

THE MULESHOE JOURNAL

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, JUNE 13, 1940

VOLUME 18 NUMBER 21

Commissioners' Court Condemns 'Fifth Column'

Bailey County Commissioners' court in session Monday went on record unanimously as condemning "fifth column" tactics and disapproving emphatically any religious or secular activity of a subversive nature...

Resolutions of Patriotism

WHEREAS, it is generally conceded that America may now be facing a crucial condition occasioned by the European war... WHEREAS, because of such condition it behoves all citizens to avoid any hysterical actions...

Resolved, that the Commissioners' Court of Bailey County...

Resolved, that this body goes on record as condemning any action of citizens tending toward destruction of confidence in our leading high officials, both civil and military...

What's Happening In Washington; Other Important Cities

It is now semi-officially reported the Germans lost a half million men since they began invasion of the lowland countries of Europe... The British liner Carinthia, a 20,277-ton ship, has been sunk by enemy submarines...

COMPLIANCE MEET FOR SIX COUNTIES HELD

V. Cade, district commissioner at Stratton, J. Lynn Mauk, field supervisor and L. A. Cornelius, performance supervisor, of College Station, were here Wednesday afternoon...

FSA Clients Enjoy Program, Bull Circles Urged

Increased incomes, better diets and more properly balanced operating programs are found on many farm and Farm Security administration borrowers in Bailey county as a result of additional subsistence dairy herds, according to J. W. McDermott, FSA supervisor.

Maintenance of enough dairy cows to supply milk, cream, butter and cheese for family consumption, with a surplus for market, is encouraged as an important part of successful farming McDermott said.

Because well-bred bulls are a prohibitive expense for owners of small dairy herds, McDermott said, the Farm Security administration encourages groups of farmers to use the services of good sires and to share the expense.

Memberships in FSA-sponsored cooperatives is not limited to FSA borrowers. However, only farmers who cannot obtain adequate financing from any other source are eligible for loans from this agency.

McDermott said the history of the past seven years proves the farm family that produces the greatest portion of its own food needs at home and that diversifies farm enterprises as much as possible...

Three cooperative registered bull circles have been set up in Bailey county. W. L. Key, West Camp community has a nice Roan Durham bull, Tommie A. McClarren, Progress community has a nice Jersey bull, and J. Martin Wilson, Fairview community has a nice registered Jersey bull.

Peace-time deaths resulting from the nation's celebration of Memorial day brought more reasons for commemoration of the dead as there were 400 fatalities, half of them on the nation's highways.

The U. S. debt limit of \$45,000,000 will be boosted to \$49,000,000, according to recommendation of the House finance committee. Defense tax has now been boosted to over a billion dollars a year.

Joseph Schenck, president 20th Century-Fox Film corporation, has been indicted by a federal grand jury on 24 counts of income tax fraud, conspiracy and making false statements to a government investigator.

INTERMEDIATE LEAGUERS GO TO CETA CANYON

Under chaperonage of Mesdames Clyde Bray and Lucille Farrel, a group of members of the Intermediate League, Methodist church, left last Monday noon for Ceta Canyon on a vacation trip.

SAME OLD "CURE"

\$50,000,000 FOR RED CROSS IS ASKED FOR

Enlarged European Massacre Demands Prompt Relief For Increased Need Of Suffering In France

President Roosevelt this week asked Congress for an appropriation of \$50,000,000 to be used by the Red Cross for refugee relief in Europe.

The ravages of European war are increasing so rapidly and needs are becoming so pressing, it is up to every peace-loving and peace-enjoying citizen to lend their earnest financial sympathy to those unfortunate, said the President.

It will probably be only a few days now before this big humanitarian request will be divided up among the various states and counties and the drive for assistance will be on with full force.

Up to date Bailey county has been given a quota of \$200 in the first two calls, doubtless the next call will be still larger. Neither Muleshoe nor the county in general have yet filled their first request for human aid, only about two-thirds of that sum having been raised.

Various citizens gladly donating their time have been working earnestly to raise this first quota; but the response has not been sufficient. Many have not yet given anything to this worthy cause. Sincere interest must be accumulated and efforts doubled in this direction, if Bailey county citizens continue to have good consciences, it is said.

Previous reported donations in Muleshoe totaled \$209.36. Since that publication of donors and amounts in the Journal the following donations have been made:

Muleshoe Receipts table listing donors and amounts: Pat R. Bobo \$1.00, S. R. Gorrell \$1.00, Lillie Gentry 1.00, Louis Rice 1.00, Joe Jennings 1.00, Carl Lambert 1.00, Rufus Gilbreath 1.00, Bob Cantrell 1.00, H. D. King 1.00, Herstine Beiler 1.00, A. J. again, on again 1.00, E. L. Robinson 1.00, Earl Gilmer 1.00, Mae Bell 1.00, E. E. Dyer 1.00, L. W. Brooks 1.00. Total for Muleshoe 17.00. Community Receipts: Joyland 2.00, Progress 13.40, West Camp 9.46, Watson n o n e, Bula n o n e, Baileyboro n o n e, Fairview n o n e, Maple Wilson 5.56, Longview 9.46, Y. L. 21.25, Needmore n o n e, Goodland n o n e, Enochs n o n e, Circleback 7.05. Total for Communities 484.72. Received this week 33.88. Grand Total today 450.84.

A Band Concert Will Be Given Sat. Afternoon

The second band concert of the year to be given by the Muleshoe High school band is scheduled for Saturday afternoon, June 15, beginning at 2:00 p. m., on Main street and everyone is cordially invited to come out and enjoy the music.

Congressman Jones On Again And Off Again For Office

Congressman Marvin Jones, who last week announced his candidacy for re-election after standing some weeks ago he would not, and following with 12 other aspirants their hats into the ring for that office, has again announced his withdrawal "in fairness to many friends."

Jones' announcement of re-entering the race was like throwing a German bomb into the camp of the Allies, not only frustrating the dozen other aspirants to his place in Congress; but also bringing about plenty of derogatory reaction among many citizens and plenty of editorial brainstorms from newspapers in his district.

Jones had previously been appointed Judge of the U. S. Court of Claims; but it appears President Roosevelt offered to reserve the higher honor if Jones would again stand for re-election to Congress, as the President felt great need for his counsel because of the present war situation and impending possibilities. Hence Jones' re-entry into the race.

ANOTHER ELECTION FOR SCHOOL DIRECTORS

In the school trustee election held last Saturday for the Muleshoe district no one was chosen because of the wide spread of votes cast, and another election must be called.

In last week's voting J. F. Starkey received 20 ballots; L. W. Brooks and Morris Douglas 7 each; Arnold Morris, J. A. McGee and O. Q. Holley, 2 each; R. L. Hobbs and H. C. Holt 1 each.

COTTON YIELD SET FOR BAILEY CO.

That the average cotton yield for Bailey county is 164 pounds per acre for 1940, is the information received this week by J. C. Smith, AAA adjuster from Glen D. Scott, field officer, College Station.

Baptist Minister Is Assaulted By "Mob" In His Home

Rev. F. B. Hamilton, popular pastor of the Muleshoe Baptist church, received a "terrible" pounding Wednesday night of last week, when a "mob" of his loyal church members and other communicants "assaulted" the home, bombarding not only the minister, but also his family, with boxes, crates, loaded sacks, bundles and packages of various kinds.

First indications were that more than a "fifth column" of protagonists had invaded the sacred precincts of his domicile; but it was later discovered the barrage laid down by the friendly belligerents, instead of being bombs and death producing grenades, were containers of delicious life-giving food.

There were a large number of friends and acquaintances who had a part in the first line combat, remaining to enjoy the hospitality of the ministerial family and to partake of the needed refreshments served them following the battle of grub.

The "attack" on the reverend gentleman and his estimable family came following the regular prayer meeting, where secret plans are thought to have been deftly concocted by aggressors, whether such received divine direction is not known; but the onslaught was apparently as effective in a social way as was that of Germany on the low-land countries a few weeks ago, in only this case it was one of give rather than take.

After the ministerial family had capitulated, there was a social hour of speech-making and music enjoyed. Rev. Hamilton and Friend wife having sufficiently revived to carry off high honors with a negro spiritual rendered in a African style dextere.

Rev. Hamilton has been the very efficient and greatly beloved pastor of the Baptist church in Muleshoe for the past two years, during which time many forward steps have been taken by that organization in both numerical and spiritual manner.

GOOD RAIN HERE SUNDAY NIGHT

A large portion of Bailey county witnessed a transfer from one school to another are reminded that such may be done now, according to M. G. Miller, county superintendent.

Mr. Miller states that all high school scholastics living in grade school districts must make application for transfer to the school of their choice or tuition may be charged, also that no receiving school may draw any form of Rural aid on those scholastics that are not duly transferred to the receiving school.

August 1 is the final date for making application for such transfers, Miller said.

LOWELL ST. CLAIR HONORED AT BOY SCOUT CAMP

Lowell Irvin St. Clair, Steve Pike, Julian Newman and Frank D. Foster returned last week end from a week's vacation trip spent at the Boy Scout camp at Post. They all report a delightful outing.

NOW WANT NAVY ENLISTMENTS

Recruits are now being taken for the U. S. navy at the office in Abilene, 25,000 being needed at this time.

The usual requirements of age, size, health and education are in force. Full information may be obtained by writing J. J. Mickabe, U. S. Navy Recruiting Station, Abilene.

Dan Moody, former governor of Texas, has decided not to run again. His filing fee had been put up by friends several days ago.

Candidates Will Begin Speaking On June 18th

Next Saturday, June 15 is the final date for candidates getting their names on the Ballot for the coming Democratic primary voting in Bailey county, the first being July 27.

To date there have been 23 aspirants for office, some being for re-election who have filed their desires and intentions, besides announcements made for still higher offices outside of Bailey county. The office of Sheriff, tax assessor and collector, and that of Constable in precinct are the only ones that have no published contestants, while there has been no newspaper announcement made for the office of Justice of the Peace in any precinct of the county.

There are from two to five announcements in the various precincts for the office of Commissioner, and in all the contested offices there are present indications of warm contests between now and the first primary voting. No announcement has yet appeared anywhere in this judicial district as to the District Attorney, and it is generally assumed Herbert Martin will run for reelection and without opposition, as he is now serving his first term.

Candidate speaking will begin next Tuesday evening, as previously arranged by the candidates. Many of the communities throughout the county are arranging pie and box suppers and other forms of general entertainment when the candidates come to their sections for speaking. Scheduled speaking dates are as follows:

- Enochs, Tuesday, June 18. Progress, Wednesday, June 19. West Camp, Friday, June 21. Longview, Monday, June 24. Stetson, Tuesday, June 26. Liberty, Friday, June 28. Bula (town), Monday, July 8. Goodland, Wednesday, July 10. Bullyboro, Friday, July 12. Circleback, Monday, July 15. Baileyboro, Tuesday, July 17. Fairview, Friday, July 19. Wilson, Monday, July 22. Watson, Wednesday, July 24. Muleshoe, Friday, July 26.

SCHOOL TRANSFERS NOW IN ORDER

All parents and guardians having children to transfer from one school to another are reminded that such may be done now, according to M. G. Miller, county superintendent.

Mr. Miller states that all high school scholastics living in grade school districts must make application for transfer to the school of their choice or tuition may be charged, also that no receiving school may draw any form of Rural aid on those scholastics that are not duly transferred to the receiving school.

August 1 is the final date for making application for such transfers, Miller said.

Body Needs Plenty of Water

By
DR. JAMES W. BARTON
© Bell Syndicate—WNU Service.

GENERALLY speaking most of us should drink about four to six glasses of water daily, in addition to the water in foods and in beverages such as tea and coffee.

Some idea of the great need of water in the body can be gathered if we remember that every cell is really like a tiny fish and must have water to nourish it, and to receive and carry away its wastes.

Fortunately, Nature has put this in mind because every foodstuff, no matter how dry in appearance or taste, contains some water—peanuts as low as 8 per cent and lettuce as high as 90 per cent. Thus even if one drank no water whatever he could get sufficient in food, such as tomatoes, string beans, cabbage, carrots, apples, oranges and other fruits. Lean beef contains almost 80 per cent of water.

Why It Is Necessary.
Water is necessary to life for two main reasons—(1) because the chemical changes required to sustain life can take place only when the reacting substances are dissolved in water, and (2) because water is needed for flushing away the waste products formed from the various processes going on in the body. Thus the cells from a chick which Dr. Alexis Carrel has kept alive for nearly 20 years are enabled to grow and multiply only because they are kept in a tank of water containing a little salt which nourishes the tissues and allows the waste products to escape into it. The water is of course changed periodically.

Water also regulates the body temperature, retaining heat in cold weather and carrying the heat out of the body in the form of perspiration during hot weather.

There is no hard and fast rule as to how much water or liquid an individual should drink daily. If there is a tendency to cold, a rise in temperature, an attack of diarrhoea or vomiting, severe bleeding or other condition causing a loss of water from the body, more water should be taken to replace it. Water is also very helpful at the beginning and during an illness in carrying wastes from the body more rapidly. A little salt added to the water enables the tissues to hold more water.

Overweight individuals do not need as much water as those of average weight as fat tissue holds more water within it than do other tissues.

Leave the Normal Fat.

One of the leading heavyweight wrestlers has a beautiful physique and is a fast, strong, intelligent, good-looking fellow. Although his weight is announced as 202 to 205, it is likely that his real weight is 10 to 15 pounds less. His muscles stand out on all parts of the body—the abdomen like a "washboard," the upper back like a rectangle, and the arms and legs like whipcord. And he knows how to wrestle.

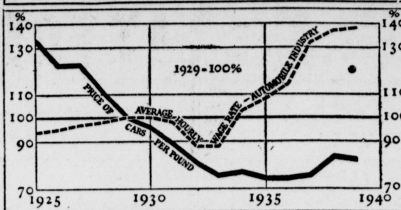

However as his wrestling engagements take him to all parts of the country, with a great amount of fast traveling—motor, train, and airplane—it is just a question how long his "nerves" will stand up under the strain.

Why? Simply because he may not have enough fat on and in his body. If he were a boxer, getting ready for an important bout, to be down as "fine" as he is at present would be wise because the boxer has to make a certain weight at a definite time. Also a boxer allows himself to accumulate a little fat between bouts.

Practically all the heavyweight wrestlers keep themselves comfortably overweight—a little layer of fat covering their muscles. They lose 5 to 10 pounds during a 30 to 60 minute bout, but have that 5 to 10 pounds back on the body for their bout the following night. Of course much of this 5 to 10 pounds that comes and goes is made up of liquids as wrestlers drink a great deal of water and sometimes beer; very few if any indulge in hard liquor. But to enable them to get rid of this weight, perspire properly during the bout, and have the weight back the next evening, there must be a comfortable layer of fat under the skin and throughout the body to hold this water. Every pound of fat can hold three pounds of water.

Another benefit to the athlete of a little fat on and in the body and also the use of a little fat daily in the diet, is that fat "spares" to some extent the muscle tissue which is burned up during the exercise. That is, fat on or in the body supplies the heat and energy during work or exercise and thus preserves the muscle tissue—the strength giving or strength part of the body. Of course when all the fat is used up and work continues then the muscles of the body have to supply the fuel for energy.

Improved Methods Bring Better Wages Through Greater Values for More Buyers

Improved technology in the automobile industry has resulted in consumer benefits, as expressed—but only in part—by the lower price per pound. At the same time it has been possible to increase wage rates substantially. Thus, there is a real contribution toward greater purchasing power. It is pointed out in a current message to stockholders by Alfred P. Sloan, Jr., Chairman of General Motors, who explains:

"Sound and lasting advancement—real progress—in the nation is rooted in the widening use, and hence enjoyment, of industry's goods and services, both necessities and conveniences. Increased industrial activity, fuller employment and higher living standards require a balanced economic distribution between industry's component groups—consumers, workers and investors; government, too, has a share. The total productivity of industry may be increased by the application of better tools and methods. However, the attempt by any one group to advance itself uneconomically at the expense of another is bound to fail. It may result in reducing the shares of all.

"If the point is reached, for instance, where technical advances resulting in increased efficiency are unable to compensate for higher wages, or shorter hours, or both, some other group must take that much less. For instance, the price of the product to consumers—including the worker himself—may rise. Then, fewer goods are pur-

chased—demand falls off—and hours of work together with real annual earnings are reduced. The apparent gain has become an actual loss. Naturally, any higher imposts by government on production or consumption, by increasing the price of goods, automatically reduce the share of workers, investors and consumers in industry's productivity.

"In the automobile industry improved methods resulting in constantly-increasing efficiency have made possible wage rates well above the level of industry in general. Superimposed upon this has been substantially greater values for consumers."

"Such a result is highly desirable to the degree that it represents an evolutionary process rather than arbitrarily imposed levels. Increased real wages by more, and lower prices for goods and services within the reach of more buyers. This is the effective means to a sound and advancing economy, to the enlarged opportunities that all so greatly desire."

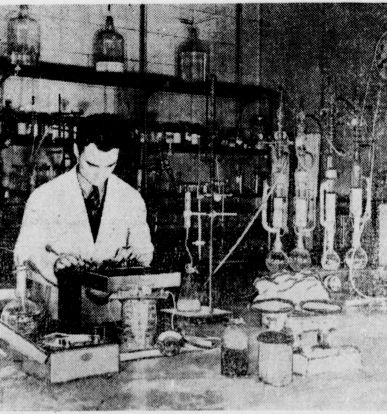

Auto Quiz No. 1

Travelers Safety Service

1. So you think you can stop on a dime? If that is true, your brakes are altogether too good; they'll toss you right through the windshield sometime, and how would you like that? Actually, your brakes should be adjusted so they will bring your car to a stop from a speed of 20 miles an hour in— (a) five to ten feet. (b) ten to twenty feet. (c) twenty to thirty feet. (d) thirty to forty feet.
2. You will help save other lives as well as your own if, when you hear the siren of a fire truck or an ambulance, you will always— (a) stop where you are. (b) speed up and get out of the way. (c) pull over to the curb on your right and stop. (d) hurry to the next corner and turn right.
3. A car following another at 45 miles an hour should leave more space between the cars than when the rate of speed is 35 miles an hour. True (—) or False (—).

Cotton Research Laboratories

While millions of Americans prepare to observe National Cotton Week, May 17-25, through expanded purchases of cotton wearing apparel and household articles, a staff of trained chemists at the laboratories of the Cotton Research Foundation, new uses division of the National Cotton Council, conducts continuous research for new uses for cotton and cottonseed products. The laboratories, located at the Mellon Institute at Pittsburgh, have recently perfected several new cotton products. Among these is a superior sweeping compound of cottonseed hull bran which is being marketed commercially.

Milton Dictated to Daughters.
John Milton composed "Paradise Lost" in a London house on Artillery Walk, Bunhill Fields. His daughters wrote from his dictation.

Bayberry Candles From Wax.
Bayberry candles are made from a wax that forms the outside coating on the berries of the bayberry tree, which grows in various parts of the United States.

Joyland Jottings

The Joyland H. D. club met in the home of Mrs. O. R. Wilson Friday with the following members present: Mrs. Margaret Bellar, Mrs. Bill Briscoe, Mrs. J. D. Chester, Mrs. Claude Gage, Mrs. Albert Simmons, Mrs. Dorman Chester, and the hostess, Mrs. O. R. Wilson. The visitors were Mrs. Tobie Bellar and Mrs. Add Bellar. Mrs. Tobie Bellar became a new member.

A stork shower was given for Mrs. Margaret Bellar. Those sending gifts were: Mrs. Charles Wiseman, Mrs. Cleo Bellar, Mrs. T. C. Wiseman, Mrs. Calvin Wiseman, Inez Bellar, Bernice Ansley, Mrs. Bill Davidson, Mrs. Earl Davis.

In absence of our president, Mrs. Dorman Chester was in charge. The business meeting was conducted, after which slips were drawn for the white elephant. Mrs. Bill Briscoe received it. A number of games were enjoyed, after which refreshments of cake, cookies and punch were served. Next meeting will be with Mrs. Albert Simmons, June 21.

Ima Jean and Billy Briscoe were Clovis, N. M. visitors Friday of last week. Mrs. Iris Skinner of Oklaunion, visited her brother and family here, Mr. and Mrs. Albert Simmons this week.

Januita Wilson is visiting with friends and relatives in Lubbock this week.

Mr. and Mrs. Bill Briscoe visited relatives at Seagraves last weekend.

Mrs. Charles Wiseman shopped in Lubbock, Friday.

Mr. and Mrs. George Taylor of Tahoka, visited friends here, Mr. and Mrs. Claude Gage.

Mr. and Mrs. Bill Davidson have moved back into our community. Among those visiting Clovis, N. M., during the pioneer days were: Mr. and Mrs. Tom Ansley, Mr. and Mrs. Calvin Wiseman, Mr. and Mrs. T. C. Wiseman, Miss Ruby Walker, Mr. and Mrs. Hub Bellar, Mr. and Mrs. Mac Bellar, U. J. King and Auda Luttrell.

Members of this area welcomed another good rain Sunday night for which we were thankful.—Reporter.

Air Used by Normal Adult.
The quantity of air used by a normal adult varies considerably with his activity. For every 100 cubic feet consumed while lying down, says Collier's Weekly, a man will inhale 115 cubic feet while sitting, 178 while standing and 244 while walking.

"No Man's Land" in Switzerland.
Until quite recently there was a "no man's land" in Switzerland. A small triangular acreage was set aside more than 100 years ago as a refuge for "wayfarers without a country."

SAVING MONEY With Cotton Bags

A personal laundry bag for every member of the family is one of the marks of a well ordered household and since a very attractive one can be made for just a few cents, there is no reason for not having them. One Cotton Flour or Sugar Bag is all that is needed besides a few yards of bias tape. Fold the material in half, stitch the top closed, with a heading and a case for inserting a small rod or narrow slat of wood. Soiled articles are put in through a slash in front and taken out by undoing the flap at the bottom. The sides of the bag, the flap and the slashed opening are bound in colored bias tape. A personal element may be added by embroidering or stenciling the owner's initials. It's no trouble to launder the Bag along with its contents.

Other Cotton Bag Sewing ideas are illustrated in a free booklet. Send to National Cotton Council, Box 18, Memphis, or Textile Bags, 100 N. LaSalle St., Chicago.

Texas-New Mexico Utilities Company

ONE MILLION Texans

One million Texans would have to find other means of livelihood if the Texas petroleum industry were to shut down tomorrow.

Steady employment, good working conditions, reasonable working hours and fair wages are the industry's responsibilities to its workers and their families—a million Texans in all.

It must maintain production, find and develop new fields, meet competitive markets for its products and pay its total expense bill of 750 million dollars a year, which includes its payrolls.

The Texas petroleum industry now has to pay 97 million dollars a year in taxes to Federal, State and local governments before it can consider wages and employment.

When expenses must be cut to satisfy increasing tax demands, employment suffers, and with it, the buying power that employment creates in our State.

CURLEMACUE HATS WITH DINGBAT ADORNMENTS SOON TABOO; BARE HEADED PROTEST IS WINNING

Milliners and millinery sales folks are worrying, while fathers, husbands and sons are rejoicing—and strange to say, it's all about the turn that has transpired in women's hats. Report is to the effect women are forgetting to wear this particular headgear, or else deliberately refusing to do so, and about three-quarters of a million dollars' worth of hats failed to be sold this past season than were purchased during the same period last year. Manufacturers, wholesalers and retailers all agree that the economic depression was not the cause, for the simple reason that women have a way, some how or other, of get-

ting their season's hats whether finances are flush or low. A stabilizing committee has already been appointed to make investigation of the matter, and it is not to be a superficial kind; but one taken in all seriousness, for when women quit wearing hats, something serious must be causing it.

It appears to be general knowledge that hats led the way into the silly period, a few forms of dresses were likewise modeled and then shoes in crazy intermixtures of style and no style at all, came tumbling afterward. Today there are said to be shoes to fit the minds of all

Members of the masculine sex say women are returning to their senses. They admit it may possibly be only temporary for no one knows when another outburst of fashion of some kind, whether hats, shoes dresses, jewelry or what-not, may come along and practically every woman susceptible to the disease will catch it—unless she happens to have been previously vaccinated with the virus of good reasoning powers.

There are plenty of Muleshoe men who don't especially get enthused over hatless women; but many of them do appreciate the -less kind more than they did those who decorated their beauty craniums with the masterpieces of silliness in recent vogue. Of course there are plenty of valid reasons why women are stopping wearing recent style hats. Some of them don't like the shapes at all. There are others, disavowing the styles, who have bought and tried wearing them; but in some instances they spoiled their curls, others were uncomfortable, the back elastic gave some the headache or was too tight for the shape of their particular head, some couldn't keep them on in the wind, some found them just plain uncomfortable or unbecoming, or perhaps disagreeable in a half dozen other ways, so they just quit wearing them.

College girls are said to have started the "cutting" of hats, perhaps because they wanted to get the benefit of the sun and suntime; but it has been noticed that many women carry their hats in their hands now days instead of on their heads. Among some business women a hat in hand has become as stable a part of her luggage as has a purse under arm. Early this year there were plenty of eastern women who were photographed sans hats, while many of the elite femmes went to Easter services minus the top headgear. It's all got the milliners and dealers bamfuzzled.

In the meantime, the men folks are hoping the tragedy of styles has reached its peak and the reaction will shortly begin. Some sensible women this summer are wearing the old-time leghorn sailors and looking chic as one pleases in them. Clearly fall styles will have more bulk, better fit and more appeal. No more dots, or blocks or other crazy uniform characters will again adorn milady's pate, it is said. Hats will have both backs and fronts on them at the same time. Perhaps there will be fewer flowers and bows, and other dingbat adornments. Indications are they are really going to be HATS—and Oh boy! won't the men folks be happy—and it is suspected the women will also be happier.

Cotton Consumption Decline Predicted 5 Million Bales

Austin, June 12.—Predicting world cotton consumption for 1939-40 would be slashed five million bales under last year, Dr. A. B. Cox, University of Texas cotton marketing expert, points out that World War II involves countries which operate at least half of the cotton spindles of the world.

He estimated 1939-40 production at 28,000,000. Increasing fierceness of competition for world cotton markets makes it imperative that the United States—already suffering together with China 90 per cent of the total reduction in world production—adopt an effective cotton program, Dr. A. B. Cox declared.

Depreciation of currencies in other cotton-growing nations adds another obstacle to U. S. cotton sales—raising the price paid to farmers in those countries yet keeping the price paid in the consuming countries to a relatively lower price than U. S. cotton, he said. South American countries like Brazil which have been selling large amounts of cotton to Germany and countries dominated by Germany will have to seek markets elsewhere if England continues to control the sea, the Bureau of Business Research director explained.

"All important cotton-importing countries are hard put to it to get the desired amount of foreign exchange," he pointed out. "As a result they are seeking to import cotton from these countries which are willing to accept manufactured goods in payment for raw cotton—which has the added prospect of building up a base for permanent trade after the war."

"The United States, on the other hand, is the only neutral country in position to supply in large volume vital war materials such as airplanes, munitions, and other implements used in combat—and warring nations see little prospect of developing a market in the United States for their manufactures after the war."

These facts, Dr. Cox warned, point to the probable ineffectiveness of an export subsidy for U. S. farmers for the coming year.

Instead, he said, a successful cotton program must find a way to (1) increase farmer profits by lowering production costs; (2) increase price by improving quality rather than by artificial price controls; (3) increase demand by finding new uses and lowering manufacturing and distribution costs; (4) provide conditions to enable the U. S. to hold its foreign markets, at least until adequate substitute enterprises

are found—revise our foreign trade policy to create a balance of trade; and (5) find a substitute for above-market price loans.

MRS. DAMRON HOSTESS TO NEEDLECRAFTERS
Members of the Needlecraft club met Thursday afternoon of last

week with Mrs. Bee Damron for an hour of fancy needlework and pleasant conversation.

At the close of the afternoon, refreshments of coolade and cookies were served to Mesdames W. E. Renfrow, Jim Cook, H. A. Robb, E. E. Dyer, and Bee Damron. The club meets Thursday of this week, (today) with Mrs. E. E. Dyer.

MISS BORDER HOSTESS TO SUB-DEB CLUB

The Sub-Deb club members met in the home of Miss Frances Border Thursday afternoon of last week. The president, Miss Billie Joan Damron, being absent the hostess took charge of the meeting. Plans for having a Sub-Deb week were discussed.

Miss Lela Mae Barron had charge of the program, giving the Sub-Deb article from the Ladies Home Journal.

Refreshments of punch, assorted cookies, heart sandwiches and vegetable-jello salad were served to Misses Lela Barron, Leona Bartley, Hattie Ray Griffiths and the hostess.

The club will meet today (Thursday) with Miss Goria Gowdy, with Miss Frances Border in charge of the program.

METHODISTS WILL HONOR FATHER

Special honor will be given Fathers at the morning service of the Methodist church next Sunday, according to announcement of Rev. R. N. Huckabee pastor.

All the family are requested to accompany "Dad" to church and all sit with him in the "family pew," the minister said.

The sermon topic will be "The Father's Task In Our Chaotic World."

Husbands who are not fathers and families who do not have living fathers, are also invited to attend this special service.

Located on Mt. Locke in the Davis mountains are some of the oldest living trees in North America, botanists claiming they may be 10,000 years old. A microscope is necessary to see their annual rings.

HENRY DEAR IS EATING CROW
since I got him a MILE-DIAL...FREE

"Just like a man—with his superior air—he'd keep telling me any gasoline is the same as any other. But I argued there couldn't be much to lose, as long as they give you the Conoco Mile-Dial perfectly free.

"They certainly wouldn't tease you to take a thing that strictly counts up the mileage from their own gasoline, unless they're awfully sure of themselves. So I steered to the first Conoco station and in half a second the Mile-Dial was on the dash. Looks smart. Free, too.

"The total mileage on your speedometer goes on the Mile-Dial, so you know the start of your test. And you know the amount of your gasoline, by starting with just a full tank of Bronz-z-z. Then going along buying your 10 gallons more, or maybe 8, or 15 let's say, your Mile-Dial keeps count.

"Let's look. I'm up to 53 gallons. And... wait a second... it's 928 miles since starting this test of Conoco Bronz-z-z. Now watch this

flip of the Mile-Dial. There!—it says better than 17½ miles from a gallon of Bronz-z, with a car this big. And do I hear any pooh-pooh?

"Even Henry won't say it's just luck any more, after all the different driving tests he's kept doing with this Mile-Dial... Luck?... It's just bad luck using mixed breeds of gasoline when Conoco Bronz-z-z is game to let you dial its true mileage. A smaller car like yours might even beat 17½.

"If you're a consumer that wants 36 inches in a yard, and real facts on everything, you certainly want the true count of mileage from your open-face Conoco Mile-Dial..."

Get your own certified Mile-Dial today at Your Mileage Merchant's Conoco station... FREE. There's a heavy demand—go now. Continental Oil Company

TRUCK OWNERS who lack fancy cost-systems find Conoco's Mile-Dial the best thing yet.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.
 Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if it Fails

A THOUGHT FOR THE WEEK
 Stolen waters are sweet, and bread eaten in secret is pleasant.—Proverbs 9:17.

Every gross act of sin is much the same thing to the conscience that a great blow is to the head; it stuns and bereaves it of all use of the senses for a time.—South.

EYES ON FATHER

Next Sunday is the day when all eyes will be on father. He may not know it, but it is the one day of the year when the rest of the family will be thinking about him. Perhaps he will be sitting in his favorite chair looking off dreamily like somewhere out in space, remembering the past and dreaming about the future. He may have a book or a newspaper in his lap but he will not like to be reading it. His own personal thoughts have taken possession of any printed one the postmaster gave him when he called for his mail.

Indeed, father has a right to dream. He had a part in building the present, not only as effects him personally, but the community in which he lives, and he will have something important to do with shaping the coming future. Every coming day has always had secrets to unfold, and father has always faithfully gone ahead digging and probing to uncover them for stability of his home and happiness for his family.

On Fathers Day there will be plenty of pleasant memories that will come to his mind, some of them perhaps dim in detail, but nevertheless still clinging to his memory. He will recall many of the gay young days of his past life and the sweet softly whispered word that thrilled him at that time and that inspired him during all the following years. He has never forgotten the confident smile that met him at the altar as they knelt to pledge their troth one to another and to God.

Building home, looking toward the future, laying plans for the years to come quickly followed. Innumerable mysteries of life began to unfold for him and his beloved, and one day he was blithely confused, but indescribably happy when his first-born was laid in his arms. He realized also, it created added responsibilities; that there were new duties to be achieved, new plans to be made, and happily he accepted them. Perhaps this raising is still a young one or he may be a middle-aged father, or perchance, an elderly parent; but all of them have dreams and plans vitally important. The young look forward to consummation, while the old may dream of what has already transpired.

Father on this day get about to commemorate fatherhood has a right to dream and all eyes of his household are upon him that particular day as never before. They, too, are thinking—some dreaming with him. Father may have a tendency to scoff and make light of this particular day. He may strike an unassuming pose. He may make humorous remonstrance to any special favors accorded him that day but just the same he'll appreciate it when you say: "Dad, I think you're just swell!"

ON SECOND THOUGHT

Until America's foremost G-man, J. Edgar Hoover, mentioned this we had not given the matter such concentrated thought. Except in towns where instances of dangerous operations have brought the menace to the fore, the existence of tourist camps where cabins are stopping places for overnight guests have always been considered a convenience rather than a menace.

However, Mr. Hoover warns that such places are too many times bases of operation for gangs of racketeers. There are a number of instances when publicity following hold-ups and even murders, have been given to tourists camps. It is such an easy way for an "out" and is a handy port of call in a storm from the law.

This indictment makes it a bit difficult on the owner of a reputable camp who has taken means to safeguard the lives and property of his guests. There are many havens a long roadsides where stop many a

ENEMIES WITHIN

Events in Europe have underlined and emphasized the urgent need for improving and expanding our national defenses, and making sure that the United States, its shores and its traditional ways of life, are rendered secure.

To do this most effectively, our military experts are of course study-

ing very closely the methods of the "total war" that has overrun so many helpless countries abroad—the modern form of war that, as one observer has commented, is fought "with the morals of the cave and weapons of an exquisite civilization."

You need to know the danger that faces your country before you can guard against it successfully.

But there is one further step. The manner in which Norway and Poland and Belgium have been brought to their knees was not exclusively based on military power. Before a blow was struck, security was undermined from within. The advice of Goethe—"Divide and command"—was heeded with telling and destructive effect. The "fifth column" of traitors and imported agents did their destructive work before war even began.

The danger that these tactics will be repeated here also faces our own land. It is not enough to have military preparedness we must also establish internal unity, internal security.

To achieve this aim, certain principles need to be kept in mind:

(1) We must guard—not in a mood of hysteria, but through sound common sense—against the misguided groups and individuals in our own country who do not believe in private enterprise, and would sacrifice it for some other way of life. It is they who, by word or deed, would fill the role of "fifth columnists" in America if the opportunity were offered.

(2) We must not let the erroneous thinking of a second group to muddy our thoughts on preparedness. This group does not recognize the inseparability of our various freedoms—freedom of speech, a government of representative democracy, and a business system of private enterprise—and its failure to appreciate this important truth is likely to be actually as dangerous as the attitude of the deliberate enemies of our way of life.

(3) We need, at a time when industrial efficiency is so vital to national defense, to guard against attempts to cripple and hobble our manufacturing enterprises. The La Follette bill recently introduced in Congress, a piece of legislation that would prevent manufacturers from guarding effectively against sabotage and subversive activities within America's plants, is a dangerous example of this type.

With these principles in mind, and with the courageous maintenance of national unity and individual patriotism, America can guard against the "enemies within the gates." Without this stand, America invites disaster!

Another thing this generation is learning is that two can't smoke cigarettes as cheaply as one.

It is the opinion of many people that most legislators should serve two terms—one in the House, one in the Senate and one in Alcatraz.

Human nature is invariably the same; it depends largely on whether or not one happens to like the other fellow.

Generally speaking, America has never been bothered much with superficial thinking, largely because too many folks here are studying how to get something for nothing.

48 TOWNS INCREASE THEIR POPULATION
 Preliminary census figures on town population of 48 towns in this the 19th congressional district show 27 of them have made substantial gains during the past 10 years, according to J. Sam Lewis in the Lubbock Avalanche newspaper. The population of these towns show a net gain of 22,936 people.

This congressional district is composed of 25 counties: Andrews, Bailey, Borden, Cochran, Crosby, Dawson, Dickens, Floyd, Gaines, Garza, Hale, Haskell, Hockley, Howard, Kent, King, Lamb, Lubbock, Lynn, Martin, Mitchell, Scurry, Stonewall, Terry and Yoakum. Ten years ago these counties reported 254,367 inhabitants.

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

BY LILLIE GENTRY
 Home Demonstration Agent of

Bailey County
 Let's Get Ready to Can
 To do away with a great deal of work and confusion when canning season starts, every housewife should make adequate preparation in advance which will greatly improve the quality of the canned products, reduce actual time of the canning operation and help insure against spoilage.

First of all the pressure cooker should be checked to be sure it is in good condition and safe for use. Where glass jars are used, it is a good policy to inspect them for cracks and chips before canning season. New supplies of lids and rubber rings are a means of insuring against canning failures. If cans are to be used it is better to secure new ones each year rather than re-plate old ones.

Enamel lined cans preserve the color of such highly colored foods as berries, prunes and beets, and prevent corrosion in pumpkin and squash. C enamel-lined cans will help prevent discoloration of products, such as corn, peas, hominy, chicken or fish products, but should not be used for acid foods or fat meats.

Gardens Growing
 Mrs. Glen T. Matby of Progress home demonstration club, has growing in her home garden 21 varieties of vegetables. With an adequate supply of each of these vegetables, she will be able to supply her family with an abundance of fresh vegetables as well as conserve such a variety of food that her family will not tire of canned foods next winter.

Mrs. Matby is experimenting with the growing of celery in this locality which should prove very successful since the weather is relatively cool most of the time. The celery is growing in a trench which is covered in order to bleach it. To irrigate celery, Mrs. Matby says she runs a shallow stream of water down the trench as flooding causes the plant to decay.

Maple Club Organized
 Women of Maple community met on June 6 in the home of Mrs. R. G. Caruthers to complete organization of a home demonstration club to have their first demonstration.

Miss Lillie Gentry home demonstration agent, gave a demonstration on "Selecting bedspreads and making the bed." "A good bed spread should not only be attractive but should be durable, easily washed, of a fast color and amply large for good tuck-ins at head and foot of the bed," she said.

No Pure Water
 It is said that absolutely pure water does not exist. Its nearest approximation, chemically pure water combined in a laboratory, is very difficult to prepare. The most common impurities of water are common salt and lime.

Liked His Apples
 Alexander the Great is said to have eaten at least an apple at every meal, sometimes six or seven at one sitting.

Moisture Is A Vital Canning Factor Says Expert

College Station, June 12—If home makers are to have high-quality canned products and reduce spoilage to a minimum there are several problems they need to recognize. These problems are brought on principally by several successive dry years in some portions of the state, according to Grace I. Neely, specialist in food preservation for the Extension Service of Texas and A. M. college.

For instance, vegetables produced in dry season have less moisture content.

"This means," Miss Neely points out, "that they will soak up liquid during the canning process. Therefore, looser packs or use of less food and more liquid in the can should be the general rule with vegetables during a dry year." Foods canned in this way, especially corn and root vegetables, will keep better. The specialist also recommends adding a few minutes to the pre-cooking time of vegetables such as corn, root vegetables, and field peas in excessively dry seasons.

Another suggestion to home canners is that they can all vegetables during the early stages of production; that is, when the vegetables or fruits are in prime conditions for eating and canning.

Time tables for pressure cookers appearing in the Extension Service publication, B-85, "Canning Fruits

POLITICAL ANNOUNCEMENTS

The Muleshoe Journal has been authorized to announce the following candidates for the respective offices named subject to the Democratic primary to be held Saturday, July 27, 1940.

For U. S. Congress, 19th District:
 GEORGE MAHON

State Senator, 26th District:
 ALVIN R. ALLISON, Levelland
 MARSHALL FORMBY, Dickens

For State Representative 120th District
 L. G. MATHEWS, Floydada

For County Judge and Ex-Officio School Superintendent:
 JIM COOK
 M. G. MILLER (Re-election)

For County Attorney:
 CECIL H. TATE (Re-election)

For Sheriff, Tax Assessor and Collector:
 W. E. (Raz) RENFROW (Re-election)

For County and District Clerk:
 MELVIN G. BASS
 J. J. WILLIAMS (Re-election)

For County Treasurer:
 HELEN JONES (Re-election)
 MRS. T. I. HOLLIS

For County Commissioner Precinct 1:
 H. E. SCHUSTER (Re-elect)
 C. E. (Chet) LAYNE
 J. A. (Allan) MCGEE
 H. L. (Possum) LOWR'
 C. E. (Jack) KING

For County Commissioner Precinct 2:
 JOHN S. WILLIAMS (Re-elect)
 HAROLD MARDIS

For County Commissioner Precinct 3:
 D. WARNER (Re-election)
 L. E. SMITH
 WILLIAM H. EUBANKS
 GEO. W. FINE

For County Commissioner Precinct 4:
 JIM CLEMENTS
 A. J. (Arthur) SHAFER
 W. R. (Bob) ADAMS

For Constable, Precinct 1
 J. N. JAMES

and Vegetables," which Miss Neely prepared, are those tested and recommended by experiment stations, laboratories over the nation. These are available free upon request from county home demonstration agents or from the Extension Service headquarters.

Saving Money
 With Cotton Bags

Clean kitchen curtains always improve the cook's disposition and certainly do put a new face on the kitchen. Why not have several pairs so that you can put up clean ones at a moment's notice? Attractive sash curtains can be made from two cotton flour bags, in very little time. Carry out the color scheme of your kitchen by binding the edges with bias tape. Colored rick rack stitched in rows about one inch apart across the bottom makes an attractive finish. Or you can simply hem them and put some quaint applique design at the bottom, using up scraps of goods you have about the house. Cotton sash liners are made of a lighter weight material and any baker or grocer will be glad to sell them to you for a few cents.

Other Cotton Bag sewing ideas are printed in a free booklet. Send to National Cotton Council, Box 18, Memphis, or Textile Bag, 100 N. LaSalle St., Chicago.

Gas Now Available in The Country Texas Produces Trillions Of Gallons, Good For 50 Years

Folks in both town and country who have had to get up on cold, rainy mornings and look around for dry kindling to start fires in kitchen and living rooms, perhaps stand there and watch it sputter and go out a couple of times before it finally decides to burn, can appreciate the modern type gas now available for country homes giving them the same convenience and enjoyment as town folks have for some time past been enjoying.

Indeed, Butane and Propane gas are only one form of the many modern conveniences farm homes and people are now enjoying. REA and public utility lines, bringing electricity right to the farm for lighting and power purposes have proven a great boon. The radio and the telephone, and the various uses derived from gas and electricity have put rural areas in close touch with towns and cities, giving them innumerable city conveniences and the added pleasures of country residence.

Citizens of Bailey county are not the least bit behind in the enjoyment of these modern utilities. Many farmers and their wives are now installing butane gas tanks and thanking their stars that the day of carrying in fuel and turning out ash is all past history. Now all that has to be done is merely turn a little faucet, hold a match to the burner and there quickly arises a dainty blue ultra-hot flame that does the boiling, cooking, frying or baking, and when the meal is cooked, is quickly extinguished by merely

WHEN STOMACH GAS CHOKES AND BLOATS
The 5 carminative ingredients in Adierka soothe and warm the stomach to ease the gas, and Adierka's 3 laxative ingredients give a MORE BALANCED cleaning-out to BOWEL, for prompt relief. Sold everywhere in the Silver Color Bottle. Western Drug Co.

MISS HARRIET ELLIOTT
Ten women appointed by President Roosevelt to the seven-member National Defense Commission. Her duty will be to look after the consumers' interest in the national defense program.

either. Because butane, largely used in the Southwest for economic reasons, ceases to properly vaporize at the freezing point, some tanks are placed under ground for protection against cold weather. In the overhead tank, a pressurestat is used which lights a burner from a pilot when pressure becomes low, thus the tank is heated and the pressure maintained in cold weather.

"All piping and tanks should be properly installed and strictly inspected before being placed into use. They also should be thoroughly inspected from time to time to see what condition the equipment is in. All appliances should be especially designed for use with butane gas for safe, economical service."

General interest in the efficiency and economy is attested to in the fact that its use is rapidly increasing all over the nation. In 1933 that total sales of the various forms of liquid gas in the United States was 38,931,000 gallons, while in 1938 that figure had jumped to 126,278,000 gallons. Because of weather conditions, propane gas is used more in the north, while butane gas finds its greatest consumption in the southern states, largely because propane gas is not seriously affected by cold or freezing weather. Some times the two gases are mixed for use.

Propane gas, however, is said by experts, liable to expand too much in southern summer weather, creating undue pressure and possible explosion if the tank is not extra strong. Butane is said to contain more heat units than does propane gas and can be transported from town or city supply tanks to the users more conveniently and in lighter equipment.

Older users of natural gas can look back a few years when that gas was considered quite a luxury, as indeed it was, and many homes used it only in their kitchens for cooking purposes. Early artificial gas as well as that of the natural kind brought up out of the earth was at first, quite expensive; but as it grew common in use and more fields of it developed, the price was gradually reduced. At that time there was also fear that the available supply might soon become exhausted, today no one scarcely ever thinks of any shortage, the supply being largely taken for granted.

It is now officially stated that Texas alone produces around 920,000,000 cubic feet of natural gas per annum and that the estimated available supply for coming years is estimated at 50 trillion cubic feet, or enough to last between 50 and 60 years, even should no new fields of gas be discovered. Texas also has quantity of lignite coal estimated at between 20 and 30 billion tons which, through modern methods may now be converted into gas for use over an added period of years—and by the time this is all consumed there will doubtless be other discoveries of some kind of fuel that can be used, so no one around Muleshoe who already has or is contemplating installing butane gas need worry about the supply giving out during their lifetime. It has already proven a wonderful boon to country living and everyone who possibly can should enjoy it.

FARM TOPICS

LAYING FLOCKS REQUIRE WATER

Warm Supply Is Necessary During Colder Months.

By C. F. FARRISH

Farmers and other interested persons—prepare for somewhat of a shock: About 66 per cent of an egg is water! That doesn't mean that eggs are not one of the best foods, but it does mean that the kind and amount of water a hen drinks is highly important.

For this reason the extension division of the North Carolina State college recommends the warming of drinking water for the laying flock during the winter and early spring months. It is well to remember that egg production will be greatly reduced and Old Man Winter will tip heavily into your egg profits if you permit drinking fountains to freeze over, or the water to become so cold the birds refuse to drink liberally.

There are a number of heated fountains on the market that will operate for about a week on a quart of kerosene. However, he said that a homemade device may be utilized if care is taken to make it fireproof. The only materials needed to make it are an old tin tub, sand, a few rough boards, and a kerosene lamp. The tub is inverted on a bed of sand and spread one inch deep over the area to be occupied by the device. A pipe is made in the side of the tub to permit the escape of fumes and the entrance of oxygen. A platform is built over the tub and the container of water placed on the platform. The lighted lamp is put under the tub.

Flock owners are urged to protect hens against cold, wind and snow by covering the cracks in the ends and sides of the laying house with strips of wood or heavy paper. A six-inch dry-litter on the floor makes the house more comfortable for the layers. Workable curtains on frames that move up and down in track over the front of the laying house is also to be commended. These curtains should be held out about two inches from the wire front by the track so that they will not interfere with the ventilation.

Strip Cropping' Rotation Keeps Moisture in Soil

Strip cropping combined with crop rotation adds up to "strip rotation," a method of saving soil and saving moisture that works well in many arming areas. The soil conservation service gives actual comparisons as worked out on experimental plots at the Pennsylvania State college farm in an area where erosion and gullying are not nearly so serious as in many farm areas. In corn plots cultivated up and down hill for three years there was an annual soil loss averaging 43 tons to the acre yearly. By running the corn rows across the slope the loss was cut in half. In both cases three crops of corn in succession reduced fertility.

By strip rotation in the plots—fencing rows across the slope and further breaking the slope with rows strips of close-growing hay crops to catch and strain out the soil that starts from the cultivated strips—the soil loss was cut to one twenty-fifth, a ton and a half a year instead of 43 tons. The water loss was only about one-fourth that from the all-corn plots. When the strips were rows in as a part of the rotation, the roots and tops helped to restore organic matter and maintain fertility.

Clipping Dairy Cows

Probably the most important factor in keeping cows clean is clipping their hair short. Manure and other sources of bacteria naturally cling to long hair. A clipped cow is obviously much more easily and quickly cleaned. Clip the long hairs from the udders, flanks and tail in order that dirt may not cling to them. One hair, if it falls into the milk, may add as many as 30,000 bacteria. Because much of this dirt is soluble and dissolves in the milk, it cannot be strained out.

Rural Briefs

Insects caused \$187,500,000 damage to crops in India last year.

An old tire casing makes a good guard cover for a buzz saw.

Loss from soil erosion in the United States is put at \$400,000,000 a year.

Powdered limestone is used by some cattle feeders to cut down trouble with bloat.

One farmer in three has an income from non-farm sources, according to a special United States census bureau report.

Old hens with bright yellow beaks and shanks should go into the cooking pot instead of the laying house. Layers draw on the color in their beaks and shanks to produce the yellow of egg yolk.

Methodist To Present Cavalcade, Home Missions, Tonite

Members of the Maud Hart Circle, Methodist Missionary society met in the home of Mrs. Clyde Holt, Thursday evening of last week with the president, Miss Elizabeth Harden, presiding.

After a short business, the meeting was turned over to Mrs. Earl Hicks, study leader, who very capably discussed "Funds, Assets and Cost of Home Missions," concluding the course of study.

Delicious refreshments consisting of tuna fish salad, sandwich toasts, fruit punch and plate favors of "25-cents," were served the following: Misses Elizabeth Harden, Marie Gooch, Mesdames Earl Hicks, Bill Collins, Alvin Farrell, Iris Butts, Inez Bobo, Margaret Jackson, Irma Little, Rachel Eckler, Betty Burkhead, Blanche Lenderson, S. O. Workman, Coy Burkhead of Roswell, N. M., Myrtis Holt, Irma Mitchell and Clyde Holt.

At the close of this meeting it

was planned to entertain members of Circle No. 1, at the Methodist church annex Thursday night, (tonight) with a Radio Show, "Cavalcade of Home Missions." Rev. R. N. Huckabee, announcer.

Mrs. R. N. Huckabee will preside at the piano during the evening furnishing appropriate music with each topic.

A feature of the evening will be "Professor Quiz."

Panel discussion will be led by Mrs. A. J. Gardner.

Pageant of Spirits, beginning with the Pioneer Mother, and following through the course of study, "Home-Land Harvest," by Arthur Lemouze, closing with the "Spirit of Vision."

A special musical number will be in charge of Mrs. Buford Butts. Members of both circles are urged to attend. Refreshments will be served.

Salmon in Fresh Water

Not all salmon spend their lives alternately in fresh and salt water. In Maine, Canada and Norway are landlocked salmon that spend their entire lives in fresh water.

COMPULSORY TRAINING

May become necessary for War Protection of the United States

But none of our citizens have to be forced to eat. Most all of us have good appetites, and, while some are particular about the kind of food they eat, all may find a wide variety of fresh, wholesome and sanitarily handled foods at our store.

Everything available of a seasonable nature in Fruits is found at this grocery. Our line of Fresh Vegetables and Fresh Foods is excellent by none—and the PRICE of all our commodities is always exceeded by their real worth, flavor and sustenance value. You make no mistake when you trade here!

- Ike Robinson returned from Lubbock early Monday morning where he spent the weekend with Mrs. Robinson who was admitted to a sanitarium last Friday. He reports she is doing splendid after medical treatment, and will remain in the sanitarium most of the week.
- George Harris, former Muleshoe citizen, who has been living at Newport, Ark., for the past two years, moved back the first of this week. George said while there were many very pleasant features of living in Arkansas, yet he couldn't resist the persistent call of Muleshoe and the South Plains to return.
- Misses Mildred Davis and Lorena Owens, accompanied by Glen Rocky, spent last weekend on a vacation trip in Northwest New Mexico and Southern Colorado, enjoying the sights of some primitive country just as the Creator made it and still untouched by modern civilization. They report a very enjoyable as well as educational trip.
- The Federal government requiring a re-examination of all old age pension clients has been completed in Bailey county, according to L. E. Settle, official worker in that department, who was here Monday making the last re-examination. Settle has charge of such work in Bailey, Lamb, Hockley and part of Lubbock counties.
- A letter received by the Journal from Mrs. Padie Boone, who has been teaching school at Dora, N. M., stated she was visiting her parents at Hot Springs, and would go from there to Los Vegas, N. M., where she

- would attend school part of the summer, and spend the latter part of the vacation in Canyon at school. She ordered the Journal to follow her to her different addresses.
- Information has been received here that Hon. John H. Tate, Giddings, judge for the past two years in the 20th judicial district, is making the race for re-election the third time. So satisfactory has been the services of this jurist he has no opposition. He is father of County Attorney Cecil H. Tate, and is well known by many Muleshoe people, having visited here several times.
- Supt. W. C. Cox is repairing and remodeling his home in the residence district near the High school. During their absence some time ago in the winter months, pipes froze and burst, doing considerable damage to walls and paper. Mr. Cox stated he is having a complete paper and paint job also adding a new room and otherwise remodeling the interior and stuccoing the outside.
- Mrs. Bonnie Isaacs was married to Allen McReynolds at Tucumcari, N. M., about four weeks ago, according to available information, the

ceremony being performed by Rev. Barrick pastor, First Baptist church that city. Contracting parties are well and favorably known in Muleshoe, both having resided here for several years past. They have many friends here who join in extending them best wishes in future life.

WEEKLY LAY SERMON

ARMAGEDDON

By JESS MITCHELL

Megiddo is a mountain that looks down upon the Plain of Esraealon, reputed to have been one of the greatest battlefields of Asia. It was there, according to Bible history, that Barak fought the Canaanites; Gideon won over the Midianites; Josiah lost battle to the invading Egyptians; and there are numerous other smaller engagements recorded by contemporary historians. The battle of Armageddon, spoken of in the Bible, however, is not supposed to be a physical one; but rather a huge contest of principals which shall transpire along about the end of the world. The exact date and the place where that mighty conflict shall occur is, of course, not now known, regardless of the fact that some religious sects have recently been distributing literature to the effect that the present European strife is that long prophesied battle of Armageddon and that Northern France is the location of that final conflict.

History is replete with wars of ages past, many of them declared to be the "greatest the world has ever known." We have no way of accurately determining how great were the battles fought under Alexander, Xerxes, the Caesars, Napoleon and other great generals of early historic periods. The World War, fought some twenty-odd years ago, was reputed to have been the greatest war ever fought in history to our knowledge, and it probably was, largely because our knowledge of its details was more intimate and comprehensive than of any previous wars. There were more people living at that time who were vitally interested in the results of that war; who talked about it, dreamed about it, listened to the exaggerated propaganda and had all the real facts and much of the fiction of it indelibly impressed upon their minds at that time.

We had the telephone, the telegraph, the cablegram, the railroad

John seemed to be quite thoroughly convinced it would sometime occur.

It seems to me there are plenty of conditions in the world right now over which a war of that kind and magnitude might be fought. More and more the diabolic elements are being formed, their phalanxes being closed tighter together their weapons made more powerful, their tactics more effective, their strategy more complicated and seductive. No one has ever been able to produce any satisfactory statistics regarding the satanic dominions. No one has ever taken a census of the devil's kingdom nor called the roll of his subjects; but from the disastrous planetary deeds already perpetrated and the victories already won, I assume there must be a vast army amassed against the hosts of righteousness.

Several years ago I heard a minister say there must be at least eighteen hundred million evil spirits in this world, and perhaps there are many million more now living on earth who are actively engaged in special enterprises of abomination of some kind that are detrimental to the perpetual welfare of humanity and whom the good will perhaps personally meet on that last day of mighty conflict. Something of their power, speed, cunning is already known. Some of their tactics are revealed now. We have already become familiar with some of the weapons they use. We know something of their propaganda, their "fifth column" activities, the blitzkreigs they create, the ulterior and inaccurate reports they make public, the duplicity they use and the defiance they utter. I recall that Paul, the apostle, one time said: "We wrestle not against flesh and blood, but against principalities and against powers and against the rulers of darkness in this world, who strain against their mightiness in the heavens, and in the air, holding their spiritual ground and come out victorious."

I have never been a student of Prophecy, yet I confess to a certain

degree my belief in it. I am not in the least inclined to superstition, and while I may be classed as a rational mystic, my natural logical nature frequently gets the better of my intuitive faith, though it never entirely overcomes it. Roughly and briefly speaking, prophecy may be defined as clairvoyance in space and time. Already students of psychical research and many psychologists have now accepted both telepathy and clairvoyance as established facts. True they are still largely unexplainable facts, yet many other undisputed facts are as completely unexplainable. We do not know, for instance, what electricity is. All we know is its effects and how to use it to produce certain effects, and we are learning new effects every day. Cosmic rays and the force that binds the atom, the origin of malaria and much other phenomena recognized by orthodox science still remain largely unexplained. Such were once considered supernatural; but are now looked upon as natural, but not yet fully explained. The fact of prophecy exists not only in the ancient Bible, but throughout the world in general. Astrology is one of the oldest arts, long ago superseded by astronomy, and by many of the modern scientists condemned, yet the number of people who buy and avidly read astrological magazines and books and who sincerely and believingly consult astrologers, fortune-tellers and clairvoyants is far greater than the average layman would even suspect.

There are without doubt certain individuals who have within them a psychical element that is capable of traveling in time. They not only can perceive events spatially remote, they also seem to be able to escape from the physical continuum and contemplate the past and the future in perfect though mostly unexplainable manner. They often predict facts of futurity that lead to the threshold of an unknown world, and point to the existence of a psychic principle capable of evolving outside the limits of human physical bodies. Undoubtedly this fact has existed for thousands of years past, it exists today and will doubtless grow much greater in the future. John on the Isle of Patmos was doubtless a great psychic, and I would not be surprised but his prophecy regarding Armageddon will sometime come true.

Long before and since there have been literally hundreds of men and women who possessed this strange faculty of looking into the future with considerable accuracy. In the wide-spread ramifications of my reading and studies, I have perused many books and much literature on this subject, and while I deny being a devout student or a staunch believer in such, yet I am compelled to admit much of its virtue and fact. Today it seems apparent that the historic prophecy of Oswald Spengler, entitled "The Decline of the West," is coming true; that Western Europe has passed its zenith and in a not distant future will range itself with the extinct civilizations of Greece, Egypt and India. His prophecies in this respect have been frequently corroborated by other savants and psychics. At this moment of spiritual Armageddon, darkness is still triumphant; but the day is characterized by crystallizations of light. The forces of Communism, Sovietism, Fascism, Nazism, godlessness and other evil tendencies seem all to be well organized and have made their attacks upon mankind, so that their influence is being felt in every quarter of the globe, yet among these people super-spiritually possessed there is beheld a gravitation from darkness and toward the light.

By more than one spiritually possessed has America been designated as the scene of the next Golden Age of this present world. Already there is much talk of a "sixth race" The American melting pot of recent centuries has begun to show the homogenous effects of its continually stirring of many people in the same mold. Present indications are that this land may become even a greater paradise than Plato contemplated in his Republic, Thomas Moore in his Utopia or Bacon in his Lost Atlantis, and it will continue so for an indefinite period of years.

Bear in mind I am still talking about a spiritual Armageddon. The train of civilization is still traveling around and up the mountain toward its apex. Slowly, but surely it is attaining a much looked for and longed for perfection. I make no prophecies, for I am neither a prophet nor the son of a prophet; but as rational as I am, skeptical as I can be, sometime in the millions of years yet to come that great battle will be fought and won by the forces of Truth and Righteousness!

Chinese Widely Spoken
Chinese is the most widely spoken language, and it has been estimated that at least 400,000,000 speak it in its various dialects. English is next, with 200,000,000, followed by Russian, 140,000,000 Hindustani, 100,000,000; German, 80,000,000; French and Spanish, 70,000,000 each; Japanese, 65,000,000; Portuguese, 60,000,000; Italian, 50,000,000; Polish, 15,000,000; Greek, 9,000,000; Serbo-Croatian, 8,000,000; and Bohemian, 7,000,000. Although there are about 5,000 languages spoken in the world, no other language has 7,000,000 speaking it.

SAVING MONEY

With Cotton Bags

Have you ever realized how many useful and attractive articles you can make for your home that will cost you absolutely nothing but a little of your time? Two large Cotton Sugar Bags or Cotton Flour Bags will make a lunch-cloth with four napkins. Square off one of the bags and fringe all four edges. If you care to add a monogram or motif to fit in with your kitchen or breakfast room a simple design is very effective. Four napkins cut from one bag are of ample size. If you prefer color, the Cotton Bags can be dyed or tinted with very little effort.

Other Cotton Bag Sewing ideas are illustrated in a free booklet. Send to National Cotton Council, Box 18, Memphis, or Textile Bags, 100 N. LaSalle St., Chicago.

Post's Don't Rot; But Last Many Years If They're Treated

COLLEGE STATION, June, 12.—Green, sappy posts of such nondurable woods as sap pine, cottonwood and post oak will last from 10 to 15 years, possibly much longer, when treated with zinc chloride. The chemical is applied by the so-called tire tube method, and is inexpensive as compared with many other types of fence posts. A number of Texas farmers have demonstrated the practicability of this system of post treatment in cooperation with C. W. Simmons, farm forester of the Texas A. and M. Extension service and with county agricultural agents. Wide use of the method has been hindered because the chemical was not available, but supplies are now being sold in commercial quantities. The U. S. Department of Agriculture Forest Service has compiled a 1940 edition of complete directions for post treatment by the tire and tube method, as a result of considerable experiment during the past two years, and copies of this booklet can be obtained through county agents or by writing to C. W. Simmons, Farm Forester, Extension Service, College Station, Texas.

Bulgaria has made grapes a staple product of the country.

SHERIFF'S SALE
THE STATE OF TEXAS,
County of Bailey.

NOTICE IS HEREBY GIVEN That by virtue of a certain order of sale issued out of the Honorable District Court of Bailey County, on the 3rd day of June 1940, by District Clerk of said Bailey County for sum of Three Thousand One Hundred Eight & 08/10 Dollars and costs of suit, under a Judgment, in favor of Motley County, Texas in a certain cause in said Court No. 1267, and styled Motley County Texas vs. R. M. McCallum Et Al, placed in my hands for service, I, W. E. Renfrow as Sheriff of Bailey County, Texas, did, on the 3rd day of June 1940 levy on certain Real Estate, situated in Bailey County Texas, described as follows, to-wit:

Labor No. 8 out of League 178, of the Motley County School Land situated in Bailey County Texas, said suit and judgment being for the foreclosure of a Vendor's lien on said land against the defendants, R. M. McCallum, W. A. Maddox, Fieble L. Jordan and L. F. Jordan, but the said defendants being not personally liable under said judgment, and levied upon as the property of R. M. McCallum, W. A. Maddox, Fieble L. Jordan and L. F. Jordan, and that on the first Tuesday in July 1940, the same being the 2nd day of said month, at the Court House door of Bailey County, in the State of Texas, between the hours of 10 a. m. and 4 p. m., by virtue of said levy and said order of sale I will sell said above described Real Estate at public vendue, for cash, to the highest bidder, as the property of said R. M. McCallum, W. A. Maddox, Fieble L. Jordan and L. F. Jordan.

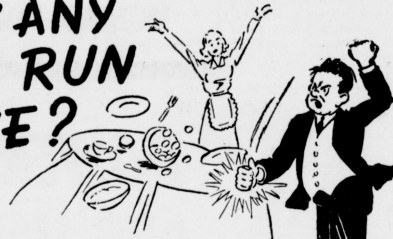

And in compliance with law, I give this notice by publication, in the English language, once a week for four consecutive weeks immediately preceding said day of sale in the Muleshoe Journal, a newspaper published in Bailey County, Texas. Witness my hand, this 3rd day of June 1940.
W. E. RENFROW, Sheriff Bailey County, Texas.
Publ. June 6, 13, 20, 23 1940.

IS THIS ANY WAY TO RUN A HOUSE?

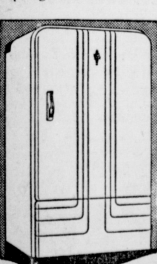

"Bills! Bills! Bills!" It's the first of the month again in the home without a Servel Electrolux. Of course, any husband knows he could run the house for a lot less than a woman, anyhow. "Look at this electric bill! Look at this grocer bill! We waste enough to feed two families!" He's got something there—unless you've got a Servel Electrolux.

Vegetables and fruits stay fresh in the two big, roomy porcelain vegetable drawers.

Let's see what Mrs. J. W. Jackson, Paducah, Texas, who used to own another type automatic refrigerator, has to say: "In the summer months, the cost of operating it would be \$8.50 a month. Now our Servel operates for 60c a month. And Mrs. Travis Fore, of Nocona, says, "My ice bill alone ran from \$5 to \$7 a month before I owned a Servel Electrolux. It costs 70c or 80c a month."

And about food savings, here's the story from Mrs. W. E. Tosh, Stamford, Texas: "My grocery bill has been cut to almost half. There is no more food spoilage whatever."

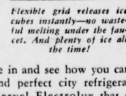

So, next time your husband gets the "unbalanced budget blues," show him this little arithmetic problem—the savings in several hundred average homes like yours, where they spent \$40 to \$50 a month for food:

- Saved on leftovers, per month \$2.82
- Saved on food spoilage, per month 2.60
- Saved on buying bargains, per month 3.61
- Saved on FOOD ALONE \$8.58

Now add what you now spend for ice or electricity to run the jellybox you have in your kitchen now. Then subtract 2 or 3 cents a day, which is plenty for the operating cost on a Servel Electrolux here. Then see if he doesn't say, "Great Scott, we're paying for one—let's get it!"

But wait... He doesn't know yet that Servel Electrolux is the refrigerator—the only automatic refrigerator—with no moving parts in its freezing system. No, not a one. Nothing to wear, to get rattly and noisy, to lose efficiency, to let you down without refrigeration in August or September, while you wait for the service man. He won't believe this "no moving parts" at first; so bring him to us. We'll show him. Just a tiny little SILENT gas flame.

And as Mrs. Henry Brooks, Paducah, Texas, says, 100-100-100, anywhere, can enjoy Servel Electrolux refrigeration. Yes, town, farm or ranch. She says, "The beauty of Servel Electrolux is, if you move to the country you don't have to trade it off; it operates on butane or kerosene, as well as natural gas."

Flexible gas releases ice cubes instantly—no manual melting under the faucet. And plenty of ice all the time.

- NO MOVING PARTS in its freezing system
- PERMANENT SILENCE
- CONTINUED LOW OPERATING COST
- MORE YEARS OF DEPENDABLE SERVICE
- CONTINUED SAVINGS THAT PAY FOR IT

State Health Doctor Warns Against All Summer Diseases

Austin, June 11.—Dr. Geo. W. Cox, state health officer, today warned city and county health officers over the state to take immediate control measures against the spread of diarrhea and enteritis (summer complaint). Widespread outbreaks of the disease have already been noted in several parts of Texas, and unless immediate checks against the disease are inaugurated, there is a likelihood that the 1946 morbidity and mortality total may rise above that for 1939, when a total of 2,338 deaths were reported in Texas.

"June, July and August of each year witness the peak prevalence of intestinal disorders, most of the victims being infants who suffer from so-called 'summer complaint.' Adults are also affected, the aged being quite susceptible," Dr. Cox further pointed out.

Illness is usually of sudden onset, accompanied by fever and severe diarrhea due to inflammation of the lining of the bowel (enteritis). The patient suffers loss of bodily fluids, and the bowel discharges often contain blood and mucus. Convulsions and coma frequently precede fatality, particularly in the infant type of summer diarrhea.

Of the 1939 total of 2,338 fatalities, 1,775 affected infants and children under two years of age, and 563 deaths were among persons over two years of age (chiefly elderly people).

Diarrhea and enteritis as a rule results from the use of contaminated food products or contact with a patient or carrier. Dysentery bacilli or germs are often found through laboratory examination of intestinal discharges. Laboratory studies demonstrated that many patients with diarrhea and enteritis (summer complaint) are really suffering from bacillary dysentery.

This infectious disease is very similar to typhoid fever in its method of spread from person to person. Prevention of diarrhea and enteritis is dependent on positive control factors such as: (1) Safeguarding food, milk, and water supplies. Foods should be covered at all times to prevent access of flies; raw vegetables and fruits should be thoroughly rinsed before using, and should never be sprayed either in transit or in commercial establishments with water other than that approved as being free from contamination.

(2) Improvement in sanitation, methods of excreta disposal, and fly control. Breeding places of flies should be destroyed to prevent propagation; houses and commercial establishments should be thoroughly screened to prevent their entry; garbage should be placed in covered containers to prevent access of flies, and collection and disposal of the garbage should be more frequent in the summer during the fly-breeding season. In localities where approved sewage disposal systems are not available, surface toilets should receive special attention as to sanitation. It is recommended that excreta be covered with waste oil, sand ashes, or lime frequently during the summer season for satisfactory sanitation.

(3) Ready access of food handlers to soap and water so that strict cleanliness in the preparation and serving of food may be had.

(4) Scrupulous attention to the matters of infant care and home hygiene. It is urged that special care be taken in the preparation of the infant's diet. Unless the home is fully screened against flies, the baby's crib should be screened or covered with netting.

Citizens are urged to report to their local city and county health officers any cases of diarrhea and enteritis of which they have knowledge so that immediate control measures may be inaugurated to prevent the further spread of the disease. Persons contracting diarrhea and enteritis (summer complaint) are further urged to get in touch with their family physician for immediate medical care.

How Old Are You Inside?
Never mind how many wrinkles Father Time has painted in your face. Never mind how many gray hairs he has put on your head. The important thing isn't how old you are on the outside, but how old you are on the inside. A man's real age is determined by the youthfulness of his spirit! Benjamin Franklin helped write the American Constitution at eighty. Timoreto painted his famous "Paradise," a canvas 74 by 30 feet, when he was seventy-four. Goethe completed "Faust" at eighty. As long as we are alert and vital in spirit we are not old. As long as we are joyfully looking forward and enthusiastically starting new things we are still young. Stay young on the inside and forget your birthdays!—The Silver Lining.

Majority and Plurality
Majority is more than half the votes cast; a plurality is simply a greater number, as when three or more candidates are running, the one who receives the largest vote is elected, although the sum of the other votes may be more than half the votes cast.

Be loyal to none town interests!

General News Over Texas And Other States For Week

Portales, N. M., last week received notice of a \$32,103 Federal grant for addition to its junior high school building.

The U. S. census shows a population decline at Amherst, in Lamb county, of from 964 in 1930 to 750 in 1940, a decline of 224.

The U. S. census report shows a decline of population at Plainview from 8,834 in 1930 to 8,257 or 65 per cent in 1940. Other Hale county towns also showed census decreases.

New Mexico State Supreme court has ruled that personal property in that state up to \$500 is exempt from garnishment proceedings. Also that garnishment shall not apply to more than 20 per cent of monthly wages under \$75 per month.

H. S. Lattimore, former Court of Civil Appeals judge, has announced his candidacy for Chief Justice of the Supreme court of Texas, the position formerly held by the late Judge C. M. Cureton and now being held by W. F. Moore who will not be a candidate for re-election.

Vital statistics just released from Austin show that last year there were a total of 121,033 babies born in Texas, coming at the rate of 14 per hour or 336 per day. The birth rate was 19.6 per thousand population, exceeding that of many other states.

Dr. W. R. White prominent pastor of an Oklahoma City Baptist church has refused acceptance of the presidency of Hardin-Simmons university at Abilene, it having been offered him about three weeks ago. He is the second person called to that post who has refused acceptance.

Texas rangers' groups, equipped with both autos and horses, are now guarding the lower stretches of the Rio Grande river between the U. S. and Mexico against "fifth column" members entering this country. They are reported coming into Mexico in large numbers.

Texas has \$50,642,638 state funds on deposit now, according to report of Charles Lochart, state treasurer. There are, however, \$20,390,653 outstanding warrants unpaid. There is a deficit of \$22,059,677 in the general revenue fund, \$1,833,618 in the Confederate pension fund and \$720,000 in the state old age pension fund.

Princess Juliana and two daughters, of Holland, are now safely landed in Canada.

Tuesday the House passed the bill authorizing 10,000 planes and 16,000 pilots, and to build 22 new combat vessels. It is now before the President for signature.

Italy entered the European war last Monday on the side of Germany. The French government fled Paris Monday as the German army closed in. Italian troops are advancing into France from the south. Roosevelt, in speech Monday said "Italy has stabbed France in the back." He urged full and prompt preparation by America. Turkey has declared a state of "alertness," which some interpret as indication she may enter the war on the side of the Allies.

Wheat Crop Up To 488 Million Bushel Says Government

The U. S. agriculture department Monday forecast a winter wheat crop of 488,858,000 bushels on the basis of June 1 conditions, and estimated spring wheat production at 239,000,000 bushels.

Conditions a month ago indicated a winter wheat harvest of 459,991,000 bushels. Production last year was 563,431,000 bushels. Average production during the ten years, 1929-38, was 571,067,000 bushels.

The indicated spring wheat harvest was based on the prospective plantings reported in March which were 19,425,000 acres, or 10.8 per cent more than the planted acreage of 1939, and the condition of the crop on June 1, which was 88 per cent of a normal.

8 POWERFUL ARGUMENTS FOR CHOOSING A FORD!

Built in Texas by Texas Workers

A few minutes in this year's Ford will open your eyes to a lot of good things! To roominess and a big-car ride that's a real discovery in low-priced money's worth. To economy that's really amazing. To hydraulic brakes that are the biggest ever used on a low-price car. To easy finger-tip gear shifting of the sort the fine cars use. To roadability and handling ease that make driving lots of fun.

But you'll find the mightiest arguments of all in the 8 fine cylinders under the hood. As 6 million Ford V-8 owners now know, only a Ford adds V-8 performance to low cost and thrift. Drive a Ford V-8. Before you pick out your new car, let the world's most famous "8" tell you its own matchless story . . . on the road!

BEST GAS MILEAGE, TOO!
The 85 h.p. Ford V-8 gave most miles per gallon of all standard-equipped cars in its price class in the 1940 running of the famous official and impartial Gilmore-Yosemite Economy Run. Also . . . Ford owners are reporting that the efficient, precision-built Ford engine requires no oil added between regular changes!

CHECK EQUIPMENT . . . See how much more you get in a Ford at no extra cost!
