Womans League Has Bazaar Workshop

The Ozona Woman's League held its regular meeting at the Civic Center on Tuesday, October 24, at 3:30 p.m. Hostesses were Mrs. Bruce Hill and Mrs. Joe Pierce IV. A brief business meeting was conducted by Mrs. H.O. Hoover, president, and members then participated in the bazaar workshop led by Mrs. John R. Hunnicutt and Mrs. Tommy Wilson. Handcrafted stickhorses were made to sell at the annual bazaar to be held on Tuesday, November 21, at the Civic Center. The Woman's League Bazaar is the only fund-raising event held by the group and the proceeds are used to finance the yearly projects.

Tuesday meeting were Mmes. Bobby Aycock, Jim Bob Bailey, Billy Carson, Dwight Childress, Pleas Childress, III, Buster Deaton, Frank McMullen, Jr., Deanie Holden, Douglas Moore, Ronnie Pennington, Jack Probst, Lane Scott, Steve Sessom, Gregory Stuart, Jeffrey Sutton, Randy Upham, Gary Vannoy, Wesley West, and Dan Pullen.

Ms. Davidson Hostess To Bridge Club

Mrs. Cuatro Davidson was hostess for the Country Club Bridge Club at the club Thursday.

Winning high was Mrs. Beecher Montgomery and second high went to Mrs. Davidson. Mrs. Gene Williams was low and Mrs. George Bunger won the bingo.

Others playing were Mrs. Clay Adams, Mrs. Bob Bailey, Mrs. Joe Friend, Mrs. J.J. Marley, Mrs. Kirby Moore, Mrs. J.B. Parker, Mrs. Hillery Phillips, Mrs. Sherman Taylor, Mrs. Evert White, Mrs. Byron Williams, Mrs. Charles Williams, and Mrs. Jack Williams.

Debra Says

by Debra Price

Energize the family's wardrobe for colder temperatures indoor and out.

Winterize by wearing garments that are close fitting at neck, sleeve, waist, leg and other normal openings. Tight fitting garments are not warm because they reduce circulation as well as comfort.

Natural fibers--cotton, wool, silk, mohair--polyesters with special comfort finishes, furs, and wool-like fibers such as many acrylics are warmest.

Garments worn in lightweight layers that trap insulating air pockets are warmer than one heavy-weight garment.

Full length and multiple layers of socks, mittens and gloves, mufflers and scarves and snug hats or caps warm the extremities.

Extremities such as feet, hands and the head--especially for those with circulatory problems--may feel cold faster since the body works to keep vital organs warm and may at times sac-

rific other areas. Infants and young children, older adults, the handicapped and those with cardiac and circulatory conditions have greater need when adapting comfortably to cooler temperatures.

Infants feel temperature changes more rapidly than adults and rely on adults to dress them properly.

Young children need guidance in choosing garments that don't weigh them down too much to hinder posture or active movement or interfere with personal safety.

Older adults and the handicapped may not be as active and since body activity degree for 12 to 15 minutes warms the body, they may

feel cooler and need to dress more warmly.

OATMEAL QUICKIES
1 1/2 cups sugar
1/2 cup shortening
2 eggs
1 1/2 cups rolled oats
1/2 cup sour milk or butter-milk

1 1/2 cups sifted flour
1 1/2 teaspoons baking powder

1/2 teaspoon baking soda
3/4 teaspoon salt
3/4 teaspoon cinnamon
3/4 teaspoon nutmeg
3/4 teaspoon ground cloves
3/4 cup raisins
3/4 cup chopped nuts

Cream sugar, shortening, and eggs. Add oats and milk. Mix thoroughly. Combine flour, baking powder, soda, salt, and spices; stir into oat mixture. Add raisins and nuts. Drop from teaspoon 2 inches apart on greased cookie sheet. Bake at 375 degrees for 12 to 15 minutes. Makes 4 1/2 dozen.

SORORITY SPAGHETTI SUPPER IS FRIDAY

The Alpha Alpha Mu chapter of Beta Sigma Phi will have its annual spaghetti supper Friday night before the Crane-Ozoma football game at the Civic Center. They will begin serving at 5 p.m. and invite all football fans and other members of the community to dine with them.

Acteens Attend Meeting

The Acteens of First Baptist Church and their adult leaders attended the state Acteens meeting, CIMTA/Celebrations, at Wayland Baptist College in Plainview Saturday, Oct. 28.

Several hundred Acteen girls from the West Texas area attended the Plainview conference and one guest speaker was special Acteen Katherine George from Mid-

land. Katherine George is the granddaughter of Mrs. Oscar Kost.

Attending from Ozona were Gayla Bell, Katrina Burger, Cynthia Hartnett, Elizabeth Jones, Katrina Phillips, Shelly Smith, Wendy Hood, Kathy Storms, Marilyn Wester, Mrs. Hazel Storms, leader; Mr. Rick Storms, bus driver; Mrs. Doris Hood, leader.

TMA Warns Parents On Moth Ball Danger

From the Texas Medical Association

The Texas Medical Association (TMA) has issued a warning to parents taking winter bedding and clothing out of storage. TMA said moth balls placed in the materials contain a dangerous poison and are particularly harmful to children under age 6.

Those children's bodies absorb the poison, naphthalene, more quickly than at other ages. However, the chemical is dangerous to people of any age if they swallow it or inhale the vapors. Symptoms of naphthalene poisoning include possible nausea, vomiting and drowsiness. Or if a person is allergic to moth balls, handling them can trigger a skin reaction.

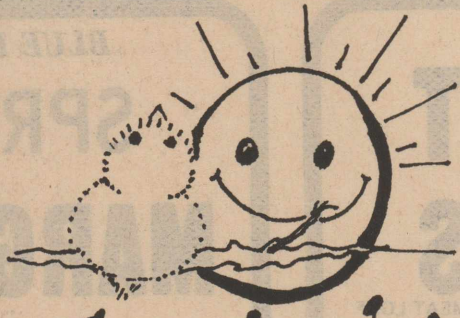

If poisoning does occur and the victim is not having convulsions, try to make the person vomit by giving syrup of ipecac, or a teaspoon of dry mustard in warm water or putting a finger blunt object at the back of the throat. Whether or not the

person vomits, get him or her to a doctor quickly since kidney problems can occur. In any poisoning case, try to take the poison container and poison to the doctor if doing so will not slow you down.

In order to avoid any possible problems, empty moth balls into a child-proof container when taking articles out of storage and inspect all materials to make sure no moth ball pieces are left. The precautions are necessary, not just because of moth balls' poisonous potential, but because moth balls can look a lot like candy or marbles and so have special attractive effects on children.

\$500 REWARD

Tips For Gardeners

From the Ozona Garden Club by Mrs. Bailey Post

November is another planting time, for the weather cools toward winter, so is the ideal month for beginning to plant trees and shrubs. During the next five months, examine your landscape carefully and decide where improvements are needed. If a new yard, make your plans to include plants and trees to enhance the beauty of your new home.

If you haven't already prepared soil for planting, do so as soon as possible, then shop early for plants while the selection is good. Select only healthy plants--and buy them from a reputable dealer who has taken proper care of the plants prior to selling them. An unhealthy plant is no bargain at any price.

Winter is the best time to deal with drainage problems, tree or limb removal, and transplanting of overgrown shrubs.

One way to have portable color and fragrance next spring is to pot bulbs now and plunge them into the soil outside. Flies method eliminates the need for a special storage area, such as space in the refrigerator, for pre-cooling bulbs while they are dormant. Large flowered varieties of daffodils, narcissus, tulips and hyacinths are excellent choices for container culture. Be sure each pot has a drainage hole. Fill pots half full of dampened potting medium; then set the bulbs in, either one per pot or several. Add enough soil to cover the bulbs, leaving the necks barely exposed. For each pot, dig a hole deep enough so that half the pot is below the surface. Set the pot in the hole and mound soil up around the sides; then cover the entire pot with pine straw, leaves or similar mulch. When growth begins in the spring, remove pots from the soil and set in decorative containers or among ground covers.

After planting shrubs, trees or transplanting, water all plants thoroughly as soon as they are in the ground, and mulch them for local protection.

Sitter's Clinic Scheduled

An Adult Sitters Clinic has been set for November 15 and 16 at the Day Room in the Crockett County Care Center. The clinic is sponsored by the Texas Agricultural Extension Service. The two day class teaches people how to care for people that are bedfast. Both men and women are welcome to attend.

Call Debra Price, County Extension Agent, 2-2721, or Stella Valadez, Ozona Community Center, 2-2710, to enroll for the clinic. Participants will need to enroll by November 13. The enrollment will be limited to 18 people.

NO PLACE LIKE HOME

Just for a moment, close your eyes and picture the scene in your childhood home that you liked best. Was it the music box in the front room, the grandfather clock, the large, fragrant kitchen? Whatever you are thinking of, your memory is a treasure chest of things you hold dear.

Sunday was a special day, and all activities were centered around the church and the home.

Come back to the present a moment. The Church was home to you then! It can be your home now; a place of worship where the heart remembers and rejoices.

Let your mind wander further. You will remember not only loving scenes and favorite objects, but family and friends, their ways, their thoughts, their talk. God and His goodness were mentioned often. Prayer was a common practice. There was faith and trust and a feeling of security.

How To Plan The Perfect Party

It's easy to have a successful party as long as you take the time to plan it carefully. A good idea is to keep a checklist, and the day before your party go over it in detail to see that you have all the food, liquor and other ingredients you'll need. Make sure you have a sufficient supply of coasters, cocktail napkins, ash trays, cigarettes, matches, candles, bathroom tissue, fresh soap and guest towels.

Keep the occasion light and festive. Introduce guests, plan a few "ice-breaking" party games, such as charades, and have enough liquor, light snacks and desserts on hand to keep the party going.

After your guests have enjoyed some thirst-quenching Bacardi Sunset cocktails, a sure party-pleaser is to bring out some Perfect Fruit Tarts and Peach Melba Parfait. These desserts are pretty enough to grace any table, and tasty enough for even the most discriminating palate.

The fruit tart was first made popular in France. This American version uses "convenience" foods, but the addition of rum in the custard mixture results in a smooth rum custard with a truly gourmet flavor. Use any seasonal fruits for the glaze topping and arrange them in a pretty design. The gelatin mixture forms the glaze and sets the fruit in place.

The Peach Melba Parfait is another dessert your family and friends will think you spent hours preparing. To achieve the slanted effect, spoon in the raspberry layer and tilt the glasses in the refrigerator by hooking them carefully into the rack. Gently rest one glass against another. When the top layer is added, stand the glasses upright and chill until ready to serve.

PEACH MELBA PARFAIT

(Serves: 8)
1 package (3 ounces) raspberry flavor gelatin
2 cups boiling water

1 package (10 ounces) frozen raspberries
1 package (3 ounces) peach flavored gelatin

1/2 cup Bacardi light rum
1 pint vanilla ice cream
1 1/2 cups diced fresh or frozen peaches (if frozen, thaw and drain)

Dissolve raspberry gelatin in 1 cup boiling water. Add unthawed raspberries; stir occasionally to separate berries. Let fruit thaw and gelatin thicken slightly. Spoon into 8 dessert dishes.

Dissolve peach gelatin in remaining 1 cup boiling water. Add rum. Spoon ice cream into gelatin and stir to melt. Refrigerate until thick enough to mound. Fold in peaches and spoon into dishes over raspberry layer. Chill at least 1 hour or until ready to serve.

PERFECT FRUIT TART

(Makes one 10-inch tart)

1 egg yolk
1/4 cup softened butter or margarine
1/4 cup granulated sugar
1 1/4 cups flour

2 packages (3 1/2 ounces each) vanilla pudding mix
2 1/2 cups milk

1/4 cup Bacardi light rum
1/4 cup apricot nectar
1 package (3 1/2 ounces) strawberry gelatin
1 cup boiling water
1/2 cup cold water
1 pint strawberries, hulled
2 cups fresh or frozen sliced peaches

In bowl, combine egg yolk, butter, sugar and flour. Cut with pastry blender or two knives until mixture resembles coarse meal. Press against sides and bottom of 10-inch quiche pan or spring form pan. Bake at 400° F. for 10 minutes until golden. Cool on wire rack.

In saucepan, combine pudding mix, milk and rum. Blend well. Add apricot nectar. Cook, stirring, until mixture comes to boil. Pour into cooled pastry shell. Cool.

Dissolve gelatin in boiling water. Add cold water. Chill until slightly thickened. Meanwhile, arrange fruit on top of pudding mixture. Spoon gently over fruit. Chill several hours or until ready to serve.

BACARDI SUNSET

Pour a jigger of Bacardi light rum over ice in a tall glass. Add 1/4 to 1/2 ounce grenadine. Fill glass with orange juice.

The Department of Pediatrics of the Harvard University School of Medicine has found that babies tend to increase the amount of thumb, finger or fist sucking they do between the ages of three and seven months. Then, as the babies learn to creep, hold toys and sit up, the sucking slackens off by itself.

People eager to give gifts to mothers-to-be or their children have found an excellent one to be a Mothercare gift certificate, available from Mothercare, Box 238, Parsippany, New Jersey 07054.

Check Costs On Detergent Buys

Figure cost per load for economical laundry detergent buys, advises Lillian Chenoweth, family resource management specialist with Texas Agricultural Extension Service.

Many consumers become confused when trying to compare laundry detergents by price.

Although price is not the only factor involved in selection, it's an important consideration.

One problem is label directions that call for using a cup or so of detergent-volume measurement-while the net contents of the box is given in weight measurements.

To calculate the cost per load of a powdered detergent, first, determine its density--the weight per unit volume.

For example, the label of a box of powdered detergent

states these facts:

Net weight: 49 ounces
Price: \$1.48

Recommended use: one cup per load

Now, determine the weight of one cup.

Assume this sample cup weighs 2.2 ounces. Divide this 2.2 ounces into the net weight of detergent in the box, 49 ounces, resulting in a figure of 22.3 loads per box.

The cost per load is then determined by dividing total cost, \$1.48, by 22.3 giving a cost of about six cents per load.

Don't confuse distinctions between fluid ounces--volume--and ounces avoirdupois--weight.

This confusion is not present with liquid detergents since both the contents and the use suggestions are in liquid measurements, the specialist points out.

Accessories Add That Finishing Fashion Touch

Accessories add that "finishing touch" to fall fashions.

Belts become an impor-

tant tag-along for the slimmed down fashions, says a clothing specialist with the Texas Agricultural Extension Service.

Wide crushed leather, wide canvas double buckled, strands or beads wrapped or narrow cowhide straps serve as belts for fall fashions, Marlene Odle-Kemp reports. Fur tails draped over the narrow wrapped belt or attached to the slung shoulder bag emphasize furry extras.

Wear little stash bags as necklaces, the specialist suggests.

Hats are mannish--fedoras, berets, cloches.

Boots are soft pliable leather beginning at the knee or crushed to the ankle.

Short suede boots work well with the "new look." Shoes take a front seat with flat heeled oxfords or loafers. Wear higher heels with the narrow, shorter pant.

Legs feature a textured look in nylons and crushy, woolen anklets over hosiery, Ms. Odle-Kemp adds.

Goat News

Things are still brewing in the golden eagle department. There is of yet no definitive word on the proposed eagle management plan that's been gathering dust in various Washington offices, but at least one federally-funded eagle predation study makes pointed reference to the need for more than passive control.

Along this line Bill Sims, executive secretary of the Texas Sheep & Goat Raisers' Assn., recently wrote Interior Secretary Cecil Andrus, "Texas sheep and goat producers are approaching another fall and winter without any program to protect their lambs and kids from golden eagles. To you this is not important...so what if some yahoo down in Texas loses a few animals. The important thing to you and Jimmy Carter is to placate a small number of very vocal protectionists." The letter went on to outline the re-

sults of a study conducted by the Interior Department.

The study covered eagle predation during the spring lambing season on the Temperance Creek-Snake Sheep and Goat Grazing Allotment in the Hell's Canyon National Recreation Area of Oregon. Observers of predation there determined without much room for doubt that the level of eagle depredation during lambing depends on the number of eagles present during lambing. They also stated positively that eagles will prey on sheep or goats specifically and do some rather grueling cross-country flying for the privilege.

The statements on control were less direct, but pointed just the same. Predation, the observers noted, will not be reduced until "limited removal of depredating birds" is allowed, and "live trapping and re-location is not an economical or practical operational procedure."

Sims' letter concluded, "I would assume you would agree that when a rancher has coyotes killing sheep, the coyotes doing the killing must be killed. Well, there is no difference with golden eagles. When they are killing lambs or kids, they should be killed." Are you going to make a concerted effort to stop our losses to eagles or are you going to turn your head and hope the problem goes away?"

In the past, it's been difficult for livestock producers to present scientific evidence proving the things they've known and experienced for generations, but that's changing ever so slowly now. New techniques, equipment, communications and cooperation have begun filling in the evidentiary gaps.

In line with this, the Texas Sheep & Goat Raisers' Assn. has voted to continue its Operation Dead Lamb Program in conjunction with the Texas Agricultural Extension Service. The Association is asking producers to collect all suspicious lamb or kid carcasses, freeze them and deliver them to designated collection points for later necropsies by Extension Service and Experiment Station personnel in San Angelo.

The goal is to compile an extensive record of attributable cases of predation. Carcasses should be identified by date, location (county at least), landowner's name, suspected predator and any other information possible. The program worked well last year, and we're hoping it will do even better this year.

Annual Wage Report Clarified

With the change to Annual Reporting of Wages, the Social Security Administration would like to clarify the employer's reporting requirements. Employers will still be required to file quarterly tax reports with the Internal Revenue Service. The quarterly 941 form will not contain the usual Copy A employee listings, but instead will only show the total taxable wages, tax withheld, and the deposit schedule. An employer will not furnish the Federal Government (either Internal Revenue Service or Social Security Administration) with a detailed employee wage listing until January, 1979, when they submit W-2 Forms to the Social Security Administration. The Social Security Administration will process the W-2's for FICA tax information for Social Security and Income tax information for the Internal Revenue Service.

The Annual Reporting Law does not cover state and local governments covered by Social Security. Nor does it cover household employees. All state and local governments covered by Social Security will still be required to report quarterly their employees' wages in detail to their state Social Security Administrator on Form OAR S-3. Household employees will still have their wages reported to Internal Revenue

Service in detail quarterly on a Form 942.

For more information, contact the San Angelo Social Security Office located at 2214 Sherwood Way. The telephone number is 949-4608. Residents of Ballinger, Big Lake, Brady, Junction, Mason, Ozona, Sonora, and Winters may call toll free by dialing "Operator" and asking for "Enterprise 2058".

WTU Offers Christmas Program

A special Christmas program called "Goodies For Giving" will be November 9, at the Civic Center. Becky Mahon, home economist with West Texas Utilities Company will present the program. The program will begin at 2:00 p.m. and all homemakers are welcome to attend.

This year's program will feature lighting decorations for your home, new holiday recipes, packaging ideas, and low cost decorating ideas. The program is free and Christmas cookbooks will be available. The program is sponsored by West Texas Utilities Company and the Texas Agricultural Extension Service.

Time To Cull Calves

Although the cattle market is strong at the present time, it's wise to "clean up" herds by culling open cows and giving more attention to a controlled breeding program by culling late calving cows.

There's no need to put expensive winter feed into unproductive cows, points out Billy Reagor, county agent with the Texas Agricultural Extension Service.

Culling the cow herd now will also help you plan on hay and feed supplies for the winter months.

Also, pregnancy testing cows this fall may be a more profitable management tool than ever before.

Since it's tough for a cow to produce a calf large enough to pay her feed bill, we know an open cow is surely losing money, emphasizes the Agent. In addition, cows calving during the summer months wean calves 30 to 90 pounds lighter than their herd mates which calve at other times. For this reason it's advisable to cull cows which will calve late next year and buy a replacement which will calve early. Whoever does the pregnancy diagnosis (usually your veterinarian) will be able to estimate the calving date on each animal and make it easy to identify next year's late calving cows. Your definition of a late calving cow should change every year until your calving season has been reduced to 60 days preferably, and certainly no longer than 90 days. Removing barren and late calving cows from the herd will increase both the herd's reproductive potential and pounds of calf weaned, contends Reagor.

Mr. and Mrs. Brock Jones, Margaret and Hamilton, of Austin were here over the weekend visiting Mrs. Clay Adams and Mrs. Brock Jones.

SPORTS FANS!

I BET YOU DIDN'T KNOW

Brought to you By Jerry Lay

Do you have any idea who was the biggest man ever to play pro football...Answer is Les Bingaman who played for the Detroit Lions from 1948 through 1954..He set the pro football record in 1954 when he weighed in at 349 pounds.

Did you know that you could have once bought a National Football League franchise for \$50..In 1922 several NFL teams were purchased for \$50, and in 1925, a man bought the Detroit team for just \$50.

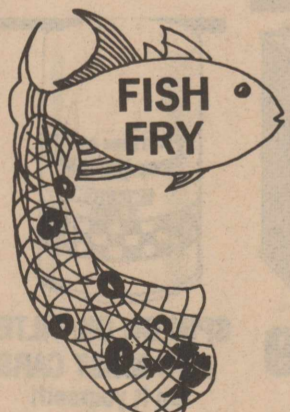

Can you imagine a football player scoring 100 points himself in one football game?...Did you know that such a feat was once accomplished?...Back in 1916 Leo Schlick of St. Viator College in Indiana scored 100 points against Lane College.. Schlick had 12 touchdowns and kicked 28 extra points in that game, which his team won 205-0..By the way scores that high were not unheard of in 1916. That same season, Georgia Tech, for example, beat Cumberland 222-0.

I bet you didn't know our top salesman J. P. Pogue can give you the best deal for miles around. Come by L-B Motor Company.

Poll Shows Texans Support Death Penalty

Four out of every five Texans replying to the most recent Texas Crime Poll favor capital punishment for one or more crimes.

The Poll is conducted semi-annually by a team of social scientists at the Criminal Justice Center at Sam Houston State University in Huntsville.

Copies of the Texas Crime Poll questionnaire mailed to a random sample of 1,000 Texas residents included the following question:

"Are you in favor of the death penalty being available for one of the following crimes? If so, please check which ones." A total of 80 per cent supported the idea of having the death penalty for one or more crimes.

Murder was selected by most (77%), followed by rape (37%), treason (20%), armed robbery (17%), arson (9%), and other, including kidnapping, terrorism, and child abuse, (9%).

Dr. Raymond Teske, Jr.,

director of the Texas Crime Poll said that these responses are very similar to those received during the program's first survey in the fall of 1977. At that time 84 1/2% of the respondents indicated they favored the death penalty for one or more crimes.

The survey also pointed out that a slightly larger proportion of males (83%) than females (78%) support the death penalty. A marked difference is also evident in the smaller proportion of Blacks (46%) than Whites (85%) or Mexican Americans (70%) supporting the death penalty.

"Individuals most likely to favor the use of the death penalty are the better educated, higher income Whites," Teske said. "Those individuals least likely to support use of the death penalty are lower income blacks with less than a high school education."

In response to another question, only 74 1/2% of the respondents indicated that they would be willing to serve on a jury in a capital

murder case.

Three questions were concerned with prisons and the conditions under which inmates are released. Res-

pondents were asked: "What do you think should be the Main purpose of prisons?" Rehabilitation was selected by 34%, punishment by

34%, and deterrence by 12%. In answer to another question, 85% said that probation should not be allowed for persons convicted of

violent crimes. And almost two-thirds (63%) said that the responsibility for setting punishment should remain in the hands of the jury rather than the judge.

The last question concerned whether a person accused of a serious (felony) crime should be allowed to enter a plea of "not guilty by reason of insanity." A total of 72% indicated that they do not support the concept.

"The findings suggest an increasing dissatisfaction the part of the public with efforts to treat or rehabilitate the offender," said Teske. "the trend appears to be in the direction of punishment rather than rehabilitation. The strong support for the death penalty is especially reflective of a punishment orientation."

"The public appears to be particularly concerned about the violent offender, as reflected in the overwhelming opinion that probation should not be allowed for persons convicted of violent crimes. The emphasis on punishment is also reflected in the over-

whelming opinion that probation should not be allowed for persons convicted of violent crimes. The emphasis on punishment is also reflected in the fact that the majority of the respondents feel that an individual sentenced to prison should serve the full sentence, and that mandatory supervision should be required for all persons released from prison."

COLD-WEATHER driving's easier if you keep flares, flashlight, sand, long-handled brush, and plastic window-scraper in your car. And an anti-freeze solution in your windshield washer.

Children Learn Decision Making From Adults

Children learn decision making from observing how adults make decisions, reports a family life education specialist.

It is a big "plus" for children if they grow up in an environment where the skills of quality decision making are practiced, Jenny Reinhardt says.

However, if children aren't that fortunate, it's possible to modify or acquire new skills.

Miss Reinhardt is with the Texas Agricultural Extension Service, The Texas A&M University System.

She suggests these steps to follow to become a more efficient and effective decision maker:

1. Recognize that you have options. Thinking that there

are several different choices makes decision making easier.

2. Be open to re-decision. There rarely are issues that are forever resolved.

3. Learn to base decisions on facts—not emotions. Consider the facts that affect the issue, make the decision and then allow feelings and emotions to flow.

4. Evaluate options. Look at the best and worst that could happen if a certain option is chosen.

5. Take the initiative. By being on the offensive in decision making, we improve our chances of getting what we want.

6. Accept that all decisions won't be good ones. The evidence to make "perfect" decisions rarely exists.

7. Be persistent in following through after making a decision. Part of the reward of effective decision making is the satisfaction of seeing the decision put into practice.

Special Care For Leather

Leather's "fashion look" for fall will take special care, a clothing specialist advises.

Smooth leather and suede with its textured look need different care techniques, according to Nancy Brown with the Texas Agricultural Extension Service.

However, both will last longer if given the proper care, she adds.

Garments made of smooth leather do not require much care.

Let smooth-leather garments dry naturally.

Wash off spots with warm water and soap. Then wipe dry with a clean damp cloth.

Suede requires more care. These garments need frequent brushing. Use a dry bristle brush or a rubber sponge to prevent dirt from settling in the nap.

Art gum eraser or emery board can remove stains usually.

If suede becomes wet, allow it to dry away from heat—and rub it with a terry cloth towel to bring up the nap.

Hang all leather garments on padded hangers to prevent misshapen shoulders or marks left by wire hangers. To get rid of wrinkles, hang the garment in a damp place, such as a steamy bathroom, overnight. If wrinkles remain, press the garment with a "dry iron" technique.

Set the iron on a rayon setting and use heavy wrapping paper as a press cloth. Press on the top side with quick light strokes.

Leather garments need professional cleaning treatment. Don't try to save money and clean leather garments yourself. Let a professional do this job.

Keep Will In Safe Place

By the Texas Society of Certified Public Accountants

It's important to keep your will in a safe place, but it's also vital to keep it in an accessible place. Do not put the original copy in your safe-deposit box because your heirs or executor may not have quick access to it. Even in cases where someone other than the deceased had authorization to open the safe-deposit box, the IRS sometimes prevents it for fear that taxable assets may be removed. Generally, the attorney who prepared the will retains a copy.

When preparing a will it's a good idea to provide for some "liquidity" in your estate. This means ensuring that some assets are easily convertible to cash to cover

funeral costs, living expenses, estate taxes and other items prior to settlement of the estate. Life insurance often proves especially useful for this purpose, because the proceeds generally are available quickly and, if a beneficiary is named, not subject to probate.

Often a taxpayer elects to make gifts of money or property during his lifetime, rather than bequeathing it to his heirs, so as to reduce estate tax liability. Such gifts do not have to be reported by the recipients as income. But the donor does have to file a gift tax return for any year in which the total value of gifts to any one person exceeds \$3,000.

Gifts of money or property

made to charitable organizations are not subject to gift taxes. The donor, therefore, can reduce potential estate taxes without concern about gift taxes, and also claim a deduction, within limits, on his income tax return for the year in which the gift is made. Be sure, however, that the recipient qualifies as a charitable organization. Check with the IRS beforehand if there is any doubt.

Many people confuse their taxable estate with their probate estate. Although certain assets, such as life insurance or property held in joint tenancy, are not subject to probate and may pass quickly to the heirs, all or part of such assets are includable in the gross estate for estate tax purposes.

Crockett Co. Oil and Gas News

Crockett County drew locations for two wildcats. Dan J. Harrison Jr., Houston, will attempt to reopen the Howards Creek (Canyon gas) field of Crockett County with the scheduling of two 7,000-foot wildcats, 17 miles west of Ozona.

The No. 6 University 20-30 3/8 mile northwest of the original opener and lone producer, is 1,650 feet from the south and 660 from the east lines of 20-30-University.

The No. 7 University 29-30 5/8-mile northeast of the opener, is 1,260 feet from the south and 1,980 feet from the

east lines of 29-30-University. Harrison has two other 7,000-foot wildcats and three 9,000-foot wildcats in the vicinity. However, the No. 2 University Land 30-30, 1,650 feet from the north and 1,980 feet from the east lines of 30-30-University, has been amended to 6,760 feet as a Howards Creek test. It was drilled to 6,760 feet with 4 1/2-inch casing set at 6,691 feet.

The Howard Creek opener, Humble Oil & Refining Co. (now Exxon Corp.) No. 1-CR State University, drilled to 10,028 feet, was finished April 4, 1963, for a calculated, absolute open flow of 1,487,000 cubic feet of gas daily, plus one barrels of 44.7 gravity oil, through perforations at 6,635-680 1/2 feet. It became depleted in Sept. 1965.

J. Cleo Thompson, Dallas, will drill the No. 6 C.E.

Davidson III, a 7890 Pennsylvania test, one mile southwest of a long northeast extension to that pay in the Davidson Ranch (6200 Canyon, 7890 Pennsylvania and detrital 8606 gas) field of Crockett County, 5 1/2 miles east-southeast of Ozona.

Location is 1,320 feet from the south and west lines of 51-GH-GC&SF. Contract depth is 9,000 feet.

County Pecan Show Scheduled

The 1978 Crockett County Pecan Show will be held at the Civic Center, December 4 and 5.

Pecans will be judged on December 4 and the food entries will be judged the 5th. Plaques, ribbons, and cash awards will be given to winners in classes in both the food and nut divisions.

Home owners and interested persons are encouraged to make plans now to enter this year's show.

The committee members realize that the pecan crop in Crockett County is somewhat below normal, however it only takes 45 nuts of the same variety to make an entry.

The show is sponsored by the Crockett County Program Building Committee. All programs conducted by the Texas Agricultural Extension Service are open to all regardless of age, socio-economic levels, race color, sex, religion, or national origin.

Crockett County Care Center News

by Joan Nicholas

Activities Program Director

Two of our residents spent a very happy day, Sunday. They were Frances Tolson and Paul Cavin.

Sunday School Superintendent of the Big Lake Baptist Church, Mr. Fisher, came over and took Frances and Paul to Sunday School and church. Frances tells me there were well over two hundred attending church school. They stayed for the luncheon afterwards and family members returned the two to the Center in the afternoon.

Volunteers serving the past week were Angelita Pena, Inez Gutierrez, Rosa Leal, Doris Karr, Liz Mary Pipes, and Georgia Kirby. Also Yvette Martinez of the Ju. Auxiliary.

Last week's Bingo "Champ" was Mike Pena, and Verna Talley won second prize.

We had Bingo Wednesday morning instead of Tuesday night, and I am grateful to Lisa DeHoyos, L.V.N., and Elvira Pena, Mike's wife, for assisting me.

Winners of dominoes, Monday, were Mike Pena first, and Swede Lundgren second. Sterling Baker was an interested spectator. In forty-two the partnership of Frances Tolson and Eleanor Yeager came out on top. In "Toss-Across" Juana Hernandez won one series of games and Gertrude Daniels won another.

Ceramics will be as usual Mr. and Mrs. B.B. Ingham Jr. for Mrs. R.R. Dudley and Mr. Early Baggett. Mr. and Mrs. W.T. Stokes for Mr. Early Baggett. Mr. and Mrs. Jeff Owens for Mr. Early Baggett, Mr. Madden Read, Mrs. Carl Malone, Mr. Johnny Hokit and Mrs. R.R. Dudley.

Check Auto Registration

AUSTIN--It's time for a last-minute checkup. Look at your automobile registration plate.

Does the validation sticker expire in October, 1978? If so, you have until October 31 to get a new validation sticker for your vehicle.

R.W. Townsley, director of the Motor Vehicle Division of the State Department of Highways and Public Transportation, reminded motorists today that they should have received October renewal registration applications by mail.

If you do not have the new three-part registration renewal card, you must take your most recent registration receipt, car title and the registration fee to your county tax assessor-collector to obtain a new validation sticker. Many county assessors-collectors will not accept and require cash or money orders with the application.

Under the new year-around registration law, about 700 thousand vehicle registrations expire each month. They must be renewed for one year during the month of registration, since the last of the short-term transition registrations expired in September.

The staggered registration system was conceived to eliminate long lines at the last minute when more than 10 million registrations were filed in two months. You can make the short lines shorter still by promptness in registering your vehicle.

on Tuesday morning as we continue to make tree decorations for Christmas. We are looking forward to some fun tomorrow evening, Halloween, and I don't intend to miss it!

Elvira Farris, Director of Nurses, is presently touring Europe with relatives; we hope she is having a lovely time in spite of the shrinking dollar!

Ida West and I found a quiet corner on Monday morning and together we enjoyed some more of Edgar Guest's poems; I believe Ida derives more happiness from poetry than anything else.

We all feel very sad for Jessie Deaton in her recent loss.

Guidelines For Second Opinions On Surgery

From the Texas Medical Association

The Texas Medical Association (TMA) has produced formal guidelines it hopes will encourage the government and insurance companies to protect patients' rights on consultations and second opinions on recommended surgery.

Increasing emphasis on getting a second doctor's opinion before having some types of surgery is making the groups who pay for those opinions take a second look at their policies. Since much study and publicity (such as the U.S. Health, Education and Welfare Department's multi-million dollar publicity campaign encouraging second opinions) is occurring, TMA said it wants to make sure patients and doctors are treated fairly.

Mylie E. Durham, Jr., M.D., TMA president, said many possible problems could occur. Patients could be forced to go to distant doctors they didn't know. Patients also could be pressured into getting second opinions even if they didn't want to do so.

Smooth-Top Ranges Are Efficient

Smooth-top ranges feature energy efficiency and easy clean-up, says Lillian Chenoweth, family resource management specialist with Texas Agricultural Extension Service.

Recent research has found that operating costs for smooth-top ranges are similar to operating costs for conventional ranges when used for family meal preparation, the specialist reports.

Actual energy consumption in home situations may vary slightly, but cost should vary little.

In making comparisons, consider meals rather than single-food items in order to equalize long and short-term cooking differences.

A further point to note is that the smooth-top range retains heat well—turn off the unit before cooking is complete and let the retained heat finish the job for free.

Appendicitis-It's Still With Us

From the Texas Medical Association

Many people have the mistaken idea that appendicitis is a thing of the past, thanks to antibiotics, the Texas Medical Association says. In fact, appendicitis is still a common problem, and many physicians agree that it can be treated only by surgery. Antibiotics help the patient recover from surgery with few complications but used alone they rarely provide permanent relief from a diseased appendix.

The appendix, a worm-like attachment extending from the large bowel, seems to serve no useful purpose in the human anatomy. Most people are not aware of this organ unless it becomes inflamed. Although waste matter from the bowel flows past it, the appendix's own mucous secretions normally keep it clean. If the appendix's opening becomes plugged, however, its normal method of drainage does not function. An astonishing array of objects—including peb-

bles, seeds, toothpicks, small bones and clumps of hair—passing through the intestinal tract can plug the appendix's opening. More often, however, the appendix becomes blocked by its own twisting or by small, hard bits of fecal matter.

When blocking occurs, the tiny appendix becomes swollen and the person soon experiences the characteristic pains of appendicitis. The symptoms may be slight fever, nausea, constipation and abdominal pain. The pain does not always begin on the lower right side of the abdomen where the appendix is located. It may start on the left side or high in the center of the abdominal area and then move to the lower right side.

The swollen appendix, filled with pus, may block off its supply of blood and its nerve supply. When this happens, the person may get some relief from pain, but with its blood supply cut off, the wall of the appendix weakens and sometimes ruptures. The pus

which breaks through may infect vital organs in the abdominal cavity. This is what doctors call a perforated appendix.

Although not every pain in the abdomen indicates appendicitis, any such pain that is increasingly severe and that is accompanied by nausea, vomiting, and fever should be reported to a physician. Until a doctor determines what is wrong and

what should be done, laxatives or enemas should not be taken.

The surgery which corrects appendicitis is a procedure with relatively little risk. The patient is usually in the hospital less than a week and can usually count on being back to a normal routine in three weeks. Once the useless appendix is removed, there is no danger of recurrence.

Prolong Life Of Cutlery

Cutlery's "last stand" may be due to improper care.

Knives in good condition are more efficient, and they are safer, advises Linda McCormack, a family resource management specialist with the Texas Agricultural Extension Service.

She offers these guidelines for knife care:

Store knives individually so blades do not contact other blades or other hard surfaces.

A small block of wood fitted with slots for the blades is quite satisfactory.

Use a cutting board for chopping and slicing.

Do not use knives to cut string or wire—or as a screw driver or lever.

Do not allow knives to soak in water.

Do not subject knives to heat.

Do not clean any knife in a dishwasher, unless the label says dishwasher safe.

Most newspapers pick Hill over Clements

"John Hill may be the best candidate for governor in decades. Judging from his record, he should win easily over his Republican opponent, whose chief qualification is money. Unlike his opponent, Hill is not given to outrageous promises, intemperate personal attack or underhanded tactics. He will work hard for the best interests of the state and its people."

—Austin American Statesman

"The more Mr. Clements has explained his blunt viewpoints — even those views we could agree with — the more he has raised doubt as to how effective a bulldozer could be in Texas government. Conversely, John Hill has grown in our evaluation as a man who not only is the best state attorney general in recent history, but also is a man with the intelligence, savvy and ability to serve Texas well as governor"

—Abilene Reporter-News

"We believe Hill will bring vitality and leadership to state government. Hill is not an advocate of big government. Nor is he a free spender. He has pledged that no new taxes will be levied if he is elected. His anti-inflation program is the kind of fiscal conservatism Texans can accept gleefully."

—Corpus Christi Caller

Common Sense for Congress

Nelson Wolff proposes:

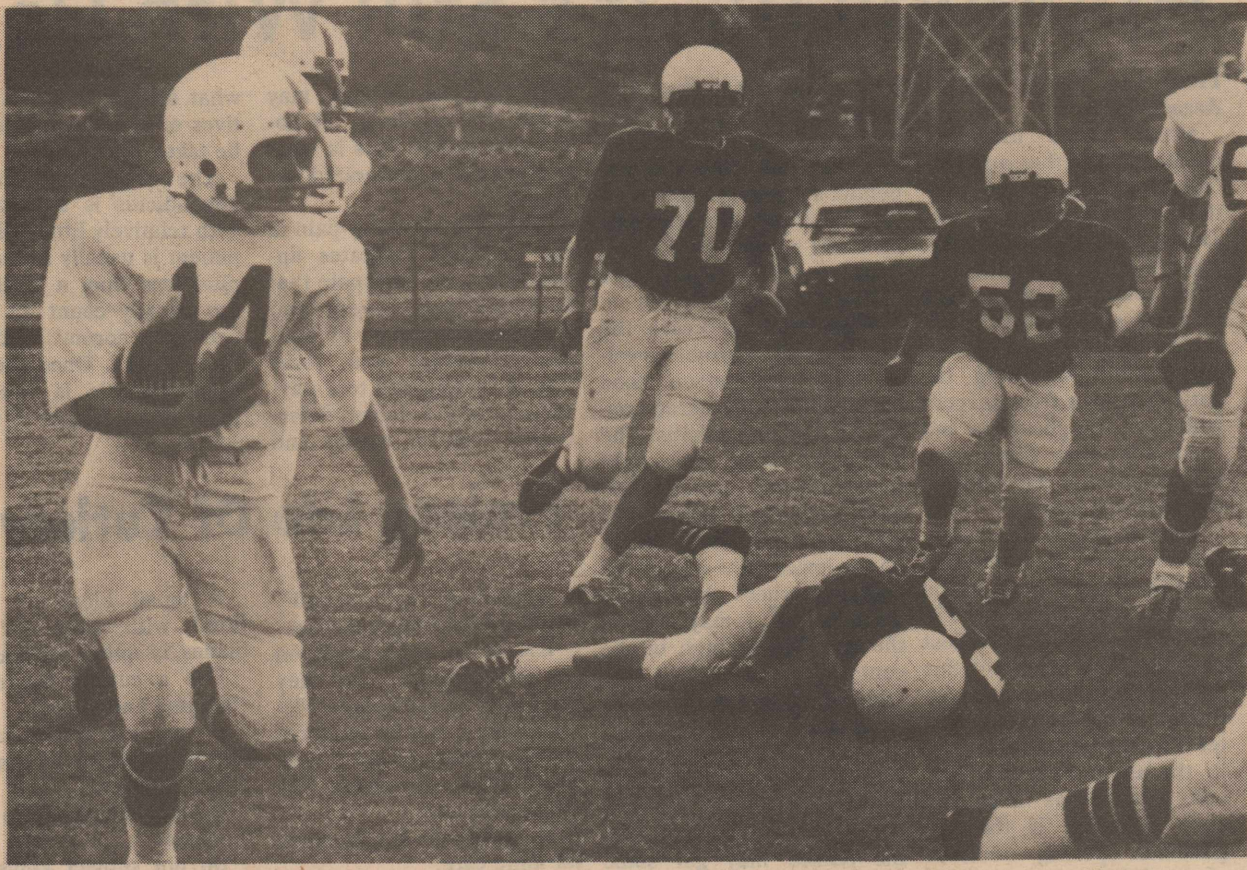

- ★★ A \$104 billion tax cut over three years (two-thirds for individuals; one-third to stimulate investment in the private sector)
- ★★ A \$53 billion savings in the federal budget by cutting waste, inefficiency and fraud
- ★★ A balanced budget by 1982 and a constitutional amendment requiring Congress to balance the budget by 1982

Nelson Wolff, as Vice-Chairman of the Texas Senate Finance Committee, helped write the first "no new taxes" budget in over 25 years.

EIGHTH GRADE CUBS continue their undefeated ways Thursday in a game against Iraan where they were

victorious 40-0. Besides being undefeated on the season, the Cubs have yet to be scored on and have only one game to go.

Jr. Varsity Downs Iraan JV 35-12

The Ozona Junior Varsity defeated Iraan's J.V. 39-12 Thursday night in their second meeting with the Braves. Iraan scored first but did not go across the goal line for the two point conversion, leaving the score 6-0. Ozona came back with a 55 yard run by Leal to bring the score 7-6 after the extra point attempt. Again Iraan scored and lost the two point conversion. Trailing 12-7 the Lions with another score by Leal after a 50 yard scamper. Following another touchdown by Buckner, the Lions went out in front with two scoring passes to Ernest Badillo and a 23 yard run by Borrego, leaving the score 29-12 at the final gun.

Leading the offense was Hector Leal with 230 yards rushing and 93 yards passing. Borrego had 55 yards rushing and Varlyn Aldridge passed for 12 yards to bring the total yardage to 385 yards. Ozona's defense held Iraan to 66 yards rushing and 137 yards passing. The defense was led by Danny Crawford with 12 tackles, Gary Adcock with 11, Borrego 10, Vallejo, Stokes and Flores had 7, and Simon Hernandez and Kelly Buckner had 6 each.

This Thursday the Lion's J.V. travel to Crane to take on the Golden Cranes' J.V.

Cubs Shut Out Iraan To Tune of 40-0

The Ozona Jr. High 8th Grade Cubs racked up their sixth consecutive shutout victory last Thursday when they traveled to Iraan and defeated the Iraan Jr. High by a score of 40-0. The Cubs scored in every quarter as the offensive units rolled to a 400 yard game running and passing. Cub scores came on runs of 6 yards, 14 yards, and 33 yards and 2 PAT, kick by Harvey Huereca, a 79 yard pass and run from Allen Dewes to David Badillo, and a 4 yard run for a TD, 2 point conversion and a pass reception by Albert Borrego. The final Cub score came on a pass interception return by Gregory Fierro from 20 yards out. The Cubs suffered two

TD's nullified by penalties. One was a 61 yard run by Albert Borrego and the other a 73 yard run by Joe Villarreal. Defensively the Cubs held the Iraan team in check all evening as the Cubs continued their stingy defensive play. Jene Wilton, Dan Bean, Willie Payne and Sam Rivera picked up fumbles and Huereca and Fierro contributed a pass interception each. Leading tackles were Villarreal with 12 and Rivera with 10 tackles. Thursday, November 2, the 7th and 8th Grade Cubs host Crane's 7th and 8th graders at Lion's Stadium and the Cubs final game will be at Sonora Thursday, Nov. 9.

District 7-AA Football Stats

The Ozona Lions, going into district play Friday, Nov. 3, when they host Crane, lag in district statistics, but have several players with creditable individual statistics. Sonora leads in offense and defense, has scored the most points with 140, and has allowed the least points, 27. The Lions trail behind the other District 7-AA teams in both offense and defense, but in spite of that, have the most passing yardage. They trail in points scored with 47 and have allowed the most points by their opponents with 199.

Two players among the top 15 rushers in the district. Fred Garza has carried the ball 130 times for 508 yards and 5 touchdowns. Aldo Delgado has carried the ball 33 times for 135 yards and 2 touchdowns. Danny Sewell, Lion quarterback is among the leading six passers in the district. He has thrown the ball 66 times for an average of 153 yards per game and a total yardage of 743. His record is marred only by the fact he has thrown no touchdown passes and had 14 interceptions.

Ozona's Jay Hufstедler and Jeffrey Young are near the top of the list. Hufstедler has caught 17 passes for 264 yards to average 15.5 yards per game, but no score. Young has caught 26 passes for 202 yards to average 7.7 yards per game with no score. Delgado, Garza and Clair McDaniel are the other three Ozona Lions on the list. Garza is among the leading punters, kicking the ball 28 times for 1025 yards for an average of 36.61. He is second in district in punting. He is also among the leading scorers with 5 touchdowns for 30 points scored.

Individually, Ozona has Among the top 15 receivers

Horse Championships

The first Copenhagen/Skoal Superhorse Award honoring the most versatile horse will be presented at the 1978 World Championship Quarter Horse Show. The winner receives a special trophy and \$5,000 in cash. More than 1,000 American Quarter Horses are expected to be corralled for the fifth annual event in Oklahoma City, Nov. 15-19. Sponsor is the U.S. Tobacco Co., which is putting up \$50,000 for prizes in this American Quarter Horse Association production.

The prize Quarter Horses, valued in excess of \$10 million, will be competing for the World Championship trophy, the "Oscar" of the Quarter Horse industry, and a share of the more than \$175,000 in total prize money. Top horse in each of the 45 classes will win a World Championship trophy. Cash awards will be given to the top six horses in every class.

The show is an invitational event. Only certain horses are eligible to participate. To receive an invitation to any of the 45 events, a horse must earn a predetermined number of points at approved Quarter Horse shows.

The race for the "Oscars" actually started Jan. 1 at Knox, Ind., the site of the first American Quarter Horse Show for 1978. Since then, thousands of Quarter Horses have competed in approximately 1,700 AQHA shows all over the U.S., Canada and Mexico.

QUARTER HORSES will strut their stuff, and more, vying for prizes and championship honors.

2 Ozonans To Marines

Two Ozona High School graduates were recently inducted into the U.S. Marine Corps and are in the process of completing basic training, according to a news release from the Marine Corps Recruiting Substation in San Angelo. Jimmy Gillit, who entered the service in June, 1968, a

1974 graduate of Ozona High School enlisted under the Combat Arms Enlistment Program. Richard Cardona, a 1977 graduate of Ozona High School, enlisted in the Aviation Guarantee Program and is attending Aviation Mechanics School.

Nutrition Important For Healthy Deer Population

High quality nutrition is important to the maintenance of healthy populations of white-tailed deer.

Deer managers and wildlife enthusiasts--including hunters--should carefully monitor the quality and quantity of usable forage available to whitetails in accordance with population densities, says Dr. Milo Shult, area wildlife specialist with the Texas Agricultural Extension Service.

Doe Permits To Be Issued Here Nov. 13

Crockett County landowners or their designated agents may pick up their 1978-79 hunting season allotment of antlerless deer permits Monday, Nov. 13, at the County Courthouse in Ozona, according to officials of the Texas Parks and Wildlife Department.

P&WD wildlife biologists will be on hand at the above date and place to answer questions persons eligible to receive permits may have.

Landowners are urged to pick up their permits at the stated time to avoid possible delay and inconvenience later.

"In order to monitor the value of vegetation available to deer, the manager should first ask, 'what do they eat?'" Food habit studies throughout Texas show that deer do best on and depend on a wide variety of plants. No single plant can be singled out as the best. Therefore, looking for plant diversity is the first step," Shult emphasizes.

These studies also indicate that deer rely primarily on seasonal browse and forbs at mealtime. "Browse is simply the twig tips, leaves and seeds or most production of woody plants. Forbs are the broad-leaved plants frequently (although incorrectly) called weeds. These high quality forbs can be important throughout the year and are especially important in spring and summer when body requirements are high for growing antlers and nursing fawns. Fortunately, in most areas of the state, this is when forbs are most abundant," says the specialist.

If deer are doing poorly and preferred plants are overused or absent, steps should be taken to remedy the situation. The most obvious are to reduce competition through an increased harvest of deer in the hunting season and to adjust livestock numbers. "These are probably the best tools available to the deer manager," says Shult.

Increasing the available food supply also helps. This can be done by planting food plots. For example, oat patches are planted for deer and livestock to provide high quality forage in the cool winter months.

"Plantings can be a problem, however," points out the specialist. "Land preparation and seed necessary to establish the plantings cost money and are not appropriate for all range sites. The entire investment can be lost without adequate and timely rainfall."

Research in Texas and other states has shown that applications of commercial fertilizer on rangelands may increase both quantity and quality of forage. Based on

this research, two result demonstrations were established by county Extension agents in Llano and Gillespie counties.

Results to date show that higher rates of combination nitrogen-phosphorous applications do increase forage production. The highest rate on the Llano County demonstration is 180 pounds of actual nitrogen and 90 pounds of actual phosphorous. On the Gillespie County demonstration, the highest actual rate is 120-90-0. These combinations seem to give greater diversity coupled with production than either element alone, Shult notes.

Livestock are attracted to these plots for grazing, and deer droppings also indicate a heavy attraction for the plots. Unlike plantings, the plots provide some response whenever it rains, even if those rains occur after the fertilizer is applied.

"Small plots of one or two acres in size scattered around a ranch can be evaluated on their ability to attract deer," points out Shult. "While results similar to the Llano and Gillespie County demonstrations may be predicted on similar soils, other soil types may not be as productive."

The fertilizer food plot-attractant concept will not substitute for a well-rounded deer management program, emphasizes Shult. It is but a single technique which will not show increased animal performance without the proper matching of animal numbers to the habitat.

"The plots will be ineffective for wildlife without some livestock deferralment," points out the specialist. "Livestock grazing is an important tool to keep fertilized areas from becoming covered with grass at the expense of forbs. However, continued grazing by livestock without deferralment will not provide much in the way of food for deer."

For winter, close off the attic from the home.

Be sure to seal cracks around any attic doors, pull-down stairways or air duct passages.

To keep warmest this winter, choose garments that are thick but not heavy, or select those that can be worn loosely in layers that trap insulating air next to the body.

COLD-WEATHER starting's easier with one of science's newer "man-made" oils in your engine. A synthetic like Mobil 1 flows freely at extreme temperatures, helps start cars at 35 below F, and saves battery power.

Money Management Tips

From the Texas Society of Certified Public Accountants

Self-employed individuals often can choose between an IRA or Keogh retirement plan, because generally they are eligible for either one. Potentially, a Keogh plan would permit larger contributions than an IRA would, but caution is advised, especially for very small businesses: Keogh plans require that contributions also be made for any employees who meet length-of-service requirements. In addition, the paperwork can be a costly annoyance because detailed yearly reports have to be filed.

If you are considering a business in your home that would entail having employees, customers or clients on the premises, make sure

your homeowner's insurance includes liability coverage extending to business activities. Chances are you will have to strengthen or replace your current policy to obtain the protection you will need.

When thinking about starting a business from your home, even a part-time business, don't forget about zoning regulations. Local law may prohibit some or most types of business in your neighborhood, although sometimes it is possible to obtain a zoning variance.

Running a business from your home does not automatically qualify you for business-in-the-home tax deductions. A clearly defined portion of the home must be used exclusively for the business on a regular basis in order for you to claim home-related expenses.

If your business-at-home operations do qualify you for home-related business expense deductions, you can deduct, among other things, the portion of your rent or mortgage, maintenance, repair and utilities expenses that applies directly to the part of your home used for business. It generally is a good idea to maintain a sep-

arate business phone. Working for yourself offers many rewards to some individuals, but there are some financial disadvantages to weigh against the benefits. For example, your Social Security tax will be considerably higher than it would be if an employer were sharing the burden with you. Remember also that you will be responsible for your own fringe benefits, and you will have to pay income taxes on a quarterly basis by filing declarations of estimated tax.

if an employer were sharing the burden with you. Remember also that you will be responsible for your own fringe benefits, and you will have to pay income taxes on a quarterly basis by filing declarations of estimated tax.

Keep an outstanding person in this important job.

Treatment Minimizes Acne Scars

From the American Medical Association

Acne is a common skin condition that afflicts most people during the teen years, sometimes into the 20s.

The American Medical Association points out that something can be done about acne. Waiting to "outgrow" acne can be a serious mistake. Treatment can improve appearance and minimize the problem of permanent scars.

Acne consists of blackheads, whiteheads, pimples and sometimes small boils. It appears most often on the face, but also shows up on the back, chest, shoulders and neck.

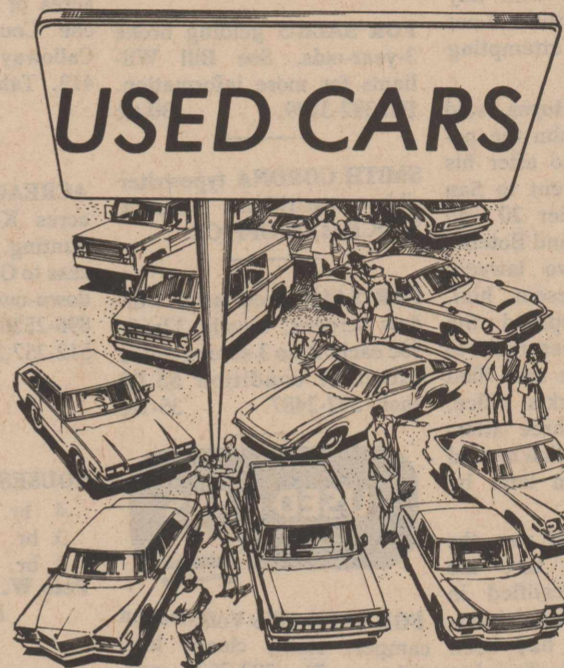

Even though treatment includes washing frequently with mild soap and warm water, acne is not a disease of dirt. It begins under the skin, not on top of it.

Acne also is not primarily a dietary disease, but some patients find that certain foods, particularly chocolate and fats, make their acne worse. However, following the strictest diet will not, by itself, clear the skin.

Lotions and creams available at the drugstore may help somewhat. It's important to read the directions on the label and follow them carefully. If the skin becomes irritated, stop using the lotion.

Medicated preparations are available to cover the blemishes. Nonoil cosmetics usually are preferable. All cosmetics should be removed at bedtime.

If acne persists despite good cleaning and proper use of lotions and creams, the physician may be able to help. He may prescribe a preparation to apply to the skin to reduce oiliness and produce mild peeling. He may open the inflamed lesions and remove some of the blackheads. He most certainly will warn against picking, scratching, popping or squeezing the blackheads and pimples. This may make things worse.

Heart Assn. Schedules Walkathon

There will be a walkathon, called the "Turkey Walk," to raise funds for the American Heart Association. The event will take place November 18. The "Turkey Walk" will begin at 1:00 p.m. from Jim's Foodway to the Texas-New Mexico Pipeline Station 10 miles west on old U.S. Highway 290.

Every entrant who brings in more than \$50.00 will receive a turkey. Trophies will be given for first, second, and third places for most money brought in, in each division. There will be three divisions: Junior High, High School and Adult.

Anyone interested should contact Betty Huffman at 392-2017 or Katrina Pullen at 392-2362.

Organizational help is being provided by Xi Sigma Omega chapter of Beta Sigma Phi.

Claude Montya is in a Houston hospital recovering from open heart surgery performed Monday.

Suit Thrown Out-

[Continued From Page One]

he did prepare the plea in abatement in answer to the present suit.

Mary Lou Scrimpscher, secretary for Luis Segura, admitted receiving the papers from Mrs. Marley September 13, in the attorney's office, and returning them to the seat of the cab. Also that she notarized all three attorney's affidavits which claimed they were neither attorney for nor agents of DeHoyos'.

DeHoyos was the next witness and it was brought out that he left Ozona for Old Mexico on August 16, and returned late on September 15, for a much needed vacation. He testified that as far as he knew his sister and his father were at his home in Ozona, and could have been served with the papers during the time Marley claimed he was unable to find anyone at the residence.

Garcia brought out the fact that DeHoyos had not to this day been served with any papers and contestee had not been diligent in attempting to serve same.

However, DeHoyos said his father gave him the petition a day or so after his return and he went to San Antonio September 20 and met with Segura and Botello. He said the two lawyers refused to represent him, but Botello prepared the papers and he returned to Ozona with them and filed them in the clerk's office, along with the three attorney's affidavits which he said were sent to him later by bus.

DeHoyos' father was the final witness to take the stand and he testified in Spanish, with Garcia interpreting, that he had been visiting relatives in San Antonio some days before September 14, or some days before the deadline for serving the papers passed. Also, that the daughter who lived with him had returned to school in San Marcos on September 3.

In his summation, Garcia asked the judge to uphold the plea of abatement because the suit had not been filed on time and his client had never received the proper notice. He also cited several cases in to compare with this one, which had been thrown out on similar grounds.

Bunton and Sherrill argued that Marley had done everything in his power to

make the service of process, and that with DeHoyos out of the continental United States for the 30 days, it was impossible to have him served. They also argued that the three attorneys were directly involved with DeHoyos in one way or another and they were proper persons to receive notification.

No appeal by Marley's attorneys had been filed as of noon Tuesday, nor had dates been set for pre-trial hearings on the other two cases Marley has on file against DeHoyos.

SHOW STARTS AT DUSK

Always glad to see you... Always ready to help...

The way we see it...you're not just our customers...you're our friends. We know how important your ranch is to you...and we'll take a special interest in helping you with your special needs...loans, management, or just a bit of sound financial advice. Let's talk.
