

GLASS HOUSES NOW A REALITY
When people speak of living in glass houses these days it is not necessarily in a spirit of jest for all over the nation contractors and builders have become interested in and are building houses of glass.
Although not introduced in its present improved form until last fall even the manufacturers of this glass masonry have been surprised at its reception. It is in form of clear glass blocks, translucent but not transparent.

CROPS FORETOLD BY MOISTURE
After making a study of records covering the last 25 years the Department of Agriculture has devised a method whereby wheat farmers in the method Great Plains region an foretell crop

failures with the aid of only a spade. Comparison of records has shown that the depth of moisture in soil is the best indicator of the chances of complete or partial crop failure. When soil is dry at seeding time the crop will fall 71 per cent out of 100 and there are only 18 chances out of 100 of a yield of more than 10 bushels to the acre. Moisture extending down one foot into the soil reduces the chances of failure to 4 out of 100. With two feet of moisture there are only 15 chances for failure and with three feet only 10. Further studies showed that early plowing and preparation of the land for seeding and summer fallow are the best means of accumulating moisture in the soil.

Iron Springs to Riches
The hairsprings in watches are made by drawing a piece of steel through a hole in a diamond. A pound of steel worth only a few dollars, can make \$90,000 worth of watch hairsprings.

WANT ANY SLAVES OR SOME GOOD 7 YEAR OLD WHISKEY? YOU ARE TOO LATE THOUGH FOR THIS SALE BILL
Change in customs and conventionalities always have their attractions. In the case of the slave farmer who advertised another "new county," just as hundreds of folks now are coming to further east points is of interest. The item was handed to the Journal by a subscriber.
"Having sold my farm and intending to leave by ox team for Oregon Territory" I will offer on March 1, 1949 "All ox teams except two teams, 1 gray mare and colt, 1 pair of oxen, 1 baby yoke, 2 ox-carts, 1,000 wood mazel board, 800 to 1,000 three-foot clap boards, 1,000 ten-foot rails, 1 sixty-gallon soap kettle, fence troughs, made of white ash lumber, 10 gallons of maple syrup, 2 spinners, 30 pounds mutton tallow, 1 large loom made by Jerry Wilson, barrels, thirty-two gallon barrel of John Miller whiskey, 7 years old, 200 gallons apple brandy, 1 forty-gallon copper still, 1 dozen tanned leather harness, 1 dozen trap hooks, 1 dozen pitchfork handle hooks, 1 dozen cradles, half-interest in 3 scythes and a calibre rifle, made by Ben Mills, 32-gallon, 40 soft soap, hams, bacon and six head of fox hounds, all soft-mouthed except one."
At the same time I will sell my six negro slaves, 2 men, 35 and 50 years old, 2 boys 12 and 18 years old, 2 mulatto wenches, 40 and 30 years old. Will sell altogether, to same party as will not separate them.
My home is two miles south of Ver-ferry pike. Sale will begin at 8 a. m. Plenty to eat and drink."

Enochs Echoes
Messames R. L. Layfield, E. N. Mcfield, Friday.
Mrs. J. B. Wilson, Douglas and Durwood Howell visited in Lubock this week. Mrs. Aliman spent the weekend with her mother at Littlefield.
Calvin Calvert had the misfortune to break a foot this week.
Mrs. Jake Hall has returned home from spending the week with her mother at Brownfield.
Floyd Wilburn is at Plains attending to business.
H. D. Club Meet
"Some people say clothes don't make the man," said Miss Alma Stewart at the meeting of the Home Demonstration club last Friday. "but we always judge our fellow man by his appearance. So why can't we women spend more time and less money on our wardrobes."
The club had a very interesting lesson on "seams, color and style." "I learned more about wardrobe work Friday than I ever did before," said Mr. Roy Helson.
"Oh the meeting was so good, and I enjoyed it so much," said Mrs. Adams.
Dresses for the contest were discussed and Enochs is planning entering quite a few dresses at the contest.
The meeting was at the home of Mrs. G. P. Howell with 11 members present. They were: Miss Alma Stewart, Mrs. R. L. Layfield, Mrs. Roy Helson, Mrs. H. H. Snow, Miss Marita Parker, Mrs. G. A. Thomas, Mrs. L. G. Harris, Mrs. Ray Seagler, Mrs. Bob Adams, Mrs. Homer Green, Mrs. Guy Berry and Mrs. G. P. Howell—Reporter.

French New Deal May Bring Panic
Public Fear Parallels U. S. After Roosevelt Victory in Fall of 1932.

Chicago.—Threatened with the establishment of a radical government—"a sort of New Deal on the American pattern"—France is experiencing a wave of public fear that is described by Howard Wood, prominent economic writer, as similar to the financial panic which swept the United States in November, 1929, and the date of the inauguration of the New Deal in "In France," Mr. Wood reports, "the 'little fellows' are trying to protect their savings by hoarding. Runs on the banks have reduced deposits. Captive ships available to carry gold. Dis-closure of plans to 'soak' the 'thrifty' litures have intensified the scramble."
"Similarly in the United States," Mr. Wood adds, "the panic did not begin until the interval between the election of the New Deal and the date of inauguration—while the bank moratorium of March, 1933."
Observers of business and industrial conditions have already established the fact that the low point of the depression was passed during the summer of 1932, and the upward climb to prosperity was already under way in the fall of the year. Fears that arose from the proposals of New Dealers for large public expenditures, their opposition to budget balancing plans and comments favoring inflation, stopped recovery and brought on the panic.

HERE'S THE TIRE THAT GIVES YOU 43% LONGER NON-SKID WEAR

ALL-WEATHER
—a great tire on three counts

- 1 THE GOODYEAR MARGIN OF SAFETY WITH TOUGH, sure-gripping center-traction tread that gives 43% longer non-skid mileage.
- 2 PATENTED SUPERTWIST construction—insures greater blow-out resistance in every ply.
- 3 LOWEST COST PER MILE WITH greater safety—proved by the experience of millions.

Get the World's largest selling tire because the World's experts have proved it gives the longest wear—the safest mileage—for the money.

OIL MARRIES METAL

... And your engine becomes Oil-Plated. Yes, patented Conoco Germ Processed oil—first alloyed oil—definitely joins to all moving parts. It does not merely squirt, but Plates on! This durable Oil-Plating cannot seep down, scrape off, heat away, or lump into carbon and sludge. Even before you touch the starter, Oil-Plating is up on its job. And there it stays Plated, to stave off your next stop for oil... and your next trade-in. Get the one oil that Oil-Plates your engine... CONOCO GERM PROCESSED OIL

Where the Texas Go
Washington.—Although Adelino, N. M., doesn't rate a United States post school stadium out of the WPA. The treasury will put up \$1,428.

No Indian Name for America
There was no universal Indian name for America before Europeans gave it tribes and nations, speaking many languages. They had no idea of the extent of the two continents and most neighboring tribes. Tribes had local names for the regions in which they lived, and often other tribes had other names for the same territory.

Dream of Horace Greeley
Summit City projected north of the original site of Akron, Ohio, was hoped to be made by ambitious men the Lowell of the west in view of its water power. Even such an influential man as Horace Greeley sought to make this dream come true but it was all in vain. Its site is now within the present boundaries of Akron.

Raising Ducks
Why are there not more ducks raised on American farms? The greatest objection given by most farmers and poultrymen is that they do not have a pond or stream near the house. Although a pond or stream is a valuable feature, it is not essential. All that is necessary is to provide sufficient water for drinking purposes. An ordinary wide fastened along the top will prevent the ducks from splashing the water out.—Wallace's Farmer.

Meat Cuts and How to Cook Them BEEF CHART

Every housewife is confronted with the three-day question of variety in the meals she serves. In beef we become addicted to roasts or steaks which will give pleasing variation and be easy on the pocketbook, too. Perhaps our trouble lies in the fact that we are not as familiar as we should be with many of the possibilities offered by beef. If you are one of those whose use of beef is limited to a roast or a steak, the chart given above will be invaluable in learning to identify and locate the many retail cuts of beef. The chart will show you at a glance just how each one should be cooked. You will want to preserve this chart for ready reference.

LOCALS

● Floyd Kinser left Monday morning for Hobbs, N. M., on a business trip.

● Ray Buzard visited friends in Lubbock, Sunday afternoon.

St. Clair Variety Store
Muleshoe, Texas

NOTICE OF DIVISION'S SALE OF THE STATE OF TEXAS.
WHEREAS, by virtue of an order of sale issued out of the 64th Judicial District Court, County of Bailey, Texas, on a judgment rendered in said Court on the 12th day of May, A. D. 1936, in favor of VALLEY MOTOR COMPANY, a private corporation, and against Bolt D. O. Smith, G. L. Kirvin, Pierce Petroleum Corporation, a private corporation of the State of Delaware, Firestone Tire & Rubber Company, a private corporation of the State of Ohio, Vacuum Oil Company, a private corporation of the State of Texas, the Stockholders and the heirs of the unknown stockholders of Petroleum Refraction Corporation, a defunct corporation, whose names are unknown, in Cause No. 811 on the docket of said Court.

I did on the 8th day of June, A. D. 1936, at 4:30 P. M. levy upon the following described property situated in Bailey County, Texas, to wit: All of Lots Numbers Eight (8), and Nine (9) in Block "A" of the Original Town of Muleshoe, in Bailey County, Texas.

And on the 7th day of July, A. D. 1936, being the First Tuesday of said month, between the hours of 10 o'clock A. M. and 4 o'clock P. M., on said day at the Courthouse door of said County, I will offer for sale and sell at public auction, for cash, all the right title and interest of the said Bolt D. O. Smith, G. L. Kirvin, Pierce Petroleum Corporation, Firestone Tire & Rubber Company, Vacuum Oil Company, the Stockholders and the heirs of the unknown stockholders and the legal representatives of the Consumers Oil Company of Muleshoe, Texas, a defunct corporation, the stockholders and the heirs of the unknown stockholders and the legal representatives of the Petroleum Refraction Corporation, a defunct corporation, whose names are unknown, in and to said property.

Dated at Muleshoe, Texas, this 8th day of June, A. D. 1936.

JIM COOK, Sheriff of Bailey County Texas.
Publ. June 11, 18, 25, 1936.

This exclusive Super Condenser Top means efficient and economical operation

SUPERFLEX MAKES COLD BY BURNING KEROSENE

SUPERFLEX is the refrigerator that brings the delights and conveniences of city refrigeration to country homes. It keeps foods fresh, freezes ice cubes and makes frozen desserts by burning kerosene—just a few cents worth a day.

All you have to do is light the burners. The rest is automatic. At the end of 24 hours the burners go out. But Superflex keeps right on working. The burners don't have to be lighted again for 24 hours... or even longer!

And Superflex can be bought on easy terms, if you wish. Ask for free home demonstration.

THE MOTOR'S COOL AS MY NOSE SINCE THE BOSS SWITCHED TO - PHILLIPS 66 POLY GAS

If you want to save money... If you want to stop knocks and end the power-loss of overheating in hot weather... give your car a load of the coolest power you've ever had pumped into your gas tank. Fill-up with Phillips 66 Poly Gas! This sensational gasoline has always led the parade in matching motor fuel to weather—your weather, as scientifically determined by U. S. Weather Bureau standards. And it still tops in the field of customer-tailored gasoline, bar none. In addition, every gallon is now enriched with extra energy units by the scientific POLYMERIZATION process. This steps up the power-output of your engine. Less fuel does more. Obviously mileage is definitely increased. One tryout tankful will give you all the inside facts. Your own motor will prove the hot weather benefits of this cool-cutting gasoline, now winning new customers at the fastest rate in its history.

Our Very Finest Quality
A premium quality motor oil noted for long-lasting, tougher film. This 100% paraffin base lubricant stays in the motor and sticks to its job. In cases, 20¢ quart, 1 lb. half, 2 1/2¢ a quart.

Phill-up with Phillips for Greater Mileage

TEMPERAMENT OF LADIES REVEALED IN FEET OR WALK
To gauge a lady's temperament, Andre Perugia, of Paris, advised, look at her feet. The shoe designer who lists royalty among his clients gave these points:
"A woman who is envious and down-at-the-mouth—she generally has a bunion."
"A woman who walks pigeon-toed is, ah, dull—even stupid."
"A woman who is fearful, unsuccessful, walks a la Charlie Chaplin, toes

turned outward."
"A woman who is timid and self-conscious places her feet close together when seated."
"A woman who has a nervous temperament lacks rhythm in her walk."
"A woman who has 'sex appeal' walks along evenly firmly and with poise."
Perugia likes to design shoes to fit the foot and the personality. He recalled fashioning footwear for the Empress of Japan, the Queen of Siam, Queen Victoria of Spain, Marlene Dietrich, Lily Pons, Martin Davies.

BREAD RETAINS VITAMIN B
Very little of the vitamin B content of whole wheat or rye is lost in the baking process, according to Dr. Agnes Fay Morgan of the University of California.
Size of the loaf has a small effect in that the larger loaves have a slightly higher vitamin B content.
Crust of whole wheat bread is definitely lower in vitamin B than the crumb due to the higher temperature in baking.
Vitamin B helps protect the body against nervous disorders.

Seeks Commissioner of Agriculture Office

CLIFF DAY

Cliff Day, 47, Hale county farmer, has announced candidacy for office of Texas Commissioner of Agriculture. A native Texan, Day has farmed for 23 years. He is married and has six children. A year ago he sprang into national prominence when he led 4,500 farmers in an orderly visit to Washington in interest of national farm program. He was chairman last year of state cotton advisory board, chosen by farmers of the state.

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By MISS ALMA STEWART
Bailey County

Moves Clothes Closet
"When I planned to improve my storage space I decided to move it to the other side of the room, make it larger and paper it," said Mrs. O. R. Wilson, cooperator, of the Circleback home demonstration club.

Mrs. Wilson
Mrs. Wilson papered the inside of the closet with white wall paper to make it light and clean and keep the moths away. She built shelves on one side and a quilt above the clothes rod for hats. She has made hat and shoe racks. The closet is 41 inches long, 32 inches deep and 7 1/2 feet high, extending to the ceiling. The total cost of the lumber, paper and other material was \$143.

Teach Children Good Habits
"I have not hung up a dress for my five year old daughter, since I put up a rod for her clothes several weeks ago," said Mrs. W. H. Starkey, clothing demonstrator of the Bailey-boro home demonstration club.
"When I decided to improve my storage I decided if the children had a

rod for their clothing they would form the habit of taking better care of it so I put a short rod in the closet where my five year old daughter could reach it. She has not only hung up all her clothes but those of her two year old brother," said Mrs. Starkey.
Mrs. Starkey built shelves on one side for storing clothing and linens and a shelf above the rod for hats. She papered the closet with some left over ceiling paper that was given to her. The total cost of improving the closet was less than 50¢.

Important Questions Asked About Old Age Pensions; Answers

Austin, June 10.—There are questions that the people of Texas are asking Orville S. Carpenter, executive director of the Old Age Assistance commission, answers them:

Q.—When will first pension payments be made?
A.—July 1.
Q.—Are you sure of this?
A.—Yes, because both State and Federal pension money will be in the Texas Treasury. Texas was granted only recently \$1,181,250 by the United States government.
Q.—How many of the aged past 65 years of age will be eligible?
A.—As far as I can estimate now, there will be approximately 65,000.
Q.—How much will each one receive?
A.—Each one will receive up to a maximum of \$30 a month, or \$15 from the State and \$15 from the United States. However payments will be based upon need because of the Federal Social Security Law and the Texas Law. People who do not need as much as \$30 will receive less. All payments considered, the average will be around \$20 to each applicant who meets the requirements of the Texas law.

Q.—Does not the Texas law require that each applicant for assistance be investigated?
A.—Yes.
Q.—Is not the organization of the Old Age Assistance commission based upon rules laid down by the Washington and the Texas laws?
A.—Yes.
Q.—Is not the entire procedure for obtaining a pension required by the Texas Law and the Social Security Board in Washington?
Q.—Then the method in which you handle applications for assistance is mandatory upon you because of the Texas law and rules of the Social Security Board?
A.—Yes.
Q.—Is it true that some payments will be only \$9 or \$10 per month?
A.—Yes. Payments will be based on need. It is also true that payments will be \$30 per month to those whose needs require it. However the general average will be about \$20 to each old person on the pension rolls. This average is less is \$5 a month more to each needy

Typhoid Control Is A Community Duty Says State Medical

Austin, June 10.—"It is a well known fact that typhoid fever may result from the use of water, milk, or other food contaminated by bodily discharges of patients or carriers who harbor typhoid germs," stated Dr. John W. Brown state health officer.

"The fact that we know the source of infection and the means by which infection may be controlled, emphasizes the importance to all communities of providing water and milk of the highest quality."

"Texas is being host to many visitors this year, and all communities should put forth every effort to see that no epidemic outbreak which will put an unnecessary blot on the health record of this state."

"Typhoid fever may be controlled by the use of pure water, pasteurized milk and clean foods, by the proper disposal of sewage, by screening homes against flies, by protecting food from contamination by flies, by construction of the fly and its breeding places, by search for and care of carriers, and by anti-typhoid vaccination."
"Excreta from persons ill with typhoid should be carefully disinfected to prevent the germs from polluting the soil and this being carried into streams or wells and contaminating the water supply. Where there is an efficient system of water purification, typhoid fever has greatly decreased."

"It is the responsibility of each individual to establish adequate safeguards against the consumption of contaminated products at all times and in all places."

"It is the responsibility of each individual to further control the occurrence of typhoid fever by establishing immunity for himself by vaccination."

MAY NOW TEST OIL

A simple, five minute film strength and oiliness test for auto lubricants; has been perfected by the Continental Oil Co. being a pocket size device somewhat resembling a household nutcracker, and showing the maximum pressure under which any part of the car will turn smoothly.

It is stated all stations of this company will soon be equipping with them for accommodation of motorists.

SWIMMING POOL OPENS

The local swimming pool located in the southwest part of town was opened Sunday for the summer. Mrs. R. L. Faulkner owner of the pool is being assisted with the management by Emmett Hall, this city.
A large crowd of local swimmers and several from neighboring towns enjoyed the opening day.

POULTRY SUPPLIES
DOWN; MORE EGGS
U. S. Bureau Sees Decline in Prices During Year.

Supplied by the United States Department of Agriculture-W.V. Series.
Relatively short supplies and high prices for poultry are in prospect, says the Bureau of Agricultural Economics in its annual outlook report.
Eggs, however, will increase in supply and decline in price. There will be an increased hatch of young chicks in the spring of 1936. Prices of both poultry and eggs will decline in the latter half of the year.
There are more young chickens in farm flocks now than a year ago, but poultry receipts are not likely to reflect fully this increase until late next spring because of a tendency to save a larger than usual proportion of pullets for layers.
There are also more laying birds in farm flocks now than a year ago. This means an increase in egg production.
The bureau says that on the basis of volume of output, the hatchery industry in 1935 had the best year since 1930. Fairly sharp increases were reported from all sections of the country.
The higher egg prices are causing an expansion in commercial egg producing areas of the Pacific coast, and larger supplies of eggs from that section can be expected at eastern markets during 1936.
Consumer demand for eggs, it is stated, will depend upon consumer income and upon the price of eggs in relation to that of competitive foods.
The bureau believes that consumer demand for eggs will increase.

Chicks With Short Legs Caused by Diet of Hens
Newly hatched chicks with unusually short and shaky legs have been a puzzle to poultrymen.
Now poultry specialists of the United States Department of Agriculture have found that short-legged chicks often come from eggs laid by confined hens, which receive feed lacking satisfactory protein concentrates.
They found that not all meat meals furnish the proper kind of protein supplement for confined breeding stock. Several diets which contained meat meal as the sole protein supplement caused the hens to lay eggs from which short-legged chicks hatched. At the same time normal chicks hatched from eggs laid by hens receiving different kinds of meat meals as the only protein source.
Green grass, milk, and some meat meals contain the factor necessary to prevent these short-legged chicks. Rations for confined breeding stock, the specialists advise, should include milk, alfalfa leaf meal, and cod-liver oil.

Combating Hen's Enemies
In contrast with lice, the common poultry mite is not a permanent resident on the hen. It might be described as the chicken bedbug. For it attacks the fowls at night and leaves in the morning to hide in cracks and crevices of perches. During the night the mites swarm over the fowls, gorge themselves with food, irritate the hens, and cause them to lose rest and sleep. Poultrymen have learned to combat these enemies of the hen through chemical and other means. Clean the house thoroughly, removing every trace of litter and other materials. Then spray the house, roosts, and nests with coal-tar, cresol, nicotine, or crank case oil sprays—Lloyd's Dairyman.

Corn Supplies Heat
Nearly all farm raised corn can be used in feeding hens, but corn is the most efficient in supplying heat, says the Wisconsin Agriculturist. The amount of grain that a group of hens will consume varies, but where the grain is fed in the litter it is generally recommended that 12 to 14 pounds of scratch grain per 100 hens be fed daily. It is essential that the birds go to roost with full crops. Therefore, usually two-thirds of the daily ration of scratch grain is fed late in the afternoon; the other one-third can be thrown into the litter in the morning.

With the Poultrymen
Experiments at the Ohio State university comparing all mash rations fed dry to poultry with all mash rations fed wet point to a decided advantage for wet feeding. The investigators say wet mash is more palatable, and that the birds eat more of it, lay more eggs.
Hens in high production drink more water than poor layers. They also exhale more moisture and thus increase the humidity of the air in the poultry house.
Bloody eggs may result from a large blood clot diffusing throughout the entire albumen or may be the result of an injured oviduct giving forth blood in the albumen.
Do not feed liver oil in excess of the required amount; not more than one per cent oil or more than 2 per cent meal.
When the flock is properly fed it is not difficult to select the poor layers. They are the first to go out of production.

What's Happening In Washington And Other Cities Of Importance

More than \$100,000 a year is taken from letters that reach the dead letter office at Washington.
Treasury experts last week estimated the national debt at the close of June would be slightly short of \$34,000,000,000.
Wealthy Americans are reported investing huge sums in the Bahamas and other sea islands to escape the heavy taxation in the United States.
American Federation of Labor says we can count on at least 8,000,000 out of employment even when business gets back to normalcy.
It has been revealed that the WPA program is costing the government and local entities \$80 a month per person as compared to a direct relief cost of \$33.
There was an increase of 212,136 in the membership of the Roman Catholic church in America last year bringing the total up to 20,735,130.
The State of Iowa is said to be strongly anti-New Deal in its political favor. Estimates now are 2 to 1 against Roosevelt.
Cyrus W. McCormick retired reporter, died last week at Chicago of a heart attack.
Sister Ann Joachim of the Dominican order, was admitted to practice law before the U. S. Supreme court, last week. She is believed to be the first woman lawyer granted that privilege.
Thursday last week when President Roosevelt signed the \$536,332 navy supply bill it made a total of more than a billion dollars appropriated for national defense.
Since 1932 the federal government has borrowed, loaned and spent nearly \$18,000,000,000, which is more than three times the \$5,896,000,000 in bills and coins now in circulation.
The four Schechter brothers poultry dealers, who spent \$200,000 to have the NRA ruled unconstitutional are reported to be virtually penniless, and their home is up for foreclosure sale.
University of Chicago scholars who for 10 years have been working on compilation of a new dictionary find much difficulty in distinguishing between slang and pure news.
U. S. Congress held up by major leg-

islation also the death of Speaker Byrns and this week adjourned for the Republican national convention held at Cleveland Ohio will now not be able to adjourn before the middle of next week according to report.
Chief Justice Alfred A. Wheat of the District of Columbia Supreme court, last Friday upheld the constitutionality of the Public Works administration's \$200,000,000 power program in dismissing an injunction suit against 10 municipal electric projects in four states, including Texas.
Ellis H. Parker, detective who operated under direction of Governor Hoffman New Jersey, in an effort to probe to the facts regarding Bruno Hauptmann's connection with the Charles Lindbergh baby kidnaping, has been arrested on a charge of torturing a confession from Paul H. Wenzel, a former New Jersey attorney.
General News Over Texas And Adjoining States For The Week
The first summer term at State University, Austin, began June 9, running to July 20, the second beginning July 20.
Amarillo citizens have launched a drive for \$30,000 for Chamber of Commerce activities to be raised on the basis of \$10 per minute.
One million dollars of mohair wool, representing 750,000 pounds, was sold last week at Kerrville, bringing from 28 to 31 cents per pound.
