GET TO GOBBLING UP THESE SPECIALS

After The Feast, What?

After the big turkey dinner, the next question is how to use up the leftovers. Here is one different idea for some of that roast turkey.

Turkey-Sausage Skillet

- 2 c. chopped, cooked turkey
- 1/4 lb. pork sausage
- 1/4 c. chopped onion
- 1/4 c. green pepper
- 2 tbsp. flour
- 1 1/2 c. milk
- 2 tbsp. chopped parsley
- 1/2 tsp. salt
- 1/2 tsp. poultry seasoning
- 2 c. cooked rice

Brown sausage in skillet, stir to separate. Add onion and pepper. Cook about 5 minutes. Stir in flour. Add milk. Cook until slightly thickened. Add turkey and remaining ingredients. Cook over low heat about 20 to 25 minutes to blend flavors. Serve hot with leftover cranberries. Serves 6.

Bad habit can mean high bills

Bad health habits mean high medical bills, a Harvard study says—and that means possibly higher health insurance premiums for such people.

Smoking, obesity and drinking were habits more common among high-cost patients than among low-cost patients.

After studying the records of 2,238 patients admitted to six hospitals, the researchers found that 13 percent of the patients accumulated as many medical bills as all the rest of the patients combined.

Researchers from Harvard Medical School and Harvard's Kennedy School of Government who conducted the study have some thoughts about what can be done to correct the situation in which a small number of people monopolize medical facilities and medical costs.

They suggest charging people with hazardous health habits higher insurance premiums and higher taxes—in the event the government institutes a national health insurance program.

"These suggestions are certain to cause much controversy," Shirer says.

"However, the situation as it stands today places a penalty on Americans who safeguard their health by forcing them to help pay the way of people who endanger their own health by practicing bad health habits," the specialist says.

Crockett County Care Center News

BY ANN McCARTNEY
DIRECTOR OF ACTIVITIES & SOCIAL CARE

We have had two special events this month. First we had an English tea party, complete with cookies furnished by Polly Eppler and the kitchen crew, with Joan Nicholas showing us pictures from her trip to England and Scotland and sharing with us information about the countryside.

Thursday night we had the second special event when we had our own mini trip to Mickey Gilley's. We didn't have the mechanical bull but we did have live music featuring Jamie Knox, Don Kilgore, and J. D. Kilgore. Again we had cookies, this time made and served by the 4-H cooking class, Mary Lou Knox and Jari Lee leaders. The 4-H girls participating included: Summer Shacklette, Stacy Lee, Jennifer Probst, and Peggy Knox.

Charlotte Judd and her Girl Scouts visited their adopted grandmothers, Maude Pettit, Nila Turnell, and Cora Webb, this week. These girls made our Halloween name decorations for our doors, plan a special treat for their "grandmothers" and plan to help them across the street to the bazaar this Tuesday. They are a real joy to have around.

Our weekly Sunday services were conducted by the First Baptist Church. Monday domino players included Serferino Garcia, Frank Jefferson, Maude Pettit, Ber-

tha Miller, Paul Cavin, and Louise McWilliams.

Consuelo Smith and Dorothy Doll helped with ceramics on Monday. Residents working included Frances Borrego, Maude Pettit, and Ola Mills. Bertha Miller worked on a Christmas door wreath. Volunteer Barbara Davee along with her mother and brother helped her. They also hung Thanksgiving pictures on our residents doors.

Dorothy Doll conducted reading on Wednesday. Dorothy, Doris Hoffman, and Maria Vitela worked in the beauty shop on Thursday morning. On Thursday afternoon we had our Bible study brought to us by the group from the Lutheran Church.

Myrtle Post demonstrated how a lovely dried arrangement can be made from items found in Crockett County on Wednesday afternoon. After adding fall fruits we had a lovely arrangement for the T.V. to be enjoyed during this Thanksgiving time of the year. Thanks, Myrtle Post.

Tuesday bingo winner of the meal for two at El Chato's was Ola Mills. Friday's first place winner, with a gift certificate from Watson's Department Store, was Juana Hernandez. Second place winner was Gertrude Daniels.

Thanks are given to Anna Belle Patrick for bringing pop corn, Beverly Preddy for a sack full of toiletries, and the Ozona Garden Club for their clean-up outside last week.

A smile can brighten someones day.

Log home interest growing in U.S.

Growing interest in log homes reflects the expanding back-to-nature and build-it-yourself movement in the United States, says Dr. Jane Berry, a housing and home furnishings specialist.

Log homes have come a long way from pioneer-day necessity to novelty to an emerging trend in housing, the specialist adds.

Berry is on the home economics staff of the Texas Agricultural Extension Service, The Texas A&M University System.

Increasing costs of land, money and materials have spurred build-it-yourself activity among would-be home owners who have come to the realization that they must be involved in "sweat equity" if they want to own a home today, Berry says.

Census Bureau figures show that home owner builders were responsible for one of every five new home starts in 1979 and the first half of 1980. Experts predict the figure will climb to one of every four by 1983.

Building with a log-home kit has "caught on" with an increasing number of home owner/builders, Berry says.

In 1974, fewer than 2,500 log homes were built. Today the annual figures exceeds 25,000.

By the end of 1981, it's predicted that some 70,000 Americans will have erected log homes as a way of coping with record-high mortgage rates and rising building costs.

Most of these homes 85 percent serve as year-round dwellings, while the remaining 15 percent serve as seasonal vacation homes.

Sales for the log-home industry have risen 50 percent a year for the past two years, in contrast with a 35 percent decline in total housing starts since 1977.

Popularity of the log home may be attributed to two major factors: aesthetic appeal and cost, Berry notes. Informality and the down-home atmosphere reminiscent of a less hectic lifestyle is usually cited by owners as a major reason for selecting a log home. Cost appeal lies in the fact that a semi-skilled do-it-yourselfer can save considerable amounts of money when willing to do much of the construction work himself or herself, the specialist adds.

A log-home kit essentially is a collection of matched building components which have been pre-cut in a factory before being delivered to the building site, Berry says. Basic log-home packages generally consist of wood or log floors, walls and roof, plus windows, doors, caulking, and often insulation materials. Buyers are responsible for preparing the homesite and foundation for the building, and for the addition of plumbing, wiring, heating and cooling systems, appliances and other components not included in the package.

Depending on size and options included in the package, log-home kits range from \$5,000 to \$30,000. When compared to costs of a conventional house, it is estimated that a log house can save from 10 to 30 percent, Berry says.

Remember, though, such savings are largely dependent on reduced labor costs and on how much additional insulation and other extras are needed to complete the job, she reminds.

On the other hand, turning the project over to a carpenter or contractor can virtually eliminate the savings, the specialist points out.

In considering in-place costs of a log home, a rule of thumb is that the final price of the home will be at least two times the costs of the "kit" or home package, Berry says. The prospective buyer who looks only at the cost of the kit is in for big surprises and disappointments, the specialist warns. It's important to know the components included with a log-home package, but the question of "what's NOT included" is of equal importance.

Growing demand for less-expensive housing has attracted more than 200 companies into the business of marketing log-home packages. Prospective home buyers need to proceed with caution and lots of questions since scattered among the solid and reliable firms are the profit-hungry incompetents, Berry says. Poor engineering and design and failure to stand behind warranties are practices or many less trustworthy companies in the log-home business, she says. Before transacting any business, prospective buyers should take whatever time and measures are required to check out the credibility of a company, she adds.

Pat Aiguier and Babe Womack have recently returned after a week's vacation visiting the Virgil Aiguier's of Davis, Oklahoma.

Volunteerism, a part of America

Volunteerism is rooted in the history of America; it was the cornerstone of the American Revolution. Today, it remains a strong force for social progress in this country.

While official reports show some 37 million volunteers each year in organized agencies in the United States, the figure probably comes closer to 68 million since many people volunteer on a spontaneous, ad hoc (certain situation) basis.

A major user of volunteers is the Cooperative Extension Service at the federal and state levels which is responsible for conducting informal educational programs in agriculture, home economics, and community and youth development, points out C. R. Salmon, 4-H and youth specialist with the Texas Agricultural Extension Service, Texas A&M University System. Volunteers work hand-in-hand with county Extension agents in conducting these educational programs.

In Texas this year, some 63,000 volunteers have been

involved in Extension activities, including 22,000 in 4-H programs. These 4-H volunteers spend an average of 15 to 25 days a year supporting various educational programs and activities geared to youth aged 9 to 19, notes Salmon.

At the national level total contributions of 4-H volunteers approach \$200 million a

Expanded research to spark beef industry

The multi-billion dollar beef cattle complex in Texas has been marginal in profitability in recent years. High prices for money and virtually every other production cost, coupled with relatively low market prices for beef, have resulted in low returns for many in the beef cattle industry, Texas' largest source of agricultural income.

A greatly expanded program of research by the Texas Agricultural Experi-

ment Station into virtually every aspect of production, processing and marketing is expected to result in increased efficiencies and help improve the economic outlook according to Dr. Zerle Carpenter, Head of the Animal Science Department at Texas A&M University.

"The Beef Production Systems research is a well-coordinated, comprehensive, team approach to defining and providing answers for problems in the areas of production, management, feeding and processing," says Carpenter. "The five major areas of research include biological efficiency, nutritional management, feedstuffs processing, marketing, and consumer preferences for lean beef".

"Research will focus on improved efficiency of lean beef production with qualities consumers want," Carpenter says.

Development of efficient lean beef production systems requires: Determining maintenance and growth limits of cattle of different biological types, produced under management systems designed to get the most out of various feed resources; developing a lean beef production model for simulating alternative management strategies to optimize biological and economic returns; in other words, a model computer program that a producer can use to fill in all details of his situation and options in order to find what he should do to get best economic returns from his land, livestock and feed; and determining the nutritional and compositional response of cattle to alternative feedstuffs and to alternative feeding programs.

To determine lean beef product acceptability for the consumer market, research will define the market value, consumer market preference, and marketing and processing technology for the lean beef produced by the various management and production systems designed to produce it.

Results of this research will provide important guidelines for producers of beef cattle and wholesale and retail firms, regarding the type and quality of beef acceptable to consumers.

"Beef production systems developed from this comprehensive research, that involves many scientists located across the state and from a variety of backgrounds, should result in a product that consumers want and producers will find more efficient to produce," Carpenter concluded.

Women, prepare yourselves. By 1990, 60 percent of women will either have jobs or will be looking for them as compared to 52 percent in 1980.

Equipment school scheduled

Mr. Charles Swaim, Field Representative for Sunbeam and Mr. Hank Ruckert of Mid-States Supply will conduct a school on maintaining and sharpening Sunbeam shearing and clipping equipment Friday, December 18, in Sterling City at the Community Center.

The school will start at 9:00 a.m. and will last most of the day, depending on the amount of equipment which needs repair and sharpening. Those attending will learn how to properly care for and maintain equipment and how to sharpen.

There is no charge for the school, but any new parts or equipment must be paid for. Anyone interested in attending this school contact Billy Reager, County Extension Agent, 392-2721.

FREE SEMINARS ON COMMODITY HEDGING AND SPECULATION

SPEAKER: DON MEYER, president of Commodity Brokerage, Inc. of St. Louis, Missouri. Mr. Meyer is the former hedging manager for Pet, Inc. and member of the Chicago Board of Trade. He is well known for his longtime commodity columns in *Livestock Weekly* and the *St. Louis Business Journal*.

SOME OF THE TOPICS TO BE COVERED:
Price outlook for livestock, grain, gold, interest rate and other futures contracts.

Why you should avoid the "text book" approach to hedging.

Why you may not want to hedge cattle when the futures market offers a profitable hedge.

Why you should be careful with some brokerage firms which specialize in livestock futures.

How to profit from the trading of professional traders on the Chicago trading floors.

What you should look for in a broker. How to use charts, oscillators, moving averages and other technical tools in forecasting commodity prices and determining risk-reward ratios.

THURSDAY, DEC. 3RD 7 TO 9 P.M.

INN OF THE WEST [BEST WESTERN] OZONA, TEXAS

Mr. Meyer's seminars are free, but by reservation only.

No brokers please. Seating space is limited. Coffee will be served.

Drug abuse group formed

A steering committee for DETOUR, Drug Elimination Through Ozona's United Resources, has been formed to fight drug abuse in Ozona. It is a branch of Governor Clements' War on Drugs program. Chairman is Tara Brubaker.

DETOUR will kick-off local activities with a program Thursday, Dec. 3, with a special program on drug abuse for concerned parents and adults in Ozona.

The program is specifically for adults and to educate them about drugs, drug related paraphernalia and how they can protect their children from the potential danger of drug addiction.

A special speaker will present the program in the Ozona High School Auditorium at 7:30 p.m. Anyone who has children or works with children is urged to attend.

Texas law relates to interest rate ceilings

With fluctuating and occasionally high interest rates in the offing, borrowers should be aware of recent Texas legislation relating to interest rate ceilings.

House Bill 1228, dealing with permissible interest rate ceilings in Texas, became law last May 8 and provides alternative interest rate ceilings that apply to almost all types of loans. Exceptions include loans for mobile homes and home solicitation transactions.

The law allows creditors (lenders) to choose an interest rate allowed by a weekly, monthly, quarterly or annual ceiling, points out Dr. Ashley Lovell of Stephenville, economist with the Texas Agricultural Extension Service, Texas A&M University System. This rate is calculated for each of the time periods on the basis of weekly auction rates of U.S. treasury bills.

An example of a recent interest rate based on this new legislation is as follows: a 24 percent interest rate applied for the weekly rate for Aug. 24-30, for the monthly rate for August, for the quarterly rate for July 1-September 30, and for the annual rate for July 1, 1981 - June 30, 1982.

In this example, borrowings for personal, family, household or agricultural uses would be subject to a 24 percent per annum maximum rate. Credit in excess of \$250,000 for business, commercial, investment and similar uses would be subject to a 28 percent per annum limitation.

The state interest rate ceiling law does not affect federal preemptions for agricultural loans, notes Lovell.

Regarding the provisions of this new law, the economist notes the following items for agricultural producers:

Thompson to drill outpost

MWJ Producing Co., Midland, will drill the No. 01 Cox "28", a 10,100-foot wildcat in Crockett County, 2 7/8 mile northwest of Dudley (Devonian gas) field, three miles east and slightly south of Dudley, East (Devonian gas) field, 2 3/4-mile southwest of the Simpson, 2 3/8-mile southeast of dual Ellenburger and Devonian production in the Perner Ranch field, 2 1/4 mile northwest of Strawn gas production in the Ozona, Southwest field and 1 1/2 miles southwest of Ozona.

Location is 1,320 feet from the south and west lines of 28-2-1&GN, Abst. 643.

Wildcats slated for Crockett Co.

ABC Energy Corp., The Woodlands, will drill the No. 12-81 Marley, a 6,000-foot gas wildcat in Crockett County, 1 3/4 miles northwest of a 13,600-foot failure, 4 1/2 miles west of Canyon gas production in the Hudspeth (Canyon and Strawn gas) field and 25 miles southwest of Ozona.

Location is 848 feet from the north and 978 feet from the west lines of 69-0-GH & SA. Ground elevation is 2,142 feet.

The firm has eleven other 6,000-foot wildcats scheduled in the immediate vicinity.

Wilson Energy Inc., Midland, will re-enter and deepen to 9,400 feet and test at its No. 1 University 18 "A", former oil producer in the Crockett portion of the Farmer (San Andres oil and gas) field, 7/8-mile west-southwest of a 9,710-foot failure and 12 miles southeast of Big Lake.

Drilled to 2,714 feet, it was finished June 5 for 10 barrels of 36 gravity oil and 14 barrels of water through perforations at 2,000-081 feet. Ground elevation is 2,663 feet.

Location is 467 feet from the north and 2,340 feet from the east lines of 18-47-University.

The failure, Texas Gulf No. 1-X University, abandoned Nov. 9, 1959, picked the following tops on derrick floor elevation of 2,714 feet: Strawn, 8990 feet; Siluro-Devonian, 9,020 feet; Simpson, 9,215 feet and Ellenburger at 9,303 feet.

R.K.G. Engineering Inc., Odessa, will drill the No. 1 C. W. Meadows as a location west stepout to the current lone Ellenburger gas producer in the Ozona multipay field, four miles west of

Ozona.

Location is 660 feet from the south and west lines of 4-QR-D&SE. Contract depth is 7,650 feet.

Suburban Propane Exploration Co. Inc., San Antonio, will drill the No. 1 McMullan "2", as a 5/8-mile northeast outpost to the Live Oak Draw (Strawn gas) field and as a 1 3/8-mile southeast outpost to 7890 Pennsylvania gas in the Davidson Ranch multipay field, 5/8-mile east-northeast of an undesignated Strawn gas discovery, 1 1/2 miles west of the Seawolf (Strawn gas) field and 10 miles southeast of Ozona.

Location is 1,500 feet from the south and 1,078 feet from the west lines of 2-F-GC & SF. Contract depth is 9,500 feet.

J. Cleo Thompson, Dallas, will drill the No. 1 University 29-27 as a 3/4-mile south outpost to the University 29 (Strawn detrital gas) field of Crockett County, 23 miles west of Ozona.

Location is 2,087 feet from the north and 885 feet from the west lines of 27-29-University Lands. Contract depth is 9,500 feet.

J. Cleo Thompson will drill the No. 2 University 31-21 W as a 5/8-mile west and slightly south outpost to Strawn detrital gas production in the University 31 (Strawn detrital and Queen gas) field, 12 miles west of Ozona.

Location is 1,320 feet from the north and west lines of 21-31-University Lands. Contract depth is 9,500 feet.

Glaucoma: The gradual darkness

If you're 35 or over, you should know about glaucoma warns the Texas Society to Prevent Blindness.

"Glaucoma is an insidious eye disease that is the leading cause of blindness today," says Richard L. Kimbrough, M.D., a member of The Society's Medical Advisory Committee. "Over 100,000 Texans have it and half of them don't even know it because glaucoma can nibble away at vision without pain or noticeable symptoms."

"The best defense against glaucoma is a simple test called tonometry which measures the pressure within the eye," Dr. Kimbrough said.

"At some screenings ophthalmologists test using a hand-held Schiotz tonometer. At others, trained lay people use a machine called a non-contact or Air Puff tonometer that is transported to the screening in one of the Society's four new glaucoma Alert Vision Vans." Although glaucoma can

occur at any age, the older the person, the greater the risk of glaucoma, he noted. The Society therefore advises that all persons 35 and older should have a thorough eye examination at least every two years. Senior citizens, people with a family history of glaucoma and those with diabetes and cardiovascular diseases are more at risk and should be checked annually.

To alert people to the dangers of glaucoma the Society has three films on the subject that may be borrowed without charge for community showings. They are "Seeing," featuring Helen Hayes, "Glaucoma, A Silent Threat to Sight" and "The Glaucomas," a film for professional audiences. For information on the films or a free copy of the publication "Glaucoma, Sneak Thief of Sight," send a long, stamped, self-addressed envelope to Prevent Blindness, P.O. Box 2020, Houston, Texas 77001.
