and operated by Stinnes took a new lease on life when the Ruhr competition was nullified by the French. Instead of operating only nine or ten Marx works as last year, the concern today operates sixteen. The number of workers last year greatly reduced today totals 16,400, which compares favorably with pre-war days. And the business of these concerns for the first four months of 1923 totals 788,000 English pounds, 100,000 pounds—or nearly half a million dollars—more than during the same period of 1922. An dthe bitterest part of it, from the German point of view, is that the Austrian mine holdings of Stinnes are connected, through other connections as the "French Krupps."

"Every disturbance automatically balances in one section the damage which it does him in another," one expert declares, pointing out the danger to Germany and to the world of such a situation.

**Business and Politics**  
 "The situation would be less dangerous if it were merely a business man who did not seek to influence political affairs," he writes. "The leader of the Stinnes bloc, however, is in fact a political potentate whose power can scarcely be overestimated. It is a fact that it is pure fiction to regard Stinnes merely as a German industrialist. He is international and as such is outside the realm of German financial restrictions and regulations.

This writer points out the inability of any German laws or rules connected with the stabilization of the mark in any way to effect such an international financial power as Stinnes, whose money is in all parts

of the world—in all shapes and forms.

And Hugo Stinnes apparently is only beginning his world-wide activities. Since the war he has stretched his holdings everywhere. No branch of industry is without his influence. Electric enterprises, shipping, mining, transportation by land, river and sea, newspapers, news agencies, hotels, oil concerns—in fact practically all lines of human endeavor have Stinnes' money and Stinnes' connections mixed up in them somewhere.

One can mention only a few Stinnes enterprises. Trifle interests like hotels, newspapers, banks, press agencies, etc., may be merely mentioned, without going into details. Their number are really unknown. The bigger interests—international in their aspect and operation—in which Stinnes is alleged to have an interest, include:

- World-Wide Interest.**
- Siemens-Rhein Elbe-Schuckert Union, with its myriad foreign connections.
- Valparaiso, Chile, tramway.
- Electric works in Spain and South America.
- Electric appliance works throughout the world.
- Alpine mine and smelting works in Austria.
- Import company in Vienna.
- Business branches, including Lip-tak and Co. in Budapest and Ferro A. G. in Bucarest, and Ester & Co. at Sofia.
- Hugo Stinnes, Rotterdam.
- Piehl & Fehling, in Copenhagen and Helsingfors.
- Hugo Stinnes, at Christiania.
- Oerstrandwerk, at Landskrona.
- Julius Schoch and others at Zurich.
- Promontana, at Zug, with a half million Swiss francs capital working in connection with the Alpine concerns of Austria, with Castiglioni and with the Italian Fiat Works.
- Greinfis A. G. at Trieste.
- Hugo Stinnes Trade bureau for import in New York.
- Farming enterprises and oil fields in Argentina.
- Ship connections with the Japanese Nipon Kaish in East India; also in Java.
- Polish and Upper Silesian works, Bismarck mines and Kattowitz mines newly acquired and operated by Stinnes. This is tied up with the Vienna Anglo-Bank which is largely under British control.

## L. T. Martin To Leave This Morning On Auto Trip

L. T. Martin, former secretary of the Lubbock Chamber of Commerce, who has been very active for the past several years in the development program of Lubbock and the South Plains, will leave this morning on an automobile trip thru Mexico, Colorado and California.

Mr. Martin has arranged a very convenient camping outfit, a large supply box with several compartments for the various camp needs is suspended upon a steel carrier on the back of his car, and is so arranged as to make it possible for him to make immediate use of any of the supplies with minimum effort. To be thoroughly insured against tire trouble, Mr. Martin equipped his car with four extras.

Mr. Martin will be accompanied

on the trip by Fred Oliver, Mrs. Oliver and Fred, Jr., having made the trip by train and together with Mrs. Martin will join the tourists in California.

Mr. Martin's many friends here are pleased to know that he is to take the much needed vacation, and are eager for his return to Lubbock.

L. T. Martin, Jr., of Amarillo, arrived in Lubbock Wednesday morning to assist his father in making final preparations for the trip.

## OBITUARY

### JOHN WILLIAM GORDON

John William Gordon son of William and Elizabeth Gordon, was born near Palmyra, Marion county, Missouri, on June 11, 1854.

He came to Texas at the age of twenty-six, and located north of Colorado City, that being what was termed the nearest railroad center to Terry county at that time.

He was completely wiped out financially during the first fall following his arrival and returned to Colorado City, where he secured work in a livery stable, and by saving his earnings faithfully, was soon started back into the cattle business, having taken a place with a leading cattle company of West Texas, and soon saved enough money to purchase a few heifers, which constituted his second start, as from this herd he built up his holdings which are now in Terry, Hockley, Lubbock, Castro and Deaf Smith counties.

He was an active leader of West Texas ranchmen and was recognized as a successful cow-man, and while conservative he was active in assisting in the promotion of many enterprises in his locality.

"Uncle John" as he was familiarly known thruout West Texas, was never married, and is survived by

one brother, M. G. Gordon of Brownfield, Texas, and one sister, Mrs. Mary S. Given, of Hannibal, Mo., another sister, Mrs. R. H. Coons having passed away two years previous to his death.

He was active in Masonic and Elk circles, and was a member of the First Christian church.

## How Local News In Ireland Sounds When It Is Printed

By the United Press.  
 LONDON, July 11.—The flavour of a "local happenings" column in a small town American newspaper is imparted to the news budget which the "Republic of Ireland" press bureau issues as part of the program to keep the "cause" alive. These are tragic events which the Republican bureau reports, but they are recounted in a casual, personal vein that makes them unusual reading.

Following are some excerpts from the bulletin of June 20, 1923, which is also dated "eighth year of the Republic."

"Miss Mary Comefort, who was rearrested in Dublin on June 1; has now been on hunger-strike twenty days. She is very weak, her heart is affected and toxemia has developed.

"Miss Fiona Plunkett is suffering from injuries received when arrested. She attempted to swallow a despatch which she was carrying; her captors pulling it out of her throat, burst a blood vessel in her head.

Although little is heard of the Republican movement today, its sponsors in London still issue, some what mysteriously and secretly, a daily bulletin of "news events" in Ireland. The bulletin is sent to all American newspapers and news associations represented in London.

## CULLUM BROS. PLACE NEW SUB-AGENCY AT QUANAH

E. J. Wall, of Quanah, has established a sub-agency for Studebaker automobiles in that city, the contract having been made with Cullum Brothers, distributors for the Northwest Texas territory.

This is the sixth sub-agency established by Cullum Brothers, Panhandle, Childress, Spur, Crosbyton, Creamery Co.

Slaton and Lamesa having Studebaker sub-agents. A deal will be closed this week giving Big Spring a sub-agency.

### A "MADE IN TEXAS" WEEK.

That Texas is gradually developing into an industrial state is brought out in a statement just made by G. M. Knebel, Executive Vice-President of the Texas State Manufacturers Association, with State Headquarters at San Antonio. He said in part: "Texas is in the lime light today as possibly it has never been before. Our greatest foundation is agriculture and will continue so to be for years to come. Texas has a land area of 262,398 square miles, with a population of 4,663,228, which is only about 18 people to every square mile of territory. We have on deposit in Texas Banks \$844,554,000; the value of our farm crops according to the 1920 Census was \$1,071,527,000; during 1922 we produced in Texas 116,670,000 barrels of Petroleum; over 3,000,000 bales of Cotton; 158,037,000 bushels of Corn, Oats and Wheat. We have over 6,000,000 cattle; 2,862,000 sheep, and 2,326,000 Swine. Texas has a railway mileage of 16,000 miles. The total assessed Texas property value is \$3,380,000,000. Our Common School expenditure is over \$30,000,000 annually. Every citizen of the state is proud of his citizenship, and the eyes of the world are turning towards Texas and its unlimited possibilities.

To those not informed, little would be thought of Texas as a manufacturing state, however we lead all Southern States in the total value of our manufactured products, which according to the 1920 U. S. Census amounted to just four thousand dollars less than one billion dollars, or to put it in figures \$999,996,000.

"In order to remind the people of Texas of the importance of our manufacturing industries, the Texas State Manufacturers Association will inaugurate during the early fall, a state wide movement to be known as 'Made In Texas' week. Governor Neff will be requested to issue a proclamation calling for a State wide observance of the week. 'Made In Texas' week will open at high noon on a Monday with blowing of all sirens, whistles, etc. in every town and city within the state of Texas. In many Texas cities trade parades will be held featuring Texas Made Products or Home Industry Products. All Civic, business and Lunch Clubs will be requested to cooperate by furnishing speakers on the subject of 'Texas Industries and made in Texas products, during the weekly meetings. Manufacturers, Jobbers, Dealers and Retailers will be requested to make special displays in show windows, and throughout their places of business of Texas-made products, and instruct their salespeople to pay special attention to the sale of Texas Made Products; and to feature 'Made In Texas' week in their display advertising.

"Outlines of program will be furnished every community within the state, and this can be changed in any way desired. It is of the greatest importance that every community stand back of its industries and those of the state as a whole, by paying more attention in placing contracts and making purchases to Texas Made Products. There are some 150,000 people employed in the industries of Texas, and for the future industrial welfare of the state these workers should have constant employment. We can expect our state to grow along industrial lines in the same proportion as we stand back of our industries, for it is then that new capital will seek investments within our state. We should learn to live at home, support our home merchants, professional men, builders, contractors, architects, engineers, and convert our raw materials into the finished products, consume what we need in the state, and sell the balance to feed and shelter the world. Every citizen of the State of Texas will be expected to give his active support and cooperation to this state wide movement, not only during 'Made In Texas' week, but now and every day in the year.

### STATE BANKS IN GOOD CONDITION.

In a statement made by J. L. Chapman, Commissioner of Banking, he said that at this time there are only about twelve "sick" banks out of the 960 State banks and that of the 80 per cent would "pull through easily." He expressed the opinion that "the worst is over" and that less than six assessments for the guaranty fund will be necessary during the eighteen months.

An innovation is to be a monthly bulletin issued by the department, which will make its appearance about July 25. It will be devoted to the interests of the guaranty fund banks and they are to be assessed from a minimum of \$5 to \$100 to cover the cost. This would be only about \$1,000, Mr. Chapman says, leaving \$6,500 to be used in prosecuting the dissipators and violators of our State banking laws. The latter information is conveyed to the banks in a letter mailed by the Commissioner to the guaranty fund banks.

"The State banks will not feel the usual mid-summer pinch this year," Mr. Chapman said, "because of the flattering crop prospects, the grain crop returns and the sale of cattle and wool. The customary embarrassment from middle July until the September crop returns come in is not going to be manifest this year."

### LIKE THE LOCUSTS OF EGYPT.

Representative Underhill of Massachusetts in a recent article entitled "The Hole in the Nation's Pocket," furnishes a picture of the growth of bureaucracy within our government that is contributing heavily to the burden of taxation. He takes the federal trade commission as an example. It was established in 1914, with a \$75,000 appropriation, and up to 1922 cost the taxpayers \$8,000,000.

This is merely one of the many instances cited by Representative Underhill showing how bureaucracy is spawning at the national capital and as The Union, published at Belle Plaine, Iowa, says, "eating into the pockets of the taxpayers and descending upon business like the plague of locusts in Egypt."

Representative Underhill says: "The minute one of the thousands of ideas for new regulatory legislation of some sort gets on the statute books, the infant organization created for carrying it out immediately starts to grow. Elaborated ideas bud from the parent trunk in every direction and rapidly become wide-spreading branches. The roots strike deep into the public treasury to draw the nourishment that must go throughout the whole organism to the last little job-holder on the farthest little twig."

### RENDERING PUBLIC SERVICE.

In his recent annual address, John B. Morton, president of the National Board of Fire Underwriters, emphasized the extensive work in the interest of public service that the National Board is carrying on. Its committee on public relations is endeavoring to awaken the American people to the necessity of fire prevention and is now reaching many thousand school children with its manual of fire prevention lessons. It has circulated two motion pictures dealing with fire prevention which have been exhibited at theaters and schools where they have been seen by at least two million people.

President Morton pointed out that fire insurance is a peculiar business since it is both wholesale and retail in its nature. He said: "We manufacture protection in the home office and retail it through our local agents. Our chief point of contact with the public through our agents. The individual companies and the National Board have been impressing upon the agents their duty in bringing before local communities the advantages to be gained by cities and towns through more effective fire prevention measures. Many agents are now performing a great public service by actively carrying on fire prevention work, identifying themselves with the forces for civic betterment, delivering addresses before chambers of commerce, Rotary clubs and other organizations, on the subject of fire prevention, while others carry educational advertising in their local papers.

The following is an interesting bit of history connected with the War between the States: "For 62 years the Postoffice Department at Washington has carried on its books a debit of \$37,177.06, charged against four Southern cities—New Orleans, La., Savannah, Ga., Galveston, Texas, and Little Rock, Ark. In 1861 the Confederates took possession of the New Orleans sub-treasury containing funds amounting to \$31,164.44; and of United States depositories in the other cities mentioned containing funds as follows: Little Rock, \$5,824.50; Savannah, \$205.76; Galveston, \$83.36. Bills have been introduced in Congress to charge off these debits, but so far have failed of adoption. Hence, they have necessarily been continued on the books of the Government, and this will have to go on until some adjustment of the matter is made.

Hon. S. H. Blan, Secretary of State of Alabama, has been gathering for the Legislature of that commonwealth information as to how criminals are executed in the various States of the Union. Forty states, replying to his questionnaire, have disclosed the following facts: "Fourteen of the reporting States practice electrocution, nineteen use the gallows, and seven do not have capital punishment. The 14 states which electrocute condemned felons are Arkansas, Florida, Massachusetts, Kentucky, North Carolina, New York, Ohio, Oklahoma, Pennsylvania, South Carolina, Virginia, Vermont, Utah and Texas. The gallows is still used in Alabama, Connecticut, California, Delaware, Georgia, Iowa, Illinois, Idaho, Louisiana, Maryland, Montana, Mississippi, Missouri, New Hampshire, New Mexico, West Virginia, Oregon and Washington. The states which have abolished capital punishment are Kansas, Maine, Minnesota, Michigan, North Dakota, South Dakota and Rhode Island. Missouri abolished capital punishment at one time, but re-enacted the statute when crime increased.

Mr. Henry Ford is quoted in the press dispatches as having recently made the following statement: "I have no desire to be President of the United States. I am too much occupied with my own affairs to become the next President, and I do not intend to run. All this you have seen about my name being associated with the Presidency, is newspaper talk. There is nothing in it." This statement, if correct, shows that Mr. Ford is a man of well balanced judgement, for his training has not been such as to fit him for the work of the Presidential office. In his present sphere he is an outstanding success and commands universal respect, and to abandon it for the turmoil and uncertainties of politics would doubtless prove to be for him a great mistake.

### Little Avalanches

Germany is still making promises to pay, but the banks still refuse them as collateral security.

The motorists who take no man's dust frequently look quite dusty as they emerge from the ditch.

The fact that migratory birds are protected now does not necessarily mean that tramps must be kept secure from all harm.

## Increase In Farm Mortgages Shown Interest Is Lower

MADISON, Wis., July 11.—Interest rates on farm mortgages are lower in eastern Wisconsin than in any other part of the nation, and highest in Texas, New Mexico, and Montana.

The figures show a big increase in "owner-operated" farms under mortgage.

These are the findings of the institute for research in land economics, of which Prof. R. T. Ely, University of Wisconsin economist, is director. Figures of the 1920 federal census were used in the compilations.

In east central Wisconsin, where the rate is from 4.6 percent to 5 per cent, there is found an intensive dairy section inhabited by a thrifty class of farmers of foreign descent, the institute comments. "Further study reveals the fact that from 79 to 90 percent of the money borrowed comes from the community, indicating a surplus of local capital.

In the southern part of Texas, the interest rate ranges between 6 and 10 percent. In most of New Mexico from 7.6 to 9 percent; in Montana and parts of Wyoming and Idaho, from 7.6 to 9 percent; in the report says.

The rest of Wisconsin, all of Iowa, the upper half of Illinois and the southeastern corner of Minnesota are included in an area in which interest rates of farm mortgages range from 5.4 to 5.6 per cent.

New York State, the eastern half of Pennsylvania, Vermont, New Hampshire and most of Massachusetts range between 5.1 to 5.5 per cent.

Alabama, Georgia and South Carolina range from 7.1 to 8 per cent. Florida's rates are from 7.1 to 9 per cent.

The Pacific coast seaboard of California, Oregon and Washington are in an area calculated at from 6.1 to 6.5 per cent; the eastern half of these two states average between 6.6 to 7 per cent.

Louisiana ranges from 7.1 to 7.5 per cent; Arkansas from 7.5 to 8 per cent.

Rain and Interest Rates.—"Physical conditions, such as soil climate and rainfall are related to the direct correlation observed between interest rates and amount of rainfall in corn and hay crop regions, and also between annual precipitation and the interest rate in wheat regions," the institute says.

The study of interest rates is being carried further to work out with exactness the factors governing interest rates, with particular reference to the connection of rates with the value per acre of land and amount of available local capital.

The institute also announced new totals from the 1920 census which show that the number of farms in the nation operated by their owners has been increasing during the last thirty years, and that the number of these "owner-operated" farms which are mortgaged has been increasing even faster.

The number of "owner-operated" farms in 1920 was 3,923,090, in

### ADVERTISING'S PIONEER WORK

The first thing to do in a campaign to build up a bigger retail field, is to see that the territory covered by the home newspaper or newspapers is reached through advertising.

Wherever a newspaper has a good circulation, the merchants of that town ought to have a good trade. If a lot of people in the district covered by the home newspaper are not trading at the place where these papers are published, it suggests that the stores of that place are falling behind their competitors in softening business through the press.

Advertising does a kind of pioneer work in opening up new trade relations for enterprising stores. It goes out into towns where a store was not previously known, and opens up new country for the operations of the live merchant. It conveys information about buying opportunities not known before; it sets the people traveling in a new direction in search of their home and business supplies.

1910 it was 3,948,722; in 1900 it was 3,638,403; in 1890 it was 3,142,746.

### Many Are Mortgaged.

In 1890, 28.2 per cent of these "owner-operated" farms were mortgaged; in 1900, 31 per cent were mortgaged; in 1910, 33.6 per cent were mortgaged; and in 1920, the percentage jumped to 41.3 per cent.

The number of farms operated by the owners in New England dropped from 165,455 in 1890 to 140,160 in 1920; the middle Atlantic states showed a similar drop, and the "east-north central" did not change perceptibly.

The largest increase was shown in the mountain states, where the number of owner-operated farms jumped from 53,142 to 202,515 in this period, and in the Pacific Coast states with an increase from 81,375 to 180,144.

The increase in the number of mortgages on farms operated by owners was acute in the Pacific Coast, mountain, west-south-central, and east-south-central states. On the Pacific coast, the average percentage of such farms mortgaged

hopped from 25.1 percent in 1890 to 52.1 per cent in 1920; in the mountain states from 14.1 to 52.2 per cent; in the west-south-central, from 4.8 per cent to 40.7; in the east-south-central, from 4.5 to 26.9; in the South Atlantic states, from 7.7 to 22.4 per cent. The New England, middle Atlantic, east-north-central and west-north-central showed small increases.

### FORMER GOVERNOR FERGUSON SPOKE AT BEND PICNIC

BEND, Tex., July 9.—James E. Ferguson, former governor of Texas, spoke to an immense audience at the Bend picnic here yesterday. The barbecue and food were in plentiful quantities and many interesting athletic events were carried through.

## WHEAT PRICES TAKE TUMBLE

### SELLING FOR LESS THAN DOLLAR AND ABUNDANT HARVEST PREDICTED

By the United Press. CHICAGO, July 11.—Predictions that July wheat would be forced lower, and that September and December wheat would be rated around ninety cents, were made here today at the close of a day of feverish trading.

The market, which has stood for several days, plunged into an abandonment Monday following the reports of excellent wheat throughout all grain sections, and the large surplus of wheat which was reported from practically every wheat growing state.

### Enormous Harvest Expected

CHICAGO, July 11.—The new wheat crop, harvest of which is now in full swing, has been placed on the market and is selling for less than one dollar a bushel on the local Board of Trade.

Advices received from all wheat sections predict that enormous yields will be harvested, and that the excellence now prevailing, assured an early harvest. Reports from Europe say the biggest crop since the war is in prospect in that country. This news was greeted with a rush to sell, and the market pits are crowded with excited traders and speculators.

Works of art sold in Paris as about 100 years old will not be that old until about 2923.

## Richard Lloyd Jones Says

Don't Try To Lose Your Natural Simplicity

Voltaire said that a singer was never, as you might suppose, "Can you Trill? Can you imitate, a mocking bird?" No, it was "Can you sing a simple ballad in a plain, straightforward fashion? Such a ballad is 'Home, Sweet Home'." That was a fair test.

Simplicity shows quality naked and unadorned. And it is genuine worth that dares challenge its criticism.

It takes both courage and the consciousness of value to brave before the world with affection. Our assumption of numberless little airs, poses and prejudices is but the confession and apology for weakness.

The strong are always simple. Simplicity implies strength. The weak hide their defects and their lack with tricks and flourishes.

The highest attainments in painting and sculpture are not the kaleidoscopic, brightly-colored canvases of battle scenes; not the complex, many-turreted statue structures that misguided patriots sometimes erect in memorial of achievement. The greatest picture in the world is a mother and her babe. As the sense of skill grows strong and the eye keen in its perception of beauty, non-essentials, jewelry and drapery, are stripped off and the true artist finds satisfaction in the flowing line and sitting flesh texture of the simple human figure.

In the world of letters, that which is simple is not the half-hearted, labored utterances of the laureate on some quiet "great" occasion. Rather, it is the simple stanza that sung itself out of some obscure poet's heart that binds us all with living tones through community of feeling and experience. The great song is never the oratorio but the ballad.

Real worth is always unassuming and natural. High thinking seems automatically to draw unto itself the complement of plain living. Napoleon was always most at ease in the Spartan simplicity of camp on the battle field. To his mind, the grandeur and splendor of his French court were a concession to the limitations of the less great.

Great minds focussed as they are on great issues have small patience with the trivialities of custom and convention.

It is only when the building is right, true in conception, strong in foundation, pure in outline, that the architect dares let it stand forth unadorned.

So with human souls. Our poor terms "homeliness" and "humanness" may stand for the truest aristocracy of human character.

## poem by UNCLE JOHN

Most everybody's got 'em, though it's powerful hard to say whether they are the immediate, or, at further distant day. Yet a feller art to figger, as he chews his daily bread, how they meet the gall or PROSPECKS glory in the prospects out ahead.

AHEAD There's nothin' more absorbin' to a feller's heart an' mind, that in tryin' to shape his prospects to the sort he'd like to find; and I couldn't think of nothin' that can fill my soul with dread, like a batch of gloomy prospects which is furdur on ahead!

I ain't ashamed to own it, that the chief of my delights, is, to dream of happy prospects, as I lay awake of nights. And I wake up in the mornin' with my face toward the sky, and the appetite for battle—mebbe never knowin' why!

While everybody's hopin' for a better state of things, when they swap these earthly garments for a pair of heavenly wings. Yet they better be particular in the pathway that they walk, if they'd dodge the fire an' brimstone prospects out ahead!

## HONEY PHILOSOPHY for 1923

ONCE a little schoolboy held a rabbit by the ears. And he talked to the rabbit "Three times four" he said. "How much is it?" When the rabbit remained silent he cracked it over the head with a stick and repeated the question. "How much is three times four?" When he was asked why he hit the poor rabbit he said: "Well the feller I bought him of said he would multiply and he went do nothin' of the kind." Apparently both buyer and seller were honest, but they didn't understand. The unfortunate rabbit on the side lines got the worst of it.

## HUBBERS GET TO PIPKIN EARLY AND TAKE FIRST OF GASSER SERIES BREAKING LOSING STREAK

Getting to Pipkin in the early stages of yesterday afternoon's exhibition the Hubbers took the opening contest of the Gasser series 5 to 1, breaking their losing streak after five straight defeats since the opening of the second half of the season.

Morgan had practically everything with him, and had the Gassers at his mercy for the entire time, the only count of the visitors coming in the fourth when Farley singled and scored on Burleson's triple to centerfield. With the exception of the eighth Morgan was never in danger, when two men were in scoring position with only one man out. In this frame Morgan went out pitcher to first and Farley struck out.

The local team in the first inning when, with two men out, Morgan doubled and scored when Brown drove one through rightfield 150 feet.

In the second they counted one when Battle was hit by pitcher, advanced on O'Neil's sacrifice, took third when Mueller grounded out second to first, and scored when Young booted Morgan's grounder, allowing Morgan to take first.

In the third Shepard lead off with a single through first and second, advanced on Sloan's sacrifice and scored when Brown singled to left, Brown taking second on the play, and scored when Dean singled through third.

Again in the fifth the locals counted one when Shepard singled through second, stole second and scored on Brown's single to right. Brown lead the hitting attack with three singles and a double out of four trips, with Burleson a close second with two singles and a triple out of four.

The box score:

## ERRORS COSTLY AND CUBS DROP GAME TO GIANTS

CLOVIS, N. M., July 11.—Roswell took the opening exhibition here today 5 to 4. It was a pitching duel between Chandler and Ratliff, the former playing the best of it. File, substituting in the right field garden dropped two in the third giving the Giants two runs and the winning run in the ninth scored on Clary's error. Bedford led the hitting, getting three singles. Mahin, Shaw and Fuller hit home runs.

The box score:

CHICKENS BEAT COWS

Twenty-four hundred dollars a year or an average of \$200 a month, is what Mrs. George Hilder, living four and a half miles southeast of Wymore, Neb., is receiving from chickens. She is now the general manager of the Hilder chicken business.

Eight years ago Mr. Hilder bought five calves, paying \$25 for them. He had consumed, although not bought, had a market value of about \$59, bringing the total cost to approximately \$75. The calves were sold the next spring for \$125, a profit of \$50.

At the same time the calves were purchased, twenty hens and a rooster were bought for the same amount, \$25. They laid well all summer, sometimes as high as 16 eggs a day. The total up to the next spring showed 270 dozen eggs sold for the sum of \$62.10, the average price being 23 cents per dozen for the year. Fifteen of the hens were sold off bringing \$20, making the total receipts \$82.10, or \$32.10 cash profit, besides 5 hens and the rooster left, and 1185 chickens saved and raised from the summer's hatchings.

At the present time the Hilders get about thirty six dozen, and sometimes as high as 500 eggs, daily from the flock of 550. This rate has been averaged through spring, summer and fall, decreasing in cold months.

During the past two years receipts from eggs and fowls sold have averaged about \$200 per month. Most of the feed is raised on the farm.

Mrs. Hilder uses hens and incubators for hatching, buying hens of the heavier types for this purpose. The flock has free range in good weather over about 80 acres of alfalfa, feed lots and pasture land. An average of about 700 hens are run each summer before culling. The loafer hens do not stay long on the Hilder farm.

POTASH COMPANY TO DEVELOP THEIR LEASES

BIG SPRING, July 11.—The Potash Company of America is installing boilers and engines on its recently acquired leases preparatory to developing the potash said to exist here. In ten days or two weeks actual work will start, it was reported. The structures being put up are permanent and substantial. It is understood that officials of the company will shortly visit Big Spring and the holdings of the company and may interest themselves financially in the construction of a line of railroad connecting Lamesa with Sterling City, via Big Spring, forming another important thru line from Brownwood to the South Plains.

Since a bricklayer's pay equals about 700 eggs, the hens ought to learn to lay bricks.

U. S. Will Keep On Feeding The Russian Ophans

NEW YORK, July 11.—The general emergency relief work in Russia of the Nansen High Commission created by the League of Nations Assembly will be liquidated on August 1st according to formal notification received from Dr. Nansen by the American Nansen Committee for Relief of Russian Children. In making the announcement, Dr. Nansen states that "while in many regions of Ukraine and of Eastern Russia the consequences of the famine are still terribly felt, and while in certain districts there are still thousands of persons menaced with death from starvation, nevertheless, it does not seem to us possible to prolong the existence of the vast international organization which grouped under the flag of the Nansen Mission the immense humanitarian effort of so many countries. The Nansen high commission will not, however, withdraw from Russia, Dr. Nansen announces, but will limit its particular activities to the three fields of agricultural reconstruction, food and clothing draft and relief package service, and medical and sanitary relief. Provisions for the continuation of child relief among the 4,000,000 abandoned children in Russia will be made by Dr. Nansen before his Russian relief work is ended. Simultaneously, a communication was received from Madam Kamenev, wife of Acting Premier Leo Kamenev of Russia, and Trotsky's sister, stating that "in connection with the liquidation of the foreign relief organizations we are faced with the necessity of finding, with the utmost urgency, some method of so regulating the diet of the children that the sudden cessation of foreign feeding will not mean the death of many of them before they can be accustomed to the coarse food, which will alone be available in Russia." The executive committee of the American Nansen Committee for Relief of Russian Children, voted to continue relief work for children in Russia after the cessation of the general emergency relief of the Nansen organization, at least thru the coming winter. The number of children affected was given, from data furnished by Dr. Nansen, as 4,000,000 orphan or abandoned children and 1,500,000 underfed children.

County News Items

Carlisle. There was a party at Mr. and Mrs. Craig Bonds' Saturday night. A large crowd was present and everyone reported a fine time. # Foundation For 5 Business Houses At Lamesa Completed

Special to the Avalanche.

LAMESA, July 11.—The foundation has been completed and the brick work is going up on the five business houses being constructed by W. S. Moore. The Conklin-Bartlett building is well under way and will be completed within about two weeks.

The five buildings being constructed by Cox and Son will be finished about August 15th.

Contract was let on Monday night for two buildings on the South Side of the Square to be occupied by Rix Furniture Co.

The inside finishing work is about completed on the Masonic Hall and it will be ready for use within a few days.

## THREE CLUBS ELECT CLEAN-UP CHAIRMEN

(Continued from Page One)

The job Friday afternoon when close up comes. Get each block busy and clean up their own places first. Then all fall together and clean up the vacant property or else all chip in and hire the vacant property cleaned up. That is left absolutely to the man in charge and he is to work out his own salvation.

### General Clean-up Rules

- All lawns must be mowed between the 25th and 30th of the month—and the grass trimmed around the house and by the walks where the mower fails to get it clean.
- All trees must be whitewashed or painted to a height of 40 inches. A formula will be carried elsewhere in the paper of a most satisfactory tree wash.
- Grass, weeds and trash must be cleaned from between the sidewalks and the streets. That is the most ragged appearing feature of the average home that is kept well enough inside the sidewalk but runs wild outside that limit.
- All weeds, sacks, papers, trash of every kind that can be burned must be burned. Be careful about fire, naturally.
- All tin cans, bottles, etc., should be gathered and soaked or placed in a box in the back alley. Beat the tin cans down flat. A much better way would be to bury all cans and bottles. For the city cannot afford to put on the trash wagons again and it is hardly fair to ask the clubs to pay that money out of their own pockets. However that is a responsibility of the chairman of the club and the men he assigns to the work. The cans and other trash must be gotten out of sight. Use your own way.
- Back yards and alleys must be cleaned. In making a tour of inspection in the army, the inspecting officers always put his finger on the spot that you least expected him to look. Of course this committee will be a busy committee with many things to see. But they are also an intelligent committee and they will see a lot of things that are definitely pointed out to them. Committees have been known to ask to be driven down a back alley or two for they tell the intimate personal history of a town just like a kitchen may tell a tale entirely different from the well kept front room of a home.
- The vacant lots must be cleaned up. Not as clean and perfect as your own front yards of course. But these waist high weeds, straggling papers and the rest of the vacant lot filth. If the neighborhood will throw in together they can clean their vacant lots up in one or two afternoons. But if they won't make it a piece of personal responsibility it is up to the chairman in charge or the man in charge of the lot to work out some way to raise money to hire the lot cleaned up for cleaned it must be.
- The work must be done now.

There is no great amount of time left for doing this work. It will take time to see that each lot, each block and each section is cleaned up. Each man assigned a work must feel a personal responsibility in doing it or seeing that it is done. We can't afford to half-way do this thing.

Blue ribbons will be awarded to the cleanest house in each individual section supervised by each man. Another blue ribbon will be given to the man that has the cleanest group of assigned blocks in each major section and the club that has the cleanest section will be awarded a third blue ribbon. The value of these ribbons are not so much that they will stand for a lot.

Tomorrow the names of each man in charge of the different blocks will be given and you can find who is in charge of your part of town and if he lays down on the job get after him. When he shows up in your part of town co-operate with him. Watch for assignments tomorrow and let's all get ready for the big drive Friday afternoon and then keep driving until the work is done.

## AT THE TOURIST PARK

The following were registered at the tourist park today:

M. Horton, Midlands, Texas; J. Knox, Trinidad, Colo.; Guy Snow, California; Boston Bull, San Antonio, Texas; J. H. Burt, Hawley, Texas; R. T. Milton, Gray, Oklahoma; Mr. and Mrs. C. J. Cobb, Mexico, Texas; Willie Holmes, Teague, Texas; M. L. Stone, Brownwood, Texas.

## STUDEMAN ELECTED PRES. CITIZENS NATIONAL BANK

(Continued from Page One)

In South Texas, in order to carry out his future plans.

The election of Mr. Studeman as president becomes effective on August 1st. He is at present active vice president of several South Texas banks in which capacity he has been connected with them for a number of years.

This group of successful business men intend to cast their lot with us, and the local stockholders of the Citizens National Bank realize that this group will strengthen the bank very materially.

The majority of them have had large land holdings in Lynn county, Texas, for many years which section they are rapidly settling with substantial farmers, clearly indicating that from the progress and development there they fully realize that Lubbock county has in store for its citizenship wonderful possibilities in the not far distant future.

## PUT AUTOMOBILES IN POUND IN SAN ANTONIO

(Continued from Page One)

SAN ANTONIO, Texas, July 11.—(United Press.) The automobile impounding system, recently instituted here by which automobiles found in violation of traffic ordinances are towed to a city pound and held for the owners, is proving a success, according to city commissioners.

One hundred and seventy-three cars were impounded during the

first eleven days of the system and the commissioners assert that a marked improvement has been shown in traffic conditions. Owners of cars which have been impounded are required to pay a fee of \$2.00.

While several threats of test cases have been made by irate auto owners, no one has taken to the courts as yet.

It has been estimated that the cost of maintaining the impounding system will run about \$500 or \$600 a month.

## New Train Service To Ranger Will Likely Be Made

RANGER, Texas, July 11.—Provided the chambers of commerce at Ranger, Eastland and Breckenridge will offer no opposition if the line removes a new passenger train if it is installed, in case traffic does not justify after being tried out, the Wichita Falls, Ranger & Fort Worth railroad will inaugurate the new service in the near future, according to J. W. Mitchell, receiver of the road, of Fort Worth. Ranger has already agreed to the line's proposition. A new schedule to be applied would call for the first train to leave Ranger at 5:40 a. m. for Breckenridge, arriving there at 7:05 a. m. It would leave Breckenridge at 7:40 a. m., arrive at Ranger at 9:05 a. m., and at Dallas at 10:50 a. m. Returning it would depart from Dallas at 1:05 p. m., arrive at Ranger at 2:53 p. m., and Breckenridge at 4:15 p. m. This train would leave Breckenridge at 4:50 p. m., arriving at Ranger, the terminus, at 6:15 p. m. It is believed the new service will result in much increased passenger traffic for the line.

## ONE-THIRD OF CHICAGO WORKERS IN FACTORIES

(Continued from Page One)

CHICAGO, July 11.—A third of Chicago's working population, more than 10 years old, is employed in factories, according to the recent report of the United States census bureau. The total is 489,001 out of 1,281,434 working people.

The city has 210,537 clerks as its second largest working class. Trades are third with 206,975 and domestic and personal service fourth with 116,102.

Of 233,490 white women of native parentage, 74,603 are employed in the city. The largest percentage of employment among women goes to the negroes, while contrary to belief the lowest percentage is among foreignborn women.

Use of child labor was found to be slight.

## TEXAS PROGRESS NOTES

(Continued from Page One)

College Station. One thousand boys and girls from the farm clubs of Texas will be designated to attend the farmers short course at Agricultural and Mechanical College this month. Competition is under way in more than 100 counties for this honor.

## PLEA MADE FOR CHILDREN BY COMMITTEE

(Continued from Page One)

ATLANTA, Ga., July 11.—"Think less of battleships and more of battleships" was the plea advanced by the social and community welfare committee, in their annual report to the National Convention of the Elk lodge, which is now in session.

The report pointed out that more than two hundred thousand children die in America annually, from ignorance and neglect, and that the cost of a single battleship would save the lives of thousands who perish yearly throughout the country from causes that are entirely of a preventable nature.

It is also urged in the report that a campaign of Americanism against

the forces who are plotting against the government be opened and carried on.

## UNITARIANS INSTITUTE

(Continued from Page One)

BOSTON, Mass., July 11.—Donald Macdougall of All Saints and E. M. Jenks of the West Side Church have been selected by the Unitarian Laymen's League to attend the third annual institute for religious education arranged by the league at the Isles of Shoals, ten miles off the coast of Portsmouth, N. H.

Beginning on July 28 and continuing until August 11, this institute will endeavor to train and inspire a new group of Unitarian laymen to take up an active part in the direction of the schools of religion in their churches. The faculty will be headed by Dr. Theodore G. Soares of the University of Chicago, dean of the department of practical theology.

## STILL CAPTURED NEAR ROBY BEFORE BEING INSTALLED

(Continued from Page One)

ROTAN, July 11.—Officers captured four men south of Roby a few days ago with a still that had been received at Sweetwater and was being taken to some of the secluded spots in this territory. One of the men proved innocent, another escaped and the other two were taken into custody.

Don't worry too much. Heat waves seem to be permanent waves that soon give farwell waves.

## REVIEW OF ELECTRICITY SHOWS RAPID GROWTH

(Continued from Page One)

DALLAS, July 11.—Calculations just made by the General Electric Company reveal the vast usage and improvements in the manufacture of electricity as compared with its status twenty years ago. This is best illustrated by the following interesting facts:

When the first large Curtis steam turbine-generator was built in 1905, there were those who alluded to it as a "piece of folly." Today steam turbine generators ten times as large are being constructed.

In the gas-filled Mazda lamp, the same amount of current which Edison used in his crude lamp now gives just 100 per cent more illumination.

Ten years ago, not a pound of artificial ice was made in Chicago. In 1921, 725,000 tons of ice were turned out in that city by electric power, and electricity did the grinding in making 8,000,000 gallons of ice cream.

In 1892 there were 1277 electric light and power companies in the United States. Today there are over 7,000 such companies with a total investment of more than five billion dollars.

## QUANAH—A NEW UNIT TO THE POWER PLANT

(Continued from Page One)

QUANAH.—A new unit to the power plant of the Quanah Light and Ice Company is to be installed next month. The company is building a transmission line to Orluston and will take on the contract for power for the U. S. Gypsum plants at Eldorado, Oklahoma.

## ABILENE—THE ROBY & NORTHERN RAILROAD BETWEEN ROBY AND NORTH ROBY, HAS BEEN ACQUIRED BY THE WEST TEXAS UTILITIES COMPANY AND WILL BE ELECTRIFIED. NEW EQUIPMENT HAS BEEN ORDERED.

(Continued from Page One)

Fort Worth.—The city council has ordered the construction of an ornamental lighting system for Misty and the Heights. The contract calls for over 7,000 such companies with a total investment of more than five billion dollars.
