Here At Home

By J. M. Forbes

Can't quite go along with the Congressman who suggested members of Congress be given a part of their salary income tax free. It would be a precedent and don't believe it's a good one. Congressmen pass the laws that govern us, and I feel all laws ought to apply to everyone, regardless of where he works or from whom he gets his pay. I realize it costs plenty to live in the national capital, but that seems to be a penalty one pays to be in a post of honor like that. It costs plenty to live in Muleshoe, for that matter.

Burs do soil a lot of good, but land farmer gets credit for his if they catch on fire they could farm for acreage turned back be a menace. We've had two fires like that so far but no property Adams suggests keeping burs take this matter up with the sprinkled if that's possible; or State Board of Directors of Texworking them lightly into the as Farm Bureau. This also has top soil to an extent that they'll taken up with the Bailey Coundo the most good and still pre- ty ASC office. vent blowing.

some civic body could make a Dates Set For cleaning up and beautification of our fair city. Education in the schools on the grade level on proper methods of paper waste disposal seems a good idea to me. Probably us adults are too old to learn that when you throw a piece of paper on the street or sidewalk it winds up in someone's doorway or yard.

MRS BONNIE HABERER, Pleasant Valley community, is again a subscriber to The Journal and thereby hangs a tale. When the community board met Tuesday night to go over plans for their new community building, male members of the board were aghast that she had sort of fallen behind on happenings in the area. To keep her informed and up to date on things, they contributed the price of a year's subscription to The Journal. She used to take the paper, hasn't in a year or so.

We feel flattered that these men would think a regular reading of The Journal is indispensable to the well informed person. We're glad to have Mrs. Haberer, truly a pioneer, and truly a community worker and builder, back on the list. And Roping Club and others interestwhile we're on the subject, we're ed are invited to attend a meetproud of Pleasant Valley, one of ing called for Friday night, to say, of all the communities of room. Texas. The things these people, who love their corner of God's earth, have done to improve their is urgent, and will concern the surroundings would take a big future of the annual Rodeo. volume to describe.

We know of another community that is stepping along pretty ast and that's Progress, right near Muleshoe. Some good people have been provided with good leadership and they're going right along on an ambitious program.

Bailey County was well repre- reau activities, ways and means trict Two Policy Execution meet- tions at the County, State and

Issues of National Convention National Farm Bureau Conven- Congress now plans to make to urge Congress to exempt the non-highway users from the tax. Some of the issues discussed Federal reciprocal trade laws, and tariff laws.

Bill Millen introduced the problem many Bailey County farmers are discussing these days about transferring cotton acreage from a dry land farm to an irrigated farm. We didn't get much backing from those that were present because the problem is nation wide. One of the greatest problems is that no one has been able to come up with a specific answer as to what constitutes a farm. This is a serious problem and we need the views and backing of every one.

Millen introduced another sub ject that Bailey County has run into: the loss of cotton acreage due to the turn back acres. According to Lonnie Bass, ASC Sec., Bailey County lost more than 6,-500 acres for the year of 1955. It seems that the dry land farmers turn their unplanted acreage heads too late for the irrigation back too late for the irrigation farmers to take advantage of planting this acreage. The dry but the county looses that acreage turned back unless it is was endangered. County Agent planted. Hub King agreed to

Muleshoe will take a healthy spurt this year, it appears from reports gathered by The Journal this week.

To date, local farmers have expressed intention to plant 232 acres to tomatoes.

:: Much of the tomatoes will be green wrapped, and what tomatoes become too ripe for that will be canned at Muleshoe Canning

"Buddy" Watson, of Mercedes, has been here the last several days interviewing farmers about tomatoes. He guarantees to operate a packing shed here this fall and to provide a market for the tomatoes grown here.

Carl Case, owner of Muleshoe Canning Co., said his plant will be ready to can those tomatoes which do not go into the green wrap. A good market exists now for canned tomatoes, he said.

Two farmers have expressed the intention of planting 40 acres each. Some farmers who have bought the new land and prepared it for crop this year, will turn to tomatoes because they have plenty of water and because their cotton allotment might be short.

"We can grow good tomatoes around Muleshoe", Mr. Case said. "Not only are they good, but our soil produces a high yield, and omatoes ought to be a good money crop." Mr. Case said the total acreage here this year might run to considerably more than the figures quoted above

and two sons, who have been in Texon the past year where Willis was Santa Fe station agent, are back home in Muleshoe. The it to their best personal interest Texon station has been closed to close the business. Their ad ferred to the local station.

Truck Registering

Farmers who wish to register a farm truck and take advantage of the law reducing the tax on such vehicle if used solely for farm purposes must this year sign an affidavit covering the situation, Hugh Freeman, tax assessor and collector said today.

He has copies of "Form 52-A", the affidavit to be signed before registering a farm truck or farm truck-tractor. The law prescribes a stiff penalty for swearing to false affidavit; therefore, it is requested that every farmer reg istering such a vehicle shall read the affidavit carefully.

The affidavit affirms that the said vehicle will be operated by the owner for the purpose of bus building which is alongside transporting livestock, etc., farm products to market or to a sale or processing plant, transportation of laborers or materials and tools, exclusively for use of the owner and FOR NO OTHER PUR-POSE WHATSOEVER.

It is recommended that farmers make themselves familiar with this form. Mr. Freeman will have it printed in next week's issue of The Journal for the bene fit of all concerned.

Saturday, March 12 The Milk Jug, operated the

past year by Mr. and Mrs. R. L. Crawford and Mr. and Mrs. V. O. Crawford, located on the Clovis Highway out of Muleshoe, will close its doors Saturday, according to announcement made this week.

The Crawfords state that they deeply regret the necessity for closing, but due to overwork and lack of sufficient help, they feel and Mr. Farrell has been trans- will be found on another page of

Area Contributed Goods Valued At \$94,370 To CROP Organization

Rev. Carrol Jones, director of the drive for Christian Rural Overseas Program in the county, has made the following report of the campaign recently concluded:

Rural Overseas Program in Texis a brief summary of the CROP upon the present season and program in this area in terms of commodities and cash raised: (This area roughly includes most of the Panhandle southward as comfort and hope to those who far as Olney).

Three car loads of wheat valued at Two car loads of mile valued at

of cotton valued at (processing and shipping added) Sixty eight (68) head of cattle processed etc. One hundred thirty (130) sheep

alued at Three goats valued at One car load of potatoes valued at Cash by trick-or-treat and

Rev. Ellis A Todd of Plainview is the CROP director in this area. Out of the 265 bales of cotton eported above, 54 came from Bailey, Cochran and Parmer The fiscal year of Christian counties. Forty-three of these bales came out of the territory as ended February 28. Following within a radius of 15 miles of Muleshoe. This gift of cotton (cash donated was used to buy cotton) is on its way to destitute places of the world to bring so desperately need it.

To the credit of the farmers \$11,000 and ginners in and around Muleshoe it should be said that this was a gift almost in its entirety Two hundred sixty five bales from the "grass roots".

WAYNE BRISTOW

Sports Editor

School BB Records

Looking back on the '55 basketball season, Jean Montgomery, center for the 2-AA champion Mulettes, stands out as the holder of one of the most outstanding records in the history of girls basketball at MHS. The tall brunette hook shot artist played her last game of high school basketball at Hereford when the Mulettes dropped their bi-district clash to the Dalhart Wolverines on March 1.

Jean stepped in as varsity center for the Mulettes mid-way through her sophomore year when the team lost their star to the marriage rule. That year she led her team's scoring attack in the state tournament. In the duration of her career she played 65 straight games with the chain being broken due to sickness when the locals met Littlefield in the second round of district play this year.

More than 1700 points have been hooped by Montgomery in the past three seasons. She reached a peak of 717 in '54-'55 play. A new MHS scoring record was set when Jean averaged 25.6 points per game for the past season. In the game with Farwell during the Amherst Invitational tournament she played her top game, scoring a total of 41

To Jean and every other member of the '55 Mulette goes credit for a job well done.

Holt Takes First In Austin Events

Outstanding in the triangular track meet between Texas. Houston U., and Texas A & M at Austin last Saturday, was Jimmy

the 880 in 2:24. Seven seconds under the 1954 relay team's best time, Muleshoe passed the stick off at a clip of 3:45.6. Darle Mason of Olton bested Jackie Tidwell, skimming the high hurdles at 17.9. Muleshoe's Eddie Wilt placed second in the mile with a time of 5:22. Gross and Parker tied at seven feet to take third place pole vault honors for the Mules. The locals finished out with Wimberley placing second in the 880, Spivey third in the 440, and Tidwell ran fourth in the low hurdle event. Coach Bill Taylor will take the boys to the Hereford Invitational meet on the 19th of this month where they will run against 26 high schools in this

Holt of Muleshoe. Texas had an easy time taking the meet with A & M placing second. In the freshman division Holt copped top honors on the 440 yard run, 49.8 and later in the afternoon brought TU another first while serving as anchor man on the mile relay team, and running the quarter in 49 flat.

Holt, after a very impressive high school track career, is well on the road to writing an outstanding record in the annals of the state university with three years of pounding the cinders still ahead of him.

WILL SAND STORMS COME THIS SPRING?

It is a standard joke you can stand in one spot and watch the Texas sun.

This has been particularly true the past two years. Many an East and South Texas housewife hurriedly removed her wash from the line to save it from a coat-

ing of West Texas dust last spring. On occasion, even the red see a lot of Texas if you just Nebraska cast a pall over the

Yet, the re-occurring dust storms are nothing to joke about. They are physical proof of the tragic destruction and loss of precious soil.

What are the prospects for

tions still exist in West Texas region for four years or more. and severe soil blowing since 1938 was experienced. At a general rule, conditions have not much improved since last year. In some places, moisture and crop conditions have deteriorated still further.

This doesn't mean that dust storms and wind erosion will be worse when the usual high winds of March and April come. It depends on the force and persistence of the spring winds and on the amount of rain that and white soils of Kansas and may yet fall. Fortunately, some rain has been received in parts and horn; oil bath air cleaner; of West Texas and the South Plains, but more is needed.

More than 4 million acres of land in the seven-state area were damaged by wind erosion this winter. If above normal winds come to the region this spring as they did last year, farmers probably will have a serious dust problem.

If the sand comes, it will again point up the need for adequate conservation practices. The government in the past has provided cooperative funds to encourage permanent improvements that will protect the soil in "blowing" areas. Protected land is the only sure solution to the annual problem.

of the low-price 3!

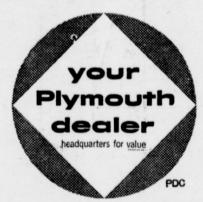

BIGGEST SIZE, SMOOTHEST PERFORMANCE, HIGHEST ECONOMY

Take a turn at the wheel behind Plymouth's new PowerFlow 117 engine-see why it's the smoothest, thriftiest 6 in the lowestprice field. Here's power for all driving needs, plus the super-smoothness of the PowerFlow's Chrome-Sealed Action. No other low-price car has it, and it's your guarantee of more years of gas-saving economy and trouble-free performance.

Taxicab operators, who depend on cars for a living, buy more PowerFlow 6's than all other makes combined . . . they say the PowerFlow 117 is the most economical, most efficient 6 ever built! Its L-head

design means fewer working parts, less friction. Its automatic choke meters each drop of fuel. Its bypass cooling system gives you quick warm-up in cold weather; dozens of other exclusive features promise you much lower operating expense.

The PowerFlow 117 engine is one big reason why the big swing this year is to the forward-looking Plymouth. Another is the new 167-hp Hy-Fire engine, the most powerful standard V-8 in Plymouth's field. Plan to drive a big, beautiful Plymouth with either of these two great powerplants soon-how about today?

Best buy new; better trade-in, too

ALL-NEW PLYMOUTH

lust like flyingwith NEW Shamrock CLOUD MASTER

MADE WITH AVIATION COMPONENTS

For driving that feels like flying, try Shamrock's new Cloud Master gasoline. And that comparison is more than accidental because the octane rating of new Cloud Master is way up and the octane is raised with the same aviation alkylate that was heretofore used only in the highest grade aviation fuels. This means an octane rating that exceeds the requirements of your car (no matter what car you drive). And it means that you get and keep getting power you paid for because new Cloud Master burns with fewer deposits. For new speed, new power, for all around top performance from your car, try Shamrock's new Cloud Master

New Cloud Master gasoline, like all Shamrock products . . .

AND IT'S EASY TO SEE WHY!

Ford is the leader in ride

Ford was first in its field to introduce Ball-Joint Front Suspension—the greatest advance in chassis design in 20 years. And, for '55, it's even better. Springs are set at an angle to smooth out even the tiniest bumps. It's the new Ford Angle-Poised Ride.

FORD IS THE LEADER IN ALL THE FEATURES THAT MAKE YOUR CAR WORTH MORE WHEN YOU BUY IT · WORTH MORE WHEN YOU SELL IT

Ford is the leader in styling

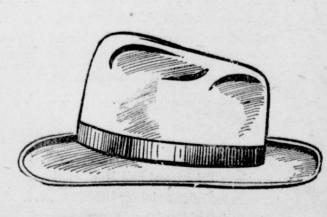

Motorists know that Ford has set the style trend in the industry for years. And now, with styling inspired by the fabulous Thunderbird, Ford is farther out front than ever!

Ford is the leader in V-8 power

Ford was first in its field (by 23 years) to provide the advantages of V-8 power. Since that time, Ford has built over 14,000,000 V-8 engines—more than all other makers combined! For 1955, Ford offers two new and mighty V-8's, as well as a most modern Six-all with the split-second response of Trigger-Torque power!

Southwestern Life

pretty good when I ran into an article that alarmed me. According to this article,

another organization is after Congress to put

stiffer bans on comic books and television programs, on the grounds that horror comics and gun- play television shows are contributing to the delinquency of the children of this na-

tion. This group wants laws passed practically banning comics and T. V. shows. I sympathize with this group, but I believe they're making a big mistake.

Look at it this way: suppose they get a law passed banning comics and T. V. crime shows, and the rate of child delinquency continues about like it is?

Where is that gonna leave the parents? Who're they gonna put the blame on then?

I tell you, comic books and T. V. shows are the greatest inventions ever perfected for parents selves to blame for the kind of children they're raising, and they get some laws passed eliminat ing em and delinquency stays about like it is and they're liable to wake up with the spotlight shining in their own eyes.

The last thing a parent wants s the removal of the best alibi

Tone the comics down if they like, spill a little less blood on television, but when you start talking about banning em altogether, you're knocking out one of the best props a parent ever had for explaning the type of child he's bringing up, and if industry. grownups are smart they'll go easy on this.

Yours faithfully,

Girl Scouts Observe Anniversary

The Girl Scouts, who will be 43 years old next Saturday (March 12) have adopted "Believe, Belong, Build" as their theme. It is a happy phrase and one that Scouts and their leaders put into practice daily.

What we believe deeply is what we will work for devoutly. The women and men, too of Muleshoe who serve on the Girl Scout Council and its committees, and those who assume the responsibility of leading troops, are living examples of the truth of this statement. They work long and hard for Scouting because they believe in it with all their hearts. These grownups make it possible for Muleshoe to sustain a flourishing, vital, Girl Scout program.

As for the word "Belong" - what better example can be given than the fact that there are 230 Girl Scouts in Muleshoe today? The continuous growth and spread of Girl Scouting is a matter of wonder and amazement, for it began nationally with a handful of girls and today registers more than a million and a half girl members in every state, territory, and possessions. There are U. S. A. Girl Scout Troops in about 40 foreign lands, also, made up of youngsters whose parents have overseas military or business assignments. Belonging to the Girl Scouts means a great deal to them for it is a link with home and a way of preparing themselves for the time when they return to their own country.

"Build" is a good American word, typical of the energy and courage which has made our country strong. It is good that the young Scouts have included it in their theme for it shows that theirs is a dynamic program and one which is constantly looking forward. Because the Scouts believe in being good citizens they belong to an organization which prepares them well for the important job ahead, and both believing and belonging they are building well for the future - their own and our

SEEDS CONTAIN THE LIFE WHICH WE ALL WANT

There i s in this village the Florida Research and Water Company. It owns the local water company and is interested in the study of live seeds small enough to eat alive. It also believes in 'raw" water and "raw" milk that is, pure spring water which has not had the living matter cilled by chlorine, and pure Mmes. Bobby Gable and Jerry milk which has not been pastsurized. It recommends the eating of more "whole cereals",

Babson Park, Fla., March 10-1"raw" fruits, especially those This story may be valueless; or it consisting targely of live seeds, ripe seeds; also live "sprouts and buds". It believes in juicing machines, but not for live seeds.

Let me illustrate: It is imposprobably unwise to swallow live orange, acerola, or apple seeds, unless they are ground; but ripe tomatoes, strawberries, blackberries, blueberries, bananas figs, and pomegranates should be eaten, seeds and all, uncooked. Of course, all raw fruit and vegetables should be carefully washed. The acerola berry of Puerto Rico is reported to have fifty times the Vitamin C-per gram- contained in an orange. The second paragraph on page 59 of the Reader's Digest for Jan-Base Hospital Tuesday afternoon. more "raw" vegetables, and uary, 1955, is thought-provoking.

SHOULD PEAS BE SWALLOWED AS PILLS?

All agree that string beans may be cut up and cooked for a few minutes. Some people, how-ever, believe that sunflower seeds, peas, small beans, nuts, and psyllium, onion, and celery seeds should only be softened in warm water and swallowed like pills! The thought is that all vegetables have three functions: (1) Supplying vitamins, minerals, etc.; (2) supplying much-needed bulk; and (3) through their LIVING SEEDS supplying that unknown and intangible

'something" known as LIFE. That people lived, before the due to their feeding upon LIFE. Sufficient experiments have not been completed to prove whether live seeds should or should not be eaten uncrushed, before they are "killed" by juicing machines or boiling. They, however, are part of my diet.

SHOULD WE EAT

COOKED EGGS? Boiling anything long enough kills LIFE. It is believed that same canning, dehydrating, or freezing also destroyes this LIFE — though not the vitamins of us must seek His help each and minerals. However, the age day to keep from falling into of peas, beans and corn does not affect their life-giving powers. Corn kernels over 3,000 years old, taken from Egyptian tombs, will sprout the same as if gathered yesterday. It is debatable whether we should eat raw or cooked eggs. When I had T. B. my doctor insisted that I eat only uncooked raw fertile eggs containing LIFE. He also recommended the uncooked coral of lobsters and the live roe of fish.

All beautiful birds live only on live seeds, live worms, and live spring water. Their food must be ALIVE. The only birds which will sible to eat a peach seed, and eat dead meat are the horrible crows and buzzards; dangerous insects and bacteria will also eat dead things. The same principle applies to animals of the forest. Certain moldy cheeses and yeasts contain LIFE. Live seeds in 15-cent envelopes car be purchased at any hardware

HOW TO KEEP BEAUTIFUL

Those who have seen any fish from mackerel to sharks) pull ed alive out of the ocean have been impressed by their natural beauty proportions. When ana lyzing the diet of these fish, we learn that the smallest fish live on minute animal and plant life known as plankton and algae: that the larger fish live on the smaller live fish; and so on up to the whale. But, all insist their

food be ALIVE. I am not vouching for the theory of LIFE, but it does seem as if the above evidence should be considered when selecting our diet. Once, no doctor had recommended B-12 pills or brewer's yeast; but today they recommend them. Perhaps we will live to see doctors recommend the addition of non-fattening live seeds or phosphatides to our diets.

Today's Meditation

Read I Peter 5:6-11.

Let us lay aside every weight and the sin which doth so easily beset us. (Hebrews 12:1.)

It was at a meeting of the Alcoholics Anonymous group. Every member there had experienced the awful grip of alcohol. Most of them had had their lives, jobs and families almost ruined by drink.

One of the things that caused me to wonder was the phrase heard many times: "I am an alcoholic". When I asked one of days of cooking, to 120 or even the members why they said "I 400 years of age MAY have been am" instead of "I was", he replied: "Every day I admit I am an alcoholic. The temptation is still there. Only by admitting that I am an alcoholic, and then trying to live sober one day at a time, can I keep sober. And I could not do that unless I had

God's help, His spiritual power.' Likewise, each of us needs to remember that we are sinners. We may not be alcoholics, but we have our temptations. It is necessary for us to keep ourselves humble before God. Each sin. Even the best of us is a sinner in need of God's presence and power.

PRAYER

Father, help me to live each day so close to Thee that, though tempted, I may not fall. May I see that as long as I am in the flesh I will face temptations — and will need Thy strength to overcome them; through Christ, our Lord.

GRAVEL HAULING

Who says you can't have getaway and gas saving too?

(maybe you'd better try Variable Pitch Dynaflow!!)

s any automotive engineer will tell you, A the goal in automatic transmissions has long been a design that would give top acceleration and top gas mileage-and still be absolutely smooth.

Well, it's easy to step up acceleration, or gas mileage-but tough to do both together -unless a lot of gearshifting takes place. which cuts down on smoothness.

So Buick engineers looked to aviation for the answer-and brother! what a wondrous new magic they came up with!

They took a leaf from today's plane propeller - which switches the pitch of its blades one way for quick take-off - and another way for better gas mileage aloft.

They brought the same principle to Dynaflow Drive*-to the twenty propeller-like blades in the Dynaflow "stator." They engineered these blades to swivel like the blades of the plane propeller-and with the same results.

In cruising and all normal driving, the blades are angled for economy - and you get a lot more miles from a tankful of gas.

But when you have to move instantlywhen you need quick getaway, or a sudden burst of safety-surge power to get out of a tight spot - you just press down that gas pedal, and you're off in a split second.

You've never felt anything like it before -because there's never been anything like it before in an automobile.

It's action that's sheer thrill-action that's backed by the highest V8 horsepowers in Buick history-action that's sending Buick sales soaring to record-high levels.

Come in and try it, at the wheel of a Buick Special, Century, Super or ROADMASTER. You have nothing to loseand the year's most thrilling buy to meet.

*Dynaslow Drive is standard on Roadmaster, optional at extra

Meet the Taylor family! All the Taylors, including Alex III, aged 10, John, 9, Holly, 6, and David, 21/2, now put their savings-safely, conveniently and profitably-in their local insured Savings and Loan Association.

Do you know what a Savings and Loan Association can do for your family?

The questions and answers below will tell you how insured Savings and Loan Associations are now serving 13 millions of your fellow Americans -and how they can serve you and your family.

- Q. How do you start to save? A. You can start with as little as \$1 to \$5.
- Q. How much money do savings accounts earn? A. You get excellent returns. That's because the Associations invest most of their funds in sound, steady-paying home mortgages.
- Q. What guarantees the safety of your savings? A. They are protected by good management and substantial reserves. And they are insured up to \$10,000 by the Federal Savings and Loan Insurance Corporation-an agency of the

U. S. Government.

- Q. How popular have the insured Savings and Loan Associations become?
- A. Americans are now putting more of their

- savings account dollars into them than anywhere else!
- Q. Who runs the Associations? A. Responsible, experienced people of your own community.
- Q. What kind of loans do they make? A. Only property loans—with the emphasis on
- mortgages for home buying, building and alterations O. How important are their loan services? A. They are now the nation's largest single
- source of home mortgage loans! They make liberal loans -quickly and at moderate rates. Q. What's the best time to get to know your local insured Savings and Loan Association?
- Right now! Drop in today -and see what a fine place it is to do business!

Mary Sue Byers Is Homemaker Of Tomorrow

The Betty Crocker Homemaker Tomorrow in the Three Way of Tomorrow in the Three Way school is Mary Sue Byers. She Rainbow For Girls received the highest score in a written examination which tested the homemaking knowledge and tiated into the Order of Rainbow attitudes of the senior girls in the graduating class. She will be Ginger Gaede as Worthy Advisentered in competition to name this state's candidate for the title of All-American Homemaker of Tomorrow. Also, she

nation's public, private and parochial high schools in Phil-

General Mills is the sponsor of this program designeed to assist schools in building in young women a deeper appthe American home and the Miss Dawson And personal qualities necessary to sucecessful homemaking.

A scholarship of \$1,500 will be awarded each state winner, and she will receive a trip with her school advisor to Washington D. C., colonial Williamsburg, Va., and Philadelphia. Her school will receive a set of the Encyclopedia Britannica

The scholarship of the young women named All-American Homemaker of Tomorrow will be ncreased to \$5,000.

The 50-minute written examnation designed and judged by Science Research Associates of Chicago, which was given to all participants in this national search, consisted of multiple choice and subjective questions which tested the students' attitude and knowledge in the major areas of Homemaking.

Each girl who took the test received a 24-page homemaking guide which will assist her in pursuing the career of home-

JOHNSON BEAUTY SHOP

Layne Building on Clovis Hi-way, Muleshoe

than meets the eye!

This is beauty with a bonus . . . for Chevrolet styling is designed to add safety and comfort while you drive, and to return greater value when you trade.

Truly modern lines are shaped by usefulness. You can see what we mean in the deep crystal curve of Chevrolet's Sweep-Sight windshield . . . a dramatic style note, certainly, but one that stems from the need for wider, safer vision. Or take highset taillights—they add to the impressive length of line . . . but they are up there where they can be seen for safety's sake; and as convenient guides in parking. So, too, with the jutting peaks over the headlights.

The smart louvers across the hood aren't just decoration . . . they mark the intake for the High-Level ventilation system for cleaner, fresher air. And the whole shape of the body-its lowness, the dipped belt line-is merely a reflection of a lowered center of gravity, the added stability.

This is truly functional styling that serves you better every mile, and preserves its value against the distant day when you trade. This is Body by Fisher-another Chevrolet exclusive in the low-price field. Come in and let us demonstrate that this new Chevrolet is just as exciting to drive as to look at!

New Chevrolet In Novel Contest

You or a member of your family can win a 1955 Chevrolet and a \$1,000 U. S. Savings Bond to boot in a contest beginning here March 1 under the sponsorship of the Chevrolet Motor Division and C. & H. Chevrolet Co.

To enter the Chevrolet "Miracle Mile" contest, you need merely fill out an entry form, write in 25 words or less why you would like to own a 1955 Chevrolet and deposit the entry in the mailbox provided at C. & H. Others of driving age in the family may also enter by preparing the material on plain paper and attaching them to the official form, Arthur Crow of the

Entry forms may be obtained at the dealership, Mr. Crow said.

There's a bonus of a \$1,000 bond in it for every winner who takes a demonstration ride in a new Chevrolet at the time he turns in the entry form. Besides writing frankly why he would like to own a new Chevrolet each contestant must answer four elementary questions about the car's mechanical features. answers for which may be found in the contest booklet, Mr. Crow said. Entries are being judged nationally on the basis of sincerity and originality rather than writing excellence, grammar and vocabulary.

The contest ends May 9 and is divided into six contest periods. In each contest period, 16 new Chevrolet Bel Air sedans and a sports model will be awarded nationally. Each winner who has taken a "Miracle Mile" ride will be given a \$1,000 bond.

If a winner has purchased a new Chevrolet during the contest,
