## I'm About To Lose Some Sleep

A LONG comes a letter from the home office saying May is National Delco-Light Demonstration Month. And such being the case, I am urged to give as many of you folks as possible the opportunity to see what happens when bright, safe Delco-Light takes the place of dim and dangerous lamps and lanterns. Here is the way I do it. I drive out to your place with my demonstrating car, run a small wire from the Delco-Light on my car to your house and connect it to a portable table lamp. Then I sit back and say, "Just turn the switch."

Of course, I make these demonstrations at night, for Delco-Light, good as it is, can't compete with the sun. This means I lose a lot of sleep. But what I lose in sleep I make up with the fun I get out of giving you an evening of education and entertainment.

Well, May hath 27 working nights. That means I make 27 night demonstrations. Who's first? Write, phone, or call for appointment. No cost to you. No obligation. This is my party. You'll enjoy it. P. S. Don't worry about my losing sleep. Chances are
