Instead of pushing me straight through in front of him, though, he kicked me sideways. The impetus he gave me bent aside the stubborn branch, and the next moment I found myself crawling out on hands and knees on one side of the tree, with a rifle still grasped by the muzzle, while the elephant was executing a dance and stamping up the ground the other side, five yards from me, evidently thinking that I was under his feet.

Having fired, the rifle was taken out of my hands, and I found Matola, who had counted the shots, standing beside me, serving me the second rifle as a waiter might offer a dish. By some oversight it had not been loaded, for I had given strict orders that none of my men were ever to load or unload my rifles! Being a good soldier, Matola had not disobeved this order, even under these extreme circumstances, but had gone the nearest to loading it he could.

"The breech was open, and he was holding the clip in position with as I took hold of the rifle close to ent. the bolt and I was ready to fire. The elephant was turning round and I shot him in the brain, drop ping him dead.

While playing in Barcelona he was challenged to fight a duel by an excited member of the audience whom he had reproved for disturbing the recital by his noisy conduct. One of his most extraordinary experiences was in Russia. It was in a little town near Moscow, and in the middle of his performance the pianist was arrested by the police on the grounds that he was obtaining money under false pretenses. D. B. CUSENBARY, Sonora, lexas. A MAN OF ACTION.

He Got Quet of this Tight Corner With Flying Colors.

He was a husband who, when he left home for a week or so on a business trip, invariably took with him a photo of his wife, and in the letters that he wrote to her he always made a great point of this portrait and dwelt upon the fact that the sight of it was the only thing that kept his spirits up when

he was far away from her. One day, however, he left the home and forgot to take the portrait with him. But he was not going to let a little thing like that

Down he sat and penned his customary amorous epistle, in which the portrait played its usual part. It was not until the letter was posted that he remembered that the portrait had been left at home in portrait had been left at home in a conspicuous place where his wife could not fail to discover it.

The fat was indeed in the fire. but he was a man of action and determined to get out of his tight corner somehow. He remembered the shop where the photo had been taken and promptly wired there for another copy, which he had put into a beautiful frame especially adapte for traveling.

On his return home his wife 'handed out the freezing mixture' to begin with and then dissolved in unquenchable tears. When under cross examination she admitted that the cause of her grief was his ernel deception he produced the newly acquired photo and then asked her in a hurt voice how she could pos sibly have suspected him of working off mere tarradiddle on his little wife .- New York Mail.

Huge and Merimee.

It is probable that with the exception of Byron no great literary genius ever was greeted with such a storm of vilification and abuse as Victor Hugo when he published "Les Miserables." While the book took the public literally off its feet, almost all Hugo's rivals united in condemning it and its author. Prosper Merimee wrote in refer-

ence to a dinner given to Hugo at Brussels:

"Have you read Victor Hugo's speech at the dinner given to him by Belgian librarians and other scoundrels of Brussels? His statements were without depth, solidity or common sense. He is a man who intoxicates himself with words and does not take the trouble to think.' Victor Hugo retorted by writing
