LIBERTY BONDS AT CURRENT PRICES

The Liberty Bond issues of the Government, with their tax exemption teatures, yield from 4 3.4 to 5 percent on the invest ment. These bonds MAY self lower but are now very cheap and eventually WILL self at much higher prices, insuring a splendid profit if held to maturity. They are backed by the credit and good faith of the greatest nation in the world, and by every resource within its boundaries. They will be paid in full.

We recommend their immediate purchase and their retention to maturity.

"Thine Is the Glory"

This panting which hangs in National Headquarters of the American Red Cross, Washington, depicts the homage of America's fighting men to American womanhood as mobilized for service in the World War by this organization. It is the collaborative scientific and art creation of Major Joseph Gray Kitchell, late of the General Staff, U. S. A., and F. Luis Mora, of the New York School of Art. The face of the central figure is a composite of the features of a thousand Red Cross workers selected for the purpose.

Fooling Himself!

This skinny critter is busy at making himself believe he is a fat steer! But his delusion is no more complete

than that of the farmer who thinks he saves money by raising cheap scrubs. These days, when the margin between feed cost and selling price on the boof is uncertain, there is on y one economical kind of steerthe pure-bred. His superiority over the scrub can be measured in size, in quality, in pounds of beef for pounds of feed consumed - and finally in dollars on the credit side of the farm ledger.

SITUATED IN EDWARDS COUNTY, TEXAS. DOES THINGS DIFFERENT. STUDY OUR PLAN.

A careful study of the Devil's River Oil & Gas Company's plan will convince the close student of investments that we are offering the BEST inducement in the OIL fields. Oil production in Texas fades the total gold production of Alaska in its best days into insignificance. Alaska's best production of sold was only \$15,000,000.00, while Texas is producing about \$150,000,000.00 worth of oil. The production is increasing so rapidly that it is conservatively estimated that the output will be close to \$300,000-000.00 in 1920.

NO is the time to get in the oil business in order to reap the early harvest. With 600 acres of oil lands to draw from, we anticipate making big profits on our most liberal plan, PROFITS that will make fast friends for our com pany in future enterprises which we have in mind when The Company's present plans are in operation.

DO NOT DELAY your subscriptions. There is nothing to gain and MUCH to lose by deferring until some future date. NOW is the time to INVEST, and OUR company is the ONE to be in, for it gives you the biggest run for your money in the cace for MILLIONS. Fill in the subscription blanks NOW and sail in the good
