## Kitty's Korner

by  
Kitty Montgomery

Spring is many things to many people, and apparently in Ozona it is a time for vandals to do their thing. For some time now sign-stealing has been a specialty with them, but lately the in thing is demolishing signs and other things with pickups. The rock and steel entrance at Country Club Estates has been completely demolished by this method. I can't imagine what kind of damage this does to the vehicle being used, but it can't possibly do it any good.

These are the actions one would expect from two-year-olds, but two-year olds don't drive, so one would have to draw the conclusion it is gron-ups with two-year-old mentalities.

We didn't print a correction for the commissioners court story which told about the county having to pay pregnancy premiums on both men and women, because no correction was called for. That's exactly what they are being forced to do. Something about equal rights for the sexes. We think it's just a gimmick for the company to rake in a little more money. This is when "equal rights" gets downright silly, and I can understand the anti-ERA group. This is just one of the ways equality gets taken advantage of.

## 4-H range judges compete

Crockett County 4-H members competed in the Annual Range Judging Contest sponsored by the North Concho River and Concho Soil and Water Conservation Districts in cooperation with

Angelo State University. The junior team placed first in the contest. Kelly Sinclair was high individual and Ann Hoover was third high individual. Other team members were Mike Couch and Will Hoover.

Jody Naron was fourth high individual on the senior team. Other team members were Bubba Everett and Danny Crawford.

Mr. and Mrs. Billy Hoover and Mrs. Cydnie Corbell were coaches and leaders who accompanied the teams to San Angelo.

4-H STYLE SHOW REVUE WINNERS - These girls placed first with their garments in their divisions at the annual 4-H Style Show Revue held here Thursday night at the Civic

Center. They are, back row, l. to r., Vickie Reagor, Lydia Hayes, Pam Wilton and Felice Delgado. Front row, Judy Flores and Alma Kay Ramos.

## Annual flower show winners announced

Another successful Garden Club Flower Show was completed here last week with the presentation of the Ozona Garden Club's 21st annual show. For the first time in several years, hail failed to mar the beauty of the roses and there was an outstanding display of lovely blooms. The iris collection was equally successful.

A large crowd of local and area people attended the open hours of the show on Tuesday afternoon.

In the Design division, Mrs. J.C. Schroeder won first for the "Just for You" class honoring Mrs. Bailey Post. She also won the Tri-color Award. Other first place awards in the design division went to Mrs. Charles Williams, Mrs. Gene Lilly, Mrs. Glenn Sutton, Mrs. J.W. Howell, Mrs. Charles Williams and Mrs. Lee Graves.

Mrs. Steve Kenley won the Award of Distinction as well as the Sweepstakes Award, and Mrs. Lee Graves won the Creativity Award.

Winners in the youth division were Susan Kenley, who won a first for her fresh cut plant design, "Spring Fe-

ver," as well as the Junior Achievement Award. Jennifer Probst won a first for "Fall Fantasy," using all dried material.

Winning first place for her hybrid tea rose as well as her climber, Mrs. Herbert Kunkel won the Award of Merit in the rose section of the horticulture division. Other first place ribbon winners in the hybrid tea class were Katrina Phillips, Mrs. Beecher Montgomery and Fonda Brown. In the grandiflora class first places went to Maudie Couch, Deana Phillips and Doris Moore. Crystelle Childress won a first place in the polyantha class, and Katrina Phillips in the floribunda class. Maudie Couch won a first place ribbon in the climber class along with Mrs. Kunkel. Others showing were Carmen Sutton, Velma Marley, Mrs. Gene Lilly, Mrs. Olive Berry and Mrs. Cap West.

Mrs. J. W. Howell won the Award of Merit in the iris division and a first place ribbon for her bearded iris. Other first place winners were Fonda Brown, Mrs. Earl Berry, Mrs. Mary Lee Jones, Mrs. Lee Graves and

two first places to Mrs. Glenn Sutton. Others showing were Mrs. J. J. Marley, Mrs. Cap West, Fonda Brown, Mrs. Fleet Coates, Mrs. Charles Williams, Doris Moore, Mrs. A. S. Lock and Mrs. Cap West.

In the peony section, Mrs. Howell won the Award of Merit and a first place for her pink double peony; other first place winners were Mrs. Herbert Kunkel, Mrs. A. S. Lock, Mrs. Velma Marley and Mrs. V. I. Pierce. Mrs. Marley also won a first place ribbon for her three blooms, same variety in one container.

In bulbs and tubers, Mrs. Earl Berry and Mrs. Doris Moore won first places for amaryllis and showing was Mrs. Ira Carson. Fonda

In bulbs and tubers, Mrs. Earl Berry and Mrs. Doris Moore won first places for amaryllis and showing was Mrs. Ira Carson. Fonda Brown showed second for her Ranunculus and Mrs. Gene Lilly for her miniature glad.

In the annual section, Ruby Mitchell won first place for her pansies and Mrs. Velma Marley for her poppy. In perennials, Mrs. Olive Berry won first in the daisy with her Shasta and Mrs. Gene Lilly and Mrs. Velma Marley both placed first with Columbine. Mrs. Berry also won a first for her pinks.

## Smith infant dies

Services for Scott Ryan Smith, six months old, son of Mr. and Mrs. Ronnie Smith, former Ozonans now of Carizo Springs, were held last week.

The Smith infant died April 24, at Santa Rosa Childrens Hospital in San Angelo. He was born October 23, 1978 in San Angelo.

Survivors besides his parents include two sisters, Shelly and Kristi, both of the home and a brother, Barrett also of the home; his grandparents, Mr. and Mrs. M.L. Gery of Winters and Mr. and Mrs. C.E. Smith of Ballinger.

## 63 members in 4-H style revue

Sixty three 4-H members participated in the County 4-H Style Revue last Thursday at the Civic Center. Mary Helen Parks served as commentator, while the girls and boys modeled to a "Disco Beat." Cynthia Ramos was the chairman of this year's revue.

High scoring individuals in the 9 year old group were first; Judy Flores, Shelia Comer, second, and Myra Payne, third. In the 10 year old group Vickie Reagor placed first, Bernice Ybarra, second, and Cassie McPherson, third. Alma Kay Ramos placed first in the 11 year olds. Angelo Jones was second and Tania Berry, third. In the 12 year olds Pam Wilton was first, Kristal Parks, third. Lydia Hayes was first in the 13 year olds. Doreen Watson, second and Marla Wilson, third. In the senior group Felice Delgado was first, Melinda Hokit, second and Gail Hunnicutt, third.

Each contestant was judged on 50% for overall appearance and 50% for construction. Serving as judges were Wanda Van Hoozer, Marla Van Hoozer, Wanda Halford, Eddie Sutton from Sonora, Shirley Blakeway, Shirley Trimble, Pat Trim-

ble, and Janet Powell from Eldorado.

All 4-H members in the style revue received 4-H pins and ribbons. Members participating in the revue were Julie Cantu, Shelia Comer, Rene DeLaRosa, Judy Flores, Yolanda Hartnett, Darla Judd, Jennifer Parks, Myra Payne, Larisa Schoenhals, Patricia Wilson, Tommy Wilson, and Missy Ybarra, in the 9 year olds. The 10 year old division included Raedene Flores, Mary Lou Hayes, Amy Jones, Jerri Lynn Martinez, Cassi McPherson, Pam Miles, Vanessa Miller, Melissa Payne, Julie Reagor, Vickie Reagor, Kim Williams and Bernice Ybarra. The 11 year old group included Tania Berry, Bonnie Cameron, Donna Comer, Melissa Fierro, Angela Jones, Deana Beth Phillips, Alma Kay Ramos, Sylvia Rodriguez, Jamie Smith. The twelve year olds included Kim Baker, Kim Bishop, Tammy Cooke, Rita DeLa-

Rosa, Lydia Maldonado, Christy Parks, Maricella Payne, Margie St. Clair, Irma Tobar, Kristal Williams, Pam Wilton, and Melissa Ybarra. The thirteen year old division included Cynthia Hartnett, Lydia Hayes, Daniel Payne, Katrina Phillips, Mary Wall, Doreen Watson, and Marla Wilson. Seniors included La Dawn Adcock, Kim Buie, Oneita Carlisle, Jana Chaney, Stacy Chapman, Felice Delgado, Melinda Hokit, Wendy Hood, Gail Hunnicutt, Danita McCartney, and Jennifer Naron.

## Minister ill

Jess Hall, former minister of the Ozona Church of Christ, now retired and living in Burnet, suffered a stroke while conducting a mission meeting near Glasgow, Ky. last Monday. He is presently in Sam Pon Community Hospital in Glasgow, in serious condition.

## O.H.S. Honor Roll Announced

The Ozona High School Honor Roll was announced this week by Jim Payne, high school principal, for the fifth six weeks of the school year. Band and P.E. do not count toward the six weeks honor roll average. A student must have a 90 or better academic average to be on the honor roll, and not have any grade below a B- on their report cards. The freshman led the honor roll with 22, followed by the sophomore class numbering 15. The senior class had 15 on the list and juniors 10.

On the freshman list are Varlyn Aldridge, Shelly Behrens, Sue Ellen Black, Ernie Borrego, Mike Couch, Felice Delgado, Esmeralda Enriquez, Fernando Galvan, Richard Garza, Thomas Gries, Reinata Hedrick, John Justiss, Leanna Kramer, Adolph Martinez, Dugan O'Bryant, Larry Payne, Roland Pena, Dale Perry, Jill

Sanchez, Joyce Tambunga, Jack Thompson and Darren Warren. Honor sophomores are T.J. Carlisle, Celda Elizondo, Frank Galvan, Bert Gutierrez, Lisa Hohertz, Albert Longoria, Jesse Moreno, Johnny Sessom, Kim Sinclair, Gary Smith, Kaye Thompson, Connie Trujillo, Richard Wallace, Molly Womack and Rose Mary Ybarra. Seniors are LaDawn Adcock, Margaret Dominguez, Becky Everett, Jose Gutierrez, James Hearne, Janice Janes, D'Anna Koerth, Bobby Longoria, Alice Martinez, Clair McDaniel, Tracey Preddy, Dan Sewell, Rocky Stephens, Wayne Sutton and Karen Warren.

Juniors include Wade Beasley, Gay Burns, Chris Carlisle, Rea Lynn Dews, Deniese Hedrick, Jody Naron, Peri Pennington, Gregg Perry, Jan Watson and Jeffrey Young.

## Sawyer services in Okla.

Robert Allen Sawyer, 57, died April 30, in a Duncan, Okla. hospital. Services are being held there today.

He was born in Ozona March 22, 1922, the eldest son of the late Mr. and Mrs. Jack Sawyer and grandson of the late Bob Cooke.

He was a retired Air Force Major and for the past eight years had been a maintenance supervisor for Halliburton, stationed in the Persian Gulf.

He is survived by his wife, a son, two daughters and five grandchildren, all of Duncan, and three brothers. Mrs. Maurice Black is an aunt and Cleophas Cooke an uncle, both of Ozona.

TYPICAL SIGN VANDALISM - Ozona vandals have declared war on signs and it is costing the county time and money. This broken sign at the courthouse annex is typical of signs all over town when Monday morning rolls around

each week. The county road department collects signs left at the scene and salvages what they can. Quite often street signs just disappear and must be reordered at a good deal of time and expense.

EASTER CUSTOMS - A blue ribbon winner in the annual Garden Club flower show held here last week at the Civic Center. Mrs. Charles Williams created this arrangement for the design class named in the artistic division. More blue ribbons than usual were awarded by the judges this year in both design and horticulture.

**TEXAS PRESS**  
MEMBER 1979 ASSOCIATION

**you and the LAW**  
PRESENTED BY THE STATE BAR OF TEXAS

**Q:** A friend of mine is serving time in a Texas prison, convicted of a crime committed in 1973. The prosecutor used prior convictions to enhance his case. The District Court had previously granted a motion to void his prior convictions for enhancement purposes. Can you tell me why information from these prior convictions was permitted at his trial?

**A:** "Enhancement" in our state law is a method of increasing the possible punishment for an offense. For instance, proof of two previous felony convictions means an automatic life sentence where the defendant is convicted of a third felony. In your friend's case, although the prior convictions were voided for enhancement purposes, they could still be presented as evidence at the punishment phase of the trial to provide knowledge of the defendant's record and character before assessing punishment.

**Q:** I have approximately \$3500 in the profit-sharing plan where I work, but only about \$1500 of it is vested. If I leave the company, will this money be given to me in a lump sum, or will I only get the vested portion? Also, is there a difference in how much I would get if I were fired, or if I quit?

**A:** The vested portion entitles you to a percentage in the plan and unless the plan calls for a forfeiture you are entitled to a pro rata distribution payment when you reach eligibility.

**Q:** I live in the home my husband and I purchased before his death. I'm still paying for it. If I remarry and I allow my new husband to move in with me, and if he buys materials for the house such as a water heater or dishwasher, could he remove these items if our marriage didn't work out?

**A:** Upon marriage in the state of Texas, a community property presumption operates on all property acquired during marriage unless it was purchased with separate property funds. If the husband purchases the

appliance with his separate property then the items remain separate property and he may remove them at divorce. If the appliances are purchased with the salary of either husband or wife, then they are considered community property and in the event of a break-up, would be divisible in accordance with community property notions of divorce laws.

**Q:** In 1946 I married a navy man. He retired in April 1963 after 20 years of service. We were divorced in 1974. His retirement pay was not in the divorce decree listed as a part of community property. Am I entitled to a portion of his retirement pay, even at this late date? If so, how do I proceed to secure my share?

**A:** Retirement benefits accrued during a marriage are the community property of the parties regardless of which spouse earned the individual retirement benefits in question.

Property not divided at the time of the divorce remains jointly owned by the divorced husband and wife. You should bring an action to recover one-half of the retirement benefits accrued by reason of service during the marriage.

**Q:** I would like to find out what legal rights I have as a common law wife. We've been living together for four years, but he was divorced only seven months ago.

**A:** In Texas, a common law wife has exactly the same rights as a wife whose marriage was contracted through a ceremony. However, only a party who is unmarried can contract either a ceremonial marriage or a common law marriage. Therefore, under the facts given in your question the common law marriage did not commence until seven months ago when he received his divorce from his former wife.

Send your questions to "You and the Law," State Bar of Texas, P.O. Box 12487, Austin, 78711. Answers may appear in columns in hypothetical terms; personal answers not possible.

A re-run of "The Ozona Story" as gleaned from the files of "The Ozona Stockman"

Thursday, May 4, 1950

Den 2 Club Scouts enjoyed a hike and picnic supper Tuesday afternoon. Glen Sutton accompanied the Cubs on the hike and parents joined in the picnic. Cubs making the hike included Michael Miller, Bobby Sutton, Jan Parkhill, Chris Hagelstein, Bobby Hicks, Danny Parker, Howard Mock and Kenneth Deland.

**29 yrs. ago**  
Children of the kindergarten department of the Methodist Church School are enjoying week-day afternoon sessions this week under adult leadership. Children participating were Mary Grace Chandler, Robin Jones, Sharon Childress, Cheryl Clayton, Martha Burt, Judy Black, Abe Caruthers, Jr., Frank Childress, Fletcher Coates, Michael Ellis, Helen Henderson, Carol Wood, Carol Jones, Janet North, Glenda Friend, Betty Baggett and Chloe Everly.

**29 yrs. ago**  
Pupils of Mrs. William A. Bergfield held a piano recital at North Elementary last Tuesday evening. Pupils include Tommie Sue Chandler, Nancy Friend, Janie Odum, Johnny Jones, Sally Baggett, Joe Warren Friend, Noni Conklin, Catherine Guthrie, Tommy Stokes, Joe McMullan, June Bunger, Jimmy Williams, Joan Bower, Ray Robison, Barbara Ann Jones, Bobbie Norris, Alleane Young, Jacob Young, Stanley Williams, Mary Jo Ward and Mark White.

**29 yrs. ago**  
The Senior Class sponsored a Mexican supper Monday at the Community Center.

**29 yrs. ago**  
Members of the Senior Class will present their second and final class play in the high school auditorium next Monday at 8 p.m. Members of the cast include Mary Ann North, William Meinecke, Joan Holt, Charles Cunningham, Frankie Chapman, Billy Raye Oden, Tommie Laxson, Kay Kirby, Vivian Stratton, Marilyn Hubbard, Joe Lou Brewer and Judy White.

**Snips, Quips and Lifts**  
By Lottie Lee Baker

Did you know that life is just like an onion? You just peel off a layer at a time, and sometimes you weep.

Middle-age is when things you bought with a life-time guarantee begin to wear out.

Those who can laugh at troubles must be having a delightful time nowadays.

Things get more complicated each passing day. Remember when every question had only two sides.

The best way to lose a friend is to tell him something for his own good.

"Virus" is a Latin word used by doctors, meaning "Ypur guess is as good as mine."

The man resting on his oars will soon find himself drifting.

No one cares about the sobbing except the one who is sobbing.

If there is scarcity of happiness in this world, it is because more people try to share it than produce it.

Most of us are willing to face the music if we can call the tune.

Nothing arouses more false hope than the first day of a diet.

Change is why a dime is worth a nickel now.

Always put off until tomorrow what you shouldn't do at all.

**Take a bow GEORGE**  
OR when WASHINGTON crossed the DELAWARE he laughed all the way to the banks

What George wanted to do was cross the Delaware on Christmas morning, surprise the British, and secure a badly needed victory.

What he needed was boats. Specially designed boats that could hold fifteen tons of men and artillery. That could move in either direction. Boats that had a draft of not more than 20 inches.

Happily, Robert Durham, a new American, had already designed and built them.

And other new Americans invested their cash to buy them.

And Washington sailed into a victory that turned the tide of the Revolution.

Today, millions of Americans can invest in America and come out winning, too.

Just sign up for the Payroll Savings Plan at work. That way, a little is set aside to buy Bonds for you. Regularly. Automatically.

Buy U.S. Savings Bonds today. You'll have smooth sailing tomorrow.

Now E Bonds pay 6% interest when held to maturity of 5 years (4 1/2% the first year). Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

**4-H horse judging teams**

Crockett County 4-H Horse Judging teams competed in the District 6 Horse Judging Contest held in Midland on Thursday, April 26.

The junior team placed second and the senior team placed third. It was a good close contest and both teams were only a few points out of first place according to County Extension Agent Billy Reagor.

Mrs. Paula Bailey and Mrs. Lorelei McMullan were the coaches of the teams. Other adult leaders attending the contest were Mrs. Gloria Bishop and Mrs. Pam Acton.

On the junior team, Bobbie Acton was high individual in oral reasons and Curt McPherson and Christy Parks were tied for third high. Kim Bishop was the fourth team member. Alternates were Marty Acton, Peggy Skains, and Shelia Comer.

On the senior team, Ed Hale was high individual in oral reasons and Cliff McMullan was third high. Les Hale and Lori Clayton were other team members and Will M. Black was the alternate.

**STATE CAPITAL HIGHLIGHTS**  
By Lyndell Williams  
TEXAS PRESS ASSOCIATION

**AUSTIN --** After sometimes petty, sometimes passionate debate, the Texas House this week passed a beefed-up version, at least where salaries are concerned, of a state budget.

The price tag on the House spending plan for 1980-81 is \$20.3 billion. Gov. Bill Clements says that's about \$600 million too much. House members increased various salaries by almost \$200 million. Clements had made it clear long before the House began its work that he was against many of those pay hikes.

It took the House four days and part of a fifth to finish the initial step in the appropriations process that now moves on to the Senate. Afterwards, the budget will probably be hammered out in a conference committee, and then, the governor must approve it.

Acting as if they didn't know Clements had threatened to veto teacher pay hikes that exceeded 5.1 percent, House members voted teachers a 7 percent raise for 1980 and 1981, on top of step increases. That amounts to a 20 percent increase in pay for teachers over the next two years. Teachers say that will just about keep them up with the inflation rate.

The House also approved raises for Department of Public Safety troopers (40 percent, state employees who make less than \$20,000-a-year (seven percent), district judges (14.8 percent) and district attorneys (36.7 percent). It must be pointed out that everytime legislators raise district judges salary, they raise the amount of their own retirement pay which is based on a certain percentage of a district judge's yearly salary.

When the House was finished only \$530 million in state funds was left unspent. Remember, school finance is still to come.

After several emotional speeches, the tedious work of approving the two-inch thick appropriations bill crept along punctuated by a bomb scare that came at the end of a long day of debate, legislators giving the "Hook'm Horns" sign and singing the "Eyes of Texas" when discussing teacher salaries at UT.

**Wiretap Bill**  
Wiretap legislation that Clements supports emerged from a Senate subcommittee this week even though the bill's author had pronounced the legislation "dead" only a week before. The bill would legalize electronic surveillance in hard drug cases. Sen. Ed Howard, sponsor of the wiretap legislation, appeared to have the votes necessary to move the measure out of the Jurisprudence Committee and onto the Senate floor.

And, when more than 5,000 union workers descended on the State Capitol this week, chanting "Kill that bill" in protest against legislation that would repeal the prevailing wage law, Clements, true to his earlier statements, said he had no opinion on the bill. "I do have an opinion about them being a little quieter," Clements said jokingly while tradesmen in hard hats and carrying their lunchpails swarmed over the Capitol Building in one of the largest protests since the days of the Vietnam War.

**Short Snorts**  
Those who had been biting their fingernails over an economy that had grown by 6.9 percent in the final quarter of 1978 breathed a sigh of relief this week when numbers released showed a growth rate of only 0.7 percent in the first quarter of this year. The "overheated" economy that had been roaring along at the end of 1978 was supposedly one of the contributing factors to the ever-increasing inflation rate.

Another economic note—statistics released this week show major corporations with hefty increases in their profits during the first quarter of this year.

**The Governor**  
At almost the same moment Gov. Clements was announcing at a press conference that he wouldn't say what he would do if the Legislature passes to his desk a separate presidential primary bill, the House was attaching a rider to the appropriations bill that would prohibit the use of state funds for any primaries other than those in May.

Clements, who in effect

**Tips For Gardeners**

From the Ozona Garden Club by Mrs. Bailey Post

May weather means summer for most of us.

During the summer months, gardeners must give top priority to watering, weeding, and mulching. Pest control is the next problem. There's still plenty of time to plant annual flowers and warm-season vegetables, but try to complete these tasks before the weather gets much warmer. Flowers are not the only route to summer color in the garden. Try some foliage annuals to spice up the garden. Some of the easiest to grow in the sunny garden are copperleaf (acolypha) and amaranthus. In shady areas try coleus, caladiums, or elephant ears.

Caladiums can provide a colorful show for the summer garden. They come in various shades of pink and combinations of red, pink, green and white.

Our nights have been so cool the soil hasn't really warmed up well enough to plant caladiums, but it shouldn't be long before soil temperatures are 70 degrees. They can be planted in annual beds or along walks, terraces, and borders. Mass plantings of caladiums are also very striking because of the unusual nature of the foliage. In most cases, avoid salt and pepper mixtures of bulk types, or you will lose the beauty and impact of the colorful foliage.

Plant caladium bulbs about 12 inches apart and from 2 to 4 or 5 inches deep depending on the size of the bulb, and location. If in a windy place, plant a little deeper to avoid pulling them out of the soil which should be rich and well drained.

To keep caladiums in good condition, be sure that they are kept moist. Mulching will help retain moisture in the soil. If planted in pots they may need water twice daily.

The 1979 planting days for above ground crops are: 1-2-8-9-10-25-28-29 and for Root Crops the days are: 11-12-15-16-19-20-23-24.

You missed a real treat if you didn't go to see last week's annual Flower Show. We were surprised to have as many beautiful horticulture specimens to exhibit. Our new members with the help of the older ones went all out to more than fill the design classes. I deeply appreciated one of the classes "Just for You" in my honor and Kitty's remarks.

Mr. and Mrs. William G. Morlock of Dallas announce the engagement and forth coming marriage of their daughter, Laura, to Mr. Drew M. Ingram, son of Mr. and Mrs. Huey D. Ingram of Ozona. A July 7th wedding is planned at the Christ The King Catholic Church in Dallas. Miss Morlock is a May graduate of Texas Tech University with a Bachelor of Science Degree in Home Economics. Drew is also a May graduate of Texas Tech with a Bachelor of Business Administration and will be employed with the N.C.R. Corporation.

**Cancer's warning signals Ms. Williams is bridge club hostess**

"You can't prevent cancer by keeping it out of your mind," declared Mrs. Eddy Nations 1979 education information chairman for the Crockett County Unit of the American Cancer Society. "Then there are those who believe that if they do get cancer they are inevitably doomed, so they refuse to think about it. For all these folks, cancer is more likely to be uncontrollable because its early warning signals were ignored," she said.

"The American Cancer Society urges everyone to practice caution instead of brooding over the possibility of getting cancer," the ACS leader said. "Remembering the word caution is a good way to remember cancer's warning signals because the first letter in each signal spells it out."

The seven-cancer warning

- signals are:
- Change in bowel or bladder habits
- A sore that does not heal
- Unusual bleeding or discharge
- Thickening or lump in breast or elsewhere
- Indigestion or difficulty in swallowing
- Obvious change in wart or mole
- Nagging cough or hoarseness

**DUPLICATE BRIDGE**  
Winners in Duplicate Bridge Club play at the Country Club Saturday were Mrs. Gene Williams and Mrs. John Childress. Sunday winners were Mrs. J.B. Parker and Mrs. Ann Mayfield and Mrs. Bob Bailey and Mrs. Brock Jones, second.

Mrs. Byron Williams was hostess for bridge at the Country Club Thursday. Mrs. Gene Williams won high and Mrs. C.O. Walker second high. Mrs. Charlie Black was low and Mrs. John Childress won the bingo. Others playing were Mrs. Clay Adams, Mrs. Bob Bailey, Mrs. George Bunker, Mrs. Billy Carson, Mrs. Bud Cox, Mrs. James Dockery, Mrs. Joe Friend, Mrs. Arthur Kyle, Mrs. Dave Matney, Mrs. Ann Mayfield, Mrs. Larry Braden, Mrs. Kirby Moore, Mrs. Hillery Phillips, Mrs. Evert White, Mrs. Charles Williams, Mrs. Jack Williams, Mrs. J.B. Parker, Mrs. Joe Bean, and Mrs. Cuatro Davidson.

**Nourishment necessary for relationships**

Everybody needs somebody most of the time, Dorothy Taylor, a family life education specialist, says.

The positive support a loved one gives builds security and respect in another person whether it be a husband-wife, parent-child or friend-friend relationship.

There are five basic elements of nourishment or support that contribute to self-esteem:

The ability to listen and to be listened to.

A minimum of criticism and rejection about the person, his ideas or his life goals.

A maximum of positive reinforcement and indications of concern.

The willingness to express love feelings (not sexual love) through touching and sharing.

Willingness to give and take, otherwise, a one-sided relationship burns out a person.

However, when a person does not get reinforcement from his closest relationships, he needs to look at who is nibbling away at his life.

Then, he can look at how that person is destroying him.

Persons most vulnerable to destruction by others are those who:

Don't think critically--they don't see consequences.

Are not realistic--they think things happen only to other people but not themselves.

Do not know what they love in life and fritter away their lives in trivia.

Lack will-power.

Feel they don't deserve anything better out of life than what they are getting.

**Debra Says**

By Debra Price

Window shades do powerful "blocking"--for energy-saving touchdowns.

They block out heat during summertime and block in heat during winter months.

Opaque, light-colored shades block air flow better than draperies and venetian blinds, saving up to 21 cents on every home-cooling dollar and eight cents on each home-heating dollar.

Since glass in windows conducts heat, window shades save energy by blocking the passage of heat through the glass itself.

Window shades reduce heat gain in a home from the summer sun by 63 percent, and they prevent 24-31 percent heat loss in the winter.

For maximum energy-saving, install window shades inside the window frame about one inch from the glass.

That sets up an effective

barrier between the glass and the shade. The one-inch of dead air space acts as insulation.

Be sure the shade "fills" the window space as much as possible, leaving only the narrowest margin possible between the shade and the window frame.

For the biggest energy savings in the summer, pull shades down during hot, sunny parts of the day.

That will deflect the sun's hot rays and keep their heat from building up inside the house--and that will save home-cooling energy.

Raise the shades during early morning, evenings and nights--to allow cooler air inside and reduce the need for air conditioning.

For big energy savings during the winter, keep shades down during the winter, keep shades down during the coldest hours of the

day--early morning, evenings and nights--to keep indoor heat locked inside the home. Raise the shades during the warmest parts of the day and let the sun's heat help warm the house.

**JIFFY OATMEAL CRUNCH**  
(Easy enough for kids to prepare)

- 1/2 cup butter or margarine
  - 3/4 cup firmly packed brown sugar
  - 1 teaspoon vanilla
  - 1/2 teaspoon baking soda
  - 2 cups quick oats, uncooked
  - 1 cup raisins
- In large skillet, melt butter and brown sugar. Remove from heat and stir in the remaining ingredients. Spread into greased 13X9 inch pan. Bake at 350 degrees for 15 to 20 minutes. Cool, then cut into squares. Makes 2 1/2 dozen.

**CREATIVITY**

Only man can create with his hands, making beautiful things from the substances that come from God's earth. Only man can truly reason. Only man can run the full gamut of feeling from joy and victory to despair and defeat.

We are complex creatures, because we can create and reason and feel. Sometimes it seems virtually impossible to bring our faculties into a sensible focus. Everything from unpaid bills to vital decisions affecting ourselves and our loved ones seems to be just a step ahead of us. We are eternally running to keep up, and often falling short.

No one ever said that we had to go it alone. The Church isn't a crutch but it is a sanctuary, a place where souls are healed. Have you been there lately?

# Texas Sheep

&

# Goat News

Predators were responsible for a much higher percentage of sheep and goat losses in 1978 than in 1967. So says a recent survey conducted by the Texas Crop and Livestock Reporting Service.

The survey, initially requested by the Texas Sheep & Goat Raisers' Association, showed that predators caused 58 percent of all sheep and lamb losses in 1978 compared to 25 percent in 1967. Seventy-two percent of all goats and kid deaths in 1978 were attributed to predators, compared to 45 percent in 1967.

Coyotes were the worst offenders, taking 24 percent of all sheep and goats lost. Eagles, contrary to popular opinion, were next, accounting for 20 percent of all goats and kids and 14 percent of all sheep and lambs lost. Bobcats took 19 percent of goats lost and 15 percent of sheep lost. Red fox and dogs picked off a few percentage points in both categories.

Overall, predators cost Texas producers an estimated \$13 million in losses in 1978, roughly 62 percent of all such losses. This is only a partial estimate, however, because it fails to take into account the losses on wool and mohair, a substantial portion of total sheep production income and by far the most important source of income to Angora goat producers. Because of the buyer-dominated market system encountered in livestock production, stockmen are unable to pass these losses on to consumers.

More than two-thirds of the producers polled reported employing some form of predator control. Trapping was the most common method and the one considered

## Reduce investment risks

Knowledge, proper planning and commitment can reduce the risks of real estate investments, says a Texas Agricultural Extension Service economist.

Dr. Richard Floyd says that licensed real estate professionals provide the expertise needed to assist real estate investors. "They help the investor complete an investment analysis, arrange financing, negotiate purchasing terms, close the deal, develop operating guidelines, rent the property, and cash in after the desired holding period."

"Since quick liquidation may result in losses, it is important that real estate investors be ready and willing to stay invested," emphasizes Floyd. "To the uninitiated, real estate investment can be similar to a mousetrap—easy to get into but difficult to get out."

Real estate does offer the small investor advantages of leverage, tax shelter and inflation protection. Combined, these factors produce an excellent overall return, contends the economist.

Should real estate be one of your investments? "Only you can answer this question," says Floyd. "But one thing is certain. No returns can be earned unless you decide to invest both time and money."

Looking at the whole realm of real estate investments, Floyd philosophizes: "Insure, invest and spend the rest."

most effective. The M-44 cyanide ejector was used by only 14 percent of respondents and was reportedly considered least effective. Producers as a whole generally stated that the government ban on predicide 1080 in the early 1970s cost them their most effective control tool.

The 1080 ban also corresponds with the survey's overall finding that predation since that time has been responsible for a greater percentage of losses than prior to that time.

The survey was mailed to 1476 producers and received 81 percent response. Of the less than 300 producers who failed to respond, only 29 actually refused to answer the survey questions when contacted by telephone. The remainder could not be reached by phone, suggesting primarily incorrect address and telephone information.

The Texas Sheep and Goat Raisers' Association considers

the survey a valuable step forward in proving the stockman's predator case to a public often either skeptical or unconcerned. There will, of course, be skeptics who will contend that the survey was biased because it relied on the response of stockmen. TS&GRA feels, however, that the various necropsy sessions conducted under the Operation Dead Lamb program should be ample proof that stockmen are more knowledgeable about the causes of loss than the general public gives them credit for.

Perhaps rancher-biologist Bob Ramsey summed it up best when he asked who knows more about playing conditions on a local golf course...the big-name player who visits once a year, or the local pro who makes his living there? TS&GRA opts for the local pro...he doesn't earn the publicity or the big purse, but he knows his own turf.

## Cattle prices to go up even more

With a decline in cattle numbers, cattlemen can look for improved prices into the 1980-84 period, says a livestock marketing specialist.

Dr. Ed Uvacek with the Texas Agricultural Extension Service says there are fewer cattle and calves on farms and ranches now than a year ago as well as fewer beef cows and replacement heifers.

"All this points to improved cattle prices for the next

## Dethatch for grub control

The layer of living and dead roots, stems, leaves, and stolons of grass that form under turfgrass is referred to as thatch. Moderate amounts of thatch (1/2 inch for bermuda grass types and 1 and 1/2 inches of St. Augustine types) adds resilience to the turf, reduces compaction of the soil surface, and prevents soil erosion. Excess thatch reduces water infiltration, creates shallow-rooted turf, encourages insect and disease infestations, and makes mowing difficult.

Thatch accumulation reduces the effectiveness of insecticides now used to control white grubs in lawns. The insecticides applied to lawns do not move easily through thatch because they are adsorbed (bound) to thatch and thus do not reach the area in which grubs are feeding in sufficient concentration for an effective kill.

Dethatching should be done every two or three years in early spring (at green-up time) by vertical mowing in two or more directions. If dethatching equipment is not available from local outlets then a rotary lawn mower blade may be converted into a dethatching blade by adding one inch long vertical teeth or spikes to the ends of the blade.

Bermuda grass may be detached down to soil level but a matt 1 and 1/2 inches thick of healthy stolons (stems) must be left for St. Augustine grass since it has no underground rhizomes from which to rejuvenate.

All thatch loosened by vertical mowing should be removed from the lawn.

## Damaged pastures need quick energy boost

Warm season pastures took a beating the past year due to heavy livestock grazing and severe cold weather. But some quick action can get them back in shape, contends Don J. Dorsett, forage specialist with the Texas Agricultural Extension Service.

"Alternatives are to leave the pasture alone to recover on its own over a period of

years or to promote fast recovery, beginning with a good fertility program. Fertilizer will sustain damaged pasture until top growth and root systems can redevelop," explains Dorsett.

For an accurate inventory of fertility needs, take a soil sample, suggests the specialist. A general recommendation for areas not deficient in potassium is to apply

no less than 50 pounds of nitrogen and 40-50 pounds of phosphorus per acre. On hay meadows, double rates for the first application. In potassium deficient areas, put down at least 80 pounds of potassium for every 100 pounds of nitrogen.

"Weed control is the most obvious need after a fertility program," points out Dorsett. "Severe winter weather broke the dormancy on many weed seeds as well as weakened grasses, thus causing increased weed problems. Controlling weeds eliminates competition between weeds and grass for light, space, moisture and nutrients, allowing pastures to recover more quickly."

Deferred grazing can also be used to encourage recovery, says the specialist. Allow about six inches of forage leaf buildup.

Plants manufacture their own food source through the leaf surface since they do not use fertilizer elements directly. Instead, plants absorb fertilizer into their leaves where photosynthesis occurs to make plant food.

Over the next 120 days, pastures will recover faster with a good fertility and weed control program and some deferred grazing, Dorsett emphasizes.

Consider planting deciduous trees on the south and west sides of the home. As they grow, they'll shield the home from the hot summer sun and reduce the demand on air conditioning equipment.

## Season affects forage quality

Season has much to do with forage quality in warm weather grasses.

Dr. E.D. Holt, forage researcher with the Texas Agricultural Experiment Station, Texas A&M University System, says Coastal bermudagrass quality, for example, may drop as much as 25 percent from early May to July and August. Quality can then increase in late August and in September and reach the levels of late May or early June.

South Texas studies with Coastal Bermuda showed a spring-to-summer digestibility decline of 18 percent, with a recovery of 9 percent in early fall. Changes were smaller in other species but follow a similar pattern.

Holt says such seasonal trends are not restricted to bermudagrass. Summer-harvested weeping lovegrass, for example, may sag 15-18 percent in digestibility compared to April and May forage. Again, some recovery in quality occurs in September, depending on variety and weather.

In South Texas, research on kleingrass, buffelgrass and Pretoria 90 bluestem has shown similar results.

Sorghum-sudangrass hybrids grown near Dallas in

1977 and harvested at comparable states of maturity decreased in digestibility from the first harvest in June to the second harvest in July, and increased with the final harvest in September.

"The decreases were in the order of 7 to 10 percent, and the fall increases ranged up to 7 percent," Holt points out.

What can be done about seasonal effects on hay and grazing programs? Here are Holt's suggestions:

Harvest or graze forage at the proper time or age to avoid the increasing effect of maturity on quality reduction. Use top quality varieties. Even though better varieties also will drop in quality during the summer, they will not decrease as much as lesser varieties will.

"We are attempting to develop improved quality varieties as well as varieties which show less change with the environment," Holt notes.

Try to protect harvested hay from rain, high moisture content, poor storage and similar conditions.

Try to fit livestock grazing to the forage quality pattern so that low quality forages are used for maintenance of mature animals.

## Enjoy a thicker lawn — and save money too!

- America's favorite lawn fertilizer
- Contains iron to prevent yellowing
- Helps grass multiply itself
- Long-lasting
- Will not burn grass—just use as directed

# Mental Health Month

"There is a large, metal bell, at our national office, which was cast from the shackles and handcuffs that once bound mentally and emotionally disturbed people," said Shirley K. Camfield, president of the Mental Health Association in Texas.

"This bell is now a symbol for the Mental Health Association, ringing out hope for the mentally ill and victory over mental illness," she said.

During May, Mental Health Month, Bellingers will be collecting to help the association continue their work.

Linda Sessoms of Ozona will be coordinating the drive in Ozona.

The association's logo, used in conjunction with the slogan "Citizens Who Do Make A Difference" stresses strength through unity, while making full allowance for individual differences.

The logo depicts a group of people standing with hands joined, forming an unbroken circle. In the center is the Mental Health Bell.

The changing shades of people, overlaid on the changing shades of the world in which they live, suggests the power of different individuals united to change conditions: The unbroken circle of people suggests togetherness and unity of organization.

The circle of people with heads towards the bell suggests the many heads concentrating together through an organization trying to find solutions to problems.

That mental health is a full-time, year-round activity is suggested by the fact that there are 12 people forming the circle.

During May citizens here can "make a difference" by contributing to the Mental Health Association.

## The Scientists Tell Me ...

### Petunias Bloom Better If Properly Fertilized

By Robert L. Haney  
TAES Science Writer

Petunias grown in hanging baskets or other containers will greatly increase their number of blooms if fed properly, according to recent research findings.

While this lovely flower, so widely popular for both home and commercial landscape use, will grow under adverse conditions, it will thrive if given the right amount of plant food and water.

However, the increasing use of container-grown petunias has pointed up the need for specific information on proper fertilization.

Experiment Station scientists at the Texas A&M Research Center in Dallas have found that lime has a pronounced influence on fertilizer response of petunias grown in an equal mix of peat and perlite.

"When flowers are grown in such a medium, nearly all fertilizer elements must be supplied, and on a regular basis," according to Dr. Billy Hipp, an Experiment Station soil chemist at the Dallas Research Center.

Because homeowners and commercial nurserymen alike spend millions of dollars each year on container-grown flowers, it's imperative we learn more about this growing phase of horticulture.

Hipp and Dr. Phillip Colbaugh have concentrated a part of their research on petunias because of this flower's perennial, and growing, popularity. Colbaugh is an Experiment Station plant pathologist dealing primarily with diseases and other problems of turfs and ornamentals.

Gallon-size plastic pots were filled with a mix of equal amounts of peat and perlite.

In half the pots, 2 teaspoons of lime was mixed into this artificial "Soil." This made the soil either slightly acid or neutral.

One common garden petunia seedling, pinched back to 2½ inches high, was transplanted into each pot.

Pots were watered three times each week with each pot getting enough water to result in ½ to 1 pint of water drainage each time.

Various levels of water-soluble fertilizer were tested, but the most effective for bloom production was 1½ teaspoonfuls of water-soluble 20-19-18 (with micronutrients) in each gallon of water at every watering during the first 43 days of plant growth. After 43 days the fertilizer rate was doubled due to the increasing demands of the plant.

The 20-19-18 is the relative analysis of N (nitrogen), P (phosphorus), and K (potassium) shown on the fertilizer package.

Hipp says since this is almost a balanced fertilizer, that he would expect to get about the same effect with 3 teaspoonfuls of 10-10-10 or 12-12-12.

But, he is convinced that there are several keys to success with this program that are critical. One, is the use of lime to increase availability and usage of other nutrients.

Second, is the use of water-soluble fertilizer which dissolves readily and is quickly available to the plant roots.

The third key factor is the use of fertilizer with micronutrients. Hipp says these other nutrients in small amounts are essential to any plant grown in such essentially sterile soil.

The fourth key factor is to double fertilizer rate after 43 days.

Results were dramatic. At 66 days, plants produced 74 blooms each while growing in limed media with ideal rate of fertilizer.

Unlimed media, with fertilizer, produced 28 blooms per plant at 66 days.

So, the 74 blooms per plant produced by use of both limed growth media and ideal fertilization rate was several times that produced by either growth media alone.

Lt. and Mrs. Danny Wade of Laughlin AFB, Del Rio, spent the weekend here visiting her grandparents, Mr. and Mrs. Evert White. Lt. Wade was recently transferred to Laughlin, where he will be a flight instructor.

## Royals win one, lose one

The Ozona Royals split a double-header with the San Angelo South Side Lions, Sunday.

In the first game San Angelo won 11-1, with Jim Carson hitting a grand-slam home run. David Winger was winning pitcher and Richard Sanchez took the loss.

The Royals dropped behind in the second game 3-4 in the bottom of the 4th inning but scored 3 runs to overpower the Lions 6-4. Orlando DeHoyos hit a home run to add to the thriller. Jimmy Ortiz took the win with David Lonke the loss.

The Royals will have another tough game next week when they host the Alpine A's, Sunday at 1:30 here in Ozona.

# New anti-cancer drug tested

A man-made anti-cancer chemical has been designed by a scientist at Texas A&M University here to control and possibly cure a deadly type of cancer in children that arises from a primitive nerve cell that never fully developed.

A pharmacologist, Dr. Chung Y. Chiou who contrived the new compound, said it has completely cured neuroblastoma in mice in his laboratory. His research is supported by an American Cancer Society grant.

Dr. Chiou, who is Professor and Head of the Department of Pharmacology and Toxicology at the University, has completed animal studies with his compound designated BrACH which stands for "bramocetylcholine," a combination of chemicals that are especially attracted to the neuroblastoma cell.

BrACH was man-made to bind to a receptor on the neuroblastoma cell surface which normally attracts a vitamin component. Once the chemical bond occurs, it is irreversible and this reaction blocks the cancer cell's reproductive ability.

More than 40 per cent of the mice with neuroblastoma treated with BrACH were cured of their cancers, Dr. Chiou reported. They were treated with doses of the compound comparable to 10 milligram doses for children which, the scientist said, should produce only minor if

any side effects in human patients.

The deadly nerve cancer which affects children, usually 2 to 5 years of age, develops from a primitive cell that fails to complete its

transformation into a normal nerve cell for a particular role in the human system. During the first few years of life, the crude nerve cell is subject to some unknown stimulus that alters it into a cancer cell.

Until now no cure has been found for neuroblastoma. Dr. Chiou thinks the clinical trials which will start later this year will find BrACH just as effective in humans as it is in mice.

### Crockett County Care Center News

By Joan Nicholas  
Activities Program Director

Winners of the week were Eleanor Bradford, first, in Dominoes; Ola Mills and Ruby Cooksey tied for second place, and this Monday at table No. 1 Ruby was first and Eleanor Yeager second. Table No. 2 saw Paul Cavin in the lead with Eleanor Bradford close behind.

In Bingo the weekly \$5.00 gift certificate donated by Watson's Department Store was won by Leona Harris and Carlota Villareal won a second prize. The monthly \$10.00 gift certificate was won by Eleanor Bradford, donor Baker Jewelers. This is the game in which all who have not won during the month compete.

Tuesday is a full day for everyone; after ceramics in the morning, a large group was taken to the flower show sponsored by the Ozona Garden Club in the Civic Center, and then there was bingo at night.

Mrs. Farris and some of the aides assisted in wheeling several of our residents over to the show and, thanks to the prompt action of Commissioner Williams, a ramp was made up to the sidewalk at the Civic Center in time for the show. We are most grateful as there are quite a few functions during the year to which our residents would like to go.

Those going to see the beautiful flowers were: Paul Cavin, Swede Lundgren, Ola Mills, Ruby Cooksey, Mike Pena, Jessie Deaton, Gertrude Daniels, Juana Hernandez, Frances Borrego, Leona Harris and Evelyn Bryant. Swede was so fascinated by the show he wanted to touch all the arrangements to see if they were real! Most people take these events more or less for granted as they come along, but for our group they are really very special events.

We were happy to welcome Ruby Cooksey to our Bible class on Wednesday morning, and we hope it was the first of many more times to come.

We have another new resident, but one who is famil-

iar to us all—Elvira Pena has joined her husband Mike. She recently underwent surgery in San Angelo.

August Prugel is also back with us after his hospital stay and came to the reading and discussion group on Friday afternoon for the first time. After reading some items from Texas Highways magazine—one being about Governor Hubbard weighing 400 pounds and we debated as to whether his office chair survived his term in office! Other items from Reader's Digest were included and then a discussion about various pets we remembered. August remembered that there was always a pet lamb or calf around the house, being raised by hand. Gertrude Daniels had a pet chicken and when it was put on the table, hungry as she was, she couldn't eat a bite!

We thank all volunteers serving during the week and those who brought in bouquets of flowers.

### OHS Jazz Ensemble runner-up

Tuesday, April 24, the Ozona High School Jazz Ensemble participated in a festival in Sonora. The Jazz Ensemble received runner-up in the festival. There were seven schools participating in the festival. Members of the OHS Jazz Ensemble chosen for the All-star band were Kristi Kirby, Karen Keilers, Sheri Moody, and Robert Buckner.

### Wilda Martinez is Cinco De Mayo Queen

Wilda Martinez will be crowned Saturday night as 1979 Cinco de Mayo Queen of Our Lady of Perpetual Help Parish in Ozona. Wilda is the daughter of Mr. and Mrs. Rudy R. Martinez. She is a junior at Ozona High School.

Runner-up in the contest is Michelle Martinez, daughter

of Mr. and Mrs. Luis Martinez. Michelle is a sophomore in Ozona High School.

The announcement of the winners of this year's campaign culminates a two-month effort on the part of the Church's organizations to raise funds for the support of the Church. The Lady's Society, chaired by Mrs. Lupe Galvan, sponsored Wilda Martinez as their candidate; the Men's Society, whose president is Mr. Joe Ortiz, sponsored Michelle Martinez.

"I would like to take this opportunity to thank our parishioners who have worked so hard and been so generous during this year's campaign," said Father Larry Droll, pastor, during the announcement of the winners. "But I would also—and in a very special way—like to express the Church's gratitude to the business community and the people of Ozona and the surrounding area who have participated so generously in this year's events."

The Cinco de Mayo Fiesta will be held this weekend at the Church. Saturday's activities will include a Mass of Thanksgiving at 7:30 p.m. Wilda Martinez will be crowned at 9:00 p.m. at the beginning of a dance.

On Sunday, a bar-be-que goat lunch will be served beginning at noon, for \$2.00 a plate. At 2:30 p.m. a parade will form, including floats, decorated cars and bicycles, and horses. Prizes will be awarded for the best in each category.

After the parade, there will be bicycle and skateboard and foot races for the children. The fiesta will conclude with a "tardeada," an informal afternoon party on the Parish Hall patio.

### Softball team to organize

A meeting will be held Monday, May 7, at the Granny Miller Hall at 7 p.m. for all women interested in forming a women's softball team.

Players must be 15 years of age or over. For more information call 392-3576 or 392-3614.

### GIRL TO ROLLWITZ'

Mr. and Mrs. Curtis Rollwitz, former Ozonans now of Levelland, are the parents of a daughter, Melissa Dawn, born April 18 at 1:50 p.m. in a Levelland hospital. She weighed seven pounds and five ounces.

What's the difference between dough and batter? Douth is any mixture thick enough to roll or knead. A mixture that is thin enough to pour or drop from a spoon is known as batter.

## Wildcat set, confirmers finaled

Joe McGuire, Midland, filed an amended application to deepen to old total depth of 8,400 feet at the former Loyd H. Smith, Inc., No. 1 George Bean, Crockett County wildcat, one location east-northeast of San Andres gas production in the shallow Donham multipay field, two miles south and slightly east of the depleted Ellenburger gas and oil opener and lone producer from those pays in the Wyatt multipay field, 2 1/8 miles northwest of the two-well Pikes Peak Draw (Canyon gas) field and 14 miles northwest of Ozona. It is the No. 1 Joe F. Bean, South.

Operator filed application to plug back to 1,500 feet Oct. 25, 1977, however, that permit has expired. It was abandoned Feb. 3, 1956.

Location is 660 feet from the south and 1,980 feet from the west lines of 34-UV-GC&SF.

The Ellenburger opener, Lion Oil Co. (now Monsanto Co.) No. 1 Shannon, drilled to 7,708 feet, was finaled June 19, 1952 for 192.5 barrels of 38.4 gravity oil, with gas-oil ratio of 365-1, through perforations at 7,380-708 feet.

Suburban Propane Gas Corp., Midland, completed two 7890 Pennsylvanian gas producers, surrounded by that pay in the Davidson Ranch multipay field of Crockett County, eight miles southeast of Ozona.

Both projects, originally scheduled by Delta-Suburban, also were scheduled to 9,400 feet as confirmers to the DePaul (Strawn) gas field.

The No. 2 Meybin was finaled for a calculated, absolute open flow of 2,400,000 cubic feet of gas daily, with gas-liquid ratio of 43,476-1, through perforations at 7,910-8,148 feet, which had been acidized with 5,000 gallons and fractured with 100,000 gallons and 141,000 pounds of sand. Gravity of the condensate was 60.6 degrees.

Location is 1,380 feet from the south and 1,470 feet from the west lines of 15-KL-GC&SF.

The No. 2 Davidson "15" was finaled for a calculated, absolute open flow of 4,700,000 cubic feet of gas

daily, with gas-liquid ratio of 5,000 gallons and fractured 38,131-1, through perforations at 7,905-8,146 feet, which had been acidized with 100,000 gallons and 136,000 pounds of sand. Gravity of the condensate was 61 degrees. Location is 1,321 feet from the south and 1,221 feet from the east lines of 15-KL-GC&SF.
