Heat and Temperature.

There is a positive difference between heat and temperature which many engineers fail to recognize. In raising water to the boiling point 966.6 heat units must be put int the water to convert it into steam, and the temperature of the steam will remain the same as that of the water when boiling began. That 966.6 is known as the latent heat of if the process of steam generation.

## Saved Girl's Life

"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.

"It certainly has no equal for la grippe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without
