

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

VOLUME 11

MULESHOE, County Seat of Bailey County, TEX AS, THURSDAY, JUNE 15, 1933

NUMBER 29

MULESHOE WILL CELEBRATE INDEPENDENCE DAY, JULY THE FOURTH

PATRIOTIC PROGRAM SPONSORED BY BUSINESS MEN WILL BE MAIN FEATURE OF NATIONAL OCCASION

Prominent Speakers, Music, Horse Racing, Stunts and Athletic Events of Various Kinds To Be On Day's Bill.

There were 22 present at the last meeting of the Kiwanis club, and one of the most constructive sessions held for some time past.

R. L. Brown brought up the matter of the next Barter day occasion, and it was agreed that it should be held on Tuesday, July 14th, since that was the next day following the First Monday, regular day for a barter event. It was further agreed that the day should be largely of a patriotic nature.

C. F. Moeller kindly offered the use of the picture show building, and it is probable some prominent speaker of two will be brought in to furnish the oratory for the day. It is probable that other exercises of a patriotic nature will also become a part of the program.

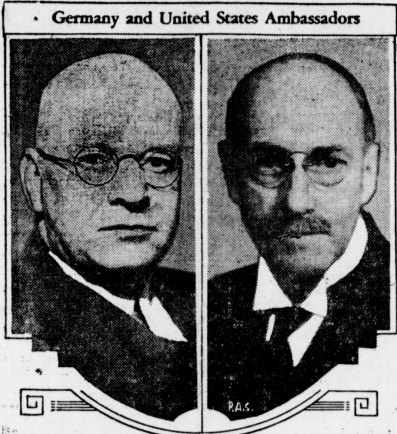

Amusements of various kinds are to be arranged by the committee in charge. There will be a baseball game between two strong contending teams not yet selected, numerous races and other athletic events of different kinds, and plenty of other kinds of amusement.

It has been suggested that the two principle business blocks of Main street be roped off and various numbers of the program held there, while the bartering, trading, auctioneering, etc., will be held at the usual grounds just west

of Main street. Full details of the program will appear in a future issue of the Journal after it has been formulated by the committee in charge.

J. E. Aldridge presented the matter, "National Recovery" bill now up for Congressional consideration, wherein funds may be obtained by the City of Muleshoe for various municipal improvements, and on motion, it was agreed that the Kiwanis club should take immediate sponsor of some movement which would look toward the securing of necessary funds for improving the local waterworks system and such other projects as were needed and would come under this particular bill. E. R. Hart, R. L. Brown and Jess Mitchell were appointed as a committee to handle this matter in conjunction with Engineer H. N. Roberts and the city commission.

The matter of obtaining Federal funds for improvements of Highway Nos. 7 and 28 and securing designation of the highway between Muleshoe and Morton was discussed and it was urged that immediate action in this direction be taken. A. P. Stone, R. L. Brown, Dr. A. R. Matthews and Jess Mitchell were authorized to attend a good roads meeting to be held at Plainview, June 15.

Germany and United States Ambassadors

On the left is Dr. Hans Luther, new German Ambassador to the United States, succeeding Friedrich Elm von Prittwitz. On the right is David H. Morris of New York, new American Ambassador to Germany, nominated by President Roosevelt during March.

Bill Rockne Reports

Bill Rockne, eldest son of the late Knute Rockne, famed football coach of Notre Dame, reported for Spring football practice with St. Benedict's college squad at Atchison, Kan.

HAYS BEGINS A NEW WELL FOR CITY SERVICE

That the great shortage of city water, occasioned by obsolete and inefficient pumps is to be met promptly by the City Commission, is evident from a contract made last week and going into effect Monday morning, when A. B. Hays, well known successful well driller, was engaged to put down a new well on city property just north of the corporate limits.

Hays began drilling his Tuesday on a well that will be approximately 100 feet deep, or sufficient to obtain benefit of the big flow of underground water now supplying the numerous irrigation wells of this section. No difficulty is anticipated in securing a well that will yield at least 1,000 gallons per minute. Labor for the drilling will be paid out of R. F. C. funds now on hand.

As soon as the hole is completed, the City Commission will purchase and install the necessary casing and a suitable pump for handling this big volume of water.

It is planned by officials, as soon as arrangements can be made to construct a storage tank, of at least 100,000 gallon capacity having two booster pumps connected with it for putting water into the tower tank, thus with the auxiliary stand-by pump to be used in necessity an ample supply of water will be assured in case of fire and the insurance rates will also be considerably reduced by this equipment.

\$85.00 Offering Is Given Evangelist At Close of The Revival

The two weeks evangelistic services held at the Methodist church closed last Sunday night. Rev. Michael, pastor of the Methodist church at Turkey assisted the local pastor, Rev. E. C. Roney and did the preaching, delivering some interesting and soul-inspiring sermons.

Commenting upon the series of services, Rev. Roney said: "While there was not the big stir in the life of the church we would like to have had, yet there was considerable quickening of the membership in a spiritual way. The preaching and singing was good. There were some very positive conversions and a few reclamations. The secure of measles in this section was a considerable hindrance in people attending the services, and the rains just as the series of meetings began made it necessary for the farmer folks to spend long hours in their fields."

At the close of the meeting a tree will offering of \$85.00 was tendered to the evangelist by the congregation.

Farm Mortgage Loans Now Available, Stone To Handle Bailey Co.

The first loan from the \$200,000,000 fund appropriated by Congress to refinance farm mortgage indebtedness and to aid the farmers to redeem their foreclosed farms, was made in Texas this week, according to A. P. Stone, local representative of the fund.

The loan was for the amount of \$3,000.00, and was made to a farmer and stockman of Brazoria county, who has resided in that section for a number of years.

A. P. Graves, agent of the Farm Loan Commissioner, Houston, reports that although they have been somewhat hampered by a large volume of correspondence addressed to his office, the Texas division is now organized and in position to handle incoming business with dispatch.

A. P. Stone has been requested to act as local correspondent for Bailey county and all eligible farmers entitled to assistance through this division may call on him, and he will gladly render such assistance as he can.

Some Pumping Essentials

Many Factors Enter Into The Successful Pumping For Irrigation; Conditions In Blackwater Valley Ideal.

With the perfecting of centrifugal pumps and the designing of engines capable of running on cheap fuel, the matter of pumping for irrigation has become a great factor in the development of some sections of the Southwest including at least 100,000 acres lying adjacent to Muleshoe.

Not so many years ago it was thought that water could not be lifted more than 25 to 30 feet for alfalfa, but it has more recently been demonstrated that double that lift still leaves a handsome margin for the farmer to apply to his bank account, even though the market price of this particular hay may not be very high.

It is a well proven fact that the value of water depends very largely upon the value of the crop to which it is applied. If high-priced crops are raised, water can be lifted from a greater depth, and the same ratio of profit exists. Some irrigationists have found it profitable to irrigate some of the more common and low priced crops in this valley—crops such as hedges, sudan and cotton. Hence, the range of water valuation is large, running from say, \$10 to \$100. Of course, in connection with this, must be taken into consideration the amount of labor necessary to raise the given crops. Some high priced crops demand a great amount of care, while others demand little labor. Here again the question of profit is equalized.

Again, the quality of water applied to crops has much to do with the crop yield, and the Blackwater valley around Muleshoe is fortunately blessed with the very purest of water for irrigation purposes. Quality is largely determined by the character of the soil through which the water passes. If the soil contains alkali, the water is rendered valueless, more or less, according to the amount. Where the soil is unsaturated by any deleterious mineral substances, the water percolating through the sand and gravel strata becomes almost as pure as if distilled or filtered.

Quantity of water for irrigation depends upon the catchment area and the amount of rainfall of that area, together with its general topography, altitude, etc. Here again the Blackwater valley in Bailey county comes in for an advantage, since its immense supply of underground water comes from the mountainous areas of northern New Mexico and southern Colorado, dipping into porous strata and filtering through the open underground soil, which was once a surface river bed, none of it being lost by evaporation, and none of it being depraved or contaminated in any way by obnoxious minerals that would have any deleterious effect upon the growing vegetation to which it is eventually applied. The irrigationist sinking his well

PLANS FOR NO. 7 HIGHWAY ARE ORDERED MADE

Assistant State Highway Engineer H. N. Roberts last Friday received instructions to prepare plans and specifications for the hard surfacing of State Highway No. 7 from the west Lubbock county line through to the eastern New Mexico state line. Drainage and grading plans had already been previously prepared by Mr. Roberts and his crew of assistants.

It is being freely intimated that this section of No. 7 highway will come up for action before the State Highway Commission the last of June or sometime in July, and being broken into about six different improvement portions, contracts for its paving will be let. Right-of-way in Hockley, Lamb, Bailey and Farmer counties for this road, which will be widened to present state requirements have been secured some time ago.

Instalation Of Masonic Officers Is Public June 30

A very interesting meeting of the local Masonic lodge was held in its hall Tuesday night under direction of Walter T. Black ex-deputy district master.

There were several visiting Masons present to take part in the meeting, one being from Dallas, several from the southern part of the county and three from Littlefield, as well as other visitors residing here who are not members of the local lodge.

A feature of the meeting was the annual visit and address of Prof. F. O. Boles, district deputy grand master, from Littlefield, who reported all lodges of his district in excellent financial condition and doing good fraternal work. Dr. C. C. Clements, worshipful master of the Littlefield Blue Lodge, master of that Chapter and most excellent master of the Council was also present and spoke.

The annual election of officers for the ensuing fiscal year was held, and it was decided to hold a public installation of same Friday night, June 30, in the lodge hall, Judge J. E. Adams Ray Griffiths and Jess Mitchell were appointed as a committee to arrange the program, and it was ordered that a general invitation would be sent out wherein the public at large may attend this meeting. Officers elected were as follows:

Judge J. E. Adams, worshipful master; W. D. Wagoner, senior warden; Harold Wyre, junior warden; J. S. Glascock, treasurer; Judge R. J. Klump, secretary; W. T. Black, Tyler; Good Harden, chaplain.

Two membership transfers were received favorably and one membership application was also received.

10,540 ACRES OF LAND ARE DEEDED TO FRED F. WARREN

A big land deal, perhaps the largest in this part of Texas during the past year was consummated last week when A. P. Stone agent filed a deed here in the county clerk's office transferring 10,540 acres of land, located in Bailey, Lamb, Farmer and Castro counties, from F. P. Warren & Co., Inc., to Fred F. Warren.

The deed carried \$154,000 worth of revenue stamps, there being a \$100 a \$50.00 and four \$1.00 stamps, the two larger denomination stamps being the first of their kind ever seen by many Muleshoe citizens.

Fred Warren, who is well known in Muleshoe, now lives at Lakeside, Michigan.

MULESHOE ENGAGES IN GOLF TOURNAMENT WITH FARWELL

A very interesting golf tournament was held at Farwell between members of the Farwell and Muleshoe teams last Sunday.

There were five foursome games played, Muleshoe players winning two of them. "Smitty" Smith ran the course in 87 and A. J. Gardner in 80. G. D. Anderson, of Farwell, played the course in 71, the best playing of the tournament. Gilbert Wollard, local picture pool artist, tied 22 holes with Mr. Faville, of Farwell, the game being tossed off in Faville's favor.

Those attending from Muleshoe were: A. J. Gardner, Delma McCarty, Gilbert Wollard, Elwin Smith, Roy Cobb, Connie Gupton, D. W. Winn, Jess Osborne, Pat Bobo, J. L. Taylor, Jim Alsop, Albert Isaacs, Al Burnett, and Walter Moeller.

25 PROJECTS APPROVED

Washington President Roosevelt has approved establishment of 237 forest work projects in thirty-five states.

The new camps will provide employment for 50,000 men. This far in payment of 1933 automobile taxes.

President has approved establishment of 1,556 work camps throughout the country.

TUO ENROLL VETERANS

Last Tuesday The Veterans Administration, Dallas, began selection of 625 men for enrollment in the Emergency Corps, 93 per cent of them to be ex-service men. Bailey county is entitled to its pro rata membership in this enrollment.

Details of application may be obtained at the local post office.

TAXES PAID IN GOLD

Pleasant Grove, Utah—A gold piece, minted in 1847, was received here in payment of 1933 automobile taxes. Fear was expressed by the taxpayer that the piece was worth less because the United States is off the gold standard, according to Deputy County Assessor M. D. Radman.

MUSKOGEE SPUDS BRING \$1.75

They're digging potatoes in the Muskogee, Okla., area, and selling them for \$1.75 a hundred pounds as compared with 60 cents last season.

The yield this year is light and the average lower. The big digging rush will be under way by Monday and growers say the buyers are clamoring for the crop, which will hit the Northern markets at a time when comparatively little other produce is being shipped.

POST OFFICE BUSINESS BETTER

Business transacted at a given post office is often an index to the general business conditions of a given community, and reports from the Muleshoe office indicate a growing business this year.

For instance stamp sales during May this year totaled \$402.10, while during the month of April this year the total sales was \$351.60.

HEAD LIGHTS ON SHEEP PROTECTION FROM COYOTES

Butte, Mont.—J. N. Gessett, Madison county sheepman, proposes putting headlamps on sheep. A few animals wearing collars fitted with a flashlight battery and a red reflector on the lamp, he said, will protect a band of several thousand sheep from coyotes and cougars. He finds the light doesn't bother the sheep and scares off the intruders.

MULESHOE vs. SUDAN

Muleshoe leather swatters crossed bats with the neighboring town of Sudan on the south last Sunday afternoon, the score resulting 21 to 6 in favor of the local lads.

The game throughout was one of aggressive and consistent baseball, not marked by any particular spectacular plays; but with every team mate on the job doing his full duty in excellent manner.

A good crowd of fans witnessed the game.

\$200,000,000 FARM MORTGAGE FINANCING FUNDS NOW AVAILABLE TO CITIZENS OF TEXAS NEEDING MONEY

THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.

JESS MITCHELL, Editor. I. F. MITCHELL, Bus. Mgr.

Subscription Rates: In Bailey County, one year, \$1.50. Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas. Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.

Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate. Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

A THOUGHT FOR THE WEEK

Intreat me not of leave, or to return from following after thee: for whether thou goest, I will go; and where thou lodgest, I will lodge; thy people shall be my people and thy God my God.—Ruth 1:16.

As the yellow gold is tried in fire so the faith of friendship must be seen in adversity.—Ovid.

THE BUSY DOLLAR

Only the busy dollar counts. Put a million dollars in circulation and things begin to happen. Put even one dollar into circulation and action begins. Part of it goes to Muleshoe merchants, who provide what one wants or needs. Another part goes to employees. They spend it for the comforts and luxuries of life, when they can afford them.

One dollar, rapidly turned over, does the work of a thousand dollars. It decreases stocks of accumulated goods and makes room for replacements. It brings direct and indirect results to every hand that has used it and passed it along to someone else.

without jobs there will be little or nothing left for charity. The hoarder who loves money for itself and not for what it can do should understand just what he is doing.

It is a noteworthy fact that national and individual confidence is now being reestablished and dollars are coming forth from their hiding places and beginning to circulate more freely.

KEEP IDEALS UP

Ever since becoming a citizen of Muleshoe, we have had the greatest of confidence in this town and the county in which it is located. It has already accomplished some worthwhile things, and it really has just begun.

Within the coming few years this section should give to the world its best example of profitable irrigation and there should be numerous illustrations of successful diversified farming.

community leadership and several master homemakers. The list of achievements could be extended indefinitely, for here we have the average run of intelligent people coupled with above the average of opportunities to accomplish these very things.

TOURIST TIME

It has been three years since the outlook for summer motor travel was as bright as it is now. All over the country auto clubs announce that the American people have "started to ride again."

On the face of it, that is good news for everyone around Muleshoe because it reflects a return to former conditions. But the best part of it is that some of this vast sum is sure to find its way into this immediate vicinity.

Make yourself a reception committee of one to welcome the motor tourist, and do everything reasonable to show him you are glad he came this way. Showing his courtesy costs you nothing. It is certainly to be worth a lot to the community.

DEFINING "HARD TIMES"

One Kansas editor comes to the front with a definition of "depression" simple that anybody who has had a nodding acquaintance with a cow knows a little something about the operation of a dairy can understand it.

Another Kansas editor puts the cow in the position of the advertiser who cuts down his space just at a time when he needs advertisements, read advertisements and regulate their buying by advertisements more than ever.

All of which means one thing that no citizen of Muleshoe should forget: the fact that if you quit feeding the cow you can't get any milk. If you quit putting into the community you can't expect to take anything out.

NOW A RADIO TAX

Owners of radio sets around Muleshoe will probably be hearing ere long about a "radio tax" in this country. An Ohio congressman has a plan to tax the advertising programs now cluttering up the air.

If it is a tax on the ones using the radio for advertising, then it will be one that cannot very well be passed on to the consumer. If it is a tax on the listener, then the advertisers are sure to suffer, for few there are who would pay anything to listen to the programs they are now broadcasting.

Considering the class of stuff that is filling the air these days the ones sponsoring the programs really ought to be taxed for asking the public to listen to their old-time medicines, show ballyhoo and their jokes that once made Joe Miller's Joke Book a ready seller.

Several municipalities throughout the Panhandle area have not only made dog-owners pay a license on their canines but they are now requiring that these dogs shall be vaccinated against hydrophobia. It is certainly a commendable idea.

Sterling P. Evans, district agricultural agent, accuses eye doctor of trying to get him in bad with the Methodists and Baptists in Muleshoe because of his reference to making good wine out of grapes being raised in the Black-der valley, and the need of spraying

the grapes as a healthy precaution. The official script of this Sunday school sheet covers himself with sackcloth and ashes, grovels in the dust, orders a bait of crow and humbly apologizes to friend Evans, knowing he is a good Presbyterian and adherents with faith in a universally noted their teotalism.

Miss Allee Ayres, of Tyler, very slender but pretty, has been selected to represent Texas grocers at a beauty contest to be held at Atlantic City. Personally we consider her a poor advertisement for a grocery business, and are willing to bet a power nickel that Muleshoe grocers would have had just enough to select a fat good looking woman for such a job.

The latest information coming to the Journal office is to the effect that a close corporation for handling local RFC affairs has been formed here by its three leading Swedish citizens. John Benson is president and tells R. L. Brown, secretary-treasurer what to do, and Brown asks Harry Roberts, topographical surveyor and caliche expert to lay a carte, how to do it.—Selah!

The Journal is heartily in favor of a patriotic celebration here July 4th, but it is also heartily insistent that the City Fathers take some action prohibiting shooting of fire crackers and other pyrotechnical display, unless under the proper official supervision. The present shortage of city water makes fireworks too great a hazard for such risk.

Jaunty Journalettes

Just think of the early days when farmers around Muleshoe in need of relief had to go out onto the prairies and shoot it.

Muleshoe citizens who want to give the depression a sock, must first take their money out of them.

Four magic words that will prevent loss to the average Muleshoe citizen when a peddling agent of any kind knocks at your door are: "Get out of here!"

One trouble with some of the girls in and around Muleshoe is that they have many pretty dresses and not enough aprons.

As one Muleshoe girl defined it last week, "a kid is a mathematical problem that is divided by two."

Another thing all Muleshoe men should remember is that none of them ever got too big to fit into a small job—and there are always plenty of small jobs that need doing.

Pavement Pickups

As John Benson sees it, a man's idea of a snap is the other fellow's job.

A. W. Burnett, local cleaner and passer, says when a tailor gets patronized, that means he gets orders, but when he has to obey orders, and that's one reason he would rather be a tailor than a congressman.

Arnold Morris says "It isn't the size of a dog in a fight, but the size of the fight in a dog that makes a good dog fight"—and this also frequently applies to humans.

H. A. Eckler was telling the other day about a terrible tussle he had with a dentist. Some one asked him which beat. "It ended in a draw," he replied.

"Just about the time Americans become convinced that crookedness doesn't pay," remarks A. P. Stone, "we witness the triumphant comeback of the pretzel, and it looks now like it's going to invade Texas, too, if it is crookedness."

A customer was complaining to Julian Leuan the other day that some shipment he had bought from him made his arm smart. "Good," replied Julian, "why not try some of it on your head!"

The erratic way some folks have, insists Dan Winn, makes one a crazy-quit.

"The human body is now worth about 50 cents, according to a scientist's recent statement," but J. C. Ginn calls attention to how many doctors still insist on charging to patch up the darn thing.

Kiwians all around last Friday that somebody must have settled an obstetrical bill when Dr. Matthews paid for a couple of preachers' dinners herebefore the doctor has been swamping hogs and cows for grub.

A woman in Glibbreath's grocery the other day wanted to buy some cheese. Noticing some holes in it she asked, "what causes them?" "I don't know," unless the cheese is slightly moth eaten," "Oh mamma!" chimed in the woman's small boy who accompanied her, "let's don't buy that cheese."

Though the smallest state in the Union Rhode Island is the most densely populated.

The Virginia charter of 1609 included an area extending west to the "South sea" or Pacific ocean.

SNAP SHOTS

So long as coal cost \$1.20 at the mines and \$3.50 delivered, those who happen to have any railroad bonds don't need to worry about them.

The only jig-saw puzzle that nobody has yet been able to assemble correctly is the map of Europe.

The size of the average American farm is now 128 acres, but you would never believe it if we were to tell you the size of the mortgage on it.

A spinster is an old maid who has to postpone her wedding until she can find a groom.

Bull fighting didn't originate in Spain, neither did the practice of throwing the bull originate in congress.

After all, the smoothest running thing about a car is the salesman's tongue.

Scientists say the back of her neck is the safest place to kiss a girl; but who is looking for safety when he's hunting a kiss?

Friends are folk who have symptoms just like yours, only they don't let such little things disturb them.

The English language is a funny thing. A patient is one who waits for hours before calling a doctor and then raves impatiently if he doesn't arrive in 10 minutes.

One sure way to tell when prosperity returns is to watch the little fellows getting theirs and not worrying a bit about how the big fellow gets his.

If you will notice, it is nature's rule always to start right. For instance, a hen never lays a stale egg.

Notwithstanding all this prohibition agitation, we can still remember when a dry cellar was a fine recommendation for a house.

Some consolation in the thought that when a man gets corns on his hands building forests, he won't be so apt to set one of them on fire.

Only 12 per cent of American men sing, a musical publication recently declared, but present indications are that the days of "Sweet Adeline" will soon be returning and that percentage may be considerably increased.

From reports coming in, we wonder if this country wasn't really happier when people got milk from a cow instead of off the front door step.

Y L News Items

Y L Missionary Society May 30th the Y L Missionary society met at the home of Mrs. Joe H. Owens with 11 members present.

After a brief devotional and Bible lesson by the pastor, Rev. H. H. Allen, a business meeting was held. The treasurer, Mrs. Zora Mae Beller, reported we had raised about \$24.00 on the play and selling ice cream; \$7.00 of this is to be given for new song books for the church. It was voted to purchase varnish for the parsonage floors. It was decided to increase the mission pledge and pay the balance due this year. Mrs. L. F. Willman, Mrs. H. H. Allen, and Miss Witterling gave reports from the district meeting at Petersburg after which business session Mrs. Owens presented the concluding

chapter of the mission study book, "Christ and the Coming Kingdom." The next meeting will be in the home of Mrs. Parsons.

Father and Son Day Program Sunday, June 18th, there will be an all day program at Y. L., commemorating fathers and sons. Everybody is invited to come and bring dinner. Sunday school will meet as usual 7 ten o'clock. Rev. H. H. Allen will preach at eleven o'clock. After this noon hour a special program will be given. There will be the regular Epworth league program and preaching service at night.

New Wind Mill at the Parsonage We are proud of the new wind mill at the Y L parsonage. This was built last week and put up Monday of this week. We wish to express appreciation for the help given by the business men of Muleshoe.—Reporter.

Do It Electrically.....

Summer is here, and from now on the weather will be warm and the household tasks more tiresome.

You may have a pleasant and enjoyable summer if you let electricity take care of your problems. Use electricity to cool your house; to clean your floors; to keep your eatables in perfect shape; to wash your clothes, and to do all the drudgery about the place and thereby lift the burden of toil and unpleasantness off your daily problems.

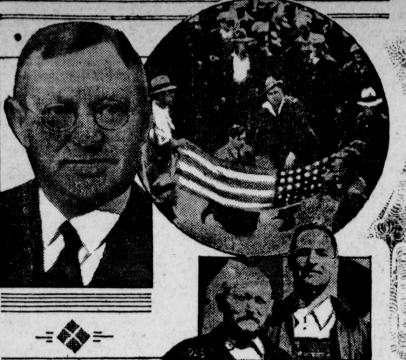

The cost of doing your work with electricity is far less than the cost of any other servant you can employ, and is always ready for instant use.

Do your work electrically and be fit to enjoy the summer.

Judge Bradley, Center of Iowa Farm Rioting

Scenes from the center of disturbances in Iowa, brought about when court action on farm foreclosures continued, finally resulting in the Governor ordering the militia out to restore and maintain order at LeMars and Primghar. Above, farmers forcing deputy sheriffs and attorneys to kiss the flag. Below, right, John Shafer and his son, Edwin, who lost several court actions which decisions started some 500 farmers rioting. Left, above, Judge C. C. Bradley who was beaten and manhandled but still refused to agree to sign "no more farm foreclosures".

Skating 'Jams Now

Each generation of youth has its vogue on roller skates and 1933 finds even New York's social registerites donning specially designed apparel for skating atop skyscraper buildings and on the avenue. . . Theresa Townsend and Joan Hamilton are wearing wrap-around pajamas which fasten to the left leg.

President's Forest Chief

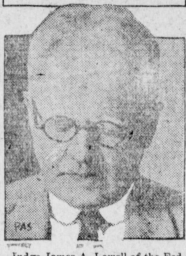

Robert Fechner, of Boston, is the Director of the President's forest conservation program which is aimed to include six billion of public works and putting 2,000,000 to work.

Kaiser Kicks

Announcement of the engagement of Dorothea von Salviati to the eldest son of the former Crown Prince Wilhelm of Germany brought forth a protest of displeasure from the former Kaiser at Bonn.

Decision Stirs South

Judge James A. Lowell of the Federal District Court at Boston by court ruling bars extradition of negro to Virginia on murder charge, challenging the procedure of Southern states in excluding negroes from jury duty.

Bula News Items

Everyone in this community would like to see a good rain and not so many dust storms. Rev. Becham filled the pulpit at the tabernacle, Sunday morning and night. Miss Wanda B. West has been visiting friends in Sudan. Mrs. Ruth Terry has returned to Lubbock to attend summer school. Mrs. H. C. Nichols entertained her sister and husband of Lubbock, Sunday. Bula and Enoch played ball on the Bula grounds Sunday with a score of 9 to 14 in favor of Bula. Mr. and Mrs. Gordon Bain have gone on a vacation in South Texas. Mrs. H. C. Nichols, Mrs. Tommie Carter and Mrs. Jno. Blackman visited in Lubbock, Tuesday. There will be a play at the Bula school house, Saturday night, June 17, "Eyes of Love," given for benefit of Bula base ball club. Come and help the boys out. Mr. and Mrs. F. L. Simmons, Mrs. and Mrs. A. H. Simmons and children spent Sunday in the Slaughter home near Sudan. Mrs. Jim Tucker's niece of Littlefield has been visiting her. Mr. and Mrs. Zyrz Nordyke have gone on a two week's vacation and are planning to see the World's Fair while gone. There is Sunday school and church at the tabernacle each Sunday. Your presence is welcome.—Reporter.

THE METHODIST CHURCH

Sunday school at 9:45 a. m. At 11:00 a. m. the pastor will use "The Spiritual Atmosphere of Our Church" as a subject. The leagues and other meetings will be at 8:00 p. m. and the pastor will preach at 8:30 p. m. These are the shortest nights of the year and we shall need to start earlier than dark to get all the services finished before too late, because many people are up early on Monday morning and need a good night of sleep. The Missionary society meets each Monday afternoon. They desire all the ladies of the church to meet with them. There should be a new attitude towards the attendance of the services at church. People in seeking an excuse for not going should find to find real reasons why they should go. The mid week meeting comes at 8:30 p. m. each Wednesday night. It is said that this meeting is a good test for the spiritual status of the church. The choir is urged if at all possible to meet at the regular meeting on Thursday nights for the work it has in the worship of the church.—E. C. RANEY, Pastor.

Dana's Story Prized

A first edition of Richard H. Dana's "Two Years Before the Mast," 1840, slightly damaged, recently sold for \$500.

CHRISTIAN WORKERS CLUB

The Christian Workers' club of Lubbock met at the home of Mrs. Roy Bardshaw, Tuesday, June 6. After a song and prayer, Mrs. E. W. Crain gave us a lesson on "Love," from the fourth chapter of I John, which was appreciated by all. We had two visitors and one new member who were very welcome. A business session was held and when our treasurer's report was read, we found that our friends had been so generous we would be able to begin assisting our ministers, in a financial way at once, which made us very grateful to them. Plans were made for another quilt which will be made at once. We also finished one we started sometime ago. The drawing for the quilt we sold at the store was held Saturday after our meeting, and Bill Shirley happened to be the lucky man. Congratulations Mr. Shirley! We will meet with Mrs. G. W. Crain Tuesday p. m. in June 20. Everyone is welcome. Come and bring your thimble.—Reporter.

WHEAT CUTTING BEGINS HERE

Wheat cutting in Bailey and surrounding counties began this week with not very good prospects of big yields, the average being estimated by farmers and grain men to be about 10 bushel per acre. The amount of acreage in wheat last fall was out considerably lower than common, and following dry weather started the stand very much. Some of it has been entirely abandoned and the land planted to other crops. Rains a couple weeks ago quickened the growth somewhat, but following dry weather has added further damage to the yield. It is now being estimated there will be about 150 carloads of wheat shipped from this point this year, which is far below the average shipment.

TRADE CONDITIONS IMPROVE

Trade and business last week, said the Dun and Bradstreet report, Saturday, have shown more consistent improvement than in any week in the last three years. "The rise in general business," the agency stated, "has now been lifted to a level sufficiently high to reveal its stability, which appears to be fortified adequately to withstand the usual seasonal recessions of the summer months." "Reports of steadily increasing employment continue to be received from sellers of steel to the production of steel and allied products, automobiles, textiles, rubber goods, shoes and leather, and lumber."

UNION LEAGUE MEETING

There will be a Union meeting of the Methodist Leagues this district, at Sudan, next Sunday. An interesting program is being planned. Every local chapter should if possible be on hand to take part in the program.—Reporter.

AVERAGE MAN'S READING

What does the average man read? Attempting to answer this question The American Newspaper Publishers' Association canvassed the reading habits of a representative group. The results indicated that men average twenty-five minutes a day on magazines and one-half of the men average less than one book a month. In other words men spend twice as much time on magazines as on books, and five times as much on newspapers. This ought to be interesting to those who advertise. From the standpoint of culture the radio may be deplored, but in the present day of better newspapers the columns contain much that is neither trivial nor ephemeral.

THE COST OF ACCIDENTS

The economic cost of accidents—wage loss, medical expense, and insurance overhead—was estimated by the National Safety Council to be in the neighborhood of two billion dollars last year. This is four times the fire loss of the country and almost as great as the total cost of our public schools. Now, if we could somehow eliminate this needless expense we might be able to keep in our pockets all the money we pay out in taxes for schools and instruction. When one considers the fact that at least thirty percent of all accidents are needless it doesn't take much figuring to realize that most of the cost of accidents is simply money thrown away. In times like these can the American people afford such extravagance?

METHODIST MISSIONARY MEET

The Methodist Missionary society met at the church Monday afternoon. The president presided. Mother Elrod brought the devotional using John 17 as her lesson. Mrs. I. W. Haney gave a heart searching talk, relating some personal experiences of Margaret Saugster. Mrs. Wyrer brought a vital message on consecration, and Mrs. Beavers extended the discussion with a message relative to our opportunity to serve. A short business session closed the meeting.

BOYS CUTTING WEEDS

Several lads of R F C funds this week when employed by the local committee in cutting weeds from off a number of lots in the restricted district and business section.

Panama Canal Traffic

Ships starting the trip through the Panama canal during the daylight hours are permitted to finish after dark if they cannot do so before night falls, but ships arriving at night are required to await daylight to go through.

ONE MILLION ACRES REMAINING IN THE PUBLIC DOMAIN OF TEXAS

Only State in Union That Owns Public Lands Has Disposed of 176,000,000 Acres; Sale Of Territory to Government Recalled.

It will not be many more years until all of the state-owned lands of Texas shall have been sold. It is conservatively estimated that there are remaining approximately one million acres of the original public domain yet to be disposed of. Very little of this is agricultural land in its natural condition, but much of it could be placed under irrigation by the construction of dams and canals. There are approximately 48,000 land sale accounts still carried on the books of the state land office. The total acreage upon which payments are still being made is estimated at more than 50 million acres. The public lands are sold on 40 years' time, with interest 5 per cent. When final payment is made on a given tract the state issues a patent to the land.

Texas is the only state that owns its public domain, such lands in all other states being owned by the Federal government. When Texas gained its independence from Mexico and became a republic it had no credit, no system of taxation, no resources of any kind except the state domain. In order to raise money President Sam Houston authorized agents to sell land certificates of 320 and 640 acres. More than a million acres were disposed of in this way. All families in Texas during the revolution and all soldiers who fought in the war were given grants of land. Bounties were also given for military service, and donations given to those who were in the Battle of San Jacinto, in the reduction of Bexar and to the heirs of those who fell in the Alamo. These grants amounted to approximately 36 million acres.

Schools Get Grants Almost a third of the total area of the state has been given for educational purposes. The University of Texas obtained 10,000 acres of land for school purposes, and 45 million acres were given to public free schools, institutions for blind, deaf and dumb, insane and orphans were given 100,000 acres each.

In order to make trade and personal travel freer and easier between Texas and other states, after she was annexed, Texas obtained 10,000 acres of land for every mile of railroad constructed and operated within the state. This desire on the part of Texas to "keep up with the times" saw its result in the building of seven railroads, causing the issuance of 32 million acres of land to the different railroads. From 1846 to 1876 land was given to those who would develop irrigation enterprises, establish manufacturing enterprises, and form dredging companies to make rivers navigable. In this way 10 million acres of land were disposed of.

The Capitol Swap. In exchange for erecting the state capitol the contractors were given 100,000 acres of land in 1879 and 1887 about 200,000 acres were sold at different times in order to meet state obligations. With the exception of 22,500,000 acres which was sold to individuals and companies by Spain and Mexico, Texas has disposed of approximately 176 million acres, the great bulk of which has gone by gift.

The land office of Texas had rough traveling during its early days. Land frauds were numerous, many of which were never discovered. The country was full of rough characters who were quick to take advantage of whatever came to their notice.

In 1832 the Indian archer war broke out. Because of Indian and Mexican incursions, President Sam Houston decided to move the capital of Texas to the better protected town of Houston. With this idea in view, he wrote to Comm. Thomas W. Ward from Washington and instructed him to gather up the state records and carry them to Houston. But the people of Austin learned of the plan and were furious. Overriding the wagons about 20 miles out of Austin, a posse of Austin citizens captured them and took the records back to Austin, keeping them in a private home. An attempt was made to assassinate Ward in his home according to a letter from him to President Houston. He told of personal threats made against him, but expressed determination to stand by his post.

Sells Land to U. S. If Texas had retained all of her original domain it would have been an empire indeed in size. The portion which was sold to the United States government in 1850 now embraces all the eastern half of New Mexico, one corner of Oklahoma and Kansas and a narrow strip extending north and south through Colorado, reaching almost to the Wyoming line.

When Texas was admitted to the union it claimed the Rio Grande from its mouth to its source, as its western and southwestern boundary. The region around Santa Fe had never acknowledged Texas' right to govern and the question arose as to whether that disputed strip was a part of Texas or New Mexico. This point was raised and discussed chiefly by men powerful in politics, who did not want to see slavery extended over such a broad scope of territory as was embraced in Texas' original domain. It was really

which has been opened to settlement during the last several years, are not properly appreciated by the lawmakers from the older and more settled regions. There is so much discontent of this kind existing on the part of the people of West Texas that Vice-president John N. Garner and others have discussed the union as many as five states may be created out of its domain without any action on the part of Congress.

SENATOR DUGGAN MAY RUN Senator Arthur F. Duggan has indicated he may be a candidate for Congress in this newly formed 19th district. Five other men have already announced their candidacy for that high honor. They are Judge Clark Mullican and Judge Homer L. Pharr, of Lubbock; George Mahon, district attorney, at Colorado; Fred Hale, business man at Spur.

CARE WILL SAVE YOUR CAR SO PLEASE DO NOT NEGLECT IT! Hot weather is now here and many motors are going to be damaged by overheating. To insure normal operating temperature of your motor, have the cooling system flushed out to remove any sediment that may have collected in the radiator and cylinder block. Install new hose connections as the old ones may be chafed inside retarding the water circulation. Be sure the water pump and fan are doing their work properly, also, be sure the ignition is properly timed. All this is very important for proper operation of your motor. Drive into the Clinic and let us help you keep your motor running. ARNOLD MORRIS AUTO CLINIC At White Front Garage, Muleshoe

Beware of Three F's In Preparing Summer Food For The Baby

Austin.—The season of the year when the most complaints are received on account of diarrhoea in infants or "Summer Complaint" is here and the Texas State Department of Health has issued a warning to parents in regard to this, and offers the following suggestions to prevent its occurrence...

Mother's milk is the safest food. However, if other milk must be used, the supply should be clean and pure. The water should be clean, pure and boiled. Any other articles of food should be fresh and clean and no unsalutary articles of food such as cake and candy should be given.

If diarrhoea develops, feeding should be stopped or greatly diminished and an abundance of water should be given. Cathartics should not be given except on the advice of a physician. If the diarrhoea shows signs of becoming serious, a physician should be called and a complete examination made.

Don't make grape juice. Imagine yourself making grape juice from bunches of grapes containing six to a dozen decayed berries...

Y. W. A. GIBBS IN PARTY. Members of the Y. W. A. organization enjoyed an all night social affair on Friday night of last week at the home of Mrs. Ray Griffiths...

Y. W. A. REGULAR MEETING. The regular meeting of the Y. W. A. girls was held Monday afternoon the program being of a missionary nature...

QUILT SHOW AT EARTH. Saturday, June 24 a quilt show will be held at Earth, sponsored by members of the Springlake Home Demonstration club...

PENNEY'S SALES ON INCREASE

The J. C. Penney Co., has noted quite an upturn in business, according to J. B. Kuntz, manager of their store in Clovis, N. M., who was in Muleshoe a few days ago. "The general business of our stores increased considerably in April over what it was a year ago the same month, while the month of May showed a 14 per cent increase over that same month last year."

RAIN HERE MONDAY. There was a light shower of rain in Muleshoe and vicinity Monday evening, heavier, but spotted rain, is reported in the central part of Bailey county around Needmore, Baileyboro and Circleback communities.

MULESHOE COFFEE SHOP GOOD EATS. ICE CREAM, COLD DRINKS, MILK NICKELS. You'll enjoy lunch with us. Table service, also, curb service. ROY SKAGGS, Prop.

Renew Your Health By Purification. Any physician will tell you that "Purification of the System is Nature's Foundation of Perfect Health."

General News Over Texas and Adjoining States For The Week

State motor fuel tax offices have been opened in Amarillo.

Federal beer selling permits issued in Dallas now total more than 150.

A meeting of the State Board of Education was held in Lubbock June 15 and 17.

More than 300 editors attended the Texas Press Association meeting held last week at Houston.

Alvin M. Owsley has been named by President Roosevelt as U. S. minister to Roumania.

The City of Amarillo has reduced its running expenses \$177,967 since beginning its present fiscal year.

The Mid-West Dairies creamery at Portales, N. M., was considerably damaged by fire last week.

Eleven cars of cattle were shipped last week from Sudan to Fort Worth markets.

Reports are to the effect that drilling operations will start June 1 on an oil test well in the Dora Dome area south of Portales, N. M.

The City of Sudan last week repealed its ordinance keeping hogs out of the city limits and requiring owners to keep their chickens in pens.

Last Saturday a train of 10 cars was destroyed near Marshall following a tank car explosion which blew out a section of the track.

The Santa Fe system is engaged in laying new rails on 151 line to California, two miles being laid last week near Vaughn, N. M.

Citizens of Oklahoma will vote on the beer sale question July 11 in special election. Governor Murray has stated.

The State Highway Commission, Austin, expects to move into its new highway building, now nearing completion, the latter part of this month.

Sam Burton, well known athletic coach at West Texas State Teachers college, Canyon, died suddenly last Friday from heart failure.

Occupation tax imposed on cigar dealers will be paid direct to the state in the future, according to House Bill 578 now effective.

It has been estimated by Chairman J. E. Hill, Amarillo, that at least 5,000 farmers will obtain government wheat loans this year.

Nearly \$12,000 has been paid in delinquent taxes in Curry county, N. M., to date. Penalties and foreclosures are due in July in that state.

A co-operative stock organization has been formed in Hockley county wherein farmers there are bunching their hogs and cattle together for car load shipments.

Several acres of public garden land have been set aside for those desiring to plant such by city officials of Snyder. Seed is being purchased for the plots with RFC funds.

Citizens of Morton, county seat of Cochran county, will hold an election July 1 to determine if that town shall become incorporated under a commission form of government.

Plans for a municipal power plant in Plainview have been ordered by its officials, a favorable vote on the project having been recorded by its citizens in April when they approved issuing of \$450,000 bonds for that purpose.

Plans to irrigate 100,000 acres of land lying adjacent to the Colorado river and near Robert Lee were launched last week. A district will be outlined and self-liquidating bonds will be voted.

Reports of interest to sportsmen is to the effect that an unusually large crop of quails and prairie chickens are this year being hatched in Gaines, Yoakum, Terry, Cochran and Hockley counties.

W. J. Patton, Clovis, N. M., business man, who has just finished giving away 8,000 pounds of cotton seed to farmers of Curry county, estimates there will be 300 bales of cotton raised in that section this year.

One of the many bills that died in the legislative hopper when it recently closed was one introduced by Representative W. E. Pope, of Corpus Christi, which would have permitted James E. Ferguson to hold state office.

There will be two capital punishments effected in New Mexico, during July. Tom Johnson, negro, for murder.

Water with meals helps stomach juices, aids digestion. If bloated with gas add a spoonful of Aderika. One dose cleans out poisons and washes BOTH upper and lower bowels. Western Drug Store. Adv.

der and Santiago Garduo, Mexican for murder. J. L. Owens, Oklahoma executioner, has been obtained to handle the punishments.

Recently discovered fossil beds near Portales, N. M., are said to be the largest in that state. The National Museum at Washington, D. C., will establish a branch museum at Clovis, to handle many of the specimens to be dug up.

Farmer county sent representatives to Austin last week to confer with the State Highway Commission relative to securing return of \$20,000 spent in that county on state highways, the state having authorized such payments several months ago.

A temporary injunction was issued last Saturday by District Judge Harry L. Patton against action of a recently passed law in New Mexico which would cause foreclosure on all tax delinquent property July 1. Practically every county in the state is up in arms against this new law.

The House committee in Congress last Saturday approved the resolution of Representative Patman, of Texas, authorizing coinage of 3,000,000 silver half dollars in commemoration of the hundredth anniversary in 1936 of the independence of Texas.

Following a new labor law recently enacted in New Mexico, Clovis merchants have agreed to open their places of business at eight o'clock and close at five in the afternoon, mountain time, except on Saturdays when they will remain open until eight o'clock at night. This new law limits labor hours of employees to eight hours daily.

Girl Scout News

The Girl Scouts met in the Legion hall Tuesday afternoon with Commissioner Mrs. J. C. Weaver in charge.

We had Mrs. G. C. Danner and two small daughters as visitors; also a girl scout, Amarillo, who is visiting Grace Churchhill.

The Scouts discussed a summer trip but decided to write to several places for further details before making final decision as to where they wish to camp.

Some instructive games were played, then the patrol leaders, assisted by Mrs. Weaver and Mrs. Danner, put a troop through some drills, finishing by the formation of a horse shoe figure.

Naomi Harper reviewed them on some of their work. They gave the Scout promise and sang taps for dismissal.

Some of the Scouts accompanied by Mrs. Danner and Mrs. Weaver, went to the swimming pool where Ruth Ekler and Holly Ann Bury passed their swimming test.

We missed the smiling countenances of two Scouts, Lovelle Ginn and Florence Stone, who are entertaining the measles. Hop they will be present next Tuesday.—Reporter.

EXAMINATION TO BE HELD FOR COTTON STATISTICIAN

Examinations are soon to be held all over Texas for applicants who desire to serve the U. S. Census Bureau as collectors of cotton statistics, in counties where such officials do not now exist.

One such official is to be appointed to serve in Bailey and Farmer counties, and an examination for the place may be taken at Plainview or Littlefield, these being the nearest points to Muleshoe where such examinations are to be held. Applications must be on file with the U. S. Civil Service Commission, Washington, D. C., not later than June 27.

It is understood that the examination is not necessarily a rigorous one, and some preference consideration will be accorded ex-service men who apply. The salary for these two counties is placed at \$180.00 per year, less 15% Details of the examination may be obtained from Mrs. B. W. Carles, Muleshoe postmaster.

TRUCK LINES MUST NOT HAUL PASSENGERS, WARNING

Truck line operators were warned recently by Mark Marshall, director of the E. C. T.'s motor transportation bureau, not to haul passengers on their trucks, either for pay or not. Failure to obey this instruction will result in a case being filed against them to cancel their permits.

"Complaints have come to me about truck lines up in this section hauling passengers," Mr. Marshall said. "It is against the law to do that. You cannot even haul the people whose household goods you are transporting. The next case we get of that kind after this, we are going to see why by offering a case against him for operating illegally. There have been half a dozen people killed over the state, doing this kind of thing. Your insurance does not cover that practice."

CLARK BUYS IN LITTLEFIELD

A. B. Clark who recently sold his cleaning and pressing shop here to George Wood, last week purchased the Hotel Tailors business in Littlefield, being formerly run by B. F. Fitzgerald and Thomas Lowe, of that city. It will be known as the Modern Cleaners concern.

War debts might be settled on the principle of give and take, if Europe did not insist on doing all the talking.

WOOD CALLS HIGHWAY MEET

John Wood, recently appointed chairman of the State Highway Commission by Governor Ferguson, called a meeting of that body for last Monday.

It was merely a "get acquainted" affair in which the new chairman sought to acquaint himself more intimately with the commission's actions and future plans. Judge W. R. Ely, of Abilene and D. K. Martin, of San Antonio, are other members of the commission. Ely having served as chairman.

Make Every Farm a Factory Every Day of the Year

The Function Of A ...BANK...

We believe if the public kept in mind the true function of a bank it would make for better understanding and banks would be more esteemed by the communities which they serve. The officers who work in a bank work for its stockholders and they do not own the money which they handle and which they loan.

As we understand it the function of a bank is to gather up the resources of the community in which it exists and, as far as they can safely do so, loan these funds to the customers of the bank. These loans must be so made that they are liquid because the bank is pledged to return the deposits on demand and if its loans are bad or frozen then it can not be in a position to pay the depositors when they want or need their funds.

It is the duty of every person who borrows from a bank is not only pay his note but to, for at least a part of the time, have funds on deposit in the bank that can be loaned to other customers. In other words a good bank is a mutual proposition, its customers combining their resources to accommodate each other and thus it follows that no one who is not a depositor of the bank should expect a loan from the bank.

Muleshoe State Bank

MULESHOE, TEXAS

Dessie Wilhite is visiting her brother, Clarence Wilhite of West Camp, this week.—Reporter.

\$500,000 ROAD BIDS ASKED

The Texas Highway Department has advertised for bids receivable June 20, on highway maintenance projects estimated to cost approximately \$500,000.

Hard surfacing of many highways in numerous counties throughout the state are being called for, totaling 317 miles, most of it the double bituminous type.

A sale of the Harvest Queen Mill and elevator at Plainview has been ordered by Judge Wilson of the U. S. District court, for July 5. The concern has been under litigation for several months past.

HOW SHE LOST 18 POUNDS OF FAT

FOR LESS THAN \$1.00

"Will say in regards to Kruschen: I took it to reduce. I lost 18 pounds after using one bottle and feel fine. Just bought one more bottle today and expect to lose 18 more pounds. I now weigh 148 and feel fine." Mrs. Harry Robinson, Akron, Ohio (Jan. 6, 1932).

Once a day take Kruschen Salts—one half teaspoonful in a glass of hot water first thing every morning. Besides losing ugly fat SAFELY you'll gain in health and physical attractiveness—constipation, gas and acidity will cease to bother—you'll feel younger—more active—full of ambition—clear skin—sparkling eyes.

A jar that lasts 4 weeks costs but a trifle at any drug store in the world—but demand and get Kruschen and if one bottle doesn't joyfully please you—money back. Adv.

LOW PRICE CARS VS. CHEAP CARS

We do not build a low-price car: the cost to us of building our car is pretty high.

But we do sell a high quality car at a low price.

Almost every new Ford V-8 car we have built so far this year, has cost more to manufacture than its selling price was. As you buy them at only \$490 to \$610, we have to depend on increasing volume to make up the difference.

The reason for this is simple: — a manufacturer who gives good value must expect to lose money on the first cars he sells because he cannot charge all his costs to the people who are first to buy.

But with the purchaser it is different — he cannot afford to lose anything on a car. It must give him full value from the first, and keep on giving him full value for years.

Two things make possible our combination of low prices and high cost quality:

1. Volume Production
2. Taking only one profit

First, we set our price at what would be fair to the public on the basis of economies we enjoy in volume production. Then, in order to justify and maintain our low price we must get volume sales.

Thus it comes that a car which is really high-cost to make, is also low-cost to buy.

There is a difference between a cheap car and a low-priced high quality car.

Ford prices are always fixed at a point which makes it profitable for a customer to buy.

Good and lasting business must produce profit to the buyer as well as to the seller. And of the two, the buyer's profit must be, comparatively, the larger one.

It pays us to sell the Ford V-8 because it pays you to buy it.

Henry Ford
