## STATE OFFICIALS COMING

### Everything Ready For Big Celebration

#### GOV. NEFF TO BE THE PRINCIPAL SPEAKER TUES.

#### Board of Directors In Executive Session

#### LUBBOCK IS NOW PREPARED TO ENTERTAIN ALL

#### Thirty-Seven Thousand and Can Be Fed In Two Hours

Never in the history of West Texas have the people of one city undertaken a greater job than have the people of Lubbock in offering to entertain the people of Texas with a great party celebrating the Texas Tech College here, on Tuesday, August 28th.

The Program Committee, the rooms committee, the barbecue committee, in fact, all of them headed by men who understand their business and who are willing to work for their home town. These committees thus far have functioned with clock work regularity and in every undertaking have been successful.

Men have been working in all parts of the city completing preparations for the great celebration, and withal have only started into the real work that will be done throughout Tuesday.

Possibly there were never more complete plans made than will be executed upon the occasion of feeding the thirty thousand or more people who will be guests of Lubbock on this occasion; even the minutest details having been worked out with an exactness that characterizes the head of the committee that has charge of serving the food.

Col. Mullican has very kindly given us the following figures relative to the feeding of the thousands, which to say the least, are interesting, and we hope that the following outline of his plans may be made clear to our readers:

Tables have been prepared on the vacant lots between Avenue H and I and between 12th and 13th streets between which there are thirty-one alleys or schutes, thru which people can walk two abreast. These tables are forty feet long, and it is estimated that a person can walk thru this schute in two minutes, but allowing them four minutes, and allowing two feet of the length of the schute to each person, twenty people will walk into the schute and twenty people will walk out of the schute supplied with the articles of food, etc., every four minutes. At this rate, within sixty minutes, or one hour, three hundred people will pass through the schutes in each column, which multiplied by sixty-two, the total number of columns, is eighteen thousand, six hundred people that will be served each hour.

If there are a total of thirty seven thousand people to be served, it will require only two hours to feed them.

However, if only two minutes are required for each person to pass thru the schute, the crowd will be fed within only one hour, and it is the consensus of opinion that this will be done.

In order that all guests may know how, when and where, and what to do, and to keep moving, three men

#### ANTI-TRUST LAW VIOLATIONS BY GULF REFINING CO. ALLEGED

AUSTIN, Aug. 25.—Alleging that the Gulf Refining Company of Houston has combined to restrict the sale of gasoline and to prevent the pursuit of trade and commerce, an anti-trust suit was filed against the company by Attorney General Keel today.

The petition seeks to bar the company from entering into any agreement that will prevent filling stations from dealing in gasoline except that purchased from the Gulf company, and alleges that the company and filling stations has such agreement.

The petition also alleges that the company has been operating in violation of the anti-trust law, and asks a perpetual restraining order against such agreements.

If these allegations are found correct the company's charter will be forfeited and penalties fixed by law assessed, the legal department claims.

#### MAN WHIPPED BECAUSE HE MISTREATED HIS WIFE AND CHILD

HONEY ISLAND, Tex., Aug. 25.—Sheriff Nelson, of Hardin county, is enroute here to investigate the tar and feathering of Ernie Knapp, saw-mill worker, Thursday night. Knapp was taken from an automobile by unmasked men and after being tarred was thrown into the yard of the Apostolic church, where services were being conducted. A sheet was wrapped about him, according to deputy sheriff Williams, Knapp was tarred because he was alleged to have whipped his wife publicly and then mistreated his five-month-old baby.

Knapp is under the care of physicians, but his condition is not considered as being serious.

#### CHICAGO GIRL IS JAILED ON A CHARGE OF SPEEDING

CHICAGO, Aug. 25.—Miss Elizabeth Stark, twenty-one, is the first woman sentenced to jail for reckless driving of an automobile. She was sentenced to five days, and she will be put to washing policemen's shirts. When she was arrested she was driving forty miles an hour, and was in an intoxicated condition. She and companion had a jug of liquor and a bottle of wine in the car when arrested. Miss Stark was hysterical when she was sentenced to the Birdwell house of correction. She was stripped of jewels and fashionable clothes and given a plain prison dress. This sentence is in connection with a recent move by the police to jail all speeders in an effort to stop the large number of accidents caused by fast driving. Within the past twelve months four hundred and thirty deaths have resulted from reckless driving, in this city alone.

#### WHEAT FARMERS MUST TAKE THEIR LOSS—FED. FARM LOAN BOARD

WASHINGTON, Aug. 25.—The wheat farmers "must take their losses" like the corn farmers did last year, Robert A. Cooper, chairman of the Federal Farm Board declared after a conference with President Coolidge.

He expressed the belief that the talk of the farmers distress is seventy-five per cent psychological and twenty-five per cent real.

#### SAWYER CONTINUED AS PERSONAL PHYSICIAN OF THE PRESIDENT

WASHINGTON, Aug. 25.—Brigadier General Sawyer will continue as the personal physician of the President, it was announced at the White House today.

#### BARTON AND NEFF CONFER ON BOOTLEGGING PROBES

AUSTIN, Aug. 25.—Adjutant General Barton conferred with Governor Neff for more than four hours following his return from San Antonio where he had been investigating gambling and bootlegging activities.

He has refused to comment on the conference, and will return to San Antonio early next week to continue the probe.

#### OFFICIAL PROGRAM

TECH JUBILEE, LUBBOCK, AUGUST 28th

Morning, 10 O'Clock  
Hon. H. T. Kimbro, Presiding Invocation  
Rev. W. A. Bowen, Mayor Percy Spencer, Address of Welcome  
Hon. Lewis T. Carpenter, of Dallas, Address  
Hon. R. M. Chitwood, of Sweetwater, Address

Hon. H. T. Kimbro, Chairman  
Introduction of Governor, Judge E. L. Klett  
Address, Hon. Pat M. Neff, Governor  
Address, Hon. T. W. Davidson, Lieut. Governor  
Address, Hon. S. B. Cowell, Chairman Locating Board  
Address, Hon. Amon G. Carter, Chairman Board Directors

#### NEARLY 1,000 FAMILIES HOMELESS ACCOUNT FLOOD WATERS

EL PASO, Aug. 25.—Nearly a thousand families were driven from their homes in Juarez when the irrigation canal bank broke following one of the heaviest rains that has visited this section in five years. Two Mexicans were reported drowned. Water ran so deep in the streets that automobile and street car traffic was tied up for several hours.

Scores of adobe houses crumbled and caved in before the flood which receded quickly.

Mayor Corona of Juarez wired President Obregon, requesting that sixty thousand dollars relief fund be immediately dispatched to that city.

#### YOUNG LADY ON HUNGER STRIKE; HER LOVER IS JAILED

PARSONS, Kan., Aug. 25.—Juanita Richardson, is on a hunger strike because her lover with whom she attempted to elope was put in jail. The girl left home at Coffeyville with Lamont Ramirez and were traced to Parsons by her mother, Mrs. J. P. Richardson, before they could be married. Ramirez was arrested.

Miss Richardson said her daughter had refused to eat since the elopement was broken up last Tuesday, and stated that she might consent to the marriage in order to save the girl's life, or preserve her health, if Ramirez is released from jail. The police however, have up to this time refused to release him.

#### Important Notices Mullican Adjourned Concerning "Tech" District Court Until Celebration Tuesday Thursday, Aug. 30th

On Tuesday morning at between ten thirty and eleven o'clock we must have at least five hundred men who are willing to take orders and work for two or three hours.

This work is not hard or dirty, however, we will not have time to assign soft jobs as everyone must work at what there is to do and follow instructions if the work is done to the best interest of Lubbock.

American Legion members have been requested to come from fifteen South Plains towns, and the members of the Elks lodge of Lubbock have promised to turn out one hundred percent strong, but we had better have too many workmen than too few.

As this is Lubbock's party, we want every able bodied man here to report for duty at the back of the Army building at the hour named ready to work unless detailed to some other duty.

A suit of blue denim or overalls or a large white apron should be brought for their own use, also a large white cloth to be used in keeping the meat containers, etc., clean.

As soon as the people are all fed the helpers will be finally dismissed.

—Serving Committee.

#### Body of Child Found in River Marshes in Pennsylvania

PHILADELPHIA, Pa., Aug. 25.—The body of a girl answering the description of the three months old Lillian McKenzie, kidnapped in New York a week ago, was found in the river marshes. A note pinned to her dress read: "Please give baby a home." It is believed the child was left there several days ago, and had died of exposure. New York officials have been requested to send officers to identify the baby.

#### Body Not That of McKenzie Child

PHILADELPHIA, Aug. 25.—After a thorough examination of the body of an infant which was found in the marshes near here it was declared that it was not that of the missing Lillian McKenzie, for whom the police of New York have been searching since she was kidnapped from her perambulator in front of a down town shop while her mother was shopping.

#### LOOT WORTH A HUNDRED THOUSAND OBTAINED BY YEGGMEN

LOS ANGELES, Aug. 25.—Loot worth more than a hundred thousand dollars was obtained by yeggmen who blew two safes in the Bullman Building. Valuables including gold and silver jewelry, precious stones and cash, were included in the loot that they made away with. The safe owned by manufacturing jewelers was well filled with high priced jewelry.

#### ATLANTIC CITY, Aug. 25.—Leaders of anthracite miners refuse to commit themselves as to whether they would accept Governor Pinchot's invitation designed to bring about resumption of negotiations with the operators in an effort to arrive at some agreement with a view to avoiding suspension of operations. This statement was made by Phillip Murray, vice president of United Mine Workers, at the same time stating that the organization heads would "scan each invitation carefully before deciding what to do. On the other hand, A. B. Jessup, spokesman for the operators, declared today that they are eager to accept an invitation or any other move which would avert the threatened strike.

#### SIXTY-FIVE NEW AUTOS REGISTER IN DENTON IN JULY

DENTON, Aug. 24.—Sixty-five new automobiles were registered in Denton county during July. This total is the second highest for the year, May having set the record of recent years with total of sixty-eight.

#### SWEEP THE STREETS

Monday evening at 7 o'clock is the hour set when Mayor Spencer asks that everybody help in cleaning up the streets. Similar plans will be used as when the Locating Board were bound for Lubbock a few weeks ago, are anticipated by the Mayor. Every loyal citizen is expected to put on overalls and get his broom and shovel in action promptly at 7 o'clock Monday evening. However, donning overalls is a minor consideration. Seeing that our city is making its main object. Allegedly.

#### DALLAS AND FORT WORTH HOUSES CLOSED BY INJUNCTION

DALLAS, Aug. 25.—Injunction proceedings will be sought by federal authorities in an attempt to close at least fifteen establishments here due to alleged violation of the prohibition law, Arthur S. Reinhart, Assistant United States Attorney, announced today. One temporary injunction was granted today, and others will be sought in a few days. Mack Miles, a negro, proprietor of a cold drink stand, was enjoined from operating a stand, until the final hearing on the injunction is had. It is alleged that Miles is a repeated violator of the prohibition law. This injunction is the third petition that has been granted here closing places of business of this nature. The first two were made permanent.

Twelve injunctions have been granted in Fort Worth, under the same allegations, and quite a number in Wichita Falls.

#### OPERATORS AND MINERS ACCEPT PINCHOT'S INVITATION TO CONFER

ATLANTIC CITY, Aug. 25.—Miners and operators representatives have received and accepted Pinchot's invitation to attend a conference Monday.

President Lewis, of the miners' organization, said that the acceptance did not imply any change in the miners' position.

#### Business of the College to be Transacted

Every member of the locating board and the board of directors of the college will be present for the celebration on Tuesday, and will remain over Wednesday and possibly Thursday for the completion of much detailed business in connection with the Tech.

#### Camera Man Will Take Pictures of Crowd

The Pathe News Service will have a camera man here through the celebration to take a moving picture of the celebration that will be distributed throughout the United States. It is hard to estimate the value this picture will be to Lubbock, and the business men will co-operate with the camera man to help him make the views represent Lubbock in the best manner possible.

#### Towns Closed to Observe Tech Day

"Tech Day" will mean a holiday to more than twenty five towns in West Texas, as proclamations of the mayors have already been circulated, closing the town in observance of Tech Day and in order that the very largest delegations possible might be brought here for the Tech. Among the important business institutions of the country that will be still for the day as the employees come to Lubbock to celebrate, are the Postex Mills at Post City.

#### Leaders of Anthracite Miners Will Not Commit Themselves

ATLANTIC CITY, Aug. 25.—Leaders of anthracite miners refuse to commit themselves as to whether they would accept Governor Pinchot's invitation designed to bring about resumption of negotiations with the operators in an effort to arrive at some agreement with a view to avoiding suspension of operations. This statement was made by Phillip Murray, vice president of United Mine Workers, at the same time stating that the organization heads would "scan each invitation carefully before deciding what to do. On the other hand, A. B. Jessup, spokesman for the operators, declared today that they are eager to accept an invitation or any other move which would avert the threatened strike.

#### SWEEP THE STREETS

Monday evening at 7 o'clock is the hour set when Mayor Spencer asks that everybody help in cleaning up the streets. Similar plans will be used as when the Locating Board were bound for Lubbock a few weeks ago, are anticipated by the Mayor. Every loyal citizen is expected to put on overalls and get his broom and shovel in action promptly at 7 o'clock Monday evening. However, donning overalls is a minor consideration. Seeing that our city is making its main object. Allegedly.

#### WEATHER

North Carolina: Sunday warmer in extreme west portion.

South Carolina, Georgia: partly cloudy in north, probably showers in south portion.

Florida, extreme northwest: Partly cloudy Sunday, scattered thunder showers.

Alabama, Mississippi: Fair Sunday, moderate temperature.

Louisiana: Sunday generally fair, somewhat warmer in north and west portions, light to moderate variable winds on the coast.

Arkansas: Sunday fair.

Oklahoma: Sunday fair.

East Texas: Sunday generally fair, light to moderate easterly winds on the coast.

West Texas: Sunday generally fair except possibly showers in extreme west portion.

### The Blue Quail Should Be Protected

By N. R. MORGAN, Seminole, Texas.

The western half of Texas is the home of the beautiful Blue Quails, the flesh of which when properly cooked, is inferior to no other kind of meat. It is wonderful how these birds can live and flourish in regions seemingly bare of bird feed, and for miles of territory without surface water, but they are hardy, and are acclimated and adapted to the country, and when protected from heart-

less slaughter, are very prolific, and if not molested nor frightened, they will congregate at the farm and ranch houses and soon become as tame as domestic fowls, associate and sometimes roost with the chickens. They are gregarious, sometimes several coveys combining and being found in numbers of 100 or more. Like domestic fowls, they are great eaters and destroyers of insects, to

such an extent, that every farmer and ranchman and truck and fruit grower should encourage and protect them; in fact feed crops should be grown for them, and never should any person be permitted to shoot one of these birds. The pot hunter should never have been permitted to slaughter these birds, and now that Texas is becoming more and more a farming country and truck country, the slaughter of these beautiful and useful birds should be absolutely prevented and no open season ever again allowed. Already there is a demand for the introduction of these hardy insect de-

stroying birds into other states, and for that purpose, \$500 to a limited extent, provision should be made, but otherwise they should be protected. The Great South Plains of Texas is a favorite range for the Blue Quails and as it appears to be destined to be one of the great cotton producing territory, the Blue Quails should be protected and encouraged, so as to be ready to destroy all insects that depredate on all field, garden and orchard crops. If at any time these birds become too numerous the people who feed and protect them can easily reduce them by using them as food for the families. Game laws should be strictly enforced.

### KU KLUX KLAN OFFICIALS GLAD TO LEARN OF CAPTURE OF FLOGGERS

By the United Press. ATLANTA, Ga., Aug. 25.—"We are always glad to learn of the capture and punishment of floggers," declared high Ku Klux Klan officials here today when informed of the Tulsa, Oklahoma floggers conviction. "We would not turn a hand or spend a penny in the defense of Klansmen guilty of crime," one of them said. "In every case where the illegal deeds of Klansmen have

been brought to our attention we have turned over the men and evidence to authorities. Every Klansman takes an oath to obey all laws and to support authorities in law enforcement. When this oath is violated, immediate banishment from the organization follows." A rogues' gallery of insects is being organized by the American Nature Association in Washington. The pests are to be identified and information as to their migration gathered together with the best methods of opposing them. Such insects as the Hessian fly and the boll weevil will no doubt head the list of undesirable.

### Fashion Showing Of FALL FABRICS

The women who visit this display will see in almost every fabric the chance to transform some costume dream into a reality. Colors that are exquisite run the gamut from bottle green to a royal king's blue, and textures, some pile, some brocaded, some reps are just as lovely, just as rich in inspiration.

### BOTH SILKS AND WOOLENS

Fascinating Silks and Woolens have been arriving daily. Now there is a full array of these beautiful materials on display and this week will be given over to the exposition of the many different varieties.

Every woman, curious as she must be to see what the new season has in store is most welcome at this showing. She will enjoy it thoroughly and derive much interesting information therefrom.

### FASHION FACTS OF INTEREST TO WOMEN WHO SEW

Long lines are best for fall, new models show. Godets flounces and tiers often break their straightness but slimness remains never the less. Gauntlett Cuffs and high collars are evidence of great novelty in details.

### FALL FASHIONS FOR THE HOME

Putting on the home's fall dress may mean the hanging of new draperies, or the addition of new bead spreads and the like. The home has been amply cared for in our plans for fall and at this time we have on display the most attractive array of the new and the beautiful. Just what to do to make the home more attractive and how to do it can be answered after a visit to our store at this time.

### NEW NOVELTIES OF INTEREST

New novelties are here in a boundless array of weird and entirely different ideas. In the line of items to be worn there are many jewelry items as well as clever little ornaments. In the way of gift suggestions there is a vast array of the new in luncheon sets, dressed sets, dresser novelties and the like. All these are now ready for your inspection and purchase.

### NEW TRIMMINGS FAITHFULLY PORTRAY THE NEW STYLE IDEAS

New trimmings are most attractive. The many colors combined into attractive bandings and ornaments makes it easy to complete the effect you want for the new gown by simply sticking them here and there about it.

# Fall Fabric EXPOSITION

With a flourish of many delightful new costumes a new season takes the stage. The 1880 period in costume with a dash of Indo-Chinese influence give the mode its background and into this setting such details as sleevelessness, bustles, circular flares, lingerie touches and handsome embroideries fit perfectly.

### Straight and Smart Fall Wraps

The exception to the rule that straightness spells smartness for Fall Wraps is the circular flare which may show itself in a flounce, in rippling tiers that go just across the front or in a side godet.

\$19.85 to \$98.85

### Peplums Distinguish New Suits

Frequently the peplum ripples becomingly about the hips and is beautifully braided, are slim with a side fastening and fully knee length. Deep rich browns and blue predominate.

\$24.85 to \$74.85

### The New Diagonal Line In Smart Frocks

It extends from the right shoulder to the left hip where frequently a circular flounce is caught up with a decorative cabochon. Exquisite brocades and fancy velvets make elaborate trimming unnecessary although touches of moire are very effective.

\$19.85 to \$64.85

### An Advance Showing of FUR FASHIONS

Fur fashions that foretell the Winter mode compose the display, now being featured at this first showing of the new for fall. What women who know the becoming flattery of handsome furs will dare to miss this opportunity?

\$12.50 to \$98.85

### Whims of the Mode

Circular effect either in the shape of flounces, godets or tiers in apron effect strike the dominant note in the Fall silhouette. Even cuffs show a circular flare and these fashion features belong to coats as well as suits.

Lingerie collars and cuffs frequently in tiered effect impart a fresh crispness to many frocks that is typical of Fall styles.

Flat Backs in panel effect hanging perfectly straight from shoulder to hem distinguish many smart coats and emphasize the fashionableness of front trimming.

Glossy textures are chosen for frocks this Fall in preference to the dull finished crepes that have held sway so long. Satins and brocades interpret this trend.

### Whims of the Mode

Handbags that impart a finishing touch to the suit or street frock costumes are smartest when fluted and are frequently beaded.

Hosiery in shades to match her costume be it grey or brown will be the preference of the best-dressed woman.

Ribbons have a most prominent place in all the plans for fall. Ribbon for this, Ribbons for that, it would seem that there is no end to the use they are being put to. New arrivals in fancy numbers in all widths make it possible for you to make your choice at this time.

Materia in a wide array of all the most popular pieces is now ready. There is nothing that is so appreciated by the lady who enjoys pretty appointments as this elegant linen and the announcement that new lines are ready will be welcome.

VISIT OUR STORE ON AUGUST THE 28TH.

While you are in Lubbock for the Tech celebration, take occasion to visit our store and see the new goods on display. You will find our sales force very enthusiastic to show you all the new things.

## Hemphill-Price Co.

ALL TEXAS CELEBRATES IN LUBBOCK THE 28TH.

Of course you will be in Lubbock on the 28th. The celebration that day will be something worthwhile and an event you will not wish to miss. We are expecting you and will be disappointed if you are not here.

 Sunday School at 9:30, J. L. Dow, Superintendent. Lesson topic "Bar-nabas, the Great-Hearted."  
 Morning Worship at 11 o'clock. Sermon by Rev. C. N. N. Ferguson. No Young People's Open Forum. Epworth League at 7:30. Evening Service at 8:30. Sermon by the pastor.  
 The public is cordially invited to attend all these services.

### Methodist Meeting

Extensive preparatory work for a sweeping revival meeting beginning September 9, is being done by the members of the First Methodist Church, according to Rev. C. N. N. Ferguson, pastor, who returned this week from a six weeks' vacation to Mt. Sequoyah, Arkansas. The various phases of the meeting have been placed under the supervision of competent committees and the pastor is devoting his time to the integration of the work.

Plans for a week of simultaneous prayer, regular daily prayer, intercessory prayer are to be executed, he said. The personal evangelism committee will begin a religious survey of the community in a few days and amass as much information as possible. The committees on finance and ushering are well at work and the music is also to be a special feature of the meeting.

Rev. Kenneth Pope of Dallas will do the preaching during the meeting which begins the second Sunday in September.

Everything possible will be done to produce a really deep revival of religion in this city, Rev. Ferguson said, and a special effort will be made to line up the membership of the church into active participation in its work. The services are to be held in the church building at the corner of Broadway and Ave.

**Cumberland Presbyterian Church.**  
 Sunday School, 9:45 a. m.

 Ladies Aid Monday 3:00 p. m.  
 Prayer meeting Wednesday evening 8:15.

On the coming Thursday, same being the 30th day of August, the Amarillo Presbytery of the Cumberland Presbyterian Church of the Texas Synod will convene with the Lubbock congregation on Tenth Street and the indications are a splendid representation from all the congregations within the bounds of the Presbytery. The Presbytery will convene at 8:30 p. m. on above nam-

ed date and the opening sermon will be preached by Rev. H. H. Binkey, of Roby, Texas. The entire public is invited to attend all the services of the Presbytery including its business sessions which will continue thru Sunday, September 2nd. Looking for you in the sanctuary today and giving you that "good old West Texas Welcome" therefore you are expected.

Rev. J. Fred Baker, pastor of the Cumberland Presbyterian Church, returned to his home here Saturday after having spent several days conducting a revival service at a church ten miles north of Muleshoe, where a number of conversions were made and much interest shown in the meetings.

He will conduct the regular services at the church here today, and will appreciate large congregations. We want you to attend Sunday School somewhere today and welcome you to our church.

### Baptist

Regular services will be conducted at this church today, with the pastor in charge of preaching services. You are invited to worship with us.

### B. Y. P. U. Program

Missionary Meeting for Southern Baptist Institutions for Training Workers. Leader Beulah, Cleveland.

Introduction—By Leader. Baptist Believe in Being Trained—Alfred Smith.

The Southern Baptist Theological Seminary—Pauline Miller.

The Southwestern Baptist Theological Seminary—Mrs. McCrummen.

The Baptist Bible Institute at New Orleans—Maude Waldrop.

The Missionary Spirit in Our Training Institutions—Ara Bell Stahl.

Our College Supply Students to Our Seminaries—Inez Martin.

Special Music—Blanche Fann. Everybody is welcome to these programs. Young church members are especially invited. Remember the time 7:15 p. m.

**First Presbyterian Church.**  
 We offer you the opportunity of this church today to worship God and thus meet the needs of your better self. He that neglects his soul neglects all. Go to church today and give your soul the nourishment that it needs.

Our Sunday School begins at 9:45 and if you have not been attending Sunday School in the past we urge you to visit this one today. Every Sunday evidences new growth in the Sunday School and we believe you will enjoy an hour

thus spent. We have splendid classes for men and women.

At the morning hour of worship the pastor will preach on the subject, "The Sluggard." Lubbock has no time nor place for a sluggard today and certainly there is no place in any of our churches for one. Special music at this service.

Christian Endeavor meets at seven o'clock. The young people who attend this service will find it interesting and helpful. The contest is on in full swing.

Evening Worship at 8 o'clock. Subject, "The Angry Christ." Our evening services are brief and full of life and the Lord draws near to us. Come and worship with us tonight.

### Christian Science

The Christian Science services will be conducted at the Cotton Exchange room of the Kershner Building Sunday morning at 11 o'clock. The subject for discussion is "Mind."

You are urged to attend all of these meetings.

Reporter.

### THE ADVENTIST MEETINGS

The program at the Adventist camp is a full one. Beginning at 6 o'clock in the morning, services continue during most of the day. A vegetarian service, operated on the cafeteria plan, has been inaugurated at the dining tent, to which the campers resort for their meals. For the benefit of those in the camp and others, a large variety of books, tracts, bibles and periodicals are on display and for sale at the book department, which is in charge of George R. Sobel, the Secretary of the Conference.

At the conference sessions held yesterday, at which Pastor George A. La Grone, of Clovis, presided, delegates were seated, churches were received into the conference, and committees were appointed and their reports were received.

As the sun sank beneath the western horizon and its light faded, the Adventists assembled in the Auditorium to engage in a special service and welcome the approach of the Sabbath. Appropriate remarks for the occasion were made by Pastor M. R. Proctor, of El Paso, who was in charge of the service.

Evangelist M. B. Van Kirk, of Oklahoma City, having been delayed last night by train at Amarillo, Prof. W. E. Straw, of Koon, Texas, spoke in the Auditorium upon the subject announced, "The Plan of Salvation."

The speaker showed that man, at his creation, was given the power of choice, which necessarily involved the possibility of choosing the wrong, which would result in man's fall. To meet the needs of this possibility, should man sin, God pro-

vided the plan of salvation, which, by means of the exercise of faith in Christ, would make it possible to bring man back again into harmony with God and his spiritual law. This constitutes salvation of sin.

At 11 o'clock today, Evangelist M. B. Van Kirk having arrived early this morning, delivered a powerful discourse upon the subject of vital Godliness. At 3:00 p. m. Prof. A. W. Peterson, of Oklahoma City, who is in charge of the educational department and the young people's department of the Union Conference made a very interesting address upon the vital necessity of proper education and the care of our youth today. At 8:00 o'clock tonight, Prof. W. E. Straw will again speak upon the "Footprints of Bible Prophecy, and Whither the Tenth." A large attendance was present last night at the Auditorium to listen to his discourse on "The Plan of Salvation." The public is most cordially invited to all meetings.

### VOL. 1, No. 1 "THE SKYLINE" A SUL ROSS JOURNAL

ALPINE, Texas, Aug. 25.—Vol. 1, No. 1, of the Skyline, published by the student body of Sul Ross State Teachers' College at Alpine, made its initial bow to the public this week. The initial number of the school journal is very interesting, and is a credit to the Editor-in-Chief, Miss Ethel Clifford, and her staff of helpers, composed of Lela Mae Skinner, Literary Editor; Albert Phillips, Business Manager; and Rose Sharp Brewer, Faculty Advisor.

The new college newspaper will be published once each month by the students of Sul Ross State Teachers' College under the supervision of the English Department. The first edition contained in addition to college news, interesting descriptions of the scenery of the Big Bend Country and Alpine, with a splendid view of the Sul Ross College with Alpine and the Twin Sisters Mountains, resting in the background.

## DODGE BROTHERS ANNOUNCE IMPORTANT IMPROVEMENTS

Dodge Brothers have not simply brought out a complete new line of motor cars. They have done something infinitely wiser and better than that.

They have brought new beauty, new riding ease and new mechanical perfection to the product on which their reputation as builders has been founded.

They have built a better and a more desirable line of motor cars—yet basically and fundamentally the identity of their product remains the same.

The same sturdy engine is under the hood; the same dependable chassis, improved in numberless details, underlies the body.

But the rear springs—now underslung—have been materially lengthened. The wheelbase, too, is longer, and the combined result is a notable improvement in riding qualities.

Bodies of all types have been designed to give improved appearance, and greater comfort. Lower, longer, with deeper seats and more leg room, the lines of these new cars are low-slung and graceful—the interiors are comfortable and roomy.

New head lamps and fenders, especially designed by Dodge Brothers to conform with the general lines of the car—a long straight hood and cowl effect—longer and wider running boards—unusually wide doors—combination stop signal and tail lamp—and instruments attractively grouped on raised panel—are a few of the numerous body innovations common to all types.

Combining these features with important mechanical improvements too numerous and technical to enumerate here, it is not extravagant to predict a reception for these cars unprecedented in automotive annals.

Lubbock Daily Avalanche

Published Sunday morning and every Afternoon except Saturday by THE AVALANCHE PUB. CO. (Incorporated)

JAS. L. DOW, Editor Neal Douglass, Jr., City Editor J. E. Griffith, Adv. Mgr.

Entered at the Postoffice at Lubbock, Texas, for transmission thru the mails as second class matter.

NOTICE—It is not the intention of the Avalanche to cast reflection upon the character of anyone knowingly, and if through error we should, the management will appreciate having our attention called to same, and will gladly correct any erroneous statement made.

REFUSING TO BE DISCOURAGED

A man who is old in years but young in heart says that at the beginning of his career as a minister of the gospel he resolved never to exhibit the least sign of discouragement in respect to the progress of the kingdom of heaven here on earth.

Not only ministers but also all who believe in Christ, all who look forward to and work for the coming of his kingdom, would do well to follow the example of this eminent clergyman.

Results of kingdom effort are slow in coming, and we grow impatient and discouraged. But Paul tells us that in due season we shall reap if we faint not.

Then, too, the act that the kingdom of God is spiritual is apt to produce discouragement.

A teacher of a Sunday School class, for example, cannot measure results of her work as she would measure cloth with a yardstick.

The smallest of the local church organization is often a source of discouragement also. Few names are on the church roll compared with the population, and fewer still attend the services in the sanctuary.

It is true that the aint heart may find many things that tend to make it give up the fight. But God is seeking out those who, having put their hand to the plow, will not look back to return to the future of battle.

Lubbock won the Tech primarily because of her splendid commercial organizations, backed up by a united citizenship.

you determined to impose your own selfish ideas on every movement looking to that happy day?—Clarendon News.

LITTLE AVALANCHES

More harvest hands still wander. The tramp element should carefully avoid the rural districts.

The younger generation are urged to emulate the heroic deeds of the fathers, and they respond by knocking three baggers into the outfield.

The kids still maintain that the wet conditions of their hair is due to their antipathy to dirt.

According to the present laws, the trusts appear to be legal so long as they behave legally.

Equal treatment demanded for women teachers, spite the fact that they can't usually coach the ball teams.

EVERYTHING READY FOR BIG CELEBRATION

will be placed on arched platforms with megaphones to direct them. These men will be stationed there that they can keep a close watch on all sections of the serving tables, and will be of great assistance to all.

There will be soldiers from Battery C, 131st Field Artillery, on guard at every necessary post, not so much to maintain order, but to prevent congestion of streets.

At the noon hour after it has been announced that the tables are spread, the crowd will move toward the tables down Avenue I south to 13th street, thence east to 13th street to fill the space immediately south of the serving tables.

These streets are to be roped off to keep vehicles of any kind from being used thereon.

The corn, which will be donated by Terry county ready for eating, will be in two large cribs on the courthouse lawn where the people will help themselves.

Coffee will be made and served at large stands on the courthouse lawn. Coffee cannot be served at the serving tables because of the distance from the tables to the square, as it would be spilled and would also retard the progress of the crowd, thereby creating a congestion.

No one will be allowed to eat anything at the serving tables. It would take sixty thousand feet of table to allow thirty thousand people to stand and eat.

On each serving table there will be nine containers, containing many articles of food and utensils, in the following order: Plates, meat, chicken, bread, pickles, salad, onions, cups and spoons.

As the person enters the schute he will be handed a plate which he will hold out as he passes down the table and the various articles will be served him.

Should a plate be dropped the person is especially instructed not to attempt to recover it or to turn back, but must pass around thru again in the regular order, so every person is expected to "hold on to the plate."

There will be "boo koo" seconds, so that the people may pass thru the second or as many times as is necessary for them to be served everything they want.

Everything they want. There will be plates aplenty and food will be stacked high, therefore, if there be one who remains in Lubbock on the 28th without being well fed he has no one but himself to blame.

Col. Mullican pointed out that Lubbock will be much like the average host—she wants all her guests to be pleased with the food that will be offered them and to partake of as much of it as they desire, the more the better.

People do not conceive the magnitude of this undertaking, but will more readily understand the task if they witness it.

ing the food on the table replenished. For this purpose there will be detailed six men for each table, who will carry the food in tub containers, this number totaling one hundred and thirty-four men required for the outside work in serving the people.

In addition to this, H. W. Sims will require every expert meat cutter in the country inside the commissary building to slice the meat, also inside the commissary there will be Roger Q. Pierce and his bread slicers as well as a number of men who will be engaged in filling the various containers which are to be carried to the tables.

Men will also be detailed at the serving tables on the courthouse lawn around the "coffee corners." The meat will be cooked by Chris Harwell and Geo. Boles and their expert helpers, at the fair park and will be conveyed to the commissary in trucks by Joe Dick Slaughter and George Benson, assisted by their truck drivers.

All in all it will be a big job, but Lubbock has some big men, who are indeed capable of handling the situation in true Lubbock style, and our visitors will be very favorably impressed with the entertainment.

AUTOIST PINNED BENEATH WRECK FOR SEVERAL HOURS

By the United Press. RANGER, Aug. 25.—While Will Bull lay unconscious beneath his wrecked automobile for more than two hours, his little son lay asleep beside him and scores of motorists passed the scene of the wreck but failed to see the car which was hidden behind an embankment.

Bull finally regained consciousness, crawled from beneath the wreck and cried for help. Passing motorists took him to a hospital where it was found he was suffering from a broken leg and numerous injuries.

A defective steering gear caused the car to plunge over the embankment.

OUR ADVERTISING SOLICITOR SAYS

Intelligent men know that about seventy-five per cent of the information that finds an abiding place in the mind, enters through the eye; and the consequent value of courting the approval of that finely discriminating orb is obvious to the wise advertiser.

A boost like a smile helps much to make a friend.

Plow deep, while sluggards sleep and you will have corn to sell and keep, is just as true today as when uttered by Ben Franklin.

Say something! Tell 'em again, keep at it, and they will think of you at a time when it will do you

STEINNACH IS POOR, BUT CONTINUES EXPERIMENTS

BERLIN, Aug. 25. (United Press)—Penniless but undaunted, Prof. Steinnach, successful Ponce de Leon is working 14 to 18 hours daily under almost despairing conditions on his new rejuvenation researches.

Having sunk his crown, yet, too proud to ask aid, Steinnach is digging in, with only the aid of a poor student, hoping in a few months to startle the world by his results.

The student it was hinted to the United Press by Dr. Peter Schmidt, is responsible for supplying the Steinnach laboratory with dogs or other material for experimentation.

Guinea pigs are beyond Austrian or German medical pocketbooks these days.

So the student gets his dogs and cats well. Dr. Schmidt didn't make it just clear where. But, anyhow there are homeless cats and dogs enough if one hustles for them.

Steinnach, 55, active and enthusiastic, starts his day at 9 o'clock and works until late evening with only one meal in that time. He intends keeping on—somehow—if his faithful student friend is willing to stay along for the price of experience.

Steinnach, Schmidt hinted, will one day be Steinnachized as he wants to live long, be active, and he does not hesitate "trying his own medicine."

Sofar none of Steinnach's many successful rejuvenated patients have helped him with gifts. Only one gift has come—that was about \$500 from a delightful Japanese, who had been rejuvenated by the famous Steinnach disciple, Prof. Sakaki of Japan. The patient wanted to show his appreciation for the boon the Vienna professor had made possible.

AMATEUR ROWERS HAVE THRILLING EXPERIENCE

DALLAS, Aug. 25.—Amateur rowers had a thrilling time of it when a sudden squall struck White Rock Lake here. Several boats on the lake were unable to reach shore and the occupants had to weather the storm as best they could.

Two feet high raced across the lake.

A SERMONETTE

Man, friend o' mine, there is only today, don't mistake that. Yesterday was, tomorrow may not be; tomorrow today will be yesterday—yesterday, today was tomorrow. You can't recall yesterday and you can't anticipate tomorrow. Put hay in your barn but concern yourself chiefly with today. Live it; love it, embrace it; get the most there is out of it, and put the most you have into it. Regret nothing in the past, and fear nothing in the future. The worst that can happen to you is better than the best that has happened to some one else.

Shape your course today, friend o' mine, tomorrow is not yet born, and yesterday is under the roses.

MAN LOST IN MICHIGAN FOREST TRAVELED FIVE DAYS IN CIRCLE

ISHPEMING, Mich., Aug. 25.—After wandering for thirteen days in the woods, and fearing to use matches or cook food because of danger of forest fires, William McKinley, of Rockford, Illinois, was found by a searching party. He became lost while fishing and traveled day and night in a five mile circle, shooting for help.

The searchers heard his cries but because of the echoes could not locate him. Two trappers finally came upon the wanderer McKinley was half crazed and they had to threaten to shoot him to keep him from running away.

LITTLEFIELD GARAGE BLDG. FORMALLY OPENED FRIDAY

LITTLEFIELD, Aug. 25.—The modern brick building of the Littlefield Auto Co. has just been completed. The company was host to this entire community last night at the "opening" of the building. Music, dancing, games and refreshments were enjoyed by a large crowd.

PROTEST COOLIDGE ATTITUDE TOWARD WAR PRISONERS

WASHINGTON, Aug. 25.—President Coolidge has been receiving a deluge of letters from members of the American Legion throughout the country since the information has gone out that he stated that he would be as lenient as possible toward the political prisoners.

"I have been a fool all my life," said Tom Foley in court. They didn't get him for perjury.

Mr. Mitchell, a White Hall (Mich.) golfer, made a hole in one, July so is talking yet.

I OWN AND HAVE FOR SALE

160 acres very highly improved; 1-2 mile of good school, in Lubbock county. One of the best improved farms here at \$65.00 per acre, good terms. This is a real home.

320 acres 3 miles west of Monroe, 220 in cultivation, house, barn, well and windmill, 1 1-2 mile of brick school, one of the best farms in the county at only \$45 per acre, good terms.

260 acres, 220 acres in cultivation 2 miles east of Canyon school house, 8 miles of Lubbock, good house, well and windmill, 3 miles of Idalou, at \$80.00 per acre, good terms.

800 acres of the very best land in Crosby County, divided into 5 quarter sections, with from 100 to 150 acres in cultivation on each quarter, 1 mile of good gin and good school. This is the most unusual bargain to be had anywhere at \$35.00 per acre, will sell in quarters or in a whole, on good terms if desired.

Good house, 6 rooms and 1 3-4 acres on 19th Street, good location and lots of fine trees, an excellent home for one wanting lots of room.

# SPORT NEWS

## GASSERS WON LAST GAME THAT WAS SCHEDULED FOR THEIR FIELD BY DEFEATING HUBBERS 7 TO 1 SATURDAY

The Amarillo Gassers were victorious in the last scheduled game of the season to be played on the Amarillo field, they having defeated the Lubbock Hubbers in a 7 to 1 fracas Saturday afternoon.

While the locals found Woodruff for nine hits, they were scattered and so well was he supported by his teammates that they counted for little.

Snodgrass was especially loose in the fourth, giving up four hits, all of which were used for runs.

This was the sixth game of the nine game pennant series, and the Hubbers have only two of them to look back to with any degree of satisfaction, however, they will have the advantage of being on their home grounds for the remaining games of the series and are naturally expected to whip into better performances.

The game will be called at three o'clock this afternoon, and a record attendance is expected, as the Lubbock fans still have confidence in the ability of the Hubbers to hold their own to the very last game of the series.

Results of Saturday's game:

Amarillo Batteries: Woodruff and Shaw.  
 Runs 1 0 5 0 0 1 0 0 7  
 Hits 0 2 1 5 2 0 2 0 2 14  
 Errors 0 0 0 0 0 0 0 0 0 0

Lubbock Batteries: Snodgrass and Allen.  
 Runs 0 0 0 0 0 0 0 1 0 1  
 Hits 1 0 1 1 1 1 2 1 1 9  
 Errors 0 0 0 1 0 0 0 0 0 1

### LOVING CUPS FOR TENNIS TOURNAMENT ARRIVE

Two beautifully decorated and engraved cups are now on display at the Woods Jewelry Store. The cups are both triple plated silver, gold lined. The doubles cup measures 14 1/2 inches and has cover of three tennis rackets placed in triangle shape. The singles cup is 8 inches including base which is mahogany, making a very attractive cup.

Through the courtesy of Mr. Woods his store has been offered to all tennis players as headquarters. Any men desiring information or wishing to leave parcels will find his store the third door south of Post Office on the corner.

### Hubbers Lose to Gassers Fifth of Pennant Series Friday

AMARILLO, Aug. 25.—The fifth game of the series Friday afternoon at Gasser Park happened as a ball game should have for five innings and then the affair turned into a marathon with the locals enduring longer for a 15 to 6 win in a contest of sorry baseball, supported by a large crowd of fans who began to leave soon after the endurance hit began.

Burleson twirling for the locals did not allow a hit for the first four innings and only one man reached first base but in the fifth two singles and an error gave the Hubbers one run.

The visitors came back in the sixth with five hits, four singles, a double and one error on the Gassers' part and jumped to the front with the score standing six to two.

Four hits netted the locals a couple of runs in the second and business began to pick up again in the sixth when Lowrance and Shaw doubled getting one run across.

Two singles, one double and a home run by Shaw with the assistance of a walk scored 5 runs in the seventh. Not content with the slaughter in that inning the crowd batted around and had started well on the way again in the eighth when they were finally stopped after six hits, including two doubles and 33 many triples coupled with four errors had counted 7 men. Lubbock had called in Sanders for Swenson and later Brown came in from center to take Swenson's place and try to make the whole business appear a comedy.

The game for five innings couldn't have been better, after that it was poor sandlot playing, with players sulling on the job, several throwing the ball away and everything else that does not help baseball. The umpiring was bad.

Shaw was the hitting star for the locals getting two doubles and a homer in three times at the plate. Lowrance got a double, and two triples.

The teams play again this afternoon at 4 o'clock with Sport Woodruff working for the locals. No announcement has been made as to who will work for Lubbock. Morgan may be sent to stop the Gassing Gassers or Swenson might be sent back to the game.

If all of the game Friday could

## American Women Tennis Stars Prove Their True Worth

NEW YORK, Aug. 24. (United Press). America's male stars have had an unbroken reign of supremacy on the world's tennis courts for the past three or four years. The few court classics that have not fallen into American hands failed to do so in those isolated cases because no Americans set out to win them, as was the case with the Wimbledon championships last year.

Foreign nations, England particularly, found some consolation in their position by making the point that while the American men were vastly superior to the best any other country could offer against them, the American women stars were superior in almost the same degree.

The inability of Mrs. Molla Mallory, the American champion, to do much on European courts, and the failure of the few other American girls who set out from time to time after international honors, gave the impression in the country also that "our girls" had much to learn to establish the prestige for American women's tennis that has been earned in the male competition.

The class of American women stars was judged by Mrs. Mallory's dominance over all her rivals in this country has been so long and so pronounced that perhaps it was only logical that Europeans should figure that the whole class she represented was inferior when she showed herself a poor standard bearer on the foreign courts.

Admitting that critics were right in their judgment of the playing ability of the American girls, it follows, from recent examples that the figures will have to be juggled around and some new deductions made that the fair Americans are doing better, if they have not been underestimated in the past.

Adequate tests of all-around playing ability were provided in the recent international matches between the American and British teams for the Wightman trophy. The American girls won the cup, the first time it has been played for, by a score of 7 to 0.

The superiority of the American team was so pronounced that the British team was able to run only two matches into three sets.

It is only fair to admit that the British women might have had causes for not playing their best game. They lacked the time to

## Frank Norfleet and Other Special Officers Will Keep Tab on Crooks During Tech Celebration Tuesday

Mayor Percy Spencer announced Saturday that due to the fact that there is already a noticeable influx of suspicious characters, who are looked upon as thieves and thugs grasping the opportunity to ply their trades in Lubbock during the Texas Tech celebration, he has made arrangements to have the city well policed throughout the celebration.

Special officers from Fort Worth and Dallas have been secured, and Frank Norfleet, famous man-hunter whose operations in this connection have started the entire civilized world, and which were recently climaxed when he roused up a huge delegation of swindlers at Denver, Colorado, has been invited to be a member of the police force throughout the day and night, and has announced his intentions of being here.

Norfleet is one of the shrewdest detectives in the country, and has more than once faced death in pursuing criminals.

Though it is believed that the situation will not be at all easy to cope with, Mayor Spencer is of the opinion that these officers will keep criminality in Lubbock down to the minimum, which is of course very greatly desired.

## AMERICANS GOLF IN MEXICO

MEXICO CITY, Mexico (United Press).—The Chapultepec Heights Country Club, of which many citizens of the United States are members, has opened its new golf course. Nelson O. Rhodes, an American, is president of the club.

## LOUISIANA DOCTOR WILL MAKE HOME IN LUBBOCK

The Avalanche is in receipt of information from R. H. Guldge, M. D., of Greenwood, La., stating that he intends to move to Lubbock in the near future and pitch his tent in the shadow of the Texas Technological College.

The Louisiana physician frankly admitted that he would enter some other business after reaching Lubbock, expressing the opinion that "Doctors are not in demand in the healthful climate of the South Plains."

## HARLEY SADLER'S CO. TO PRESENT EXCELLENT PLAYS

Monday and Tuesday nights, Harley Sadler's excellent company will present for the first time in Lubbock the beautiful pastoral play "Honest Sinners and Saintly Hypocrites." This play has caused more comment than any play ever given by any company in the State of Texas. Mr. Sadler is paying a large royalty for permission to use it, but as usual, is giving his patrons of West Texas, the very best obtainable in the way of clean, wholesome plays.

## get themselves thoroughly acclimated and they were playing for the first time under strange conditions and surroundings, under strange weather conditions and on strange courts.

American girls who have been going to Europe year after year, did not have the same handicap and they were all more or less familiar with European courts and rather accustomed to training for the weather conditions on the other side.

In good sportsmanship, the Britishers did not complain, and E. Wallis Myers, foremost of the British critics, who accompanied the team to America, went so far as to say that the English players played as good as they ever did and as well as they could, but the Americans played better than he had ever seen them before.

The first meeting between England and the United States for the Wightman Cup, no doubt, is the beginning of another big epoch in international tennis, as it certainly has established a competition for women players that promises to become as interesting and as internationally recognized as the Davis Cup contests in the men's class.

The Davis Cup, now one of the world's greatest sport trophies, started on the same small scale, with only England and the United States competing. This year there were seventeen challengers, who aspired to play the American team for the cup.

Plans for the future Wightman competitions, of course, are rather indefinite, but it is proposed to make the contests alternate each year, between England and the United States, until other nations become interested, when new plans will have to be decided upon.

The Waker Golf Cup, which alternates its play between the two countries, has proved very successful because it does not impose the heavy financial burden of sending a team, year after year, to the up-holding country.

Visionaries, who have seen the Davis Cup grow, think that it will not be so many years until the Davis Cup and the Wightman Cup will be contested for in the same tournament, if the same nation should hold both cups. For several years some nations, especially France, were considering the appointment of a woman star on the Davis Cup Team, but when the Wightman trophy becomes thoroughly established and recognized as a world's championship trophy that will not be necessary.

## DO YOU KNOW?

Q. Are the high salaries, alleged to be paid to major league ball players, press agent stuff?

A. Some of the big league baseball players do make fine salaries, but most of them are paid much less than the club owners allow it to be believed.

Q. What are the referees and the judges at boxing bouts in New York paid?

A. In most cases the referee gets

## Eastern Star School of Instruction Held at Spur.

Beginning Wednesday and lasting through Thursday a school of instruction of District Number Two of the Eastern Star was held at Spur.

Mrs. Mattie Adell Sedits, Worthy Grand Matron was present and delivered a splendid address and took a prominent part in the meeting.

Mrs. Effie L. Houghton, member of the Grand Examining Board, conducted the examinations.

Members of the Lubbock lodge attending the school were: Mrs. I. P. Holland, Worthy Matron; Mrs. L. P. Mulligan, Conductress; Mrs. O. R. Collier, Associate Conductress; P. R. Jackson, Worthy Patron and Mrs. W. W. Royalty, Secretary.

## Mrs. W. J. Spikes Receives Friday Needle Club.

The Friday Needle Club met with Mrs. W. J. Spikes at her home, 1011 Nineteenth street.

A delightful hour was spent in needle work and conversation after which delicious sherbet and cake was served to the following: Mesdames Nellie Bryan, L. M. Brooks, Louis Murphy, Ed. Alexander, John Denman, M. K. Foster, W. C. Bryan, F. K. Mitchell, J. B. Pryor, F. V. Barclay, Ed. Twitty, Miss Kirby and the hostess.

## Honoring Miss Louise Triplett of Fort Worth.

One of the most delightful social events of the week was that of the party given Wednesday evening, with Mrs. T. W. Thomas hostess at her home, 1508 Avenue N, in compliment to her house guest, Miss Louise Triplett of Fort Worth.

## Mrs. N. F. Faulk Entertains Friday Morning at her home.

Mrs. N. F. Faulk entertained Friday morning at her home, 1702 Broadway with a delightful bridge party in honor of her sister-in-law, Mrs. J. C. Royalty.

The house was attractively decorated with cut flowers and fern. In the games high score prize was awarded Mrs. Clark M. Mullican and Mrs. Royalty was presented with a lovely favor.

A dainty two course luncheon was served to the following ladies: Mesdames J. C. Royalty, O. L. Slaton, W. O. Stevens, C. G. Castleberry, Ernest Conley, Sam Denman, W. D. Benson, J. R. Gorman, F. N. Payne, Paul Barrier, M. Jarvis, Temple E. B. Sam Arnet, W. B. Powell, H. B. Hutchinson, W. E. Bledsoe, Perkins, W. L. Baugh, Clark M. Mullican and the hostess.

## Dance Given at Country Club.

Messrs. Bil Stevens and Herbert Lowery delightfully entertained Thursday evening at the Country Club.

Fruit punch was served through the evening spent in dancing, to splendid music furnished by the Terror Jazzers Orchestra, composed of Dr. Harry Bloom, Bill Stevens, Herbert Lowery, Jimmie Lindsey and Luther Smith.

## A Prairie Rose Will Be Presented August 30th.

Below is the synopsis and characters given for the play "A Prairie Rose" which will be presented at the Lindsey Theatre Thursday evening, August 30th, by the Pep Glee Club.

The play will be well directed and promises to be one of the best plays ever presented in Lubbock.

## Ladies Chorus Will Meet Thursday.

The Ladies Chorus of the Ladies Missionary Society of the Methodist church will meet at the home of Mrs. W. O. Stevens at 9:30 o'clock Thursday morning.

## Ladies Auxiliary Will Meet Monday.

The circles of the Ladies' Auxiliary of the First Presbyterian Church will meet at four o'clock at the following places: Circle No. One will meet with Mrs. L. C. Ellis, 1625 Main street; Circle No. Two will meet with Mrs. W. R. Spencer, 1632 Broadway; and Circle No. Three will meet with Mrs. George W. Briggs, 1815 Fourteenth street.

## Personal.

Mr. and Mrs. C. W. Smith and son, C. W., Jr., of Amarillo, are guests at the home of Mr. Smith's sister Mrs. R. W. Heim, 1517 Nineteenth St.

Misses Blanche Bacon and Francis Conley are spending the week end in Snyder as guests of Miss Lois Sears.

Mrs. A. M. Eubanks returned Thursday from Canyon, where she has been attending the summer term of West Texas State Normal.

Miss Glenna Fay Grant, who has been the guest of Miss Willette Waters, returned to her home at Ralls Saturday.

Mrs. Mary Stell, who has been attending the summer term at West Texas State Normal, is here visiting her daughter, Mrs. A. H. Justice at 1116 Fourteenth street and sister, Mrs. J. E. Henderson, of 1712 Fourteenth street.

Mr. and Mrs. T. B. Williamson have as their guests, Mr. and Mrs. W. R. Tomlinson and daughters, Idella and Mary Elizabeth, Mrs. Gladys Lane, Mr. and Mrs. G. T. Tomlinson and baby of Cisco, Bob White and daughter Della of Abilene and Mrs. Gettis Resley of Houston. They will remain for the "Tech" celebration.

Miss Mary Meador returned to her home the first of the week from Chicago, Ill., where she has been spending the summer with her sister.

Miss Ruth McClelland of San Bernardino, California, is here as the guest of Dr. and Mrs. O. F. Peeler.

## WOMEN'S WON FIGHT ON ASPHALT PLANT.

PITTSBURGH, Aug. 25. Most cities are accustomed to offering bonuses and other inducements for factories and the like, but not so with McKeesport, a hustling community near here.

McKeesport has just won a long fight, mainly carried on by women, to rid the city of an asphalt plant, which the women claimed blackened their homes, spoiled washings, curtains and carpets and was likely to kill the babies. The women living in the neighborhood of the asphalt plant appeared before the McKeesport city council and angrily demanded action, holding in their arms blackened pieces of their babies and soiled pieces of washing and household goods.

The city council said "Wait" but the women refused to wait and that night tore in a gas line running into the asphalt plant. The plant got its gas some other way and continued to pour clouds of evil-smelling smoke over the city.

Then the city of McKeesport obtained an injunction but the plant continued making asphalt, because the president of the company could not be found. The city sued and continued. Finally the president of the asphalt company got tired eluding detectives and entered into an agreement whereby the plant is to be moved to a distance some miles from the city's homes. To make sure, however, the city of McKeesport at the insistence of the women placed a guard at the plant and demanded a bond of \$2,000.

## How to Get the Best Out of Your Clothes.

NEW YORK, Aug. 25. "A stitch in time saves nine."

But there are other things besides stitches which save one's wardrobe.

Stockings are perhaps one of the most expensive luxuries today, as they are both costly and perishable. By buying two pairs exactly alike at a time one will really have the benefit of three pairs of stockings, as one stocking of a pair always gives out before the other one does and with two odd ones you have another pair. If you do not believe this look in your stocking bag and see how many odd stockings you have there. Suppose some of these odd ones matched. When the first little hole appears in the stocking, moiden it until you get an opportunity to mend it as the moisture will prevent further ripping of the thread.

Felt hats have become the all-round season hats. Instead of buying a satin hat for the season between summer and fall, purchase one of the adorable little felts which can be used again next spring and will act as a sports hat all year round. Felt shapes are always good as they clean easily and can be used for almost any occasion. This year we see them at the smart resorts with the afternoon and dinner gown, as well as with the sport outfit.

Nearly every woman wears silk underwear these days. Tintex or coloring of some sort is essential towards keeping these silks in tone, as they fade after several washings. Try saving the Tintex wrenching water from week to week by placing it in a large bottle. One can make a box of Tintex go twice as far this way. Often a drop or two of red ink added to the wrenching water will add enough color to brighten the faded pink garment.

So many people wear down the heels of shoes before the rest of the shoe gives out. Watch for the first sign of wearing and have new leather heel tabs put on by the cobbler before the heel permanently turns. Nothing is uglier or more uncomfortable than a shoe with a crooked heel. By keeping the heels straight the shoe wears a great deal longer.

Buying two pairs of corsets at one time and wearing them on alternate days prolongs the life of each corset, by holding its shape. Always smooth the corset out after wearing, and roll it up as this also helps keep it in shape. Never wear a corset until it becomes discolored by perspiration as perspiration rots the material. Either send it to the cleaner or wash it with Ivory soap

## Fair Sex Going Back To Grandmother's Day For the New Styles.

By HEDDA HOYT  
Fashion Editor of the United Press  
Written for the United Press  
NEW YORK, N. Y., Aug. 25.  
(United-Press).—Styles never stay put in Paris. "As you wear" has no meaning in the fashion world, but "as you wear" has sufficient meaning indeed.

The attempted return to the early Victorian styles comes as a complete surprise to womenkind. Mannequins of the big gown houses of Paris are parading at the races and on the boulevards of Longchamp in wide crinolined taffeta and organdy gowns with tight-fitting bodices and tiny puffed sleeves. They wear old-fashioned poke bonnets, trimmed in lace and ruching and they carry small lace parasols. It is as if the ghosts of our grandmothers tripped among us.

Instead of bobbed hair, corkscrew curls peek from under their bonnets and bob about pretty fresh cheeks. Longer curls dangle over the shoulders. Shoulder shawls of lace and net worn over slender bodies tie in the fashion in front. Mittens of sheer lace recall the helles of other days, as do patent pumps with white silk stockings.

Whether the crinolined gown will really become a set fashion or not is difficult to say. If the Parisians have their way it will, have a fixed place in the fashion world this coming season. The slender silhouette has been so popular, popular that it has become a fixture and for all probability hold its own for some time.

Felt shapes are always good as they clean easily and can be used for almost any occasion. This year we see them at the smart resorts with the afternoon and dinner gown, as well as with the sport outfit.

Nearly every woman wears silk underwear these days. Tintex or coloring of some sort is essential towards keeping these silks in tone, as they fade after several washings. Try saving the Tintex wrenching water from week to week by placing it in a large bottle. One can make a box of Tintex go twice as far this way. Often a drop or two of red ink added to the wrenching water will add enough color to brighten the faded pink garment.

So many people wear down the heels of shoes before the rest of the shoe gives out. Watch for the first sign of wearing and have new leather heel tabs put on by the cobbler before the heel permanently turns. Nothing is uglier or more uncomfortable than a shoe with a crooked heel. By keeping the heels straight the shoe wears a great deal longer.

Buying two pairs of corsets at one time and wearing them on alternate days prolongs the life of each corset, by holding its shape. Always smooth the corset out after wearing, and roll it up as this also helps keep it in shape. Never wear a corset until it becomes discolored by perspiration as perspiration rots the material. Either send it to the cleaner or wash it with Ivory soap

## How to Get the Best Out of Your Clothes.

NEW YORK, Aug. 25. "A stitch in time saves nine."

But there are other things besides stitches which save one's wardrobe.

Stockings are perhaps one of the most expensive luxuries today, as they are both costly and perishable. By buying two pairs exactly alike at a time one will really have the benefit of three pairs of stockings, as one stocking of a pair always gives out before the other one does and with two odd ones you have another pair. If you do not believe this look in your stocking bag and see how many odd stockings you have there. Suppose some of these odd ones matched. When the first little hole appears in the stocking, moiden it until you get an opportunity to mend it as the moisture will prevent further ripping of the thread.

Felt hats have become the all-round season hats. Instead of buying a satin hat for the season between summer and fall, purchase one of the adorable little felts which can be used again next spring and will act as a sports hat all year round. Felt shapes are always good as they clean easily and can be used for almost any occasion. This year we see them at the smart resorts with the afternoon and dinner gown, as well as with the sport outfit.

ORDNANCE NO. 227

An ordinance, submitting to the voters of this city at an election to be held on the 30th day of August, 1923, whereby the qualified voters of this city may determine if Section 1 of Article 7 of the Charter of said City may be amended as to permit the levy of 2 1/2 percent in one year of the taxable value of property subject to taxation, naming the officers to hold said election and providing for the same and declaring an emergency on account of insufficient revenues to properly care for the needs of the city.

Be it ordained by the City Council (Commission) of the City of Lubbock, Texas, that an election in this city be held at the office of the City Secretary in said city on the 30th day of August, 1923, at which the duly qualified voters may determine if Section 1 of Article 7 of the City Charter, adopted by vote, December

27, 1917, shall hereafter read as follows:

"Section 1. Said city shall, in addition, be authorized to levy and collect such taxes as may be required for the payment of interest and creation of sinking fund on any bonded indebtedness, existing or created by said City under the law of this Charter, provided that the total of all taxes levied for any one year shall not exceed 1 1/2 percent of the taxable value of property subject to taxation in this city."

Section 2. The following persons are hereby appointed judges of said election: R. T. Penney, R. Q. Pierce and R. B. Smith.

Section 3. Certified copies by Mayor and City Secretary published thirty days before said election shall be deemed sufficient notice thereof, and the City Secretary shall mail to each qualified voter as shown by his rolls on January 31, 1923, a copy of Section 1, Article 7, as proposed to be amended.

Section 4. The form of the ballots shall be, "Shall Section 1, Article 7, be amended as proposed? YES, NO." Section 5. The fact that this City is solely in need of street improvements and other benefits and that same cannot be obtained on the present tax limit, creates an emergency and public necessity that the rule of the Charter requiring an ordinance to be read at two special meetings, by and with its, hereby suspended and this ordinance put on its final passage at the meeting of its introduction and it is so enacted.

Passed by unanimous vote and approved this 26th day of July, 1923. PERCY SPENCER, Mayor. J. R. GERMANY, City Secretary.

## THE GOLDEN YEARS

By Edith Lochridge Reid

A young mother stood on the porch and watched her little son trudge off to school for the first time alone. Her face was pensive and the yearning of the mother heart was almost translated into tears as she turned to a neighbor and said, "I feel almost as if I'd lost him, five years seem a short time to have him to myself."

The neighbor, older in wisdom and experience, smiled encouragingly, and replied, "A short time, perhaps, but a golden time, full of loving training, rich in home influence every day of which has a preparation for this little journey on which he has just started."

"Well, I hope I've succeeded in giving him the right things to take with him," observed the young mother seriously, "but it's a big responsibility to take a child through those golden years, isn't it?"

"The biggest responsibility, my dear," agreed the neighborly advisor, and then added, "but I'll whisper a secret—the rewards of this duty well done are the sweetest and most satisfying in the world."

Yes, the Golden Years are the sweetest and fullest of opportunity. Let's enjoy them, and live happily, normal, everyday lives with our children. We can never tell them how to act, that is a fitting method of training, but we can show them how we meet difficulties and problems and disappointments with fortitude and a smile, and then, most important of all, allow them to meet their own trials alone in their own way. Not to protect from the world but to prepare for life in the world is our duty as mothers during the Golden Years.

Some mothers out of their tender love, err in giving too much supervision in early childhood. If we see an aggressive playmate, taking more than his share of toys in the yard, our first impulse is to help our child to maintain his rights, but unless the encounter threatens to grow beyond his strength, it is much wiser to let tiny son fight his own battle. He must do it some time, and the older he is the harder it will be to start.

Self-reliance is an absolutely necessary asset to success in life, and the child that goes out equipped to make his own decisions and look after his own personal interests without too much assistance, will have fewer griefs and hard knocks. In those first five years, our child gets his ideals for life's conduct. He may never have heard the Ten Commandments or the Golden Rule, but he has seen them acted, if he is in the right kind of a home. He isn't on the fence in regard to right and wrong. He has learned by seeing mother handle situations that a thing is either right or wrong, but that there is no neutral ground.

So while we all may have ideals of conduct for our children in after years, the possibilities for attainment during early childhood are manifest and measured by their response to temptations in the home environment.

## OIL DEVELOPMENTS TAKE ON NEW LIFE IN BREWSTER

ALPINE, Texas, Aug. 25.—Col. F. E. Forrester, who is here for the summer from the Imperial Valley of California, was in Alpine this week from his well on the Kokernot Ranch, thirty miles south of here, and reports that they are drilling thru the cap rock, and expect to bring in a real oil well when they have drilled thru this hard formation, which he thinks will be within the next ten or fifteen days.

The Nigger Creek well which resumed drilling about three weeks ago, after having been abandoned two years ago, has encountered a large quantity of gas, oil and water, which gushed forth when the bailer was removed this week. This well is now drilling around 2500 feet, and is known as the Old Gate No. 1, seven miles south of Hamon. Indications are splendid for a commercial producer, and those in charge are very optimistic regarding their chances of bringing in a good well.

Mr. Doddridge, manager of the Portland Oil Syndicate's operations in Brewster county, has just returned from Portland, Oregon; the headquarters of the syndicate, and announces that he has his land and leases in good shape, and expects to resume drilling as soon as casing arrives.

The Uncle Sam Oil Company remains at a standstill.

## Good Program Reported for Farm Bureau Meeting Sept. 1

Making membership in the Lubbock County farm Bureau more than a financial gain is the intention of the board of directors, and the quarterly programs that are given have gone a long way thus far in accomplishing this aim.

As can be seen from the following program, these meetings can be made very beneficial to the farmers as well as entertaining and the secretary, Joseph W. Jennings is to be congratulated upon the arrangement as made for the meeting of Sept. 1.

Business men are invited to attend these meetings, and should take advantage of the opportunity to become better acquainted with the farmers.

The program for September 1st is as follows:

- Reading—Mary Beth Sheely
- Music—Carlisle Orchestra
- Reading—Mary Bowles
- Address—Advantages of Planting Pure Seed—R. E. Karpner, Supt. Experiment Station

Farm Bureau Song—Homebrew Quartet.

Address—The Validity of the Cotton Contract—Judge Geo. R. Bean.

## REFINING COMPANY SUCCEEDS IN GETTING RATES REDUCED

Special to The Avalanche

RANGER, Aug. 25.—A complaint filed by the National Refining Co., et al, with the Interstate Commerce Commission, July 24, 1922, against unduly excessive freight rates on crude petroleum in tank cars from Ranger, Texas to Coffeyville, Kansas, according to information furnished to the Traffic Bureau of the West Texas Chamber of Commerce, has been found to be a reasonable and reparation has been awarded.

The complaint filed with the Interstate Commerce Commission alleged that the rate of 32c charged on carload lots of crude petroleum from Ranger to Coffeyville and intermediate points was unjust, unreasonable and unduly prejudicial. It was shown in the complaint that Ranger and Burkburnett may be considered as representative producing points in the so-called Ranger and Burkburnett groups of the West Texas oil field, while Coffeyville, Kansas and Cushing, Oklahoma, are representative oil refining centers in Kansas and Oklahoma, and that necessity forces the refineries in the Mid-Continent oil fields of Coffeyville and Cushing to obtain crude petroleum from the West Texas field because of the declining production in Kansas and Oklahoma. The Interstate Commerce Commission upheld the contention of Ranger and awarded reparation.

## POST-PUBLIC-SCHOOLS OPENS MONDAY, SEPT. 10

POST, Aug. 25.—The trustees have used their best judgment in the selection of teachers, employed teachers with experience and scholarship. Our school has full affiliation with the State University, and each year we are securing additional credits. We have one of the very best schools in this section of the State which is worthy of your support and patronage.

The productive capacity of leather and shoes in the United States is nearly double the consumption and needs.

## There Will Be Plenty of Everything to Eat at Tech Celebration

The following is a partial list of the articles of food that will be supplied for the visitors to Lubbock for the Texas Tech celebration:

- 35,000 pounds of meat.
- 3,000 fried chickens.
- 10,000 roasting ears (corn)
- 6,000 loaves of bread
- 75,000 pickles.
- 2,000 pounds potato salad.
- 1,000 gallons coffee and other articles.

The committee is making ample provisions to meet any emergency that should arise, as should their estimated amounts of any of the above articles not meet the demand it will be possible to deliver them to the tables without delay.

## LOCAL HAPPENINGS

W. D. Benson went to Plainview Saturday to visit his father.

T. T. Geard, of Seymour, was in Lubbock Saturday looking after business and incidentally meeting old friends.

Judge Doyle of Hockley county, was here Saturday looking after business.

L. A. Herrell and H. O. Pettit, of the Pettit community were in town Saturday making arrangements for the beginning of the fall term of school there in September.

Joe George, well known Lubbock man, is at Dallas visiting relatives and friends.

Miss Clara Marsh, of Fort Worth, is here, visiting her sister Miss Mabel Marsh, county home demonstration agent of Lubbock county.

Help Lubbock become more popular by providing rooms for those who attend the Texas Tech celebration. Phone Sam Denman, chairman of the rooms committee, phones #6 or #32.

## RALLS COMING TO THE RANDALL COUNTY FAIR WILL BE HELD 20-22 OF SEPTEMBER

RALLS, Aug. 25.—At a joint meeting of the Crosbyton, Lorenzo and Ralls Chambers of Commerce all agreed to have Crosby county go to the celebration at Lubbock, Aug. 28 as a unit. All stores in the three towns will close and on that day and 1,500 or 2,000 people are expected to go from Crosby county.

Everybody in this county is enthusiastic over the location of the Texas Tech in Lubbock as it will not be too far to send boys and girls from here to the college every day. A system of hard-surfaced highway leading from this county to Lubbock is being discussed, and if put over will put the people here in close touch with the college.

## TRANSCONTINENTAL FLITE RECORDS BROKEN BY MAIL PILOT

By the United Press

WASHINGTON, Aug. 24.—All time records for transcontinental airplane flight has been broken by W. L. Smith, air mail pilot, who brought one of the mail planes to New York on the last leg of the cross-country flight that took only twenty-six hours and fourteen minutes. The post office department announced.

This flight breaks all time records according to the post office department officials who pointed out was much in from this 924. Vets that the Kelly MacReady non-stop flight took twenty-six hours and fifty minutes.

CANYON, Aug. 25.—The Randall County Fair will be held in Canyon this year on September 20, 21 and 22. This date is the week previous to the Amarillo Tri-State Fair.

A meeting has been called at the courthouse Monday afternoon at four o'clock of all interested in the fair in order that plans may be started at this time to put on a big County Fair.

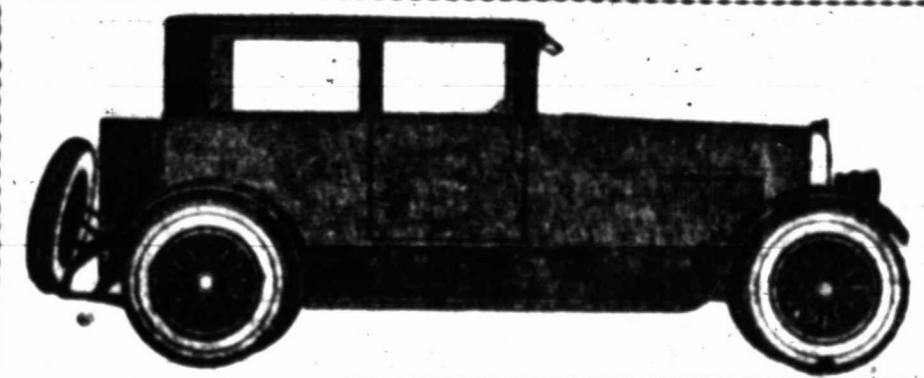

The Duroc Futurity Show will be one of the big attractions of the fair and nominations have been made for this show.

C. F. Walker has been Secretary-manager of the County Fair during the past few years and has put on a highly accredited fair. He will leave by the first of September for his new work in the stock yard service of the Federal Government, but will assist in every way possible to get things started with the fair before he leaves.

All interested in a bigger and better County Fair should come to the courthouse Monday afternoon at four o'clock.

## FIRE AT NO. 931 TURNED IN AT 9:31 O'CLOCK

DALLAS, Aug. 25.—Just as the clock in the Central Fire Station stood at 9:31 a. m., a fire alarm sounded in from this 924. Vets that the Kelly MacReady non-stop flight took twenty-six hours and fifty minutes.

## Power---Economy---Beauty Reliability---Ideals

Let your imagination picture the motor car you want

**POWERFUL**—fast on the open road, flexible in heavy traffic, climbing long and steep hills with ease.

**ECONOMICAL**—delivering the greatest amount of service on each gallon of gasoline, on each set of tires; low in cost of upkeep, long in length of life.

**BEAUTIFUL**—in style that is impressive, yet not extreme; a dignified beauty expressed in every detail.

**RELIABLE**—always ready for a run down town, or a tour across the country, with assurance of "getting" there.

**COMFORTABLE**—easy to drive, having every convenience; the finest available in modern motor car design at a medium price.

A car that will give you the greatest pleasure, the most faithful service; a car of which you may well be proud, through years of delightful ownership.

Is this your ideal in a motor car? We welcome comparison with any motor car, you to be the judge. Ask any owner of a Stephens Six.

**Lon A. Mullican**

# Link Up Entire British Empire By The Air Is Plan; New Route Of The Giant Liners To Connect All Sections Is The Main Feature

LONDON, Aug. 24 (United Press) The project for the establishment of an airship service between England and India, with eventual extension to Australia, which is being undertaken by the Imperial Airship Company, under British Government auspices, is far more than an interesting scientific experiment or a plain commercial undertaking.

It has far-reaching Imperial political aims, and is designed to link up the whole British empire with the mother country and further develop the "All Red Route" idea, which will make the British empire independent of other countries for transportation and communications.

The subject is to be thoroughly discussed at the forthcoming Imperial Conference indicates the importance attached to it by Imperial and Colonial statesmen. The project for a direct air line eastward to Australia will undoubtedly be supplemented in the near future by a westward line to and across Canada, while an automatic development of the eastward route is a "branch" Cape-to-Cairo line connecting Egypt with the great British dominion of South Africa. A trans-Pacific service from Vancouver, the branch lines to the West Indies and South America would complete the chain of Imperial communications which has been the dream of many famous British statesmen.

But it is now more than a dream. It is a practical, commercial possibility, and will be pushed on energetically by Imperial commercial pioneers.

Commander Denniston Burney, M. P., who is the organizer of the England-India project, now getting under way, declared in an interview with the United Press that the automatic establishment and development of long-distance airship service was assured. The England-India project is but the first step.

**Just Like Railways**  
"The ability of airships of 5,000,000 cubic feet capacity, carrying 200 passengers, or troops, to reach Port Said (Suez Canal) in 31 hours is of imperial strategic importance, but that only represents a scratching of the surface of the problem of aerial transportation," Burney said. "The three airships which we propose to run each way weekly to and from India will provide for us the equivalent of the three trunk railways of America."

"Just as America by the agency of these railways has been able to build up itself politically and economically into an entity, and there-

by become the richest region in the world; so can the British Empire be developed by the aerial method."

"I suppose," he added, "there will still be people inclined to scoff at the practical utility of the scheme—until we show them. That the R34 was able to make the return trip to the United States safely a couple of years ago—at the first attempt—should convince the most confirmed pessimists of the future of this form of aerial traffic. The disaster generally pointed to the danger, but the first critics of the railways raised their voices in triumph when the first accident occurred. The ZR2 was an unfortunate and isolated incident, and naturally we have profited by the experience."

"You will remember when Louis Bleriot first flew the Channel a dozen years ago, there were people who said, 'Oh yes, just a trick stunt—interesting, but not likely to be of practical value.' Yet, setting aside all military flying during the war, trans-Channel flights are so common today as to be worthy of no more comment than the passing of a street-car. During the month of June, the Handley-Page aeroplanes alone carried over 1,000 passengers from London to Paris."

**No Longer a Novelty**  
"What a commentary on the doubters who called Bleriot's pioneer flight a 'trick stunt'! There must be hundreds of thousands of people all over the world who have made aeroplane flights, and to whom the idea is no longer a novelty. They will become just as accustomed to the use of the big, rigid airships."

Discussing the England-India service, Burney explained that the Imperial Airship Company would run a bi-weekly service of six airships to India, the trip taking three and a half days or four, if a half-day stop was arranged at Cairo. Except in special cases there was no need for violent rush, for there would be a ten-day saving on the fastest steamship route. The cost of operation would not be so heavy as some had supposed, and it would be possible to carry passengers to India for 70 or 80 pounds—slightly less than the regular steamship fare.

"The importance of rapid transportation to Anglo-Indian commerce," he said, "cannot be over-estimated. Also it will be an inevitable boom to the Anglo-Indian 'exiles' who nowadays can only hope to visit the mother country every two or three years. The Anglo-Indian will be able to make a flying visit home whenever he

gets a fortnight's vacation, if he wants to."

**German Supervision**  
There is only one fly in the ointment, according to super-patriots, and that is for a time at least, German supervision will be necessary, until British airship constructors and mechanics have become more used to this form of aviation.

Germany's superiority and experience in developing Zeppelins, is freely recognized and expert German designers and mechanics will be installed by the Imperial Airship Company, until Britishers are capable of working the scheme efficiently on their own.

Karachi, Bombay or Calcutta will be the Indian terminus of the line, and the Australian extension will be headquartered at either Darwin, Perth or Melbourne.

## Floydada Legionaires Will Assist Lubbock In Tech. Celebration

FLOYDADA, Aug. 25—Members of McDermitt Post of the American Legion at Floydada will assist the Legion Post at Lubbock in serving the crowds at the barbecue during the Tech Celebration at Lubbock Tuesday of next week. E. C. Nelson, Jr., commander of the local post has notified Judge Clark Mullican that the Floydada Post will be on hand in full force.

Tuesday will be a sort of holiday in Floydada on account of the large number of people coming from here to attend and help out in the celebration. Floydada citizens are well pleased with the selection of Lubbock as the location of the Tech College and according to expressions

heard from all sides Floydada intends to back the school to the limit. Floyd County has long led the list in furnishing students for the West Texas State Normal at Canyon and she hopes to establish this record with the Texas Technological College when it is opened for instruction," is the way Homer Steen, president of the Chamber of Commerce expressed himself.

## THE FIRST MOTORMAN IS SAID TO STILL BE LIVING

Recently we published an article concerning "The First Electric Horse" or the first street car. The clipping below was sent to us by the Snyder Pump and Well Company, Inc., Richmond, Virginia, and tells of the experiences of the operator of the first electric street car in the world.

The story is reprinted from the Richmond News-Leader, and is as follows:

Walter B. Eubank, 301 South Meadow Street, has a mileage rec-

ord for travel that is perhaps unequalled by any other citizen of Richmond. During the past thirty-five years he has traveled over 800,000 miles, a distance equal to more than thirty times around the world. As a result, he is probably a much better qualified authority on the subject of Main Street than Sinclair Lewis himself, as all of Mrs. Eubank's peregrinations have been confined to that thoroughfare.

"Mr. Eubank, who is Motorman No. 23 in the service of the Virginia Railway and Power Company, has the unique distinction of having given the signal which put into operation the first electric car in the world. More than that, he also bears the distinction of having collected the first nickel fare for an electric street car ride.

"On Jan. 9, 1888, Mr. Eubank gave the signal which put into operation the first of Richmond's electric cars, which ran from Twenty-ninth and P Streets to the corner of Hancock and Clay Streets along Main Street. He collected the first fare from William A. Boswell, a resident of Church Hill, and the

nickel now rests in a public museum in New York City.

"During his thirty-five years of active service on the Main Street line, Mr. Eubank estimates that he has been responsible for the safety of over 6,000,000 passengers, and, according to 'Public Service News,' he has an enviable record for safety and service, and there are no serious accidents marked against him. Mr. Eubank is still operating a car on the Main Street route." South-western Machinery.

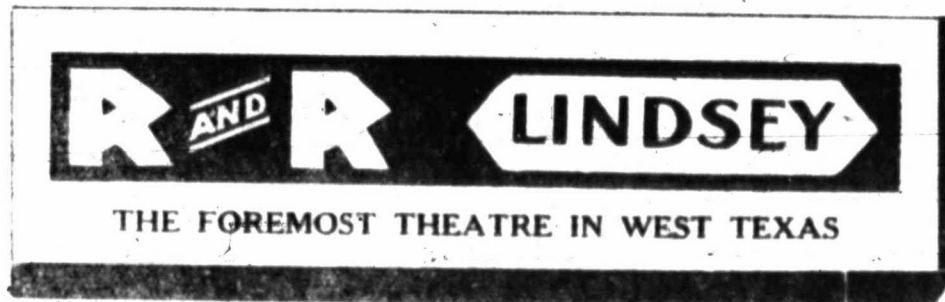

## CALLED MEETING O. E. S. WAS HELD AT FLOYDADA

Special to the Avalanche  
FLOYDADA, Aug. 25—A called meeting of the O. E. S. chapter of Floydada was held Tuesday night for a meeting with the Grand Master Mattie Adell Sobits, of Higgins, Texas. She delivered a lecture and gave instructions to the Chapter. She was the house guest of Mr. and Mrs. R. L. Harris during her stay here.

### INDUSTRIAL SURVEY

The State-wide industrial survey, undertaken by the writer, is well under way, and considerable data and information has been compiled to date.

There are now fifty-seven (57) classes of industry in the State of Texas, representing a total investment in excess of six hundred millions (\$600,000,000) of dollars, with a total of approximately 6,250 manufacturing plants, as compared with the U. S. Government census of 1920, showing a total of five hundred eighty-five million, seven hundred seventy-six thousand (\$585,776,000) dollars invested in industry with a total of 5,724 manufacturing plants.

The aggregate value of manufactured products in Texas now exceeds one billion (1,000,000,000) dollars per annum.

**Natural Resources of Texas**  
Texas contains the natural resources, the constituents necessary for the development of industry. Aside from her stupendous deposits of lignite, with a quantity estimated at thirty billion (30,000,000,000) tons, oil reserves estimated at approximately seven hundred million (700,000,000) barrels, exclusive of the Gulf Coast together with an estimated five hundred thousand (500,000) potential, or undeveloped water horse power, Texas has a transportation system with a total of approximately 17,000 miles of railways, and approximately 800 miles of inland waterways.

The state of Texas abounds in natural resources which may be enumerated as follows: Petroleum, natural gas, lignite, clays, gypsum, sulphur, iron ores, graphite, marble and other rock deposits.

Gold, silver, lead and copper are available in limited quantities. Also, topaz, quartz, radium earth and material and other mineral deposits exist.

Texas ranked first last year among the States of the Union in the production of quicksilver, with a total of approximately 70,000 pounds.

Iron ores (limonite, or so called brown ores) underlie approximately 5,000 square miles of territory in East Texas, varying from 30 to 70 per cent in metallic content.

The State of Texas produces approximately one-half (1-2) of the sulphur supply of the world.

The aluminum-silicate deposits of Texas include practically every variety. Clays for the manufacture of brick, tile, pipe and pottery are found in over one-half (1-2) of the counties of the State. Texas ranks twelfth (12th) among the States of the Union in total output of clay products. There are now a total of approximately 145 industries of this character in the State.

Texas produced approximately one billion (1,000,000,000) tons of lignite last year; and Texas has, next to North Dakota, the largest deposits of any State in the Union.

The State of Texas, for the past three (3) years, has produced an average of 100,000,000 barrels of petroleum, being equivalent to approximately twenty-two (22) per cent of the oil produced in the United States.

In addition to oil, Texas produces approximately forty-four billion (44,000,000,000) cubic feet of natural gas per annum.

Texas produces from one-fourth (1-4) to one-third (1-3) of the cotton grown in the United States.

**Industrial Survey Data**  
Of the fifty-seven (57) classes of industry in the State of Texas five (5) groups, namely: cotton gins, cotton seed oil mills, cotton textile mills, ice and cold storage plants and power and light plants, show a total initial investment of approximately two hundred forty-eight million, four hundred sixty-seven thousand, five hundred (\$248,467,500) dollars.

**Cotton Gins:** In their relative order, cotton gins rank second with a total of 3,611 plants, representing an original investment of approximately \$36,110,000. Their replacement cost, based on current values, would amount to from \$34,165,000 to \$73,200,000.

**Cotton Seed Oil Mills:** Cotton seed oil mills rank fourth, with a total of one hundred-sixty-one (161) plants, representing a total original investment of approximately \$11,490,000, with a replacement value of approximately \$25,357,500.

The total daily capacity of these plants amounts to approximately 15,000 tons of cotton seed.

**Cotton Textile Mills:** Cotton textile mills rank fifth, with a total of twenty (20) cotton mills and two (2) knitting mills, representing a total investment, based on current values, of approximately \$25,000,000.

There are two cotton mills now under construction representing an initial investment of about \$2,000,000. The mills in operation employ 4,000 people, consume cotton worth approximately \$9,000,000; finished product is valued at approximately \$20,000,000 or 75,000,000 yards.

There are now 177,936 spinning spindles operating in Texas; and also, 4,633 looms and 150 knitting machines.

The average earnings on cotton textile mills in the State for the past five years run from 12 per cent to 25 per cent cash, exclusive of stock dividends. The value of stock in Texas cotton mills run from \$150 to \$400 per share, and there is none offered for sale.

**Ice and Cold Storage Plants:** Ice and cold storage plants rank third, with a total of 32 plants, representing an original investment of approximately twenty-two million, eight hundred ninety-seven thousand, and five hundred (\$22,897,500) dollars, with a replacement value of approximately thirty million, five hundred thirty thousand (\$30,530,000) dollars.

The total normal daily output of these plants amounts to approximately 15,265 tons of ice, which is sufficient to furnish each individ-

ual in the State, each day, with a block of ice weighing about six (6) pounds.

Cold storage plants in Texas contain a total of approximately 14,353,000 cubic feet of storage capacity for ice and perishable products.

The total consumption of ice per year in the State of Texas has been estimated to run approximately 2,000,000 tons.

**Power and Light Plants:** The investment in power and light plants, sub-stations, transmission lines, etc., in the State of Texas amounts to a total of approximately one hundred fifty millions (\$150,000,000) of dollars, which makes this industry rank first from an investment standpoint among the five (5) groups of industry mentioned here.

The 325 central generating plants have a rated output of approximately 349,950 kilowatts, or 578,250 horse power. Electrical energy is

furnished to 628 cities and towns in the State; and there are approximately 1,765 miles of transmission lines.

**Conclusion:** The industrial survey of the State of Texas should be completed within three months.

The future of the State of Texas is contingent on industry; and, therefore, the citizens of Texas must not confine their activities to agriculture and commerce alone, but investments must be made in new industrial enterprises which will prove the greatest medium in the stabilization of trade, and the production of wealth.

#### OFFICERS OVERCOME BY BULL NEAR WEATHERFORD

WEATHERFORD, Texas, Aug. 24. This is not bull. However a bull caused all the trouble.

While driving along the Bankhead highway near here motorcycle officers Guerry and Thorp were attacked by an infuriated bull. Both were knocked from their motorcycles and suffered slight bruises.

Content with muzzing up the cops a bit the bull ambled along.

### Floydada In Grip Of Building Boom Despite Circumstances

FLOYDADA, Aug. 25.—A hundred thousand dollar high school building, a twenty thousand dollar sanitarium, several residences, a block of new business awnings, and a mile of concrete sidewalks are under construction now at Floydada despite the fact it has been a dry summer, and the wheat crop did not yield as much as anticipated.

Floydada did not get the Texas Technological College.

The Rice Construction Company of Amarillo have been at work on the new high school building for the past two weeks and have nearly completed the concrete foundation that will carry the two stories.

H. M. McDonald, the contractor on the Smith & Smith Sanitarium

advised Drs. Smith and Smith Thursday that they could move into the new building during the first week in September. The new sanitarium is a hollow tile stucco building with facilities for taking care of the needs of a much larger city than Floydada. It is a duplicate of the Standefer Sanitarium at Vernon.

J. H. Shurber is building a stucco and plastered residence on South Main street that will be completed during the next three weeks.

A solid block of awning is being built on the block of Childers block on West California.

One concrete contractor has contracts for nearly a mile of sidewalks to be built now.

#### ARMSTRONG COUNTY WILL REJAIN HOME DEMONSTRATOR

CLAUDE, Texas, Aug. 20.—Mrs. Frank C. Vaden, county home demonstration agent, who has worked so faithfully for Armstrong county for the past year has recently been re-elected for another year, by the county commissioners.

### PRESENT GERMAN GOVERNMENT PAT ON THE REPARATIONS

BERLIN, Aug. 25.—The present government of Germany stands firmly on the last government's reparations offer to the Allies. Chancellor Stresemann declared in a speech at a banquet here.

Thirty billion gold marks plus the international commission of experts to determine Germany's capacity to pay is the maximum Germany can do.

"If France is ready and wants a positive guarantee she can find a way there after expiration of the reparations, but the Rhine and the Ruhr Basin are inseparable from the Reich and their railroads and mines are not transferable," the Chancellor said.

It's a very, very foolish congressman who doesn't have his picture made pitching hay.

Vacations are about over, all except the scratching.

The Millinery and Ready-to-Wear Department of this store is a revelation in style and economy. Mrs. Fann has returned from market and will be delighted to show you the new things.

## Welcome

People from Idalou, Shallowater, Plainview, Slaton, Ft. Worth—everywhere! You will find the Hodges Brothers Store (On the East Side of the square) zealous to make you feel perfectly at home and at ease. We will not urge you to buy but will be mighty glad to show you thru a store that is said to be the largest mercantile establishment on the Great South Plains. There will be plenty of ice water, a good cool place to rest and meet your friends at the Hodges Brothers Store.

We appreciate the spirit of co-operation and loyalty that prompts you to attend this great Jubilee. We believe you will help in making the Great TEXAS TECH the finest school of learning in the United States. We are at your service!—at your command.

The spirit of the day is reflected in our line of Men's Suits—the prices are very attractive!

EVERY VISIT TO THIS STORE IS A LESSON IN THRIFT.

# LUBBOCK'S RECEPTION OF THE ABILENE BOOSTERS WAS THE "DECISIVE CONCLUSIVE AND SPLENDIFEROUS"

The special correspondent for the Abilene Daily Reporter, with the special at Lubbock and thousands of others were on the streets and sidewalks to reinforce the welcome. Every Abilene booster was given an automobile ride about the city, with Lubbock's charming feminine population doing the driving. The beautiful location for the Tech was inspected and proved to be a wonderful piece of land.

Many of the trippers, the dining car being for the time inoperative, were taken into Lubbock homes for the evening meal, which others scattered to restaurants and hotels.

At eight o'clock a big crowd gathered on the courthouse lawn, where Abilene pulled a clever stunt for Lubbock's delegation. R. W. Haynie, official introducer of West Texas Fair duchess, and one of the floweriest orators of all time, mounted the bandstand accompanied by a beautiful figure in feminine garb, whom he introduced with many oratorical flourishes as Lubbock's sponsor to the Fair "Bob" spread himself on this occasion, and soared to new heights in describing the beauty and charming attributes of the fair daughter of the plains.

Presenting the sponsor with a box of candy, Judge Haynie ceased speaking, whereupon the sponsor removed "her" hat and revealed the shorn locks and boyish brow of one none other than Jack Morris, a member of the Simmons College Cowboy Band. The crowd broke into gales of laughter and the stunt made a big hit with Lubbock as well as the Abilene people.

Jack's costume was bought by the trippers enroute, with funds contributed by popular subscription. The outfit was complete from white silk hose to military, and the impersonator did his part with the consummate grace and skill of a veritable flapper.

After order had been restored, Judge Haynie introduced Miss Mary Meadows as Lubbock's "really, rel-

ly" sponsor, and that young lady the Abileneans by stating that she was 100 percent for Lubbock first and Abilene second.

W. O. Stevens, president of the Chamber of Commerce, spoke briefly, and introduced Mayor Percy Spencer, who gave the city's official welcome in a whole-hearted manner. Mr. Stevens had been introduced by O. E. Radford, generalissimo of the trade trip, whose home was in Lubbock for several years. President J. W. Hunt of McMurray College responded, and in a speech bristling with common sense and logic, appealed for cooperation among West Texas towns in the Tech as well as all other matters. He declared that Abilene's great colleges would continue to get students from this territory, and the Tech at Lubbock would get students from the Abilene territory. The sentiments he voiced were loudly cheered by the crowd.

Judge Fred Cockrell was called on, and spoke for a few minutes in typical style.

After the program on the lawn, the trippers dispersed to the Elk's Club, Country Club and other places where entertainment had been arranged in their honor and for their special benefit.

When they pulled out of here at eleven o'clock last night, the Abilene men were of one opinion in regard to their treatment at Lubbock. It was eminently satisfactory, and elegantly done.

Post, Lubbock and Slaton, the only three towns visited above the caprock, will long be remembered by the Abilene travelers as places inhabited by a live-wire bunch of first class sports—West Texans all.

# Emergency Hospital Will Be Maintained During Celebration

Lubbock is leaving nothing undone toward preparing for the care of the thousands who will be here Tuesday and the position will likely be filled at that time.

President R. L. Marquis of the Denton Teachers College is also mentioned as a likely candidate for the position, but it is understood in Canyon that Mr. Marquis is likely not interested in the presidency of the new college.—Randal County News.

FLOYDADA MAN APPOINTED SUPPLY SERGEANT

Special to the Avalanche.

FLOYDADA, Aug. 25.—W. E. Smith of Sanger who is spending his vacation with the Floydada Ice Company here was appointed Supply Sergeant of the Cadet Corps at A. & M. College this week, receiving his appointment Wednesday from President W. B. Bizzell of that institution. Smith will be a Junior at the College this year. He has spent his last two summer vacations at Floydada.

While every precaution is to be taken against accidents, the fact that there will be approximately thirty thousand people here makes the need of a first aid station apparent.

The physicians of Lubbock are to be congratulated upon their willingness to serve the people in this capacity, as has been their custom upon each occasion a large crowd is assembled here, as it will be remembered that their first aid station at the South Plains Fair has been of great service to all.

# WEST TEXAS GETS GOOD PUBLICITY IN AGRICULTURAL PUBLICATION

Special to the Avalanche.

STAMFORD, Aug. 25.—A photograph of the Agricultural and Industrial Exhibit of the West Texas Chamber of Commerce shown last August at the International Wheat Exposition at Wichita, Kansas, has been reproduced and shown in the Southwest Colonization Journal, in the July 1923 issue. The photograph was selected as it represented the best type of exhibit shown at the International Wheat Exposition, according to a letter received by the West Texas Chamber of Commerce from Horace S. Ensign, manager of the Wheat Exposition.

# STILL AFTER ROTARIANS

MEXICO CITY, Mexico (United Press).—Not daunted by failure to secure the 1924 convention of the International Rotary, the Mexican Rotary is making plans to bring the 1925 convention to this city.

# AMERICAN BOAT WON THE TRANS-ATLANTIC RACE

SOUTHAMPTON, England, Aug. 25.—The Leviathan won the unofficial trans-Atlantic race from the line Olympias when she docked at one forty five p. m. while the Olympias was still at sea.

The Olympias is expected at one o'clock p. m. tomorrow almost twelve hours after the arrival of the American boat.

Both vessels sailed from New York last Saturday morning and the Leviathan left Sandy Hook thirty five minutes behind the Olympias.

# PRESIDENT HILL NOT CANDIDATE FOR PRES. OF THE TECH.

The daily press has stated several times for the past month that President J. A. Hill is being considered by the Board of Regents of the New Tech. College for the position of president of that institution.

Mr. Hill stated Saturday that he was not interested in the position. He stated that his whole life has been devoted to the idea of teacher training and that it was his ambition to serve in this field of work. Mr. Hill stated that he was not an applicant for the presidency of the Tech. College nor has he been asked

# E. P. Williamson

# NOTICE!

## Citizens of Lubbock!

On August 30th, 1923, there will be held an election for the adoption or rejection of an amendment to the present city charter, raising the tax limit from the present \$1.50 to \$2.50.

This election was called upon the unanimous recommendation of the undersigned, they having met with the Commission on June 16th at the request of the Mayor.

At this meeting, the Mayor and Commissioners stated that they did not wish to take part in the discussion, other than to furnish what data might be desired, and after a thorough discussion of the problems of paving, storm sewers, taxation, etc., it was, upon a motion made by J. T. Inmon and seconded by O. L. Slaton unanimously voted that the body recommend to the Commission that they submit the amendment which is to be voted upon, and it was further voted that each present would recommend to the citizenship the passage of the amendment.

The present tax levy is \$1.25, and the proposed amendment will not raise the taxes to \$2.50 or to any other amount, but will simply open up the avenue for the voting of additional bonds, and naturally the bonds, if any are issued, will first have to be authorized by a vote of the people.

In view of the above, and especially in view of the fact that the City Commission and Mayor guaranteed to the Tech Locating Committee that one or more streets would be paved from the business district to the school, we earnestly urge all good citizens to vote and work for the amendment.

Respectfully,

S. C. WILSON

# FOUR HUNDRED THOUSAND NEGROES LEAVE THE SOUTH—BOLL WEEVIL IS BLAMED BY MANY—WAGES BETTER

ATLANTA, Ga., Aug. 23. (United Press)—The South today is in the throes of its second great crisis—an economic revolt against traditions and conditions.

The boll weevil has stamped the negro and with the unorganized, orderly exodus, hundreds of farm and factory hands daily, is going the plentiful labor supply, low wages and life of comparative leisure which the Southland has enjoyed since before the first great crisis—the civil war over the freedom of the negro.

Agricultural experts, bankers and students of economics view the situation with some alarm, as estimates from official and unofficial sources show that 400,000 negroes, men, women and children are searching for the end of the rainbow in Northern industrial centers.

The feeling of apprehension is for the South—where the cotton and tobacco hunter has been forced to pay higher wages for labor in the face of a doubtful profit on his crop—and for the North, where congestion already is being experienced and lower wages are in prospect.

Plantation owners and land holders are daily being brought face to face with the fact that they, their sons and neighbors are going to have to go out into the field to help pick the cotton and otherwise tend the crop.

**Negro Gives Up Fight**  
The negro for years has worked for the whites as a "cropper share," doing the labor under the plantation owner's supervision and assistance and dividing the proceeds. But the boll weevil, a tiny insect which bores into the "square" of the cotton plant and destroys the product with resulting financial loss, has bored into the soul of the negro worker. He has given up the fight against an enemy he does not understand and lost the long hope that next year or the next he will be able to produce a crop that will pay him dividends.

The Sixth Federal Reserve bank in its last monthly review shows that a serious farm labor shortage exists in Florida "on account of the migration of labor to Northern cities, in Alabama, Louisiana, Mississippi and Tennessee. The cities also are beginning to feel the shortage. The same situation is reflected in South Carolina.

The extent of the migration is difficult to determine because in many states, authorities have made no effort to check the number of negroes answering the call of the North, and some even deny a migration is underway.

**Georgia Suffers**  
In Georgia, where the state department of labor has kept detailed statistics since the exodus first began, more than 100,000 negroes have left the state so far this year. The exodus is still underway and one state official said today that for the last three months an entire car of negroes headed from the cotton fields has been attached daily to the train on which he rides out of Atlanta to his home.

South Carolina officials have figures showing 55,000 negroes have gone out of that state. The exodus has been at the rate of 4,000 monthly and from the city of Columbia alone 6,500 laborers have gone out. Reliable estimates covering Alabama show that 20,000 left the state last year and the rate this year has been 6,000 negroes a month. The average now has dropped to about 100 a day, however. The total to date this year has been nearly 40,000.

In Mississippi approximately 30,000 negroes have sang a farewell to Dixie, according to reports from officials of the railroads. These same sources indicate that the exodus has slowed down appreciable of late and many are returning to their former homes.

Arkansas has lost over 3,000 negroes since the middle of January.

State Labor Commissioner T. A. Wilson said.

Whites and Mexicans have come into Arkansas on the heels of the negroes, Wilson said, and as a result no labor shortage is being experienced. Wilson attributed low wages as the cause of the migration.

**Saved By Oil Fields.**  
Louisiana, Oklahoma and Texas have not been as hard hit as other Southern States. The oil fields in these sections, with the resultant prosperity and era of plenty, have counteracted the lurid descriptions of life in the big industrial centers.

Tennessee has contributed less to the exodus, state officials say, than any other state. The department of labor estimates that only 4,500 blacks have deserted their homes in that section and a number of these have returned. Memphis has been one of the heaviest losers, but the decline has been made up for to some extent by drawing workers from the fields.

Bankers, chamber of commerce officials and others, divided as to the cause of the exodus, mainly agree that the boll weevil has disturbed the Southland's economic structure, as well as ruined the cotton plants.

Other reasons cited are the promise of a easy existence, high wages and letters from the vanguard which migrated last year picturing in roses a new social plane and improved housing and living conditions.

**Blames the Whites**  
The white man has only himself to blame, is the view of Bishop J. S. Flippo, of the Afro Methodist Episcopal Church of Atlanta. The negro is going north to get protection for life and property, better living conditions and higher wages.

Labor officials now are not so concerned with the exodus, however, as with the result. Higher wages in the cities are becoming effective rapidly and with the cotton season but a few weeks off, farmers already are entering the open market for labor. Where they once paid the negro \$18 a month, or a chance to work on a sharecropping, they now are offering \$1 a day while in the cities from \$2.50 to \$3.50 is being bid for the negro's services.

Modern machinery is taking the place of the negro and his mule in many sections and agricultural experts declare the exodus has been a blessing in disguise. They believe the farmer will be forced to do more intensive cultivating, adopt the most modern methods and that

financial returns will be increased two fold.

Many of the South's famous plantations are threatened with disintegration. The wealthy owners will be forced to break them up into small parcels to stave off financial ruin, and in this many profess to see the greatest advantage as a result of the wholesale migrations.

**South Carolina Prepares**  
In anticipation of this day South Carolina has already undertaken an official survey. A commission headed by former Governor R. I. Manning, under provisions made by last legislature is touring the west, interesting the corn and wheat farmer and the livestock breeder of the plains states in the soil and grazing lands of the Carolinas. The aim is to find out what kind of labor can be brought into the state to settle lands now unused and how such laborers can be brought.

Other efforts are being made to bring in new thought and new blood by colonization work and by interesting the immigrant from Northern Europe in this field.

Some states have taken steps to combat the exodus by restricting the work of labor agents. Excessive license fees are demanded and agents are subject to fines and other penalties, in Georgia, North Carolina and Alabama, but the South generally is doing little to prevent its once greatest problem, becoming the problem of the North.

## T. J. ESTES IS VISITING RELATIVES IN DAWSON COUNTY

Editor Avalanche:  
Sunday Morning, Aug. 19th, Mr. and Mrs. J. B. Potts, Elmer and Georgia Potts and myself, biked out from Lubbock for Dawson County and arrived at our destination about noon, which was the home of Mr. and Mrs. John A. Walton, and about half way between O'Donnell and Lamesa. The occupants being away from home at church, we took possession and found some fine watermelons, of which C. A. has an abundance in a cool place ready for eating, we instituted a watermelon feast.

We saw some fairly good crops and some not so good all the way down, and we found fair crops in the locality, the Hancock settlement.

The Potts returned home Tuesday.

but I remained for the week with my daughter, Mrs. Walton. Mr. Walton bought 160 acres of fine land here from K. Carter last winter and they have built, fenced and put in cultivation about 100 acres, about 60 of which is cotton. They tell me this is an exceptionally fine settlement of people and all are good neighbors. A gin and P. O. or a rural route are needed here and I feel sure these people will soon have them.

On of the citizens here, Mr. Evans received the sad news Saturday of the death of his son, by drowning, who was with a construction crew in California. It was a great shock to the family and the mother was prostrated with grief.

A good rain would be of great help in maturing the crops and rain prospects are fine just now.

Wish the Avalanche crew could have some of those fine melons.

T. J. ESTES.

## SAYS OPERATION ENNOBLES THE HUMAN RACE

BERLIN, Aug. 24 (United Press)—The Steinach operation should be viewed said Dr. Peter Schmidt in a United Press interview, as a means toward ennobling the human race, prolonging life, and uplifting man's usefulness.

It should be considered an attempt to shatter or postpone "physiological death"—that is, a means toward elimination of such ills as arteriosclerosis and the like, that hasten the coming of the grim reaper and the decay of the mental and physical structure.

It is time, he says, to junk the

salacious jokes about Steinachism. Instead, put it on a pedestal and take it for proven that:

It is a tried and tested method whereby old age can be retarded.

It can head off or cure many ailments that come as age creeps on.

It can strengthen man's mental, or dphysical capacity, thus making the human worth more to himself and to the world.

"The world some day will look back and sin the praises of this ingenious Vienna scientist, Steinach," said Schmidt. "At present there is a wholly false impression abroad as to the scientific fundament of the Steinach process."

Sitting in his study in the Bambergerstrasse, the 32-year old surgeon Schmidt then proceeded to elucidate that the Steinach theory is not based on "gland transplantation" in the map.

It is quaint, he commented, "how folks come here and say for instance, 'Must I buy my own monkeys?' or ask, 'Do you guarantee that my bald head will again be thatched?' or even 'Where shall I get my glands?'"

He explained that the operation consisted simply in constricting certain ducts within the body, thus conserving vitality. It is a matter of twenty minutes, under local anesthesia, to make the surgery and then the patient lies perhaps eight days in the clinic. Sometimes this operation does not suffice; then other glands must be introduced.

The young ladies are tanning their hide now. Next winter they will be hiding their tan.

The Government of the United States rates gas and electric company next in order of safety to those of Government States and county and municipal bonds.

## New WILLYS-KNIGHT and OVERLAND 1924

### Lower Prices and great Improvements

These tremendous new values are the direct result of the greatest sales and production period in Willys-Overland history. We believe nothing else compares with them.

- Willys-Knight 5-Pass. Touring - - Now \$1175
- Willys-Knight 2-Pass. Roadster - - Now 1175
- Willys-Knight 5-Pass. Coupe-Sedan Now 1550
- Willys-Knight 5-Pass. Country Club Now 1635
- Willys-Knight 5-Pass. Sedan - - - Now 1795
- Willys-Knight 7-Pass. Touring - - Now 1435
- Willys-Knight 7-Pass. Sedan - - - Now 1995

**A Bigger, Much More Powerful New Engine in All Overland Models**

- Overland Touring with bigger new engine Now \$525
- Overland Roadster with bigger new engine Now 525
- Overland Coupe with bigger new engine Now 795
- Overland Sedan with bigger new engine Now 860
- The Big, Powerful Overland Red Bird Now 750

In every detail, all of the superior Willys-Knight and Overland qualities, features and improvements are retained. Nothing has been spared to insure the continuance of Willys-Overland leadership in value.

Comparison has resulted in an enormous increase in sales for Willys-Overland this year. A new comparison of these new values we believe will sweep aside every other standard that your previous observation has set up. Come in and see for yourself.

All values F. O. B. Lubbock. We reserve the right to change prices and specifications without notice.

**Lub-Tex Motor Company**  
LUBBOCK, TEXAS

Made in a wide range of Styles

YOUNG, middle aged or elderly men will find the exact style to suit their taste in the wide range of models offered in Edwin Clapp shoes.

Carefully selected leathers, equally high grade accessories, plus superior workmanship combine to give you full value for the money you invest in the Edwin Clapp shoe. For seventy years they have been made in one grade only—the best. If you would enjoy real foot ease buy a pair at once.

# Mexico Expects U. S. Trade To Flow With Recognition; Interests Of Northern Republic In Southern Neighbor Now Heavy

MEXICO CITY, Mexico (By mail to United Press).—Recognition and the establishment once more of friendly relations between the United States and Mexico will see a big influx of Americans to this country.

It is expected that a never-increasing number of Americans will make their homes here. American firms doing business with this country must have representatives stationed here and these are destined to be largely Americans, because Americans naturally best know American ways of doing business.

Capitalists, promoters, manufacturers, independent American business men in all lines of endeavor are already returning in increasing numbers to the Mexican capital.

It is natural to suppose that the influx of Americans to Mexico has scarcely begun. The field of foreign endeavor here is immense and the rewards for intelligent endeavor and the careful and considerate investment of capital are enticing.

Americans are participating in almost every activity of Mexico's national life, apart from the political. Americans have built railroads and harbors, vast power plants and extensive highways, telephone and telegraph lines. They have established modern plantations and irrigation plants, opened thousands of new mines and given life and renewed activity to those long established, by the introduction of modern machinery and methods. American capital has been largely instrumental in the development of the vast Mexican oil fields.

**U. S. Gets the Business.** It might be said that the United States now has two-thirds of all the foreign business of Mexico and is moving steadily forward to the conquest of more.

Not so many years ago the American in Mexico was a being apart from the life of his own country and the intellectual movement of Mexico. He was a sort of unsettled character and few men brought their women-folk to Mexico. As in all other countries, the missionaries were the first. They established a few schools and social centers, chapels and other places of American reunions.

One of the most interesting incidents of the activities of Americans here in early days is that told about the request for property for an American cemetery. This request was made by the United States government to the Mexican authorities and was bitterly opposed in the chamber of deputies, largely on the ground that it was to be a non-Catholic cemetery, causing religious prejudice. Juan Antonio Mateos, a deputy, poet, orator and dramatist, carried the motion for the dedication of a piece of land by a humorous caricature which has become his tojor. He said:

"You know I'm as good a Catholic as any of you and that I hate Protestants. But, nevertheless, I'm in favor of this measure as one of necessity and utility. Americans are coming here in increasing numbers; and, unfortunately, they die on our hands. There is only one of three things we can do with them. We must either burn them, cut them or bury them. The day of burning heretics is past since the inquisition went by the board, and I, for my sults,

part, even good liberal that I am, object to eating a Protestant. So I move you, gentlemen, that there is nothing left for us to do except to provide a place in which they may be buried."

**American Hospital and School.** Two institutions in Mexico City, which are of inestimable benefit to the American colony, are the American Hospital and the American school. From a very modest beginning the hospital has steadily gone forward until it now one of the best conducted and equipped private institutions of its class in Mexico.

Of all institutions established here, the American school easily stands first on account of the more intimate connection which it sustains not only with American families, but with those of the other English speaking colonies and Mexicans of middle and upper classes.

The first American school was founded in 1894. The school building today is 237 feet long by 66 feet wide and contains in addition to 22 full sized school rooms, all necessary offices, dormitories, laboratories, libraries lunch rooms and other adjuncts of modern equipped college. Seven hundred and fifty students can be accommodated. It is interesting to note, in connection with this school that Mexicans constitute slightly over 51 per cent of the total attendance. This means that hundreds of Mexican students are not only learning English and receiving an American education, but they are imbibing American ideas and forming relationships which should be mutually beneficial to Americans and Mexicans in the not-distant future.

**The American Club.** One of the oldest American institutions of the capital is the American Club, which, in its long history, has counted on its roll practically all the Americans of note resident here, among them some who have left their names indelibly stamped upon the history of Mexico.

Much younger than the American Club, but not less active, is the American Chamber of Commerce which has, since its inception a few years ago, dedicated its energies to promoting international trade between Mexico and the United States.

The American Benevolent Society has had an especially heavy burden upon its shoulders for the past ten years, owing to abnormal conditions created by the revolution. All the American Protestant denominations have churches here and each in its way is contributing to the social life of a part of the community.

Among the institutions which were primarily American are the Y. M. C. A., the University Club, and the Country Club, and though these have become international all, except the first, have still a large American membership.

The American Legion and the Boy Scouts form an active part of the life of the American community.

"Kentuckian's never uncouth," writes Burman in the Nation. But often, we add, uncouth.

## HOPKINS FAMILY HAS COPIES OF METHODIST MAGAZINE OF '98

Special to the Avalanche.

FLOYDADA, Aug. 25.—A very interesting heirloom in the family of Dr. E. A. Hopkins of White Deer, father of Maury Hopkins, Secretary of the Floydada Chamber of Commerce is a bound copy of "The Methodist Magazine" published during the year 1798. The bound copy of the magazine covers each monthly edition for the entire year.

The book is in Floydada and in possession of Maury Hopkins. It has been in the Hopkins family since its publication in 1798 and is greatly prized. It is bound in home-tanned leather with buckskin threads and is in excellent condition.

It is not known whether the book is a rare volume or not. It contains a number of the sermons of John Wesley, a number of his letters and also collections from other eminent early Methodists. The book does not indicate where it was printed or who the publishers were.

## Mason Says Germany Is Not Hurt By Collapse of Currency

NEW YORK, Aug. 25 (United Press).—Industrial collapse of Germany is not imminent, nor has the real economic strength of the German people been weakened by the fall of the mark. Despite the fantastic imitation of the collapse of Russian rubles by Germany's paper currency, there is no reason to anticipate that in other respects, Germany will go the way of Russia.

Russia's currency degeneracy was coincident with nation-wide starvation and cessation of industry. There is no unemployment in Germany and though many classes have been made the victims of food profiteers, there is ample food in the country for all.

Expansion of German industry has not suffered because of the fall in the exchange rate. German shipbuilding is second only to Great Britain's. Construction of new buildings is proceeding in the principal German centers at a good rate.

The industrialists of Germany are improving their plants and putting in more modern machinery. Everywhere Germans are keeping abreast with progress in other countries.

ever a stabilization level is reached and is maintained, prices in Germany will quickly adjust themselves to the new base. Thereafter, world price levels will be reached and the German people can resume saving, knowing that marks will purchase approximately the same one week as the next.

**No Letup in Production.** The decline in the value of the mark has not been caused by any real letup in production. The German people have the goods with which to pay the government's expenses if the government would only assess taxes on a proper basis. This would automatically stabilize the mark.

The artificiality of Germany's depressed currency is demonstrated by the fact that the actual wealth in goods of the German people has been constantly increasing while the mark falls.

There has been no loss in wealth whatever to the German nation through the decline of the mark. Wealth has changed hands inside Germany, but the German nation as a whole has gained enormously because marks purchased abroad will never be redeemed at anything like the purchase price. Americans in large numbers bought marks as a speculation when marks were selling at from one to four for a cent. The drop from that price to forty thousand for a cent means the hundreds of millions of American dollars used for speculating in German currency have gone forever. Gone, that is to say, out of American pockets to pay for raw materials which are providing a considerable part of the basis of Germany's present prosperity.

**Will Never Come Back.** Marks will never come back. There is no record in history of a currency depreciated far less destructively than Germany's ever being restored to parity. To do so would be too costly for the industrialists and financiers who have made as much by the mark's decline. Germany will fix a new rate for the mark, whenever the time seems appropriate to those in charge of German world policy. That rate, whatever it is, will not harm the money kings.

Stabilization in Germany is a mechanical matter of making tax-equivalent expenses. The German government can do this any day it desires, because of the real prosperity of the country. It will make no difference for the future on what basis the mark is stabilized. It can be done at a million marks for a dollar or ten million. When

HEREFORD PASTOR TO HOLD MEETING AT FLOYDADA. Special to the Avalanche. FLOYDADA, Aug. 25.—Rev. L. N. Lipscomb, pastor of the Methodist Church at Hereford will preach for the revival services of the Methodist Church here which will begin the first Sunday in September. Rev. Lipscomb is at present engaged in a revival meeting at Quitaque. He is reputed to be one of the strongest evangelists in the Northwest Texas Conference.

The value of the salmon fisheries of British Columbia for 1922 was \$18,106,315.
