## BABSON DISCUSSES — CASH

Babson Park, Mass., Jan. 1 — Investors and others are now going crazy over "inflation." Brokers and merchants are saying that the Dollar will become of little value. It would have been sensible to talk this way in the thirties; but then no one would interest people in inflation. Most people usually act at the wrong time about everything.

### STOCK MARKET AND RETAIL TRADE

Brokers make their living by selling stocks, and they have found that the easiest way to sell stocks today is to get people scared about inflation. The idea is that as the Dollar decreases in value the price of stocks should increase. This may or may not be true, but the real question is whether the Dollar will further decrease in value during the next few years. The Dollar is fully as likely to hold its own or perhaps become more valuable.

Since the Korean War broke out, the Country has been on a spending spree. People have been urged to buy houses, refrigerators, washing machines, and even furniture, with the idea that money invested in "real things" is safer than money in the bank. This might be true if we can agree on what "real things" are. With the constantly increasing new inventions and changing

styles, the only "real thing" is good land, properly located near growing communities. It would be a good thing if the banks would unite to sell CASH as the dealers organize to sell cars.

### HISTORY OF INFLATION

Inflation has nearly always been with us. From the earliest days, when Kings increased their spending money by clipping a little gold or silver off the coinage, inflation has been going on. It is true that, in terms of 1935-1939 values, the Dollar is now worth only 54 cents, compared with 104 cents in 1934; but in 1926 the Dollar was worth only 70 cents, after which it came back satisfactorily to the above mentioned 104 cents. During all these centuries, the Business Cycle has gone on just the same, irrespective of inflation.

There are several reasons for having larger bank accounts: (1) To have cash on hand to take advantage of the bargains in stocks and merchandise when the next crash comes; and it surely is coming some day. (2) To properly diversify one's securities. Bank deposits should be considered an investment, the same as stocks or bonds. As the value of one's stocks increases, one should increase his bank account proportionately in order to have proper diversification. (3) To have sufficient funds on hand

## Sand Hills Philosopher Didn't Wind Up His 1951 Work, But It's Not The First Year That Happened

Editor's note: The Sand Hills Philosopher on his Johnson grass farm seems to be starting off the new year about like he wound up the old one, his letter this week reveals.

Dear editor: While it doesn't seem possible that 1951 is over, why thunder I haven't even got started on some of the things I was aimin to do durin the year, although this never has disturbed me. I still got some things left over from 1950, 1949, 1948, 1947, 1946 and a few other years I ain't got around to yet, still I notice by the calendar that the year is done for.

I know it's customary to look back over the year and pick out the things you should have done to pay estate taxes after death. Too many families are not doing this; hence it will require a mortgage on the home or a sale of the business to pay these taxes. A person sixty-five years of age should start a special bank account to accumulate funds for his "death taxes." Every year this fund should be systematically increased.

### CASH AND PATIENCE

I have had the responsibility of supervising literally billions of dollars of investments. The greatest profits which I have witnessed have come not from buying some definite stock which everyone agreed "looked good", but from buying at the right time. This requires good old-fashioned CASH and PATIENCE. Many an old small-town New Englander who knew little about finances has become a millionaire by merely storing up cash in times like the present, and having the PATIENCE to wait for the right time to buy good securities.

It is true that the quoted value of CASH today is low compared with the quoted prices of houses, commodities and merchandise; but some day will see this situation reversed, when the value of CASH will be higher than the prices of houses, furniture and all kinds of merchandise, including Government Bonds. There have been times when I have even walked up and down State Street, Boston, trying to borrow fifty per cent on Government Bonds, and every Banker laughed at me! Of course, I believe in Government Bonds, but remember that you can even now get the benefit of them at a discount of 25% by buying certain bank stocks.

better and resolve to do a better job in the comin year, but a new year never has affected me that way. 1951 suited me fine, there wasn't a thing in it, so far as life out here is concerned, that I'd done different if it involved work, and I have an idea 1952 is goin to be the same way, so far as I'm concerned.

For example, I could have farmed a whole lot better this past year, but the same thing would apply to every other year you could mention and farin harder just never has been one of my main goals. A man who sets out every year to work harder than he did the year before is headed in for an explosion.

In fact, I guess I'm one of the few people who lives up to their New Year's resolutions, as I always put mine on a practical basis. It's based on human nature, I take into account what my capacities are and then arrange to stay within em. This way you don't set the world on fire but then you don't burn out a bear in either.

I don't know what's comin in 1952 but whatever it is I'll be ready for it, on account of I ain't expectin too much. The world has probably had bigger crises than the ones it's got now and probably had worse people elected to handle em, but I notice it's the world that survives, the crises and office-holders that pass away.

From the midst of my Johnson grass farm out here, I expect to have as much fun watchin 1952 as I did 1951.

Yours faithfully,  
J. A.

### CHRISTIAN SCIENCE SERVICES

God's perfection and His invariable love for His images and likeness, man, is stressed in the Lesson-Sermon entitled "God" to be read in all Christian Science churches on Sunday, January 6. The Golden Text states simply: "As for God, his way is perfect" (II Samuel 22:31).

From the King James Version of the Bible will be read this reference: "Acquaint now thyself with him, and be at peace; thereby good shall come unto thee" (Job 22:21).

This correlative passage from the Christian Science textbook will also read: "Unless the harmony and immortality of man are becoming more apparent, we are not gaining the true idea of God; and the body will reflect what governs it, whether it be Truth or error, understanding or belief, Spirit or matter. Therefore 'acquaint now thyself with Him, and be at peace'" (Science and Health with Key to the Scriptures, by Mary Baker Eddy, page 324).

## Robert Giles Enters 4 Pias At San Antonio

Robert Giles of Muleshoe, and a member of the Bailey County 4-H club, has entered four Poland China pigs in the boys' division of the San Antonio Livestock Exposition to be held February 15-24 at the Bexar County Coliseum.

Premiums of \$49,477 are offered in San Antonio's big 10-day stock show, of which \$7,910 has been posted for the boys' competition.

An innovation for boy contestants in the '52 show is a neatness award of \$100 being offered to FFA Chapters and 4-H Clubs, which will be presented to the most attractive exhibits. In addition, banners will be awarded. Personal appearance and conduct of the boys will be one of the factors in the judging.

In the boys show, the Exposition has added 15 places in three weight classes for Hereford steers, making 15 additional steers eligible for the auction sale.

## More Physicals For Texas Men

AUSTIN, Jan. 2 — The number of Texas draft registrants to be examined at armed forces examination stations in January has been raised from 1,880 to 4,271. Brig. Gen. Paul L. Wakefield, state Selective Service director, announced today.

Announcement of examination of the original group of 1,880 was made in early December. General Wakefield said his headquarters received the call for the additional 2,391 just before Christmas.

The 2,391 men to be selected will be from among men who have been examined before and failed to pass mental tests given by the armed forces. Under provisions of 1951 amendments to the draft law, these men must be re-examined because of lowered mental standards now authorized as acceptable.

Among men to be included will be some whose liability for service under the draft law has been extended until age 35. Local boards have been called upon to order any registrant for re-examination who appears to be eligible for any other deferred classification.

The state Selective Service director said the program of examining men who previously have failed mental tests will "go

A Sunday School class was composed of three year olds. The teacher asked the tots: "Do any of you remember who St. Matthew was?" No answer.

"Well, does anyone remember who St. Mark was?" Still no answer.

Surely, some of you must remember who Peter was?" The little faces were full of interest, but the room still remained quiet. Finally, a tiny voice came from the back of the room: "I fink he was a wabbit."

**Panhandle Area Making Progress In Agriculture**

College Station, Jan. 2 — Panhandle farmers made excellent use of wheat land this year for growing grain sorghums, points out Knox Parr, district Extension agent at Amarillo.

Wheat has been the one crop in this area for more than 10 years. However, extremely low wheat yields were produced in 1950 and 1951 because of the disastrous effect of drouth, severe cold, insects and disease. Wheat farmers turned to grain sorghum as a crop for their bare land.

In 1951 approximately 65 per cent of the wheat land in the area was planted to grain sorghums. Hansford and Ochiltree counties each planted approximately 225,000 acres to grain sorghums. Moore county pro-

# WE CHALLENGE NOBODY!

## We Are Too OLD To FIGHT - Too Fat To RUN!

COMPETITION is a GOOD THING. For instance; The FORDSON TRACTOR, fore-runner of the light tractors, was introduced by Henry Ford around 1917. It started something. Had it not been built - International might still be selling the MOGUL or the TITAN.

The FORDSON forced INTERNATIONAL to build the first really good farm tractor-the 10-20, the 15-30, the OLD REGULAR FARMALL. The old REGULAR FARMALL kept the ball rolling and forced COMPETITORS to build ALL PURPOSE TRACTORS. In a few years they caught up, or surpassed and INTERNATIONAL had to improve.

In the 1930's they brought along the F-20, the F-30, and the F-12. Again COMPETITION caught up, or surpassed; and IHC came along with the FARMALL M and THE FARMALL H. We merely outline this to show how COMPETITIVE FREE ENTERPRISE paves the way to PROGRESS and IMPROVEMENT.

INTERNATIONAL does not build ONE TRACTOR that will fit EVERY purpose from 10 acres, up to 1,000 acres. THEY just aren't that good. They do build 17 sizes in the Wheatland type alone. From 12 H. P. to 180 H. P. They Build 4 sizes in the row crop models, and we wish they built 4 more.

Just a few words about our four Farmalls:

First—the Farmall M. It is the heavyweight champion in the 4 row class. We do not claim it is the largest 4 row. Jack Dempsey was not the biggest man in the ring, but he was the champion. The FARMALL M is as maneuverable or easy to steer and handle as most 2 row tractors. It is economical on fuel and oil. It is RUGGED and DURABLE. It is a low cost tractor to repair. It is now strating its 13th year, and we know of none that have been discarded or junked.

Second—The Farmall H is the LIGHT HEAVY WEIGHT CHAMPION. Eighty percent of the H Farmalls in the Muleshoe area are pulling 4 row equipment. We have some customers who have farmed up to 300 acres for five and six years with the Farmall H without grinding the valves or changing sleeves, pistons, or inserts.

Third—There is the Cub. A fine little job for the 20 or 40 acre farmer. Lately, competition has forced IHC to bring out the finest Farmall in our line. The new MIDDLE WEIGHT CHAMPION the Farmall C. We believe the Farmall C will make a great name for itself and International. We invite all farmers interested in a tractor of this size to try it. We will be happy to demonstrate the Farmall C to anybody. Try it on a 2 bottom plow, or a 2 bottom lister, 2 row cultivator or 4 row sled.

We make no claim that International Farmalls are superior in EVERY feature. Our competitors have some mighty good points. We also know that we cannot satisfy all our users 100%. We wish that was possible.

To those few dissatisfied users—we wish to point out that perhaps the biggest fault is in us as a dealer. Some fault may be in the product, and some fault in the user. Some of the dissatisfaction may be caused by a combination of all three.

We take this opportunity to extend to all our competitors, our wishes for their success and prosperity. To every farmer in the Muleshoe area — our best wishes for GOOD CROPS and HAPPINESS in 1952.

To those loyal International customers who react kindly to our errors, who are patient with our mistakes, who are tolerant of our faults, we thank you from the bottom of our hearts. Your generous patronage has given us some share of prosperity.

TO EVERYONE — A HAPPY NEW YEAR

Several local burglaries were cleared up with the arrest of two men who are being held in Clovis, N. M. Sheriff Hugh Freeman said. Officers said the two have signed statements admitting they entered Mrs. Naomi St. Clair's home and took a Bendix washing machine; took a new sewing machine from the home of Mr. and Mrs. L. L. Luman, south of town; and stole three guns from Rudolph Wiedebush.

Sheriff Freeman was in Clovis today to take statements from the two men, who will be arraigned here. The items mentioned above have been returned to their owners by the officers.

Officers said a number of cameras were found in the possession of the two, including a motion picture camera which they said they took at Muleshoe, but no one has come forward to claim it.

## High Plains Water District Will Elect First Board Of Directors

On Tuesday, the 8th of January, an election will be held electing the first permanent Board of Directors of the High Plains Water Conservation District No. 1. This district is the largest of its kind in the United States, with almost five million acres of land within its bounds. It includes all and parts of 13 counties and 19 incorporated cities.

All people who are concerned with underground water, including farmers, municipalities, industries, and hydrologists, are watching the progress of this infant district for it is the feeling that the outcome of this district will help govern a lot of water regulations and laws in the years to come.

It is necessary for the people of the High Plains who are interested in our great natural resources from an economic and a conservative measure to vote in these elections.

It is necessary for the irrigation farmer, the municipal water engineer, and the industrialist, to combine efforts in making this resource serve the greatest number of people for the longest possible time. The temporary Board of Directors urge you to vote on Tuesday, January 8.

There are three voting places in Bailey County. Location of boxes and officials to hold the election are:

Muleshoe - Old Commodity House, southwest corner of square, B. H. Black, Finley Pearson, John Gammon, and Delma McCarty.

Enochs - Enochs Gin office - D. E. Adams, P. A. Altman, E. N. McCall, and Jim Claunch.

Three Way - School house - Tommy Galt, William Eubanks, Andrew Wittner, and Edwin Neutzler.

**SOMETHING TO THINK ABOUT**

By A. W. BLAINE

We have long boasted of the freedom that we enjoy here in America in contrast to the lack of freedom of citizens of other countries. In so doing we take our freedom for granted without thinking how it was obtained and how maintained. After all who is responsible for maintaining freedom through the enactment and enforcement of just and equitable laws? In answering that question we must admit that we are responsible here in our own community. This responsibility is greater than most of us are willing to admit or assume.

We cannot expect others to teach and practice the golden rule of government in our country unless we are willing to teach and practice it here in our town and community. We must realize that we can expect democracy to work no better elsewhere than it works in Muleshoe. Those in our community who would deny freedom to other citizens in the community would deny them in all communities if within their power.

Take for example, freedom of worship. Those who would deny any citizen or group of citizens would deny it to citizens of other towns.

Every church or religious group, according to our constitution, has a right to maintain public worship, to advertise, to practice and promulgate their doctrines as they believe them. However, we have some individuals and groups who are not willing to allow this freedom. They have proven this fact by acts of vandalism and other uncharitable acts.

We have an example here in Muleshoe in that someone has destroyed the signs erected by the Assembly of God Church at the intersection of West 1st and Avenue E and at the intersection of East 1st and American Boulevard. It is not a question of what we may think of the Assembly of God Church or to what extent we may agree or disagree on their doctrines.

Certainly no thinking citizen would deny them the privilege of maintaining public worship and erecting signs giving the location of their church. All such acts of vandalism, if of malicious intent, are acts of aggression against freedom of worship in Muleshoe and should be deplored by every true citizen.

Let us maintain the kind of freedom in Muleshoe that we would want all citizens of all

## Farm Families Face Challenge In New Year - Best Met By Planning

College Station, Jan. 2—Farmers and farm families are facing a challenge for the coming year that can best be met through planning and more efficient production. The level of farm prices is edging downward; but the prices of materials, equipment, labor and other things that farmers may be edging upward. At the same time, more and more agricultural production is needed to take care of a growing population at home and to meet foreign demands.

This situation, says C. H. Bates, farm management specialist for the Texas Agricultural Extension Service, calls for careful planning if the present farm living standards are to be maintained. Crop yields must be increased and every job on the farm should be studied for the purpose of cutting down expenses and labor

requirements, adds Bates. When the farm plans are made, the specialist suggests that they include the use of the highest yielding adaptable crop varieties. Research workers of our experiment stations are constantly introducing new and improved varieties of crops and as these are tested and planted seed becomes available. Bates says, substitute them for the varieties now grown. The new corn hybrids and grain sorghums are examples.

He says the most productive part of the farm should be planted to cash crops. If you are in an area of the state where commercial fertilizers can be successfully used, get your fertilizers early and apply them generously. To help make their use even more profitable, he suggests that before the planting season

rolls around that soil samples be submitted to the state laboratory for analysis. Local county Extension agents have detailed information on how to take and mail the samples to the laboratory.

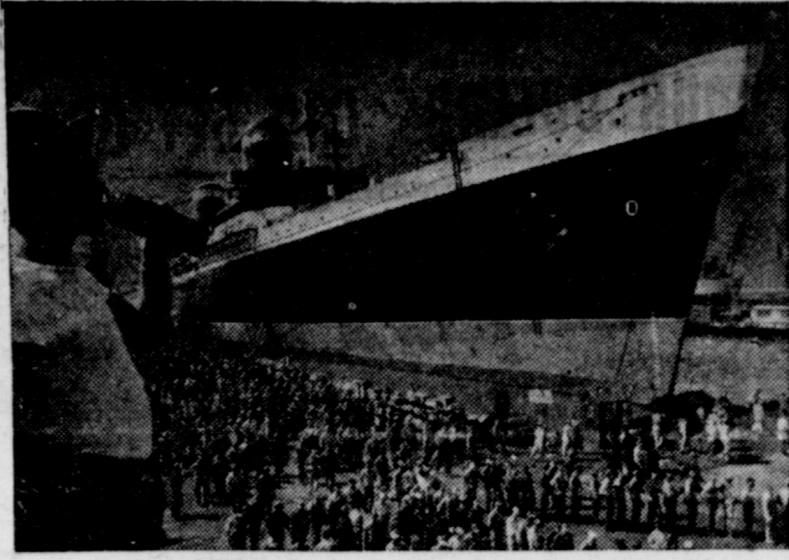

Don't forget to include in your production plans, provisions for taking care of the insect enemies. Book orders now for enough insecticides to take care of your minimum needs. Planting seed should be treated to control seed borne diseases and then follow through with a good insect control program for better yields and quality in the crops, says Bates. Another mighty important item is timing. Plan your production program for the farm so that peak labor loads can be avoided and so every piece of machinery and equipment can be used to the best advantage.

Finally, the specialist urges the use of good business methods in managing the farm. Farm records are a must. And Bates points out that detailed records should be the basis for making major changes in farm operations or practices. Complete records are also mighty useful about this time of the year for income tax figuring purposes, he adds.

## If You Want A Boom, Check Natural Resources Of Your Local Community

AUSTIN, Jan. 3—If you want a boom in your community, check its natural resources, a University of Texas researcher says.

Willfrid (correct) C. Bailey points to the oil boom at Snyder, the new aluminum plant at Rockdale-established because of lignite deposits-and the irrigated farming boom at Cotton Center as typical examples.

Under joint support of the University of Texas and Harvard University, he has spent two years surveying Cotton Center, a farming community of approximately 300 persons in Hale County, located in the High Plains irrigation belt.

"Their boom occurred in the

1940's simply because farmers, taking stock of their water resources, discovered they could economically irrigate their land from wells, turning marginal-producing fields into real profit makers," Bailey says.

"Many Texas communities can do what Cotton Center has done by checking their resources scientifically," he adds.

"University of Texas researchers in such divisions as the Bureau of Business Research, Department of Anthropology and School of Architecture, which specializes in community planning, can give valuable assistance to any group wishing to make such an investigation," Bailey notes.

### Miss Locker, Mr. Garrett Exchange Vows In Double Ring Ceremony

MRS. PHILLIP GARRETT

Miss Dolores Claire Locker, daughter of Mr. and Mrs. Ernest W. Locker, and Mr. Phillip Eugene Garrett, son of Mrs. Birdie Garrett of 1110 Arthur Street in Amarillo and the late Mr. Edward Garrett of Muleshoe, exchanged vows Friday evening, Dec. 21, at 6:30 o'clock at the Progress Baptist Church, Rev. C. C. Morgan, pastor, officiated at the double ring candlelight ceremony.

The decoration featured a valance of greenery and wedding rope tied in the center with white satin and lace bells glittered with gold. On either side was tall candelabra banked with two baskets of white gladioli and fern trees.

Mrs. Bill Garrett played a prelude of music and accompanied Miss Patricia Morgan as she sang 'Always.'

The bride given in marriage by her father, chose a gown of

white satin designed with a yoke of illusion, edged with a double ruffle if illusion and tied with tiny satin bows. The long sleeves ended in points over the hands. The immense gathered skirt with gores of chantilly lace was ballerina length. Her fingertip veil of illusion edged with lace fell from a tiara of lace and seed pearls. She wore a single strand of pearls, a gift from the groom, and white satin pumps. She carried a Rainbow Bible topped with gold glittered white roses and satin streamers.

Mrs. Bill Barbour served as matron of honor. She wore a ballerina length gown of gold net over taffeta. The yoke was fashioned after that of the bride's gown. Her bouquet was of gold glittered gladioli.

Bill Garrett was his brother's best man.

Ushers and candle lighters were Bill Barbour and Don Moore

### 25 Miles More Paved Roads To Be New Year's Gift For Bailey County

Bailey County has a handsome New Year's gift, the announcement of 25 miles of additional farm-to-market paving as 1952 opens, County Judge Cecil H. Tate told The Journal today. These additional miles of paving will be constructed at state expense, with the county furnishing the right of way.

### Snowfall Here Nearly 5 Inches

A beautiful snow fell in the Muleshoe country Wednesday night, adding a bit to the favorable outlook for moisture as 1952 gets underway.

Precipitation here was nearly five inches, R. J. Klump, weather recorder said. The snowfall followed a day of sleet and icy underfoot conditions which slowed traffic to a halt.

### Postal Rates Are Increased

New postal rates went into effect with the advent of the New Year. A. J. Gardner, Muleshoe postmaster, asked The Journal to remind its readers that a government postcard now costs 2 cents to mail instead of 1 cent. A supply of the new cards are on hand at the local office; they are printed in red instead of green but still bear the Ben Franklin likeness.

Drop letters, too, cost more to mail than formerly. Drop letters now require 2 cents postage instead of 1 cent.

Of course letters mailed on a route out of Muleshoe or to another postoffice require 3 cents postage, the same that it has been for a long time.

While Christmas mailing was probably not as heavy as for 1950, the local office has had a rush of business since Christmas, Mr. Gardner said, which is rather unusual.

### VISITED IN HAMILTON

Mr. and Mrs. Julian Lenau and sons, Charles and Don, and Mrs. Elvin Smith and children of Hagerman, N. M., visited the holiday week in Hamilton, with Mrs. Lenau's and Mrs. Smith's uncle, Dr. A. J. Koen and Mrs. Koen and with other relatives. Mrs. Smith and children are visiting this week here with her sister and family.

The newest project is the paving of the "old Muleshoe ranch headquarters road." This road begins at a point on highway 84, 2.4 miles northwest of Muleshoe and runs west and north, alongside the ranch for a part of the way and by the ranch headquarters building, to intersect with a paved highway which runs south across the sand hills.

This road has a length of approximately 11.2 miles. The county commissioners court entered an order on August 12, 1951, accepting the offer of the state to build this road, which lies in Precincts 1 and 2.

### Baileyboro Road Accepted

On August 1 the court had accepted the state's offer to build 14.0 miles of paving, extending from the end of F. M. 298, 5 mile west of Baileyboro, west, south and west to the New Mexico state line.

Judge Tate said these roads are to be built without any expense to Bailey County, but the county is responsible for obtaining the right of way needed for both roads.

Construction of these roads will add materially to the facility of travel throughout the county and will be a considerable addition to the paved road system that has been built up over the last few years.

### Inglis Infant Rites Conducted

Funeral services for Jerry Don Inglis, one day old son of Mr. and Mrs. J. G. Inglis, of Earth, were conducted in the First Baptist Church of Earth at 2:30 p. m. Tuesday, January 1. Rev. Bruce Giles, pastor, officiated in final rites. Interment was in Earth cemetery with Muleshoe Funeral Home in charge of arrangements.

The baby died Monday, December 31, in Green Hospital and Clinic here, at 7:30 a. m. Besides the parents, he is survived by the maternal grandparents, Mr. and Mrs. Nat Bearden, of Delwin, Texas; and the paternal grandmother, Mrs. J. B. Inglis, of Grand Saline, Texas.
