That Dependable Ford qual ty

ORD durability began back in 1962 when Henry For a started experi menting with Vauadium steel and heat treating process. He knew that a more exact tempering of steel for motor ear building must be worked out. Vanadium, it was learned, when added to molten steel, gives to that steel a greater toughness and adhesiveness. And now other alloys have been found which are superior to Vanadium. With the Ford Motor Company constant progress is the daily companion. The Ford products-Car, Truck. Tractor -grow in quality daily. Heat-treating tempers each part so that it will best withstand the wear or tare to which it is subjected. Ford chemists and analysts have created formulas and standard specifications for every individual part of the Ford ear-not only for the steel but for everything from pneumatic tires to top.

Ford durability isn't a matter of accident, it is a matter of painstaking thoroughness in laboratory and factory. The Ford is a car of precisionof stardardized values. Order your Ford car now. No matter how fast they may be made the demand multiplies faster. Order today for we can make fairly prompt deliveries-Runabout, Touring Car, Coupe, Sedan, Truck and Fordson Tractor.

BEAT IT!

There's a real menace to the farmer of this country in cheap South American beef. Our packers are building more and more big plants in Argentina, Brazil, Urugua ofrigerator ships are dumping the frozen and canned beef on the markets of the United States and the rest of the meat-buying world. How can this dangerous competition be met?

In pure-breds lies the answer. The pure-bred farmer can produce prime carcasses at an economy that challenges competition or, better, he can sell breeding stock to a steadily growing market.

From every point of view pure-bred now foreign markets are clamoring for his breeding stock.

The bronzed face changed; possibly a shadow of disappointment cause into his eyes. "A lunger, eh?" Lennox repeated. "Yes-it's true that if he'd been like the other Failings, he'd never have been that. Why, Steele, you couldn't have given that old man a cold if you'd tied him in the Pogue river overnight. Of course you couldn't count on the line keeping up forever. But I'll take him, for the memory of his grandfather"

He was cholly unable to understand the strange feeling of familiarity that he had with them, a sensation that in his dreams he had known them alrays, and that he must never go out

of the range of them again. Dan didn't see his bost at first. For he first instant he was entirely encrossed by a surging sense of disapintment—a feeling that he had been tricked and had only come to another Hy after all. He got down onto the gravet of the station yard, and out on the clang of a trolley car. Many aupuobiles were parked just beside the station, some of them foreign cars of expensive makes, such as he supposed brushed his shoulder.

Dan looked up to the hills, and he felt better. He couldn't see them plainly. The faint smoke of a distant forest fire half obscured them. Yet he peculiar blue in color, and even his untrained eyes could see that they were clothed in forests of evergreen. It was true that he wore a flannel shirt, riding trousers and rather heavy, leathern boots. But sportsmen all over the face of the earth wear this costume at sundry times. Mountain men have 2 peculiar stride by which experienced persons can occasionally recognize them; but Silas Lennox was standing still when Dan got his first alimpse of him. The case resolves itself into a simple matter of the things that could

Perhaps it would have been better to have left them to their traditions.

He had never dreamed that the ame of his grandfather had spread o far. For the first en miles Dan stened to stories—legends of a cold erve that simply could not be shaken: of a powerful, tireless physique; of noral and physical strength that was seemingly without limit. Then, as the foothills began to give way to the nigher ridges, and the shadow of the theper forests fell upon the narrow. prown road, there began to be long gaps in the talk. And soon they rode in utter silence, evidently both of them absorbed in their own thoughts. He merely seemed to fall into the spirit of the woods, and no words nine to his lips. Every mile was an added delight to him. Not even wine could have brought a brighter sparkle to his eyes. Very Weak

"After the birth of my baby I had a back-set," writes Mrs. Mattie Crosswhite, of Glade Spring, Va. "I was very ill; thought I was going to die. I was so weak I couldn't raise my head to get a drink of water. I took . . . medicine, yet I didn't get any better. I was constipated and very weak, getting worse and worse. I sent for Cardui."

The Woman's Tonic

"I found after one bottle of Cardui I was improving," adds Mrs. Crosswhite. "3ix bottles of Cardui and . . . I was cured, yes, I can say they were a God-send to me, I believe I would have died, had it not been for Cardui." Cardui has been found beneficial in many thousands of other cases of womanly troubles. If you feel the need of a good, strengthening tonic, why not try Cardai? It may be just what you need.

SITUATED IN EDWARDS COUNTY, TEXAS. DOES THINGS DIFFERENT. STUDY OUR PLAN.

A careful stuly of the Devil's River Oil & Gas Company's plan will convince the close student of investments that we are offering the BEST inducement in the OIL fields. Oil production in Texas fades the total gold production of Alaska in its best days into insignificance. Alaska's best production of gold was only \$15,000,000,00, while Texas is producing about \$150,000,000.00 worth of oil. The production to increasing on rapidly that it is conservatively estimated that the output will be close to \$300,000-000.00 in 1920.

NO is the time to get in the oil business in order to reap the early harvest. With 600 acres of oil lands to draw from, we anticipate making big profits on our most liberal plan, PROFITS that will make fast friends for our com pany in future enterprises which we have in mind when The Company's present plans are in operation.
