Hemphill-Price Co.

YOU CAN NOT AFFORD TO MISS THIS CLEAN SWEEP SALE

SECOND ANNUAL

CLEAN SWEEP SALE

ALL SALES PRICES CASH--NO REFUNDS--NO RETURNS A BROOM WITH EACH \$10 PURCHASE OR MORE

This Store does not advertise many Sales but when the time rolls around prices are reduced so severely that only a limited time is necessary to effect this Clearance. Our Annual Clean Sweep Sale will be one long remembered by the people of Lubbock and the South Plains. Past experience has proven the value of this event from a money saving standpoint. This year we are making an extra effort; in fact we have determined to make this our best Sale yet. For every day of this supreme bargain giving event we have prepared extra special values that will demand the attention of every economical man and woman in Lubbock and in the South Plains.

### OLYMPIC STARS SET NEW RECORD AT LONDON

By United News.  
LONDON, July 19.—Breaking a world's record in the 400-yard relay and demonstrating all-around superiority, a team composed of Olympic stars defeated a British aggregation in track and field events under a broiling sun at Stamford Bridge today 11 to 3.

The best of sportsmanship prevailed and most of the running events were hotly contested while in the field the Yanks had things all their own way.

The very first event of the afternoon produced the few world's records by the team composed of Charlie Paddock, Jackson Scholz, Chester Bowman and Al Leconey, who, running in the inside lane, negotiated the 400 yards in 37.45 seconds. Paddock got away to a flying start which the Britishers cut down until it was nip and tuck as Bowman and Carr got away on the third leg. Abrahams running anchor for the Britishers, hesitated badly in accepting the baton and Leconey went winging on alone to a new world's mark, winning by five yards.

### I. M. CAMPBELL FOR PUBLIC WEIGHER

I am cordially inviting the voters of precinct number one, to support me for the office of public weigher. And in offering for this place, I did so at the earnest solicitation of a number of farmers, men with whom I have come in contact from day to day for the past three years.

E. Y. Lee, Jr., accompanied by C. E. Hunt left Friday for Fort Worth where the former will enter the Mason's school. Mr. Hunt will return to Lubbock today.

Many a girl who can't cook can wield a wicked lipstick, and we can't say which tastes the best.

### REESE TATUM WAS MEETING VOTERS HERE SATURDAY

Reese Tatum, of Dalhart, district judge of the 69th judicial district of Texas, and who is making the race for associate justice of the court of civil appeals of the seventh supreme judicial district of Texas, was here Saturday meeting the voters of the county in interest of his campaign.

### BOMAR MOORE IS HERE TO MEET OLSON MON.

Bomar Moore, brother of John H. Moore of the Lubbock Buick Company, arrived in Lubbock Saturday from his home at Anson and is prepared to meet Chas. Olson, middleweight champion wrestler of Canada, at the community auditorium Monday evening.

### BRITISH FLYERS HOP OFF FOR PARAMUSHIRU

By United News.  
CORDOVA, Alaska, July 20 (Sunday)—Major A. S. N. MacLaren and his three companions hopped off in the British round the world plane at daybreak for Paramushiru, northernmost island in

the Kurile group, according to radio advices received here.

### FOOD SALE

On Saturday, July 26th, the Eva Rollins Missionary Society of the Canyon community will sell fried chicken, sandwiches, pies, doughnuts, ice cream, cakes and many other good things to eat beginning promptly at 11:00 o'clock a. m. and continuing throughout the day.

This sale will be conducted at the Rix Furniture Store. Come and eat with us.

### T. H. WEAR OPENS PIANO BUSINESS IN LUBBOCK

T. H. Wear and son, T. H. Jr. have contracted to represent the Baldwin Piano Company in this territory and have a nice stock of these splendid instruments on display at the Baker Furniture company, where they will be temporarily located.

### POLITICAL CONFUSION CONVERTED TO CHAOS

son, Wisconsin independent campaign manager, said LaFollette would wage the constructive campaign, while Wheeler carried on a crusade for clean government.

swung into action also. Shaver took over the reins from Cordell Hull and announced he would spend most of his time in Washington although the main headquarters would be maintained at New York and Chicago with two or three branches in the west and one in the south.

Wheeler's letter accepting the independent vice presidential nomination was written to Wm. M. Johnston, chairman of the conference for progressive political action.

The letter bristled with denunciation of the old parties and declared "this is a time when every

one who claims to be a progressive must show his colors."

"I regret exceedingly," Wheeler said, "that the democratic party in the recent convention in New York so completely lost sight of the fundamental principles of democracy and ignored the great economic issues of the present hour. It has wantonly abandoned a great opportunity for great public service that never before was so clearly within its reach and so certain to lead to success."

"The republican and democratic" he said in another paragraph of the letter "deliberately and solemnly chose the path of indifference toward, if not support of the privileged interests."

Many college boys looking for vacation jobs would make excellent cigarette demonstrators.

Mistaking the house next door for your own, late at night, is very hard on the reputation.

### U. S. FACES SERIOUS SITUATION IN BRAZIL

(Continued From Page 1.)  
Newspapers are forbidden to publish anything but the official announcement given out at the presidential palace.

Coffee Supply Affected.  
CHICAGO, July 18.—With but thirty days supply of coffee left in the warehouses of America, it is forecasted today, unless the revolution of South America is ended, prices would reach unheard-of peaks and the supply will eventually reach total exhaustion.

The area in conflict supplies 90 per cent of the coffee that America uses and shipments have ceased altogether since fighting began. Prices jumped today, wholesale, two cents a pound.

### COURT DISCHARGES CASE AGAINST MARTIN

TEARKANA, July 19.—John Martin, charged with slaying his brother-in-law, David Reed after a quarrel had been precipitated by Martin warning Reed not to beat his wife, Martin's sister, was discharged following a hearing in municipal court here today.

The court ruled the killing was justifiable. Mrs. Reed testified her husband was the aggressor and shot Martin through the neck. Her brother then raised to a sitting posture, and fired a bullet through Reed's heart, killing him instantly.

The tragedy occurred when Reed and his wife met Martin on a road near here last week.

### NEGROES JAILED IN CONNECTION WITH THEFT

Chas. Adams, alias Iron Jaw, and Addie Reed, negroes were arrested and lodged in the Lubbock county jail on charges of theft in connection with the raid that was made on Hodges' Brothers store Wednesday night of last week.

This brings the total number of negroes in the jail charged with theft in this connection to seven, and two negroes are lodged in the jail at Plainview charged with concealing stolen goods.

Deputy Sheriff Vernice Ford and Constable John McCulloch went to Plainview Friday where they recovered a number of shirts and other goods that had been taken in the raid on Hodges' store. The negroes had washed the shirts and other articles of clothing in an effort to make their identification impossible.

While it is believed that all the stolen goods have been returned, officers are still alert on this case and other arrests are expected to be made as a number of negroes who will serve as witnesses will perhaps be arrested in connection with this case.

In England an arrested murderer agreed to "tell everything about it" after he had "some tea." In America the salace of a cigarette would have been chosen in most cases.

A British expert who has been over the ground says that our oil supply will last only a generation. Perhaps that will be offered as an excuse for the eagerness that led to the bribing of Fall to get the lease of Teapot Dome.

Supt. J. F. Anton, of the Santa Fe, was here Saturday from his home at Slaton.

### FARMERS MEETING AT AMARILLO ON AUGUST 21

By International News Service. AMARILLO, July 19—Farmers of all parts of Texas, and portions of New Mexico, Oklahoma and Kansas will respond to the call to monster farmers' meeting scheduled to meet in Amarillo on August 21, according to the supporters of the conference including three farmers co-operative societies with headquarters here.

The proposed conference would have as its object the study of farm problems of the region and the dissemination of information concerning them. In calling the meeting, co-operative society officials declared there is vital need for such an organization and that no other agency is now fulfilling its functions. Agricultural authorities of national repute will address the meeting.

### BROKE HIS ARM AND SUES CITY OF CLEBURNE

International News Service. CLEBURNE, Texas, July 19—Because he broke his right arm while cranking the city automobile John Rogers, former city employe, today filed suit for ten thousand dollars against the city, asking nine thousand damages to his earning capacity and a thousand dollars pain and anguish damage.

### CONDUCTORS ENDORSE WISCONSIN SENATOR

By International News Service. CEDAR RAPIDS, Iowa, July 18—The Order of Railway Conductors through their board of directors, has announced that they have officially endorsed LaFollette for president. It is reported that the endorsement will be unanimous throughout the nation.

### FRIENDS HEAR FROM BOWEN IS IN EUROPE

S. K. Bynum, member of the congregation of the local Baptist Church, has just received a card from Rev. W. A. Bowen, pastor of the church, who together with his wife is making a tour of Europe, stating that they are enjoying their trip very much.

"We have found the climate much cooler in northern Europe than I expected. Religion is at a low ebb, with great need for laymen's work. We are on our way to Egypt, just sailing past Spain now only a few miles out from shore. Am anxious to get to Palestine," the card stated in part.

### BAPTIST ANNUAL ENCAMPMENT ON AUGUST 1ST TO 10TH

CANYON, Texas, July 19—The Panhandle Baptist Assembly will hold its annual encampment in the camp grounds on the Palo Duro Canyon twenty miles southeast of this city from August 1st to August 10th.

Dr. J. M. Carroll, Dr. W. W. Chancellor, Rev. G. W. Owens, Rev. R. A. Seranton, Rev. J. P. Boone, T. C. Gardner, G. S. Hopkins, and Miss Aline Ballard are among the prominent Texas Baptists who will appear on the assembly program.

### CANYON C. OF C. HOLDS A BIG OUTDOOR MEETING

CANYON, Texas, July 19—The Canyon Chamber of Commerce has adopted a novel plan of having its summer business meetings out of doors. A barbecue supper with swim-

ming for those who wish it is followed by a business session of the organization. Secretary Louis F. Hart finds this an effective way to get members of the chamber and their families out to the meetings.

According to President Sauer of the American Bar Association, "there are now pending in Congress nearly 100 proposals to amend the Constitution, practically all of them conceived, fostered and urged by highly organized bureaus or associations; virtually all of them strike at the fundamental principles of our Government, and many of them are fostered by the selfish interests of minority factions for purposes purely selfish." Obviously these "interests" work for Constitutional amendments rather than for laws because the latter can be all the power of these "bureaus or associations" is employed to prevent the awakening of the public to this menace to popular government.

Mr. and Mrs. J. C. Puett and children of Temple, have been visiting in the Ed Allen home on Ave. J. during the past several days. Mr. Puett is one of the leading business men of Temple and we are glad to learn that he is favorably impressed with Lubbock and commends the work that is being done toward building a great city here. He is a member of the Temple Country Club, is prominent in the service club work of that city and an all round good citizen and one whose favorable impression of this section will be willingly passed on to those with whom he will come in contact.

Mr. and Mrs. Payne Basham and his son, of the New Hope community, were transacting business and shopping in Lubbock Saturday.

If, true, as reported, that of 120 national weeklies published by negroes "only two have come out openly for the re-election of President Coolidge," there is more dis-

satisfaction in this quarter than usual in Presidential election years, and the negro vote can hardly be looked upon as quite the gilt-edged asset of the Republican party that it was during so many years.

"Reading a man's palm to determine his future isn't as sure a way as asking his neighbors."

## VICTORIES that build

### Firestone Leads on Speedway with Five Record Breakers

When the race driver selects his tires he does so realizing that his life and chances for success depend upon them. It is significant that all of the ten money winners in the Indianapolis race were Firestone shod. Firestone, using gum-dipping and other special processes, has developed tires to such a high degree of efficiency that at Indianapolis, May 30th, the following drivers broke the world's record for 500 miles over the brick track, making many rounds at over 100 miles per hour.

Driver	Time	Miles per hour
Joe Boyer—L. L. Corum	5:05:23:51	88.24
Earl Cooper	5:06:47:18	87.99
Jimmy Murphy	5:08:25:39	87.27
Harry Hartz	5:10:44:29	86.55
Bennett Hill	5:11:07:00	86.46

Leadership in Everyday Service Millions of motorists are profiting by the lengthened service of Firestone tires. Scores of unsolicited testimonials emphasize the long mileage Firestone Gum-Dipped Cords deliver—which builds leadership in service, safety and economy.

### Leadership on Cabs, Buses and Trucks

The largest taxicab companies in the five largest cities in the United States use Firestone Gum-Dipped Cords exclusively. One fleet alone, the Yellow Cab Co. of Chicago, uses over one-half million tire miles per day.

Firestone for years has been first to develop tires and rims complete which would meet the heavy trucking loads, great strains and demand for traction. By originating and carrying forward the Ship by Truck movement, and establishing Ship by Truck bureaus in all large cities, Firestone helped to speed up highway transportation and reduce costs.

### Balloon Tire Leadership

Firestone's latest contribution to motoring is the low air pressure or Balloon Tire. This, the original full-size Balloon, was made practical by the special Firestone Gum-Dipping process, insulating every fibre of each cord, adding great strength and stamina. Firestone has also simplified the application of full-size Balloon tires to your present car by designing a special unit consisting of tires, tubes, rims and spokes applied by any dealer at a very low cost.

### Leadership Against British Rubber Restriction Act

Attacking the unsound and uneconomic character of the British Rubber Restriction Act limiting the exportation of rubber from the Far East, Firestone was the one large tire manufacturer to take up the cause for the car owner. Soon after the agitation was started for America to produce rubber under its own control, the cost of crude rubber was reduced and tire prices brought back to normal.

### Dealer Leadership Through Tire Quality and Service

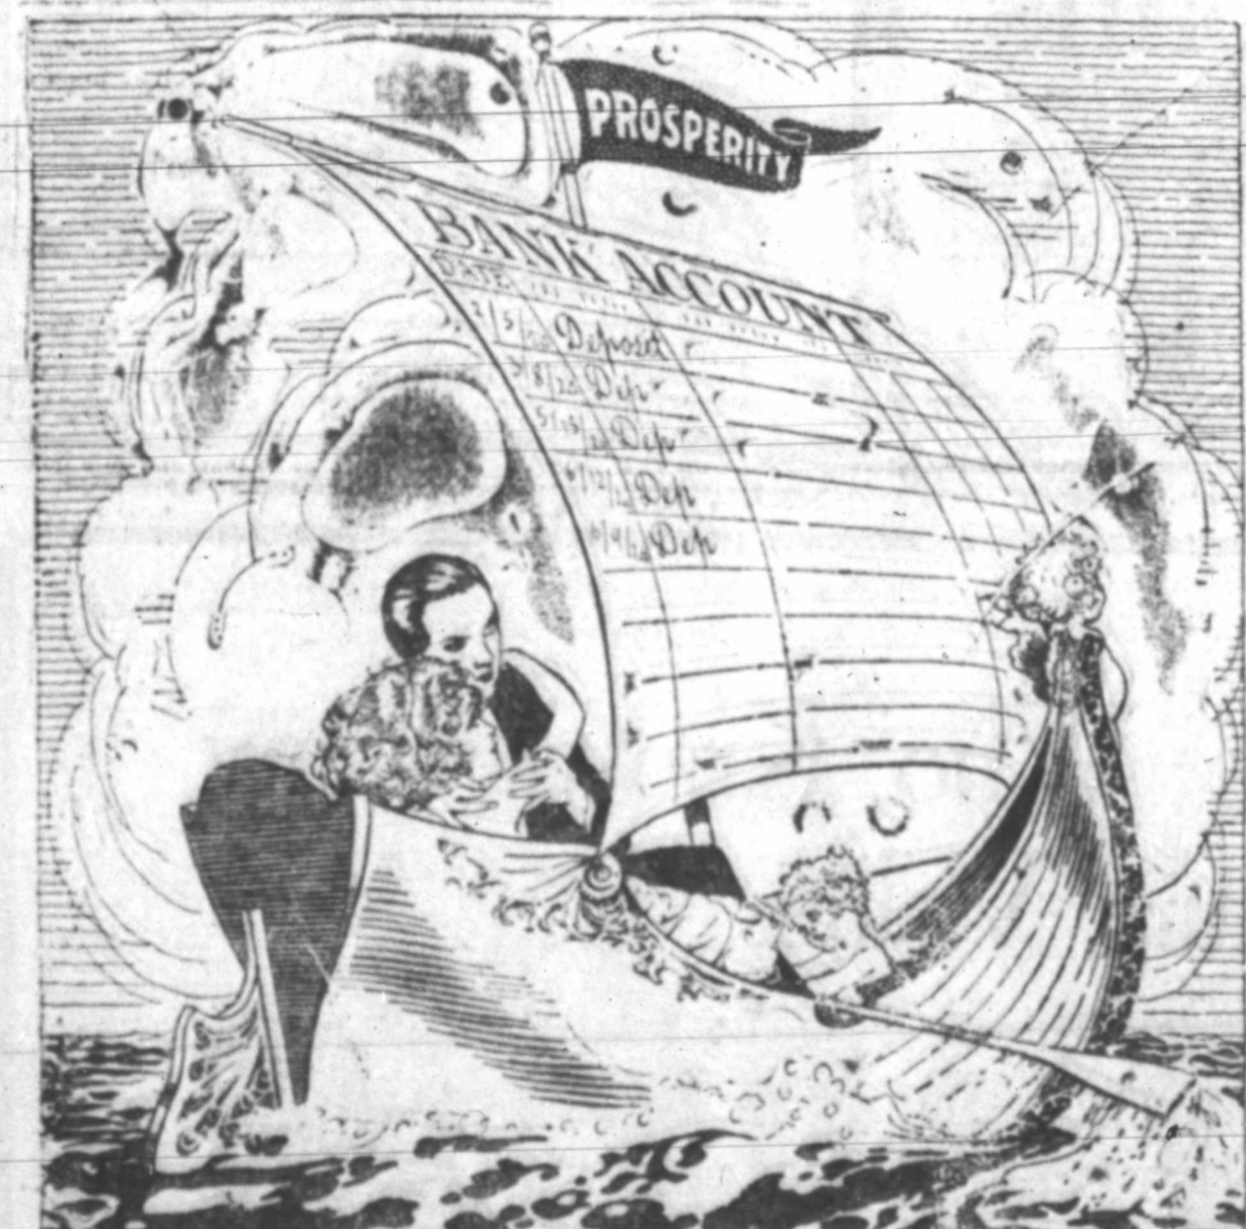

Through Firestone dealers you can obtain organized service and the soundest values on the market, whether you need a Ford 30 x 3 1/2 Fabric, a set of full-size Balloon Gum-Dipped Cords or a 10-inch truck tire.

REBELS GAIN IN FIGHTING IN SAO PAULO, BRAZIL

MUNICIPAL THEATRE & ESPLANADE HOTEL (Below) RAILWAY TERMINAL

Wireless messages indicate that the Sao Paulo, Brazil, rebels are gaining ascendancy in the bloody fighting in the world's greatest coffee city.

MANY FILE VOTES WITH THE COUNTY CLERK HERE

Fifty votes were filed at the office of County Clerk Herbert F. Stubbs up to Saturday morning at 10:15 o'clock, and it is the opinion of those who have been observing the keen interest that is being shown in the coming election that the total number of votes to be filed will exceed one hundred.

The votes are filed by voters who will be out of town on election day, and who want to make their influence felt at the polls.

Anyone contemplating taking a vacation trip or going out of town on business can call at the clerk's office and file their vote, which will be balloted just the same as the others who will be here to vote on election day.

This is a very appreciated arrangement and one that will make it possible for everyone to exercise their suffrage regardless of whether they will be here for the election or will be called out of town during that time.

KANSAS CANDIDATE FACES PECULIAR SITUATION

TOPEKA, Kas., July 19—Carl J. Peterson, state bank commissioner, filed as a primary candidate for governor early this year and now is seeking to have the supreme court erase his name from the books.

GREAT REVIVAL AT BROWNFIELD UNDER WAY

BROWNFIELD, July 19—Brownfield is in the midst of a great revival. Judge Frank Morris, general evangelist of the Methodist Episcopal church, South, and his singer Moody B. Cunningham, are conducting the meeting under a large tabernacle.

T. B. Roberts, of Slaton, was among the business visitors in Lubbock Saturday.

TYPHUS SITUATION IS GROWING ALARMING

AUSTIN, July 19—With typhus fever in Rio Grande City apparently increasing Major Charles Sinclair, in charge of the eighth corps area laboratories at San Antonio today was ordered to the border to aid in suppressing it.

Any man can choose to be a bachelor and take the consequences—except a prince who expects to wear a crown.

AIR COOLING SYSTEM NOT SO SIMPLE AFTER ALL

DALLAS, July 19—Air cooling machinery recently installed in a local theatre looks simple, but it isn't according to the manager.

First it takes the air from the sidewalk level, directly above the basement.

Then it washes the air and cools it to a temperature of 57. Then it whirls the air to the top of the theatre, where the cool air pours down over the audience, escaping into the basement and out into the street.

The cost of the installation averages \$27 for each seat.

H. P. Pickens and son, of Oklahoma City, are here visiting his sister, Mrs. W. R. Spencer and it was stated Saturday that he contemplates making his home here.

### SITUATION IN OKLAHOMA MINE AREA QUIET FOLLOWING OUTBREAK FRIDAY WHEN WORKERS WERE DIVEN FROM MINES

By United Press.  
**WILBURTON, Okla., July 19.**—Southeastern Oklahoma's mine "war" had apparently passed into history to night with the sporadic outbreak near Hartshorn yesterday when two hundred armed union miners forced 20 non-union workmen at the Kala-Inla mine to leave their post its only outstanding incident.

Rumored threats to put into effect the same tactics at the Hailey-Ola and Eastern Coal and Mining Co. mines near here today were never attempted. Both mines will continue to operate same scale—a non-union basis which was the bone of contention leading up to the Hartshorn incident company officials declared. Reports that some workmen at the Kala Inla mine had been warned by the raiders to remain out of the workings under threat of death could not be verified, officially.

Action of the union workers who have been idle for several months pending settlement of the wage scale dispute in the state coal fields, was ordered and without violence. Mine guards were disarmed and messengers dispatched to order the workers out of the mine. The demand was complied with without resistance and several of the non-union workers accompanied the union men back to Hartshorn where the arresting hand had been recruited.

Armed company guards were reinforced following the Hartshorn gesture and every precaution will be taken, mine officials said to prevent further demonstrative action in other parts of the mine field.

The single outbreak union workers said, was not directed against the lives of non-union workmen, but against application of the 1917 wage scale which is considerably below that agreed upon several months ago in a conference at Kansas City between union officials and operators of the Southwest. Refusal of some Oklahoma operators, it was charged to abide by the terms of the conference resulted in a general walkout by state miners last spring. Since that time approximately 6,000 state miners have been idle and many are in sore financial straits. Several operators recently began plans to re-open their mines virtually upon an "open shop" wage scale, union officials charged and pointed out the prevailing wage in the few mines operating under the system, approximating a third less than the rules accepted to the union.

The Hartshorn incident, operators and union workers indicated, was largely a gesture to hasten the long delayed wage scale dispute settlement for general resumption of mining before winter.

**ACCIDENTS ON DECREASE**  
 International News Service.  
**KANSAS CITY, Kas., July 19.**—A safety council report, issued this week shows seventeen fatal accidents during the month of June, making ninety-eight since January 1. This is a decrease of seven under June, 1923.

Mayor H. C. Jones, of Slaton, was among the business visitors to Lubbock Saturday.

### BABE ADAMS HEARS THE CALL OF TIME

By United Press.  
**PITTSBURGH, Pa., July 19.**—Babe Adams, Pirate veteran pitcher, has returned to his home in Bethany, Mo., for a complete rest in the hopes that he might recover the old skill that made him the hero of the 1909 world series.

Several weeks ago, Adams who is nearing 45 suddenly quit in the midst of a game he was pitching, and with tears in his eyes told his manager and players who gathered about him that he was through—that his arm had gone back on him.

The Pirate management spared nothing in getting the best professional treatment for him but this seemed to help him little and as a final resort, he was ordered to his home. He was told to take a complete rest, not to touch a baseball, and that his salary would go on just the same.

In a few weeks Adams will be recalled to try out his arm. If the treatment has again failed, Adams has indicated he will ask for his unconditional release. But Adams himself is optimistic and confides to his friends that he thinks his arm will be ready for use before the season closes.

The Pirate officials refuse to discuss Adams' trouble but admit he was sent home on advice of specialists. The veteran has an aggravated case of pyorrhea and this is being treated also.

**WARNING ISSUED AGAINST CORAL SNAKE**  
 By United Press.  
**TUCSON, Ariz., July 19.**—Beware the Coral snake. His, or her bite will kill more quickly than that of any reptile in the southwest, even the rattlesnake, according to Prof. Chas. T. Vorpes, head of the department of biology at the University of Arizona, who told his students all about snakes in a lecture.

"The coral snake has the deadliest poison of any reptile in the southwest and is perhaps the most dangerous and poisonous snake of any on the North American continent," the professor said. "The coral the rattlesnake and the annulated snake, are the only poisonous types in this section," the professor added. "And they are seldom to be seen, legends to the contrary. They glide away whenever any one approaches."

Despite popular opinion to the contrary, the Gila Monster has poison less dangerous than that of the rattlesnake, according to the professor.

Velton Spikes and family are making preparations to leave for Denver, Colorado, where they will spend two weeks vacation.

**THE BROWNFIELD PICNIC WAS A GREAT SUCCESS**  
 BROWNFIELD, July 19.—The two days' picnic at Brownfield closed Friday. Dinner was served each day and it is estimated from the number of plates used that 10,000 people were fed during the period.

A rodeo, band concerts, ball games and public speaking by different candidates were staged for the entertainment of the crowd.

The American Legion had charge of the tables and handled the matter in their usual efficient way.

**THREE ARE BURNED WHEN HOME IS DESTROYED BY FIRE**  
 By International News Service.  
**IRONTOWN, Pa., July 18.**—Three children, Amy, twelve; Lindsay, ten; and Cornelia, eight; children of Albert Barber, here were burned to death when fire destroyed their home here today. Two other children were saved although the father, mother and surviving children are badly burned.

**KILLS WOMAN AND THEN SHOTS HIMSELF**  
 By International News Service.  
**HUTCHINSON, Kans., July 19.**—Andy Parsons, thirty-five years of age is in a serious condition in a hospital here with a bullet in his brain, charged with the shooting and killing of Mrs. Bessie Rowe, age twenty-six, on the street when she refused to stop and talk to him. After shooting once the girl fell to the sidewalk, but he sent another bullet into her body, then shot himself. He ran a mile after he had put a bullet through his head before he dropped.

Parsons is said to have caused the divorce of Mr. and Mrs. Rowe.

It is not true that one of the presidential candidates has signed up Houdini to get him out of foolish statements.

## Early Days on The Plains

By J. J. DILLARD

The interest created in local and state politics reminds me that in 1910, fourteen years ago the writer made the race for representatives of the 101st district, composed of the counties of Lubbock, Crosby, Kent, Garza, Lynn, Terry, Yoakum, Gaines, Dawson, Borden, Scurry, Fisher, Nolan, Mitchell, Howard, Martin, Andrews, Glasscock, Midland, Ector, Upton, Crane, Ward, Loving, Winkler, Hockley and Cochran, totalling twenty seven counties in number, with more than seventeen thousand qualified voters, and containing approximately 24,000 square miles, or more than three times the size of the state of Massachusetts which has a population of four hundred and sixty to each square mile, compared with less than two persons to the square mile in the district which I was seeking to represent. I was opposed by T. J. O'Donnell of Tahoka and Judge Judkin of Odessa.

When the ballots were counted I had a plurality over Judkin, my nearest opponent of more than one thousand votes.

In due time I received my certificate of election and on January 10, 1911 in the legislative hall in the city of Austin, Texas, and after a roll call of the counties in alphabetical order, each representative answering to his name, and a quorum present the oath prescribed by the constitution was administered to myself and the other members of the Thirty-second Legislature.

I served on many important committees and was the author of the bill creating the seventy-first Judicial District of Texas. I was the author of many other bills which became laws, of which I will not take the space to discuss. However, I recall I was the author of the bill creating the seventh court of Civil Appeals located at Amarillo. I was unusually successful, having been fortunate in endorsing Sam Rayburn for Speaker of the House, which was fortunate indeed, as he conferred many favors on me which placed me in a position to accomplish much more than I could have had I lost my candidate for speakership.

Finally, the bill creating the Seventh Court of Civil Appeals was reported out of the committee and was placed on the calendar. In due

time it was called for consideration by the house. I arranged with the speaker the order for discussion by various members who favored the bill and arranged it so that I would be recognized and close the argument. The speaker announced that "Mr. Dillard, the gentleman from Lubbock was recognized."

I arose and with much timidity and spoke as follows: "Mr. Speaker and fellow Representatives: It gives me much pleasure to stand before this august body of learned men who compose one branch of the law making body of the largest and greatest state of any state in the United States, in a building, the largest law making building of any state in the United States. I am proud of the distinction of being a representative of the people in the largest state in the Union, from the largest legislative district in the state."

"My people deserve and demand recognition. They have sent you an active man. They have sent you a man who is tall, thin and angular, who in his anxiety to be a good citizen and keep posted on the many things that transpire in this great state, has been kept constantly on the move and run. As a lawyer attend the court at Tahoka, a distance of eight hundred miles to the eastward; next in attendance at Galveston, six hundred miles to the southeast and then to Austin and San Antonio, more than five hundred miles to the south, which made me gaunt, hungry person that I am, caused by constant travel over this vast expanse of the Lone Star State. We demand recognition. Our demand must and will be received at your hands."

"We are nearer the various courts in New Mexico, Kansas and Oklahoma than we are in this state. We are two hundred miles nearer the Agricultural and Mechanical College at Kansas Oklahoma and New Mexico than the A. and M. of Texas. My district is larger than the states of Massachusetts, Rhode Island and New Jersey combined."

"My district is one of the greatest stock raising districts in the commonwealth. To illustrate its greatness, it's vastness and immensity, I will say my district oc-

cupies all of Texas except a small portion in East Texas where negroes are colonized, and another small portion near Brownsville inhabited by Mexicans. My district comprises all that portion north of the Rio Grande, the only dusty river in the world, also the only one with perhaps the possible exception of the Trinity which is navigable for mud cats and pedestrians. My district is bounded on the north by twenty-five or thirty states no larger than my district. On the east by all of the oceans except the Pacific and on the south by the Gulf of Mexico and South America, and on the west by the Pacific ocean.

"If my district was cut off from the rest of the world it would float out into the Gulf of Mexico as it rests upon a vast subterranean sea of fresh water. My district is so large that the people in Brownsville call the people of Lubbock Yankees and citizens in Pecos sneer at the citizens of Amarillo as being duds from the east."

"It is one hundred and fifty miles nearer Lubbock to Texas than it is from Chicago to New York. Amarillo is nearer Kansas City than it is Brownsville."

"The chief occupation of my district is trying to keep from making all the money in the world. The chief pursuit of the people in my district was formerly chasing Indians and buffaloes but now it is land buyers and steer buyers. My district cut loose from the rest of the State of Texas would make the balance of the state look like a three legged Boston Terrier. The voters of my district are so proud of their district and their tall representative, dubbed "The Tall Spearhead of the Plains" that they cannot sleep at night. If a voter's head in my district should be opened the map of his district would be found photographed on his brain. This also is true of his heart. Unless your front gate is eighteen miles from your front door you do not belong to society in my part of Texas."

"One of my constituents' front gate is one hundred and fifty miles from his front door and he is thinking of moving his house back so that he will not be annoyed by

passing automobile joy riders.

"Other voters in my district have mountain ranges and rivers on their ranches. One has forty miles of navigable river on his farm. If the proportion of cultivated land in my district was in cultivation, as it is in Illinois, the crop it would yield would equal forty-seven other states. My district has enough land to supply every man, woman and child in the world with a tract of five feet by twenty feet and have enough left over for the armies of the world to march around the border five abreast. If all the alfalfa grown in my district was baled and built into a stairway it would reach to the pearly gates.

"If all the hogs in my district were made into one big hog he would be able to dig up the Panama Canal in three roots.

"If all the steers in my district were one big steer he could stand with his front feet in the Hudson Bay and his hind feet in the Pacific ocean and with his tail sprinkle the streets of San Francisco. If all the mules and horses in my district were made into one big mule, he could stand with his front feet in the Arctic ocean and with his hind feet kick all the water out of the Gulf of Mexico.

"In closing gentlemen the citizenship of my district are

"Men of Mark from old Missouri, Men of daring from Kentucky, Tennessee and Louisiana, Men of many states and races, Bringing wives and children with them

Followed up the wooded valleys, Spread across the rolling prairies, Raising homes and reaping harvests, Rude the toil that tried their patience, Fierce the fights that proved their courage, Rough the stone and tough the timber, Out of which they built their order, Yet they never failed or faltered, And the instance of their swarming Made them one and kept them working

Till their toil was crowned with triumph, And the country of the Plains Was the fertile land of Texas."

(A vote was called and the bill carried. They saw the need of it by an ironical and largely exaggerated illustration.)

(To Be Continued)

## TROOPS MAKING PROGRESS AT SAO PAULO

WASHINGTON, July 19.—Government troops are making progress in some sectors and are planning a general movement against the revolutionaries at Sao Paulo, the Brazilian embassy here has been informed, while a cable to the state department declared that the revolt appears "doomed" after a change in the situation.

The message to the state department came from Santos, dated Thursday.

The federal troops "are continuing an important maneuver which is in operation along the whole front for a decisive action," a communique received by the embassy Friday stated. It was dated midnight Thursday.

"Our left wing has occupied the barracks of the state military police in Sao Paulo, taking 30 prisoners," it said. "On the right wing we have made progress, capturing machine guns, and some ammunition."

A communique dated Thursday stated:

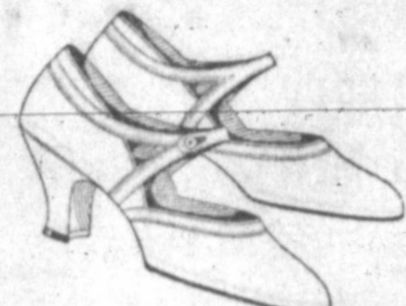

"Our troops maintain the positions which they had occupied as a result of maneuvers which they have just carried out with entire success. It

is confirmed by authoritative information received from various places that the rebels are daily losing men who are withdrawing to the interior of the state of Sao Paulo and who are captured by the local authorities."

In canvassing the situation here Friday, in event it threatens the life and property of American citizens, it was learned that the navy has four old light cruisers in the Caribbean which could be moved to Santos very quickly.

Some people can hang around bees and not get stung, but you can't hang around some people and not get stung.

### VOCATIONAL EDUCATION

By PHEBE K. WARNER

Isn't it strange that the two greatest missions in all this world have always been looked upon as calling for no special knowledge or training? And these two greatest missions are Home Making and Agriculture. The very foundation of life and living. But how many people, men or women, have ever been intelligently trained for either.

As recently as 1905 only a small per cent of our educators themselves appreciated the need of vocational education. And yet somebody always had to work for everybody's living. Work, physical, manual labor has been the basis of all civilization. Wonder where our nation and the whole world would be today if only vocational training had had as much thought and time and mental energy and taxation spent on it as has been spent on the study of war and history? Do you suppose teaching war for 6,000 years has had any influence on the waging of wars? What causes war in its final analysis? And on the other hand what brings peace to you? What brings peace to a community? What brings peace to a whole state and nation? And just what do you think will bring peace to the whole world?

Do you think the action of our Protestant churches a few days ago against war will bring peace? Or do you think that was merely a negative act? It seems to me that would be the greatest inducement to get a lot more slackers into our churches and that is the greatest trouble with the church now. Too many community and church slackers. But just let it get out that certain Protestant churches are never going to war again and you won't need a summer revival to gather in the sheaves. Registering sentiment will never amount to anything unless we every one get back of our sentiment and work with all our might to substitute something better than war for the youth of our nation. We've got to get rid of the cause of war before we lay down our arms against it. And the greatest cause of strife and discontent and jealousy that leads to war is ignorance. Ignorance in all its multiplied forms. But especially our lack of knowledge in how to live and how to make a living.

And that is what vocational education means. How to make a home. How to raise a crop. How to cook a meal in the best way to give health and strength to our bodies. How to raise better poultry. How to make butter and how to market the millions of dollars worth of food that go to waste

every year on the farms of our nation. How to raise the standard of a bunch of hogs. How to produce infertile eggs and command a better price on the market. How to build up a dairy herd in the whole community until every farmer will receive as much or more cash every time as he goes to town as he spends while he is there. Sure it is possible if the whole community will work together to make it possible. Our rural communities have not yet learned the first lesson in the mutual value of co-operative marketing and not only co-operative production. Some day every community in this state and every other state will work together like one big family to make more money for all. That is one of the features of vocational education.

But up until as late as 1910 the idea of vocational training for either the boys or the girls on the farm was a subject of universal debate. And yet every state had a penitentiary or two, every county almost had a poor house and a jail, less than one-third of all the people lived in their own homes, and the whole country was full of disease, poverty, crime and discontent. Every state had its asylums and its reform schools and every year these institutions thrived and multiplied in numbers and the people would gladly submit to more taxation to provide bigger buildings to house and feed our homeless, helpless and hopeless citizens.

Yes, Sir! When a man or a woman is down and out, when they have been reduced to a pauper, a lunatic or a criminal, it's time to do something for them. And not only them but it is time to protect ourselves from them. They're dangerous. So we build more poor houses and jails and penitentiaries and reform schools and asylums to take care of our unfortunate fellowmen and women when all hope has been crushed out of their lives. But the strangest thing of all is that most folks object a lot less to being taxed to support such institutions to house and feed our homeless, helpless and hopeless citizens than they do to being taxed for education that would do more to prevent such misery and unhappiness than anything else we could do.

How to make home life more desirable has had little thought, and less training. As proof of this statement Texas stands today at the head of the world in the divorce courts. The United States of America, the land of greatest religious freedom, the richest nation on the globe, and supposed to be the most intelligent, leads the world in this

divorce courts and Texas leads the nation. Does Texas need to teach the science and the beauty and the joy and the economics of home-making to the rising generation of girls? And Texas is today the greatest agricultural state in the union. And intelligently handled Texas will always stand at the head of the nation in agriculture because it has more room for it. It has the greatest diversity of products and possibilities.

The Smith-Hughes law, providing Federal aid to the different states for the promotion of vocational education was passed by the Sixty-fourth Congress, signed by President Wilson on February 23, 1917, and became effective as a law on July 1, 1917. In all his great and useful life do you think President Wilson signed a law that is destined to bring more peace and prosperity to all the generations of the future than the signing of the law providing vocational education in our public schools?

As proof of Texas' appreciation of this great step forward in the education of our boys and girls for the duties of the home and the farm, 82 of her 253 counties have already introduced vocational training into their schools. There are at this time 130 schools in Texas giving vocational training in some form. Is your county and your school among the list?

### THREE FORT WORTH MEN ARE BURIED ALIVE

FORT WORTH, July 19.—Three workers, W. B. Foster, V. O. Olson and John Fuller, who were buried beneath ten feet of debris when walls of ditches they were digging caved in, were reported improving today, although they are yet in a very serious condition.

The men were totally buried five minutes before they could be extracted, and were all unconscious when removed from under the dirt.

### GIRLS BELIEVED VICTIM FAKE WEDDINGS

By United News.

LOS ANGELES, July 19.—A score of girls throughout Southern California are believed to have been the victims of fake marriages arranged and carried out by John B. Clarke, self-styled "master of occult wisdom."

Arrested when passionately declaring his love for Miss Cecil Duncan, police operative, the 47-year-old millionaire insists there was nothing wrong in his acts. "Miss Duncan is now my wife. She wrote out the agreement on both sides of a long scroll. She wrote 'you're welcome to any and all favors' or words to that effect."

Such is his defense. But police declare that his love making has been aided by unscrupulous methods in preying upon stenographers seeking employment. Prominent women whose names are withheld are also involved, they said. They have a bogus marriage certificate, which under the ritual of the "church of Cosmic truth" claims special dispensations from the state of California. They claim his love adventures have been in wholesale quantities.

At least one girl seems to have bettered him at his own game. Miss Bernadette Barker, according to Clark's own statement was taken almost to the "married state" but she bolted before the final steps.

There should be a good newspaper coming regularly into every Texas home. This is the challenge of Secretary R. T. Ellis, of the Texas State Teachers' Association, who declares that the good American newspaper is one of the greatest of all educational forces. Keeping up with the march of events, and knowing what the rest of the world is doing and thinking, will

says the educator, unite the people for action in all crises.

The rapid progress of Texas during the past few years is largely credited by Ellis to the newspapers that have put the needs of the state before the people and pointed out the way of advance. He has repeatedly called on the school men of the state to co-operate fully with the publishers in telling the people

the facts about schools and other civic units.

**GIRL IS GREAT-AUNT AT THE AGE OF ELEVEN YEARS**

DALLAS, July 19.—Christine Gray, 11 years old, has the distinction of being a great aunt.

She has a two weeks' old great nephew, the son of Mr. and Mrs. Walbaum, of Dallas. Mrs. Walbaum who is twenty years old, is Christine's niece by virtue of being the daughter of Christine's elder sister, Mrs. E. W. Phillips, of Texarkana. The baby's grandmother is Mrs. Tom Gray, 57, who has reared eight children and has 22 grandchildren.

# A Page of Special Interest to the Farmers

Articles and Local News About South Plains Farmers; Prepared by Welton Winn, a Practical Farmer

## Farmers Of This Section Should Give More Thought To Wheat Culture

We here submit an item of very great importance on wheat growing from Mr. H. M. Bainer. We think this article is of very great importance we have known Mr. Bainer personally for more than eight years, and he is not only a scientific man, but a practical man who stands high with the Santa Fe Railroad people. He was formerly located at Amarillo but is now at Kansas City. We regard Mr. Bainer as good authority on wheat growing and want to call special attention to what he says in regard to double listing. It is usually wiser and more profitable to pack the ground immediately after the plow with some sort of packer, if it is nothing more than a disk harrow with the blades set straight. This compact seedbed causes early germination of the wheat, immediate growth and a good stand, all of which are necessary to insure good quality and a big yield.

Early listing for what is especially desirable, where rainfall is limited, and frequently produces better yields than other methods. Listing covers the ground quickly, kills the weeds and saves moisture. For best results, it pays to double list and level the ground early.

"Successful wheat growers find, if time does not permit early plowing or listing, that it pays to disk immediately after the binder or header; this destroys the weeds and volunteer wheat, saves moisture and leaves the soil in condition to plow at a convenient time later."

We are submitting some more testimony in regard to the importance of growing more wheat in this county and especially do we call attention to the yield of 40 bushels per acre on the farm cultivated by Mr. Phillips. Land that now has a poor stand of cotton or other crops we think could with much profit be cultivated through the summer and have it ready for early wheat this fall. His system of wheat growing has never failed on these plains and there is no reason to our way of thinking why any farmer should hesitate to try it this fall, especially when the late cotton is so very doubtful. We want to call special attention to the Snyder yield of wheat which is the best we have ever known anywhere. Why not get a start of this wonderful variety and try some wheat this fall.

ly proven that land prepared in July will produce from 2 to 7 bushels more of wheat per acre than and the same kind of work done in September.

"Early plowing destroys weeds which if allowed to grow, will use up the available plant food and moisture. It is claimed on good authority that one big weed in its development will use a barrel of water. Early plowing gives the land time to settle, which is a necessary requirement for successful wheat growing. Even though the land may have considerable time to settle, it is usually wiser and more profitable to pack the ground immediately after the plow with some sort of packer, if it is nothing more than a disk harrow with the blades set straight. This compact seedbed causes early germination of the wheat, immediate growth and a good stand, all of which are necessary to insure good quality and a big yield.

Early listing for what is especially desirable, where rainfall is limited, and frequently produces better yields than other methods. Listing covers the ground quickly, kills the weeds and saves moisture. For best results, it pays to double list and level the ground early.

"Successful wheat growers find, if time does not permit early plowing or listing, that it pays to disk immediately after the binder or header; this destroys the weeds and volunteer wheat, saves moisture and leaves the soil in condition to plow at a convenient time later."

We are submitting some more testimony in regard to the importance of growing more wheat in this county and especially do we call attention to the yield of 40 bushels per acre on the farm cultivated by Mr. Phillips. We want to call special attention to the Snyder yield of wheat which is the best we have ever known anywhere. Why not get a start of this wonderful variety and try some wheat this fall.

**Uses Unique "Combine."**  
A. J. George harvested the first wheat in this county at Tula this season. He is using a header in connection with a caterpillar self-propelling combine harvester, which cuts a strip thirty-eight feet wide. This "combine" is attracting much attention, as it is the only self-propelled combine in the county using a header. Mr. George cuts from eighty to 100 acres a day.—Tula Herald.

**Wheat Makes 26 Bushels.**  
The first wheat came to Canyon Monday, being brought by W. G. Rose, who was running his combine. The wheat was turning out 26 bushels to the acre and is reported to be of very fine quality.—Canyon News.

**Wheat is Weighing Very Heavy.**  
County Agent L. T. Hunter reports that he recently made a visit to the wheat field of Frank Hines in the eastern part of this county and there found the harvest in full swing. The thresher was running and the wheat was being hauled to the elevator. Inquiring as to the turnout, Mr. Hunter was told that different wagon loads were turning out from 63 to 65 pounds to the bushel. This is a very high record, for wheat that weighs 60 pounds is No. 1 and is considered quite good. Mr. Hines' wheat is what is known as the blue stem Mediterranean and is considered well adapted to this country.—Childress Post.

**The Millennium Year.**  
We took a stroll down in the south part of the city Monday and visited the small farm of Mr. D. C. Riley near the south limits of the city. Mr. Riley is one of those careful farmers who is convinced that it does not pay to let any kind of weeds take up the moisture of the land from the growing crops. We did not see a single weed in the 3 acre farm. Most of the farm is irrigated by having pipe laid under the ground at a safe depth. Mr. Riley has most of the place in fruit trees and the nice thing about it was they are all in fine healthy condition, which proves that if the fruit trees of these plains are kept watered they are long-lived. Those trees seem to have been there along time, however. Mr. Riley has only been there since the first of the year.

In that splendid orchard were peaches, pears, apricots, apples, plums and cherries. The cherries were very fine but had ripened and was gone at the time of our visit. These trees looked a little too close together for this country, but Mr. Riley had vegetables, melons and cantaloupes all growing between the trees. The abundance of water was the secret of the whole matter. We have not seen so much stuff growing anywhere on so small piece of land as we looked over this splendid plot of land with all the things growing so nicely we thought of the prophecy where it is said streams will break out in the desert and dry land shall bloom as the Garden of Eden. As we learn more of the true principles of plant life and plant growth we will find that it does not take so much territory for us to make all we need to live on.

**Fires in the Wheat Fields.**  
Wheat fires have occurred in several fields during the past week, doing considerable damage, and threatening thousands of acres of grain. Various causes have been attributed to the blaze. One of the most serious fires which took place Saturday afternoon about five o'clock in the L. C. McDonald farm seven miles southeast of Floydada, caught from the exhaust of an engine which was being used to pull a combine. A call was sent to Floydada and a number of men went by auto and aided in extinguishing the blaze. Between 20 and 25 acres were destroyed. About 30 acres of wheat were destroyed Tuesday about eleven o'clock in the farm of A. J. Smith, who lives one mile south of Muncy station. The fire was of unknown origin, and was discovered in the field behind the combine that cut the wheat.

**Barley Makes 19 Bushels.**  
Geo. J. Graves, living six miles north of the city, has threshed his barley, which made 19 bushels to the acre.—Canyon News.

the reasons the farm is so clear of weeds.

**Our Visit Out North.**  
Wednesday evening we took a trip out north to the farm operated by Mr. A. H. Ferrell. He has only a small farm but has quite a lot of things growing on the place. Among other things was a nice plot of corn. He will soon have some fine roasting ears for the market. Mr. Ferrell did not take our advice about the wide rows for corn and now sees his mistake. While he will make some corn anyway if his corn was now out in wide rows, say 6 feet apart he would be sure of a good crop without any more rain. Mr. Ferrell has some very nice cotton about the largest we have seen. He also has the nicest melon patch we have seen anywhere and will soon be supplying the home market with home-grown melons.

These crops were growing right on the bank of the draw just below the club ground where there is water enough to waste to irrigate his entire crop if it was only shaped up for that purpose. We should study to find ways to conserve all our water and there are some other places near the city where there is a nice lot of water going to waste that might be used to great advantage to produce some special vegetable crops for the city which things are grown elsewhere and shipped in and brought from neighboring towns.

## Catholics Building Church At Canyon

CANYON, Texas, July 19.—A contract was awarded last Thursday to an Amarillo man for the erection of a new Roman Catholic Church in Canyon, at the corner of 6th Avenue and 21st street. The church will be a mission design built of stucco with a tile roof. Work will begin within the next week.

## Texas Delegates Of Educational Assn Elect Officers

AUSTIN, July 19.—Texas delegates to the National Education Association convention in Washington, D. C., on its most recent meeting elected Miss Catherine Gorbett, of El Paso, president; Superintendent of Instruction S. M. N. Marrs, secretary, and F. G. Jones, of Denton, reporter. Jones in preparing his report declared the Texas representation at the conference was exceptionally good. Miss Mamie Bastian of Houston, was elected as constitutional representative to cast the Texas votes at the convention; Miss Ora Johnson of San Antonio was made credentials committee woman; Miss Empress Arrington of El Paso to serve on resolutions committee and W. A. James of Galveston named to represent the state on the Necrology committee.

All delegates at large from Texas, as appointed by President G. O. Clough of the Texas State Teachers Association, were present including Mrs. S. M. N. Marrs, Austin; Miss Josie Jaynes, Hughes Springs; Miss Mary Belle McKenzie, San Antonio; Julius Dorsey, Dalais; Miss Ida Nusham, Houston and F. G. Jones. Delegates present as representatives of various city teacher organizations included W. A. James, Galveston; F. M. Black and Miss Mamie Bastian, Houston; Miss Leah Dennis, Miss Clyde Duncan, Mrs. Margaret Nutter, Miss Empress Arrington and Mrs. Sadie Garrett of El Paso; Miss Eola Hunter, Fort Worth; Miss Pearl Tunnell, Dallas and Miss Ora Johnson, San Antonio. Other Texans registering but not representing any particular group included, C. H. Winters, Texas A. & M. College; M. Garrett and

Miss Myra C. Winkler, El Paso; S. J. Smith, Mineral Wells; Miss Violet Pheil and Miss Margaret Higgins, San Antonio; Mr. and Mrs. E. P. Wright, of Fairbairn; A. D. Phillips, Austin; Miss Louise Lancaster, Miss Ollie Stratton and Miss Iva Chapman, San Antonio.

## CHICAGO U. ADDS MEAT PACKING COURSE

CHICAGO, July 19.—Meat packing at last has been added to the list of learned professions. The erudite faculty of the University of Chicago has decided that a meat packer is entitled to academic standing and has created a course for embryo packers with the degree of doctor of philosophy as the goal. The Chicago Educational Institution thus becomes the first in the United States and possibly in the world, to decide that learning to cut up hogs and steers and preserve what is left is a vocation worthy of the cap and gown. An announcement of the new course for persons intending to enter the packing industry or those already in it, said that the idea was an outgrowth of the correspondence and evening school courses.

The course is a four year one, with work on the campus and in the packing houses. By the end of the second year students will become first class butchers and will be able to distinguish between a porterhouse steak and a hoof. In addition, the student will take economics, chemistry, English physics and geography during the first two years. Head of the various packing companies will lecture to the students during the third and fourth years. They will be taught methods of packing and house financing. There will be a post graduate course. That will be for students who, having learned all they can about slicing up pigs, cows, goats and lambs into cuts that

will entice the shopper and what can be made of the left over want to get away from the stock yards small and play around a little while longer. It will be altogether a lecture course, and those who have any money left by the time they get thru the regular course, will be privileged to become enrolled in the post-graduate school.

## COLLEGE TO OFFER COURSE IN FEEDING

CANYON, Texas, July 19.—There will be a course offered in feeding livestock the second term at the West Texas State Teachers' College. This course has proved very interesting to many teachers in the past. It has for its object giving the student a better understanding of the scientific methods used in feeding horses, cattle, hogs and poultry. Special emphasis is given to the feeding of dairy cattle because of the demand upon the teacher in the small town or rural community for information about feeding the home milk cow. Mr. Phillips, in speaking about this course, stated that it was not only one of the most popular courses given in the department, but that it offered an opportunity to help the student save money, because every student who had experimented in feeding his own cow found that he could, by placing her on an economical balanced ration, reduce the usual cost of feeds from one-half to one-third, and at the same time retain or increase her previous milk production. Girls as well as boys will be eligible for this course.

## Wealthy Oil Man Is Charged With Fraud

GALVESTON, July 18.—The preliminary hearing of Ralph Dudley, widely known wealthy oil man of Fort Worth, is to be held today. Dudley is charged with the use of the United States mails, in a fraudulent oil promotion. His present bond is \$15,000. Fish statistics show every fish weighing over 60,000 pounds has escaped nine times this summer.

### THE PASSING DAY

By WILL H. MAYES, Department of Journalism, University of Texas

Automobile travel is getting decidedly dangerous. The danger is due to reckless driving and as the roads improve the driving becomes more reckless. At least half of the people on the roads seem to have the speed mania and a large proportion of these have little regard for the rights of others. Some method is going to have to be devised for better regulation of road and street traffic and more severe punishment will have to be given those whose carelessness results in accidents. In the towns and cities much of the trouble comes from over-crowding the front seat of cars, this interfering with the free action of the driver. When a car is crowded with young people they seem to forget that there is any one else on the road and they act as though they were out by themselves on a picnic.

Many Texas towns and communities will hold fairs next fall, featuring county and community products. While it is good to get together the best things grown and to award premiums of sufficient size to justify competitors in gathering and making the exhibits, the competition for prizes is not the best thing coming from such fairs. Local fairs are valuable in almost exact proportion to the good feeling they create among the people. They afford the people opportunity to get together, talk things over, know each other, and profit by the exchange of experiences. Every local fair should have a hospitality committee working over time.

The best compliment yet paid Dr. W. M. W. Splawn, the newly elected president of the University of Texas

is, that he likes people and is interested in them. That being true, he is going to make a great success of his administration of University affairs, for he has the background of a broad education and is a masterly business executive. Although his is perhaps the most responsible position in the gift of the people of Texas, there is no reason why a University president should not act as though he were conferring a favor on the people in serving them. Dr. Splawn told a reporter that he felt humbled by the greatness of the task. A newspaper man whom I met at Amarillo, in speaking of the business men of a certain town, said that they were dead from their shoulders up. Since then a physician told me that most persons begin to die in their heads and that if the head can be kept active the body will respond in most cases. If your business is not what it should be, if you are just marking time in whatever you are doing, if you find that you haven't the energy or the will to hustle like the younger people about you or like the people of other places, then it might be well to have your head examined to see if it is either dead or dying. I have heard of people that are still walking around, but that so far as any progress is concerned, are really dead.

This column is published in about eighty Texas newspapers with a combined circulation of more than a quarter of a million copies and is seen, if not read, by more than a half million persons each week. Its purpose is to get people to thinking in a way to do them some good, and through them to start others to thinking. That kind of an undertaking involves much responsibility and is certain to be a failure unless the writer thinks right. He tries to keep his brain in good working order, but often thinks that it misses fire. If it is altogether probable that many readers think so too. If you are one of the many and have any suggestions to offer, write them out in care of this paper and they will be forwarded to me. I can't promise to follow every suggestion offered, but I do want to be of greater service to a greater number of persons. If you have any criticisms to make of "The Passing Day" or any suggestions for improving the column, let me have them.

White politics is taboed in this

### A WOMAN ROUTED THREE BANDITS; ESCAPE UNINJURED

By International News Service.  
SEALY, Texas, July 19.—Single handed, Mrs. Paul Schmidt routed three bandits, one negro and two Mexicans, who attempted to enter her home during the absence of her husband, resulting in Early Brandenburg, 19, the negro, sustaining possible fatal wounds and the apprehension of Mexicans.

When Mrs. Schmidt observed the men creeping about the house shortly before midnight, she seized a revolver and when the negro was tampering with one of the windows, she fired full in his face. She also fired at the Mexicans nearby who escaped the lead but were later taken in custody.

### CROWE DIRECT TRIAL YOUNG SLAYERS

By United News.  
CHICAGO, Ill., July 19.—Prodded by propaganda shafts coming from the \$7,000,000 defense of Nathan Leopold Jr., and Richard Loeb, state-attorney Robert E. Crowe has decided to personally conduct the prosecution of the two intellectual slayers for the murder of young Robert Franks.

Next Monday when the attorneys representing the state of Illinois clash with Clarence S. Darrow, chief defense counsel and his staff of experts in court, Crowe will head the assistants he has appointed to aid in conducting the prosecution. Until two days ago Crowe had decided he would take no part in the actual trial, beyond a supervisory one. But certain things that nettled

him happened, and he decided it was time to take a hand.

"This is my answer to these propagandists who are trying to save the cold blooded killers from paying the legal penalty for their crimes," Crowe said. "I will go into the court myself. I will stay there at every stage of the case and I will fight this thing through to the end."

On Monday the defense and state will make any motions that may have been decided upon preliminary to trial. It is known that the defense attorneys have been considering applying for a change of venue but recent developments indicate they would be content to allow the trial to take place in Cook county. Darrow has been heartened by reports of a battery of highly paid alienists who examined the boys for physical and mental abnormalities. And from Darrow's office there has emanated stories calculated to assist him to prepare the public mind for the escape from the gallows of his two clients as an "experiment in human emotions." And some of the stories intended to help the defense have not always appeared to come from Darrow's office. Unwittingly attaches of the states attorneys staff have aided in spreading some of the tales. Furthermore there always has been a basis of truth for them.

But the publication of a few of these stories has angered Crowe, not because the stories were false, but because some of them disclosed carefully guarded information that he intended to keep secret until the trial.

Crowe has been putting out some propaganda himself. As fast as stories emanating from Darrow have appeared in the press, Crowe or one of his assistants has had a story of refutation ready. The essence of this battle of wits in print so far apparently has been that the conflicting forces have been hurling challenges at each other with their respective veracity the main issue.

Crowe has established a secret headquarters, from which he and his assistants have been doing the work of trial preparation. Also there are mysterious visitors at all hours to the Darrow suite of offices. There are hushed voices inside, whispered conference at which only the elect are admitted to talk to the chief about Franks' case during the hours he is busy. Judge John R. Calvey who will preside at Monday's session, has be-

come incensed over the skirmishes preceding the trial. He has issued instructions to a large force of attaches to prevent disorder in the court room next Monday and he is said to have sent word to both prosecution and defense that it might be advisable to calm down a bit in view of the fact that a trial involving the lives of two prisoners would soon start.

### THE YOUNG PEOPLE BUY HOMES MORE READILY IN RECENT YEARS

By United Press.  
DALLAS, July 19.—Young married couples are the best prospects for real estate salesmen, the salesmen say. Newly weds usually arrange payments on a house before they have been married a year, according to one veteran "realtor." But it is a rare occurrence to sell a house for cash, he says. Most

buyers must have a considerable length of time in which to make payments.

People rarely invest in their own homes after the age of forty, he says. It's the young people who buy, and they are willing to make almost any kind of a sacrifice to keep up the payments on the covered house and lot.

One man invested in three lots because he said he would spend the money drinking and gambling if he didn't have it tied up.

Northern people demand concrete basements and furnaces, this old-

timer declares. "And everybody wants a fence, a fireplace, a garage and a cement walk."

J. Frank Wilhite, brother of J. R. Wilhite of the Palace Market, is here visiting from his home at Madill, Oklahoma. He contemplates making his home in this vicinity in the near future but has found that it is rather hard to secure a farm here as the demand far exceeds the number of available farms.

Permanent waves and summer resort romances last about six months.

## The A. B. Conley, Jr., Store

The Store of Quality and Service

### COL. MULLICAN TO SPEAK HERE THURSDAY EVE.

District Judge Clark M. Mulligan, candidate for District Judge of the 72nd Judicial District, which office he now holds, by appointment of Governor Pat M. Neff, will speak to the voters at the community auditorium here Thursday evening.

Judge Mulligan has been busy in court since the outset of the campaign and has had but few opportunities to present his claims to the voters, but wherever he has spoken large audiences have been accorded him and his friends are of the opinion that the largest crowd ever accorded a speaker for any office in this section will hear him Thursday night.

Having served his country with the American Expeditionary Forces in France where he participated in some of the notable engagements, Col. Mulligan has a military record of which any man might well be proud, and as a private lawyer, he distinguished himself in handling both civil and criminal cases.

Having been appointed judge of the 72nd Judicial District Court to serve the unexpired term of the late W. R. Spencer, Judge Mulligan had perhaps some of the most difficult cases to handle that were tried before any judge in the state and has made a record that is equalled by few judges in the state.

The airplane will never take the place of the auto until you can park along a dark cloud.

### German Reichstag A General Mixture of Tradesmen

By United Press  
BERLIN, July 19.—Trade union leaders and journalists dominate the German Reichstag as far as numerical strength is concerned, while ex-chancellors and ex-ministers trail closely. The trade-union chiefs have 75 seats while the press is represented by 56 editors, six publishers, three newspaper owners and one printer. Germany, plentifully supplied with former ministers through its post-war chain of cabinets, has turned 40 of these "exes" to the Reichstag.

All of these do not treasure the title of ex-minister and have registered in the new year book as of other professions.

For instance, former ministers of the interior Solimann is listed as editor, and former Prussian prime minister Stegeward as president of the Christian trade union federatin, while former Chancellor Wirth is registered as doctor without specification of profession, which formerly was teacher.

Prince Bismarck a "Farmer" Prince Bismarck is registered as "farmer" with 37 others while 12 delegates represent "large real estate."

Ten of the delegates of the new Reichstag are judges and 15 lawyers, while only two are registered as economists. One of the economists is Dr. Hilferding, also former minister of finance, who is a doctor of both national economy and medicine.

High state officials form a group of 29, while Count Bernstorff is the only former ambassador who is a delegate.

The contingent of school teachers is fairly large. There are 15 uni-

### SHENANDOAH TO AID IN FLEET MANEUVERS

By United News  
LAKEHURST, N. J., July 19.—The Shenandoah, the navy's big dirigible may proceed to Honolulu to participate in the winter maneuvers of the Pacific fleet off Pearl Harbor, it is rumored at the naval air station here.

Plans for the giant craft's trip across the continent to Mare Island, Calif., virtually are complete. The Shenandoah will take a part in the fall maneuvers off the Pacific. To reach Mare Island the dirigible will make one intermediate stop, at Fort Worth, Texas, about 1800 miles from the hangar here, and just less than 1,000 miles from Mare Island.

To complete the rumored flight to Honolulu, the last leg of the trip from Mare Island, to the former city would represent the longest flight ever made by the dirigible, 2400 miles. On the return it is said the Shenandoah would reach the United States coast at Seattle, proceed down the coast to Mare Island and back to the station here by way of Fort Worth.

By International News Service  
HOUSTON, July 19.—Scattered light rains of great benefits to the crops fell during the night and Friday over various sections of West Texas, reports here today showed. Rain was falling at Abilene, White Falls, Big Spring, McLean, Goodnight, Clarendon, Quanah and other points report substantial fall.

Cops are hunting an Ohio newlywed because he was so shy. Wrote some checks and was shy of a bank account.

### BATHING PRACTICES OF PRESENT DAY DENOUNCED

International News Service  
HOUSTON, July 19.—Citing the story of David, who seeing a beautiful woman, had her husband put to death that he might possess her, Rev. J. H. H. Ellis, Baptist pastor here, has issued a stinging denunciation of bathing girls revues and the immodest attire involved.

"The story of David had its setting 3,000 years ago," Rev. Ellis declared, "but the shadows of that picture are falling upon the pathway of this generation and similar scenes are being re-enacted."

"Women are still unconsciously firing the lusts of men by exposing their beautiful half-clad bodies in one-piece bathing suits on special bathing girl revues organized by that men may gaze upon their almost nude figures."

"If mothers but realized the evil of such exhibits they would never allow their daughters to exhibit their charming persons in such a way that the influence they set in motion will result in tragedy."

### SCATTERED RAINS ARE REPORTED OVER STATE

International News Service  
FORT WORTH, July 19.—Scattered light rains of great benefits to the crops fell during the night and Friday over various sections of West Texas, reports here today showed. Rain was falling at Abilene, White Falls, Big Spring, McLean, Goodnight, Clarendon, Quanah and other points report substantial fall.

Cops are hunting an Ohio newlywed because he was so shy. Wrote some checks and was shy of a bank account.

### TAXI-DRIVER IS INDICTED FOR MURDER

By International News Service  
HOUSTON, July 18.—The grand jury today indicted Harry T. Smith, taxi-driver, for the murder of Joe Terry, twenty-nine, another driver. The killing occurred when Smith became angered at finding his wife in company with Terry.

# TEXAS AND TAXES

By CHAS. E. BAUGHMAN  
(This is the third of a series of articles relating to the cost of State Government in Texas.)

In the former articles we have pointed out the falseness of the doctrine of tax rate reduction without securing additional values for tax purposes. We have also pointed out the falseness of the idea of any appreciable reduction in expense of administering our several state departments and institutions and we are persuaded now that the real thinking voter appreciates these as representing the real facts.

I condemn no man for preaching economy in government. I wholly and entirely agree that there should be a watch over our revenues and that not one single dime should be used just for the mere sake of using it. I make no special defense for any particular expenditure, other than as it may include in the sum total of expenditures. Why the increase in government expenses?

Many people go back and start Campbell, when our revenues for with the administration of Governor public free schools were a mere drop in the bucket—and contrary to arguments of many, the bulk of increase in state expenditures since that administration has come through our constitution—the amendments, voted by the people.

At that time we had few, very few decent highways within the confines of the state.

Since that time, even though only a few years, hundreds of school houses have been erected. Illiteracy has decreased—thousands of miles of road have been made decent for traffic and travel. Since that time the population has somewhat increased. Industry has leaped forward in a spectacular fashion, and the wants of the people have been multiplied and multiplied again. Conveniences of every description—state, county and municipal—have been demanded by the people.

To illustrate: In 1908—we expended in Texas for public schools education, the then staggering sum—and it was indeed staggering to many—\$9,511,200, while in 1922 this had increased to \$32,452,000, and the people demanded it; while in 1904 the state expended the staggering sum of \$2,543,613 for road construction as compared to \$4,322,986 in 1922.

In 1900 we had in Texas 9,886 miles of railroad as against 16,181 miles in 1921.

We had in Texas in 1910, 520 National banks with deposits aggregating \$175,959,283 as compared to 573 banks in 1923 with deposits aggregating \$571,240,000, while banking resources increased from \$333,399,904 in 1910 to \$933,962,000 in 1923, with capitalization figures changing from \$44,206,000 in 1910 to \$72,240,000 in 1923, with farm values more than doubling during this same period, the value of all property having increased 6.4 from 1912 to 1922. In the face of these facts, assessed values in Texas have changed from \$2,394,265,376 in 1910 to only \$3,406,060,000 in 1923.

**How Appropriations Increase**  
An appropriation of one dollar per scholastic means approximately 1,250,000 so an increase of three dollars per scholastic would mean approximately four million dollars additional, and to have the state furnish the scholastic appropriation as provided by the constitution the apportionment by the Thirty-ninth Legislature will be not less than \$7,500,000 more than for 1924-25 for the same purpose.

In addition to the foregoing, we overlook the tremendous increase in living expenses, traveling expense and actual cost of materials of every kind.

We point out these facts only to show what the increase in wealth has not assumed its rightful share of the cost of government.

Again we are asked to increase the tax for confederate pensions from five cents on the one hundred dollar valuation to seven cents. Evidently the Legislature deemed this necessary to the proper welfare of the cause; and, if so, it should be given ungrudgingly; but bear in mind if it be done, it must and will be done by the sovereign voters of the State of Texas. Hence we have certain and demanded constitutional provisions demanding appropriations by the Thirty-ninth Legislature, aggregating nine million dollars beyond and above like appropriations for 1924-25.

As the population and industry increase comes also demands from the people through their representatives in the Legislature, for more courts, as was plainly demonstrated during the sessions of the Thirty-eighth Legislature.

The people—the sovereign voters of Texas are demanding more and better roads, more and better school buildings, longer term schools, better paid teachers, more courts, a more complete enforcement of all laws, better higher educational facilities, more room and better care of the State's unfortunates, the penitentiary system itself having become an avenue to great political outbursts of oratory. Some oppose convicts doing factory work whereby their outturn of goods must compete against paid labor output. Some oppose the convicts being used to produce field crops—cotton, corn, etc. Some oppose their services in building public highways.

I am not saying just what my position is in the matter, only seeking to point out why the additional expenditure in an effort to meet the demands of the people.

**The Cost of a Change in This System**  
Farm values have more than doubled since 1916. Construction costs today are around the double point of what they were in 1916.

To change the penitentiary system, removing a mere some point within an easy reach of Austin, would mean an outlay of from five to ten million dollars.

Few, if any, of our present penitentiary buildings would be easily

convertible into money, and the very location of the lands makes it apparent that a sale of land would mean a tremendous loss.

Very few farmers in Texas, I mean few comparatively, are actually making appreciable profits on their investments in land. Reckoning cost of lands, improvements, farming equipment and labor and other expenditures, the farmers' profits are indeed small; hence a profitable sale of prison farms is out of the question.

These several matters are pointed out as a preface to the statement that if the demands of the people of Texas are met—schools, highways, prison reforms, better care of and for our Eleemosinary Institutions, the higher institutions of learning, our courts and for the enforcement of laws—the Thirty-ninth Legislature could appropriate twenty million dollars more than did the Thirty-eighth.

Of course, this will not be done, but common sense teaches us that with such pressing demands, there will be more money appropriated by the Thirty-ninth than was by the Thirty-eighth.

Now you can shut down all the teachers' colleges, the higher institutions of learning, close the capital and dismiss every state employee, close the doors of every eleemosinary institution and turn the inmates out—other than our convicts—spend not one dime of the State's revenues for road work, and yet completely meet the people's demands otherwise and you will spend more money during 1925-26 than is being expended this year, and I challenge any man anywhere to show by actual figures that such would not be the case.

Counting the give bank from the state to the counties for school purposes, only about six per cent of your total taxes goes to the state for its conduct of the courts, the higher institutions of learning, the eleemosinary institutions, the building of highways, the sessions of the Legislature, for miscellaneous expenditures, and for operation of departments.

What of it then?

Simply assess values, shift the matter of taxes to the people and industry as a whole. Instead of assessing \$3,400,000,000 lay the burdens upon the actual \$9,960,000,000, reduce the rate, use ideas and practices that are common sense and full of humor—and keep in mind the fact that of the average total tax rate, state, county, municipal and district school, averaging \$3.23, only approximately twenty cents is used by the State of Texas.

## WORK BEGINS ON BEAUMONT-HOUSTON ELECTRIC LINE

By United Press.  
HOUSTON, July 19—All obstacles have finally been cleared away, and work is to begin soon on the Houston-Beaumont electric line, according to officials of the company. All of the \$5,000,000 bond issue was taken by the S. P. Thayer and

Son Company, an investment company of Washington, D. C., and Pittsburgh, Pa. The J. D. Davis Co., of Atlanta, Ga., has made a \$50,000 bond under its contract for building the road, which is to be completed in fifteen months, dated to begin July 20. The line is first to be completed to Orange, and then probably extended to Lake Charles, La., according to plans of Ed Kennedy, promoter and general manager of the road.

82 miles of the right of way to Beaumont has been acquired, and only a few short stretches remain to be secured, Kennedy said. The company also owns title to six townsites along the right of way. The project has been planned for months, but one obstacle after another intervened to delay the work of financing. Now, Kennedy said, things are

in shape to get down to real construction work in a hurry.

**C. C. JOHNSON IS EAGER TO BE AT HOME AGAIN**  
Friends of Granville G. Johnson, former owner of the Lubbock Drug Company who has been spending the summer in Colorado, have just

received word from him that he is eager to be at home here again and that they will return to Lubbock in August.

Mr. Johnson was in business in Lubbock for a number of years, ten years of which time he worked without taking a vacation and early this year after selling his interest in the Lubbock Drug decided to take a real rest, which is now enjoying.

# A Message to all Voters

—If YOU don't want the prohibition laws of Lubbock County ENFORCED don't vote for me, because as long as I am your Sheriff I am going to do my best to enforce them without any favor whatsoever.

If YOU want the professional gamblers to take over the finances of the young people of this county don't vote for me because I am going to do my dead-level best to keep them from doing it as long as I am your sheriff.

If you think there are people who are entitled to more consideration from my hand than others would receive, don't vote for me because I intend to treat ALL LAW BREAKERS just a like.

YOU ELECTED ME TO ENFORCE YOUR LAWS. I TOOK MY OATH SERIOUSLY AND INTENDED TO LIVE UP TO IT THOROUGHLY.
