## Announcement

To the People of the 19th Con-

For nearly a year you have had before you my announcement for Congress from this new District. Believing that the people generally

All my life l have been a student of Law and Government. I shall expect to apply the knowledge gained, and my very best thought, to these matters as they arise.

However, if there are some who desire an expression of my views on National subjects, I invite and welcome your inquiry, personally and ous reply. Before the campaign is over, I hope in some manner to equaint every interested person

with these views. So far as I am able to observe at this stage of the campaign, every candidate in the race, regardless of the number of words used, is running on the same platform, which is "A sincere desire to render s public service to the greatest numper of people." This being true, the only ISSUE raised or that can be raised is "the PERSONAL ABILITY and the POWER of the individual candidate to PUT OVER the things he advocates and undertakes?" is fair to you, and fair to me. I am conducting my campaign my own way, and concede the same privilege to the other candidates. I have no controversy with any man, and do not propose to engage in cheap, petty, local politics that might lead to one. To me, the Congress of the United States is sacred institution, second only to the Flag, and I expect to deport myself with a dignity worthy of the

high office I seek. With an abiding faith in the sincerity and the ability of our Democracy to choose for the best interest of all concerned, I humbly submit my candidacy for your deliberate and careful consideration.

CHEVROLET It was a great record of leadership

even greater, more impressive record that Chevrolet is

making for 1934! Already, sales are tens of thou-

sands of cars ahead of last year. Production is

running higher than that of any other automobile

company in the world. And every day, from state

after state, comes the same report on registrations:

The big reason for such preference is plainly shown

at the right. Chevrolet has so many vital features

that others in the low-price field have left out:

Knee-Action wheels that are fully enclosed for com-

plete safety and absolute dependability. A six-

cylinder valve-in-head engine with an exclusive

"Blue-Flame" head. Big, "cable-controlled" brakes,

the best in the low-price field. Large, spacious

bodies by Fisher, with Fisher No Draft Venti-

lation. And real "shock-proof" steering that brings

new ease and comfort to driving. No other low-

priced automobile has a single one of these five

leading 1934 features. That's why no other can

be backed by such a confident statement as this:

be satisfied with any

other low-priced car
