

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, JUNE 1, 1939

VOLUME 17 NUMBER 19

Six Teachers Are Elected For The Local Force

With more than 100 applications from teachers to fill vacancies in the Muleshoe schools, 36 of whom were present to also appear in person before the high tribunal of education, the School Board session Monday night lasted until about three o'clock the next morning, and still some vacancies were not filled.

Glen Dickinson, former high school principal at Amherst last year, was elected principal for the Muleshoe high school.

Hardy E. Williams and Mrs. Williams, his wife were elected to places in the high school building. He to be band instructor, also teaching some academic subjects, while she will handle the seventh grade instruction in the same building. Mr. Williams was a teacher and band instructor in Otton school last year.

J. A. Lundstrum, last year principal of the Liberty school from which he had resigned, was elected. He formerly taught in the Bridgeport High school in Wise county.

Miss Virginia Westbrook of Cleburne was elected to teach science and as athletic coach for the girls teams. She is a Tech graduate.

Miss Laverne Northam, a Tech graduate, was chosen to teach Spanish.

H. D. Bentley, for the past 15 years a teacher at Lubbock county, was elected principal of the Grammar grades.

All teachers chosen by the Board held bachelor degrees.

A teacher for the home economics department and an athletic coach yet remain to be chosen to complete the faculty for the coming school year, according to Supt. W. C. Cox.

REA Construction Is Begun, Wiring Of Homes Urged

Contract for the Bailey County REA line construction has been officially approved, according to available information, poles and other material has arrived and work of building the line has begun.

Patrons are being urged to prepare their homes, having all wiring done as well as other necessary preliminary work prepared as soon as possible so as to be ready to receive service when the organization is ready to energize the line, as it is understood electricity will be turned on when a certain portion of the line has been completed.

It is stated, however, when the line is ready for service, a sufficient number of homes must be in readiness to receive such service without line loss, at least two customers per mile, before the current will be available.

Farmer patrons are being urged to court no further delay in preparing their homes for service. It is stated about 500 homes are yet to be wired, and improper delay in such wiring will add further delay to all patrons receiving this accommodation.

Patrons who are short of funds for wiring and buying accessories, may obtain federal loans in details of which may be obtained by consulting with officials of the organization in Muleshoe.

CAR BUYERS PAY \$2,400,000 TAX

With new car registrations in Texas running well ahead of last year, the National Consumers Tax commission estimated buyers in this state have paid out approximately \$2,400,000 in taxes on their shiny new automatic models during the first three months of 1939.

These taxes, most of them of a hidden nature, average around \$75.29 per car. There have been 43 new automobiles registered in Bailey county since the first of this year, hence these buyers have paid approximately \$3,225 to the various tax collecting agencies.

Of course, they were paid in the so-called "painless" method as a part of the regular price of the car, but they, nevertheless, were taxes just the same. Many of them were original levies against metal, rubber, leather and glass producers and manufacturers, against cotton, wool growers, cloth manufacturers, railroads, automobile makers and dealers. They were quietly passed on from one car handler to another until they were finally paid by the buyer, representing an average of 9.4 per cent of the price he paid for his nice new bezzine buggy.

Buy it in Muleshoe.

OFFICIALS ASK ORDER MAY BE REVERSED

Following an order issued April 12 to the McMakin Coaches Co., Inc., permitting them to withdraw bus service between Muleshoe and Plainview, on the plea roads between these two points were not in favorable condition for such travel. Resolutions dissenting to the order were sent from Muleshoe last Monday to the State Railroad Commission, Austin, asking for a reversal of that order.

The resolutions were forwarded with due signatures attached by the local Chamber of Commerce and the Bailey County Commissioners' court.

It is a well known fact that the highway between Muleshoe and Plainview is a paved road and, of course, easily traveled.

Muleshoe Elevator's Safe Is Cracked Friday Night

The safe belonging to the Muleshoe Elevator Co., located in the east part of town, was cracked and robbed Friday night of last week by unknown thieves. Entrance was made through the machine shop, after which a pane of glass was cut giving entrance into the office where the safe was located, according to report.

About \$60 in cash and \$40 in checks were taken from the safe. Entrance was made to the safe by knocking off the knob-handle and then punching the combination lock off inside.

A good set of finger prints are said to have been taken, but have not yet been identified. The marks of the auto in which they traveled were said to be plain and correspond with casings marks of the robbers who cracked safes at Farwell and Friona recently.

Officers are on the trail of the criminals with hopes of identifying and arresting them soon, it is said.

Legislature Session May Cost The State Total of \$750,000

Much ado is being made this week throughout all Texas, according to daily newspapers, over the ultra-extended session of this state's Legislature which, up to the end of last week, had made a record for longevity, having already passed the 1933 session of 141 days, with present indications of another two weeks continuance.

The regular legal session is for 120 days, during which period the law-makers receive \$10 per day for their services. The regular session ended May 9 since which time members have been drawing \$5 per day. This reduction in pay usually hastens the close; but apparently not this year, as some insist it may be the middle of June or first of July before the closing date.

Prolonged disagreement over a pension bill has been the chief reason for continuance of the session, the Senate wanting one form of tax-raising law while the House insists upon another kind, and neither will yield, not even for a compromise.

The proposed Fair Trades act has engendered considerable opposition and filibustering, holding back approximately 100 other bills from the House, many of which are said to be of state-wide importance.

Citizens of the state do not seem to be worrying so much about the extended session of the Legislature as of the cost of that continuance, which is said to be running around \$35,000 per week, and to date has already cost more than \$750,000 to the taxpayers.

Gov. O'Daniel shed his gloves and tore viciously into the minority bloc of the House which has been opposing a sales-natural resource tax constitutional amendment in his regular Sunday morning radio broadcast from the mansion.

He threatened to take the stump in all parts of the State and read the "honor roll" if the necessary funds to finance social security were not raised. And he further asserted the statutory tax route was not the answer.

Blistering criticism of the Governor's speech came from several members of the House. They called attention to the "unprecedented pressure he has brought to bear on the Legislature" to write a sales tax into the Constitution.

A total of 11,842 carloads of livestock were shipped to Fort Worth and out of state points during April being 3.06 per cent more than for the same period last year.

NO STOMACH FOR WAR

News Item: "I want to make it plain that American industry has no stomach for war."—Howard Cooney, President of the National Association of Manufacturers.

THERE ARE MANY DIFFERENT WAYS OF BUYING PALATABLE AND SUSTAINING FOOD FOR \$10

Economical living is not a matter of mere money-spending, or saving, as nearly everyone knows; but rather one of getting the most value return for a given amount of expenditure for foods. Instances innumerable may be cited, some right here in Muleshoe, where some families live much better and with a wider menu and more adaptable to general physical sustenance than do others.

Many inexpensive foods may be prepared at home and served the family in various attractive and palatable ways at considerable less expense than if purchased already prepared at the groceries and markets.

For instance, a 48 pound sack of flour made into bread, cookies, cakes, etc., by the housewife is much cheaper than that quantity of bakery stuff purchased.

A peck of old potatoes will produce several sacks of potato chips when so converted in the home kitchen. They may also be cooked in numerous other ways lending to variety.

Four pounds of dried fruit and 10 pounds of sugar will cost about the same as two quarts of preserves and go much farther in furnishing food. Everyone knows the difference in price between hamburger and T-bone or sirloin steak. Of course, it is admitted there is a difference in flavor, but the hunger-satisfying and bone-building qualities are about the same. Numerous other instances of money-saving in provisions could easily be suggested.

INCREASED INFESTATION OF SUDAN WITH JOHNSON GRASS DAMAGES FUTURE MARKET PROSPECTS

For many years past Bailey county has become well known as the largest producing county of the nation of sudan grass seed; but that there may be serious danger of this county and surrounding area losing its good reputation in that respect is sounded by S. E. Cone, Lubbock, who operates an elevator in Muleshoe.

In various ways sudan seed has become infested with Johnson seed, much of it by letting Johnson grass grow outside sudan cultivated fields, in highway bar ditches, etc., and in various other ways pure sudan seed has become impregnated with the undesirable Johnson grass seed which many people can not discriminate as to which is one or the other, so nearly are they alike in appearance.

For many years past, it is said, Texas has had a law on her books prohibiting the growing of Johnson grass within its borders; but such law has not been enforced. Several other states also have laws barring the importation of grains containing seeds of obnoxious weeds, and there is federal legislation now pending which would prohibit the interstate transportation of grain containing weed seeds. If this law becomes effective and the quality of Panhandle-Plains sudan is not

raised, it is declared this area is doomed to a considerable loss in the sudan market.

Cone declares the sudan shipped from this area is rapidly becoming infested with Johnson grass seed, the percentage increase during the past four years raising from nine to more than 40 per cent.

ST. CLAIR ENLARGES STORE BUILDING

To accommodate his rapidly growing business, the St. Clair Variety store proprietor this week cleared a 40x50 foot addition to their already spacious business house which, when completed, will furnish a building 50x120 feet in size—one of the largest business houses west of Lubbock.

The entire store is to be further modernized, new fixtures installed and the stock of shoes, as well as to wear greatly enlarged, and ready-to-wear new lines accommodated which heretofore have not been carried for lack of room.

During the years Irvin St. Clair has been in Muleshoe his business has enjoyed a constant and steady growth, much of which he attributes to persistent advertising of his merchandise and other good business methods employed.

Prof. and Mrs. Galloway Are Given Honors

Members of the Maud Hart circle Methodist church, entertained their husbands with a picnic last Friday evening on the Methodist church lawn in honor of Mr. and Mrs. Claudie Galloway, who are leaving this week for Canyon.

Games were played, then refreshments of roasted weiners, buns, pickles, fresh onions, mustard, potato chips, hot coffee and cookies were served to the large group attending.

Miss Elizabeth Harden, vice-president, very graciously presented Mrs. Galloway the farewell gift from the society. The honoree spoke her thanks to the society in her usually pleasing manner. After the gift was shown, guests gathered around the campfires for a chat with their neighbors.

Total Of \$135,000 Gov. Checks In Co. Received

There were 86 soil conservation checks received here last Saturday and another consignment of 61 checks received Sunday at the AAA office in Muleshoe, the total being \$34,500, according to Finley White, Bailey county farm agent, who further makes a total of \$135,000 of such 1939 payment received to date.

This total included \$2,500 on the 1939 wheat parity payment, and a still larger payment is due to arrive sometime this fall.

It is notable that all government checks are arriving in this county much earlier than heretofore, a fact the farmers greatly appreciate.

\$500,000 FOR BATTLESHIP

It costs the United States approximately \$500,000 to build a modern battleship for the Navy.

The first United States fleet was comprised of eight vessels costing but \$134,333. They were bought and fitted out for that sum at the beginning of the Revolutionary war.

Bailey Co. Council Makes Big Plans For The Future

The Bailey County Home Demonstration council met in Baileyboro last Saturday afternoon.

The Expansion committee gave a report on the progress which the Home Demonstration club women of this county hope to do through the council during the remainder of the year to spread the influence of home demonstration work and benefit more people in this county.

During June and July it is hoped that all the pressure cooker gauges in the county may be tested for accuracy.

In October and November mattress making demonstrations will be given in each community for club and club members.

All club members in the county are going to concentrate their efforts on increasing the membership by inviting three guests to club meetings during the year.

During August and September a greater effort is going to be put forth in building frame gardens. The goal for Bailey county has been set for 500 frame gardens during 1939. Many of these will be fall gardens.

The council accepted for Bailey county 4-H club girls, the invitation of the Palmer county girls to go with them on an encampment to Cedar canyon some time in August. The council felt that it would be a very nice trip for the girls and an opportunity to meet and know the neighboring county 4-H club girls.

Plans were made for the Short Course at College Station in July. Two 4-H clubs and two Home Demonstration clubs knew definitely that they would send a representative to Short Course. It is hoped that other members will convene to send a representative from their club.

Preceding the council meeting, the agent, Miss Lillie Gentry, gave a training school on vegetable cooking to representatives of the 4-H clubs and their sponsors. There was a nice turn out of club girls and sponsors present.

After the council meeting, Miss Gentry held a training school on "House Cleaning Made Easy." This information will be given by representatives of the 4-H clubs to their respective clubs during June.

Revising cotton statistics, the U. S. Department of Agriculture, finds a total of 5,618,000 acres of cotton were planted in 1938 compared with 34,000,000 acres the previous year. Texas had 3,086,000 acres, or just 168 acres less than in 1937.

It is legal to home town interests.

R. C. Wiley Gets \$40 Award Made Last Saturday

R. C. Wiley, residing in Midway community, Farmer county, about 14 miles north of Muleshoe, was the fortunate recipient of the \$40 award given away last Saturday during the Trades Day event. The sum had grown from an original \$10 offer during the past three weeks until it had quadrupled itself, merely because the party to whom it had previously been offered was not present when distribution of awards were made.

All awards made last Saturday went to customers residing in various parts of the county and several miles distant. C. C. McClelland, residing 12 miles southwest of Muleshoe, received \$7.00; Willis Branscum living 18 miles east of Muleshoe; J. W. Gilliland, living 12 miles south of the County Seat; Mrs. R. C. Gaede residing seven miles northeast of Muleshoe, and A. E. Nelson of the Baileyboro community about 18 miles southeast of Muleshoe, each received awards of \$2.00 each.

The usual bumper crowds were present for the day's events, chamber of commerce officials declaring if there was any difference the crowds were larger than those of previous gatherings. "Wall street" intersecting Main street, where the announcement of favors were made, was completely closed with the crowds of people for more than 30 minutes.

Another purse of \$25.00 has been established for Trades Day next Saturday, to be divided as usual, the committee holding strictly secret the beneficiaries until ready to make the awards. Everyone for miles around is invited to be present. In fact, they are urged to get the habit of attending these weekly events each Saturday.

Commercial Body Grinds Grist At Regular Meet

A feature of the regular Chamber of Commerce meeting last Friday was the very interesting description given by Mrs. W. G. Kennedy of her recent trip to Washington as the Texas representative, with women from all other states she had in a discussion with the Department of Agriculture officials relative to farm problems of various kinds from a woman's standpoint.

There were a total of 27 business and professional women present to enjoy the fraternizing and culinary phases of the meeting.

The matter of financing in part a trip to College Station early in July of 4-H girl club delegates was raised and discussed, but decision delayed to a later date.

County Judge M. G. Miller and Mayor A. E. Lewis volunteered to officially represent Bailey county and Muleshoe, respectively at the formal opening of Buffalo Lake, a soil and water conservation project located northeast of Hereford, Saturday and Sunday.

A letter was read by the County Judge from officials of the Plainview Chamber of Commerce, urging citizens of this county to attend a meeting to be held in the Hale county seat, capital in the near future relative to having the Lee Highway, U. S. No. 70, designated as one of the proposed trans-continental highways.

FAIRVIEW MEETING OF H. D. CLUB

Fairview H. D. club met May 23 with Mrs. Walter Rector, thirteen members and one visitor being present.

After business was disposed of, the members quitted a quilt.

Those present were: Mrs. J. D. Witherspoon, Mrs. H. E. Schuster, Mrs. Everett Wallace, Mrs. Bill Jordan, Mrs. E. E. Workman, Mrs. Doc Simmons, Mrs. E. E. Finley, Mrs. Jodie Marlowe, Mrs. J. C. Terrell, Mrs. Francis Terrell, Mrs. J. H. Liston, Mrs. C. D. Dorsey, and hostess, Mrs. Walter Rector.

Delicious refreshments of iced lemonade, cake and cookies were enjoyed by all present.

The club will meet Tuesday, June 13, with Mrs. H. E. Schuster. All are urged to attend.—Reporter.

RECEIVED FINE IN JUSTICE COURT

H. L. Minor, said to be superintendent of the Springlake school, pleaded guilty Tuesday to a charge of "discharging a shot gun on a state highway" and received a fine and costs totaling \$13.00 in Justice court.

FOR THE MOST WAGON AT THE LEAST COST

Go in your car!

Two can ride as cheaply as one... so can the whole family, when you go in your car!

You are not tied down by time-tables. You drive fast or slow. Make as many stops as you like. Take as many side-trips as you want. See both World's Fairs, and all the sights between, at the cost of a single fare.

Phillips offers 4 things to help you start the trip right and to keep it trouble-free and enjoyable:

1. Phillips new 1939 Road Maps with latest touring information are FREE, yours for the asking at any Phillips 66 station.
2. Phillips Bumper-to-Tail Light Greasing Service puts your car into condition for the extra miles you'll pile up.
3. Fresh Phillips 66 Motor Oil in the crankcase will take motor-fabrication worries off your mind.
4. Phillips 66 Poly Gas, which cuts washing extra, gives you extra zip and zing. Delivers the added power units of the scientific POLYmerization process. Offers higher volatility (high test), which is the most accurately matched to monthly weather.

2. Phillips Bumper-to-Tail Light Greasing Service puts your car into condition for the extra miles you'll pile up.
3. Fresh Phillips 66 Motor Oil in the crankcase will take motor-fabrication worries off your mind.
4. Phillips 66 Poly Gas, which cuts washing extra, gives you extra zip and zing. Delivers the added power units of the scientific POLYmerization process. Offers higher volatility (high test), which is the most accurately matched to monthly weather.

Remember, Phillips 66 Poly Gas is a different gasoline, and millions of motorists have felt that difference. So try a tankful. See if you, too, don't get greater economy and more motoring pleasure with this sensational, self-demonstrating gasoline.

General News Over Texas And Other States For Week

Floyd county citizens last Friday held their forty-ninth old settlers day at Floydada with big crowds of old and new settlers attending.

Hockley county last week completed a new \$70,000 jail which is said to be absolutely "burglar proof."

Texas now has 1,525 miles of the U. S. shelterbelt of trees, furnishing some protection to approximately 130,000 acres of crop land.

Texans consumed 775,000 gallons

of ice cream, 2,556,000 pounds of creamery butter and 1,463,000 pounds of cheese during April.

There have been 50,000 sight-seers to pass through the great brown doors of Texas Memorial museum, Austin, since it opened four months ago, officials say.

GEN NEWS

The fourth annual XIT reunion will be held at Dalhart, August 7 and 8, \$100 prize being offered to the one who will ride just one street being brought to Dalhart from Oklahoma.

About 750 farmers in Roosevelt Co., N. M., have to date failed to sign government estimate sheets, according to the Portales News. Last year several farmers of that county had some misunderstanding with the government and lost their payments. Checks now due are being delayed, which also excites the suspicion of these farmers. June 1 is the last day for signing to secure AAA payments.

State guarded mental patients, delinquents and criminals exceed the number of high school graduates who enrolled as Freshman in Texas colleges each year, according to Dr. H. T. Manuel, State university educator. There are now in Texas state prisons 826 youth 17 to 19 years of age, 1,900 between 20 and 24, while there are 8,000 persons held, of whom are not more than 25 years old, in other correctional institutions.

Flying a light plane, weighing only 650 pounds and having a single 4-cylinder motor, Thos. H. Smith, set his small air ship down on the Shannon river in Ireland last Monday following his take-off from Orchard Beach, Maine. The trip, made without incident, cost just \$49.18 for fuel and oil, and establishes an entirely new record in flying. Later he is supposed to have been lost while flying toward England.

U. S. army officials are preparing to institute a recruiting drive for nearly 115,000 new soldiers, bringing the recruiting stations to the contemplating soldiers in every section of the country. Trucks, fitted for such purpose, carrying information and radios will be used.

Funeral services for the late Dr. Charles H. Mayo, 73, who died Sunday of pneumonia, were held Monday. He was one of the Mayo Bros. physicians, known among the world's greatest surgeons.

Caused downfall of Napoleon
Receipt in France of the news of Sedan's fall in the Franco-Prussian war of 1870 caused the downfall of Napoleon III and the proclamation of the third French republic.

Old-timers Celebrate At Clovis June 7-8 A Big Program

Honest to goodness old-timers who settled in this territory in the years 1905 to 1912 will gather again at the fifth annual Pioneer Days celebration to be held in Clovis June 7 and 8 and swap yarns and reminisce over life in the old days while enjoying a cup of chuck wagon coffee and visiting with each other over old-fashioned basket lunches.

A timely return of old-fashioned garb will also be signaled when the curtain goes upon the two-day gala event that will mark another anniversary of the celebration dedicated to those persons who first settled in this country.

Registration of the old-timers who "arrived" between these years will be held on the court house lawn during the celebration. The registration badges will show the name of the pioneer and the year settled in this country.

Cots, chairs, benches and tables will be furnished by the city and by the pioneer celebration committee for the convenience of those who will participate in the old-timers' part of the celebration. The pioneers of a day gone by will also be invited to participate in a genuine "old time" dance in charge of Rufe Witherston at which only old time favorites, including square dances, schottisches and others, will be played.

Old fiddlers from all over the Southwest are expected to gather during the celebration and fiddle to their heart's content for prizes on both days of the celebration.

The widely-known celebration won't be restricted to old-timers alone. On the contrary, entertainment for everyone will be offered. Included on the list of attractions to be presented is everything from a carnival to sky writing.

Included in the first day's program will be sky writing by Art Goebels, famous pilot; a parade including a band, mounted, on horse and other entries; the pioneer basket lunch at the court house; law; old fiddlers contest; rodeo with such attractions as trick riding, trick roping, clowning, and the performances and other interests. Other entertainment of the same kind will be given the second day.

Each night of the celebration, the Clovis Pioneers will play the Lamesa Lobos in a regularly scheduled West Texas-New Mexico league game. Each night after the game a street dance will be given on a specially reserved block and the Arkansas Corn Huskers will furnish the music. Dances will also be given at Hotel Clovis for those who care to participate and other activities will be going on all the time.

12 Bula Graduates Finish School Year Tuesday

Graduation exercises were held Tuesday evening at school in East Bala county, 12 members of the Senior class receiving diplomas. O. O. Williams, school superintendent at Idalou, delivered the address.

Commencement exercises for members of the seventh unit graduating class were held Monday evening. There were 20 in this group to receive diplomas.

At a recent meeting of the school board of the Bula district, all teachers were re-elected; but two later resigned. They are as follows: Supt. G. M. Daugherty, Miss Merdell Barnett, English; Mrs. Ruth Alford, grade teacher; Mrs. H. C. Thompson, grade; Mrs. G. M. Daugherty, grade; Miss Lucille Hall, history and Spanish teacher; J. D. Doolan and Miss Effie Nell Farmer, home economics.

J. D. Doolan was one to resign, and Miss Effie Nell Farmer who also resigned has accepted a position as teacher in the Tahoka public schools, according to report.

Enochs Echoes

Mr. and Mrs. Jack Alford and children spent the weekend at Lamesa with Mr. and Mrs. Guy Berry. Mrs. R. L. Patterson left Sunday for Crane to visit her children, V. T. Patterson and Mrs. M. L. Cochran. Mr. and Mrs. John Alford and children, Leo Alford and Cecil Edwards, visited the Berry's at Lamesa Sunday. Mrs. Berry returned to Enoch's with them.

The Enoch's baseball team beat Whiteface at Enoch's, Sunday. The score was 12-4.

Mr. and Mrs. Charles Coffman of Whiteface visited in Enoch's, Sunday.

Mr. and Mrs. Jake Hall of Littlefield visited Mr. and Mrs. Sam Patterson Sunday evening.

Miss LaVerne McCandless is spending the week with her sister, Mrs. Olivia Lipps at Lubbock.

The Senior class members left Saturday in a school bus bound for Juarez, Mexico.

Elder Altman and family of Littlefield, visited Mr. and Mrs. Dude Altman, Sunday—Reporter.

MISS SCHUSTER HOST TO THE SUB DEBS

The Mulleshoe Sub-Deb club met Thursday of last week with one of the original members, Dorothy Mae Schuster.

Those present were: Glenna Kennedy, Lela Mae Barron, Jaunita Coker, Frances Border, the president Mary Dennis and the hostess. A very good time was had by all. Plans were discussed for the trip the club may take later in the year. The members decided on going to Farwell that night for a skating party, then adjourned.

Refreshments of pineapple with bacon strips on cheese toast with olives, dainty cookies and punch were served. The gayly designed napkins helped carry out the color scheme.—Reporter.

Earliest Mechanical Time Measure
The earliest mechanical time measure was a water clock, containing water which was allowed to escape through a small hole, marks on the side indicating the lapse of time.

FARM TOPICS

URGES RUBBER TIRES FOR FARM TRACTORS

Work Faster, Rutgers Researchers Find.

By E. R. GROSS
The rubber tire constitutes one more step in the progress of farm machinery. It costs about the same to operate a tractor at part load as at full load, and tractors on rubber tires work faster, more economically and last longer than they do on steel. It has been determined by tests at Rutgers university. Farm machinery and wagons also have lighter draft on rubber. The rubber tire increases the effectiveness of the machine and the operator by making it possible to do more work in less time and with less wear and tear.

The farmer is interested in tractor use because it is cheaper to feed a tractor during the time of operation than to feed horses all the time. This is one of the reasons why tractors have superseded horses to so great an extent. Other reasons include: The tractor conserves man time; it does not need to rest at night; it can work in extreme summer heat; it reduces farm chores; it requires little attention when not working. These things the farmer recognized and appreciated as soon as he learned that he could place dependence in the tractor.

The tractor is being improved steadily. Additional operating speeds and rubber tires are among the important improvements made so far. The tractor will travel faster with less slippage and will pull more with less fuel on rubber tires than on steel rims with lugs. This is a general statement but conditions vary so much for different jobs that one cannot reduce it to an exact per cent of extra power and fuel or time saved.

Rubber tires are also being used on other farm machines and wagons. They reduce draft and make it possible to pull heavier loads with the same power. The rubber tire has opened new possibilities of tractor loading, using the right size machine, combinations of machines, and selecting proper operating speeds. The greater use of high gear for field operations and for hauling on the road is now recognized. So, with rubber-tired tractors, farm machines and wagons, the farmer can work faster, save time and fuel and, at the same time, reduce the jolting and strain on equipment generally increasing its life.

American Oats Output Exceeds Other Nations

The United States' oats crop, like our corn crop, far outranks that of any other nation in the world. According to reports of the United States department of agriculture the American oats crop for 1937 totaled 1,146,253,000 bushels. This was 38.56 per cent of the world total of 4,429,300,000 bushels.

In the drought year of 1936 the United States produced 785,506,000 bushels, or 19.4 per cent of the world crop of 4,043,000,000 bushels. In the preceding year domestic production reached 1,194,902,000 bushels, or 39.4 per cent of the world crop of 4,715,000,000 bushels.

Other leading oats producing countries in 1937 were Germany, with 404,304,000 bushels; France, 313,987,300 bushels; Canada, 291,622,000; Poland, 166,034,000; United Kingdom, 165,000,000; Czechoslovakia, 94,545,000; Sweden, 86,475,000; Argentina, 48,915,000, and Finland, 46,159,000. Accurate figures on the Russian oats crop are not available but it is generally considered to be among the largest.

In bushels produced the oats crop ranked second to corn, which totaled 5,950,000,000 bushels. The other principal crops were wheat, barley, and rye in that order.

Contour Farming

The new type of farming, known as contour farming, appears to be a permanent acquisition for agriculture because it definitely reduces erosion losses. It makes for a more efficient utilization of the land, says a writer in the Missouri Farmer. One objection to it by farmers is, however, the point rows this type of farming makes when row crops are grown. The point rows result because the fields are usually square and the rows no longer follow the line or cross fences but follow the contour of the slope instead.

Grain Feed for Chicks

Chicks should be given grain feed after the first seven to ten days. This should be fed two or three times a day on top of the mash. It is very essential that sufficient mash hopper space be supplied so that the chicks can eat at one time. As early hatched chicks do not have access to range and direct sunlight or green feed, their ration should be supplemented with one and one-half per cent of straight cod liver oil that contains 85 U. S. P. units of vitamin D per gram and not less than 600 U. S. P. units of vitamin per gram.

Meat and Drink

By OSCAR EKLUIND
(Released by Associated Newspapers WNU Service.)

LUCIA simply couldn't resist the temptation to stand for a while before the gorgeously decorated windows of the building which she had been in such haste to reach. She had boarded the 7:30 downtown car in order to be among the first to enter the doors, yet here she stood transfixed as usual by the beauty displayed in the windows. Standing in bold relief was an old Cad frame, the habit of knowing its value—that its reign mark showed it to be a genuine Ming—but she did know that its old green enamel against that background of dark blue drapery was a thing of beauty which satisfied some need within her. A Jolly, fat, round pewter bowl, of which she was particularly fond, was still there, and a duck of an old tea-caddy with brass handles and an ivory knob; some wonderful goblets—Jacobite had she but known it—a pink luster tea-set and an old sampler with exquisite stitching. How she loved them all! She had formed the habit of coming to these windows every time she had occasion to visit this downtown section. Time had flown faster than she realized and so it was that upon reaching the office of the being she found five men ahead of her. The switchboard operator nodded to them one by one to enter a door marked "Private." While Lucia waited each one of the five came out of the inner room within five minutes of his entrance.

"He wants a man," the girl at the switchboard told her when she asked to see the manager about the position advertised.

"I know, but you see I'm going to try to persuade him that I'm just the person he needs," said Lucia with the friendly, confidential manner that had won her friends ever since she was three years old. "That is," she coaxed, "if you'll only let me see him."

The girl seemed appreciative if dubious. She motioned for Lucia to enter the private office, however, saying, "Good luck to you, dearie, but take it from me, he's no easy mark."

"I came to see about your ad," began Lucia, "for a salesperson in your art shop."

"How did you get in here?" barked a voice from behind a big desk. "I advertised for a man and that—that girl at the board knows it. She's paid to keep people out of here and this is the way she does it." The voice had grown more and more irritable as Lucia made no move toward the door.

"But you really don't know how badly I want to work for you and I thought perhaps if I made you understand you'd let me try."

"Work for me? Why for me any more than for someone else, I'd like to know? I never hire women when I can help it. They can't appreciate things that they don't own."

"Oh, but I do," cried Lucia. "I love your shop," she went on rationally. "Your windows have been just—just—meat and drink to me."

If nothing else Lucia had captured the attention of the manager and owner of the famous art shop.

"What do you mean, 'meat and drink'?" he asked curiously.

"Did you ever," inquired Lucia, "live in one little back room, with horrible red and green and yellow paper on the walls and with battered golden oak furniture and a view from the window of back stairways, milk bottles and grayish-white washings on clothes lines that are worked by pulleys?"

"That's why your windows are meat and drink to me. I love the soft colors of the draperies and the pottery. Of course I don't know the names of the little china and beautiful glassware, but I could learn them quickly—really I could. There are art books there in the library and I could read them at night."

Lucia was breathless with emotion.

"How old are you?" he asked.

"Nineteen," said Lucia, her cheeks growing redder and her eyes brighter.

"You don't look it," said he meditatively. "It's the short hair and short skirts, I suppose. By the way, what makes you think you could suit me? I've a reputation for being a hard man to work for."

Lucia smiled in her friendly fashion.

"I've always felt that you must love your beautiful things in just the same way that I do," she said eagerly, "and people who love the same things always get along well together."

"If you really mean all that you've said—" he began.

"Oh, I do mean every word of it," interrupted Lucia fervently. "I—I think I've been starved for beautiful things."

"I can use you," was the terse reply.

"I did it," whispered Lucia joyously as she passed the friendly smile to the operator.

While sitting idly at the big desk the bachelor proprietor of the art shop was thinking that of all the women he had ever met in the 34 years of his life little Lucia, who had sought meat and drink in his windows, would make the ideal companion for his wanderings in far-off lands in search for the beauty that he loved.

EVERY WHEAT PRODUCING NATION OF THE WORLD HAS SOME FORM OF CONTROLLING ITS PRODUCTION

College Station, May 22.—American wheat producers are caught in a world situation which finds virtually every exporting country using some form of government assistance to increase the price received by domestic producers.

Jess Watson, wheat farmer and member of the Texas Agricultural Conservation committee with headquarters here, finds this to be true after a study of world wheat production and trade reports.

Despite shrinking outlets for world wheat, the world's major exporting countries have increased acreages and fought the stiffened competition by maintaining production levels.

Major net exporting regions include the United States, Canada, Argentina, Australia and the Lower Danube region.

In the middle '20's, the average total wheat acreage in exporting countries, not counting Russia, was around 130 million acres. In the middle '30's, this figure had been increased to 145 million acres, and for the 1937-38 crop year the acreage was 15 million acres greater, or 169 million acres. This increase of the 1937 acreage over that of the '20's was about the size of the entire wheat acreage of both Australia and Argentina for the 1937 crop.

While acreage and production levels showed no sign of material decrease, net exports from the exporting countries (excluding Russia) in 1937 dropped 75 million bushels below the average of the middle '30's and 300 million bushels below the

average of the middle '20's.

Forms of government assistance began used in the grape for export markets are as follows:

ARGENTINA: Grain-regulation board purchases wheat at fixed prices whenever world prices fall below minimum established by the government. The government has complete control of foreign exchange.

AUSTRALIA: In most years government pays bounties and makes direct grants to wheat producers.

CANADA: Canadian wheat board buys from producers at guaranteed minimum price and sells at the best price it can obtain, sharing an excess, if any, with participating producers, but charging loss, if any, to the national treasury. Government considering subsidies on acreage basis now as alternative.

DANUBE BASIN COUNTRIES: Complete government control of wheat exports. In those countries the most effective means of moving wheat into export has proved to be bilateral treaties of agreements with certain wheat-exporting countries of Europe.

SOVIET RUSSIA: All trade in wheat is government controlled.

Diamond as an Abrasive
The diamond is unmatched as an abrasive. Boron carbide, the hardest synthetic material ever made in commercial quantities, is the only product developed as a commercial abrasive which has a hardness intermediate between silicon carbide and the diamond.

FACTS FAVOR FORD

- 1 The 1939 Ford V-8 is a beautiful, modern motor car. Its 85-horsepower engine gives you economical, well-balanced performance over the entire speed range—and the 60-horsepower engine is even more economical.
- 2 The structural strength of the Ford car—frame, bracing, axles, body—makes not only for safety, but durability and long life.
- 3 Ford hydraulic brakes are exceptionally large and strong in proportion to car weight.
- 4 The Ford car is stabilized for comfortable riding. Its springbase, the distance between front and rear suspension, is 123 inches. Seats are toward the center, perfectly balanced. The car does not bob or dip and can have very little sway.

• • •

These four points—power, strength, safety, comfort—are by far the most important essentials in any motor car. They form the basic value of your investment.

• • •

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

• • •

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see—quality of materials, precision of manufacture, fundamental engineering.

Every Great Attempt is Glorious Even if it Falls

THE AMERICAN'S CREED

By WILLIAM TYLER PAGE

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign nation of many sovereign states; a perfect union, indivisible and inseparable; established upon the principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

I, therefore, believe it is my duty to my country to love it, to support its constitution; to obey its laws, to respect its flag and to defend it against all enemies."

A THOUGHT FOR THE WEEK

But the word of the Lord endureth forever. And this is the word which the gospel is preached unto you.—Peter 1:25.

God writes the gospel not in the Bible alone, but on trees, and flowers and clouds and stars.—Luther.

ROAD TO SECURITY

While this is being written the Texas legislature is still struggling within itself to draft and pass a pension-paying bill for old folks that will be somewhat satisfactory to the governor, the old folks themselves and to the multiplied thousands of individuals and business concerns that will have to put up the tax money to meet the requirements. It's a huge job, as anyone will recognize who has given it any thoughtful consideration.

Legislators well know they are assuming a big responsibility in passing any kind of increased pension bill, and probably well realize the effect. It will have upon their return to office will be the smallest part of it. In the main, it is generally believed our legislators are a sincere group of officials, otherwise no any kind of pension increase bill might have been passed weeks ago and this law-making body been adjourned.

Meanwhile there are thousands of people of advancing years who are living in peace and plenty. No longer engaged in commercial activity of any kind, they are free to travel, to play and to live largely as they wish. It did not happen so. There was a time when most of these people were never rich. They never earned any big salaries, never felt heir to any one else's wealth, never headed any great companies. They were, for the most part, just ordinary workers and professional people; but they were not improvident people.

They attained their competence by systematic savings and safe investments of various kinds. They put aside dollars regularly, in small quantities, during their productive years—against the unproductive years they well realized were sure to come. They employed a plan of common sense thrift. Of course, there were some who at times met with more or less financial reverses; but they had the courage to pick up the remnants of their fortune and start in again.

Most aged people dependent upon pensions for a living have been profligate of their earned incomes. They never learned how to save a dime out of every dollar they earned; how to make a dollar earn another dollar to keep it company; how to deprive themselves of unneeded luxuries and to discriminate between actual needs and frigidities wants not essential. Now these pensioners, many of them good wholesome people, are dependent upon the Government to supply their living. Perhaps some were never worth a cent's damn their nation, state or community; to their families, their relatives or even to themselves; but thousands of them

have been good citizens, folks of wholesome ideals, industrious, good socially and morally. However, the most of them failed to look forward to the proverbial "rainy day" which always comes if one lives long enough. As a result the Legislature is having a heck of a time in passing an equitable law for their benefit.

THINK AGAIN

If, as some of our politicians argue, the steady and rapid extension of government control over individuals and businesses marks the royal road to security and plenty for the people, the totalitarian states should be veritable marvels of prosperity.

The fact is, as everyone who has studied the subject knows, that totalitarianism tends to promote a lower, not a higher wage for the worker; a smaller, not a larger return for farmer and manufacturer.

In Russia, articles that Americans of all economic levels consider almost absolute necessities—such as woolen clothing, good leather boots, meat and eggs, etc.—are possessed only by the relatively few, the favored ones of totalitarian "aristocracy." In Italy, wages and the standard of living have been consistently lowered by governmental fiat, and even so common a commodity as wholesome bread is unavailable to the bulk of workers.

In Germany the government-sponsored spread of "ersatz" foods and materials—that is, substitutes for rubber, glass, butter, bread made of grains, coffee, etc.—testifies mutely to what is happening to the ordinary citizen's standard of living and chance to progress there.

There isn't any mystery as to why this is so. As Harry Curran Wilbur has said: "Government is a non-producer, and has no resources save that it takes from producers distributors and those servicing both processes." Taxes and competition, under paternalistic government, gradually drive the private producer to the wall. The nation's resources are gradually used up and destroyed. The national income drops, while taxes rise. And the standard of living goes down.

History, ancient and modern, tells the story. And if you think "it can't happen here," just consider the expansion that has taken place in our own government in recent years, and its competition with private citizens—then think again.

Also, the Request was almost simultaneous with several startling revelations before the investigating committee. One was that the WPA

THE POCKETBOOK OF KNOWLEDGE

By TOPPS

WITH ONLY 6% OF THE WORLD'S POPULATION THE U.S. CONSUMES 20% OF THE WORLD'S GENERATED POWER, MEANING BETTER LIVING AND MORE JOBS FOR AMERICANS.

IT'S A GOOD BOOK.

THE WORLD'S LARGEST SWISS CHEESE FACTORY IS LOCATED IN THE UNITED STATES—IN WISCONSIN.

HOUSEHOLD WASHERS PRODUCED BY AMERICAN MANUFACTURERS AND USED TODAY 18,500,000 OF THEM! ALL EVERY WEEK. A CLOTHES WASHER WOULD GO AROUND THE WORLD TEN TIMES WITH ENOUGH LEFT OVER TO WASH FROM MOSCOW TO MIAMI.

THERE ARE MORE THAN 2000 DISTINGUISHABLE UNITS IN EACH AUTOMOBILE, MADE UP OF MORE THAN 10,000 PIECES.

MILLET IS USED AS FOOD BY 1/2 OF THE WORLD... YET IN AMERICA IT IS GROWN ONLY FOR HAY OR AS A CATCH CROP TO BE PLANTED UNDER TO ENRICH THE SOIL.

gested they tell them, said wife would probably wind up by taking in washings for a living.

We've frequently noticed that the Muleshoe man who makes the biggest holler because the doctor is late coming, is usually the one who makes the doctor wait the longest in paying his bill.

SNAP SHOTS

One can't beat nature. She keeps on working in spite of the surplus.

An American woman in Paris has had her mouth made smaller. Why not a hint to congressmen!

Modern non claim there is much religion in science—and there may be some science in the Bible.

For one to love artistically, they need to be a good liar rather than a good linguist.

We may wonder what the meek will do when they inherit the earth, especially the U. S. part of it; but they'll probably do a lot of worrying.

It is said when a man loses his caution he begins to flirt; when he loses his common sense he falls in love; when he loses his last spark of reason he gets married.

The main trouble between capital and labor is that the human units that talk through the ventriloquistic dolls called money and machines have never been able to speak the same language and have had no interpreter. There is but one language that can be common to them both and that is justice; there is but one interpreter that can talk in both languages and that is the Golden Rule.

Pavement Pickups

R. L. Brooks told us the other day about a fellow who insisted he changed his shirt every 2,000 miles and the oil in his car every week.

J. L. Alsop says insurance isn't such a safety measure after all, as he has observed most people wait until they get married before taking out insurance.

A tall county official late at the Chamber of Commerce dinner last Friday admitted she was so thin her stomach couldn't tell when 12 o'clock came.

Customer: "Will my dress shrink when it is cleaned?" Irvin St. Clair: "How does it fit now?" "Well, it seems a little large." "Yes, of course, it will shrink a little."

Ray Griffiths says the Baptist congregation is increasing so rapidly that last week they had to tear down the single flight of steps leading into the auditorium and build a double flight to take care of the crowds.

A very charming little lady who used to be a neighbor of this editor, confided in him the other day the fact that she carried a lock of her husband's hair in her purse. "But your husband is still alive," she responded. "Sure he is," she said, "but his hair is gone."

Gil Wollard was telling the other day of reading where a wife shot her husband at close range. "Then there must have been powder marks on his body," some one replied. "Yes," said Gil, "that's why she shot him."

Jaunty Journalettes

It's peculiar, the older some girls grow, the more it costs boys in Muleshoe for candy.

The Muleshoe man who becomes spoiled by success doesn't deserve to have it happen to him.

Muleshoe folk who are egotistical should learn, for their own good, to look it to themselves.

Perhaps one reason so many Muleshoe men talk in their sleep is because they have no chance when awake.

We've heard it said there are some married folks in Muleshoe who only say something nice to each other in front of company.

Advice usually doesn't have a price attached to it, and lots of advice issued in Muleshoe is worth just that much.

We suppose there are plenty of Muleshoe folks who will just stay at home and not attend either of the World's fairs for fear of hurting the feelings of the other one.

We are beginning to think it's going to be pretty hard for future generations in Muleshoe to support the government in the lavish style it is now accustomed to.

If some Muleshoe fellows told their boss what friend Wife sug-

Goodland News

Everyone is busy planting since the rain.

Mrs. Tommy Galt and Mrs. Cass Stegal visited at Hale Center last week. Mr. Galt's nieces returned home with them for a visit.

Miss Bernice Sanderson has returned home from Plainview where she has been a student in Wayland college the past nine months.

Mr. and Mrs. L. D. Sanderson attended the Wayland college graduation exercise at Plainview Wednesday morning of last week. Miss Helen Brinker, formerly of Goodland, was a member of this class.

Mr. and Mrs. Tom McPherson and their daughters and two cousins were weekend visitors in the Woodrow Cagle home. Misses Fay and Pearlene are spending the week here.

The Methodists will meet Sunday afternoon at 2:30 o'clock to organize a church. The preacher from Bula will be here. All interested please be present.

Rev. Eugene Stone of Causey, New Mexico, preached here Sunday.

A special candle light B. T. U. program was given Sunday night. There were not many out due to the sandstorm. Everyone came next sandstorm. Everyone came next sandstorm and let's make this an A-1 B. T. U.

Miss Marjorie Tarlton returned home from the Texas school for the Blind, Austin, Saturday.

Gil Wollard and the misfortune of losing one of his milch cows from eating thistles last week.

H. D. Elec. Officers

The H. D. club met at Mrs. Glen Thru' to reorganize and show Mrs. Baker Johnson, last Monday. Mrs. Stegal, Mrs. L. D. Sanderson and Miss Lillie Gentry met with them. The officers elected were: Mrs. C. Stegal, president; Miss Woodrow Cagle vice president; Mrs. L. D. Sanderson, secretary-treasurer; Mrs. W. W. Cagle, reporter; Mrs. Emmitt Brunstalo, delegate; Mrs. Glen Thru', parliamentarian; Mrs. O. C. Kirek, kitchen demonstrator; Mrs. Tommy Galt, home-food supply.

Regular meeting days are 1st and 3rd Tuesdays. Refreshment of angel food cake and ice cream were served to the 28 present.

The next meeting will be June 6 with Mrs. Frances Stegal.—Reporter

Baileyboro News

Mr. and Mrs. Quince Chaney and son Edgar visited Mr. and Mrs. D. Clements last week.

Mrs. Oliver Angel and daughters left for East Texas last week where they will be on a home tour.

Mr. and Mrs. Arville Newton were Lubbock visitors last week.

Jimmie Rogers of Lubbock is spending the week with his son, Mr. and Mrs. Lonnie Rogers.

Miss Byrdine Wallis, who has been attending school at Glarendon, is visiting friends and relatives here.

Mr. and Mrs. Clifford Wallis and family, Mr. and Mrs. Lonnie Rogers and family and Mr. and Mrs. Curtis Moore and family visited relatives in Pettit, Sunday.

G. J. Williams has called to Lubbock Saturday, his father being seriously ill.

A large number of club women attended club here Saturday of last week.

Home Demonstration News

The H. D. club met Tuesday of last week in the home of Mrs. V. B. Mays. A very interesting demonstration was given by Miss Lillie Gentry on quick breads. She also demonstrated articles for the kitchen to make baking easier.

Punch and cookies were served to Mesdames Ruth Clements, Evie Rogers, R. Kemp, Dana Arnold, Bob Maxwell, Opal Wallis, Loraine Preston, Syle Moore, Inez Newton, Coyne Ruby Gallagher, Duke, Miss Janie Lou Garth, Miss Gentry and hostess, Mrs. Adelaide Mays.

Miss Janie Lou Garth was elected to go to Short Course at College Station. We met Tuesday, at the school house to work on our candlewick spread which will be given away at our next play in July. The name of the play is "Hillbilly Courtship." The proceeds will go for sending our delegate to Short Course.—Reporter.

Invented Metric System

The metric system was an invention of the French in the latter half of the Eighteenth century. The French government appointed a committee of the Academy of Sciences under the authority of the national assembly sanctioned by Louis XVI to devise a system of weights and measures. On June 22, 1790, the standard units, the meter and the kilogram, made by expert scientists and instrument makers, were deposited in the archives at Paris.

WEEKLY LAY SERMON STRAIGHTENING THE CROOKS

By JESS MITCHELL

Tradition describes the origin of geometry to the Egyptians, and it was about 500 years before Christ that Thales of Miletus organized his crude mathematical ideas into a science which has been constantly improved to this day.

In all ages, from its very inception, geometry has had to do with straight and curved lines, angles, cones and apparatus, but never with a crooked line. The circle and square are its favorite formations, while the apex represents the exalted height of its mathematical calculations.

The most of us have known for a long time there are some terrible twists in this old world in which we live. There have been brain-storms and nerve-tornadoes and heart-floods and cerebral glaciers and moral earthquakes and social disasters innumerable.

Many good and sincere people have worked and worried over such situations until they have come to the end of their mental wits and physical exasperation, and have sat down in total despair, while countless other sturdy souls are trudging on with heroic inspiration in their efforts to eventually straighten out these warped and crooked situations in life.

Much of the world's wealth is in the hands of the profligate, while many of the best people are subjected to distressing privations. America's Declaration of Independence says we are all created equal, and not a few have suggested the world's wealth should be equally divided, but the original declaration is not true nor the follow-up suggestion advisable.

Plenty of people are born in unfavorable circumstances, and these same circumstances become enhanced because they do not acquire alertness, acumen and assiduity as they mature in life. Plenty of folks remain in straightened circumstances because they have been too indolent, too stupid or lacked courage to take advantage of honest circumstances for accumulation.

While as yet there is no definite proof, I happen to be one of these folks who suspect there is quite likely a spiritual law analogous to every physical law. We haven't yet learned all the existing physical laws, but we are becoming apprised of many new ones year by year. In like manner, we have not learned nearly all the probable spiritual laws existing; but new ones are constantly becoming manifest among our sincere intellectuals and spiritual movers.

being of a higher type and order, have much to do toward dictating success of the former.

No tack-hammer brain can be expected to deal the sledge-hammer blows of a giant intellect. No human with an atrophied intellect can be expected to warm and expand to take in the welfare of a community or nation.

Bear in mind I am not admitting the spiritual attitude of the present age is right, neither am I arguing it is wrong. Without defense or rebuttal, I am merely stating the situation as it exists; yet I do suspect that whatever may be the future reveals religious revelation as a fact of the past and as a method for the future, stands largely discredited.

While there is in many quarters a fundamental distrust of the agnosticism and humanisms that characterize much of the modern religious thought, there is the sincere underlying conviction that much of the modern teaching is harmful to the human spirit and subversive to the highest attainments of spiritual life.

During past years and centuries orthodox religion has made much of "revelation," yet how many have ever stepped to diagnose and analyze the meaning of that important word. Revelation is actually an uncovering and disclosing of something which has been hidden, bringing to the light of understanding something that has been obscure, a conscious illumination and comprehending of something which heretofore may not have even been perceived or suspected.

With the present expanding of human intellectual faculties and the increased yearning of spiritual entities, the world is today witnessing a new revelation which in many phases is the most astounding in human history, and is superseding all former revelations, supplanting much that has gone before, bringing a new sense of human relation to worldly life and universal existence, and developing an entirely new, sensible and inspiring outlook on the present world of materialism and the future world of faithful conjecture.

Mistake to Work Too Fast Jud Tunkins says it's a mistake to work too fast. In making money it's better to be a financier than a counterfeiter.

JOHN NANCE GARNER

Walks two miles with deer on back.

Personal Glimpse Of 'Jack' Garner By Old Friend

A rare, intimate glimpse of John Nance Garner, the man, is contained in a column entitled "Perspective," written in News Week magazine by Editor Raymond Moley, former assistant secretary of State under President Roosevelt.

"It's true that Mr. Garner is picturesque," he says "But he's picturesque only because his method of life, which is simple and natural, contrasts so weirdly with the sham living that goes on in Washington. So far as I can see, he's a man who lives his life as he wants to live it. If he were the manager of a ranch or the president of a bank or the publisher of a newspaper with no possible political ends to serve by 'quaintness,' he would still do just about as he does.

"There's nothing cheeky or unreal about all this. No man who's putting on an act can serve in the Congress of the United States for 35 years and still keep the affection and respect of his discerning colleagues.

"Mr. Garner doesn't read an awful lot, except the newspapers. He learns a lot from talking to people. The garden of his mind is carefully grained.

"Now that it's become fashionable again to salute the American people when 'The Star-Spangled Banner' is played, it can be said with impunity that no man loves his country with more unabashed fervor than Mr. Garner. If he seems to be less concerned about resounding phrases like 'America's destiny in the world' than some others are, that's because he's so passionately anxious to see America believe in itself. He's convinced of the durability of democracy as a way of life for the American people. He knows that any danger democracy faces in the United States comes not from without but from within—when people grow careless, indifferent, tired.

"Mr. Garner is no nineteenth-century trader. He believes in protection for American farmers, for American industry. He believes that the concentration of financial power amassed in the last generation was bad for the country. But, unlike Borah and Brandeis, he doesn't look with horror on big business. He takes the view that probably some big businesses are more efficient when they're big and some businesses are better for the public when they're little, and that it's the government's job to try and find out which are which. He profoundly believes that much of the early New Deal legislation was sound, but he shrewdly points to a lack of coherence in its later phases.

"He's far from organized labor, but made no secret of his alarm over such excesses as the sit-down strikes; to him, the sit-down strikes were nothing more or less than a forcible seizure of private property. He's against the continuous growth of spending in the government—not only because he sees financial chaos at the end of such a course, but because spending has been accompanied by increasing executive indirection.

No man has exercised more power in Congress over the years than Mr. Garner. It is a power that does not rest on patronage. The vitality of his mind, the ripeness of his political judgment, the warmth of his affection, his unflinching, unmitigated honesty, have compelled the admiration of Republicans as well as Democrats, of radicals and conservatives, Easterners and Westerners. All this despite the tradition that the Vice Presidency is a role of impotence.

Mistake to Work Too Fast Jud Tunkins says it's a mistake to work too fast. In making money it's better to be a financier than a counterfeiter.

No Cobwebs in His Brain

"John Nance Garner was born on Nov. 23, as near Thanksgiving as so modest and wise a person would choose to be. His countrymen can't help numbering him among their blessings this week," said an editorial in the New York Times a year or so ago in commenting upon the vice-president's birthday. "He holds playfully," said the editorial, "that the books never got the year of his birth wrong. They say it was 1868. He prefers '69. For our it is '69 until he selects some other date.

"He can be patient with policies that he disapproves. A sort of Ben Franklin, he has no cobwebs in his brain. He can be exposed freely to fantasists and fanatics and keep the peace. It is lucky for his own that he is a philosopher. The felicitations of his colleagues felicitate him from the chamber. Politicians who habitually spread their ears upon the ground can admire a man given to forming his own opinions.

Some Suggestions For Destroying Grasshoppers

While Bailey county farmers are quite grateful in the fact this county may not be numbered among the states highly infested by the grasshopper scourge, yet there are some hoppers being found, poison has been provided for such needs and is being used. The following suggestions and precautions are being offered for the benefit of efficiency and fuller satisfaction.

This material is poisonous to man, animals and insects. Handle it with care. Spread the bait at the rate of 10 pounds per acre and see that no two flakes of sawdust or bran fall together. If spread in this manner it is not dangerous to poultry, stock or game.

Operators should grease their hands and particularly under and around the finger nails with cold cream or axle grease before handling the bait.

Wash the hands and arms with soap and water and clean under and around the finger nails when the operation is complete. Remove clothing and do not wear again before it has been washed. Do not put sacked bait in feed bins or houses containing feed. The government assumes no responsibility for the loss of stock thru carelessness or the misuse of this bait. Do not look for results for the first day after preading bait. It may require from two to five days for the poison to act. More than one application may be needed for control. Look in protected places for dead hoppers. Spread bait in the morning when the temperature reaches 65 degrees. This will be after sun up in the early part of the season, and before sun up later in the season.

Sound Arouses Spring Trampling of wild elephants causes water to bubble as if it is boiling in a spring in the wilds of Panamure, in central Ceylon. The local legend is that the elephants do not drink at the spring, which the villagers believe to be sacred, but come to it and trumpet as if in homage and quench their thirst a little farther down the stream.

So. Plains Amateur Baseball League Formed Monday

Teams representing eight towns on the Plains have joined the South Plains Amateur Baseball league which was organized at Sudan Monday night. A fourteen game schedule for each team has been announced with games scheduled each Sunday during June, July and August.

Towns represented in the league are Dimmitt, Muleshoe, Morton, Amberst, Littlefield, Ropesville, Whiteface and Sudan. Each of these teams will play the other teams twice during the season, one time at home and the other at the opponents home park.

Sunday, June 4, Littlefield plays Amberst at Amberst; Dimmitt at Muleshoe; Whiteface at Ropesville; and Sudan at Morton.

Sunday, June 11, Amberst plays at Sudan; Muleshoe at Littlefield; Ropesville at Dimmitt; and Morton at Whiteface.

Ireland is reducing milk taxes.

Off To See 'Cavalcade' At Fair

Mayor Angelo J. Rossi (right) of San Francisco, accepts a fancy invitation to see The Cavalcade of The Golden West at the California World's Fair and in an ancient equipage heads for Treasure Island. The Cavalcade, condensing 400 years of romantic Western history into a little more than an hour, presents a swift moving drama that has fascinated thousands of Exposition visitors. Driving the auto, one of the Cavalcade 'props', is Tom Sharke, former contender for the world's heavyweight title, an actor in the show, while in the back are 'girls of the gay 90's.'

CAMERAGRAPHS

INVENTIVE ABILITY and ambition are apparent in this picture of a father and his two young sons. Holding a novel coin machine which he has just designed is 20-year-old Harry Reusler of Palmyra, N. J., while his 22-year-old brother, Edward, and the father, H. G. Reusler, proudly look on. The three are partners in business and all three are students of International Correspondence Schools.

"THE MILK MAID OF TOMORROW" (below) operates a giant model of the microscope which plays such an important part in the Scalet System of scientific testing of dairy products. On display in the Scalet Building at the New York World's Fair, the giant microscope is manipulated by Ruth Clarke.

ELEANOR ROOSEVELT 2nd's first creations as a professional designer are being offered exclusively by Arnold Constable and Co. of New York. Inset shows Mildred, noted glamor girl, wearing hat and dress of Miss Roosevelt's design.

ROYALTY TO U. S.—New York's World's Fair is attracting a procession of European royal visitors. Here Princess Martha of Norway, like a true Scandinavian, downs a cup of coffee, while Crown Prince Olav autographs a program after dedicating the Norwegian Pavilion.

VACATION PREVIEW of Carol Hughes as she displays the latest in printed white swim-suits.

PLAY BALL!—Colonel Seymour Weiss, managing director of Roosevelt Hotel, New Orleans, hands first baseball to Manager Roger Peckinpaugh of the Crescent City Pelicans. Louisiana Governor Richard W. Leche looks on approvingly and Southern League baseball begins another season.

FOOD SPECIALISTS TO LECTURE HERE

Miss Grace I. Neely, food preservation specialist from College Station will lecture to the Home Demonstration women of Bailey county Thursday, June 8, beginning at 2:00 o'clock p. m. in the District court room in Muleshoe.

Miss Neely's lecture on "Food Preservation" will be very helpful and it is hoped all clubs in the

county will be well represented at this meeting, according to Miss Lilie Gentry, county home demonstration agent.

The word "Coal" The word "coal" usually means black. There is record of the use of this word spelled "kole" in England, long before the Norman conquest. "Kohl" is also the name of the black cosmetic East Indian women use to darken their eyebrows. The words, "gual," "kolan" and "glo" are used in Ireland, Cornwall and Wales to designate coal.

"I'D LIKE AN ADVERTISEMENT PLEASE!"

Suppose you had to buy each advertisement you see in the newspapers now! Suppose you had to pay to learn where and what and how about food, furniture, clothes!

You'd be mighty sure to read each advertisement thoroughly—digest every bit of important information it offered!

It's still a good plan to absorb all the facts from advertisements—even though they come to you free along with your news! For here merchants tell you how to make a dollar do more work. . . how to spend wisely. . . how to go farther on less. Through the printed word, they proffer their finest wares. It's much to your advantage to listen as they speak.

WE THANK YOU

By FINLEY WHITE
Bailey Co. Farm Agent

Two things are always welcome in West Texas: a rain and a white-faced calf. The past few days we've been receiving with open arms all the rain we could get—and it's welcome.

Bailey county as a whole has no complaints to offer so far as moisture is concerned. Some few parts of the county have been rained out, but there's a bright spot that goes with that story, too. If a fellow gets rained out he's got moisture enough to replant on.

Reports from the field are to the effect that cotton, feed and sudan are coming along fine. If nothing unforeseen happens in the next 10 days to two weeks, most of our field crops should be up to a good stand and off to a good start.

4-H Boys On The Job
Bailey county 4-H club boys have brought over 100 choice animals into the county in the past two weeks. Among the animals brought in are choice sires to make the top.

Club boys who are doing the most outstanding work will be chosen to go to A. & M. college July 5, 6, 7 and 8. Bailey county will be allowed to send about 75 boys to A. & M., according to information just received from College Station.

The boys who are chosen to make the trip to College Station will be the ones who are doing outstanding club work. The local club sponsors and the county agent will select the boys who are to make the trip.

Farmers Short Course
In addition to the boys and girls short course at College Station, there is to be a two day short course for farmers and farm women. The dates for this meeting are July 12 and 13. In the past few years this conference has been largely a "ladies meeting." The women have shown a greater interest in home making than the men have shown in farm building.

With this year's meeting is hoped we can inject a little of the masculine into these conferences. Now is the time to begin making plans to attend this conference. Mark up your calendar now for July 12 and 13, and make your plans to attend this all important meeting of farm people. The writer has promised to see to it that ten to fifteen men attend this year's Short Course.

If you're interested in this trip, please contact the County Agent at once and let's get our plans perfected. It will cost very little to make this trip and it will be a vacation you will long remember. After Short Course is over you can drive down to Galveston in three or four days. What do you say we work up a live wide awake bunch and get off on this educational frolic?

AAA Notes
So far as 1938 goes, Bailey county may be well in the rear, but when it comes to 1939 "Stuff" we are just about leading the show.

We were among the first four counties to receive our 1939 wheat subsidy payments and we were among the first two to receive and distribute our 1939 allotments for splits and combinations.

Bailey county has already served its time in the rear rank. We have moved up to the front rank and are going to stay.

Sea Gulls "Adopt" Ships
Sea gulls sometimes "adopt" a ship and follow it from port to port, even on trips across the Atlantic ocean. At dusk they settle down on the waves and sleep. At daybreak, says a writer in Collier's Weekly, they resume their journey, catching up with the vessel in time for breakfast.

Red Squirrels Erratic Workers
Red squirrels have a habit of gathering spruce cones into piles. Often they do not wait for these cones to fall but chew, pull or tear them off the branches. Squirrels are erratic workers, and will spend considerable more time eating cones, sitting in trees or playing than in actual cone-piling.

one. If it happens that the producer with a blue and a white card actually produces less than his 1939 marketing quota, he may sell carryover penalty cotton, together with the 1939 crop, up to the amount of the 1939 quota without penalty; but any carryover cotton sold in excess of the 1939 quota will be subject to 2-cent penalty which prevailed in 1938.

Four-fifths of the Texas cotton growers who voted in a referendum last fall voted in favor of cotton marketing quotas for the 1939 crop.

Good Rain Falls In This Section Last Sunday Morning

Mulleshoe and surrounding area was visited with rain last Sunday morning averaging from about one-half to an inch and a half in various communities. Judge Klump, local government meteorologist reported the rain gauge in Mulleshoe showed .47 inch. In some sections there was some small hail to accompany the rain, but no damage is reported in this area.

The rain was quite general throughout the state east, south and west of here, according to report of daily newspapers. Big Spring about 250 miles southwest of Mulleshoe, suffered several thousand dollars damages from hail and heavy downpour. Some East Texas sections report severe damage to crops from hail.

This added moisture, with such as the ground already contained, puts the soil in excellent condition for germination and growth of spring crops, of which there has been thousands of acres recently planted.

Lay Sermon—

(Continued from Page Five)

cause it could not be logically mapped, is today being traveled with mental satisfaction and spiritual vivacity. Gradually the teachings of the Great Master of Galilee are receiving more correct interpretations. So-called fundamental and orthodox teachers are giving way to ultra-fundamentalism and ultra-orthodoxy, because folks are coming more and more to realize the true meaning of Jesus of Nazareth when he said: "Be ye perfect, because I am perfect." I make no claims whatever as a prophet, yet I do believe that the time will come some day when the rubbish and debris of past religious notions have been cleared away, when the pathological highways of mental travel have been straightened by spiritual geometry, this world's population will come to a perfect enjoyment of spiritual existence—for JESUS NEVER LIED!

Three Cents A Pound Cotton Tax On All Over Quota

College Station, May 30.—Anticipating fully 92 percent compliance with 1939 cotton acreage allotments, AAA workers at state headquarters here do not expect much Texas cotton to be penalized through the application of cotton marketing quotas on this year's crop.

Arrangements nevertheless were made here this month to single out the comparatively few growers expected to exceed cotton acreage allotments and to place a 3-cent a pound tax on cotton they sell in excess of their marketing quotas.

E. N. Holmgren, state AAA administrator, explained the tax, which is a cent larger than it was last year, will be collected by the buyer at the time of the sale.

A farm's marketing quota consists of either the normal or the actual production, whichever is the greater of the farm's 1929 cotton acreage allotment—plus any carryover cotton, which would have been subject to a penalty had it been marketed in 1938.

Producers who have no carryover penalty cotton and who plant within their 1939 cotton acreage allotments will receive white marketing cards and may sell all their cotton in 1939 without a penalty. The producer who overplants his allotment gets a blue card to go with the red over penalty cotton on hand, he gets a blue card to go with the red

Ventriloquism

Voice cannot be produced by a ventriloquist in the stomach or anywhere except in the larynx. In ventriloquism the speaker takes a full breath, keeps the "muscles of the chest, neck, lower jaw and lips as motionless as possible, and speaks with the mouth almost closed and the glottis narrowed, not allowing the air to escape through the nose. The lower lip is slightly retracted and rested against the upper teeth and the tongue articulations are greatly altered. Much of the deception depends on suggestion as to the source of the sounds.

The Galax Leaf

The galax leaf, found in the mountains of North Carolina, has unusual keeping qualities. Cases of the leaves have been sent on long voyages and have arrived in perfect condition. In the early days of the industry Queen Victoria often sent to the Southern Appalachians for galax leaves.

DAREN'T START DRY

EVEN if this camel holds records for going without more drink, could he last if he had to start dry? Your car and your engine oil can't last either if you keep starting dry this Summer.

You can't help it with any oil that always drains down to the crankcase completely. But you can certainly help it by getting your engine OIL-PLATED.

NEVER all down in the crankcase, no matter how long you park, OIL-PLATING is lastingly close-knit to inner engine surfaces by the action of Conoco Germ Processed oil—patented. Its strong "power of attraction" fastens non-detachable OIL-PLATING throughout your engine. Does chrome-plating drain down? Therefore does OIL-PLATING. And since OIL-PLATING doesn't fly off or fry up it helps your engine to shatter the record for going without more oil. That's why to OIL-PLATE today with Conoco Germ Processed oil, at Your Mileage Merchant's, Continental Oil Co.
