

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY SEPTEMBER 17, 1936

VOLUME 14 NUMBER 34

EXTRA SESSION LEGISLATURE IS ALLRED'S CALL

Solons Gather Sept. 28 To Provide Funds For More Pensions.

Governor Allred has called a special session of the legislature to convene Sept. 28. The governor said the primary purpose of the session would be to raise additional revenues for payment of old age pensions.

While the governor did not commit himself, it was expected the subject of enabling legislation to make other benefits of the federal social security act available to Texans also would be submitted.

Financing Main Subject

"The only subject definitely in mind of this session," Allred said, "is the financing of old age pensions. There are others, I don't know right now," he expressed opinion that legislation to change the old age assistance would not be in order under his administration. He declined to say whether revisions were needed.

"I know this," he said, "far more people are qualifying for pensions than I was estimated would. This is because Texas law is so liberal."

Estimate Exceeded

The original estimate was for 60,000 pensioners, but that number already has been exceeded, and thousands of applications have not been passed upon.

The governor said he would make recommendations on means of raising additional revenue, but would not announce them now.

"I don't know how much will be necessary," he said.

He voiced hope that only one session of 30 days would be necessary. Under the law, a special session may extend only 30 days but in the past additional sessions frequently have been called immediately.

Local Bills Tough Problem

"I also hope there will be a minimum of local bills," he added. "That always is a tough problem. I will try to cross that bridge when I come to it."

There would be no question he said, as to the legislative membership since the session was called well before the general election in November.

Some have questioned whether members elected in November or old members would be qualified to sit in a session between November and next January. The point has never been settled.

SIAMSE MARRIAGE OFF

Annulment of the marriage of James Moore to Violet Hillman, which occurred a few weeks ago at the Dallas Centennial was asked for in a filing made Friday of last week in New Orleans District court. They claiming it was merely a publicity stunt and they had never lived together as man and wife. Violet is one of the famed Siamese twins. The unmarried pair joined to Violet did not join in the court action.

STANDARD OF LIVING QUESTIONED AGED PENSIONER RECEIVING \$18 ASKS BOARD FOR A DECIDED INCREASE

The first objection to amount of old age pension being paid a claimant came to hearing before the Pension Commission at Fort Worth Wednesday of last week when a man, 73, who was allotted \$18 a month, was examined by Chairman A. W. Cunningham, Harlingen H. T. Kimbro, Lubbock, and W. O. Davis, Omaha, Texas. He had been a painter until he became too old to work he said, and insisted that \$18 a month was not enough to maintain his accustomed standard of living. Relief records, however, indicated he had been living on less than that.

"I'd just as soon start fasting again and starve to death as to live on this kind of a life," he declared. "There have been times when I have gone without food until I became weak. I have lived a good, Christian life and now that I am unable to do manual labor, I must have a living from some source."

I have been a hard worker. I know a man who has been a hobo and who is 66, just over the age limit. And he was allowed \$27 a month. I know of other persons who do not deserve their higher awards any more than I. My standard of living is as good as anybody's."

The man was informed the board will review his case and others upon which hearings have been held, about Sept. 25. They told him the average pension for this district is \$18.29 and for the entire state it is \$16.20.

Man insisted, however, that \$18 was not for him to begin with. He has no sufficient clothes, pay and to pay for medical treatment.

Tourists On Increase May Live In Trailer Is Latest Prediction

Current heavy sales of auto trailers forebode increased expenditures by motorists on long trips, edging travel closer to the status of America's leading industry, Joe H. Thompson travel expert of the Continental Oil Company declares.

The unexpected "trailer factor" necessitates upward revision of tourist business estimates for this and subsequent years. Last spring it was estimated \$4,000,000,000 would be spent during 1936 by approximately 10,000,000 touring parties on trips averaging 3,500 miles.

"With orders to trailer manufacturers indicating a volume of 2,000,000 units a year, and with something over 250,000 trailers already on the road, on long if not permanent trips we can safely add another \$200,000,000 to the 1936 estimate," Thompson said.

Whether time will prove the accuracy of Roger Babson's recent pronouncement that 65,000,000 persons, or half the population of the country, will be living permanently in trailers within twenty years is hard to tell now.

Plainview Truckmen Cooperate For Better Results In Selling

Twelve interested business men of Plainview have pledged \$600 of a proposed \$1,000 to be raised for a truck growers' demonstration in Hale county. For several years past irrigators of Hale county like those of Bailey county, have been growing farm truck in a haphazard manner with more or less indefinite results. While the yields have invariably been quite satisfactory yet the marketing of these vegetable crops has been more or less dissatisfying.

It is now proposed to pool the \$1,000 with 20 unit holders each of whom will plant not less than five acres of some special and agreed vegetable suitable for marketing purposes thus making a total of 100 acres for experimental purposes. Spinach and cabbage have been recommended as the unit product.

It is also stated certain steps will be taken toward co-operative marketing of these named crops for the benefit of growers.

SENATOR NELSON AND JUDGE MULLICAN FORM PARTNERSHIP

Senator O. H. Nelson, who last week moved from Tahoka to Lubbock, last Sunday announced his law partnership formed between himself and Judge Clark M. Mullican, recently resigned from the 99th District court bench. They will maintain a suite of offices in the McElroy building that city.

GETS \$160 FOR BROOMCORN

A crop of shed cured broomcorn near Littlefield sold last week at \$160 per ton.

Broomcorn will remain at a good price this fall, it is said.

There were 100 persons at the building, evidently believing the board would investigate their cases. It was explained, however, that the board is hearing only appeals of cases which have been docketed and the applicant notified of the time and place of the hearing. The next hearing will be held at Austin, Friday.

It was pointed out that should all old persons in Texas receive a \$15 a month pension, \$66,000,000 to \$67,000,000 a year would be required to pay them. There are approximately 1,000,000 taxpayers in the state which would mean each taxpayer would have to pay \$66 to \$67 a year in taxes for pensions.

Some folks are never satisfied, and of the old age pensions in Texas, according to Ken Harper, of that commission.

Already a few appeal hearings have been filled by people who are not satisfied with the pension now being received by them—and others will also doubtlessly be filed.

There are very strict rulings and procedure which will be adhered to by the Commission in these hearings, and full information as to procedure should be obtained before taking any direct action, thus perhaps saving considerable time and money and not jeopardizing their cause.

The Journal has on file in its offices rules of such procedure which it will be glad to discuss with any citizen of Bailey County who feels he is entitled to any redress increase of pension or other cause of action in connection with the Old Age Pension commission.

BLACKWATER VALLEY IRRIGATION FARMERS CASH IN BIG ON TRUCK CROPS NOW GOING ON THE MARKET

Dallas, Fort Worth, San Antonio and Other Larger Cities Make Bid For Vegetables Grown In This Section.

With the 75 or 80 irrigation wells in the Blackwater valley around Muleshoe pumping from 500 to 2,000 gallons of water per minute, to be applied to the large acreage of garden and farm truck being grown here, these products are now attracting attention of truckers and dealers for from hundreds of miles away. In just one day last week there were counted 25 trucks of various sizes here for farm produce, they coming from W. Chita Falls, Fort Worth, Dallas, San Antonio and other central points where large concentration and distribution of vegetables are desired. The following day there were two other trucks here that loaded with Irish potatoes, while still another truck went out with a mixed load of beans, carrots, bell peppers and cantaloupes. Last Sunday six more trucks rolled in to be loaded.

"That irrigation of truck is proving not only popular but profitable, is the statement of many engaged in this particular practice of crop raising. Even those who have irrigated cotton, and other crops, say it practically doubles the yield. One irrigator residing about four miles northwest of Muleshoe at Old Hurley last week cut a field of kafir corn, grown by irrigation, and which was freely estimated by neighbors to yield two and a half tons per acre. He has still more of this particular feed growing which will

Attention, Growers!

R. L. Brown, Realtor and F. C. Elliott, assistant farm agent, will have charge of gathering farm and truck product for the Bailey county exhibits to be shown at the fairs at Amarillo and Lubbock.

All growers who have exceptional products of any kind are urged to bring them to Brown's office in Muleshoe as early as possible. The afternoon of this week, the Amarillo exhibit must be placed the following day.

Sudan vs. Muleshoe In Game On Sunday Auto Week Racing

Sunday afternoon baseball game was played on the local field between Ballyboro team and Muleshoe's first team. Muleshoe was victorious, the scores being nine and two at the close of the game.

Excellent plays were made by both teams, and good sportsmanship was shown throughout the entire game.

A large crowd of baseball fans and interested people from Ballyboro and Muleshoe attended.

Muleshoe's second baseball team, under direction of Allen McReynolds, motored to Dimmitt Sunday afternoon for a match game. This was a hard fought but interesting game. Dimmitt being victorious seven and five.

Next Sunday afternoon the Muleshoers will play the powerful Sudan-grassers on the local park. Previous games between two teams have been of nip and tuck style, first one and then the other winning. The forthcoming game next Sunday will be hotly contested to determine who carries away the belt of sculps hanging from it.

A feature of the afternoon will be presence of an official scout from the St. Louis Cardinals team, looking for new material for big league teams. He has his eye on some of the Muleshoe

lads and will give them a careful look over Sunday afternoon.

It is also probable there will be some more of those ancient auto week races before the game is called, according to D. O. Smith, who says he already has a bunch lined up for entry some of which may have to be propped up to get them to stand long enough for the pistol starter.

THINK THIS OVER

If a man has something to sell you he knows it is not worth the price he has put on it, or if he has something to sell that is shoddy and of poor workmanship or material, one never hears of him going around advertising that article.

But if, on the other hand, he has something he knows to be of extra value and a real bargain, he invariably comes right out in the open and advertises that fact.

That is why it is always safest to buy from the man who advertises his goods. You are protected from the very start, for he wouldn't think of displaying prices in cold type unless he knew they were honest value and the goods serviceable and up to every claim he makes.

Millions of dollars are saved Americans every year by newspaper advertising. It is the only way to get the word out to the masses. It is the only way to get the word out to the masses. It is the only way to get the word out to the masses.

Nearby Oil Drilling Tests Report Good Progress of Holes

Cochran and Hockley counties, south and southeast of Bailey, continue to hold the spotlight of oil activities of West Texas in a development manner. The Dugan test near Whiteface in Hockley county is now down about 4,500 feet, a depth that has begun to create interest because it is getting close to supposed pay. Drillers are reported making about 60 feet of hole daily, drilling in anhydrite, a combination of red rock and shell beds, and expecting to encounter the lime around 4,900 feet.

The Slaughter well, about 10 miles east of the Dugan in the same county last week began setting 8-inch casing at 2,780 feet.

Last week L. C. Fink, in Cochran county, leased 1,000 acres of land to the Magnolia Oil Co., at \$7.00 per acre. Two weeks ago two other tracts were leased at \$3.00 and \$5.00 per acre, these higher prices lessing being good indications.

Across the line in Roosevelt county, N. M., the Franklin test, 12 miles West of Melrose is down about 1,200 feet. Geologists say the well is logging high, all claimed sand being reported at 900 feet.

First Pigskin Smash Of Gridiron Will Be At Dimmitt, Friday

The first football game of this season to be played by the Muleshoe High school team will be with the Dimmitt High school team at Dimmitt, Friday afternoon September 18.

The team, under direction of C. R. Stevens, coach, are doing some real work and practice. They are planning on bringing the larger end of the score home from their first game.

The line up of players who will go to Dimmitt will be Odie Rollins, Houston Hart, Don Moore, Frank Prescott, Woodie Lambert, Neil Prescott, Joe Bill Alsop, Clayton Hill, Clifton Griffiths, J. C. Hobbs, Horace McAdams, R. V. Ivy, Welton Winn, R. L. Hicks, and Myron Bayless.

Several football fans and various people interested in the local team are planning to attend this game.

Friday night September 25 a match game will be played between the Muleshoe and Levelland teams at Levelland.

U. S. TO FURNISH LABOR

The National Employment Service for Lamb and Bailey counties, J. Thomman sectional manager, Littlefield, announces its readiness to assist ginners, landlords, farmers and others in securing labor for crop harvesting time and other Fall work.

Mr. Thomman says his department is in position to furnish bookkeepers, clerks, farm laborers, including cotton pickers and other kinds of harvesters, also housekeepers, cooks, etc., to cotton or individuals needing such in the near future. There is no charge for this assistance said Mr. Thomman.

SEC'Y WALLACE TO DISCUSS INSURANCE OF CROPS AND BENEFIT PAYMENTS FOR FARMERS IN THE VARIOUS AAA REGIONS

Secretary Wallace last Monday announced a series of farmers community meetings designed to map out next year's "agricultural conservation program."

Wallace said the AAA planned the meetings in the farm areas in order to discuss crop insurance and possible maximum limits on benefit payments to each farm.

The Agriculture Secretary said the program aimed at providing "greater abundance for the average American farmer," and should help to check soil erosion, improve fertility, encourage better land use, and maintain farm income.

Describing these as "sound objectives," he said the farm program "will serve not only agricultural welfare but national welfare" by bringing "about a better balance in the production of crops and food."

Listed among "questions to be discussed" at the farmers sessions were: "Should a maximum total conservation allowance be established for each farm? If such an allowance were established, how should it be earned?"

"Is it necessary to have a more comprehensive crop insurance program than that provided by the agricultural conservation and commodity loan programs?"

Wallace has said there is a need for a vast program of federal crop insurance as a possible cushion for drought years.

Other matters suggested for discussion by farmers included possible changes in the method of payment of classifications soil-building practices, acreage bases and the recently announced "range land" program for Western

COM. COURT IN SESSION SETS OFFICERS PAY

Order Sale Of Land Judgments; School Accounts Passed.

At the regular meeting of Bailey County Commissioners' court, held here last Monday one of the principal tasks was the setting of salaries for various officials for the coming year, as follows:

Salary of county judge given a grant of \$75 per month from the county general fund, and \$75 per month from the county school administration fund, the salary remaining the same as previously, but being drawn in the future from two different sources as provided for by recent law.

Salaries of County Commissioners were increased from \$600 to \$900 per year. Salary of county treasurer reduced from \$1,200 to \$900 per year.

Salary of ex-officio county clerk changed from \$900 to \$300 per year, with the understanding the county should pay full and regular rates for all services extended to it.

An appropriation of \$800 each was made for expenditure on county farm agent and county home demonstration agent. All other official and official assistant salaries to remain the same for the coming year.

D. L. Lane was appointed constable for precinct three.

The Muleshoe State Bank account of school district receipts and expenditures was duly approved.

The 1936 county tax roll was approved. It was ruled that orders of sale on tax judgments taken at previous district court sessions should be issued and collections duly made.

SINGING AT LITTLEFIELD AUDITORIUM NEXT SUNDAY

The Lamb Grove Unit of Pleasant Singing convention will meet in the high school auditorium at Littlefield next Sunday, a big attendance being anticipated.

Seven quartets, song leaders and other prominently known musicians are expected to be present and take part in the program. All song lovers of this section are invited to attend and take part.

Prof. A. B. Sanders, superintendent of Littlefield schools, will deliver the address of welcome.

MAINE GOES REPUBLICAN

The old proverb "As goes Maine, so goes the nation," came true again last Monday when the Republicans swept the state in the primary election.

Voting was quite spirited in the "political weathervane state." Republican Senator Wallace H. White, Jr., winning over Gov. Louis J. Brann by approximately 5,000 votes in the state.

CLAVIS CLUBS PLAN MEETING HERE WITH BUSINESS MEN

At the regular meeting of the Chamber of Commerce held last Friday it was ordered that the suggestion of officials of the South Plains fair to be held at Lubbock for a special "Muleshoe day" be accepted and such officials be notified that Friday, October 25, was the day so chosen as being most favorable for a large attendance of citizens, also, the best day adapted for school pupils to attend.

It was stated the survey band was making arrangements to be here for one day of the Bailey county fair, for which arrangements are now being made.

Gilbert Willard stated that members of the Clovis, N. M., Chamber of Commerce, Rotary and Kiwanis clubs desired to come to Muleshoe for a fraternal meeting with the local organization, which suggestion met with favorable reaction of members present. Mr. Willard being appointed to arrange details of the visitation.

President Connie Gupton appointed a committee to nominate officers for the coming year.

USED PICK-UP FORDS

We have 1934, 1935 and 1936 used Ford Pickup cars, all in A-1 condition. Priced very reasonable, and with the usual low terms for payment.

There are thousands of miles of satisfactory used service in each of them.

Motor Co.

PROVED BY THE PAST—IMPROVED FOR THE FUTURE

Increasing Diabetes Presents Problems Says State Doctor

Austin, September 15.—The increasing incidence of diabetes presents a serious problem to the average citizen, according to Dr. John W. Brown, state health officer. "Ordinary diabetes, that is diabetes mellitus, which is often referred to by many persons as a disease of the kidney, is not a kidney disease, but a disease of the pancreas in which there is deficient production of insulin," Dr. Brown said, "and this mistaken idea that diabetes is a kidney disease probably results from the fact that the insulin deficiency cause large amounts of carbohydrates (sugars and starches) to pile up in the body. The result is that the patient drinks large amounts of water, and because of this, large amounts of urine containing sugar are passed.

"The pancreas is a vital organ located in the upper abdomen behind the stomach. It has a double function; it supplies the most powerful digestive juice in the body, known as the pancreatic juice, which it pours into the intestine through special ducts developed for the purpose; and it makes another substance, called insulin, which goes directly into the blood, and is essential for the use of sugar in the body.

"Obesity and heredity overshadow all other factors in the causation of diabetes. Most diabetes are fat. Not every fat person, of course gets diabetes. Heredity seems to be the most important link in the chain of diabetes from generation to generation. In the adult, however, obesity brings out the predisposition to the disease. "Early diagnosis by a competent physician, with consequent proper treatment, enables the diabetic patient to live a useful life, and retards the development of complications."

FIRST BALE OF COTTON IS BROUGHT BY WILLIE ELLIS

The first bale of cotton from the 1936 crop arriving in Muleshoe was ginned Wednesday by Willie Ellis, residing on the C. S. Smith farm south of town. He had 1,800 pounds of lint in the load. The bale was ginned by the Edwards gin. A premium is also being made up for the producer, details of which were not learned as this newspaper goes to press.

Fuel Value of Wood Dry wood is of greater fuel value than green wood. Each 10 per cent of water or moisture in wood will detract about 12 per cent from its value as fuel.

"Little Stories for Bedtime" by Thornton W. Burgess

LIGHTFOOT MAKES A SURPRISING DISCOVERY

PROBABLY there is no happier time of the year for Lightfoot the Deer than when the dreadful hunting season ends and he is once more back in his beloved Green Forest with nothing to fear. All his neighbors called on him to tell how glad they were that he had escaped again and how the Green Forest would not have been the same had he not returned.

For a Long Time Lightfoot Stood Staring at That Footprint.

That he could not be happier. There was plenty to eat, and that blessed feeling of nothing to fear. What more could anyone ask? He began to grow sleek and fat and handsome than ever. The days were growing cold and the frosty air made him feel good. Just at dusk one evening he went down to his favorite drinking place at the Laughing Brook. As he put down his head to drink he saw something

which so surprised him that he quite forgot that he was thirsty. What do you think it was he saw? It was a footprint in the soft mud. Yes, sir, it was a footprint. For a long time Lightfoot stood staring at that footprint. In his great, soft eyes was a look of wonder and surprise. You see, the footprint was exactly like one of his own, only smaller. To Lightfoot it was a very wonderful footprint. He was quite sure that never had he seen such a dainty footprint. He forgot to drink. Instead he began to search for other footprints and presently he found them. Each was as dainty as the first one. What could have made them? That is what Lightfoot wanted to know, and what he meant to find out. It was clear to him that there was a stranger in the Green Forest, and somehow he didn't resent it in the least. In fact, he was glad. He couldn't have told why, but it was true.

Lightfoot put his nose to the footprints and sniffed of them. Even had he not known by looking at those prints that they had been made by a stranger, his nose would have told him this. A great longing to find the maker of those footprints took possession of him. He lifted his handsome head and listened for some slight sound which might show that the stranger was near. With his delicate nostrils he tested the wondrous little Night Breezes for a stray whiff of scent to tell him which way to go. But there was no sound, and the wondrous little Night Breezes told him nothing. Lightfoot followed the dainty footprints up the bank. There they disappeared, for the ground was hard. Lightfoot paused, undecided which way to go.

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By MISS ALMA STEWART Home Demonstration Agent Bailey County

Plants Fall Garden To fill my budget for a family of four, which is 500 feet of leafy green or yellow vegetables, I have planted English peas and carrots for fall, and I have the ground ready to plant yellow turnips, said Grace Churchill, garden demonstrator of the Muleshoe 4-H club.

Serves Leafy Vegetables "Since I am raising the leafy green or yellow vegetables for our family, it is necessary for me to plant 145 feet per person which will amount to 1160 feet for eight people," said Leon Been, garden demonstrator of the Fairview 4-H club. Leon plans to serve the string beans and snap peas while they are young and tender so they will be leafy vegetables. For other leafy vegetables she planted Swiss chard, spinach, endivegreens and mustard.

Plants Herbs "I have added two herbs to my garden this year," said Mrs. Roy Sheriff farm food supply demonstrator of the West Camp home demonstration club. Mrs. Sheriff added, "I planted parsley to use as a garnish and to season with, I planted sweet basil to season soups and stews."

Sub-Irrigation Pays "We planted part of our Irish potatoes on sub-irrigated soil and the others on surface irrigated soil in the garden and dug more from the sub-irrigated ones to eat fresh than the others," said Mrs. J. A. Johnson, co-operator of the Goodland home demonstration club. Mrs. Johnson added, "We did not realize how many more potatoes we had made on the sub-irrigated soil until we dug and weighed them. We made 30 pounds per row on the surface irrigated soil and 60 pounds per row on the sub-irrigated soil. The sub-irrigated ones were much smoother and had fewer blemishes."

Does Not Need Help to Find Clothes "I do not have to disturb my mother because when I need a clean dress, I can get it myself since mother has fixed a place for my clothes," said Jo Ann Williams, four year old daughter of Mrs. J. S. Williams, West Camp wardrobe demonstrator. When Mrs. Williams and her husband built two new clothes closets, their home they improved an old closet and rearranged the rod in a charbrobe by making it low enough the four year old daughter could reach it and keep her clothes hung up.

Cans Tomato Juice "I plan to can a lot of tomato juice this fall," said Mrs. Wm. G. Kennedy co-operator of the Progress club. Mrs. Kennedy says she will extract the juice from the cold tomatoes because it will give an excellent product which has a good color, flavor, and consistency. She plans to heat the juice to 120 degrees Fahrenheit (or to simmering point) and fill containers immediately. She will process No. 2 tin cans or pint jars in boiling water for 8 minutes.

Fills Fruit Budget "I will be able to fill my canning budget as far as the fruit is concerned even though the freeze did kill part of our fruit," said Mrs. C. H. Jusus, farm food supply demonstrator of the Muleshoe home demonstration club. Mrs. Jusus budget calls for 30 containers of our fruit and she has already ready canned two-thirds of that amount. They raised strawberries,

blackberries, grapes and plums. She says she plans to exchange some products for enough apples and other fruits to finish filling her budget.

Sprinkling Saves Time "I put out tomatoes on sub-irrigated land a month later than the surface-irrigated ones were put out and the first ripe tomatoes were picked on sub-irrigated soil," said Mrs. Roy Sheriff, farm food supply demonstrator of the West Camp home demonstration club. "I hope I will never have to put tomatoes on any soil except sub-irrigated for it takes much less work, less water, the soil produces more, and one has a much better quality product," added Mrs. Sheriff.

Better Quality Tomatoes "My tomatoes that were sub-irrigated are smoother and a much better quality than the surface-irrigated ones in the same garden," said Mrs. J. G. McNairy, farm food supply demonstrator of the Progress home demonstration club. Mrs. McNairy says it is a relief to know that one can turn the water in and not have to worry about the ditch running over. She says the sub-irrigated tomatoes have made more than five times as many as the surface-irrigated ones in the same garden.

Maple News Items

Sunday school was well attended Sunday. There were 52 present at the Methodist church. The ladies of the Methodist church met Monday and reorganized the missionary society. Mr. and Mrs. Ernest Joyce have moved to Dallas where he has accepted a position with a hardware concern. We are sorry to lose them from our community. Maurice Tombs is sporting a r car. Little Freeman and LeRoy Blaylock, of Welsh, are visiting their grandparents. Mr. and Mrs. W. L. Blaylock, Rev. and Mrs. Hugh Blaylock, of Welsh, are announcing the arrival of a daughter, born at a Lubbock hospital. He was formerly pastor of the Muleshoe church. Mrs. Virgil Rackard and on Jack, of Ada, Okla., visited her parents, Mr. and Mrs. J. C. Tyson and other relatives here last week.

H. D. Club Meeting The Maple H. D. club met Thursday, Sept. 10, with Mrs. W. W. Mead, hostess. Miss Alma Stewart gave a demonstration on canning beets and carrots. We will meet again the first Thursday in October with Mrs. E. B. Fleming—Reporter.

France Has a Plane Without Wings

WITHOUT wings and with propellers doing double duty, this new gyro-plane presents an unusual sight indeed. The propellers not only act in windmill fashion to sustain the craft in the air, but they also propel it. The plane is equipped with a Hispano motor and was piloted by Maurice Claisse in extensive tests.

Seed Catalogues

A History-Making Winter

A FAMILY STORE.

St. Clair's Variety store is just what it's name indicates, supplying a wide variety of merchandise for all family needs.

For instance... here you will find shoes suitable and fitting for the entire family... Ladies Suede Shoes priced at from \$1.98 to \$3.95... Children's Shoes, in sizes from 8 1/2 to 3, priced at from \$1.00 to \$2.25... Men's Shoes run in prices from \$1.98 to \$5.00 either work or dress kind.

We have a brand new line of Khaki Suits for men and boys... There are new Fall Hats the nifty novelty kind for the coming seasons.

You will want to see our new line of Prints beautiful fall colors and new designs in keeping with season's demands. We have a choice line of Fall Dresses coming in Prints and Silks including the latest styles in trims in a price ranging from \$1.00 to \$4.95—they're hard to beat!

See our new Fall Coats—something that will not only fit but delight every feminine member of the family—and they are so charming in their tailoring effect so warm and cozy yet so very reasonably priced... Every member will want one—and they can be afforded at the low prices we ask.

TRY OUR LAY AWAY PLAN FOR FALL BUYING

Pick out the article or articles you desire, make a reasonable down payment on them, then pay a little along until you are ready to take it out. We want to help our customers in every way possible.

Phillips 66 POLY GAS
MAKES ANY CAR RUN BETTER

WHY, I REMEMBER WHEN PHILLIPS HAD ONLY TWO STATIONS!

YES--THAT WAS ONLY EIGHT YEARS AGO. NOW THERE ARE 13,800 PHILLIPS STATIONS! IT SURE TAKES A GREAT GASOLINE TO GROW LIKE THAT!

LISTEN to a success story: But remember that you haven't heard the whole story until you have listened to your motor after filling the tank with Phillips 66 Poly Gas!

The times have been tough. And so has the competition. Yet, every year right through the Depression, sales of Phillips 66 kept climbing higher and higher to new record-breaking levels.

Obviously when every man and woman had economy uppermost in mind, only a product giving exceptional value could have earned such tremendous gains in popular approval.

Today, thanks to wise and thrifty motorists, Phillips is one of the largest independents in the entire oil industry. And as an Independent, Phillips has rolled up a remarkable record of pioneering.

Phillips was first to match gasoline to weather. First

to offer high test gasoline at the price of ordinary motor fuel. First to offer at all its stations the extra-powered gasoline resulting from the patented POLYmerization process.

Why not give your motor a chance to surprise you? Try a tankful of the new Phillips 66 Poly Gas. It's a sensational motor fuel. And a sensational value, too, since it does not cost a penny more than ordinary gasoline.

PRIZE-WINNING HORSE BOUGHT BY LOW-INCOME FARMERS

The prize-winning Percheron stallion shown above is one of 83 pure-bred sires which cooperative groups of low-income farmers in Texas and Oklahoma have been enabled to buy through loans from the Resettlement Administration. The other photograph was taken at a cooperative fair also bought with a Resettlement loan for use of a group of low-income farmers whose fields were so small that they had been unable to obtain adequate service. More than 2,900 Texas and Oklahoma families are using such cooperative services established this summer by means of loans from Resettlement. In addition, individual borrowers in these two states have used Resettlement loans to buy 16,932 milk cows, 1,288 horses, 20,111 mules and 137,812 head of poultry, and have also purchased \$750,000 worth of farm machinery.

THE JOURNAL'S Weekly Scrapbook

This Week's Recipe

Fruit Punch—Six oranges, 4 lemons, 1 pint cold tea, 1 cup sugar, 1 cup hot water, 1 pint grapejuice, 1 pint carbonated water. Mix fruit juices and tea. Add sugar and water for eight minutes. Cool, add fruit juices and keep in a pitcher near to ice. Just before serving add cracked ice and carbonated water. Or the latter can be dispensed with.

Week's Beauty Hint

If the light-colored dancing slippers are scuffed and shabby, why not have them dyed black or some dark color? You can have them dyed at any good shoe repair shop at a nominal rate if you are afraid to attempt it at home.

A Kitchen Hint

If chicken prepared for salad is allowed to stand in refrigerator, it is allowed to stand in French dressing for an hour before serving, the flavor of the salad is much improved. Before adding mayonnaise at serving time, drain off the French dressing.

Worth Knowing

In pressing, never put an iron on the right side of the material except cotton. Always lay a cloth between the iron and the material, and you cannot go wrong with the iron.

The Family Doctor Says

Young children should be given simple ice cream, chocolate vanilla and other plain flavors are excellent for them. Rippe fruit, such as bananas may also be used. For very small children, avoid sticky fruits, or fruits that may freeze into hard, icy lumps. Also avoid fancy garnishes. These add little needed food value and often train young children in the bad habit of demanding all sorts of fancy syrup and fruits, which they do not require.

What's Happening In Washington And Other Cities Of Importance

Following signature of a petition by 4,000 people, Senator Norris, Nebraska has decided to run again on an independent ticket.

Gov. Talmadge of Georgia has conceded his defeat for the U. S. Senate by Senator Richard B. Russell Jr. re-elected at the primary last week.

Secretary Wallace last Friday announced stockmen in 13 western states would receive AAA cash payments from the government for range-building practices.

Mangus Johnson a Swedish immigrant who came to Minnesota a few years ago and rose to be a United States senator, died last Sunday of pneumonia.

The Republican party has already spent \$1,787,811 on the present presidential campaign, according to report made last week. It still has \$494,000 in its treasury and more coming in every day.

The Bureau of Agricultural Economics, Washington, announces that the world wheat supply is now estimated at 2,448,000,000 bushels, a decrease of 110,000,000 bushels from last year. However, these figures do not include Russia where the crop is said to be smaller than it was last year and China, where it is reported somewhat larger.

Paid his Way

Gov. Alf Landon earned the money with which to pay his way through college by working on a pipeline gang during the summer months.

West Camp News

This community was visited by another fine rain early Sunday night.

Mrs. C. E. Dotson had her brother and sister from Wellington and McLean visiting her last week.

Rev. and Mrs. H. H. Copeland attended church at Progress Sunday and spent the afternoon with their daughter, Mrs. Oral Stone, in Muleshoe.

E. L. Smith attended to business in Muleshoe, Monday.

Mr. and Mrs. Wallace Kelly are sending several days in Amarillo, where Mr. Kelly is attending court.

Jno. S. Williams and family returned from San Angelo, Thursday last week.

Mr. and Mrs. Amos Williams, of Progress, spent Sunday with the John Mount family.

Miss Virginia Ruth Robertson went to Lubbock Sunday, where she will resume her work at Texas Tech.

H. D. Club Meet

The Home Demonstration club met with Mrs. E. Walker Wednesday, Sept. 9. There were 13 members and five visitors present. Miss Alma Stewart, demonstration agent, gave a demonstration on canning baby beets, carrots and beans. We discussed the Bailey county fair which will be held at Muleshoe in October and almost every one present plan to take exhibits to the fair.

The next club meeting will be an all day meeting October 23 with Mrs. J. H. Stone.—Reporter.

Use No Marriage Rites

Legal marriage is not universally accompanied by some form of religious, civil or social ceremony. Tribes exist, such as the Kurumba on the Nilgiri plateau of southern India, that manage to get along without marriage rites of any kind.—Collier's Weekly.

Mother's Cook Book

MEATS AND OTHER FOODS

AS THE main dish of the dinner is usually some form of meat, fish or fowl, something different is always a delight.

Chicken Almonds.

Cut with shears the raw meat from a three-pound roasting chicken. Cut into cubes. Soak one-half cup of dry mushrooms in one cup of water or beef and cut one cup of fresh ones. Cut a large mild onion into cubes. Fry one cup of blanched almonds in four tablespoons of peanut oil until crisp and brown, remove from the oil and keep warm. Place the chicken in the hot oil, add mushrooms and onion and one-fourth of a cup of water. Cook until the meat has lost its color, add almonds, and thicken with a tablespoon of soy sauce, one teaspoon of cornstarch and two teaspoons of water. Serve in a bowl, very hot.

Stuffed Shoulder of Lamb.

Have the shoulder blade removed from the meat, wipe with a damp cloth to remove any bits of bone. Sprinkle with salt and pepper. Fry one small onion in four tablespoons of butter, add two cups of soft bread crumbs, season with salt, pepper and a tablespoon of chopped celery. Mix well and fill the pocket with the stuffing. Put the meat in a roasting pan into a very hot oven to sear the meat well and brown for 15 minutes. Reduce the heat to a moderate oven, add one cup of boiling water and bake 15 minutes to the pound, basting every half hour, adding more water when necessary. Pans are especially good to serve with lamb.

Smothered Broiled Fish.

Broil and chill a fine slice of halibut or salmon. When ready to serve lay on a cold chop plate, surround with cooked chilled string beans; partly cover the fish with a garnish of pickled nasturtium seeds or capers, sliced olives and very small cooked beets arranged ornamentally. Serve with sauce tartare, and at the same meal serve strawberry shortcake for dessert.

IN THE VANGUARD OF BANKING PROGRESS

Always among the first to adopt new banking practices designed to safeguard the funds of its depositors, this Bank, since the very inception of such provision now provides the benefits extended by the Federal Deposit Insurance Corporation to individuals, firms and corporations.

The protection thus made available is a permanent feature of the Federal banking statutes and offers an important attribute of sound banking to all banks. It applies to all accounts up to and including \$5,000. Larger deposits are insured up to the maximum of five thousand dollars.

In thus extending this additional safeguard of deposits to our customers, we continue to keep step now as in the past with all new developments of constructive value to modern banking.

WEEKLY LAY SERMON

THE DRAMA

By JESS MITCHELL

The drama is an echo of the feeling implanted in the human soul by the Creator, and is manifest from early childhood down to old age. When Aeschylus and Sophocles, Racine and Corneille Alfieri and Shakespeare brought forth their masterful productions... they were simply giving public expression to the feelings of the human heart.

Suppress it you can not, since it is of divine origin; but to educate it, purify it, direct it, and put it in a channel for human good is entirely possible. Because the drama has been degraded that should not be against it, any more than because music has been polluted by the depraved of humanity for the past four thousand years. No church would refuse to give music full sway in its service, and drama is only its twin and should be accorded equal courtesy. There is abundant opportunity for the use of drama in a clean wholesome manner. In the concert hall, in the theatre, on the public stage or life in the churches, in every avenue of human existence, it may be turned to the account of human good. No theatre nor modern movie should be allowed a monopoly of it. It belongs to the good, and the good of every organization should take advantage of the opportunity which the dramatic instinct offers them toward the inspiring and moulding of human character.

In the Sabbath schools, by virtue of Scriptural scene by descriptive gesture and impersonations, the teachings of Holy Writ may be enforced and fastened upon the mind of pupils. In schools and colleges in all attempts at moulding and reform, less of the didactic and more of the dramatic, will be more successful. Many of the greatest ministers of the Gospel have been successful in winning men to a higher station in life enforcing upon them loftier ideals and more noble aspirations not because of their forceful argument; but because of their ability to graphically portray the truths they expounded in an animated and spectacular manner.

This enforcement of the drama does not mean it shall be brought into the church, rather that the church should take advantage which the impulse for drama offers it for successfully fulfilling its mission. If the church is to maintain

its every thing else but the world's amusements, it is just a failure in just that much. An adjunct for recognition, defense and development of the dramatic element of human nature would provide incentive to the moral institutions of the world. There are thousands of people asleep in their graves today because they have taken too freely of the drama which was tainted with vice and impurity.

It is a privilege of the good of this world to exercise their powers toward the elevating and ennobling of the spirit—making it fit for every home and public place. That it can be done there is no question, the methods, however, would be too lengthy for discussion at this time. The dramatic element is bound to manifest itself. No chain is strong enough to bind it, no prison walls thick enough to contain it. One's every effort of suppression will be in vain. If it be not guided in the right direction by the good of the land, it will be plunged in the wrong direction by the bad. It is bound to be either an angel or a satyr.

When Shakespeare said, "All the world's a stage, and all the men and women merely players," he just reiterated the expression of Socrates of Athens fifteen centuries before that time. The longer one lives the more they become impressed with that truth. In fact, when all our life's work is done, and this old world lies down in the last throes of death, the last drama will be more startling and spectacular than any and all others.

The scene will be the last day, and the players will be kings, queens, merchants, beggars, fools. The footlights will be burning torches of planets in conflagration. The orchestra will be the sounding trumpet that wakes the dead and calls humanity to final judgment. The applause will be the beat of angry waves against the heated rock-bound coast of a dying world. The curtain will be a fiery scroll leaping from continent to continent, and in the last scene, the natives will tramp across the stage, some to the right and some to the left while the trunder heaven will boom and beat in warning as the curtain of time makes its final drop.

Contour Strip Crops Obviate Point Rows Hold Water Better

Contour farming is a fine way to reduce run-off and erosion on cropland fields, but strip cropping is even better, according to reports to the Soil Conservation Service.

Strip crops on the contour not only retard run-off but in most fields the close-planted crops take up the short, "point" rows that result from variations in the contour. Very few fields have the same angles of contour from one side to the other.

An experiment in the South showed that land planted on the contour to cotton alone lost 10 times as much soil as a similar field strip cropped with cotton and oats.

Land in cotton alone with rows up and down hill lost soil at the rate of 17 tons an acre and more than half of its rainfall. The strip cropped land averaged only half a ton per acre soil loss and lost only a little of its rainfall.

Strip cropping is alternating strips of close-growing, many-rooted crops—such as grasses, legumes or small grains—with rows of clean-tilled crops like corn and cotton. Strip crops spread out soak up the water that runs off the row crops and act as barriers to any small gullies that may form in the freshly tilled soil.

Strip cropping in the wind eroded area consists of the planting in strips of either close-growing crop or of the regular planting width of sorghum which are wind erosion resistors. Crops of this section which should be planted in strips with erosion resistant crops are corn cotton and beans. Strip cropping of this kind furnishes protection against wind damage.

PARENT-TEACHERS HOLD FIRST MEETING OF YEAR NEXT MONDAY

The first meeting of the Parent-Teachers association for the current school year will be held next Monday night in the High school auditorium according to announcement made by Mrs. A. W. Coker, president.

The following program will be given: America, assembly Evocoon, Prof. W. C. Cox. Talk, "Intelligence in the Home," Flauidie Gallman. Song, "Dolly Stop Weeping," Wynell Buchanan. Duet, "La Golondrina," Evelyn Jennings and Wiley Baker. Talk, "Intelligence in the Community," Rev. R. S. Watkins. Piano numbers, "Evening Song," "Twilight Meditation," Mrs. Gallman. All citizens, young or old, and especially school patrons, are invited to attend this first meeting.

Kept All Promises

During his four years as chief executive of Kansas, Governor Alf Landon fulfilled every campaign promise he made, and made good on every plank in the party's state platform.

REV. JENKINS "FOUNDED" AND EXTENDED UNDETERMINED CALL

Saturday night a fine token of the love and appreciation of members of the Baptist church Amherst, was given their pastor, Rev. L. S. Jenkins, when they gathered at the church with gifts, salore, singing lustily, "Happy Birthday to You," according to report carried in the Amherst newspaper last week. Rev. Jenkins had but recently completed a revival meeting there, in which he did the preaching himself, it resulting in 74 additions to the church 39 by baptism and 35 by statement and letter.

A big birthday cake with the appropriate number of lighted candles glowing on its surface was a feature of the social hour, while the more than 200 people gathered there brought great quantities of foodstuffs and other gifts for their beloved minister and family. The following Sunday there were 250 pupils in Sunday school, 155 at the

B. Y. P. U. service that evening, conversion during the day and others to unite with the church, further token of the high esteem which the minister there is in his people, he was again called... terminate length of time." Rev. Jenkins was a former of the Baptist church in Mu.

Roosevelt Is Cutting Landon's Lead In The Literary Digest Poll

Landon's lead over Roosevelt decreases to less than 2 to 1 in the second week's report of The Literary Digest - 10,000,000-ballot Presidential straw poll.

Landon is shown receiving 61,160 votes and Roosevelt 33,522 with Lem2 trailing the two major candidates with 4,169 out of a total of 99,734 ballots reported.

Thomas is indicated receiving slightly over one-half of the balance of 1% of the total vote cast to date which is divided among the other four candidates.

Votes are now tallied from Indiana, Minnesota, Ohio, Oklahoma and Texas for the first time.

The balloting in Maine shows a decline percentagewise for Landon from more than 2 to 1 last week to a little over 2 to 1 this week.

New York continues to vote approximately the same the second week as it did the first, over 2 to 1 for Landon. The Republican lead in Pennsylvania is noted as increasing as the volume of ballots reported from the Keystone state nearly triples in the second week's tally.

The first returns from Texas show a lead of well over 4 to 1 for Roosevelt. Oklahoma's first votes are meager but give Roosevelt 712 votes to Landon's 618.

The early ballots from Ohio give Landon more than a 3 to 2 lead over Roosevelt with 3,292 marked for the Republican candidate to 2193 ballots in favor of the Democratic nominee.

An addition of over 11,000 votes from New Jersey increases Landon's last week of over 2 to 2 fractionally. On the basis of an Electoral College division so far Landon would receive 155 votes to Roosevelt's 34.

Lubbock Boosters Of So. Plains Fair Due Here Thurs. Sept. 24

Lubbock, Sept. 15. On their annual goodwill swings of the South Plains in the interest of the Panhandle South Plains fair, Lubbock business and professional men, loaded down with souvenirs and fair publicity, will visit the territory during the next two weeks.

Traveling in large buses and augmented by the Lubbock High school band, the goodwill visitors will stage a short program of entertainment in each town and at schools along the route. The band will play short street concerts and speakers will present an invitation to "Come to the Fair."

The goodwill party will arrive in Muleshoe Thursday, September 24, at 11:40 a. m., according to their schedule remaining here 30 minutes for a program on Main street, then going on to Clovis, where they will extend a like invitation and have lunch.

Mr. and Mrs. James Morgan and children moved to Amarillo the latter part of last week where he will be employed in a grocery business. For the past several months he has resided here being employed at the H. C. Hennings grocery store.

Jack, J. M., and C. M., Conner, of Turkey, were here Friday of last week prospecting for a land location in this section of the country. They were very well pleased with conditions in this irrigated area.

Mr. and Mrs. Dick Rockey and Bud Ekins left last Saturday to attend the Centennial, viewing especially the Ford Motor display. They will also go on to Waco, to visit with Neil Rockey who is convalescing in a hospital there.

Mr. and Mrs. John W. Withrow, formerly of Muleshoe but now living in Turkey, were here the latter part of last week looking after their property interests located northeast of town, and visited her daughter Mrs. Benny Dyke at Laubadie.

Misses Janette and Jamie Lee Watkins left Monday morning for Fort Worth where they will resume their studies at the Texas Women's college. They were accompanied by their parents, Rev. and Mrs. R. S. Watkins and brother Burgin, who will visit the Frontier celebration.

Mr. and Mrs. A. J. Gardner sons Paul and Max returned home Sunday evening from a few days vacation trip to Fort Worth and Dallas where they attended the State Postmaster's association meet at Dallas and the State Democratic convention at Fort Worth. While gone they attended the Centennial exposition and the Frontier celebration.

Mr. and Mrs. Joe Gregory and family, of Odessa, accompanied by their mother Mrs. J. W. Gregory Jr., to her home a few miles west of Muleshoe. She had spent several months visiting her son and family in New York. Shortly after their return, Mr. and Mrs. Gregory the mother, Mr. and Mrs. J. L. Gregory and Miss Marion Ireton, took a trip to Roswell, N. M., going on to visit the wonders of the Carlsbad cavern that state.

Simple Economies
"The fundamental principles of government finance are exactly the same common-sense principles that we follow in the handling of our own private finances. So long as our government follows these principles our people will prosper. But if our government disregards these principles, it squanders our resources and destroys the public credit."—Alf M. Landon.

1,200 Taxes a Day for Average Man

His Wife Encounters 1,500; Roosevelt Administration Adds Many.

CHICAGO—With federal indirect ("hidden") taxes increased approximately 25 per cent during the Roosevelt administration, there are now more than 1,200 hidden taxes involved in the daily life of the average man, Robert Kratky, director of the tax division of the Republican National committee here, declared. He said there are 300 more in the daily life of the average woman.

"The average man begins with the alarm clock, on which there is a luxury tax of ten cents, in addition to 30 other hidden taxes," Mr. Kratky said.

"Taxes now take 26 per cent of the cost of underwear, 20 to 40 per cent of the cost of soap and 21 per cent of the cost of razor blades.

"There are 44 taxes on a pair of overalls, 62 on a shirt, 63 on a suit, 53 on a hat, 59 on a tie, 62 on a pair of socks and 63 on an overcoat. Taxes take \$3.53 on an \$18 suit, 59 cents on a \$3 hat, 20 cents on a \$1 tie, 7 cents from a 35 cent pair of socks and \$5 from a \$25 overcoat."

At the breakfast table, Mrs. Average Man can help her husband count.

"Fifty taxes take 2 cents from a dime loaf of bread," said Mr. Kratky. "Sugar's 43 taxes represent 23 per cent of the cost. A 35 cent pound of meat would have cost only 28 cents, but for 34 taxes.

"With this drain on the family income, the living struggle has become more burdensome day after day under the Roosevelt administration."

Gov. Landon's Letter Cheers Sick Youth

CHICAGO, ILL.—A fellowship of experience between Alex Oskirkko, 17, and Gov. Alf M. Landon, Republican nominee for President, has eased the long days on a sickbed for the boy.

"Alex was injured in a football scrimmage, osteomyelitis set in and now he is a chronic invalid, subject to continual pain. Gov.

ALEX OSKIRKO

Landon heard of the case in conversation with a friend. As a result, Alex got this letter:

"Dear Alex: Just today I learned of you. I want you to know that you have my deepest personal admiration for the magnificent fight you are making to regain your health and strength.

"You may have heard that, as a boy, I too suffered an accident in a football game while a student in the Marietta academy at Marietta, O. While not as serious as yours, that accident forced me to give up football playing.

"Keep your chin up, old man, and let's look forward to the day when you are strong again and we can sit down together and talk over the game of football."

"All I Landon."

"Sunflower Salad"

Is Campaign Dish
KANSAS CITY, MO.—Even a luncheon dish can come out for Gov. Alf M. Landon for President. Mrs. Thomas Coyle, of 4144 Locust street, delights Republican guests by serving her "Sunflower Salad". Here's her recipe:

Dice contents large can "fruit salad" and mix with cream. Remove rind from two oranges, cube and add to fruit. Add juice of one lemon to fruit juices.

Add fruit juices and required amount of warm water to contents of two packages of gelatine, stirring mixture till clear. When almost set, add fruit. Mold mixture in shallow sauce dishes.

Unmold on lettuce leaves. Around each mold place sliced canned peaches for sunflower petals. Chopped dates and pecan meats, moistened with mayonnaise to make a paste, form the center (which should be big enough to look like a sunflower and not a daisy, says Mrs. Coyle). Garnish with mayonnaise and vote for Landon and Knox.

Wallace Writes for G. O. P.
Chicago—(Special)—A Wallace, secretary of the National Union of Agriculture, is writing a series of articles for the farm and lay press, as a member of the farm division of the Republican National committee here.

General News Over Texas And Adjoining States For The Week

A small band of snails still exist in the mountains north of Phoenix, Arizona.

Expansion and improvement of the hospital at Wichita Falls will begin shortly following a Federal appropriation of \$102,150.

The 1937 convention of Texas-Oklahoma Kiwanis clubs is to be held at Fort Worth, according to a decision last week.

It is announced from Melrose, N. M., that 400 broomcorn pullers will be needed to harvest that crop in that section. Broomcorn is one of the big crops grown around Melrose.

The counties of Borden, Dickens, Fisher, Haskell, Kent, King, Randall, Stonewall and Throckmorton were last week officially added to the drought stricken list by the Agricultural department, Washington.

A very valuable deposit of fuller's earth has been called by the Borden county. It will be developed promptly. There are few deposits of this kind of earth in the U. S.

Metro park Amarillo baseball park was badly damaged by fire of unknown origin last Monday, the grandstand, several thousand dollars, being practically destroyed.

Rev. C. E. Herford, former Waco pastor has been called by and accepted the pastorate of the First Baptist church, Lubbock, succeeding Rev. R. C. Campbell, resigned who a few weeks ago accepted associational work at Dallas.

A series of 16 earthen levees designed to assist in holding sun-drown water in the Colorado area were begun last week. Texas legislature appropriated \$5,000 toward the project, the balance being Federal funds.

W. G. McMillan, Lubbock has been awarded contract for construction of a museum building on campus of Tech college. Lubbock in the sum of \$20,297, that being his bid. A grant of \$25,000 (or such construction was made several months ago by the Centennial commission.

Approximately \$5,000 worth of "Dorothy" frocks ready-to-wear garments were destroyed in the factory located at San Antonio Friday of last week by a fire, by a mixture of wax and acid on them. Since then it has been announced the factory will be moved out of that city.

R. C. Stafford, 57-year old pioneer, who has been Democratic gubernatorial nominee for governor of Arizona, according to the primary action of that state last week. He will be opposed by how E. Campbell, the only Republican of that state ever to hold office two times.

Bula News Items

Sunday school was well attended at each church Sunday with preaching at Methodist and Baptist churches, the Methodist two week's revival came to a close Sunday. A revival at the Church of Christ began Wednesday night.

Mr. and Mrs. Roy and Harry Behner also Mrs. O. T. Terry and Ruth, left Monday for the Centennial and to visit with relatives at Dallas.

Woodrow Bain returned the first of last week from a few days visit in Pampa and Floydada. Mrs. Jonnie Solomon and Miss Lily Solomon accompanied him for a few days visit.

Mr. and Mrs. Gordon Bain left Sunday afternoon for Turkey. They attended the funeral of a friend at Silverton Monday afternoon.

Mr. and Mrs. Frank Hardin, of Clarendon spent Monday in the home of Mr. Hardin's sister, Mrs. C. K. Cannon and family.

Mrs. Cheek, mother of Mrs. Herman Cantrell and two small daughters, of Mr. and Mrs. Cantrell's left Friday for Mrs. Chek's home on the Coast. The two young ladies are to attend school there.

Herbert Nichols is spending a few days in Mineral Wells having gone for medical treatment.

Mr. and Mrs. Fulton and family are now living on the place formerly occupied by Mr. and Mrs. Coulton.

Viola and Woodrow Eain left Monday to enroll in Tech, college.

Mrs. W. Dennington was honored with a surprise birthday party Tuesday

afternoon at the home of Mrs. Bird Reeves. Mrs. Dennington was asked to make Mrs. Reeves a visit Tuesday afternoon and when reaching there she found 60 guests present to help her enjoy her birthday.

Games were played throughout the afternoon. About 5:00 o'clock Mrs. Dennington was asked into the dining room where a huge birthday cake centered the table surrounded by gifts.

Mrs. Dennington looked at each gift and passed it on to each guest for inspection and thanked each as in her most gracious manner. Late in the afternoon cake and ice cream was served to 60 guests. Each one wishing her many more such birthdays.—Reporter.

Progress News

School started here Monday of last week with 75 pupils enrolled.

Rev. H. H. Copeland filled his regular appointment here Saturday night and Sunday.

Mr. and Mrs. Dillard Chatwin attended church at Y. L. Sunday.

Miss Murrah, of Tahoka, is visiting her brother Jess Murrah and family this week.

Mrs. Griffiths and daughter, Miss Verba and son, Carroll of Lubbock spent Sunday and Sunday night in the home of Mr. and Mrs. W. B. Harlan.

Miss Crystal Kennedy left Sunday for Lubbock where she will enter Tech. Mrs. Tom Radney visited her sister, Mrs. Wm. Pool at Needmore, last week.

Mr. and Mrs. I. O. McNairy visited in the Baileyboro community, Sunday.

Travel When the Southwest Was Young

This is a scene typical of Dallas and its Main Street of early days. The photograph was taken on one of the nine famous roads and highways which have been reproduced by the Ford Motor Company at the Texas Centennial Exposition in Dallas. In 1851 the street was paved with round bois d'arc blocks and later on the round block was replaced with rectangular blocks. Both types are pictured here.

Main Street, Dallas, which is believed to have been one of three old Indian trails leading to the cabin of John Neely Bryan, pioneer settler of Dallas, is reproduced in part in the "Roads of the Southwest" which encircle the lagoon opposite the Ford building at the Texas Centennial Exposition in Dallas. This road is one of nine reconstructed historic trails and highways which have played important roles in the development of the Southwest.

The history of Main Street goes back to the beginning of the settlement and has grown to be the second largest city in Texas. In

1841, John Neely Bryan, starting from Preston Bend on the Red River, came down an Indian trail to the three forks of the Trinity River. The trail was later known as Preston Road and was the second most important early road in North Texas. It is now a part of Texas State Highway 116.

John Neely Bryan pitched camp on the banks of the Trinity River where the Indian trail forded the river at the three forks. He staked his claim to 640 acres of land which included the ground upon which much of the present business district of Dallas stands. Immediately a log cabin was erected and he

started a trading post. Since he had settled at the only logical crossing of the river for miles around, the military road, or state highway, which had been authorized, naturally crossed in front of his cabin.

In 1851 bois d'arc block pavement was laid downtown. This was round blocks laid on a base of five or six inches of gravel. Later on, this round block pavement was replaced with the rectangular block pavement and sand and concrete base. This has been replaced from time to time with asphalt and brick.

KRAUT

Recovers Its Partner

THIS "belle of the ball," of another decade, has become "the girl" at the parties of today. Certain party foods, like certain party girls, have always been much sought after—for example, sauerkraut. Even during prohibitive sauerkraut was a popular food to serve at certain types of party meals. But it is once as popular now, since it's old partner—beer—is back.

Beer has not only started a great come back, but it has moved right into the home in cans. Be sure, when you serve this conveniently packed beer, to include plenty of sauerkraut dishes in the menu.

Here Are Some "Ace" Recipes

Sauerkraut Salad: Chill one 15-ounce can of sauerkraut, drain thoroughly and mix with two-thirds cup of crisp shredded raw carrot. Moistened with one-third cup of mayonnaise. This serves six persons.

Jellied Sauerkraut Salad: Dissolve six packages of lemon gelatin in three quarts of boiling water and add one and one-half teaspoons sugar and one-half cups of diced apple and one cup of diced celery. Pour into fifty individual molds. In a large flat pan and chill. If a large pan is used, serve cut in squares. Serve on crisp lettuce with mayonnaise garnish. This serves fifty persons.

CURTIS DANNER WEDS FARWELL GIRL AT ROSWELL, THURSDAY

Curtis Danner, son of Mr. and Mrs. G. C. Danner, former Muleshoe citizen, now residing at Farwell, was married Thursday last week to Miss Kathryn Kyker, daughter of Mr. and Mrs. Bob Kyker, Farwell, the ceremony being performed at the Church of Christ, Roswell, N. M.

The bride was lovely in a black street dress trimmed in white, with matching accessories, and carried a bouquet of white roses.

Both the young people are graduates of Farwell high school. Mrs. Danner later at ended the West Texas State Teachers college at Canyon, where she was a member of the Epheum society. Mr. Danner is in the employ of the American National Life Insurance company.

Following the nuptial vow they left for a honeymoon trip to the Tres Rites valley, and upon their return will be at home in Clovis, to their friends.

EXPERT AND AGENT GIVE GOOD SILO DEMONSTRATION AT RANCH

Much interest was shown by farmers from Bailey county at a trench silo demonstration held on Paul Brothers ranch last week for the purpose of discussing trench silos in Bailey county.

J. B. Waide county agent, arranged the demonstration and secured the services of E. R. Eudaly, Extension demonstrator from Texas A. & M. college, who led the discussion and conducted the demonstration on method of digging and filling, also feeding silage put in this manner.

This ranch now has four silos, two of them being 250 tons capacity each.

Bolero Effect

Quality chic is this dainty frock of black and pink lace with its pleated ruffles and accent scarf. The bolero effect is only in front for the back is made in one piece. There is a black lace belt.

Foreign Pork: Under orders from the Roosevelt administration American farmers killed their pigs and brood sows, and in 1935 foreign farmers shipped more than twelve and one-half million pounds of pork into the American market.

Hossfield Annexes His Ninth World's Typewriting Championship

GEORGE HOSSFELD of West Englewood, N. J., set a tremendous pace on his Underwood in the International Typewriter Contests at the New York National Exhibition, Toronto, Canada, on Wednesday, September 16. Hossfield is the holder of the highest official world's typing record. Ninety-one entrants in the five typing events made up the biggest field in any contest in all typewriter history.

Poem by Uncle John

Poetic genius draws, perhaps, the biggest load of handicaps . . . She lets her inspiration soar to laurelled realm or tuneful shore . . . She revels where the skies is blue, and paddles some in Love's canoe . . . She seeks Ambrosia's bottled bowers, and tastes the wine, and gathers flowers . . . She fits where blossoms smell—far off from sordid dustiness-hell—But, her shining light grows mighty dim, when a wood-tick bites her on the limb!

Poetic genius soars aloft, in search of something sweet and soft . . . She seldom condescends to go among the humbly, meek or low . . . She covets wild ambition's crown, while solid ballast holds her down . . . She finds some tawdry, plebian thing that shatters her angelic wing . . . It's mighty hard to court the muse, when Molly wants some better shoes . . . She mixes with a sweet romance, when Bobby needs a pair of pants!

PARTIES and PROSPERITY

Ice-Cream Consumption a Barometer of Economic Conditions

ICE-CREAM consumption fluctuates in sympathy with general economic conditions, according to the United States Department of Agriculture. In the boom year of 1929 we consumed more than 250 million gallons. By 1935, however, production had shrunk to less than 150 million gallons.

Records of 1934 show that we are back to a consumption of nearly 180 million gallons of ice-cream.

Children's Parties Increase

If ice-cream is a barometer of economic conditions, then the number of children's parties—at which much of this ice-cream is consumed—might also be taken as a barometer. Certainly in prosperous times we can afford to do more for our children. Therefore, while they envelops are flying through the mails announcing birthday parties, spring parties, Easter parties—parties of every description—it is well to consider new ideas in food, games and decorations for these most delightful occasions.

For there is very definite vogue in children's parties, just as there is in any other parties. See to it that you don't give a 1935 party in this bright new 1937! If it is a spring party, use cellophane, green or white to cover your tablecloth—make a gleaming table setting—and use pink ribbon where the pieces of cellophane join. Cover your candle-holders, also with cellophane and tie pink ribbon bows at the base.

Fun and Good Eats

A Flower Hunt is an appropriate contest. Cut pictures of flowers from a seed catalogue. Hide them in the house, or on the lawn. Award a prize for the child who has found the greatest number of flowers which he can identify by name. Garden tools or a garden seat and overall will be an appropriate prize.

Food! It must be as gay as the new party frocks and as pleasant as a picnic. And the food must!

Celebrate 58th Birthday of Salmon Industry in Alaska

"FLEETS in!" And another salmon season finished!

With all flags flying on the first of September, the territory of Alaska celebrates the 58th birthday of her largest industry, as great fleets of salmon boats loaded with their canned cargo, take off for the markets of the world. This year, as the last season of the silver sea-harvest is pulled ashore, each city on the Alaskan coast plans to cele-

brate with gay festivals commemorating the history and picturesque of this unique industry.

Salmon is a "silver harvest" indeed for the Territory—an industry which in the past 58 years has netted more than 50 million dollars. In the first year of the canned salmon industry in Alaska just 8000 cases were packed. This season, approximately five and a half million cases were sent on their way to west-

ern markets and the world's taste for salmon. So constant is this demand that a recent survey in a typical American city shows that 69.4% of the homes own a can of salmon-fishing and canning is a unique American industry, for whereas salmon were once plentiful along the seacoasts of the world, they are found today in commercial quantities only in the Pacific North-

Conservation Work Compliance Begins At Longview, Mon.

Compliance work on the 1936 Agricultural Conservation program is now ready to begin, according to P. C. Elliott in charge.

Compliance supervisors will hold meetings at the school house of each county to discuss with work sheet signers the compliance procedure to be followed in getting all crop land under a work sheet measured.

Compliance work will be different from the way it has been carried on in the past and it is necessary that each producer attend the community meeting in his community so there will be as little delay as possible.

A uniform method of measurement will be used. This will be explained at the meeting with the community committee in the various community meetings.

Meetings will be held as follows:

- Circlelake, 8:00 a. m. to 6:00 p. m. Friday, 18.
- Maple, 8:00 a. m. to 6:00 p. m. Saturday, 19.
- Bula and Knoeks, 8:00 a. m. to 6:00 p. m. Saturday, 19.
- Stegall, 8:00 a. m. to 5:00 p. m. Saturday, 19.
- Longview, 8:00 a. m. to 6:00 p. m. Monday, 21.
- Muleshoe, 8:00 a. m. to 5:00 p. m. Monday, 21.
- 8:00 a. m. to 5:00 p. m. Monday, 21.

Watson, 8:00 a. m. to 5:00 p. m. Monday, 21.

Goodland News

Mr. and Mrs. F. H. Wood attended to business in Muleshoe Friday.

Rev. Alfred Richards, of Maple, day preached here Sunday morning.

There will be a ball game at the Goodland school house Friday night, with Bula, both boys and girls teams playing.

Mr. and Mrs. Otto Lancaster and daughter, Mr. and Mrs. Winford Carter and Mrs. J. W. Franklin and son, Albert, and Mr. and Mrs. L. D. Sanderson were visitors in Portales, New Mexico last week.

Mr. and Mrs. Elsworth Har, of Luce, N. M., visited her parents, Mr. and Mrs. J. P. Trelton and other relatives Sunday—Reporter.

MRS. LENAUI IS HONORED

Mrs. R. P. Melindy, Miss Adie Watts and Mrs. R. L. Faulkner were joint hostesses at a surprise shower given in honor of Mrs. Julia Lenaui at the home of Mrs. R. L. Faulkner Wednesday afternoon of last week.

About 35 guests attended and the honoree received many lovely gifts. Several who did not attend sent gifts. Delicious refreshments were served by the hostess.

A cow may have many good qualities, but she is too modest to blow her own horn.

Turkey Crop Will Be Shorter But Prices Better, Is Report

While general reports throughout the state indicate a somewhat larger crop of turkeys being grown this year than last, such apparently is not the case for this particular area, although it is said turkeys this year will be of a better quality than they were last year. South Plains turkey raisers claim they got their pouls' out with a better start this year.

Brownwood, which led state shipments last year with 55 carloads, indicates it will have at least 60 carloads to ship this year.

The Thanksgiving market will open about Nov. 6 and continue full until the 14th, while the Christmas selling will begin early in December, continuing until about the 15.

To prices paid in the state last year were 23 cents per pound, with a top average of 21 to 22 cents, though some places to price went as low as 18 cents per pound for No. 1 hens and toms, 10 cents for No. 2 birds and 14c for old toms. Last year most of the turkeys raised in this section were rather light, grading largely as No. 2 birds.

While it is now thought the turkey crop of this section will be around 25 per cent smaller than last year, yet letter prices are anticipated by local raisers and dealers.

Clothes Are High

More than one-fourth of the price of the "clothes" you buy represents the Roosevelt administration taxes.

RICE IS MOST POPULAR FOOD
Used for Main Dishes and Even for Dessert.

By EDITH M. BARBER
"THE world's most popular food," Guess what? You're probably wrong. It isn't beef, and it isn't potatoes—it's rice.

Perhaps popular is not exactly the right adjective. Perhaps plentiful is the better term. In many countries life depends upon money enough to buy rice. In this country, where food is so varied, we make use of rice in our menu plans as an necessary food, because we like its texture and its flavor. We use it as a vegetable with meat and usually feel that there should be a gravy with it. We combine it with meat, fish, cheese and highly flavored vegetables for luncheon dishes, and we use it for dessert.

The white hulling rice is used far more than the brown rice and the wild rice which are more highly flavored. Brown rice is the unrefined product of the same plant which produces the staple white or polished rice. Wild rice, unlike the other, is a bluish purple in color and is the seed of a native grass.

There are innumerable "right" ways to cook rice. One is as good as the other if it produces a dry, flaky product, each grain of which stands out from the other. I usually use the method which was taught me by a Chinese woman, although I know that there are just as many ways of cooking it in the Eastern world as there are here. It is a quick-economy method to be used by the business woman housekeeper and for this reason I am printing the recipe here.

Rice Pilau.
2 thin slices of salt pork, finely diced
3/4 cup uncooked rice
2 medium-sized onions, cut fine
2 cups hot water
2 cups tomato juice and pulp
4 tablespoons minced parsley
Salt
Pepper
Paprika

Fry the salt pork until slightly browned. Add the rice, which has been washed and drained, and onion, and stir until the rice is a golden brown. Add the hot water gradually, cover and cook. When the rice is done, add the tomato juice and parsley.

Home-Grown Feeds Used for the Poultry Flock
A good rule to follow in making a mixture of home-grown feeds for poultry is to use 60 per cent corn or wheat or both. The remainder of the mixture recommended to make 100 per cent, is a combination of any two or more cereals, such as oats, buckwheat, barley, or more corn and wheat.

But do not use more than 40 per cent of barley, 30 per cent of heavy oats, or 25 per cent of buckwheat or rye in the mixture.

Potatoes can be used as a poultry feed. Four to five pounds of potatoes are equivalent to one pound of corn. One hundred hens will eat from six to eight pounds of potatoes a day in this way.

Avoid Wrong Way of Killing Hogs
Haphazard Methods, Trusting to Luck, May Cause Loss, Expert Advises.

By R. E. Nance, Professor of Animal Husbandry, North Carolina State College

The farmer who uses haphazard methods and trusts to luck at hog-killing time runs a big risk of losing his meat.

The right way to kill hogs is just as easy as the wrong way, and with proper curing, it virtually assures successful preservation of the meat.

Many of the methods employed in "dad's time" were responsible for the heavy losses usually experienced. Some of the worst faults are:

Hogs were usually killed on the coldest day of mid-winter, under the impression that the extreme cold helped preserve the meat. Bitter cold weather made the task difficult, and it was rushed through in too big a hurry.

A temperature of 28 to 40 degrees is preferable. The carcasses should be allowed to hang up overnight in the smokehouse so as to let all the animal heat dissipate before the curing is started.

The custom of shooting hogs or knocking them in the head was prevalent. Then the hogs were dragged to a vat of water that was either too hot or too cold.

The bodies were bruised, the carcasses did not bleed properly, and the hair did not scrape off as it should. Stick the hogs, allow them to bleed thoroughly, and scald them in water heated to 150 degrees, no more, no less.

Do not feed the hogs within 24 hours of killing time. Doing so wastes feed and makes the carcasses harder to dress. Do not cut up the carcasses until the next day.

BRIGHT LIGHTS ON LIGHTS FOR BIDDY
Red and Yellow Rays Said to Be Stimulating.

By Prof. L. C. Norris, New York State College of Agriculture

Giving hens a longer working day through the use of artificial light has long been a custom of poultrymen. The idea was that hens ate more feed and as a result produced more eggs. The old idea is reversed, and the belief now is that the increased opportunity to eat food provided by artificial light is not the important reason for this practice. Rather, the artificial light is said to stimulate the reproductive organs, which in turn results in increased egg production. More feed, therefore, is eaten.

The results, however, are the same: more eggs are produced when artificial light is used, but the attributed cause has changed. No changes in regard to the use of artificial light to increase daylight hours are recommended, but providing strong enough artificial light is emphasized. If the light is barely strong enough for the hens to see and drink in their quarters, it may not stimulate egg production.

It is believed, also, that the color of lights has an influence. Red and yellow rays in white lights are said to be stimulating, whereas green and blue rays have a retarding effect on the hens.

Blind Hens
Blindness may be caused by several diseases of chronic nature and by affections of the structure of the eye, the nature of which is not known, says the Rural New-Yorker. It is not possible to say, from the blindness alone, that disorder is present but it is probable that the male bird in the flock is in any way responsible. Chronic coccidiosis may bring about lameness and blindness in the mature birds. Any males or hens in the flocks that have shown evidences of blindness or other lack of health and vigor should be excluded from the breeding flock as a precaution against deterioration in that vigor that is so necessary if continued health is to be maintained in future generations.

Gather Eggs Often
Hatching eggs should be gathered often, three times per day at least and often if the weather is cold so as to prevent chilling. Frequent gathering will also prevent them from becoming dirty. They should be placed at once in the basement or cellar, or other room where the temperature ranges between 45 and 55 degrees. They should not be kept long before setting—should be delivered twice per week to a hatchery if they are sold to one. If properly cared for, eggs will hatch with fair success at home if 10 to 12 days old and one can take a chance on them that old or even older, if one is hatching his own eggs for himself, but each day they are held tends to curtail hatchability.—Missouri Farmer.

Grade A and B Eggs
The chief difference between Grade A eggs and Grade B eggs is in the firmness of their whites, according to a recent statement issued by Charles H. Baldwin, New York commissioner of agriculture and markets. In addition to having less firm whites, the Grade B eggs have less water in them, the commissioner said. The decrease in water is caused by evaporation. Good values of Grade A eggs are but slightly higher than those classed as Grade B.

Laying Age of Hens
A hen two years old ought not stop laying profitably if a good producer up to that time, though most poultrymen find it desirable to dispose of their fowls after two full seasons of production. The pullets usually lay their first egg, though the second year of laying may equal or exceed it in number of eggs laid. Taking flocks as they run however, the average of an succeeding years fall two far below these to make it wise to keep the birds for more than their first and second seasons.

RICHARD LLOYD JONES SAYS
Determine Your Worth

Every man weighs himself and determines his own worth. All wages are not paid in coin. The men who work only for money seldom have anything but money. And whether they have much or little of that they are soon forgotten by a world that regards unskillful deeds.

It is a common practice to blame the world for our own faults when your estimate of your worth and the world's estimate do not agree. It is an essential element to every success. Oxygen is essential to the life of all fish, but no fish can live on oxygen alone. So history is the archer and the surest sponsor for failure.

Efficiency is commendable, but it becomes profitable only when it stimulates determination.

It is impossible to keep any man below the level of his attainments. It is as impossible to hold him above them. Talent is the result of application. Efficiency is the reward for practice.

More knowledge measures worth no more than mere muscle. The skilled mechanic is master of his muscles. Undirected muscles, as undirected brains, are of little use and are worth little.

Wisdom applied to one thing develops wisdom. Wisdom never achieves its results. Constant thinking and working on consistent lines produces results.

Opportunity never searches for him who does not search for opportunity. Strength of will is the foundation of worth. Luck is a dangerous thing to rely on. It will lead you into the open sea without rudder or sail or anchor. These you must take with you or accept the fate of the tossed and tossed.

Beware of imitation. No copy is worth the original. As a counterfeit you are as worthless to the world as the imitation coin.

Six Days Of Racing At Lubbock Fair To Attract Fast Steeds
Lubbock, Sept. 15.—When West Texans and New Mexico residents come to Lubbock, Sept. 28 for the opening of the Twenty-third Annual Panhandle South Plains fair, they will be offered the greatest regional exposition ever staged in West Texas. For the fair has been combined with a Centennial celebration and a full six-day racing program to make it one of the outstanding events on the scheduled program of Texas' celebration of her one hundredth anniversary.

The best crops in several years over most of the territory provide a wider variety of agricultural exhibits, the staging of several national livestock shows in Dallas and Fort Worth will draw some of America's finest stock to this section and the procurement of the United Shows of America with "America's Newest and Largest Midway" offers all the entertainment to be desired.

A steel grandstand seating 5,000 people has been erected on a standard half-mile track and barns built for more than 100 horses to assure far-lookers of a full afternoon's entertainment each day "watching the bang-tails run." Some of the outstanding horses of the smaller circuits will be here for the race program.

Hay Fever
Go TROWEN'S NOSO-PHEN, the new TWO-WAY TREATMENT. It will bring you FREE BREATHERING in 20 MINUTE or money back \$1.00 at WESTERN DRUG CO.

Plainview Sanitarium & Clinic
PLAINVIEW, TEXAS
STAFF
E. O. NICHOLS, M. D. Surgery and Consultation
J. H. HANSEN, M. D. Surgery and Diagnosis
RUFUS A. ROBERTS, M. D. Obstetrics and Pediatrics
GROVER C. HALL, M. D. Eye, Ear, Nose, Throat and Bronchology
