## SCOOP SEZ

By J. M. Forbes

### MARION WAGGONER

Marion Waggoner, one of those working Wagoner boys, has been added to the advertising staff of The Journal. Marion, who has been with The Journal's composing room staff since 1951, when he started work in off-school hours, is another home boy who has made good. He will work as hard to please those merchants and business people on whom he calls as he has to bring out the work correctly in the shop.

Of course, Mrs. Irma Willis, with The Journal for several years as advertising manager will remain in her present capacity. Fact is, the town is getting too large for one person to service all accounts. Others of the office staff are available also to take care of the needs of the paper's patrons, and are anxious to help them in any way they can.

Drilling activity in Bailey County appears to be pretty active. High Plains Water District reports there were 40 well completions in April, while 53 new permits were issued. In Parmer county 24 wells were completed, 10 new permits issued. In Cochran, 20 wells, 11 permits.

### PLEASE CLOSE THOSE ABANDONED WELLS!

The Water District invented that slogan above, not we, but we have been urged many times to call attention to the danger of leaving wells open; it not only is dangerous, but there is a law requiring that abandoned wells be closed, I believe.

We read in "The Cross Section", publication of the District, that District Attempts To Establish Ground Water Recharge as Great Plains Practice. The Great Plains Bill was passed by the last Congress to further the cause of Soil and Water Conservation in our area.

Now information has been presented to the director of the SCD in Washington on the desirability of including the ground water recharge program as a part of the new practices adopted by the SCD.

Meanwhile some good reports on water recharge have come out of Floyd county. Bill Broadhurst, Water District hydrologist, reports wells in natural lakes and that county is taking more than one million gallons of water per day. Many individuals over the Plains have installed dual purpose wells in natural lakes and report good results. These include H. M. Gable, of Muleshoe. We feel these experiments ought to be continued and the program vigorously pursued. We hope the current rainy spell will not cause Plains people to forget that our water table is steadily going downward.

If I keep putting people's names in this column I'll wind up with my hand on my head and a big bump under it. But Harold King says he'll vouch for it that when a friend asked Raymond Green, the farmer, why he was grousing about so much rain, Raymond replied that the mud was so bad he couldn't get to the mail box to get his drouth relief check!

Mrs. Dave Aylesworth says the man, visiting here from Fort Worth was accused of having a very deep tan on his face. "Man", replied the Cow Town citizen, "that ain't tan, that's rust." And that ought to about wind up the rainy season jokes for a while.

### The Weather

Friday	83	33
Saturday	74	54
Sunday	59	50

### REV. EDWIN HALL TO MULESHOE

## Several Changes In Appointments Of Methodist Pastors In County

Several changes in Methodist ministers for churches in the Muleshoe area were announced at the close of the annual Northwest Conference of Methodist Churches in Amarillo Friday evening.

Rev. Clarence Stephens, who has been pastor of the Muleshoe Methodist Church for the past three years, has been transferred to Seymour, and Rev. Edwin L. Hall has been named pastor of the church here, transferring from St. Paul's in Pampa.

Rev. Roy Havens, of the Progress church has been transferred to Sparenberg in the Big Spring district. He will be replaced by Rev. William H. Watson, Jr., at Progress.

## City Council Discusses Plans For Summer Paving And Sewer Projects In The City of Muleshoe

The Muleshoe City Council met Wednesday afternoon for a brief session, devoted largely to a discussion of summer work projects including paving and making needed changes in sewer lines.

City engineer Ralph Douglas met with the Council and explained what would be needed this summer in order to be able to supply facilities and paving to

the new elementary school, in the western part of town. Douglas also discussed some of the problems arising from the proposed summer paving program.

The pending request of General Telephone for a rate increase, was discussed by the Council, but no action was taken.

The Council also granted the

JayCees permission to hold the teenage road-e-o Saturday and Sunday in the street north of the high school, on Saturday, and on the west side of the courthouse square Sunday afternoon. Present were Mayor Bovell, and councilmen Morris Douglas, Ernest Kerr, Horace Blackburn, and Houston Hart.

## DIGGING STORM CELLAR

With the recent storm scares, a large number of local people are constructing storm shelters such as this one being built by Frank Mooney. (Staff Photo)

### TAKE TO THE DUGOUTS

## Storm Cellar Interest Rising After Storms

Tornado scares and warnings this spring have made folks in this part of the country extremely conscious of the danger of storms and unusual weather conditions. Not usually noted for the number of storms other parts of the state are, the Plains this spring have sustained frightful damage and loss of lives from twisters and floods.

It follows that the security of a storm cellar might be desirable. And folks in Muleshoe are joining people all over the area

in constructing cellars as rapidly as they can.

Although it is not known just how many cellars are under construction here now, since many people are building their own, lumber dealers and contractors report more interest than usual in this type of building at present.

One dealer told the Journal that he had received a number of inquiries, but that he was building few, due largely to the cost, usually from \$350 to \$600. "Folks may be scared", he said, "but not many are that scared".

In a serious vein, he did point out that a large number of people are enlarging and remodeling their cellars.

Other lumber dealers report some activity by their crews, but for the most part, homeowners are digging their own shelters.

The usual type of cellar has concrete walls, a concrete floor and door, and is usually about seven feet wide, by seven feet deep and eight feet long. At least one cellar being built now is luxurious to the point of containing a pool table to while away the time.

During recent tornado warnings, those with cellars already built found them crowded with friends, and in some cases strangers, all seeking protection from the rampaging elements.

### STUDIES ARC WELDING

Jack Black, of Muleshoe, is among those enrolled for a short course in arc welding being conducted this week at Texas Tech.

## Arthur M. Brown To Direct Sales Class

ARTHUR M. BROWN

Merchants of Muleshoe and their employees, along with other salespeople in the city, have arranged for a week of special training dealing with effective business conversation as one of the important techniques of present-day selling and service to customers.

This training program is sponsored by the Chamber of Commerce with meetings scheduled each night Monday through Thursday, beginning June 10 at 7:30 PM in the High School.

Entitled "TELL IT WELL (TO SELL IT WELL)," daily conferences will be directed by Arthur M. Brown, Retail Specialist from the University of Texas. Mr. Brown has been active in retail and wholesale selling for a number of years and has had considerable experience with both large and small organizations.

Senn Slemmons has announced that course participants will include owners, managers, and employees of department stores, banks, furniture stores, automobile dealerships, variety stores, drug stores and other retail wholesale and service organizations.

Business speech in this program is approached from the basis that the best speaking is done by an able person, who has something to say and the ability to say it. Experienced and inexperienced personnel will have an opportunity to gain understanding and practice in techniques of conversation designed to help them become better salespeople and of greater service to their customers.

This educational program is made possible through the cooperation of the Chamber of Commerce, The University of Texas, Division of Extension, and the Texas education agency.

Enrollment limited to 25 persons, has already been filled.

### IF RAINS CONTINUE

## West Plains May Lead The State In Cotton Production In 1957

Although Texas and the Plains country specifically, scored high in the cotton producing areas of the country last year, wet weather may change the picture for the current year, according to a representative of the National Cotton Council here last week.

Heavy rains, while breaking the long drouth, have also caused considerable delays in planting cotton in many sectors of the state, including most of the cotton producing counties on the high plains.

South Texas has been plagued by high water and other ravages of nature, while many of the Plains counties have received

more moisture already this spring than their entire total rainfall in 1956. Washouts and hailouts in the fields of cotton already planted have caused replanting to become a certainty for many farmers.

Bailey, Cochran, and Parmer counties apparently have suffered less than any other counties in the area insofar as receiving too much rain is concerned. Although some sections of the south part of the county will have to replant, the largest portion of this county has a good stand of cotton up and in good shape, barring further heavy rains.

Rainfall at Muleshoe, less than received in the south end of the county, already totals more than the entire moisture received last year. Rainfall here through Sunday night of this week measured 8.58 inches, with the 1956 total only 8.32. Prospects for more rain later this week were forecast.

Even Lubbock and Hale counties, leaders in cotton producing, are delayed, by weather, giving the west plains a head start this spring. If rains continue, the outlook for a good crop of high quality cotton in Texas appears to be dim indeed, except for isolated counties such as Bailey, Parmer and Cochran.

## Municipal Pool Opened Sunday For Summer

The municipal swimming pool opened here Sunday afternoon for the summer season, coach Wayne Mantooth has announced. The pool is open every week day from 1 to 9 pm, and on Sunday from 1 to 6 pm.

Swimming classes are held at 9 am on Monday, Wednesday and Friday under the direction of trained swimming instructors.

Single admission tickets for children are 25 cents and 35 cents for adults. Season tickets for children may be purchased for \$5, and adult season tickets are \$7.50.

The pool may be rented for parties from 6 to 9 pm, by contacting Mantooth at the pool office.

Lifeguards at the pool this summer are Charles McClure and Bobby Sanders.

## Samuel Donaldson Receives Award

Samuel T. Donaldson, a graduate of Muleshoe high school in 1954, and who received his B. S. degree in mathematics June 3 from Texas Tech, was awarded a Convair Aircraft post graduate grant of \$1,000 for advanced study.

Sam has accepted a part time job instructorship in math at Tech for the coming school year, and expects to receive his masters in science in June, 1958.

## Continued Rain Plague Farms In South County

Not since 1949 has so much rainfall been seen in Bailey county as has fallen the first five months and one week of 1957. The same period of 1949 recorded moisture amounting to 12.55 inches in Muleshoe, and at some parts of the southern sector of the county, rainfall this year has passed the 11 inch mark.

Lakes are standing in water as much as five feet; lakes that

have not contained enough water to wash a handkerchief in seven years.

Barrow ditches are standing full, with more water than has been seen in them since the memory of man runneth not to the contrary.

Roadways have been awash with swiftly moving water torrents, and where once wind erosion was a major problem, today water erosion is even more dangerous.

Most fields are far too wet to work. Hundreds of acres of newly planted and newly sprouted cotton have been wiped out by high water and hail storms. No accurate estimate is available on how many acres will have to be replanted, and time is growing short for getting a crop in in time to make the fall harvest.

Where they can, most farmers in the south part of the county are using sandfighters to break the crust caused by rainfall.

## New Manager Of Gas Co. On Job

R. G. "Doc" Botkin has arrived in Muleshoe to take over his duties as manager of the local Pioneer Gas Company. He is succeeding Ralph Mardis, who has been manager here for the last several years.

Botkin has been assistant district manager at Floydada the last two years. He and Mrs. Botkin have two school age children, Connie Lou 7, and Richard 6. They have rented a house from Jack Julian, located on West 20th street.

Mr. and Mrs. Mardis and little son will be moving soon to Floydada, where he will become district manager for Pioneer.

## Teenage Road-e-o Saturday-Sunday By JayCee Club

The JayCee sponsored teenage road-e-o will be held in Muleshoe Saturday afternoon in the black between the Junior and senior high schools, it was announced this week. The regional finals to be held Sunday afternoon, will be on the west side of the courthouse square, also sponsored by the Muleshoe JayCees.

A representative of the City of Muleshoe will present awards to winners in the regional contest. The road-e-o is one of a series of similar events held annually throughout the country, and is designed to test the driving skill and knowledge of teenage drivers.

### OKLAHOMA VISITORS

Mr. and Mrs. Charles Neely and family returned to their home in Tulsa, Oklahoma Sunday after spending a week visiting their daughter, Mrs. Raymond Treider, Jr., and family. The Treiders had spent the previous week in Tulsa.

## STORM CLOUDS OVER MULESHOE

CLOUDS LIKE THIS ONE last week, contained twisters and threats of twisters to this area, and caused general alarm among the populace. Hovering north of town, several small twisters were reported sighted in the blackness of the cloud. (Staff Photo)

# SOCIETY NEWS

Page 2, THE MULESHOE JOURNAL, Thursday, June 6, 1957

## Delta Kappa Gamma Retreat Held In Plainview May 31

Committee chairman and officers of Gamma Iota Chapter of Delta Kappa Gamma met in the Raleigh in Plainview Friday evening, May 31. A delicious salad supper was served. Mrs. Sam T. Bryan of Happy led the group in singing several of the Delta Kappa Gamma songs that were sung at the state convention.

Program plans were made for 1957-58 emphasizing the International Program Focus—"Professional Growth: Living a Productive Life".

Mrs. Willie Merle Haithecock and J. B. Kidd of Plainview were hostesses at a lovely breakfast at 8:30 Saturday morning in the Women's clubhouse. Mrs. A. L. Shaw brought an inspirational devotional on "What Makes the Heart Glow".

Mrs. J. B. Kidd, Gamma Iota president, presided during the planning meeting in which recommendations, suggestions, and excellent plans were made to develop the new program.

The members had lunch at the Alocve and then returned to the Club House to conclude the work conference.

Those attending were Mrs. Beulah Henderson and Miss Mil-

## Hi-Lo Piano Club Resumes Meeting Next September

The Hi-Lo Piano club voted May 28 to discontinue monthly meetings for the summer, and to resume the regular meetings in September. The May 28 discussion was held in Fellowship Hall at 8 p.m.

Mrs. J. K. Adams, who has served as club president for three years was presented a gift by Mrs. Sam McKinstry on behalf of the club. Mrs. McKinstry also discussed the summer piano schedule which began June 3.

Twenty-three students presented piano selections. Hal Anderson, accompanied by his mother at the piano, presented several accordion selections.

Punch and cookies were served by Mrs. Gordon Tiller, T. L. Kitchens, L. D. Barbee, J. L. Smallwood and J. H. Evans.

## Carolyn Sue McCall, Burley Roberts Married May 30 In Bula Baptist Church

Miss Carolyn Sue McCall, daughter of Mr. and Mrs. R. P. McCall of Enochs, and Mr. Burley Roberts, son of Mrs. Bertha Roberts, also of Enochs, were married May 30 at 8 p.m. in the First Baptist Church at Enochs. Rev. Vernon Whitfield officiated at the single ring ceremony.

Given in marriage by her father, the bride was radiant in a silk taffeta gown fashioned along princess lines, featuring a wide scooped neckline. The yolk, sleeves and front panel which extended to the hemline were of embroidered lace, completed by gauntlets worn over the hands. The flared ballerina length skirt was accented by a bustle bow effect. The fingertip veil of embroidered lace was complimented with seed pearls. She carried a white Bible with a bouquet of white carnations and orchid violets.

For traveling the bride chose a two piece yellow and brown tweed suit of silk-linen, with white accessories.

Mrs. John Henry Parkman of Littlefield was pianist, and Mrs. Donald Joe Cox sang, "Because", and "Always".

Norvelle Roberts, brother of the bridegroom, was best man, and Arvin Stroud was usher. Candelights were Jim Pat Claunch and Junior Austin.

Marilyn Jean McCall was flower girl, and Donny McCall was ring bearer.

Attendants  
All the feminine attendants were dressed in identical orchid

## Beverly Latham Is Honoree Friday At Bridal Shower

BULA (Special) — Miss Beverly Latham, bride-elect of Warner DeSautell was honored Friday, May 31 with a bridal gift shower in the home of Mrs. Fred Locker.

Hostesses were Misses Shirley Cox, Margaret King, Linda Stokesberry, June Hicks, Dorothy Harris, Glenda Tidwell, Arlene Hogue and Loretta Locker.

Guests were registered by Misses Tidwell, Hogue and Cox, who presided at the serving table, decorated with a pink cloth and centered with an arrangement of orange blossoms and pink roses flanked with white tapers.

Pink punch and individual cakes with pink and white icing were served.

Gifts were displayed in a bedroom.

Guests were greeted by Miss Latham, her mother, Mrs. John Latham, and Mrs. DeSautell, mother of the bridegroom-to-be.

The hostess gift was an heirloom bedspread.

## Miss Wiseman To Wed Lt. Chalker

Mr. and Mrs. Thomas Milton Wiseman of Sudan, announce the engagement and approaching marriage of their daughter, Maxine, to Lt. Marion Price Chalker, Jr.

Miss Wiseman was graduated from North Texas State College at Denton, with a Bachelor of Music degree. She was a member of Alpha Delta Pi, National Sorority. She is employed as a teacher at Tachikawa Air Base near Tokyo, Japan.

## Too Hot for Cooking? Try These Fish Sticks

BY DOROTHY MADDOX

FROZEN fish sticks are a delicious answer to the hot-day question—what can I have for dinner that's good and easy to prepare?

### Quick Fish Stick Dinner (4 servings)

Scop out centers of 4 tomatoes, season with salt and pepper. On a large baking sheet arrange tomatoes and 1 package frozen fish sticks. (Fish sticks need no further preparation). Bake at 425 degrees F. (hot oven) 15 to 20 minutes. Fill centers of tomatoes with mint-glazed peas. Dot with butter or margarine.

### Mint-Glazed Peas

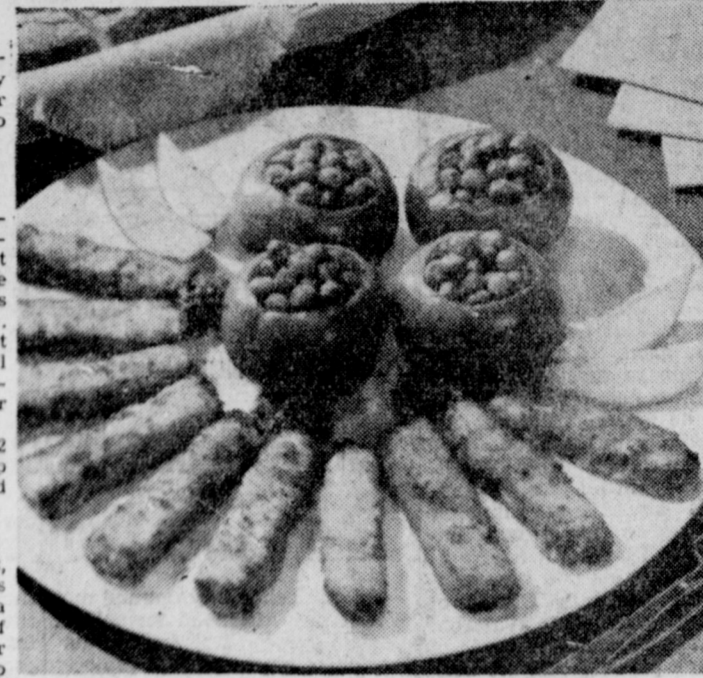

Simmer 2 cups cooked peas with ¼ cup each of butter or margarine and sugar and chopped mint.

### Fish Sticks in Mustard Toast

For each box of fish sticks, cut the crusts from 10 thin slices of bread. Roll the bread with a rolling pin. Brush both sides of the bread with the melted butter or margarine and spread the top side with a prepared mustard.

### Fish Stick Canape Tray

Each 10-ounce box of fish sticks will make 30 bite-size

An ideal quick-dinner dish when the weather's hot would include frozen fish sticks. Tomatoes stuffed with mint-glazed peas are an added lure.

canapes. Cut each stick into three pieces. Follow directions on package for heating and browning. Serve hot, with cocktail picks and a bowl of Blue Cheese Sauce as a dip.

Blue Cheese Sauce: Two cups mayonnaise, 1 tablespoon chopped chives, 1 tablespoon prepared parsley, 2 teaspoons prepared mustard, ¼ cup grated blue cheese.

Mix all ingredients together and serve in a bowl, garnished with parsley or watercress sprigs.

Reception  
At their reception held immediately following the ceremony, a color scheme of orchid, pink and white was carried out in the decorations. Lighted tapers rising from crystal candelabra highlighted the brides table, which was laid with a floor length cloth of lace over orchid. A three tiered cake topped by a miniature bridal couple and white frosting, was decorated with orchids. The bridal bouquets were used to complete the table decorations. Jo Ann Hubbard, cousin of the bridegroom, registered the guests. Brenda McCall, cousin of the bride, and Myrlene Nichols served at the reception.

Following a wedding trip to points in New Mexico, Mr. and Mrs. Roberts will be at home in Lubbock, where both will attend Draughon's Business College.

Both the bride and bridegroom attended Bula schools.

PROMOTED TO BRANCH MANAGER  
Paul Gardner, son of Mr. and Mrs. A. J. Gardner of Muleshoe, has been promoted to branch manager of the Tyler, Texas branch of Floyd West Insurance Company, and will move there from Midland on July 1.

Paul has only been with the company three years, and has advanced rapidly.

### Bridal Shower For Laverne George At Bula Friday

BULA (Special) — Miss Laverne George, bride-elect of Jay Grissom, was complimented with a bridal shower in the Bula school lunchroom Friday afternoon.

Hostesses were Meses J. M. Angel, Guy Sanders, R. P. McCall, Tay Seagler, Donald Griscendorf, John Hubbard, L. G. Harris, A. C. Archer, Carol Pearson, and Ralph Beasley.

The serving table was covered in a blue linen cloth, centered with a floral arrangement of blue mums in a white vase. Table appointments were silver and crystal.

Miss Dolly Thomas registered

the guests, and Meses Joann Hubbard, Carolyn Reynolds and Mrs. P. R. George assisted her daughter in opening the gifts.

Approximately 30 guests registered.

### Fly Overseas To Join Husbands In Germany

Mr. and Mrs. George Province of Muleshoe, and Mr. and Mrs. R. W. McCaskill of Earth, accompanied their daughters, Paula Clements and Barbara Lewis to Amarillo Tuesday to leave by air for Germany. They will join their husbands, Pvt.

### Air Filter Is Boon to Hay Fever Sufferers

BY EDNA MILES

HAY fever, which afflicts one of every 20 Americans, is no fun at all. It's a great boon to the cleansing tissue business and that's about all.

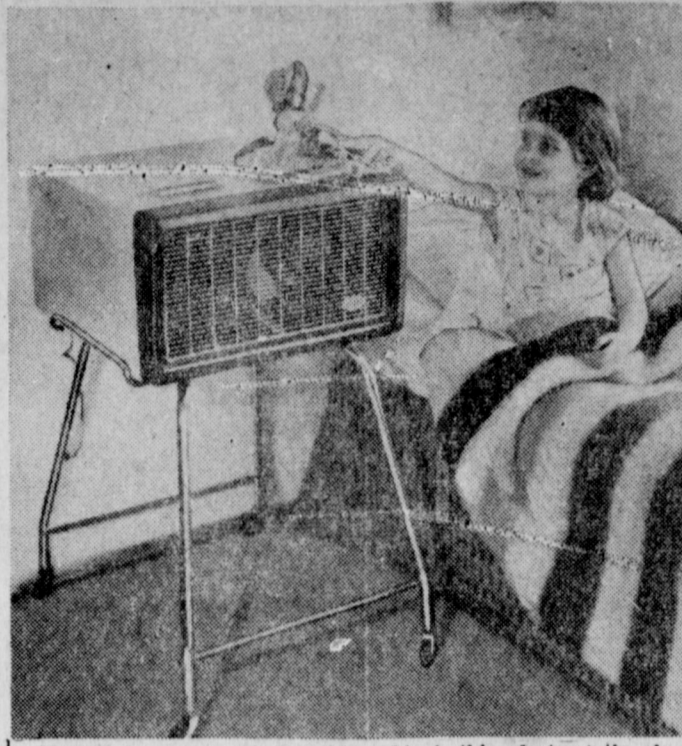

It's caused by a sensitivity to any of a number of substances called allergens that you inhale in normal breathing. And hay fever can develop into asthma, which is a far more serious ailment.

Ragweed is probably the most common source of allergens. All on its own, it tosses 500 million pounds of pollen into the air each year. And it's just one of many pollen-producing trees, plants and grasses that make the hay fever sufferer's life miserable.

The best way to avoid the hay fever problem is to remove the cause. Sounds simple, doesn't it? But removing oneself physically from the cause can be a problem, and removing 500 million pounds of pollen is no tiny task.

So now what? Well, there is help to be had. Brand new on the market is a portable air cleaner that plugs into any electrical outlet and will, its makers say, clear an average room of the offending air-borne particles in a matter of minutes.

It's an electrostatic air filter housed in a decorator-styled cabinet that can be moved from

Housed in a compact, portable cabinet, this electrostatic air filter protects against irritating pollen, mold and dust.

room to room. It removes smoke and reduces the amount of dust.

Designed to turn over the air in an average-sized bedroom about every 10 minutes, it can be placed on the floor, table top or it can be window-mounted.

Travis Clements and Pvt. Doug Lewis, who are stationed there.

The girls left Amarillo at 8:30 Tuesday and arrived in New York Wednesday morning. They left New York Wednesday evening and arrived in Frankfurt at noon Thursday.

### Jimmy Ivy Wins Scholarship At Amarillo J. C.

Jimmy Dwain Ivy, 19 year old son of Mr. and Mrs. Jimmy Ivy was announced as a winner of the Eldon Durrett Memorial scholarship for Boys at the Amarillo Junior College commencement exercises on May 30, in which he was a graduate.

The scholarship is set up in memory of the late Eldon Durrett of Amarillo and is awarded to outstanding boy graduates of the Amarillo schools. Applicants are chosen on the basis of scholarship, character, leadership, abilities out of class, and financial need. The scholarship award consists of three hundred dollars a year and will continue as long as the recipient remains in good standing until his college work is completed.

Jimmy, a pre-medical student majoring in chemistry, plans to continue his education at the University of Texas.

### Foster-McDougall Double Ring Vows Exchanged Friday In Clovis Church

Miss Myra Lynn Foster, daughter of Mr. and Mrs. H. D. Foster of Clovis, and Mr. Ron McDougall, son of Mr. and Mrs. M. J. McDougall of Barstow, Calif., exchanged wedding vows in a double ring ceremony Friday at 4 p.m. in the First Baptist Church of Clovis. Rev. Carl Shaw officiated.

The bride wore a waltz length dress of ice blue silk over taffeta, with large puffed sleeves. She carried a Bible arrangement of white carnations.

Miss Micki Foster served as maid of honor, and wore a rose colored gown with an empire waist.

M. O. Wright, of Bowling Green, Va., served as best man.

After a short trip to points of interest in New Mexico, the couple will be at home in Clovis.

The bride is a graduate of Muleshoe high school, class of 1955, and the bridegroom is a graduate of Los Gatos high school, class of 1954.

### Intermediate MYF Install Officers

The intermediate MYF of Muleshoe held installation services June 2, with Linda Lou Lancaster as installing officer, in the Youth Chapel of the Methodist Church.

Sandra Howard was installed as president. Other officers installed were: Darrell Lancaster, vice-president; Magann Lamb, secretary; Sandra Harris, treasurer; Lynn Lenua, publicity chairman; Bob White, parliamentarian; Judy Kay Lambert, Christian Witness; Jerry Howard, Christian Faith; Billy Gilbreath, Christian Citizenship; Maria Reed, Christian Fellowship; and Linda Wingo, Outreach. Doris Gregory and Bill Moore, counselor.

### WSCS Changes Meeting Date

The WSCS of the Muleshoe Methodist Church met Tuesday afternoon in the Youth Chapel.

The lesson was given by Mrs. W. D. Moore and the devotional was from Luke 10 and 15.

A short business meeting was held and it was decided to meet next Monday at 2:30 due to the sub-district meeting on Tuesday.

Present were Meses H. C. Holt, O. N. Jennings, H. Jay Weyer, A. C. Gaede, Arnold Morris, Mervin Witterding, W. D. Moore, Cecil Davis, A. H. Owen, C. R. Farrell and J. E. Day.

### SQUARE DANCE CLUB MEETS

The Muleshoe Square Dance Club will hold a regular meeting Saturday night, at 8:30 at the Legion Hall. The public is welcome to attend. There is a \$1 charge for an evening of dancing and fun.

### Kitchen Fashion Show Date Set

MISS STRAWN

Architects, builders and contractors of this area will get the woman's viewpoint as well as the home economics expert's slant on kitchen planning Tuesday night, June 18 when Pioneer Natural Gas Company presents Miss Bernice Strawn, nationally recognized kitchen authority and writer, as guest speaker at a banquet and Kitchen Fashion Show to be held at 7:20 in the ballroom of the Caprock Hotel.

Miss Strawn gained a nationwide following as Home Equipment Editor for the Woman's Home Companion. In this position, which she held from 1949 until 1957, she was responsible for testing and reporting on all advances in home equipment and kitchen planning. Prior to her association with the Home Companion, she served as director of the home economics laboratory of Sears and Roebuck and Company where she supervised a large staff in testing and development of new merchandise.

Miss Strawn designed the famous "Heart Saver Kitchen" which was featured in Woman's Home Companion in 1951, and exhibited at the Texas State Fair that year. So great was the interest in this All-Gas kitchen for handicapped women that it was reproduced in a trailer and toured the country for over a year.

No stranger to the Southwest,

### Van Zandt County Reunion Sunday At MacKenzie Park

The annual reunion of former and present residents of Van Zandt county will be held at MacKenzie park in Lubbock Sunday, June 9.

The reunion will be held in the southwestern part of the park through the west entrance from Avenue A.

Miss Strawn once served as a home economist for the U. S. Department of Agriculture in this region, and for several years she was a member of the faculty at Oklahoma A&M College.

During her current tour, Miss Strawn will make appearances in Amarillo and Midland under the sponsorship of Pioneer Natural Gas Company.

### Cotton Quiz

How does cotton help doctors and hospitals treat patients?

ALMOST 135,000 BALES OF COTTON WERE USED FOR MEDICAL SUPPLIES IN 1955.

### 3 1/2% Dividend Paid On Insured Savings

FOR RENT SALE OR TRADE: 3 bedroom house in Country Club Addition. See D. L. Morrison, phone 3325 or W. R. Byers, 8-17-tfc.

**On The Spot**  
 If you will look at the location of the house on West 6th street, you will find the bargain of the year. A 50x140' lot, the two story house and paved street all goes for the PRICE OF \$4,000. Can't beat this price anywhere.

A TWO ROOM house an Ave. D, 40x140' lot on pavement. All for \$1,400. This is better than DOUBLE STAMP DAY. Take a look.

For better buys: in Farm and Ranches, let us show you what we listed in our files.

For a complete HAIL INSURANCE COVERAGE; let us show you and explain the coverage we write.

For a 3-bedroom home near the high school, on paved street, and an east front, 60x140' lot. Yard fenced, good garage and the drive is paved into the garage. What have you to trade in on this nice home? There is a \$3,000 loan on the house now.

A real roomy house in the Lenau Addition, and it only takes \$1,500 to handle. Better see this place.

## New Native Grass Looks Good In Testing Stages

LANS BROWN

"All flesh is grass" cannot be disputed, for many and his animals subsist largely upon plants of the grass family. The grains of barley, corn, oats, millet, rice and wheat furnish the staple foods of mankind, and grasses are the most important forage for live stock for two reasons. They predominate over large areas as native vegetation and they are highly palatable and nutritious. Now in 1957, these native grasses (Bailey County has 182,000 acres of the 285 million acres of the Short-Grass Plains) are estimated by the Forest Service to be reduced in carrying capacity by 52 per cent from its virgin condition.

Bartlett, in 1854, glowingly described the productive grasslands of Texas and the adjoining territory. But soon after the coming of the railroad, in 1883, these lands were overrun with livestock and within a few years extensive grass stands yielded to mesquite brush and prickly pear. Drouth the past 6 years has taken its toll of native grass stands.

Grazing animals, when permitted to go about freely on the range, feed cafeteria style. They select the plants that smell and taste the best and may shift from one plant group to another as the season advances. These are the reasons that our best plants under heavy grazing disappear and less desirable plants come in. Good range management must come into the picture in order to improve our depleted range and protect them. The grasses pictured above are found in sandy land and mixed land sites. Each grass is described below and if they are grazed moderately to leave half their annual growth, they will produce

## 4-H's Like to Freeze Foods

Among the newer 4-H projects which have gained steadily in popularity in the state is the national 4-H Frozen Foods program. Modern freezing equipment, a better understanding of the nutritive value of frozen foods, and rising cost of fresh foods have all been contributing factors.

According to the United States Department of Agriculture, 4-H Club members last year froze an estimated seven million pounds of meat, vegetables, fruits and baked goods. Their valuable contribution to the family larder has undoubtedly saved much time and money in preparing meals. As in all national 4-H awards programs, superior efforts of those who complete the projects are handsomely rewarded. Last year Miss Betty Byars, 20, of Anton, Lamb County, won Texas state honors in the "Frozen Foods" project.

Betty Byars

The Whirlpool-Seeger Corporation of St. Joseph, Michigan, provided her award, and will again offer county, state and national awards for 4-H'ers whose records are judged best by the Cooperative Extension Service. In each county as many as four medals may go to a blue award group. The state winner becomes a delegate to the 1957 national 4-H Club Congress in Chicago, and will then be eligible for national honors. This top award is a \$400 college scholarship, and will be presented to six national champions during the Congress.

Local 4-H leaders and Extension Agents are now working with members who are eager to learn the fine points of selecting, freezing and storing a wide variety of foodstuffs. The peak of activity will center around the time when gardens and orchards are ready for harvesting.

Inquiries regarding enrollment in the 4-H Frozen Foods program should be directed to the local 4-H Club leader or the County Extension Agent.

## Texann Holdeman To Wed Mr. Scott

Mr. C. H. Holdeman of Muleshoe, and Mrs. Alta Holdeman of 2601 26th St., Lubbock, announce the engagement and approaching wedding of their daughter, Texann, to Mr. G. T. Scott, son of Mr. and Mrs. L. R. Scott, 4508 21st St., Lubbock. The wedding is scheduled for June 30, in the home of Mr. and Mrs. L. R. Scott.

## Ona Berry Named Noble Grand of Rebekah Lodge

Muleshoe Rebekah Lodge No. 114 met in regular session Tuesday night, with Noble Grand Ina Owen presiding.

Ona Berry was installed Noble Grand by acclamation. Then Evelyn Calder was elected Vice-Grand by acclamation. They will be installed in their respective offices in a joint public installation with the IOOF Lodge, sometime in July.

Next Tuesday night there will be drill practice with each officer in her own chair.

Present were Ona Berry, A. H. Owen, Mary Thomas, Argyle Millen, Doris English, Bessie Davis, Lucille Gross, Evelyn Calder, Lois West, and Noble Grand Ina Owen.

## HERE FOR SUMMER

Mr. and Mrs. Jim Holt have returned from Austin, where Jim is a student in Texas University. He will be employed this summer with his parents at Holts Panhandle Service.

the greatest amount of calf per acre far above the less desirable grasses such as threawn, sand-dropsed, and red love grass. Sand Bluestem is a native, warm season, perennial, tall grass that spreads by seed and elongated scaly rhizomes. This fine tall growing grass produces seed from August to October on seed stems three to eight feet tall. It

grows best on loam to sandy soil. It is one of the most important grasses on sandy land ranges and is relished by all classes of livestock.

Little Bluestem is a native warm season, perennial, mid-grass with a dense root system that may reach five to eight feet in depth. This hunch grass spreads by seed, tillers, and short underground root stocks. Growth begins early in April with seed stalks two to five feet tall appearing from late August to October. This native grass provides nutritious grazing during the growing season and has been used for hay since the first day of settlement. It grows well on deep, shallow, fine-textured, and rocky soils.

Indiangrass is a native, warm-season, perennial, tall grass which reproduces from seed and short scaly underground stems. Like seed heads are on stems. The beautiful, golden, plume-like from four to eight feet tall. It is very nutritious and readily eaten by all classes of livestock. It is found on bottom land, sandy land, and mixed land sites.

Switchgrass is a native, warm-season, perennial, sod-forming tall grass with vigorous roots that reproduce from underground stems and seed. Switchgrass has rather large seed with sprangletype seed head, on stalks three to six feet tall. It is very nutritious and readily eaten by all classes of livestock. Switchgrass is best adapted to lower areas of moist soil, but is winter-hardy and drouth resistant, thus found growing under a wide range of soils and climatical conditions.

Sideoats Grama is a native, warm-season, perennial mid-grass with short, scaly, underground stems. Growth begins in early April and the seed stalks which appear from July to September are from 18 to 36 inches in height. Sideoats is the most widely distributed of the grama grasses and is found throughout the United States east of the Rocky Mountains. It is found on all range sites. This grass produces a high-quality, nutritious, green forage that is readily eaten by all classes of livestock.

Blue Grama is a native, warm-season perennial short grass with narrow leaves from three to six inches long that form a curly mass of bunchy sod. Seed stalks vary from ten to twenty

### Here's the Answer

inches high. This short grass is the most important grama and is found growing throughout the Great Plains. It will stand extreme drouth, reviving and making rapid growth when favorable conditions return. Like buffalo-grass, its weak point is its low forage productivity. Blue Grama is nutritious, palatable, and eaten by all classes of livestock. Blue Grama is climax plant on the following range sites: deep-hard lands, shallow hardlands, and mixed lands. On sandy lands and bottom land sites, it is an increaser which means that 15 to 20 percent of the total grasses could be Blue Grama.

## Clerk Carrier Exams Announced

An examination for the position of substitute clerk carrier in the Muleshoe postoffice has been announced by Walter Witte, secretary of the local Civil Service Board. Closing date for applications is June 10. Arnold Alcorn, postmaster, said a vacancy was created by recent changes. First Gil Wollard, Rt. 3 carrier, retired; Paul Scott, Rt. 2 carrier, transferred to Rt. 3.

PROGRESS NEWS NOTES

## New Pastors For Baptist and Methodist

**Mrs. Arthur Cooper**  
This week should see new pastors occupying both Baptist and Methodist parsonages in Progress. Rev. Cone Merritt, who has been the Baptist pastor here for several weeks, plans to move his family here from Snyder this week, weather permitting. Rev. and Mrs. Cone have three sons, aged 17, 15 and 9 years, and a daughter, 5 years old.

Rev. William H. Watson, Jr., is scheduled to move into Progress Methodist parsonage Thursday. He received his B. A. degree in Bible this spring from McMurry College, Abilene, and also served as pastor at Tye, near Abilene. He and Mrs. Watson have four young sons, aged 7 weeks, 3, 5, and 8 years.

The community extends a welcome to these two new ministers and their families.

**PRODIGAL SON STUDIED**  
The Women's Missionary Union met Monday afternoon at the Progress Baptist Church for their monthly Bible study. Theme for the day was "Give Me - Make Me", based on the story of the Prodigal Son in Luke 15: 11-24. The opening hymn was "Have Thine Own Way." Mrs. Elmer Downing gave a scripture and read missionary names from the prayer calendar. Mrs. J. I. Redwine offered prayer. Mrs. D. L. Redwine taught the Bible study, with all members participating in Bible reading and discussion. Mrs. Arthur Cooper gave the closing prayer. Mrs. D. M. Marrow, president, led a short business session.

Those present included one visitor, Mrs. Cooper, and twelve members: Mmes. Bessie Davis, C. A. Bishop, Sam Blackwell, J.

R. Walker, D. M. Marrow, J. L. Redwine, D. L. Redwine, J. J. Redwine, A. G. McCray, Amon Blair, H. T. Pugh, and Elmer Downing.

The Sunbeams and Junior G. A.'s had a good attendance at their meetings the same afternoon, with Mrs. Blair and Mrs. Downing as teachers.

**HAVENS FAMILY HONORED**  
**AREWELL PARTY**  
About fifty members and friends of Progress Methodist Church met Monday evening in Fellowship Hall. The occasion was the regular fortnightly singing meet. After the singing and refreshments had been disposed of, Rev. and Mrs. Roy Havens were surprised with several gifts from the church constituency.

The Havens family plan to move Thursday of this week to Sparenberg, where he will be pastor of the Methodist Church there. He has been pastor of the Progress Church for the past year. The community bids the Havens "Godspeed", and wishes for them continued growth in their Christian labors.

**COMMUNITY SOCIAL JUNE 7**  
The regular family night party for all residents of Progress and vicinity is next Friday evening June 7 beginning at 8:00 or whenever you can get there. There will be "42" and other game, volleyball, table tennis; also light refreshments. It's in Progress Fellowship Hall.

**RECEIVES B. S. DEGREE**  
Robert Garrett, son of Mrs. Birda Garrett, received his B. S. degree in graduation exercises at E.N.M.U. in Portales last week. Robert, his wife and two children, and his wife's parents, Rev. and Mrs. L. D. Sharp of Aztec N. M. visited here Sunday with his mother and brothers and their families. Robert plans to continue his medical training in Baylor University at Houston.

**OTHER COLLEGE STUDENT PLANS**  
Bruce Sinnacher, son of Mr. and Mrs. Joe Sinnacher, plans to continue classes at Tech this summer and to graduate Aug. 28. He is majoring in psychology and his wife and small daughter live in Lubbock.

Patricia and Brenda Sinnacher both plan to attend college next fall. Patricia finished her freshman year at Tech and will miss summer.

Miss Ruth Massey and friend, Carol of Tullia accompanied home Miss Lucille Davis, who had been her house guest since Wednesday, when the girls completed their freshman work at N.T.S.T.C. They attended the Danny Solomon wedding last Thursday evening at Tullia. Lucille plans to work this summer. She is the daughter of Mr. and Mrs. Albert Davis.

**TO LIVE IN LUBBOCK**  
Sue Actkinson, daughter of Mr. and Mrs. Troy Actkinson and Ray Sooter, son of Mr. Joe Sooter are home from Texas Tech at Lubbock. After their wedding on June 23, they plan to have their home in Lubbock.

Ralph Cooper, son of Mr. and Mrs. Arthur Cooper completed sophomore work at McMurry, Abilene recently. He left last mid week for Nashville, Tenn., headquarters of Southwestern Co., for whom he plans to work this summer.

Faroy Sinnacher, son of Mr. and Mrs. Lewis Sinnacher, was a second semester student at Tech and is now at home. He plan to work this summer and to reenter Tech next fall.

Mr. and Mrs. Marlon Inman and Jerry Inman arrived last Thursday from Abilene, where they have been attending Hardin Simmons the past year. Marlon and Jerry are the sons of Mr. and Mrs. Sherman Inman. Mrs. Marlon Inman is the former Karolene Towns, daughter of Mr. and Mrs.

Verney Towns. Jerry plans to work here this summer. Marlon and Karolene have returned to Abilene for summer school, and plan to graduate next year. Jerry has completed his sophomore work.

**OUT OF TOWN GUESTS AT WEDDING**  
Relatives at Actkinson-Roming rites June 2 included her cousin Mrs. Pearl Brightwell, Marvesta Cal., his aunt and grandparents, Mrs. D. O. Thompson, Mr. and Mrs. C. J. Ivy, all of Temple, and Mrs. Zelma Roming, Eddie.

Friends from out of town included Mr. and Mrs. George Cole, Lubbock, Mr. and Mrs. George Sooter, Shallowater; Mr. and Mrs. T. Darden and daughters Mary and Myra, George Pollock, Mr. and Mrs. Grady Joiner and family, all of Lorenzo.

A. I. C. and Mrs. R. H. Dalby of Reese Air Force Base, Lubbock, spent the weekend here with her parents, Mr. and Mrs. J. R. Walker.

Mr. and Mrs. Joe Walker and son, John G. of Hobbs N.M. were here over the weekend with her parents, Mr. and Mrs. Byron Gwyn. The Walkers plan to spend most of the summer in Portales, where they will attend E.N.M.U. and John will start in kindergarten.

Rev. and Mrs. Carrol Jones and four children of Smett, and Miss Bok Sin Lee, who lives with them, spent Sunday and Monday here to visit friends and attend the Actkinson-Roming wedding. Barbara and Kim Jones and Miss Lee all were students at McMurry College, Abilene, the past year. Miss Lee, a Korean girl, will be remembered by many who heard her speak at the Methodist Church last fall.

Mr. and Mrs. Jerry McCray and baby daughter Joy of Tullia spent Sunday with his parents, Mr. and Mrs. A. G. McCray.

Mr. and Mrs. Howard Griffin, Curtis, and Peggy spent Tuesday through Saturday of last week in Belen and Aztec, N.M. visiting relatives. His mother, Mrs. Mattie Griffin, accompanied them to Albuquerque, where she visited friends, the A. H. Madden family.

Glenda and Laura McCray spent last week in Crosbyton with friends.

Mrs. John Rogers was dismissed from the Muleshoe hospital last Thursday.

Naomi and Buford Watson attended the Baptist Senior Youth camp at Ceta Canyon near Happy last week.

Lynn Honeycutt visited in the community last Sunday and attended Progress Baptist Church morning services.

Larry Marrow returned last Thursday from Levelland, where he visited his grandparents, Mr. and Mrs. J. G. Marrow, and his cousins.

Jane, Carolyn and Charlotte Wedel are spending a few days this week at Littlefield with their grandparents, Mr. and Mrs. A. F. Wedel.

Mr. and Mrs. Paul McMahan visited relatives here the past weekend. They recently moved from Littlefield to Levelland.

Mr. and Mrs. Gorge Raney and Jerry of Farwell visited her parents, Mr. and Mrs. Bud McMahan on Saturday and Sunday.

Mr. and Mrs. Wayne Johnson, Diane and Bryan, were guests last weekend of his parents, Mr. and Mrs. O. S. Richards, and other relatives.

Mr. and Mrs. Owen C. Powell are grandparents of Douglas Powell, born May 30, to Mr. and Mrs. Raymond Powell of Ft. Worth.

**DINNER GUESTS**  
Dinner guests in the R. G. Treider home Saturday were Mr. and Mrs. L. M. Mehefky and daughter of Corpus Christi; Mrs. Laura Treider; Mr. and Mrs. Charles Neely of Tulsa Oklahoma; Mr. and Mrs. Raymond Treider and children.

## Farmers Home Group Lends \$668,000 in County

More than \$668,000 has been loaned to farmers in Bailey county during the ten months ended April 30, 1957, by Farmers Home Administration, the agency's county supervisor, John C. Kennedy, announced this week.

The heaviest demand has been for credit to finance annual farming operations.

During this same ten months' period, Farmers Home Administration extended credit in operations to some 18,500 Texas farmers and ranchers for a total of \$54,773,000 the agency's state director, Walter T. McKay, reported. This is an increase over the same period last year of about \$6,500,000. "This increase is due primarily to the demand from family-type farmers for credit needed to place their farming operations on an efficient basis," McKay explained. "In fact," he added, "agency records reveal that there has been a slight decline in the demand for emergency credit so far this year. Long-term credit, to develop balanced systems and make full use of resources available, has been extended to a number of operators of family-type farms who previously obtained emergency loans assistance."

McKay and members of his staff are meeting this week with National Administrator Kermit Hansen to go over agency operations for next year. This meeting is preparatory to training meetings to be held for county

office staffs throughout the State. The objective of these meetings will be to insure that maximum service is rendered to Texas farmers and ranchers promptly and efficiently.

**DARNELL'S PARENTS HERE**  
Mr. and Mrs. O.L. Darnell, of Ft. Collins, Colo., are here for a visit with the family of their son, Bob Darnell, manager of Muleshoe Wildlife Refuge. Coming through Amarillo, their car was in a collision with another vehicle and Mrs. Darnell was slightly injured. She spent several days in a hospital and is much improved now.

**ENTER COLLEGES**  
Mr. and Mrs. Eddy Lane are home after seeing two of their sons enroll in higher institutions of learning in Texas. They took Joe down to San Marcos where he enrolled in the academy. They visited their son and wife Buddy and Joan, in Waco, and Buddy registered at Baylor. Also, they visited their son-in-law and daughter, Pvt. and Mrs. Wannie Eads, Fort Hood. They were in a storm of activity, also weather made storms during their trip.

Swiping someone else's honey is apt to cause you more trouble than just a few bee stings.

**NO HANDICAP**—Janet Walter, a student at New York's Hunter College, has been crippled with polio since 1945 but she doesn't permit it to hinder her work. A member of the honorary scholastic society, Phi Beta Kappa, Janet is now working on several stage and television plays. She's hoping for a scholarship at the Yale Drama School.

## LITTLE League Foundation To Be Observed Here On June 14

The nation's Little Leaguers—700,000 strong, together with adult volunteers and parents will close ranks on Flag Day, Friday, June 14, in support of the first annual National Little League Foundation Day. More than 4,500 local leagues in the United States, Canada and other countries will conduct special ceremonies in conjunction with regularly scheduled games on that date to help the Little League Foundation reach its goal.

Locally, the Muleshoe Little League will feature a game between the Sox and Cardinals at Little League Park scheduled for 6:00 p.m. All donations will go to the Foundation.

Objectives of the Foundation are to make the nation's fastest growing youth movement self-sufficient and to provide necessary facilities, training and practical aids to meet the growth demands of the program. Leading Americans—statesmen, educators, business leaders and others concerned with the future of young America, have added their enthusiastic endorsement of the Foundation to that of the unanimous action of the recent National Congress of Little League

Baseball. Delegates to the Congress, representing all local leagues, approved the Foundation and the plan to pledge all donations on Flag Day to help perpetuate the principles of Little League for future generations of youngsters.

### Washington News Letter

by LYNDON JOHNSON

Dear Friend:

Cost of living is up again. For the eighth straight month a new record high in living costs has been set. The statisticians in the Bureau of Labor predict that the figures for May will show yet another increase.

Most of the rise in the national cost living index were due to an increase in food prices. But higher prices at the grocery store don't mean higher prices on the farm. A Congressional committee is now investigating this question: Why have food costs to the housewife gone up so much over the last several years while the

**FOLLOW THE SIGNS**—Safety first gets a novel twist in Kaneohe Bay, Hawaii, as a pair of U.S. Marines become moving traffic signs leading a column of troops marching along the road. The traffic warning panels alert approaching vehicles to the oncoming men.

farmer's prices have gone down? The committee's findings will certainly be of interest to Texans.

Farm income has gone down from over \$14 billion to about \$11 billion during the last four years. This is a drop of about 17.5 per cent. During the same time income of other segments of the American economy increased by 12.5 per cent. The farmer's share of the consumer dollar went down from 47 to 40 cents.

Appropriation bills continue to occupy much of my time. We are still making cuts in amounts requested by President Eisenhower in his budget. Prudent, careful consideration is being given to every proposed expenditure.

Chancellor Konrad Adenauer of West Germany visited Wash-

ington for the fifth time since 1953. I am always inspired by an opportunity to talk with this wise and patriotic old gentleman. He is America's loyal friend and staunch ally. He has kept freedom alive in Western Germany. He is a symbol of hope to all those who pray for the reunification of the German nation.

It was my sad duty last week to attend the funeral of Major Thomas Ramsey, younger brother of our Lieutenant Governor. He was interred in Arlington National Cemetery. Lt. Gov. Ben Ramsey was home for the funeral.

Texas flood damage will be inspected by a committee of the House of Representatives. They will find we need more flood control projects in Texas. They will find that existing projects

have paid big dividends. I know the visit to Texas of these Representatives, who will be accompanied by a number of newsmen, will prove beneficial to our State.

### AT FASHION MARKET

Miss Ruby Faubus and Roger Albertson of Cobb's, and L. I. St. Clair of St. Clair's, attended the Greater Dallas Fashion Market's Fall and Back to School market week in Dallas, May 26-31. Exhibits were shown in the Adolphus, Baker and Dallas Hotels, and in the Merchandise Mart.

Mr. and Mrs. G. A. Jacobs had as guests Sunday, their daughter, Mr. and Mrs. W. L. Elam and children, Plainview; Mrs. Jacob's sister, Mrs. F. L. Padgett and son and her brother and family, Mr. and Mrs. Neal Hynson, all of Lubbock.

### READER SUGGESTS PRAYER FOR MERCY

## Young Farmer Has Brief For Free Enterprise, Supply and Demand

Kenneth Precure, another young dirt farmer this week contributes his "two cents worth" to the debate on the farm problem which has been carried on in The Journal by

various individuals the last several weeks. The Journal welcomes these contributions and will use them so long as they seem sincere, and temperate in tone.

Dear Editor:

My solution to the farm problem is this: There is no substitute for free enterprise and its ambitious brother, supply and demand.

### 1. Free Enterprise:

The right of any individual to:

- a. A free Market.
- b. To own and control his goods and his labor.
- c. Competition.

2. Supply and demand: The two factors which determine the market price: Supply being the amount of a commodity at a given price. The demand is the need or desire for the commodity coupled with the ability to pay for it.

Supply tends to decrease as the price goes down while the demand will increase as the price diminishes.

These two factors are a way of our life and have been ac-

ceptible and abided by since creation by different nations. Once socialism (a type of government which regulates and controls the production and distribution of all goods necessary to the public) is introduced into a country, such as ours, supply and demand and free enterprise are either dismissed entirely or bypassed by some unnatural and unworkable formulas such as party and acreage controls over the price and production of oil, gas, mining, etc.

Free enterprise abounds where people are free. Supply and demand is the natural, simple formula for taking care of our economy not only for farmers but for the nation.

But where this amazing formula is smothered, controlled, regulated in Washington, D. C., by indifferent men we are in for trouble simply because no man or many men are smart enough to know the production and consumption of some 160 million American people.

Assuming that this country can be salvaged from the confining regulations and controls of socialism, I believe the first step is a prayer to God to have mercy on our Nation and then start electing men who will represent free enterprise and not some foreign ideology contrary to our sacred constitution.

Yours,  
KENNETH PRECURE

## William T. Green To Get Degree At Medical School

**WILLIAM THORNTON GREEN,**

son of Dr. and Mrs. M. F. Green of Farwell, will receive his degree as Doctor of Medicine from Southwestern Medical School in Dallas on June 3 in Dallas Memorial Auditorium.

Dr. and Mrs. Green will continue to make their home in Dallas, where he will intern at St. Paul's Hospital.

John L. Purdy of Purdy Gin in Muleshoe, is attending a cotton classing short course this week in Lubbock, sponsored by Texas Tech.

Mr. and Mrs. L. M. Mehefky and daughter, Beverly Diana of Corpus Christi, visited Mrs. Laura Treider over the weekend. They arrived Thursday, and returned home Sunday.

### Price Situation For Eggs Is Due For Improvement

Egg production in Texas has dropped only slightly during recent months while total production in the nation was up by two percent. Too, points out Extension Economist John G. McHaney, stored holdings for all kinds of eggs on April 30 were greater than on the same date a year ago.

Cold storage holdings on April 1, 1957 were below the five-year average with the exception of shall eggs which were 8.6 percent above the average. But, points out McHaney, 88.9 percent more shell eggs were in storage in April 1957 than a year ago.

The outlook for improved prices in the months ahead is good, says the economist. Commercial hatchery output of egg-type chicks in Texas for the first four months of 1957 was 23 percent below the output for 1956. In the nation, the drop was 21 percent for the same period and eggs in incubators on May 1 numbered 7 percent fewer than a year ago.

Based on this background, McHaney says, it is reasonable to expect a decrease in production with a corresponding increase in price. Prices, he adds, should be much stronger during the latter part of 1957 and the first four months of 1958.

Because of economic stress in the broiler industry, many cases of hatching eggs for broiler purposes may be switched into the channels of trade. This would increase the supply of market eggs and could influence future prices. The extent to which this may happen will depend upon the demand for broiler hatching eggs. Currently, broiler hatchings and placements in the nation are running ahead of the 1956 figures, says McHaney.

### Caution Growers Of Watermelons On Anthracnose

Watermelon growers were warned today by Extension Plant Pathologist Harlan Smith to be on the watch for anthracnose. So far, said Smith, only one serious outbreak has been discovered and that in the area around Bellville in Austin county.

Weather conditions are right, said the specialist, for development of the disease. It thrives under damp conditions and unless control measures are taken as soon as the disease is discovered, losses can be very severe. The disease first appears on the old leaves near the crown of the plant as small, dark brown or black spots at about the time the plant begins to form runners. During damp weather the larger spots on the leaves show small, orange-pink, oily, heaped-up masses of spores. In dry weather, the spores masses are grayish and less noticeable.

In a severe outbreak, Smith said all leaves except a few at the tip end of the runners may be killed. The disease appears on melons and causes sunken spots on the rind. Symptoms may not be visible at harvest time but may appear in transit or at the market. The slightest evidence of the disease on melons causes buyers and inspectors to discriminate against them for they decay rapidly.

At the first sign of the disease, Smith advised growers to begin control measures. Sprays or dusts should be applied at 7-day intervals so long as the weather remains humid or rainy. Check the fungicides used and make sure dusts contain 6 to 8 percent zinc or 7 percent copper. From 15 to 30 pounds per acre are needed depending on the strength of the material, size of

and weather conditions, said Smith. Power spray applications are more effective than dusts against anthracnose, but Smith warned that the disease is difficult to control once it becomes established. For a tank mixed spray, two quarts of Nabam plus one pound of zinc sulphate (25% zinc) in 100 gallons of water is recommended.

Avoid moving through fields or touching plants when they are wet and contact the local county agent for assistance if disease symptoms appear, advised Smith.

### Annual Roundup Of 4-H Members At A & M Next Week

It's roundup time in Texas, the 4-H kind that is. On June 11-13 club members from all sections of the state will be on the Texas A. & M. College campus for their annual meeting. The big day will be the 12th when state winners will be determined in 21 different judging and team demonstration contests.

Floyd Lynch, state 4-H leader, says that each county may send two boy and girl delegates and one adult man and woman who will act as chaperons. In addition, members of district winning teams who will participate in the state finals may attend. Total attendance, according to Lynch, should approximate 2,000.

Registration is scheduled from 10 to 6 p.m. on June 11 with the first general assembly set for 8 p.m. Extension Director G. G. Gibson will be the keynote speaker. The Share-The-Fun Festival will be presented as a part of the opening night program.

On Wednesday, delegates and their leaders will participate in a general assembly and later in discussion groups developing ideas for use in launching the People to People program among 4-H clubs of the state. All judging and team demonstration team members will be in the state honorees and the right in several instances to represent Texas in national contests.

The chuckwagon barbecue, sponsored by the Texas 4-H Rec-

ognition Committee, will follow the completion of all contests. The final program will be held in the G. Rollie White Coliseum following the barbecue and will feature Chancellor M. T. Harrington of the A. & M. College system; entertainment provided by the Sears-Roebuck Foundation and the Heart H by 4-H club members.

### Pasture Grasses Crowd Out Those Unwanted Weeds

A "keep out" sign won't scare undesirable weeds from your pasture. A carefully planned mowing or chemical control program is the only efficient answer to the pasture weed problem.

Farmers can get a head start on weeds with proper establishment of adapted plants. Good stands of desirable grasses can usually "outgrow" pasture weeds under optimum conditions, says Extension Pasture Specialist E. M. Trew, especially when properly fertilized. Good grazing also limits pasture weed population.

Trew advises mowing when the worst weeds start blooming since they are more easily damaged at this stage. Mow all weeds before seed is produced, and remember that some require several operations. Sometimes fall blooming weeds call for both early summer and fall mowing.

Avoid mowing when desirable grass is scarce or during hot, dry weather if grass stand is not thick enough to shade the soil. Caution — many mid and tall native bunch-grasses such as bluestem cannot stand repeated mowings.

Mowing excess growth for hay or silage is like putting money in the bank. Mowing also stimulates new growth on near-mature plants and evens up growth after grazing. It removes old grass growth and allows entrance of volunteer fall clovers. Mow high and as early as is practical. A rotary-type mower is generally faster and cheaper.

Chemical control is usually more economical than mowing, Trew says. Spray annual broad-leaved weeds early with 1/2 to 3/4 pound 2, 4-D or M. C. P. A. to the acre. Apply with a low-volume, low pressure broadcast sprayer

in 20 of 30 gallons water per acre. Add about 4 ounces liquid detergent or 1 pound dry for best leaf coverage. Perennials may require slightly higher chemical rates.

Be familiar with herbicide regulations before using these chemicals. They will severely damage pasture legumes such as white, hop, Persian, crimson and red clovers, lespedeza, black medic and alfalfa. Broad-leaved crops such as cotton, tomatoes, and sweetclover are susceptible to chemical drift. See your county agent for local recommendations.

**DAY'S WORK**—Leaning nonchalantly against one of her father's cars is seven-year-old Suzanne Wilson, dressed in a driver's coveralls. She's a driving instructor in London, England, where her father, race driver Leslie Wilson, has opened a special track to teach youngsters how to drive. Suzanne's sister and two brothers give lessons, too.

Martial law will remain in effect in Iraq as long as Communist agents are active in Syria and Jordan, according to Iraqi Premier Nuri al Said.

### Elementary Grade Students Perfect Attendance Score

The following students in the first, second and third grades of Muleshoe schools had perfect attendance records for the school year just ended. Perfect attendance requires 175 consecutive school days without an absence.

**FIRST GRADE**  
Richard Clark Alsop, Starla Akers, Ellen Lewis, Cary Don Elliott and Sharon Harvey.

**SECOND GRADE**  
Troy Page, Billy Jack Kelly, Jerry Don Redwine, Andy Stovall, David Alsop, Roosevelt Duran, Paul Swint, and Sally Ann Park-

inson.

### THIRD GRADE

Phillip Grant, Betty Price, Ronnie Garner, Sharon Morgan, Cary Stancell, Pauline Groom, Karen Leigon, Sharon Leigon, Cieta Mae Cornelison, Regina Hawkins and Rita Moore.

### Dick DeShazo Named Amarillo Traffic Engineer

John J. DeShazo, Jr., a Muleshoe reared boy, has been appointed city traffic engineer for Amarillo. "Dick" is 29, a son of J. J. DeShazo of Muleshoe. He is a graduate of Muleshoe high school, Texas A&M College

and this spring has graduated from Yale University Bureau of Highway management, the world's only school for traffic engineering.

Prior to attending college, Dick served nearly two years with the U. S. Army Engineers and holds a reserve commission as a captain.

Dick has already reported for duty at Amarillo, relieving traffic engineer Harold Miller, who has become traffic engineer for the city of Tulla. Dick was born in Muleshoe. His mother, the late Mrs. J. J. DeShazo, taught in the local schools for many years. Dick was valedictorian of his graduating class; so was his younger sister, Nell. Their brother, Jack, is employed with GMC truck division in Amarillo while he pursues his college studies.

Fellow we know whose boss is bringing his son into the business

says that the office is being heir-conditioned.

# WSCS Officers Are Installed Wednesday

**Mrs. John Blackman**  
Bula Methodist WSCS Circle met Wednesday afternoon at the church. An installation service was held for officers for the coming year.  
A very impressive candlelight ceremony was held. A corsage was pinned on each lady as they were being installed. Mrs. W. L. Clawson was installed as president; vice-president, Mrs. D. T. Johnson; secretary, Mrs. B. L. Blackman as secretary of spiritual life.

Visiting in the home of Mr. E. G. Gage Saturday night were Mr. and Mrs. Bob Gage of Kermit, Mr. and Mrs. Gaston Gage of Morton, Mr. and Mrs. Dale Hanna, Sudan; Mr. and Mrs. Raymond Gage of Circleback, Mrs. Betty Bumpass, Pampa; Mr. and Mrs. W. B. Gage and daughter, Dot, and Mr. and Mrs. L. H. Medlin and children of Bula.

Friday night guests in the De Witt home were Mr. and Mrs. Jay White and two children of Borger.

**Attends Conference**  
Rev. H. W. Kyle, Bula Methodist pastor, attended the Northwest Texas Annual conference, held in Amarillo on Tuesday, Wednesday and Thursday of last week. Rev. Kyle was returned to Bula for another year.

J. Logan Green was able to return home from the Littlefield hospital, where he was confined for a week suffering from a heart ailment.

Mr. and Mrs. Raymond Lancaster and children of Tulsa, visited Sunday in the Sam Clevenger home. Gale Lancaster remained for an indefinite stay with her grandparents.

Mr. and Mrs. A. H. Arend visited Sunday in Littlefield in the Leon Stancell home.

Visiting in Denver City Sunday were Mr. and Mrs. H. A. Reynolds and daughter, Sammie. They visited another daughter, Mr. and Mrs. Oran Byrd.

Mr. and Mrs. Howard Weaver were lunch guests Sunday of her

parents, Mr. and Mrs. M. A. Gamble of Littlefield.

**Bible Study**  
Six ladies of the Church of Christ met Tuesday morning at the church building for the regular weekly meeting. Lesson study was taken from Luke, 7th chapter. Mrs. Gene Bryan was teacher. Ladies present were Mmes. Bryan, B. F. Setliff, A. G. Aaron, L. L. Walden, Nancy Aaron and John Blackman.

Miss Marcelle Austin attended the wedding of Mr. Lynn Campbell and Miss Beck, held Saturday afternoon, June 1 at 3 p.m., in the First Baptist Church at Ralls.

Mr. and Mrs. Ray Spence and girls visited Friday with Mr. and Mrs. C. E. Spence of Slaton.

Mr. Jim Clawson left Monday for Amarillo to spend several days visiting his children, Mr. and Mrs. Delbert Clawson and Mr. and Mrs. Bill Lamm and children.

Mr. and Mrs. Ernest Ellison and boys of Crosbyton spent Monday in the home of her parents, Mr. and Mrs. J. W. Layton.

Mr. and Mrs. Dudley Cash and baby son, Dennis of Portales, N. M., attended the McCall-Roberts wedding at Enoch's Thursday night and visited Friday with their parents, the John Blackmans and Dutch Cash.

Miss Sandra Spence is spending this week visiting her grandparents in Lubbock, Mr. and Mrs. L. E. Bartlett.

Visiting Sunday afternoon in the Paul Young home were Mr. and Mrs. Snooks Young and children of Lubbock.

Mr. and Mrs. Dale Middlebrook and daughter, Dana, visited Sunday afternoon in Lubbock with Mrs. Pat Holder and children.

**Dinner Guests**  
Dinner guests Monday in the D. T. Johnson home were Mr. and Mrs. L. W. Baker of Beckton, Texas. Miss Sue Johnson returned home with them for a week's visit.

Mr. E. G. Gage left early Sunday morning for a visit with his son, E. G. Gage, Jr., at Avendale, Ariz., and to visit also with relatives in California. He was accompanied by his grandson, Bob Gage of Kermit.

Mr. and Mrs. Fred Hicks of Oton visited Sunday afternoon in the Jack Hicks home.

Mrs. Abe Lewallen returned last week from a visit with relatives in Anaheim, Calif.

Bill Gage of Lubbock, visited Thursday of last week with his parents, Mr. and Mrs. W. B. Gage.

Dinner guests Saturday night

## Ten Word INTELLIGRAM

Check the correct word:

- 1—Benjamin Hooper Jr. was rescued from a well in Long Island, N.Y., back yard after almost (24) (36) hours.
- 2—Floods in (Kansas) (Oklahoma) recently have been called the worst in the state's history.
- 3—The world's third atomic submarine is called (Skate) (Snark).
- 4—Dave Beck has been ousted as (AFL-CIO vice president) (Teamsters' president).
- 5—Average winning speed for the 1956 Indianapolis "500" was (higher) (lower) than the previous year.
- 6—Playwright (Arthur Miller) (Sherwood Anderson) was recently tried for contempt of Congress.
- 7—National holidays are designated by (president and Congress) (each state).
- 8—"The Cherry Orchard" was written by (Anton Chekhov) (Andre Gide).
- 9—Winner of the 1956 Kentucky Derby was (Needles) (Swaps).
- 10—Explorer Henry Hudson's ship was called (Godspeed) (Half Moon).

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, good; 90-100, excellent.

### Decoded Intelligram

1-24. 2-Oklahoma. 3-Skate. 4-AFL-CIO. 5-Lower. 6-Miller. 7-State. 8-Chekhov. 9-Needles. 10-Half Moon.

in the J. W. Layton home were Mr. and Mrs. Vernon Bridges and two children of Lehman, Mr. Clayton Bridge and three sisters, Miss Vassie, Ima and Lula Bridges of Graford, Texas; Mr. and Mrs. Bill Ince of Corpus Christi, Texas, and Mr. and Mrs. J. E. Layton of Enoch's.

Mr. J. M. Angel and Harold Layton fished last week at Conchas lake returned Sunday night.

Mr. and Mrs. Doy Turney spent the weekend at Clovis, N. M., visiting in the Jack Jackson home. Dennis Turney returned home with his parents after spending the week with the Jacksons.

Mr. and Mrs. M. F. Blackman and children, Marsha and Brent, visited Saturday night with Mrs. B. L. Blackman.

**Picnic Sunday**  
Mr. and Mrs. Jack Hicks enjoyed having several of their friends for a picnic dinner Sunday. Present were Mr. Lloyd Crosby and children, Neil and John of Littlefield, Mr. and Mrs. J. D. Crosby and children of Littlefield, Mr. and Mrs. Otis Neel and children, Dewayne, Gerald, Dale and Kay of Friona, Miss Speedy McNeal of Portales, N. M., and Miss Jo and Wanda Hubbard of Bula.

Mr. and Mrs. Skeeter Black and son, Rocky of Hobbs, N. M., spent Sunday in the home of his parents, the E. W. Blacks.

**Teachers Visit in Europe**  
Miss Gladys Setliff of Bula, a teacher in the Hollis, Okla., school system, and Miss Gladys Davis, teacher in the Amarillo school, left Amarillo Tuesday morning by bus for New York City, where they will sail on June 7 for England and to return about August 2.  
Both Miss Setliff and Miss Davis will visit friends they made during their exchange teaching in school year of 1951 and 1952.  
Miss Setliff taught in Skenece, England and Miss Davis taught at Essex, England.

Miss Speedy McNeal, from the Children's Christian Home of Portales, N. M., is visiting for two weeks with June Hicks.

Mr. and Mrs. J. E. Layton enjoyed having as their lunch guests Sunday, her parents, Mr. and Mrs. Carl Hall and Mr. and Mrs. Bill Burrus and three children of Goodland.

Mr. and Mrs. J. O. Dane are enjoying a visit this week from their grandchildren of Carlsbad, N. M., the Bates' children.

Dewayne Neel of Friona, a junior student at West Texas State, Canyon, spoke at both morning

and evening hour at the Bula Church of Christ.

Miss Gene Coffman of Muleshoe, is spending this week with her sister, Mr. and Mrs. Wendell Lee Speck.

Army Pvt. Duke Powell is visiting his parents, Mr. and Mrs. Olin Powell, and also other relatives. Duke has been stationed in Japan, and when he returns on June 23, he will be sent to Korea.

**Proud Parents**  
Mr. and Mrs. Thomas Lee Harper are the proud parents of a son, weighing 6 lbs., 12 oz., and has been given the name Craig Harper. The little adopted son arrived to make his home with the Harpers on Saturday, June 1.

Mrs. P. M. Lancaster returned home Sunday after working for the past month in Lubbock.

Miss Sharon Holt left Saturday for El Paso to visit for some time

with her aunts there, Mrs. Albert West and Mrs. Mildred Hamock.

**Joins Army**  
Ralph George, science teacher in the Bula school system last year, left Tuesday, June 4 for service in the Army.

Miss Jo Ann Hubbard is home from West Texas State, Canyon, to spend the summer with her parents, Mr. and Mrs. John Hubbard.

Mr. and Mrs. Olin Powell and daughter, Jane, and Mr. Chrisley Pierce of Carlsbad, N. M., and Miss Patsy Tiley, visited Sunday afternoon in Levelland and Lubbock with relatives.

Mrs. Ruby Reid and children left Tuesday to spend the summer at Canyon. Mrs. Reid will attend summer school at WTSC.

Little Miss Karen Drake, daughter of Mr. and Mrs. Jimmy Drake, has been confined in the hospital for the past few days suffering from a throat infection.

Mrs. W. F. Tiley and girls, Bonnie, Gene, and Patsy, carried Don to Lubbock Monday where he will enter Tech for the summer term.

ELECTRICITY BRINGS  
THE PASTURE TO THE COW

Fantastic, No! Latest innovation of the application of electric power actually brings the pasture to the cow, and dairymen in many sections of Texas are using the machine for supplemental feeding. The magic equipment is a cereal grain "incubator" which grows grass 6 to 8 inches in six days.

Secret of the installation, called a Herbage machine,

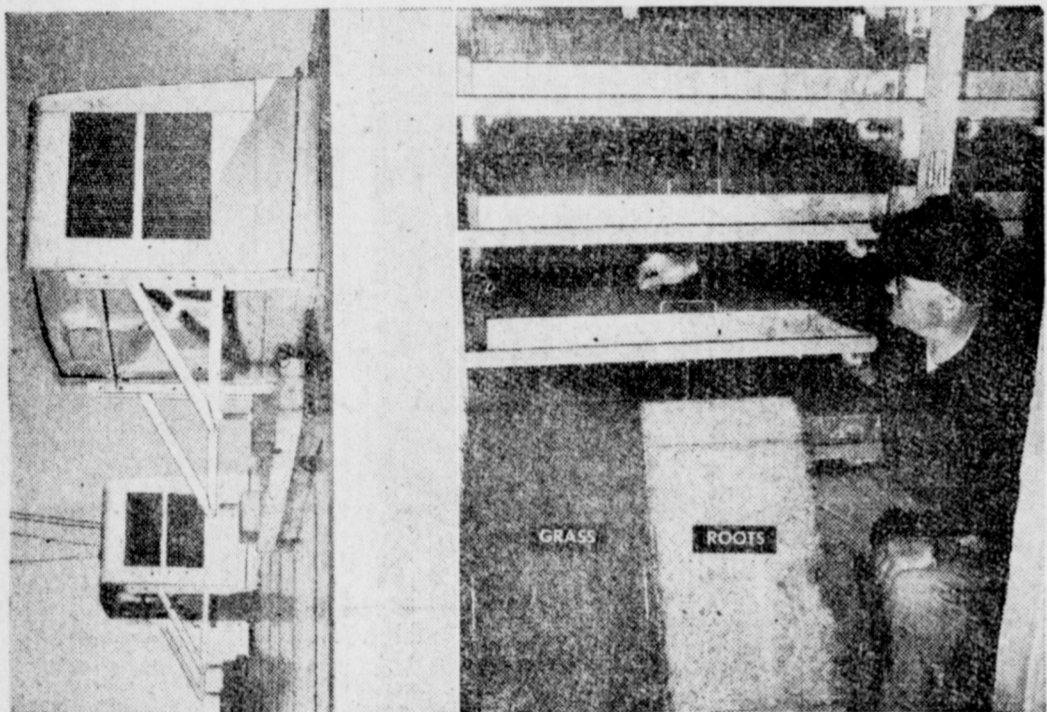

is in the use of electric heat pumps for accurate temperature control and a practical application of hydroponics. Hydroponics is the cultivation of plants by placing the roots in liquid nutrient rather than in soil.

The cereal grains are pre-soaked, allowed to drain, then put in trays and racked like a file cabinet. With proper control of heat, humidity, light, and chemically

treated water, seeds are sprouted and a phenomenal growth is completed in six days.

The experience of dairymen using this machine has shown that 20 pounds per day per cow will increase milk production from 10 to 20 percent and butterfat content 2 to 3 points. Cost of the forage has been from \$8 to \$12 per ton. Annual production in a 40 cow unit equals that of 80 acres of farm land, the plantings are spaced to yield 800 pounds of forage daily.

Blankenship Dairy, Amarillo, is putting a 12 by 20 foot machine through its paces at this time. This machine has 120 trays with 5 grain baskets per tray; it produces grass for 40 head and will produce over 140 tons of grass per year.

Heat and circulation is controlled by units attached to sides of incubator building. These units have whipped the mold problem which plagued the earlier models of the machine.

Mr. A. O. Blankenship, Blankenship Dairy, Amarillo, inspects a crop of five day old oat grass. Lower left, two baskets show grass and root development after 6 days of growth.

### THREE WAY NEWS NOTES

## Rain, Hail Cause Much Damage To Crops Here

**Mrs. Frank Griffith**  
Rain and hail over the community the past week has damaged young crops considerably.

Elmer Bateas is home from

the hospital after undergoing surgery May 21.

Mrs. Frank Knox is hospitalized at Morton. She is allowed no visitors.

Mrs. Jimmie Bateas and Cindy spent several days visiting the Frank Griffiths.

Mr. and Mrs. Jerry Simpson are moving to Lubbock and Jerry will enroll at Draughon's Business College. He is a 1957 graduate of Three Way.

Mr. and Mrs. Bill Wood and Mr. and Mrs. John Criner are moving to Lubbock this week to attend Texas Tech during the summer. Mr. and Mrs. Wood and Mr. Criner are teachers at Three

Way.

Mrs. Lewie Jordan went to Lubbock Thursday to attend the graduation exercise of a niece, but was unable to get to the auditorium due to 2 inches of rain.

### Bible Study Club

The Goodland Bible Study club met Tuesday, May 28 at the L. W. Chapman home. After the lesson in the New Testament, refreshments were served to the members attending.

Mr. and Mrs. Thurl Lemons visited friends at Amarillo over the weekend.

H. C. Brashear and A. J. Ellis were home from Arlington the past weekend.

Mr. and Mrs. Jimmie Joiner and boys of Lubbock, visited their aunt and cousins, Mrs. Florence Bailey and the Frank Griffiths, on Memorial Day.

Mr. and Mrs. Jimmie Bateas and Cindy of Lubbock, spent Memorial Day with their parents, Mr. and Mrs. Elmer Bateas.

Mr. and Mrs. Gaylon Weaver of Slaton, spent the weekend with her parents, Mr. and Mrs. Lewie Jordan. Lynda Jordan returned home with them after a two week visit.

Jim Henry Johnson took his grandmother, Mrs. J. A. Johnson and aunt, Mrs. Ruby Ponder of Portales, to visit relatives in

By John C. White, Commissioner

### SESAME IN TEXAS

About five years ago, an ancient plant never before grown commercially in this country was introduced to farmers in the cotton producing areas in Texas.

Mississippi.

Rev. Bob Rove and Baker Johnson and the Three Way Baptist R. A. boys went to the camp at Floydada last week.

Guests in the Frank Griffiths home Sunday were Mr. and Mrs. H. W. Terrell of Amherst.

Mr. and Mrs. Gene Kinley and children visited in Lubbock Sunday. While there they attended the wedding of a former resident of the community, Curtis Smith.

Home from college last week were Gail Ann, Paula Griffith, Howard Pollard.

Miss Ann has a job in Colorado. Miss Griffith will go to Albuquerque and Howard Pollard will farm during the summer.

Mrs. Frank Griffith and Paula attended the wedding of a friend at Portales, N. M., Sunday.

It was Sesame, a plant that grows under conditions favorable to cotton. It produces tiny seeds from which vital oils are extracted.

At the same time, Sesame was hailed as a new cash crop for those areas where cotton production was curbed by allotments. But a big obstacle to profitable production was the Sesame plant's tendency to shatter its seeds.

The Texas Research Foundation at Renner was primarily responsible for development of the crop in Texas. And after much research, the Foundation has been able to produce a "Non-shattering" variety.

This new variety has produced amazingly high yields, particularly where irrigation is applied.

On the High Plains, Sesame has been termed the No. 2 money-maker for irrigation farmers, who last year averaged \$121 per acre in gross returns—second only to cotton.

The Texas Sesame Seed Growers announced that the 1956 Sesame crop totaled 3,330,000 pounds. The crop was sold for \$341,880. TSSG is a production and marketing organization composed of farmers. It handles

the bulk of the U. S. Sesame crop. Sesame production runs as high as 1,200 pounds per acre. Last year's crop sold for \$10.34 per hundred pounds.

Sesame seed is used in a variety of ways. But its chief marketing advantage is that the oil becomes rancid much more slowly than most oils and therefore is used in the food industries.

The five-year-old crop continues to make gains not only in Texas but in sections of New Mexico, Oklahoma, Louisiana and Arkansas.

### RADIO SPEECHES

Local merchants are sponsoring a series of recorded speeches over radio station K.M.U.L. These speeches are recordings

of speeches which were delivered at the Congress of Freedom convention at Biloxi, Miss. recently. The first of these series will be broadcast over local station at 2pm, on Sunday, June 9th, 1957. It is believed these speeches will be interesting and educational. First of these series will be an address by the former Gov. of the state of Utah, J. Bracken Lee.

### VISIT IN MATTHIESEN HOME

Visitors in the N. J. Matthiesen home recently were Mr. and Mrs. Robert Prather of Ballinger, Mrs. Ethel McCurdy and Mrs. Dixie Barnes of Lubbock; Mr. and Mrs. Price Prather of Hereford, and Mr. and Mrs. Rufus Carter of Leabuddie.

## Babson Discusses JUNE GRADUATES

Babson Park, Mass., June 6 — Skyrocketing labor costs have forced employers to resort to unprecedented technological research. This research is teaching employers that they can get on without many routine workers. Even with the present high employment level, this should sound a warning note to high school and college graduates.

**PUSH BUTTON VS. MEN**  
Out of electronics has come the basis for vast developments in automation, a simple example of what I mean is the "electric eye" which opens doors at the proper moment without being actually touched by anybody. Another illustration is the record-changer and turntable on our phonographs, including the automatic stopping device. Of a more complicated nature are guided missiles that can chase and overtake an airplane without any human guidance.

This same principle of electronics is being applied today to operation of a manufacturing plant by a dozen employees, in contrast to the several hundred formerly needed. And remember that these can be women as well as men since their chief duty will be merely to press push buttons. Labor in general is not aware of the vast extent of the changes ahead. Employers, it is true, will always need human help, but not for a great many present-day jobs. Their requirements will turn more and more toward the intelligence and judgment of graduates with a high I. Q.

**NEW APPROACH TO WARFARE**  
Russia has always thought in terms of massed armies to overrun Europe when the time seemed ripe for an attack. However, with the Free Nations of Europe learning to use nuclear weapons, wars are swiftly moving onto a push-button basis. The great masses of Russia, China, and the Moslem nations will be only a nuisance to clutter up a battlefield under such conditions. Premier Nehru recognizes this, and that is why he is so eager to remain neutral. Electronics and the atom will cause tremendous changes not only in warfare, — but in education!

I envy our young people who are to graduate this month. They will have far more oppor-

unities than we oldsters had. I wish the schools and colleges would wake up to these changes. Better pension off the professor who can teach only the orthodox old-fashioned courses, instead of forcing these courses on our young people so that they can get a degree.

**CHARACTER WILL TELL**  
I predict that the above changes will mean that young graduates will need good character more than ever before. Better training in homes, churches, and schools will be absolutely essential in this new electronic push-button age. Wise are the young people who take evening courses now to prepare them for the better jobs ahead.

The typical salesgirl is in the process of becoming obsolete. Before long she will be replaced 60% by self-service counters, 15% by push-button vending machines, and 25% by highly paid, intelligent salesmen whose job will be to secure new customers. New qualifications are a must for the June graduates who hope to get good jobs. The field of advertising and selling is still in its infancy, and marvelous opportunities exist for those who learn to do it properly for it.

**WHAT THE CHANGES MEAN**  
(1) Manual and routine labor will gradually become obsolete.  
(2) Those who cannot readily learn new skills will be kept on at reduced hours, but with the same take-home pay. This will boost the Do-it-yourself industries!

(3) Only the serious and intelligent employees will get raises. There will be no limit on salaries for those with the necessary character, brains, initiative, and loyalty.

(4) Our great problem will not be to raise crops, build homes, or manufacture goods,—but to get people to buy. Hence, instead of subsidizing farmers, we may eventually subsidize merchants and salesmen.

(5) I advise young men to become expert machinists instead of lawyers, trained outside salesmen instead of inside pencil-pushers, and after graduation to attend night school to prepare for the NEW AGE.

### TODAY'S MEDITATION

**COME, HOLY SPIRIT**  
Read John 14:15-18.  
"When the Counselor comes, whom I shall send to you from the Father, even the Spirit of truth, who proceeds from the Father, he will bear witness to me." (John 15:26 REV.)

A boy ran up to a Chinese layman. "Teacher," he asked, "what do they mean at Sunday school when they say, 'Father, Son and Holy Ghost?'"

The wise man replied, "Little one, the sun is bright in the heavens, yet it comes to us as light rays which you see under the trees, and as warmth which you feel on your body. So God reveals Himself in many ways. God is the Father, Jesus is His

Son, the Light of the world. The Holy Spirit is the Comforter. Maybe that will help you to understand."

The lad thanked the teacher, and went his way. The inspiration of that conversation still lingers with one who was standing by and who learned much from that Chinese teacher.

Many are eager to learn about God. Answers to their questions must come from those who know Him intimately.

**PRAYER**  
Father, give us questing hearts that we may seek to know me of Thee. Give us enlightened minds that we may interpret Thy thoughts to others. Use us as channels for the fulfillment of Thy purposes thru the Holy Spirit, in Jesus' name.

**Amen. THOUGHT FOR THE DAY**  
God's perfect word was Jesus Christ. What does God say through me?  
Mrs. J. Fount Tillman (Tenn.)

### Christian Science Services

The completeness and perfection of God's creation will be emphasized at Christian Science services Sunday.  
"God the Only Cause and Creator" will be the Lesson-Sermon topic. Bible selections to be read include the following from Jeremiah (51:10): "The Lord hath brought forth our righteousness: come, and let us declare in Zion the work of the Lord our God."  
Readings from "Science and Health with Key to the Scriptures" by Mary Baker Eddy include the following (275:17): "No wisdom is wise but His wisdom; no truth is true, no love is lovely, no life is Life but the divine; no good is, but the good God bestows."  
The Golden Text is from Revelation (4:11): "Thou art worthy, O Lord, to receive glory and honour and power; for thou hast created all things, and for thy pleasure they are and were created."

European settlements were made in the south of the present Orange Free State of South Africa between 1810 and 1820.  
Conger eels vary in length from three feet to as much as 10 feet.  
The rupiah, Indonesian monetary unit, is officially valued at 8.8 cents.

## The Big Question

## THIS WEEK - In Washington

With Clinton Davidson

A House-Senate Economic subcommittee headed by tax policymaker Rep. Wilbur D. Mills (D. Ark.) begins hearings this week on your tax bill for next year. The subcommittee expects to hear tax testimony by numerous experts on how, where and when to reduce taxes. Although it has no specific tax bill before it, the joint Congressional group expects to report to Congress before the end of June. By the end of this month, it is expected, the Appropriations Committee will have paved the way for tax cuts by lopping some \$3 billion off of President Eisenhower's original \$71.8 billion 1958 budget.

Two big questions will remain to be answered. Who gets tax relief, and when? There are all sorts of proposals as to who should be first in line for tax reduction. Then, there is the question of whether to pass a tax law this year, or wait until next.

The hearings will tackle the entire budget-taxes topic by covering four main subjects: The current economic situation and prospects for the future; the effect budget cuts on government spending; government fiscal control policies; and the timing of tax reductions.

Hearings are scheduled to wind up late next week with testimony from Treasury Secretary Humphrey, Federal Reserve Board Chairman Martin, and Budget Bureau Director Brundage.

The most authentic estimates we have seen indicate the Treasury expects to collect about \$74 billion in taxes this year. If the budget is cut to \$69 billion that would permit a maximum tax reduction of \$5 billion. Congress is not likely to cut it that close, however. Treasury experts have cautioned Congress that the maximum reduction could, if there is even a slight business recession, throw the government deeper into the red next year.

There is some support for an across-the-board 5% tax reduction, effective next January 1. That, however, doesn't seem to be the majority view. Selective tax cuts here and there appear to be more probable. There are more than 100 tax bills before Congress now, and they offer more than 100 ways to cut taxes. Mills, however, says his subcommittee will not be geared to producing "specific legislative recommendations."

Since this is a joint committee, made up of both Senators and Representatives, it cannot write and report a tax bill. All it can do is point out some of the things that could be included, if other committees decide to write a bill. There were, at last count, 31 bills to raise the personal exemption from the present \$600 to anywhere from \$700 to \$1,000. Mills says this is one of the proposals to which the subcommittee will give consideration.

There are all sorts of special interests clamoring for a tax cut. Big business and little business both lead the need for tax relief. Whatever happens, though, Congress isn't likely to leave individuals out in the cold in an election year.

The first question to be decided will, however, be whether to go ahead this year with a tax reduction to be effective next Jan. 1, or to wait until next year and make any reduction retroactive to Jan. 1.

## Sandhill Philosopher Claims Agricultural Scientists About To Break Surplus-Ridden Farmer

Editor's note: The Sand Hills Philosopher on his Johnson grass farm may be mixed up in his thinking, his letter this week indicates, but then again he may not be.

Dear editor:

The trouble with farming is that science won't leave it alone. For example, I was reading last night in a newspaper which an insurance salesman left out here yesterday, he didn't sell me any insurance but I think I sold him on taking my name off his prospect list, where scientists at an agricultural research center in Indiana have developed a pill which, when you feed it to livestock they gain a lot faster on less food.

In one test on cattle, steers showed "11 per cent improvement in gain and 9 per cent improvement in feed efficiency."

The scientists immediately hailed this as an important step forward, but that's not the way I see it, and if Sec. Benson is on his toes instead of the farmers' for a change he won't see it that way either.

If cows are going to gain 11 per cent faster and use 9 per cent less feed doing it, anybody who knows arithmetic can see this means an increase in the feed surplus.

Also, not only are scientists getting cows to use less feed, although I've got one old cow out here I don't believe would respond to their treatment, they're teaching farmers how to grow more per acre.

What this means is that every time a scientist succeeds in growing two bushels of corn or maize or wheat or what not where only one grew before, somebody has to put up two warehouses to store it in where only one was before.

You keep this up for any length of time and you can see what'll happen to the surplus, which is already bigger than the national budget.

As I see it, scientists are the worst enemy of the farmers, and if they can't do any better, they ought to give up agricultural research and work on the hydrogen bomb or space ships.

What the farmer needs is a pill which will slow down, not speed up, agricultural production. What he needs is something that'll make a cow eat twice as much as she's eating now and take three times as long to get ready for market, with of course an adequate price to take care of the long-drawn-out process. What he needs is a chemical to spray on his seed to make cotton for example, take two years to mature instead of four months. As for corn, with a two-year supply already on hand and another crop on the way, something in the nature of a century-plant type corn, which makes ears every ten years, would be ideal. The same thing would apply to practically everything else grown on a farm.

The way it looks from here, agricultural research is about to bust not only the warehouses but the farmers to boot.

Yours faithfully,  
J. A.

## LETTERS TO THE EDITOR

### FRANK FORD TO TEACH HERE AGAIN NEXT YEAR

Dear Editor:

May I take this opportunity of expressing my appreciation for all the courtesies extended us during this past school year in getting our school news from the Elementary school in the Journal.

This school year has been a pleasant one for me. The people of this community are truly a wonderful group to work with. I am looking forward to working here again next school year.

I trust that your summer may be a pleasant one. I shall be in Dallas for part of the summer—so I'll probably have a hot one to say the least.

Best wishes to you and all the office staff of The Journal.  
Sincerely yours,  
FRANK D. FORD

And without faith it is impossible to please Him. For whoever would draw near to God must believe that He exists, and that He rewards those who seek Him.—(Hebrews 11, 6.)

Even those of us who begin with but little faith are sometimes rewarded by a sudden demonstration of God's love and of His existence. It is an unforgettable experience, which fills us completely with such wonderful warmth and light as can only come from the Holy Spirit.

With proper care, a man's life span should be in the range between 100 to 120 years, according to an octogenarian physician, Dr. C. Ward Crampton of New York City.

### BACK AFTER VACATION

Mr. and Mrs. Travis Butler and family returned Friday from Oklahoma City where they had spent a two weeks vacation visiting friends and relatives, and sightseeing. They said they saw lots of storms and lots of water. Visiting in their home, this week are her nephew, Jerry Wright, Mrs. Wright and their little girl, Mary Ellen, of Oklahoma City.

### LOOK OUT, FISH

W. M. Pool, Jr., and Ray Griffiths left Tuesday for a few days of fishing on the Pecos and tributaries around Cowles, N. M.

### ENGINEERING DEGREE

Washington State College — Nearly 1,300 degrees and certificates were granted Sunday, June 2, at the 61st annual commencement at Washington State College.

Diplomas and certificates were handed out by President C. Clement French. Graduating from Muleshoe is Ether J. Thomas, Bachelor of Science in Electrical Engineer-

"Runs like a top, NOW — AMALIE L. P. G.!"

Can't tell any difference — whether it's a fresh refill, or time to drain. Same power. Hate to throw away my drains, and don't drain me as often, either. Butane or propane (Liquid Petroleum Gas) burns HOT. That common-grade oil I used to use sure did thicken up almost like gear-grease. Sure is different, with AMALIE L. P. G. Oil.

Because AMALIE L. P. G. Oil is ENGINEERED to the job. First, it's 100% pure Pennsylvania crude — nothing on earth equals it. Second, refined by an EXCLUSIVE process that HOLDS its great lubricating power, and its viscosity, or flowing quality. Third, additives developed by our great laboratories — to make sure grit, dust, etc., stay in suspension — so they filter out. There's just no other oil like AMALIE L. P. G. Give YOUR engines — and your bank account — a break.

Shower the bride with

Lifetime Gifts

Give her gifts of steel

When a special friend or relative is taking that important step from Miss to Mrs., show her your delight: Give her gifts of steel. For steel gifts are stylish gifts that last a lifetime.

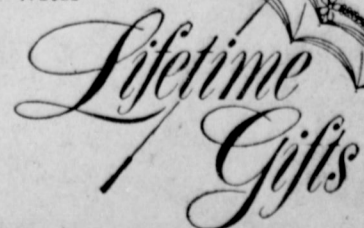

When you buy them for a shower or wedding, you're giving the bride much more than just an expression of your affection. You're giving gifts that will endure as long as she needs them.

Showering the bride with gifts of steel means choosing from countless items made to give stylish service—from coffee makers to canisters, folding chairs to flatware, trays to toasters, clocks to cutlery. No matter what you choose to give, she'll appreciate your good taste and thoughtfulness.

And any bride would glow with pleasure to see the lustrous quality shining through every gift of steel. And she can be assured these good-looking items will go to work in a thousand ways to prove their lasting value. For only steel can do so many jobs so well.

So when you shower the bride, make it a Steel Shower. And when you shop for the bridal gifts, make an investment that is fashionable and practical. Look for the store displaying the Steel Shower symbol—and get the gifts that will last a lifetime.

Shower the bride with

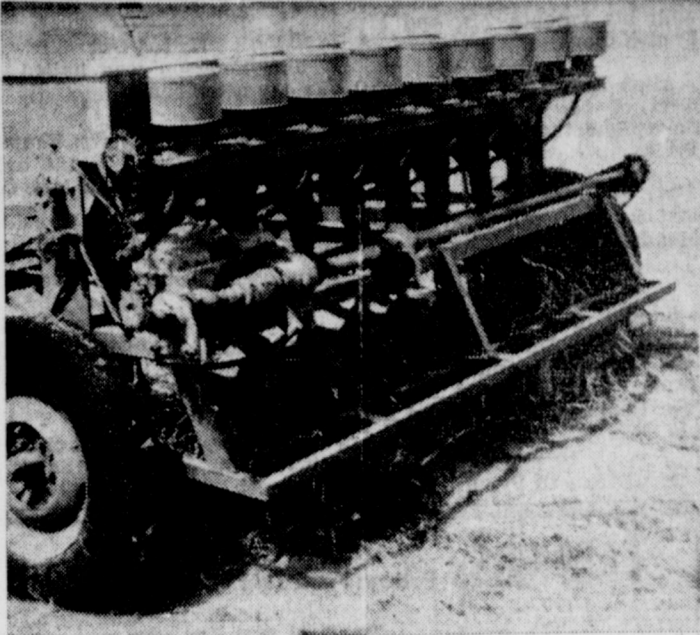

Give her gifts of steel

This symbol identifies the store that's a Bridal Center, where you can get a variety of gifts styled in steel... to last a lifetime.

### Experimental Recharge Well Taking Over Million Gallons Water A Day

By W. L. E. Goodhurst  
At last — the rains came — as we have believed they would for eight long years. Many people in the High Plains, who are now aware of the diminishing supply of underground water, are concerned with the problem of saving the large quantity of water that has recently collected in the thousands of wet-weather lakes by draining the water into the underground reservoir for storage and future use.

Numerous farmers throughout the High Plains have installed dual-purpose wells near the lakes for the purpose of draining the lakes and producing irrigation water. Such practice has been described by them as highly successful. Although the practice is not yet fully acceptable to economists and engineers, many of whom are naturally skeptical until shown, the High Plains Water District has developed some important information from the recharge experiment that is being carried out at the Allmon Gin in south western Floyd county.

In the fall of 1953 a well was drilled near the edge of the lake. Total depth was about 380 feet. It was cased with 12-inch steel casing, the bottom 150 feet being slotted. It was developed by pumping with a test pump and produced about 1,100 gallons a minute.

A pit was dug around the well and filled with cotton burs. An 18-inch concrete pipe was laid from the bottom of the lake to the pit, the lake end being equipped with a valve and the pit end had a meter for measuring the flow of water from the lake to the well.

Assistance to the project was given freely by numerous local interests recorded on a sign at the recharge site. In June 1954 the area received a heavy rain and the lake caught 52 acre-feet of water. After a few hours wait, in order to let the coarse silt settle to the bottom, the valve was opened and the water flowed by gravity into the pit. However, it was soon discovered that the cotton burs, although fully composted, did not prove satisfactory as a filter. Nevertheless muddy water entered the well at the rate of 1,050 gallons a minute.

The well was not equipped with a pump and as a result, after eight days of recharging, the formation became clogged with silt. A test pump was again installed and after a few hours of pumping several yards of sand and silt were removed from the well and it produced equally as good as after the first development.

This original test proved that the lake water could be drained by gravity into the water bearing formation; but it also proved that unless the mud and silt were removed during the recharging period the formation would become clogged and would no longer take water.

During the last week in April 1957, the area again had about 5 inches of rain and again the lake became filled with water. In the meantime a concrete meterbox was built at the pit-end of the 18-inch concrete pipe, and an 8-inch steel line, equipped with a flap valve, was laid from the meter box to the well. The pit was filled and a pump base was built around the well.

The land owner, Mr. Bill Allmon, had agreed to install a permanent pump, but the day he intended to set his pump the rains came. On April 30, 1957, at 10:35 a.m. the valves were opened and the water entered the well at the rate of 1700 gallons a minute, going into the formation and filling the well casing.

It is significant to note that during the first 24 hours the well took water at the average rate of 920 gallons a minute, that during the second and third days the rate was about 770 gallons a minute, and that during the fourth day the rate of 620 gallons a minute, showing that the sand was gradually clogging the well.

On Saturday, May 4, 1957, a 7-stage number 10 pump bowls and 180 feet of 8-inch pump column pipe and 10 feet of suction pipe were set in the well. The pump was operated for 4 hours and produced a large quantity of silt, sand, and water at the rate of about 1,000 gallons a minute.

The pump was stopped, the valve was opened, and again water started pouring into the well. During the next 20 days the recharge is shown graphically in the illustration. Again it is significant to note that whereas the rate of recharge during the first 4 days of the experiment decreased from 920 gallons a minute to 620 gallons a minute, with pumping only once a day to remove silt, the rate of recharge was maintained at a rate of about 920 gallons a minute until the lake was drained.

Just as the lake was drained the rains came again and the lake refilled to the previous level and the operation of recharging continued. Although the problems of artificial recharge are not fully solved by any means the work that has been done by numerous individuals, by the cooperative work of the Board of Water Engineers, U. S. Geological Survey, City of Amarillo at the McDonald Well Field in Randall County, and the work of the Water District shows that the problems can be solved and in the future millions of acre-feet of surface water can be salvaged that otherwise would be wasted.

The payment to labor has risen 61 per cent in the last 10 years while productivity has gone up only 26 per cent, according to the U. S. Labor Department.

### Parmer County Farm Bureau News

BY RAMOND EULER  
Farm Bureau checks of fifteen dollars were mailed to each chapter of FFA boys and FHA girls in Parmer County last week. These payments were made to assist in defraying expenses of delegates to the annual conventions of these groups. 4-H boys and girls will be recipients of similar checks very soon. Your directors agreed last year that you would like to have your organization assist in these boys and girls are, or course, the future farmers and homemakers of our country.

Once again, we want to urge users of farm fuels to respond to notices to file for the 5 cents state road tax refund on these fuels. Filings must be made every six months, and there is no grace period. The three cent Federal Road tax will be eligible for filing from June 30 to October 1, for the preceding year. These taxes represent at least a third of the retail cost of farm fuels, and should not be overlooked as long as they can be redeemed. The letters mailed to those who had not filed in the last six months or more do not mean we do not wish to continue this service for you. Notify us if you wish the service continued, and it will be resumed immediately.

Rhea Farm Bureau is holding its regular monthly meeting this Friday night. We know you will be welcome out there whether you live in the community or not. They are going to embark on the mosquito control program as a community project. Films will be shown, and if possible Dr. Spring will be out to discuss the program with them. Refreshments will be served, and if you are there you will be glad you went. Martha Schueler is secretary, and Franklin Bauer is chairman.

Remember that Farm Bureau is your service organization, and that any of its officers, members or office staff will be glad to assist you in any way they can. The phone number is 3521.

CONSIDER THIS: Turn not to the right hand nor to the left; remove thy foot from evil. Proverbs 4:27.

#### MOVING TO ALPINE

Mr. and Mrs. Ray Morrison and children are moving this week to Alpine, where Mr. Morrison has accepted a position as manager of a store of the Morrison Variety Store chain. He has been on the job there some time but the family remained here until the end of school. Mr. Morrison was manager of the St. Clair Variety Store here for several years.

### Bible Comment: Man Can't Shirk His Responsibility To Self and Others

A LESSON on personal responsibility seems very important in our age and under present conditions. The indolence of so many processes in our modern life makes possible a shirking of duty that was not always so easy. The very bywords today indicate something of this lack of personal responsibility. We say, "Let George do it," or we speak of "passing the buck." Both phrases are expressions of slackness.

What has Ezekiel to say about personal responsibility? First, that sin and wickedness inevitably bring their results. Long before Ezekiel, an older writer in Israel declared, "Be sure your sin will find you out." Man is accountable for his deeds and he bears their consequences.

It is not only the prophet who says so; it is life and experience that make that declaration. Nor is a man responsible only for his own acts. He must watch out for those of others. The man who takes an attitude of indifference—who says, "I'll attend to my own life; I'll have no care for anyone else"—is himself assuming a wrong and wicked attitude.

A man has the duty of a watchman. It is his duty to dissuade others from evil, to warn them concerning its consequences, just as one would be bound to warn a fellow human being he saw walking toward a dangerous hole or cliff. There is a stern and relentless law that affects us all in the matter of life and conduct. But Ezekiel is equally definite in declaring that God, the upholder of the universe, takes no great delight in penalties for evil. His great purpose is redemption.

This is borne out not only in the gospel of grace, but also in the law of nature.

**ON VACATION**  
Mrs. Irma Willis, advertising manager of The Journal, is on vacation, and is spending several days at Clyde, seeing about property she owns there.

**JAMES HOWELL HERE ON LEAVE FROM NAVY**  
S/Lt James Howell, who has been serving aboard the USS

morning from San Diego for a visit with his wife, Mrs. Fay Howell, his parents, Mr. and Mrs. Daily Howell, and other relatives and friends.

After a ten-day leave, he will go to Guam for a tour of shore duty. James has been in the service since November 1, 1956.

## Get in the fine-car swim at the low Ford price!

There's no need to pay a "fancy price" to enjoy fine-car luxury. Ford is lowest priced\* of the low-price three, yet offers values you'd expect only in cars costing far more!

To start with, you can easily pay twice the money, and not find lines that can hold a candle to Ford's for lowness, loveliness, or just plain good taste.

But step inside. That's when you'll find the real evidence of Ford's quality! And, in the way in, note that Ford offers door checks that hold doors open in either of two positions—for easy entrance or exit. A little thing. But, in a fine car, why not? Then, inside, notice how comfortable those plush, foam-rubber seats are. They'll stay that way. And on long trips. For they're scientifically contoured over non-sag springs. Your rear-seat passengers are treated extra kindly, too—with spring assists to help them open and close the doors—with the most leg room in Ford's field!

Fine cars are smooth—and that's another place Ford really shows its stuff! Ford delivers its famous V-8 power smooth as a whisper. That's because only Ford takes the pains to electronically balance each engine while running under its own power. Not even the makers of the most expensive automobiles go this far to bring you super-smooth performance.

Ford rides fine-car smooth and quiet, too. You can thank the new "Inner Ford" for that. Ford, for instance, has a swept-back front suspension that actually "rolls with the punch" of every road bump.

Ford's rear springs automatically adjust to give the right ride for every road. And Ford keeps things quiet, with the most sound insulation in its field.

Fine cars are built to stay solid. So's Ford!

Ford has the only frame in its field to make use of rugged tubular steel beams. No car at the price offers so many roof-strengthening beams. Expensive cars aren't built of thicker body steel or with sounder engineering skill. Then, of course, in Ford you can have all the power assists and other conveniences found in fine cars. And they cost far less in Ford. Yes sir! In every feature, every part, Ford is the fine car at half the fine-car price. Come in and see!

## Upward Trend In Cotton Exports Give New Hope For Price Increase

United States cotton exports for the current season are now expected to total about 7 1/2 million bales, compared with only 2.2 million bales last season.

The export program, involving sales of cotton for export from Commodity Credit Corporation stocks at prices some six cents a pound below support levels, has been the primary cause of this drastic shift in the volume of sales to foreign countries. This program became effective on a limited basis as of January 1, 1956, and on all qualities of upland cotton as of August 1, 1956. It brought about very sharp declines in the price of U. S. cotton for foreign buyers. In general this development served to offset the declines which had occurred earlier in foreign-grown cottons, and thus brought U. S. cotton back into line with foreign cottons price-wise. The reduction in U. S. export prices has been followed by a lowering of prices on rayon staple fiber in a number of important foreign countries, but in most cases (Japan being an exception) U. S. cotton is now decidedly cheaper, as compared with rayon, than it was in early 1956.

Any analysis of changes in the volume of U. S. cotton exports must be concerned with three broad components of the picture: foreign consumption, foreign

production, and the change in foreign stocks (either up or down).

**Foreign Stocks**

Total stocks of raw cotton in the foreign world were reduced last season by about 1.9 million bales. When the fear of declining prices was substantially eliminated, the general decline in stocks was brought to a halt and a rebuilding of stocks began. It will be noted that the estimated increase in foreign stocks during the present season is approximately 2.2 million bales. Together these changes in raw cotton inventory (from minus 1.9 million to plus 2.2 million) explain 4.1 million bales of the 5.3 million bale increase which is expected for this season over last.

In the film, Price and the Future of U. S. Cotton, it was pointed out that the principal way in which U. S. exports might be increased by millions of bales within a single season would be by a shift in foreign inventory policy resulting from a change of sentiment about the probable future course of prices. This kind of increase is being experienced during the current season.

The report also brought out that lower prices would tend to affect raw cotton exports by influencing foreign cotton consumption and foreign cotton production. It was emphasized that these effects would come much more slowly but in the long run might be far more important than any one-season shift in the export figures resulting from changes in foreign inventory. The above estimates suggest that net consumption by foreign spinning mills (reflecting the change in foreign consumption as compared with foreign production) may increase this season by about 1.2 million bales. This is a very encouraging improvement for such a short-term period. It should not be inferred that price is the only cause of this improvement, but evidences do exist that price has been an important factor.

**Foreign Production**

Current estimates are that the total production of cotton in the foreign world will be about 200, 000 bales higher this season than last. This increase falls short of the estimated increase in foreign

consumption by about 1.2 million bales. Moreover, the rise in foreign production reflects an over-all increase in yields rather than acreage. In general, foreign yields per acre last season were regarded as disappointing.

Lower yields brought a decline in total foreign production, although total acreage increased. This season, on the other hand, there has been some improvement in average foreign yields but total foreign acreage has declined slightly. This decline takes on greater significance when it is realized that foreign acreage has increased by 66 per cent during the preceding eight seasons.

While it is too early to draw sound conclusions as to the long-range effects of the lower U. S. export price on foreign cotton production, some early indications of changes in attitudes are extremely interesting. Several of the foreign producing countries are revising their development programs, giving more emphasis to industry and less to agriculture. Some, in the agricultural sector of their plans, are shifting emphasis from cotton to food crops.

It has become increasingly apparent that governments of foreign producing nations are taking a much closer look at the cost aspects in development of cotton land. They are figuring very carefully to determine whether or not they should expand and involve. At present prices, the profit margin appears to be small enough to give serious pause prior to further expansion.

While it is impossible to determine with any degree of accuracy the effect of such actions, they do point toward a possible future slow-down in expansion of foreign cotton production.
