Tornadoes threaten county

Ozona was in line for a direct hit May 26, the National Weather Serv- ice. ice told DPS dispatcher Glenda Capps to take cover, the office was about to be hit, said Paula Maness, head of communications here.

The DPS office had been notified by the NWS that a tornado was 10 miles west of Ozona, then two miles out, but it didn't touch down. In fact, Maness said she had not been told of any damage in the county from tornadoes touching down in that storm.

DPS troopers, deputies and citizen storm spotters did see a tornado in the Pandale Road area, and Southwest Texas Electric Co-op employees said in the Midway Lane area, leaves were sucked from the trees.

A fire siren weather alert sounded for 30 to 40 minutes beginning around 12:30 a.m. Wednesday morning, said Mrs. L. A. McCaleb, fire station attendant. Many people did not hear the weather warning signal.

The Heritage Building and the basement of First Baptist Church were opened for those needing shelter during the storm.

"We're real complacent here because we've never had a tornado," Maness said. "The best bet is to stay put if you live in anything except a mobile home.

People need to realize that lightning is a big threat, also."

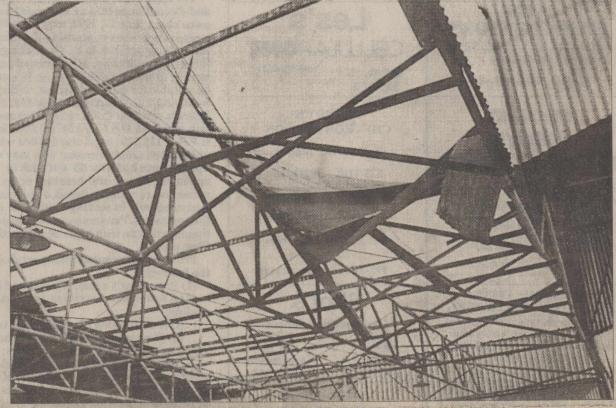

from a tornado last week, but it didn't which doesn't depend on telephone Hearne' whose wife, Mary Joan, is the

Public Notice

STB Docket No. AB-545 NOTICE OF INTENT TO ABANDON

AND DISCONTINUE SERVICE South Orient Railroad Company, Ltd. ("SORC") gives notice that on or about June 17, 1998, it intends to file with the Surface Transportation Board, Washington, D.C. 20423, an application for permission for the abandonment of a line of railroad known as the San Angelo-Presidio Line, extending from milepost 722 south of San Angelo near Mertzon station to milepost 1029 + 767 feet at the end of the line near Presidio station (including the discontinuance of trackage rights over the Union Pacific Railroad Company from milepost 945.3 at Alpine Junction to milepost 956.7 at Paisano Junction), which traverses United States Postal Service ZIP Codes 76903, 76666, 76930, 76932, 79778, 76752, 79735, 79830, 79832, and 79845, a distance of approximately 307.12 miles, in Brewster, Crane, Crockett, Irion, Pecos, Presidio, Reagan, Tom Green and Upton Counties, Texas. The line includes the stations of Mertzon, milepost 745.7; Barnhart, milepost 771.6; Big Lake, milepost 790.6; Rankin, milepost 819.9; McCamey, milepost 838.6; Baldridge, milepost 863.8; Sulphur Jct., milepost 869.4; Fort Stockton, milepost 881.7; Belding, milepost 892.9; Hovey, milepost 917.2; Alpine, milepost 944.3; Alpine Jct., milepost 945.6; Paisano Jct., milepost 956.7; Paisano, milepost 956.9; Tinaja, milepost 969.3; Plata, milepost 993.7; Casa Piedra, milepost 1002.9; and Presidio, milepost 1026.7.

The reasons for the proposed abandonment and discontinuance are that present and anticipated local and overhead traffic volumes are not adequate to make the line viable, that the line is incurring substantial operating losses, and that significant rehabilitation costs are expected in the near future with no reasonable possibility that they can be recovered. The line is unprofitable, will be unprofitable in the future and is an undue burden on interstate commerce. Based on information in SORC's possession, the line does not contain federally granted rights-of-way. Any documentation in the railroad's possession will be made available promptly to those requesting it.

This line of railroad has been included in SORC's system narrative description (filed pursuant to 49 C.F.R. § 1152, Subpart B) in Category 1 since April 17, 1998.

The interest of railroad employees will be protected by the conditions set forth in Oregon Short Line R. Co. -- Abandoment -- Goshen, 360 I.C.C. 91 (1979).

The application will include the Applicant's entire case for abandoment and discontinuance. Any interested person, after the application is filed on or about June 17, 1998, may file with the Surface Transportation Board written comments concerning the proposed abandonment and discon-tinuance or protests to it. These filings are due 45 days from the date of filing the application. All interested persons should be aware that following any abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 U.S.C. § 10905 (Section 1152.28 of the Board's rules, 49 C.F.R. § 1152.28) and any request for a trail use condi-tion under 16 U.S.C. § 1247(d) (Section 1152.29 of the Board's rules, 49 C.F.R. § 1152.29) must also be filed within 45 days from the date of filing of the application. Persons who may oppose the abandonment and discontinuance but who do not wish to participate fully in the process by appearing at any oral hearings or by submitting verified statements of witnesses, containing detailed evidence, should file comments. Persons interested only in seeking public use or trail use conditions should also file comments. Persons opposing the proposed abandonment and discontinuance that do wish to participate actively and fully in the process should file a protest.

Protests must contain that party's entire case in opposition including the following:

(1) Protestant's name, address and business. (2) A statement describing protestant's interest in the proceeding including:

(i) A description of protestant's use of the line,

(ii) If protestant does not use the line, information concerning the group or public interest it represents; and

(iii) If protestant's interest is limited to the retention of service over a portion of the line, a description of the portion of the line subject to protestant's interest (with milepost designations if available) and evidence showing that the Applicant can operate the portion of the line profitably, including an appropriate return on its investment for those operations.

(3) Specific reasons why protestant opposes the application including information regarding protestant's reliance on the involved service [this information must be supported by affidavits of persons with personal knowledge of the fact(s)].

rebuttal of material submitted by Applicant.

received and forwarded from 10:00 a.m.until 4:00 p.m., Monday through Friday (excluding all holidays). The names, addresses, and locations of all stations through which business for the line is received or forwarded are as follows: 1) Presidio station, 5th Street & Churchill, Presidio, Texas 79845, milepost 1026.7; 2) Alpine station, 801 West Del Rio, Alpine, Texas 79830, milepost 944.3; 3) San Angelo station, 2200 East 28th Street, San Angelo, Texas 76901, milepost 714.5; and 4) SORC's operations center, 210 South Main, Brownwood, Texas, 76801. The carrier will furnish a copy of the application to any interested person proposing to file a protest or comment, upon request.

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by the Section of Environmental Analysis will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Any other person who would like to obtain a copy of the EA (or EIS) may contact the Section of Environmental Analysis. EAs in an abandonment proceeding nor-mally will be made available within 33 days of the filing of the application. The deadline for submission of comments on the EA will generally e within 30 days of its service. The comments received will be addressed in the Board's decision. A supplemental EA or EIS may be issued where appropriate. 4c16

Enjoy the paper every week, especially your editorials. Always good to hear about our home town Mondays. Sometimes it's Saturday, folks, especially the "old timers" since not too often. I still enjoy getting it. I was in the Class of 1939.

Hi, Linda, I'm still getting my paper on Thanks, Peggy (Dodd)

> **TELEPHONE (915) 392-2551 ADDRESS - 1000 Avenue E.** P.O. Box 370, Ozona, Tx 76943

In addition, a commenting party or protestant may provide a state-

ment of position and evidence regarding:

(ii) Environmental impact;

(iii) Impact on rural and community development;

(iv) Recommended provisions for protection of the interests of the employees;

(v) Suitability of the properties for other public purposes pursuant to 49 U.S.C. § 10905: and (vi) Prospective use of the right-of-way for interim trail use and rail

banking under 16 U.S.C. § 1247(d) and 49 C.F.R. § 1152.29.

A protest may demonstrate that: (1) the protestant filed a feeder line application under 49 U.S.C. § 10907; (2) the feeder line application involves any portion of the rail line involved in the abandonment and discontinuance application; (3) the feeder line application was filed prior to the date the abandonment and discontinuance application was filed; and (4)the feeder line application is pending before the Board.

Written comments and protests will be considered by the Board in determining what dispostion to make of the application. The commenting party or protestant may participate in the proceeding as its interests may appear.

If an oral hearing is desired, the requester must make a request for an oral hearing and provide reasons why an oral hearing is necessary. Oral hearing requests must be filed with the Board no later than 10 days after the application is filed.

Those parties filing protests to the proposed abandonment and discontinuance should be prepared to participate actively either in an oral hearing or through the submission of their entire opposition case in the form of verified statements and arguments at the time they file a protest. Parties seeking information concerning the filing of protests should refer to 49 C.F.R. § 1152.25.

Written comments and protests, including all requests for public use and trail use conditions, should indicate the proceeding designation STB Docket No. AB-545 and must be filed with the Secretary, Surface Transportation Board, Washington, DC 20423, no later than August 3, 1998 (or 45 days after the application is filed, whichever is later). Interested persons may file a written comment or protest with the Board to become a party to this abandonment and discontinuance proceeding. A copy of each written comment or protest shall be served upon the representative of the Applicant, Christopher E. V. Quinn, Oppenheimer Wolff & Donnelly (Illinois), Two Prudential Plaza, 45th Floor, 180 North Stetson Avenue, Chicago, Illinois 60601; telephone: 312/616-5841. The original and 10 copies of all comments or protests shall be filed with the Board with a certificate of service. Except as otherwise set forth in 49 C.F.R., Part 1152, each document filed with the Board must be served on all parties to the abandonment proceeding. 49 C.F.R. ¶ 1104.12)a). The line sought to be abandoned and discontinued will be available

for subsidy or sale for continued rail use, if the Board decides to permit the abandonment and discontinuance, in accordance with applicable laws and regulations (49 U.S.C. § 10904 and 49 C.F.R. § 1152.27). No subsidy arrangement approved under 49 U.S.C. § 10904 shall remain in effect for more than one year unless otherwise mutually agreed by the parties (49 U.S.C. § 10904(f)(4)(B)). Applicant will promptly provide upon request to each interested party an estimate of the subsidy and minimum purchase price required to keep the line in operation. The carrier's representative to whom inquiries may be made concerning the sale or subsidy terms is:

Christopher E.V. Quinn **Oppenheimer Wolff & Donnelly (Illinois)** Two Prudential Plaza, 45th Floor 180 North Stetson Avenue Chicago, Illinois 60601

Person seeking further information concerning abandonment and discontinuance procedures may contact the Surface Transportation Board or refer to the full abandonment and discontinuance regulations at 49 C.F.R., Part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis.

A copy of the application will be available for public inspection on or after June 17, 1998, at all stations through which business for the line is

THE

CACTUS PATCH

worked for a time in San Antonio, but the city was too big for this West Texas girl. She came home and got a job working for C.S. Denham, school superintendent, for \$25.00 a month. Later, WTU needed a bookkeeper, and she began working there for T. J. Bailey.

In those days, WTU was also the ice house, and that's where and why she met her future husband, Charlie Applewhite. He was working here with a surveying crew, and the men bought ice to take out on the job.

Today Lib and Charlie (who is a pretty good cook, himself) help others by delivering Meals on Wheels. They are members of Ozona United Methodist Church. They love family fishing trips to the river where they play cards in addition to baiting hooks.

The following recipes come from a well-worn booklet held together by string. Names of many of the region's good cooks are on recipes hand-copied or later typed by Lib. Preparation methods are not included in most instances.

Doctor's discovery may end obesity

HILTON HEAD, S.C. -- A doctor believes that a natural formula containing the extract of a small Asian fruit can

help cause significant weight loss. Anthony A. Conte, M.D. reported in an American Medical Journal that the services Sundays is Rev. Hector DeLa formula, now called Bio-Rex 3000, caused patients to lose more than twice as much weight as those in a control group on the same fat reduced diet. Neither group was instructed to decrease the amount of food they ate or to increase their exercise levels. An article published in the American Journal of Clinical Nutrition says that you don't eat to lose weight, provided that you limit the fat.

Dr. Conte says that animal studies suggest the mechanism behind the weight reduction is due to interruption of the "Krebs Cycle", an important step in the body's fat storage process. He says it may work the same way in humans. According to Dr. Conte, "The best part of this unique discovery is that it is not a drug, but a dietary food supplement. The Asian fruit, called garcinia, is similar to citrus fruit found in the United States with one big exception-- it may help some people fight obesity! While Dr. Conte's study may be preliminary, the exclusive North American distributor, Phillips Gulf Corp., is calling the Bio-Rex 3000 supplement "Nature's Ideal Diet Aid." According to a spokesperson for the company, Bio-Rex 3000 is now available through pharmacies and nutrition stores or call 1-800-729-8446 or visit www.phillipsgulf.com.

Bio-Rex 3000 is available locally at: WESTERMAN DRUG

Atheist Worship

director Shelly Childress.

2978.

By Dennis J. Prutow

So you're a self-conscious atheist. All your thinking is based upon the assumption there is no God. Curious, you think my views are extremely biased. I'd say your thinking is just as biased as mine. You hold to your assumptions about God and the universe as strenuously as I hold to mine.

For you, as an atheist, human beings are autonomous. That is, they

make their own rules and laws. Because there is no God, there is no ultimate authority over us. There can be no ultimate rules or laws to guide us. Only some degree of consensus is possible among us. Each human creature is the ultimate authority for his or her life. Curious, in your scheme of

way of thinking, men and women are ultimate and autonomous.

Finally you believe because there is no God, there can be no revelation which comes to us from God. God cannot reveal himself through creation. God cannot speak to us. The Bible cannot be true. Curious, the Bible is quite true when it describes you and your fellow atheists: "They exchanged the truth of God for a lie, and worshipped and served the creature rather than the creator" (Romans 1:25).

Moore service here Friday

Moore, 56, are scheduled for 10 a.m. death. He married Nancy Dame on Chapel with Steve McCleery officiating. Graveside services will be held at at New Mexico Junior College in Cedar Hill Cemetery in Ozona on Hobbs, NM, and a retired minister. He Friday morning at 10 a.m. with Rod Miller officiating under the direction Lubbock. Mr. Moore moved to Lovof Bethany Funeral Home.

Mr. Moore was born on June 18, 1941, in Fulton, KY, to Orvin and

For the love of Christ compels us because we judge thus: that if one died for all, then all died. And He died for all, that those who live should live no longer for themselves, but for Him who died for them and rose again.

2 Corinthians 5:14-15 This message made possible by persons who value a soul.

Funeral services for Ralph O. Hontas Moore, who preceded him in Thursday at Bethany Funeral Home May 14, 1961, in Fulton, KY. Mr. Moore was a professor of psychology was a member of Trinity Church in ington from Ozona in 1993.

> He is survived by his wife, Nancy, of the home; two daughters, Yvonne Michelle and husband David Gray of Memphis and Melissa Lee and Cody Morris of Ozona; one son, Brent and wife Kerri Moore of Kerrville; five grandchildren, Shawn David Gray, Amber Michelle Gray, Megan Nicole Gray, Aryn Lee Morris and Micah Allese Moore. He was preceded in death by his parents and one sister.

Pallbearers are Burl Myers, Chuck Morris, Johnny Jones, Mike Miller, David Gray and Cody Morris.

Thanksgiving Novena to St. Jude

O Holy St. Jude, Apostle and Martyr, great in virtue and rich in miracles, near kinsman of Jesus Christ, faithful intercessor of all who invoke your special patronage in time of need, to you. I have recourse from the depth of my heart & humbly beg to whom God has given such great power to come to my assistance. Help me in my present & urgent petition. In return I promise to make your name known & cause you to be invoked. St. Jude pray for us and all who invoke your aid. Amen. Thank you!

Sophomores: Michelle Camarillo, Cade Clark, Shelley Cornett, Terry Davis, Miriam Gomez, Lori Jackson, Casey Jamerson, Alex Lira, Ty Mitchell, Jessica Pagan, Ty Porter, Allison Preddy, Clay Richardson, Salvador Rodriquez, Peter Rodriguez, Linda Ruiz. Edelmira Sanchez, Dustin Shaffer, Kayla Shurley, John Stokes, Kenneth Vargas, Travis Vordick, Jackson Wadsworth, Jared Webster, Christopher Wilkins

Evangela Coy awarded National Service Scholarship

Evangela Coy, a student at Ozona High School, has been awarded a National Service Scholarship by the Corporation for National Service and Ozona High School Student Council in recognition of outstanding service to the community.

Announced by President Clinton and administered by the Corporation for National Service, the National Service Scholarship is awarded to one junior or senior from each high school to recognize an exemplary record of community service. The Corporation for National Service funds \$500 of the \$1,000 scholarship which is matched Hamilton graduates, with a locally funded scholarship of at least \$500 from the school, a local civic group, business, or faith-based organization.

As the President said in launching the service scholarship, "I want every principal in America to be able to stand up before a graduating class and announce the name of a National Service Scholar."

According to Harris Wofford, Chief Executive Officer of the Corporation for National Service, "With their idealism, and energy, young people are a great resource to the community, and the National Service, Scholarship Program imparts on young people the importance of service by

giving back to students who serve their communities."

Coy graduated from Ozona High School and plans to attend Texas Tech University.

Class of 1988 reunion

The Ozona High School Class of 1988 will have its 10 year reunion Saturday, June 6, at Fair Park Convention Center. The day begins with brunch at 10 a.m. There will be a 7 p.m. barbecue followed by a dance a 8. For more information, contact

Susan Kenley Cassaro at 944-8673.

It's a boy!

Kadin Fleet Worthington was born May 21, 1998, at Harris Methodist Hospital in Stephenville. He weighed in at five pounds and 14 ounces and measured 18 inches long. Parents are Fleet and Cynthia

Worthington. Grandparents are Mr. and Mrs. Vance Worthington. The baby's great-grandmothers are Mrs. Bud Coates and Mrs. A. H. Worthing-

Becca Hoover graduates

Becca Hoover, daughter of Brad and Maggie Hoover of Beaumont, will be graduating cum laude from West Brook High School this month in the top six percent of her graduating class. She will attend Texas A&M University in the fall, majoring in psychology. Her father, Brad Hoover, is a psychologist and owns a group private practice in Beaumont. Her grandparents are Armond Hoover of Ozona and Jack and Joanne Homritghausen of Fredericksburg.

Matthew Heard graduates

mencment exercises for Abilene High School, where her grandson, Matthew Michael Heard, received his diploma and the recognition of being the salutatorian of the Class of 1998. There were 435 graduating seniors, and Matt earned his position as salutatorian with a grade point average of 102.77. His moving speech was titled "On the Matter of Building Bridges", and he used the well-loved poem "The Bridge Builder" by Wm. Dromgoole.

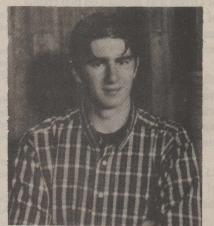

Matthew is the son of Patrick C. and Ann Glynn Heard. He will attend Abilene Christian University and seek a major in English with a minor in journalism-communications. Matt is employed by the Abilene Reporter-News in the graphic arts department.

Among the scholarships he earned were those from The Community Foundation, Rotary Top 50, ACU Trustee Scholarship and Top 25 National Honor Society, with others pending

Family from San Antonio, Beeville, Lytle, San Angelo and Ozona attended the exciting Friday evening event at Taylor County Coliseum to cheer for their favorite Class of 1998 member.

Matt was honored with a brunch on the morning following graduation,

When you see Audrey Glynn next and those attending were family memtime, don't be surprised if she has an bers who were joined by Jerry and extra spring in her step and a smile on Lynn Thompson Reed, Sarah and her face. She has just returned from Daniel of Abilene, and a special friend, Abilene, where she attended the com- Makinsie Conley, also a 1998 graduate of AHS.

Pain may be minated

(SPECIAL) -- A drug that is excit ing researchers in the treatment of pain has been formulated into a new product known as "Arthur Itis," and is being called a "Medical Miracle" by some, in the treatment of debilitating conditions such as arthritis, bursitis, rheumatism, painful muscle aches, joint aches, simple backache, bruises, and more. Although the mechanism of action is unclear, experiments indicate that Arthur Itis, relieves pain by first selectively attracting, and then destroying the messenger chemical which carries pain sensations to the brain, thus eliminating pain in the affected area. Arthur Itis, is available immediately without a prescription in an odorless, greaseless, non-staining cream or new roll-on lotion form. Arthur Itis, is guaranteed to work or your money back. Products. Inc. Use only as directed AVAILABLE AT:

Ozona track traditions (Continued from front page)

School employees honored with appreciation dinner

Joe Tobar and staff of El Chato's Restaurant of Ozona honored all Crockett County Consolidated Common School District employees and spouses with a complimentary dinner on May 5 at the civic center. Approximately two hundred employees and guests attended the fourth annual complimentary and most appreciated steak and all the trimmings dinner.

Prior to the dinner, a number of employees were presented service award pins for having been employed by Crockett County CCSD for periods of time in increments of five years. The Crockett County Board of Trustees approved the awarding of service pins as an additional way to say "thank you" for service to Crockett County youth. The awards were presented by Larry Taylor, superintendent; Donny Wiley, high school principal; Charles Floyd, middle school principal, Manley Holmes, intermediate school principal; and Marilyn Luce, primary school principal.

le X

34

rs.

Employees receiving service awards pins for five years of service were: Annette Badillo, Donna Cameron, Mary Anne Deaton, David Delgado, Jesus Dominquez, Kristi Ellis, Jeannie Fuller, Michael Gully, Gwin Jamerson, Sylvia Lara, Anna Martinez, Tina Moran, Tom Morrow, Ray Don Myers, Cathlynne Ponsetti, Lynette Rodriquez, Rosario Sanchez and Sandy Screws.

Five employees receiving service award pins for 10 years of service were: Norman Carroll, Katrece Hale, Jesus Martinez, Rose Williams and Lloyd Winkley.

Juan Hernandez and Doris Hood received service award pins for 15 years of service.

Employees presented with service award pins for 20 years of service were: Connie Fowler, Leticia Macias and Pete Maldonado.

Ruben Peña-Alfaro received a service award pin for 25 years of service.

Two additional employees who were eligible to receive recognition for service were inadvertently omitted. Pep Porras should have received a service award pin for five years of service to the district, and Kathy Reavis should have received a service award pin for 25 years of dedicated service to the Crockett County School District.

Young to score in the points, taking 2nd in the pole vault. Forty years later Justin Browne took the same spot.

Jim Doran returned to Austin in 1960 to place 5th in the 100 yard dash. That year was a good one as all the men placed. Joe McMullan placed 6th in the 120 yard high hurdles and the sprint relay took 2nd. The relay team was made up of Doran, Tony Parker, who ran in '58, Jim Williams, and Tom Porter.

In 1961 Doran made his third appearance in the state meet and moved up a notch to nab 4th in the 100 yard dash. Doran and Parker also made their third trip as members of the relay squad along with Carl and Pete Montgomery. The relay didn't fare as well, but finished in the points at 6th place. Phil Carnes took 5th in the high hurdles.

Van Miller made the long trip alone in 1962 to try his luck in the long jump. He did not score points, but remember that you are one of only eight people left in the competition from the entire state. Pete Montgomery made a solo return in 1963 and grabbed 6th in the high hurdles.

In 1965 a guy by the name of Gary Pagan began what would turn into a family tradition when he threw the shot put far enough to place 2nd in the meet. Gary would later lose his life serving in the military in the fetid jungles of a place called Vietnam. While we are on the Pagans, let's jump ahead a few years. In 1967 Gary's brother, Rodney, was a member of the mile relay team that finished in 6th place. Rodney's teammates were 6th. Derold Maney, Fleet Coates, and George Cox. In 1970 and '71 David Pagan made repeat performances with a 4th in the discus the first year and 3rd in the second year. In '71 he also threw the shot put. The last of the Pagan brothers, Steve, made a single appearance when he competed in the 330 yard intermediate hurdles in 1977.

Rolling back to 1965, Gary Pagan had some company in Austin. Another pole vaulter, Bill Carson, placed 5th and David Childress finished 6th in the 120 yard high hurdles. In 1967 Gary Sutton netted the gold in the discus and a 3rd in the shot. The following year Sutton placed 3rd in the dis- staple of Ozona's teams at this junccus and 4th in the shot put. George ture. In 1995, 10 years after Danny's Cox, a member of the mile relay in '67, first run in Austin, sister Lori Sanchez

ing me with this information. His running mates were Timmy Evans, scene in 1994 and stayed there for a Gerald Huff, David Sewell, and Cheo banner four years. That year he was Vargas. The mile relay team, Ricky 6th in the 1600 meters and 13th in Crawford, Evans, Oliver Payne, Huff, cross country. The following season and Rick Hunnicutt, placed 5th. he finished 13th once again. In 1996 Sewell also ran the 120 yard hurdles and 1997 he placed 6th in the 800 for 5th and Mike Wellman ran the 330 meter run. hurdles the same year.

and they finished 4th. The mile relay, with alternate, was Payne, Evans, Crawford. The group finished 5th. David Sewell again competed indiproved to 4th that year.

I am not sure when the UIL began to hold state track competition for the ladies, but Kaye Thompson was the first for Ozona to qualify. By 1980 meters had replaced yards and Thshe returned to Austin to take the top spot in the 1600 meters. That same in the 400 meters. In '82 Garza improved to 2nd in the 3200, and Marcello Hernandez took 4th in the 800 meters.

Both relay teams once again appeared in Austin in '82. The sprint team, Willie Payne and Larry Payne, David Badillo, and Robert Flores, took 5th. The 1600 relay, Ozona coach David Delgado, Larry Payne, Mark Vallejo, and Marcello Hernandez, took

In 1985 another family name, that of Sanchez, appeared on the running scene when Danny Sanchez ran 3rd in the cross country meet. In '86 Danny finished 3rd in the 3200 meters in the spring, then 2nd in the cross country meet in the fall. For four years Danny Sanchez would be on the list of runners in Austin. In 1987 he took his first top finish in the cross country meet and in '88 he was the top runner stateside in the 1600 meters. Adding to his list of honors was a pair of seconds in the 3200 meters in back-toback seasons.

Long distance running became a took 4th in the 220 yard dash the same placed 11th at the cross country meet

become one of the most popular postemergence treatments for controlling bermudagrass, barnyardgrass and johnsongrass in soybeans, as well as 28 other grass species. In fact, Fusion recently received Environmental Protection Agency (EPA) label approval for use on cotton allowing a 10- to 12-ounce rate on johnsongrass 8 to 18 inch-es tall. Now, both cotton and soybean growers can reap the benefits of Fusion.

Fusion is a foliar-applied systemic herbicide. It works well in all tillage systems, yet is gentle on your sovbeans and cotton. The flexibility of Fusion allows growers to tank mix the product at a variety of rates with more herbicides than any other competitor in its class.

Always follow label instructions and apply Fusion by air or ground to actively growing grasses when the first species reaches the recom-mended height. An adjuvant should be added to the tankmix to help increase herbicide contact. Fusion is rainfast in one hour and starts working within 48 hours of application. Weeds show visual signs of control from Fusion within one week

Over the years, Southern growers have seen a natural evolution from FUSILADE* 4E herbicide to FUSILADE 2000, then to FUSILADE DX and now Fusion. Each step improved the products to meet your changing needs. Put Fusion to work for you.

For more information about Fusion, contact your local ag chem dealer.

1998. Zeneca Inc. Zeneca Ag Products is a business it of Zeneca Inc. FUSILADE* DX* and FUSION* trademarks of a Zeneca Group Company. Farm felv. Always read and follow label directions.

June 3, 1998 — The Ozona Stockman — Page 3-B

imary and intermediate Γ students go to Sea World

ted and Talented course through Education Department at Sea orld of Texas. Nineteen students om the Ozona Primary and Ozona itermediate campuses experienced ceans of fun while learning about the majestic animals of the sea. The course interrelated math and marine science while visiting the animal habitats at Sea World.

The students got a behind the scenes look at the beluga whales and the Pacific white sided dolphins. They watched the dolphins being trained, and got up close to the friendly beluga whales. At the Shamu Stadium, students visited with the killer whales and discovered that they eat approximately three percent of their body weight daily.

The marine Mammal Pool was a favorite, as the students were provided with many chances to play with the bottlenose dolphins. The next stop was the Sharks/Coral Reef area, where many species of sharks were observed. The students found out that sharks do not need to eat every day.

The last stop was the penguin exhibit, where the students saw rockhopper, king, chinstrap and tentoo penguins. At this cool exhibit, the students calculated that the three flakeice machines in this exhibit could produce up to 30,000 pounds of ice per day.

The Sea World instructor provided the students with many interesting facts about marine animals, and she answered the students' many thoughtful questions.

Students and sponsors attending from the primary were: Puja Bhakta, Park Preddy, Ethan English, Julia Henderson, Danny Anderson, Morgan Capps, Tracey Preddy, Diane Anderson, Glenda Capps, Cathy English, Mrs. Henderson, Mrs. Cotton and Ms. Luce.

The intermediate participants were: Barrett Richie, Levi English, Dean Wadsworth, Matthew Harris-Cane, Derek Wiley, Allison Skehan, Jared Bird, Taylor Oglesby, Makinsey Morris, Derek Fierro, Stephen Lara, Desa Ray Goff, Jenna Henderson, Ms. Sewell, Mr. Gully, Mrs. Lara, and Ms. Goff. Johnny Rodriquez was the patient bus driver for the group.

On Tuesday, May 12, a group of The Penguins liked to stand under the students and sponsors attended a ice machines. In the mornings when the ice was piled up, they would toboggan off the ice hills. I had a wonderful time at Sea World.

My Sea World Trip **By Julia Henderson** Second Grade

I loved going to Sea World on my G. T. Trip. First we went to see shamu the killer whale. We had a guide named Paula. She said each one had a name and one whale had a birthmark. She showed us the whale's eyes and small ears.

Next we went to the dolphin pools. They were so neat. I loved petting them. I liked seeing them jump. Paula showed us the beluga white whales. They made strange noises with their blow holes.

The Sea Coral House was so interesting. It had a huge octopus, stingrays and hammerhead sharks in big salt water tanks. I really liked seeing the shark eggs at different stages of growth.

Last we visited the penguins. I saw man-made ice falling from the ceiling in the penguin house. Paula said we couldn't see the penguin eggs because they had already hatched. She said both parents took care of the egg bamboo sharks had stripes all over it. until it hatched.

World!

Sea World **By Morgan Capps** Second Grade

Tuesday the 14th the G.T. class your hand! went to Sea World to learn how they use math there. First we went to see thank the school for paying to get us the things I have to tell you about my the Killer Whales. There are so many people that are afraid of Killer Whales because their first name is Killer. Well, the Killer Whales are cool man! Sometimes you can see their birth marks when they swim by and the Trainers can tell them apart. The 2nd thing we went to look at was the dolphin pool. The trainers use a long stick that has a ball on the end and they splash the side with the ball in the water and then the dolphins jump up and touch the ball and then what they are supposed to do is turn on their backs and make a big splash. The 3rd thing we saw was the white whale. They made funny sounds out of their blow holes. They sounded like they were saying bye to us! They had a big white melon head and looked funny. We had a guide named Paula that The 4th thing we saw was Hammerheaded Sharks. They were pretty cool! learned that the whale's eye is small Their eyes were out to either side of and his tiny ears are behind his eyes. their heads and their heads were wide They are fed lots of fish each day. and flat like a hammer. We saw baby They are also given vitamins to keep sharks like tadpoles inside shark egg cases. the egg cases looked like leaves Next we went to see the dolphins. and the Mama shark puts them on the We saw a man training the dolphins to bottom of the ocean and they stick do tricks. The man would blow a there until the baby sharks get ready to whistle that only the dolphins could get out of them. After the acquarium hear. The dolphins got lots of rewards. where the shark live we went to see the The sharks were located in the Penguins. Sea World has it all dark Coral House. I saw hammerhead and cold and snowy in there and it was sharks, carpet sharks, nurse sharks and all pink and purple. It is winter where a six-inch shark. I got to see some real Penguins come from and Sea World because I've never seen fish mamshark eggs and swimming seahorses. wants them to be happy. I liked how Last we went to the Penguin they shook their little tails when they House. Paula told us that the penguins swam and how they hopped onto the get under the icemakers and when rocks. The guide lady said they can they wake up, they are covered with carry their eggs on their feet when the ice. There were sea gulls in the pen- waddle and they squat on them with their fat little tummies. We had so Iloved Sea World and I can't wait much fun it didn't seem like math at all, but they have to use math to know how much to feed the animals and how cold or hot the water has to be for

SHAMU SWIMS UPSIDE DOWN behind the Ozona Primary and Intermediate School gifted and talented students during their trip to SeaWorld.

lured them in with leaves. I guess that ons on their head that jiggle when they they thought it was fish. At the pen- swim. I like white sided dolphins guin encounter I learned that tobog- because they can jump almost 25 feet ganing meant sliding down ice. It was into the air. Shamu Stadium I think is very funny to see all the little penguins the coolest because the killer whales sleeping with their heads under their wings.

When we went to the Shark/Coral Reef I learned that hammerhead sharks eat rays. I also learned that some eels are huge. We actually got to see an octopus. We saw Clown Fish and even baby sharks still in their egg pouches. When we went to the Shark's part everybody thought the Bonnet Hammerhead (a very tiny hammerhead shark) was a baby shark. We saw a carpet shark that blended in very well with the surrounding rocks. They They had a red drum fish in the tank. I really loved my trip to Sea It was very big. Paula, our guide, said that the sharks would not eat the red drum fish because they fed them well. Did you know that the hammerhead sharks actually were scared of the divers air bubbles? On some sharks if you rub it from tail to head you can cut

I really had a good time and I up there.

Sea World **By Allison Skehan** 4th Grade

May 12th was an interesting day at Sea World. We touched dolphins which felt like wet, slick rubber. We also saw an octopus that had suction and other creatures. When we first cups on the bottom of its tentacles. went inside we saw a whole lot of fish. When we went to the Shamu Stadium, In the next part there was a giant Paula, our instructor, told how to tell a octopus. It was great. We could not male an female apart. Boys have see the octopus until all of a sudden a scratches on their back from fighting huge tentacle popped out and slammed and girls have two extra slits on their into the glass. We had nothing to worry stomachs for feeding the baby. We also learned that before you get to swim with the whales you have to do special training and have to wait around two to three years to get used to the animals. Paula also said that divers First we saw the Hammerhead Sharks. have to get in with the sharks, but the They also had Nurse sharks that alsharks won't attack as long as they're ways dogpiled or shall I say sharknot hungry. We learned how to use math with Beluga Whales, White Sided Dolphins, Killer Whales, Bottlenose Dolphins, sharks and penguins. We exited we were all out of breath. learned a lot.

a dolphin. It was funny because we cool because they have real big melare so big and they can do awesome tricks. The Marine Mammal pool was a place you can pet dolphins. The dolphins have scratches on their backs because that's how they get each others attention. When you touch the dolphins they fill weird, like slippery rubber. If something ever got caught in the dolphin's blow they could die. Sharks/the Cora Reef is really cool because they have hammerheads and tiger sharks. The sharks move like snakes but faster. When the people go in the sharks tank the sharks don't hurt them if the sharks are well fed. Also in the sharks tanks there are sting rays and moray eels. In the penguin center the penguin can swim really well. There are boxes on top of the penguin center that produce snow and when you go in the next day you will see the penguins sliding down the hills of snow that the boxes made. The water is so cold you would freeze before you

THE OZONA PRIMARY and Intermediate School gifted and talented students got to play with the bottlenose dolphins at the Marine Mammal Pool of Seaworld.

only Shamu. He would swim right up to the glass and we could see his eyes and even his ears! We tried to take a picture with all of us in it and Shamu swimming by, but I don't think it came out too good. Did you know that they are starting to send sounds underwater for the animals to hear so they can respond. That way instead of giving hand signals and blowing the surprise of him splashing us, he will hear the sound and know what to do. They use this technique on Shamu, the White-nosed Dolphins and the White Whales.

My fourth favorite was seeing the White-nosed Dolphins and the White Whales or Beluga Whales perform. The dolphins could touch a ball at least seven feet in the air! The Beluga Whales could touch it about four feet. We were lucky because they let us go in the back where we could see the White Whales and the dolphins perform. Wherever we went to the back of the stadium, the Beluga Whales kept making noises at us.

My fifth favorite was the penguins. They were so funny they would waddle around and jump into the water. Then they would speed up and jump back onto the land. Our guide told us that they would sit under the crushed ice machine and fall asleep. Then in the morning you would see a big clump of ice and some legs or flippers hanging out!

We had so much fun on our GT trip. I hope the kids that are reading this will try to work harder to improve their grades and can join the GT program

Looking forward to seeing you on the GT trip someday!

My Trip to Sea World **By Jenna Henderson Fifth Grade**

could eat in one day by using our brains doing math problems. The next pool we went to was the

marine mammal pool. This was my favorite pool out of the whole tour. There we saw the Beluga Whales and the White-Sided Dolphins. The Beluga Whale looked kind of funny because he had a dented in nose. Then we went to another section and went to the touch pool. There we got to touch and see what the White-Sided Dolphins felt like. They were eager to play with the leaves we put in the pool.

The next stop was the coral reef and shark area. There we got to see eels, different types of sharks, fish, sea horses and all the stages the sharks went through from the egg stage to the baby stage. We saw the Hammer-Head Shark and the Nurse Shark. The Nurse Shark had big long teeth about two and a half inches long on the front of his mouth. The Hammer-Head Shark's head looks exactly like a hammer.

The last stop we made was the penguin exhibit. There we got to see the rockhopper, the king, the chinstrap and gentoo penguins. The king penguins would stand up straight and act like a soldier. They had three flake-ice machines to keep it cool. At this cool exhibit we added up that the ice machines could produce up to 30,000 pounds of ice every day.

This was my trip to Seaworld. I thought it was a great honor to go and I thought all of this was pretty interesting because I want to be a marine bioligist when I grow up. I had a really great time there and hope I get this great honor again next year!

My Trip to Sea World **By Stephen Lara Fifth Grade**

On May 12, the Gifted and Talented students took a trip to Sea World. On this trip we learned alot about sea life. We worked some challenging math problems as we went to each animal station. The problems were solved by division, multiplication, and even fractions. These problems were about the different animal weights, the gallons of water used and how much food the animals ate. It was alot! We also saw different types of sea were two stadiums, a touch pool and a animals and we saw shark eggs that were shown in different stages of The first stadium we went to was growth. We visited the penguins and whole bunch of different awesome environment. They let our group go to

touched the bottom. Well thats all of tour trip to Sea World of Texas.

My Trip to Sea World **By Jared Bird 5th Grade**

Our trip was very fun and educational. My favorite thing was the sharks

My Sea World Trip **By Danny Anderson First Grade**

took us around the Sea World Park. I them healthy.

guin house, too.

to go back!

Sea World **By Ethan English First Grade**

I learned that killer whales were the top predators in the sea. Paula, our guide, told us that killer whales don't attack the divers because they are well fed at sea world.

We went to the dolphins next. I learned that the dolphin could jump 20 feet over the water surface. Did you know that dolphins could swim 15 or. 20 miles an hour? The dolphin's skin feels like rubber. I got to touch a real dolphin at the dolphin touch pool.

The guide took us to see the sharks. I saw hammerhead sharks, barracuda sharks, nurse sharks, bonnet sharks and carpet sharks. I learned that sharks have sharp spikes that grow toward its tail. Since the sharks are fed well they don't attack the divers.

I also saw sea coral, an octopus, seahorses and eels in huge salt water tanks.

Finally we went to the Penguin House. The guide showed us the ice machines that make ice fall from the ceiling. The ice made the penguins feel like they are at the North Pole. Mammal pool we actually got to touch

Sea World Math Trip **By Levi English Third Grade**

them, and how thick to make the glass

and stuff.

At Sea World I learned many things.

We went to the Shamu Stadium first. I learned that there was more than one Killer Whale. There were four!!! We saw the first second-generation Killer Whale born in public. It was also the first male Killer Whale ever born at San Antonio's Sea World. Did you know that whales and dolphins get scars from fighting? Next, we went to the White Whale stadium. I learned that Beluga Whales don't have a dorsal fin. Instead, they have a bony ridge to crack open holes in the ice so they can breath. I also learned that Beluga Whales have a big lemonlike thing on their head that receives echo-location. When we got ready to go the Beluga whales followed us!

When we went to the Marine

G. T. Trip to Sea World **By Derek Wiley Fourth Grade**

mals before. Beluga Whales are real

about, though. The glass is one and a half inches thick! The glass in the huge tank went from the floor to the ceiling and was eleven inches thick! Finally we got to see the sharks.

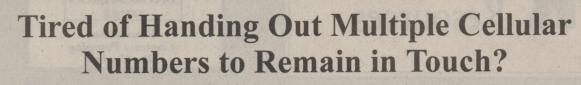

piled on top of each other. Finally, we saw this gigantic eel. He had to have been at least ten feet long! When we

My second favorite part was when we got to pet the dolphins! It was so much fun. They would come right up to us and we could pet them all we wanted. The best part is that there was no one else there. The dolphins in the First of all I liked everything pool were bottlenosed dolphins. They were not trained by anyone either.

My trip to Seaworld was fantastic! I learned a whole lot of interesting facts about the Whitesided Dolphin, the Killer Whale, the Beluga Whale, sharks and penguins from our tour guide Paula. We learned about science and did two math problems on each animal. We got to go behind the scenes where the trainers get their animals ready for the show. There walk-in penguin exhibit.

the Shamu Stadium. We got to learn a learned how they have adapted to their facts about the killer whale. Let me tell a special place where hardly any visiyou, they are huge! I don't think there tors are allowed which was the beluga is anybody in the whole solar system whales' tank. We had alot of fun and that is as big or bigger than a killer my favorite part was when we got to My third favorite was the one and whale. We found out how much they pet the dolphins.

The One Number Cellular Solution

Plateau Cellular and Cellink now enable you to be contacted at all times by giving out just one number.

Cellink gives a caller the ability to ring two phones by dialing one number, while still allowing each phone to operate independently.

Cellink will provide you with the flexibility and peace of mind knowing. that you are always in touch.

Cellink is available for only \$3.49 a month. This feature requires two full rate plans.

For complete details on Cellink and all the great telecommunication solutions from **Plateau contact:**
