Funds Granted For Highway 84 Work

Baptists Will Lay Cornerstone Of New Church Sunday

All Day Program Starts Building Of Church

By REV. GEO. A. DALE, Pastor, First Baptist Church

Sunday will be a great day for Tahoka Baptists, for on that day the church will hold a reunion of former pastors and members, hear talks by prominent men, lunch at the church basement, and formally lay the cornerstone for the church super-structure.

Talks will be made during the day by Senator G. H. Nelson of Lubbock, Dr. Geo. J. Mason of Dallas, Rev. B. N. Shepherd, and others. The all-day program will begin at the church at 9:30.

The program follows:
9:30 Classes will meet and make out reports.

10:00 General assembly, praising the Lord with song.

10:30 Welcome to visitors.

10:45 Response by visitors.

10:55 Talk by Senator G. H. Nelson.

11:20 Special music.

11:30 Address by Dr. Geo. J. Mason of Dallas.

12:30 Lunch served at church.

2:00 Praising Him in song, especially arranged.

2:30 Address by Rev. B. N. Shepherd, former pastor.

3:00 Assembly on the campus for ceremonies for laying of cornerstone.

It is desired by the committee on arrangements to have all the building committee for the basement present and the chairman of that committee to speak at the ceremony; the building committee of the present structure, and the chairman likewise, with former pastors participating.

There is no doubt but this will be a great event and the local Baptist Church has planned to make this a great day of welcome to all (Cont'd. on page 5).

DR. J. R. HICKERSON, Commerce, who will conduct a revival meeting here next week.

Baptist Revival Opens Sunday

A revival will begin at the First Baptist Church here Sunday and will continue for two weeks.

Dr. J. R. Hickerson of Commerce will do the preaching, while Rev. C. O. Huber and wife will have charge of the music. We invite all of our friends of other faiths, as well as those of no profession, to meet with us.

We have secured the very best help possible to lead us in our revival and you will enjoy the good music and the good preaching. Don't miss it.

You are invited.—Geo. A. Dale.

Trustee Elections Are Next Week

Saturday of next week an election will be held in each school district of Lynn county for the purpose of naming district and county school trustees.

In the Tahoka district, there are three trustees to be elected and the names of seven citizens have been filed for the places. They are: Henry Maasen, H. B. McCord, J. B. McPherson, H. B. Howell, H. O. Hargett, J. S. McKaughan, and E. J. Cooper. Three men will be elected, each for a three-year term.

H. B. Howell, J. S. McKaughan, and P. M. Billman are the out-going trustees. Mr. Billman had requested that his name not be placed on the ballot again.

Holder members of the Tahoka board are W. L. Byleson, Dr. L. E. Turrentine, J. O. Tinsley, and Frank Hill.

There are three county board trustees to be elected, and the names of Fritz Speckman, precinct 4; E. D. Ballew, precinct 3; and W. W. Caswell and T. W. Copelin, precinct 2, the latter precinct being the only one in which there is a contest.

Car Registrations Coming In Slowly

With only a week left in which car owners may buy their license plates without paying a penalty, there are yet about two thousand vehicles in the county unregistered, according to A. M. Cade, tax assessor and collector.

Up to last Saturday night, there had been 1025 vehicles registered.

Mr. and Mrs. John Brock of Lubbock spent the week end with Mrs. C. T. Oliver.

E. L. Sikes of Amarillo visited his parents here Wednesday.

Crowds Gathering For All-County Contests

Tahoka plays host today and tomorrow to hundreds of Lynn county school children, teachers, and school patrons, who are here to participate in and attend the annual Lynn county Interscholastic League meet on the local campus.

The meet actually opened last night, but the events which attract the greater crowds are today and tomorrow. Events last night were declamation contests, all classes.

Spelling contests start this morning at 9 o'clock; and Tennis, Tiny Tot story telling, extemporaneous speech, music memory, and Three-R contests at 9; and playground ball at 10:45.

At 2 p. m. will be contests in choral singing, typewriting, story telling, and number sense. And, at 4 p. m. will be held debate finals.

Of special interest is the one-act play contest tonight at 6:30.

Saturday morning will be occupied with track and field preliminaries, junior track events, and volleyball contest.

The senior track and field events begin at 1 p. m. Saturday.

A crowd of two or three thousand people are expected to be present during the various contests.

Awards will be presented all winners, cost of which will be borne by citizens of Tahoka.

Winners of first place in events in most contests advance to the district meet, which will be held at Lubbock next month.

The complete program of events appears in another column of this paper.

Edwards Opens Implement House

A large crowd of farmers attended the open house held by the new firm, Edwards Implement Company, dealers in J. I. Case farm machinery in their new round-top sheet-iron building near the gin district on Highway 84 last Tuesday.

A. P. and A. J. Edwards, owners of the firm, and Clyde Williams, district agent for J. I. Case, were hosts on the occasion.

Lectures on modern farming methods and machinery were given and moving pictures shown. Refreshments were served visitors.

Joe Stokes Pie Supper April 1st

There will be a pie supper at Joe Stokes school house Friday night, April 1, according to Leon Jennings of that community.

Candidates are especially invited to be present.

Nazarene Revival At Grassland

The Church of the Nazarene at Grassland is starting a revival meeting Sunday, March 27, which is expected to continue through April 10, according to Rev. Ferguson, the pastor. Noble E. Berryhill, evangelist, will do the preaching, and M. C. Richey will be in charge of the song services.

Mr. Berryhill is an ex-Marine, having served his country on land and sea in 1927-'29 in the Nicaragua Expeditionary Forces, in which country Uncle Sam's "Devil Dogs" fought General Augusto San Dario and his rebels. He weaves into his Gospel messages thrilling adventures of Marine life that has won for him the title of Marine Evangelist.

W. T. Hanes New Superintendent For 1938-1939

W. T. Hanes, Hermleigh, was unanimously elected superintendent of schools at Tahoka for the year 1938-'39 at a meeting of the school board Tuesday night. He will succeed W. G. Barrett, who was not an applicant for re-election, and who expects to enter the insurance business in another city next summer.

Hanes has been superintendent at Hermleigh, and is reported to have built up a fine school in that little town against odds. He was principal at Littlefield for two years before going to Hermleigh, and before that he was at Whitharral six years, one as principal and five as superintendent. He received his B. S. degree at East Texas Teachers College, Commerce, in which town he was born and raised, and will receive his M. A. degree at Texas Tech in June this year. He has also attended the University of Texas.

Thirty-seven years old, he is married and has one child, a seven-year-old boy.

Mr. Hanes has been teaching for fifteen years, and has had experience coaching all high school sports. He is a member of the Baptist Church, a member of the Snyder Lions Club, and past member of the Littlefield Rotary Club, has served as scoutmaster, and, in fact, is active in all civic work, as well as being recognized as a coming leader in the field of education.

The newly elected superintendent is highly recommended by citizens of Hermleigh, Snyder, Littlefield, Whitharral, and college professors and other educators.

At a meeting of the board last Friday night, Lee Dodson, high school principal, and E. E. Smith, grade school principal, were unanimously re-elected.

Judge Goad Leaves For Convention

Judge P. W. Goad left Wednesday for Brownwood to attend the county judges' and commissioners' convention to be held there Thursday, Friday and Saturday. He planned to stop over in Abilene Wednesday night and catch a few fish.

Commissioner G. W. Small planned to leave this morning (Friday) for the convention.

JONES BREAKS ARM

Jeff Jones received a broken arm when he fell from a well drilling rig about two miles north of town Wednesday afternoon. The broken member, the right forearm, was set by Dr. Prohl.

NOBLE E. BERRYHILL, Who will conduct revival meetings at Grassland Church of Nazarene.

CHARLEY LOCKHART, State Treasurer, who was a visitor in Tahoka Thursday.

State Candidate Tahoka Visitor

Charley Lockhart, state treasurer, was in Tahoka Thursday in the interest of his campaign for re-election. He is well known to a number of Tahoka people, having formerly resided at Snyder and being a brother of Judge G. E. Lockhart.

While here he called on Jess Lockhart and several friends.

Total Is 152,651 County Ginning

Lynn County is the second cotton county in the state of Texas, and leads them all, in West Texas, at least, in amount of lint produced per acre. Lubbock county led the state with 162,448 bales for the 1937 crop, and Lynn raised 152,651, according to the government's final cotton ginning report.

Although some cotton is still being ginned in Lynn county, there will be no further official statistics gathered.

Figures released Monday on the March 1 survey and the acreages for the respective counties follow:

County	Ginnings	Acreage
Bailey	37,310	60,000
Briscoe	11,474	32,000
Castro	6,052	12,000
Crosby	88,189	120,000
Cochran	19,366	60,000
Dawson	110,767	180,000
Dickens	37,290	75,000
Floyd	32,705	89,000
Gaines	9,866	15,200
Garza	32,731	65,000
Hale	49,522	85,000
Hockley	80,448	150,000
Lamb	99,651	175,000
Lubbock	162,448	225,000
LYNN	152,651	165,000
Motley	24,507	55,000
Parmer	10,197	25,000
Scurry	47,174	100,000
Terry	55,751	120,000

Store Is Under New Ownership

W. T. Kidwell, formerly of Rochester, is this week reopening the grocery store he bought last week from Joe Davis. The store, located on the west side of the square, will be known as the O. K. Food Store.

The store has been redecorated and rearranged, and the proprietor asks that the people of Lynn counties come around and get acquainted.

Will Construct Bed For Highway 84 Paving East

Highway 84 in Lynn county from Tahoka east will be improved, the State Highway Commission announced Wednesday, if plans are approved for a WPA project, now pending.

Judge P. W. Goad, in a long-distance telephone conversation with The News from Brownwood, where he is attending the convention of county judges and commissioners, said that as a result of the appropriation, the grade and drainage structures will be built from Tahoka east to the Lynn-Garza county line.

The State Highway Commission has appropriated \$13,012 funds to be supplemented by WPA funds and labor furnished partly by WPA.

Judge Goad and the commissioners court members, together with the aid of Senator G. H. Nelson, have been working on the proposition for many months, and it is hoped that once started, paving of the highway will be carried through to completion.

News of the decision of the highway department to go ahead with this work is cheering to nearly every citizen of Tahoka and Lynn county, as this road is heavily traveled and is sorely needed. As the result of heavy fall and winter traffic the highway is now very rough.

Work is already going forward on straightening and improving the road between Post and Haskell and also between Brownfield and the New Mexico state line, the completion of which will bring this roadway into even more prominence as a trans-state traffic line.

Clean-Up Drive Is April 3 to 10

April 3 to 10 has been designated State Clean-Up Week by proclamation of Gov. James V. Allred, and Tahoka will co-operate with a city-wide clean-up campaign, Mayor Deen Nowlin announces.

People residing in the city limits are requested to gather up their trash and junk and put in sack or other containers in the back alley, and trucks will haul same away at no cost to the individual.

The Clean-Up campaign is made possible in Tahoka by the recent purchase of a site for a dump ground. The city having been without a dump ground for sometime, much junk has accumulated in the city, but Mayor Nowlin says the City Council now hopes to put over a thorough clean-up of the city.

Grounds purchased for a dump-in place, is the old Oliver Todd property three miles north and one-half mile east of town. In order to secure acreage for the dump, it was necessary for the city to buy the entire tract of 200 acres, about 40 or 50 of which will be used for this purpose and the other rented. Cost of the property was only \$12 per acre, or \$2400 for the tract.

The City has been seeking a dump ground site for two or three years without success.

The state-wide clean-up campaign is sponsored by Marvin Halls, state fire insurance commissioner, Dr. George W. Cox, state health officer, and the governor. The aims and accomplishments of the week are "to protect community health, to reduce fire hazards, to create a better home life, to build up pride of ownership, to increase property values, and to beautify communities."

Welcome To Tahoka, Lynn County Interscholastic League Meet Visitors!

News Review of Current Events

WE MUST ARM FOR PEACE

Secretary Hull States America's Foreign Policy . . . Flays World Anarchy and the Rule of Force

This picture, made in an Austrian border town and transmitted by radio photo, shows a contingent of Hitler's troops marching toward Vienna after being landed from airplanes in the country that has now been made a state of the German reich.

Armed Peace; No Alliances

AMERICA must pursue its quest for world peace, but must follow a policy of arming for protection of its rights against "international lawlessness."

Secretary Hull

So declared Secretary of State Cordell Hull in an exposition of America's foreign policy and a discussion of all aspects of the world situation. He spoke at the National Press club in Washington and his address was broadcast over the land and to other nations by radio.

In brief, he set forth a policy of peace, no alliances, collaboration with peaceful nations, military preparedness, and opposition to the "seclusionist" viewpoint.

"It is my considered judgment that, in the present state of world affairs, to do less than is now proposed would lay our country open to unpredictable hazards," he said, referring to the naval expansion program.

"The momentous question," he said, "is whether the doctrine of force shall become enthroned once more and bring in its wake, inexorably, international anarchy and a relapse into barbarism."

Hull expressed "our deep concern over the rising tide of lawlessness, the growing disregard of treaties, the increasing reversion to the use of force, and the numerous other ominous tendencies which are emerging in the sphere of international relations."

His speech abounded with such sharp phrases as "methods of violence," "another dark night of international anarchy," "rule of force," "violators of international decencies," "medieval chaos" and "blind extremism."

He did not refer to any nation by name, but his implication with regard to legal recognition of Austria's absorption by Germany and Japan's expansion in China was clear when he said:

"The catastrophic developments of recent years, the startling events of the past weeks, offer a tragic demonstration of how quickly the contagious scourge of treaty-breaking and armed violence spreads from one region to another."

The secretary came out strongly for an adequate armed force for this country:

"In a world in which the rule of force has not as yet been firmly and surely supplanted by the rule of law, it is the manifest duty of a great nation to maintain armed forces adequate for its national defense."

"No policy would prove more disastrous than for an important nation to fail to arm adequately when international lawlessness is on the rampage."

In the Far East crisis, Hull said, the United States has "consistently collaborated with other peace-seeking nations."

"But there is not a trace of alliance or involvement of any sort."

He disclaimed "the slightest intention to entertain any such notion as the use of American armed forces for 'policing the world.'"

He specifically opposed the proposal the United States retire from the Far East.

The triumph of the "seclusionist viewpoint," he said, "would inescapably carry the whole world back to the conditions of medieval chaos, conditions toward which some parts of both the eastern and the western worlds are already moving."

Mars in the Ascendant

WAR clouds over Europe were growing dense and alarm increasing throughout the world. Securities experienced sharp breaks on the exchanges in America, London, Paris and elsewhere because of the disquieting reports. Cabinets and diplomats everywhere were trying desperately to find a way to peace. The danger seemed to involve at the moment chiefly Czechoslovakia, the civil war in Spain and the renewed quarrel between Poland and Lithuania.

Maxim Litvinoff

Maxim Litvinoff, wise commissar for foreign affairs of Soviet Russia, put forth an invitation to the great powers other than Germany, Italy and Japan to confer on joint action aimed at "checking further development of aggression and eliminating increased danger of a new world massacre." The United States was asked to participate in this action.

France and Russia formally notified Czechoslovakia that they would give that nation armed support against any aggressive action by Germany. Great Britain, while not going so far as this, warned Hitler that it expected him to observe the assurances he had given that he would not attack the Czechs.

Dispatches from Warsaw said more than 100,000 of Russia's paratrooper soldiers had been mobilized and were ready to be flown to Czechoslovakia in case of emergency. Several Russian and French generals hastened to Prague to confer with the Czech military chiefs.

Nazi leaders of the Sudeten Germans in Czechoslovakia boldly warned the Czech parliament that the country had better yield to Hitler, and this demand was strengthened when other large groups of Germans in that country decided to merge with the Sudeten party.

France stood ready to pour troops and armament into Spain to aid the loyalists because of reports that German reinforcements to Franco, whose insurgent forces were pressing rapidly on toward the east coast. Madrid had sent word to Paris that the government could not hold out much longer unless it received help. France called on Britain to join her in an effort to bring about an armistice in Spain during which all foreign troops could be withdrawn, and the British ambassador to Rome was instructed to tell Mussolini that unless he called home his "volunteers" in Spain, Britain would be unable to restrain France from sending troops and munitions across the Pyrenees border to aid the loyalists. The British government has promised naval help to France to keep open her communications in the Mediterranean if she becomes involved with Italy, but the British will keep out of Spain.

Lithuania Alarmed

LITHUANIA and Poland have been in an unofficial state of war for 18 years because of Poland's seizure of Vilna, and a trifling border incident has brought them near to open conflict. Warsaw was on the point of sending an ultimatum to Kaunas, but delayed this on appeal from France and Britain.

The Lith also were afraid that Germany, taking advantage of the general ferment in Europe, would undertake to recover the once German city of Memel, which also is coveted by Poland.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By REV. HAROLD L. LUNDQUIST, Dean of the Moody Bible Institute of Chicago. © Western Newspaper Union.

Lesson for March 27
CORRECTING WRONG IDEAS OF RELIGION

LESSON TEXT—Mark 7:1-13. GOLDEN TEXT—This people honoreth me with their lips, but their heart is far from me. Mark 7:6. PRIMARY TOPIC—At Dinner-Time. JUNIOR TOPIC—What Is Real Religion? INTERMEDIATE AND SENIOR TOPIC—What Counts with God? YOUNG PEOPLE AND ADULT TOPIC—Sidestepping Responsibilities.

The never-ending struggle of Christianity is to keep the simple gospel of the grace of God in Christ Jesus free to operate in all its glory and power, unencumbered by the traditions and formulas of men. It has been my privilege to read a recent book by a brilliant young man who, while serving as a professor of philosophy in a large university, is also versed in the related fields of theology, psychology, psychiatry, and psychotherapy. He has had first-hand experience in dealing with the problems of men and women. With this background of both study and experience he gives it as his absolute conviction that we must get "back to the original simplicity of the Christian gospel." He suggests that we need to "dust off the additions and superstructures" that have been added since Christ came to seek and to save the lost.

Our lesson for today finds Jesus meeting that very issue with the traditionalists of His day.

I. Washed Hands and Unwashed Hands (vv. 1-6).

In the process of interpreting the law of Moses and applying it to the affairs of daily life the religious authorities of Israel had developed a mass of intricate and onerous rules which had literally buried the law itself and had substituted ritualistic formalism for spiritual life. So fond had the scribes and the Pharisees become of these traditions that they became bold enough to declare that they were far superior to the law itself.

Their attack on Jesus because His disciples ate with unwashed hands did not refer to the proper cleansing of one's hands before eating, but to the ceremonial washings which were said to be necessary if one had accidentally touched a Gentile, or something that a Gentile had touched in the market place.

Jesus skillfully and finally disposes of that question by reminding the objectors that they were serving God with their lips only, but their hearts were far from Him. Washed hands are not a thing to be condemned, and Jesus says nothing about that point. When the washing of hands becomes of more importance than the cleansing of the heart, however, the soul is in real danger.

II. Traditions of Man Versus the Commandment of God (vv. 7-13).

Here is the heart of the entire matter, for while we may not always be aware of it the fact is that our anxiety to maintain human tradition which is contrary to the law and Spirit of God is fundamentally for the purpose of evading our full and true responsibility.

The Jew who was so avaricious that he did not wish to support his aged and needy parents could entirely evade that God-given responsibility by declaring that his property was "Corban," dedicated to God. Thereafter no matter how great was the need of his parents they could receive nothing. The execution of this oath was carried out to such a fine point that a son who had declared his property to be "Corban" could visit a sick father or mother for only a brief period lest he might stay long enough to perform some duties of a nurse and so contribute to his parents by saving them some expense.

Thus do men even in our day make "the word of God of none effect" (v. 13), through their traditions. No right minded person objects to the worthy traditions of worship and service which are such a precious heritage of the Christian church. Rightfully apprehended and properly used they are both desirable and helpful. But we must never permit the grace and power of God in Jesus Christ "to be brought under the trammels of human teachers or the arrangements of human office-bearers. The first movement toward the mastery of the soul by tradition is the movement of that soul away from immediate, direct, first-hand fellowship with God" (Morgan).

The crying need of our day, as it was of the time when Jesus was on earth, is that we should clear away hindering encumbrances.

Goodness
The general goodness which is nourished in noble hearts, makes every one think that strength of virtue to be in another whereof they find assured foundation in themselves.—Sir P. Sidney.

Simplicity of Religion
Pure religion and undefiled before God and the Father is this, To visit the fatherless and widows in their affliction, and to keep himself unspotted from the world.—James 1:27.

WHAT to EAT and WHY

C. Houston Goudiss Discusses CARBOHYDRATES and FATS

Foods That Provide Motive Power For the Body Machinery

By C. HOUSTON GOUDISS
6 East 29th St., New York.

THE human body might be compared to a framework filled with machinery. It takes food to build the framework, food to run the machinery and food to keep it working efficiently and this food must be of the proper type.

Last week, I discussed the body building proteins and explained how to distinguish between those which build and repair body tissue, and those that are adequate for maintenance, but not for growth. It is equally important that you should learn something of the fuel foods which are necessary to fire the body engine and furnish motive power to propel the body machinery.

Fuel Foods Keep Us Alive

The body could not function in the absence of fuel foods any more than a machine could run without power, or a car without gas. Every breath requires an expenditure of energy, and so does every movement—from the beating of the heart to the winking of an eye.

Even in repose, the body machinery is kept functioning only by an ever-present supply of fuel. For, as long as life continues—even when you are lying perfectly still—you need fuel to carry on the internal work of the body.

Activity Demands Energy Foods

Every type of daily activity, including work and exercise, requires additional fuel. If you walk slowly, you expend twice as much energy as when you sit still. And when you walk fast, you may use four, five or six times as much energy.

The chief fuel, or energy producing foods, are the carbohydrates—that is, the starches and sugars; and fats. Protein also has some fuel value, but its primary function is to build and repair tissue.

Carbohydrates are quick burning. They might be compared to the flare of a match in a dark room, which gives bright light for an instant, but is soon extinguished. Fat, on the other hand, burns slowly, like a lamp whose wick is turned low.

Danger of Inadequate Fuel Supply
Recently there has been a tendency to minimize the importance of the fats and carbohydrates, due to the craze for dieting. Some of the results of disregarding the absolute necessity for these foods are extreme irritability, and a greater susceptibility to fatigue, nervous diseases, tuberculosis and other infections.

Too Much Fuel Causes Overweight
It is true, however, that an excess of fuel foods will tend to produce overweight. For if we assimilate them,

life, in its higher forms, is impossible. The noted Arctic explorer, Stefansson, found that he could exist satisfactorily on an all-meat diet, provided he ate liberally of fat. On a diet of all lean meat, he became violently ill within a week.

Besides furnishing concentrated energy values, fats help to create the fatty tissue which cushions the nerves and abdominal organs, and forms the pleasing contours of face and figure.

Because it leaves the stomach more slowly than proteins and carbohydrates, fat retards the digestion of these food groups somewhat, and thus gives staying power to a meal. At the same time it promotes the flow of pancreatic juice and bile, thus helping in the assimilation of other foods. Foods rich in fat include butter, cheese, egg yolk, cooking fats and oils, margarine, olives, pastry, peanut butter, most nuts except chestnuts and lichi nuts, various kinds of sausage and fried foods.

Since both carbohydrates and fats are energy foods, one might expect them to play an interchangeable role in the diet. To a certain extent, they do, although fat, being more concentrated, provides two and one-fourth times as much fuel value as an equal weight of carbohydrate.

But because of the variation in the way these materials are handled by the body, it is generally considered that health is best served when 40 to 50 per cent of the total energy value of foods is provided in the form of carbohydrate and 30 to 35 per cent in the form of fats.

Carbohydrates Are Quickest Fuel
Carbohydrates, which originate chiefly in plant life, are readily converted into heat and muscle energy. Foods rich in carbohydrates include bread, potatoes, macaroni, rice, cooked and ready-to-eat cereals, peanuts, dried and preserved fruits, sugars and syrup.

Sugar furnishes heat more quickly and more abundantly than any other food. But it has a tendency to dull the appetite and is also apt to cause fermentation. Therefore, a large measure of our heat and energy is best secured from starchy foods such as bread, cereals, macaroni and potatoes.

Quick energy can also be obtained from the easily digested sugars of fresh and dried fruits, such as prunes, apricots, raisins and fully ripened bananas.

Here is an interesting and important point which is frequently overlooked in unscientific reducing diets. Fat reserves carbohydrates for its proper utilization by the body. That is why women who try to reduce without following a scientifically planned diet frequently become seriously ill as a result of cutting down on carbohydrates while overlooking the fats contained in milk, butter, and other foods.

Relation of Fat To Health
Fats are so necessary to the body economy that it is no exaggeration to say that without fat,

Chewing insects, such as beetles, leave telltale holes in leaves. They are best controlled, according to Harold N. Coulter, vegetable expert of the Ferry Seed Institute, by dusting or spraying plants with arsenicals (poisons with arsenate of lead as a base.)

These arsenicals are known as stomach poisons, for they must be eaten by the insects. Plants attacked by chewing insects include cucumber, squash, other vine crops, mustard, tomato, pepper.

Sucking insects, such as aphids or plant lice, can be detected in small groups on the under surface of the leaves. Control by dusting or spraying nicotine sulphate or pyrethrum directly on the insects. Plants attacked by sucking insects include peas, pepper, cabbage, and crops grown for greens.

Make certain what type pest you are fighting. Buy properly prepared poisons; follow directions.

and do not utilize their potential energy in muscular effort, they will be stored—as fat—usually in most inconvenient locations! On the other hand, an excess of any food is a detriment. Therefore the goal should be enough, but not too much, of all necessary foods.

Anger Destroys Fat Reserves
Experiments have demonstrated why nervous, irritable individuals are usually thin, while those with a serene temperament often accumulate weight. It has been proven that anger and fright increase the amount of fat in the blood and remove a corresponding amount of fat from its usual storage place beneath the skin. A fit of anger may take off more fat than an hour's exercise, or two or three days of enforced diet. Thus the person who allows himself to become upset continually withdraws the fat reserve from his body. Such persons could profit, perhaps, by taking more of the fat-forming foods.

But whether the members of your family are good natured, or irritable, young or old, they need a constant supply of fuel foods—at every meal, every day. Fuel foods produce energy—and energy is the motive power of life and work and thought.

"Home-Wrecking" Qualities of Poor Furniture Polish
How often a houseful of fine furniture and handsome woodwork is spoiled by the use of a poor furniture polish! There are many polishes on the market today—some fair, some good, others excellent for luster and long life of the finish! The best is non-grassy, because made with a fine, light-oil base! In time, furniture and woodwork can be ruined by the persistent application of a cheap, poor polish! Such polish will contain kerosene, harsh abrasives and harmful acids—destructive elements, that are unseen and unsuspected! The housewife may use one of these polishes, feeling that she is economically keeping her furniture polished—but this is poorest economy, if she values her furniture (and what housewife does not?). The furniture in a home constitutes the largest part of the furnishings—and will show up like "sore thumbs" when dried out, cracked or checked. This is just what occurs, when other than a reputable oil polish is used! Too, a quality oil polish is less expensive! Less is used at one time—for it's undiluted. The resultant glow is deeper, richer, more lasting! Best of all, the finish of the furniture and woodwork is properly "fed" and kept in prime condition! So beware of harsh, "bargain" polishes—for through them, the furniture suffers!

TIPS to Gardeners
Vegetable Pests
THERE are two major classifications of insect pests—sucking and chewing.

Chewing insects, such as beetles, leave telltale holes in leaves. They are best controlled, according to Harold N. Coulter, vegetable expert of the Ferry Seed Institute, by dusting or spraying plants with arsenicals (poisons with arsenate of lead as a base.)

These arsenicals are known as stomach poisons, for they must be eaten by the insects. Plants attacked by chewing insects include cucumber, squash, other vine crops, mustard, tomato, pepper.

Sucking insects, such as aphids or plant lice, can be detected in small groups on the under surface of the leaves. Control by dusting or spraying nicotine sulphate or pyrethrum directly on the insects. Plants attacked by sucking insects include peas, pepper, cabbage, and crops grown for greens.

Make certain what type pest you are fighting. Buy properly prepared poisons; follow directions.

Your Food Is Your Fate

THE third of the series of articles entitled "What to Eat and Why," written by C. Houston Goudiss, the eminent food authority, author and radio lecturer, appears in this issue.

In these articles Mr. Goudiss tells how you can be strong, beautiful, wise and rear healthy children by combining the right food materials in the diet. He points out the vast influence which food wields over one's life.

The housewife and mother who desires to know what foods will benefit her family the most will do well to read these articles week by week and make a scrapbook of them for ready reference.

FIVE minus TWO leaves FOUR

WRONG? Well, yes—and no. The arithmetic of your school days taught that if "Mary had five dollars and spent two . . ." three dollars remained. But that is mathematics—not shopping!

In managing a home . . . guarding a limited family income . . . we've simply got to do better than Mary did. We must sharpen our buying wits . . . ascertain where the dollars of extra value lurk . . . take five dollars to town and get much more for the money spent.

Fortunately, there are ever-willing guides right at hand—the advertisements in this newspaper. Advertised merchandise is often exceptional value merchandise. It makes dollars S-T-R-E-T-C-H.

WHEN YOU CLEAN HOUSE USE O-CEDAR—THE POLISH THAT CLEANS AND PRESERVES YOUR FURNITURE

More women use O-Cedar Polish than any other kind—for furniture, woodwork and floors. IT CLEANS as it POLISHES.

O-Cedar POLISH MOPS · WAX

WILLIAM MACLEOD RAINE'S

To Ride the River With

COPYRIGHT WILLIAM MACLEOD RAINE—WNU SERVICE

CHAPTER I

(In the old Western parlance the commendation, "He's a man to ride the river with," was the highest possible praise. It meant that one could be trusted in all emergencies.)

Sun rays were streaming through the mesquite when Ruth rode out of the arroyo. In the light of morning the dust in the air from the desert sand, finer than powdered sugar, gave the atmosphere a faint rose color.

Ruth Chiswick drew a deep breath, almost a sigh. The desert could show its teeth grimly, but it could be poignantly lovely too. This was her country. It held her by a thousand ties, yet she was beginning to be afraid of the ruthlessness that struck at life so savagely. All plant and animal life had its sting. Nothing survived without a struggle. Always the desert fought to destroy.

Ruth was greatly worried. She had gone such a little way in life, was so inexperienced. At the parting of the ways, she did not know what to do. Her problems were two, though they merged into one. That her father lived in constant danger from the lawless rustlers of Tail Holt she knew. He took no precautions. Instead of biding his time until he could crush them he blunted defied and threatened. Some day he would be dry-gulched from the brush.

Though at times there was stormy conflict between father and daughter, the tie which bound them together was very close. To Ruth the peril in which he stood had become an obsession. She must save him at any cost, and she believed she had found the way to do it. That fat slug Sherman Howard was the leader of the outlaws, yet kept within the law himself, as far as she knew. If he gave the word for his men to keep their hands off L. C. stock the rustlers would obey him. No longer would there be cause of strife between these light-fingered riders and Lee Chiswick.

And Sherman Howard had a son who was no fat slug but a dark handsome youth with a merry laugh. Ruth liked Lou Howard very much. He was wild, of course. She did not know him well, and there had been moments when there had flashed out evidence of moral callousness. So it had seemed, but always afterward his warm smile had banished doubts. He had given her to understand that she was the one woman with influence enough to keep him straight, and she was young enough to be attracted by the thought of snatching so good-looking a brand from the burning. There was something romantic about clandestine meetings with the son of the enemy of her house.

She had flirted with a lot of boys in an innocent way, but she did not know anything about love—unless the emotion she felt for Lou Howard came under that category. At times a strange feeling flooded her, almost religious in its intensity, that she had been appointed to save her father by marrying this young man. Lou was in her mind a great deal. She was not sure about him.

The last time they had met he had kissed her. Indignantly she had pushed him away, but afterward—thinking of that ardent embrace alone in her room—she knew her indignation had been a fraud. She had been chary of favors to boys. None of them had ever kissed her like that, with a fire which had stirred in her reluctant response.

A young man rode out of the mesquite and flung up a hand in greeting. She watched him as he cantered forward, flung himself from the saddle, and strode to meet her. A queer little thrill ran through her, and after it a tremor of fear. He was essentially a stranger, as many men are to the girls who marry them, yet it was likely he was going to be the most important person in her life.

"I was afraid you wouldn't come," he said, and kissed her hand.

Ruth took it away, embarrassed. Hand-kissing on the frontier was something alien. "I said I would be here," she reminded him.

"So you did." He looked at her eagerly, boyishly. "Is it going to be yes?"

She nodded. "I think so."

He reached up to help her from the horse, but she shook her head. "No, I can't stay but a minute."

"You can rest your saddle that minute, can't you, honey?"

The girl knew what he wanted, to take her in his arms and make love to her. She discovered that she did not want him to do that—not yet, at least. Until she knew him better she did not want to be kissed, not with urgent passion.

"No, I slipped away, and I have to get back. They'll miss me." She asked, abruptly, a way of color in her cheeks, "Are you sure you still . . . want me?"

"Of course I do." He frowned up at her, irritated. He had ridden 30 miles to meet her and she held him at arm's length. "But get

down and let us talk, Ruth. If we're going to get married—"

"I don't know you, and you don't know me," she interrupted.

"Course I know you," he denied. "You're the prettiest girl in the county. I know all about you, and you know about me. I'm wild about you. What's the sense in sitting up there like—the Queen of Sheba?"

Very likely he was right. Ruth had been brought up in a household of men without the guidance of a mother. She slipped from the saddle and stood beside him.

He took her in his arms and she submitted, withholding herself. Presently she drew back from his embrace. That he was dissatisfied with her lack of response she knew.

"Be patient with me—at first," she begged. "I'm worried, Lou. I

"Some hot on the desert," the storekeeper suggested.

don't know whether what we are going to do is right. I—I—I'm scared."

Promises poured out of him. He would make her happy. He would reconcile their fathers. There would no longer be war on the range. Forgetting all the other girls, he would make her the best husband in the territory. All she had to do was to trust him and he would fix it. She must not worry.

Yet she did worry, even as they made the arrangements for the elopement. The weight was still in her breast as she rode back up the arroyo. The sun was hot in the coppery sky. From the far canyons the mist had vanished. Harsh and forbidding stretched the grim desert, all its sharp teeth showing.

Into Tail Holt, near the close of a hot day, rode a man on a long-barreled roan.

The rider dismounted at a store which carried on the false front a sign, "Yell Sanger, General Merchandise." He dropped the reins at a hitchrack and looked up and down the street to orient himself. Through the hazy amber light of late afternoon he saw Tail Holt drowse in a coma of sunshine. A man was crossing the street from one saloon to another. Otherwise the place appeared to be deserted, except for half a dozen cow-ponies drooping at the hitchrack of Curt Dubbs' Golden Nugget, saloon and gambling shop.

Four saloons, a blacksmith shop, another general store, a Chinese restaurant, a shoemaker's cubby hole, and a public corral were checked off by the stranger. Leisurely he turned and walked with trailing spurs into Sanger's store.

In addition to Sanger, who was a bald-headed little fellow with black ginkale eyes, two cowboys were in the place. They were lounging

against a counter. Conversation ceased at the entrance of the newcomer. All three gazed at him. They saw a crook-nosed man of middle size with a leathery brown face in which were set light gray eyes, from the corners of which radiated many tiny wrinkles. He might be thirty years old, perhaps a year or two less. His movements had a kind of rippling ease and he carried himself with an assurance almost insolent. When he took off his dusty hat he showed a thick head of hair burnt sorrel by a thousand untempered suns. He wore shiny leathers and high-heeled boots, an open vest, no coat. A gun hung low on his thigh, well forward.

A tough hombre, it could be guessed, able to take care of himself in any emergency.

From a throat caked with alkali dust the traveler said hoarsely, "Tomato airtight."

Sanger slashed open a can with a hatchet.

"Some hot on the desert," the storekeeper suggested.

The crook-nosed man drank the juice from the can, then fished out a tomato. "Some," he assented. "I got to thinkin' if Tail Holt was any farther off it must be near somewhere."

Experimentally, one of the cowboys murmured, "You come 'quite a ways'?"

The crook-nosed man looked at him. Apparently this did not call for an answer. "Yes, sir, hot and dry," he drawled, after shifting his gaze to Sanger.

"That's right," the second cowboy agreed. He was a long-legged man with a lank lower jaw.

"Sure is," his companion said. "Well, I'll be moseyin', Mile High."

"Yo tambien, Sid," the tall man concurred promptly, unwinding to his full height. "I'll take a plug of Horse-Shoe, Sanger."

He followed Sid from the building.

"Town kinda quiet," the stranger said.

"Liable to liven up later," Sanger told him.

From where he sat on a counter the man with the sorrel-top could see the two cowboys looking at his horse. Words drifted to him.

"Double cinch—Texas man," Mile High hazarded.

"Yep. No tenderfoot." Sid rolled a cigarette.

"Not none. Plenty tough." The tall man said something more, in a low voice.

Sid laughed, harshly. "I wouldn't know."

They bowlegged across the road to the Golden Nugget.

"Tail Holt takes notice of a stran-

ger," the newcomer mentioned dryly. Sanger did not answer. His small black eyes were taking in with a vast surprise two people who had come into the store.

"Evening, Miss Chiswick—Lou," he greeted them.

The man he had called Lou drew the storekeeper aside for a whispered conference. He was wearing new corduroys, fancy top-boots, an expensive sombrero, and a purple silk shirt around the neck of which was tied loosely a polka-dot bandanna. On his dark, handsome face there was just now a sulky look. In one keen glance the crook-nosed man sized him up as a showy, raffish fellow with no bottom.

The girl held a greater interest. She had, he guessed, an exciting personality. In her dark, stormy eyes was the threat of passion.

" . . . have Spicer meet us at Ma Presnell's boarding-house and do the job . . . want to get to Tough Nut before night."

Gretna Green business, of course. Bad medicine for the girl. Probably she was an undisciplined little devil, but she was too fine of grain for the man with whom she was eloping. Sardonicly Crook-nosed added a stipulation. Very likely he was letting her glamorous, troubled beauty sway his judgment.

"Are you expecting to spend the day here?" she asked her companion, and her voice had in it the ringing sting of a small whiplash.

"I'm fixing things up with Sanger, Ruth," the young man answered irritably. "Can't do it any faster."

The girl did not reply. She brushed back impatiently a tendril that had escaped from the soft waves of dark hair disordered by her long ride.

A fusillade of shots came from the street. The three men moved swiftly to the door. A rider was galloping down the dusty road, revolver in hand, waving a hat in the air.

"Hi-yi! Whoopee! Git outta the way of Wild Jim Pender," he yelled.

"Pender on a drunk again," Sanger said. "He's a terror when he has tanglefoot aboard . . . He's headin' back down the street . . . Lordee, he's comin' in!"

"Hunt cover, Ruth," her young man shouted, and vaulted over a counter. "Back here. Quick."

An arm of the stranger went round the waist of the girl, swept her up the store, and flung her down behind some sacks of potatoes.

The drunken man drove his horse into the store. "Lo, Sanger, you old son-of-a-vinegar, where are you? I want cartridges—pronto."

(TO BE CONTINUED)

Window Washer's Job Is Risky; Worker Can Clean Ten to Fifteen in an Hour

All skyscraper windows aren't "architect's nightmares," and not all window washing is done in sub-freezing weather. Usually the cleaner climbs out on a reasonably wide sill with a rubber squeegee and a wet chamois, snaps his safety belt hooks into the little steel rings the builders put in the window frames for that purpose, and in a few quick swipes is ready to climb back inside and begin all over on the next one.

To hold his job, says a writer in the Washington Star, a window cleaner must keep moving. A good worker can average 10 windows an hour, or 80 a day; the topnotchers even wash 15 windows every hour! For thus risking his life, he may receive from \$36 to \$45 for a 40-hour week, where union wages prevail, and his average age of usefulness in the business runs from about twenty-two to forty.

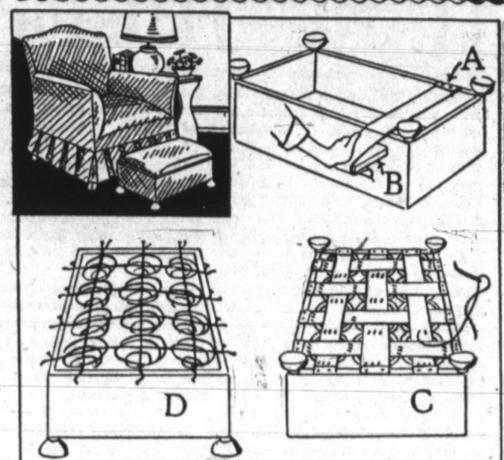

Dangerous? Yes, though most window cleaners seldom think of

that—or they probably wouldn't be window cleaners! Their employers pay as much as a dollar a day to insure each worker's life, and it is the insurance company which does everything humanly possible to make the cleaner's calling a safer one. Inspectors regularly test the metal rings into which the safety belt hooks are fastened. These rust away in old buildings and result in more falls than any other cause.

Sometimes a near-tragedy in a window cleaner's life turns out to be funny. One worker recently got his name in the papers when his safety belt gave way on a third-story window and he fell to the ground without suffering a scratch. He got up, brushed off his clothes, stopped at the office for a new belt and climbed out to finish the window.

A hero? He'd be the last one to think so. To a window cleaner, taking hazardous risks is all in the day's work.

HOW to SEW RUTH WYETH SPEARS

Why Not Fix Those Sagging Springs?

SPRINGS in furniture seldom break. The twine that holds them does break and webbing wears out throwing the springs out of position.

To set the springs you will need a ball of twine and a needle such as used by the upholsterer, enough webbing to replace the old, tacks 3/4-inch long with large heads, a block of wood for stretching the webbing, a tack hammer and a tack lifter. Remove the cover from the seat carefully so that it may either be used again or serve as a pattern. Most of the padding may also be used. Observe how each layer of material is fastened in place, so that you may put it back the same way.

Remove the springs and all old tacks. Tack the first strip of webbing to one edge of the bottom of the frame, letting the end extend 1/2 inch beyond the edge, then fold the end over the first tacks and tack again as at A. Draw the webbing across the frame using the block of wood as a lever to stretch webbing taut as at B. When all the strips have been stretched and tacked across the frame one way, stretch strips of webbing across the other way weaving these over and under the first ones as at C. Now, sew the bottom of each spring to the webbing with the upholsterer's twine and curved needle as shown in this diagram.

Next, turn the frame right side up, drive tacks part way in along the edges; then tie the springs across each way with upholsterer's twine as shown in diagram C. The twine is tied to the tacks and to each spring and regulates the height of the springs—the outside edges usually being lower than the center to make a rounded top. When the springs are regulated evenly, drive the tacks in; then replace burlap or muslin coverings and padding.

Have you seen Mrs. Spears' book SEWING for the home de-

corator? Forty-eight pages of step-by-step directions for making curtains, slip-covers and other household furnishings. It is full of inspiration for homemakers. Readers may secure a copy by sending name and address with 25 cents (coin preferred) to Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Do your children fight against taking a laxative?

Your child's face is a mirror of his feelings! Does it show disgust or pleasure when you give him something to move his bowels?

Next time your children need a laxative give them EX-LAX. It tastes like delicious chocolate—and they'll love it! Yet EX-LAX gives thorough relief from constipation—smoothly, easily, without upsetting little tummies or causing stomach pains.

For over 30 years, EX-LAX has been America's favorite family laxative. Now it has been Scientifically Improved! It's actually better than ever! IT TASTES BETTER than ever, ACTS BETTER than ever—and IS MORE GENTLE than ever.

EX-LAX is as effective for grown-ups as it is for children. 10¢ and 25¢ boxes at your druggist's.

EX-LAX THE ORIGINAL CHOCOLATED LAXATIVE

Ever the Truth What hinders one from speaking the truth, even when one is laughing?

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you avoid these things to you? If your nerves are on edge, try LYDIA E. PINKHAM'S VEGETABLE COMPOUND. It often helps Nature calm quivering nerves. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus bringing the discomforts from the functional disorder which women must endure. Make a note NOW to get a bottle of world-famous Pinkham's Compound today! WITH-OUT FAIL from your druggist—more than a million women have written in letters reporting benefit. Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Without Law In the midst of arms the law is silent.

Do You Sniffle? "2-Drop" Treatment Brings Head Cold Relief

Simply put two drops Penetro Nose Drops in each nostril and breathe relief from stuffed nostrils due to miserable head colds.

Penetro Nose Drops contains ephedrine which helps shrink irritated swollen membranes—allowing more room to breathe, other ingredients help bring relief from miserable, watery head colds.

Start this "2-Drop" treatment now—Get Penetro Nose Drops—25c, 50c, \$1.00—at all druggists.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste Your kidneys help to keep you well by constantly filtering waste matter from the blood. When the kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-wide distress.

Burning, scanty or too frequent urination may be a warning of some kidney or bladder disturbance. You may suffer stinging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes, and nervous, all playing out.

In such cases it is better to rely on a medicine that has won country-wide acclaim than on something less favorably known. Use Doan's Pills. A multitude of grateful people recommend Doan's. Ask your neighbor!

DOAN'S PILLS

A NEW SERIAL BY William MacLeod Raine STARTING IN TODAY'S ISSUE!

Today you'll meet beautiful Ruth Chiswick, living quietly on her father's ranch but destined for the biggest adventure that ever befell a girl! Soon you'll meet the mysterious Jeff Gray, a gallant horseman who appeared from nowhere to become the greatest enigma of modern Arizona. You'll follow Jeff and Ruth with intense interest as they follow an adventure-studded trail to love. You'll be amazed at the undeserved faith Ruth places in this man, a would-be killer, a cattle rustler, an enemy of justice. But in the end, you'll agree "To Ride the River With" is a sensational serial story! START READING IT TODAY!

Riches and Strength

Men seem neither to understand their riches nor their strength; of the former they believe greater things than they should; of the latter much less. Self-reliance and self-denial will teach a man to crawl out of his own cistern, and eat his own sweet bread, and to learn and labor truly to get his living, and carefully to expend the good things committed to his trust.—Bacon.

Lynn County

History

As Revealed by the Files of the Lynn County News of March 28, 1913.

Monday morning September 9th, 1912, the Tahoka high school opened with 153 pupils in attendance and last Friday, March 21 it closed with appropriate exercises and the rendition of the play, "The Merchant of Venice, Up-to-Date," given in the school auditorium on the third floor of the building, at night.

At the finish of this term the school had the largest graduating class it has ever had, three boys and seven girls, as follows:

Messrs. Ruby Wells, Joe Barnes, Elmer Meyers; Misses Nita Bigham, Johnny and Odessa Henderson, Linnie Cowan, Alice McIntyre, Nettie Wells and Celeste Ellis.

Rev. J. A. Vinson, Baptist pastor, presented the class with their diplomas in his usual appropriate manner.

Prof. E. A. White, Supt. of the school, then announced that the play would begin immediately, which announcement was received with great enthusiasm, as there was no way of warming the auditorium. It was uncomfortably cold and the audience would hardly have enjoyed the wait between acts if it had not been for the very excellent piano playing of Miss Nettie Wells, which made the time pass quickly.

Everyone knew their parts and spoke up good and loud so as to be

heard distinctly in the back of the house, and the acting was as natural as life.

H. M. Larkin, manager of the Fair, Squire G. W. Harrison, Attorneys C. H. Cain and G. E. Lockhart all left for Lubbock on the Tuesday morning train. They have a case coming up in district court.

John Thomas, superintendent of the Methodist Sunday School, left on the Monday morning train for Waco, where he goes as a delegate for the Tahoka Sunday Schools, to the 39th annual Texas Sunday School Association.

W. D. Nevels and Jack Blankenship came in on the Monday evening train from Alpine, where Mr. Nevels bought something over 400 head of cattle.

Tuesday, the 18th, the first fire was built under the furnaces at Postex cotton mills in Post City. General Manager Fairbanks says that the first cotton will be run through the mill sometime next week.

Ben King and Perry Clayton started out Tuesday morning on a hog and cattle buying expedition, with the intention of being gone several days.

W. J. Crouch, who lives three miles west of Tahoka, dug up a pile of rocks that looked as though they might have been put there by human hands (arranged in a kind of square) and a foot or more down he found what looked like a human leg or arm bone, which he cleaned off and brought to town. He showed the bone to Uncle Jim Fleming, who promptly pronounced

it the leg bone of an Indian, saying he had seen many such bones in greater or less stages of decay. The bone is on display at the News office. Mr. Crouch later found a skull, but it crumbled when he tried to pick it up.

Dr. L. E. Turrentine was carried to Post City in an auto by J. M. McGill Monday night, and was operated on Tuesday afternoon for appendicitis. Dr. Inmon came through Post City Wednesday and visited him, and received a phone call Thursday morning that the Dr. was getting along very nicely.

Thursday morning we looked out of our office window and saw D. A. Parkhurst packing a pair of prepared paste to paper the pretty house of C. A. Thomas.

Mr. and Mrs. W. A. Yates of Three Lakes community were Tahoka visitors Thursday.

Mrs. Due Rutledge who has been visiting her parents, Mr. and Mrs. S. S. Ramsey of North Tahoka the past several weeks left on the Thursday morning train for her home in Amarillo.

Mr. Paul Gooch and sister Fay spent the week end with James and Bessie Crie. Miss Fleta Randal and Miss Pauline Ramsey spent Saturday night with Miss Bessie.

Ray King who was driving Wednesday morning loaded up the bus with six drummers and when he started the team, the off horse, Dick, gave a lunge that broke the single tree clip, so Ray and Lonnie Bigham tied it up with a string that held until we got down in front of the G. W. Snider residence, when the string broke and Frank, the near horse, hauled the load the balance of the way to the depot, which luckily was not far.

IN THE UNITED STATES DISTRICT COURT IN AND FOR THE WESTERN DISTRICT OF TEXAS—WACO DIVISION.
J. M. Hubbert vs. Temple Trust Company; No. 236—In Equity.

Notice is hereby given that the undersigned has filed his application with the Clerk of the United States District Court in and for the Western District of Texas, Waco Division, for an order authorizing him to sell and convey to W. V. McElroy all of Lots Eleven (11), Twelve (12), Thirteen (13) and Fourteen (14) in Block Thirty-eight (38) of North Tahoka Addition to the town of Tahoka, Lynn County, Texas, together with all improvements thereon situated, and for a consideration of \$4000.00, and of which \$500.00 will be paid in cash, and the balance, \$3500.00 to be evidenced by two notes as follows:

(a) Note No. 1 in the principal sum of \$2333.36; to be executed by said purchaser, payable to the order of the undersigned at his office in the city of Temple, Bell County, Texas, and said note to become due and payable in 120 monthly installments of \$27.09 each, the first installment to become due and payable May 1, 1938, and one each on the first day of each succeeding 119 months, to bear interest from April 1, 1938, at the rate of seven per cent per annum, the interest to become due and payable monthly, and each payment when made to be applied first to the accrued interest on said note, and the balance to the principal, and to provide that failure to pay any monthly installment of principal or interest thereon when due shall at the option of the holder mature said note, and to stipulate for ten per cent additional as attorney's fees.

(b) Note No. 2 in the principal sum of \$1166.64 to be executed by said purchaser, payable to the order of the undersigned at his office in the city of Temple, Bell County, Texas, and said note to become due and payable in 120 monthly installments of \$13.55 each, the first installment to become due and payable on May 1, 1938, and one each on or before the first day of each

succeeding 119 months, to bear interest from April 1, 1938 at the rate of seven per cent per annum, the interest to become due and payable monthly, and each payment when made to be applied first to the accrued interest on said note, and the balance to the principal, and to provide that failure to pay any monthly installment of principal or interest thereon when due shall at the option of the holder mature said note; to stipulate for ten per cent additional as attorney's fees, and said two notes to be secured by vendor's lien and deed of trust lien on the property and premises above described.

Said application will be heard by the Honorable Charles A. Boynton, Judge of said Court, after this notice shall have been published for a period of ten days, and any person interested in said Receivership Estate may contest this application.

WITNESS my hand at Temple, Texas, this 15 day of March, A. D. 1938.

H. C. Glenn, as Receiver for Temple Trust Company, Temple, Texas.

WHICH MEANS
that 12 years from now, the full-powered Westinghouse Economizer Mechanism will only be 2 years old in running time. Let us tell you more about the new Westinghouse—the "savings" refrigerator ever built.

Texas-New Mexico Utilities Company

Don't put up with useless **PAIN**
Get rid of it

When functional pains of menstruation are severe, take **CARDUL**. If it doesn't benefit you, consult a physician. Don't neglect such pains. They depress the tone of the nerves, cause sleeplessness, loss of appetite, wear out your resistance. Get a bottle of Cardul and see whether it will help you, as thousands of women have said it helped them.

Besides easing certain pains, Cardul aids in building up the whole system by helping women to get more strength from their food.

A LOT OF CAR
for a **VERY LOW PRICE**

The Ford effort to make your dollars buy a constantly better car is well illustrated in the Standard Ford V-8.

It has all the basic Ford advantages. It is built on the same chassis as the De Luxe Ford V-8. It gives you a choice of smooth 85-horsepower or 60-horsepower V-8 engines. But it sells at low prices, and includes bumpers, spare tire, cigar lighter, twin horns and other equipment that make it a still bigger bargain.

With the thrifty 60-horsepower engine, the Standard Ford V-8 is priced especially low and gives the greatest gas mileage in Ford history. Hundreds of owners report averages of 22 to 27 miles a gallon—or even more.

Your pocketbook will approve of the Standard Ford in every way. And so will you when you drive it!

All Day Program Starts Building Of Church

(Continued from Page 1) former members and pastors, and friends.

The Church and Finance committee wishes to thank all who have contributed in any way, making it possible for them to build this much needed structure; especially those who have contributed money of any amount.

The names are herewith given of all who have contributed up to the time of going to press with this report, not to advertise our givers, but that copy of this paper be placed in the cornerstone to be preserved. If in the distant future for any reason this stone be removed, these records would be of interest to those who might witness the occasion.

A typewritten copy will be made of other contributors who may contribute before the cornerstone is laid Sunday afternoon and be placed with the parcel.

The committee says "Thank you, one and all, regardless of the amount given!"

- Following are the contributors:

Dogwood Tree Is Traced to the Time of Christ

Although the various dogwoods are sometimes so small that they seem hardly more than a good-sized shrub; they have been known for centuries and their legendary history reaches into Greek mythology, to the Roman empire at the time of Christ and to the folklore of early American Indian tribes. Their slender, twisted branches and unusual four-petaled flowers have seemed to call for explanation and the legends have tried to account for them, writes Paul Davey, tree expert, in the Washington Star.

One of the legends is to the effect that the dogwood, because of the hardness of its wood, was chosen for use in the cross at the crucifixion. The technical name of the tree is Cornus, from the Latin corna, a horn, and refers to the character of the wood. The legend runs that the dogwood was much distressed at being chosen for such a terrible purpose and that the Savior, sensing this feeling, made to the tree this promise:

"Never again shall the dogwood tree grow large enough to be used for a cross. Henceforth it shall be slender and bent and twisted and its blossom shall be in the form of a cross—two long and two short petals and in the center of the outer edge of each petal there shall be nail prints, brown with rust and stained with blood, and the center of the flower will be a crown of thorns."

"All those who see it will remember it was on the dogwood that I was crucified and this tree shall not be mutilated or destroyed, but cherished and protected as a reminder of my agony and death upon the cross."

It is a beautiful way of explaining the peculiarities of the dogwood. History does not bear out the legendary assumption that the cross was made from the wood of the dogwood, but that does not take away from the beauty of the legend.

Eskimo Dog Never Barks but Howls Like a Wolf

Eskimo huskies can withstand any kind of dry cold weather. They can lie out on the snow and ice and sleep with the temperature as low as 50 degrees below zero without danger of frostbite. They will swim in water until a heavy coat of ice forms on their fur. Many times their breath will freeze on their face and it becomes necessary for them to remove the ice with their paws in order to see the trail.

The real Eskimo dog is a slightly modified wolf, states a writer in the Detroit News. A good specimen stands 2 feet 4 inches at the shoulder, measures over 6 feet 6 inches from the tip of the tail and will scale 100 pounds. The hair is thick and straight. The ears are pointed and stand directly up. The large, bushy tail curves completely over onto the back, and is always carried erect. The color is generally tawny, like that of the gray wolf, with no distinctive markings. The Eskimo dog never barks, but howls like a wolf, in a sitting posture with the head upturned. They have a wonderful instinct for finding their way under insurmountable difficulties, and they have often been the means of saving the lives of their masters.

India Wedding Odd Affair

Just think of not being able to tell a wedding from a funeral. What a confusing state of affairs. But that is exactly what would happen if one were traveling in Bengal, in the northeastern part of India, along the road to Mount Everest, asserts a writer in the Washington Star. Almost any day one might meet a procession winding through the hills. In its center some of the marchers would be carrying a bundle suspended from two poles. Such a bundle is wrapped carefully in heavy hangings. Nothing much can be made out about it except that it has the shape of a human body. Naturally, the on-looker, if he is a stranger in the country, thinks it is a corpse. But he is mistaken. It is a bride. In this part of India a bride is wrapped over and over again until not a toe or finger is visible. Thus prepared, she is hung between two poles and carried to the new home, where she and her husband are about to set up housekeeping.

The Silk Industry

China had a monopoly on the silk-worm until 551 A. D. Then some eggs were smuggled out of the country into western Europe in defiance of a 3,000-year-old law, which provided the death penalty for exploiting the worms or the mulberry trees on which they spin their cocoons. Since then the whole world has been wearing silk. France has its own supply of silkworms and exports 300,000 ounces of silkworm eggs every year; silk is an important Japanese export.

The Word Yard

The word yard comes to us from an Anglo-Saxon word, "gyrd," meaning a rod. In ancient times, says London Answers Magazine, the yard was regarded as equal to the circumference of the human body. Then Henry I decreed that it should be the length of his arm. This is interesting when we recall that most of us can measure off a yard of string, etc., by stretching it from our nose to the extreme of one arm fully extended.

Royal Mistery

The eldest son of the king always bears the title of Prince of Wales and ranks next to the king in male precedence, but younger sons of the sovereign, though born princes, have no precedence beyond their near relationship to the king, until a dukedom is conferred upon them, when they become peers of the realm, says London Tit-Bits Magazine. Only the children, the brothers and sisters, the sisters or daughters-in-law, and the uncles and aunts of the king are entitled to be addressed as "Royal Highness." In the past this title has passed on indefinitely to all direct descendants of a king's son. But by the ruling of King George V in 1917, the title is confined to the children and grandchildren of the sovereign. The result will be that certain members of the royal house may in the future be plain Mr. or Miss Windsor.

Cut the Gordian Knot

Alexander Gordius, a peasant, being chosen king of Phrygia, dedicated his wagon to Jupiter, and fastened the yoke to a beam with a rope of bark so ingeniously that no one could untie it. Alexander was told that "whoever undid the knot would reign over the whole East." "Well, then," said the conqueror, "it is thus I perform the task," and so saying, he cut the knot in twain with his sword. Hence, to cut the Gordian knot is to get out of a difficult or awkward position by one decisive step, to solve a problem by a single brilliant stroke.

Costliest Stage Production

"The Miracle," the play which opened at the Century theater in New York city on January 15, 1924, was the costliest production ever presented on the American stage, says Collier's Weekly. Before a ticket was sold for this drama, requiring eight principals and 700 supernumeraries, the entire interior of the gigantic theater, including the seats, was made to resemble the inside of a large Gothic cathedral at a cost of \$400,000.

Porcupine Can Kill Bear

Though it's unusual for a porcupine to kill larger animals, it's by no means rare. Bears have been laid low by the needle-like spines. A porcupine kills only in self-defense. When in danger, it erects its quills which are sometimes 10 inches long. The quills are not shot, but are so loosely attached they come free at the slightest touch, and barbed so that once imbedded in an enemy's flesh they can hardly be removed.

LAMESA POST OFFICE NEARS COMPLETION

Lamesa's new federal building will be dedicated Saturday afternoon from 2:30 to 3:30 o'clock, according to W. E. Smith, local postmaster, who, with several others of the Tahoka office, will attend.

Principal speaker at the dedication will be Karl Crowley of the Postoffice Department, Washington, D. C., and who will likely be a candidate for governor in Texas.

Rev. and Mrs. Ben Hardy visited in Big Spring two or three days this week.

Mrs. Milton Hazelwood and Miss Ailix Weathers visited in Dallas last week end.

DONT SLEEP WHEN GAS PRESSES HEART

If you can't eat or sleep because gas bloats you up try Adlerika. One dose usually relieves stomach gas pressing on heart. Adlerika cleans out BOTH upper and lower bowels.

MRS. HOMER ST. CLAIR HOSTESS TO PARTIES

On Friday night of last week Mrs. Homer St. Clair entertained the Hi-Tension B. Y. P. U. at her home. On Tuesday night of this week she was hostess to the fourteen year old boys' class of the Baptist Sunday School and their girl friends.

Mr. and Mrs. T. M. Dobbins of Roscoe visited Mr. and Mrs. G. M. Stewart the latter part of last week. Mrs. Stewart is their daughter.

Mr. and Mrs. L. M. Harris of Big Spring spent last week end with Mr. and Mrs. J. B. McPherson.

Mrs. J. B. McPherson and children are visiting her mother in Lubbock.

Have you paid up your subscription to the Lynn County News? Only \$1.00 per year in Lynn and adjoining counties. \$1.50 elsewhere.

Speed of Large Rivers Depends Much on Depth

Most large rivers travel at only walking speed. As rivers usually have their sources on very high ground, their velocity is greatest at the beginning of their course, which is for many streams a succession of rapids and waterfalls.

The velocity of falls, which is often enormous, cannot very well be included in any estimate of the velocity of rivers, although the impetus given by rapids, as well as the general inclination of the bed of the stream, has a most important influence on the rate of its current.

But the velocity of a river does not altogether depend on the slope of its bed. Much is owing to its depth and volume, says an authority in the Cleveland Plain Dealer. Most rivers, therefore, flow with varying velocity at different seasons of the year. Furthermore, bends in the course, jutting peaks of rock, or other obstacles, interfere with its speed, so that the water of a river flows at different velocities at different parts of its bed; it moves lower at the bottom than at the surface and at the sides than at the middle.

There is no stream which has a regular current of 30 miles an hour, or even 25 miles an hour. The lower Amazon flows at a rate of three miles an hour. The Mississippi, in its lower course, has a velocity of about three and a half miles an hour. The Congo has for many miles above its mouth a current of about seven miles an hour, the impetus of its great falls extending for a great distance below them. The Nile, similarly influenced, moves for a long distance at nine miles an hour.

Probably the most rapid river in the world, with the exception of some small streams which are nearly torrents or cataracts, is the River Rhone, in France. At some seasons the current of this stream reaches a speed of 40 miles an hour. In the dryer season, however, it drops to a rate of six miles an hour.

Rice Culture in South Result of an Accident

It is regarded as a special virtue to share one's rice in India, and the wasting of even a single grain is a sin in thickly settled districts where poverty is great and food is scarce. Fortunately, it is more expensive to eat polished rice than to leave on the outer coating, because the latter contains food elements that prevent beri-beri, a disease suffered by those whose diet is almost exclusively polished, writes Martha Harmon in the Philadelphia Record.

The ancestor of our modern rice was a grass that grew along the edges of lakes in India, and was similar to a sort found in northern Australia. All Oriental peoples used the seed or grain of this grass, dating back to such ancient times that 3,000 years before the Christian era it was customary for the Chinese emperor and the princes to sow a handful of rice at the beginning of each planting season in honor of the country's chief crop. America's rice fields are the result of an accident. After failure at rice raising in this country, it happened that a ship from Madagascar put into Charleston, S. C., harbor to escape a storm late one winter day in 1694. The colonists were friendly and when the ship departed the captain showed his appreciation by presenting the governor with a sack of seed rice. And from this accidental start, rice culture in the American colonies spread through the South.

Many Are Planting Trees And Shrubs

Many home owners in Tahoka and over Lynn county have been beautifying their premises this winter and spring by planting trees, shrubs, and other plants.

This week the local home demonstration club conducted a survey of new planting in Tahoka, and two of the women making the survey, Mrs. Jack Corley and Mrs. W. S. Anglin, found that 8,008 plants had been set out. And, they were not, of course able to list them all.

METHODIST MISSIONARY MEETS WITH MRS. WEATHERS

The Missionary Society met with Mrs. Larkin Weathers Monday afternoon at 3 p. m. with eleven present.

Mrs. G. M. Stewart directed the study of the first chapter of "Rebuild Rural America." The women present declared that they found this subject more interesting than they had expected.

Next Monday we will study chapters two and three in the home of Mrs. Harley Henderson.

We are expecting more of the ladies to take part in this study. You will miss something worth-while if you are not present.

After the study hour we enjoyed the social half hour during which time the hostess served strawberry short cake.

DRAW CHURCH WILL HOLD MEMORIAL SERVICES

The Draw Methodist Missionary Society will hold memorial services next Monday afternoon for the mothers buried in the Draw cemetery. After the services at the church they will go to the cemetery for services there. The program will begin at 1:30. Everyone invited.

California Readers Write News Of Recent Flood

Two weeks ago The News suggested that some of our readers living in California write us in regard to the recent floods in that state. This week we are publishing accounts of the flood by B. T. Smith and Mrs. Ben Hur Lawson, both known here.

By B. T. Smith
6130, Gallant St, Bell Gardens Calif.
If anyone is dissatisfied with living on the Texas Plains, he should have been here for the last month. It had been raining for over a month and the climax came on March 2nd. During the twenty-four hours ending on the afternoon of the 2nd, there fell as much as ten inches of rain in many parts of the city and surrounding territory. The rivers and storm drains would not carry all the water on its mad rush toward the ocean.
For some time during the evening of March 2nd there were no lights, telephone, street car, or bus service. All the stores were closed and people advised to stay out of the down town districts. Hundreds of cars were stalled in the low pla-

ces while trying to go through water. Some were later washed into the rivers.

Bell Gardens is a part of Los Angeles that has 12,500 population. It lies between the Los Angeles and Rio Hondo streams. The entire population evacuated in less than an hour's time.

About six p. m. police cars equipped with loud speakers began running up and down the streets telling everyone to get out from between the rivers as soon as possible. In less than one hour, the entire population had crossed the rivers for higher ground.

It was quite a sight to see people rushing around in a downpour of rain gathering up a few belongings and taking to the road. There was a chain of cars crossing every bridge for some time. When an automobile would stall it would be pushed to one side and the occupants would climb in or on the next one along.

About 8 p. m. the bridges began to go, and by 10:00 only two bridges were left on the Los Angeles River from Los Angeles to the Ocean near Long Beach, and these bridges were marked with a temporary highway department sign, "Unsafe, Cross at Your Own Risk."

I drove my car across a bridge while the tops of the waves were dashing over the floor; just a short while later it broke, first in the middle and then at each end, and started a trip down the river.

Most of the people, or at least quite a number of those who lost their lives were not those who lived in the flooded districts but people who came down from the high places to see the sights and were trapped.

In the rivers, pieces of houses, trees, etc., could be seen being washed along. Two of my friends went out on a bridge near Long Beach to watch the angry water as it tore along below. Without a second's warning, the bridge gave way and was washed into the ocean.

Miles of railway and highway were washed away or damaged to such an extent that no travel could be made over them until repairs were made. From South Gate to Anaheim, a distance of only a few miles, four bridges on this line were washed away.

The rain seems to be over and pretty days are here again. Thousands of men are put to work building bridges, highways, and cleaning up the city.

Many of the buildings that were washed into the river and to the ocean were later washed back up on the beaches near Long Beach. In order to clean up the beaches, people were invited to haul the lumber away and load after load was hauled away by anyone who could get a truck or trailer. The beaches and river banks were combed for several days for valuable merchandise that had been washed from some place up the river.

Some comical situations and sights turned up even during the worst of the flood. A man insisted on driving his boat into some of the automobile service stations and asking for service. An old tall sedan was seen leaving Bell Gardens loaded with a dog on each running board and a goat tied on top. Maybe the real estate dealers did not realize the full truth of their statement when they put this sign up on a newly divided tract: "Plenty of Cheap Water." For several days only the top of the sign and the above words were visible.

FLOOD OVERPLAYED IN NORTH LOS ANGELES

By Mrs. Ben Hur Lawson
4229 Normal Ave., Los Angeles
Since you asked a few words from one of us living in Los Angeles, I am only too glad to write that we are safe and were not in any flooded area.

When Women Need Cardui

If you seem to have lost some of your strength you had for your favorite activities, or for your housework . . . and care less about your meals . . . and suffer severe discomfort at certain times, try Cardui! Thousands and thousands of women say it has helped them. By increasing the appetite, improving digestion, Cardui helps you to get more nourishment. As strength returns, unnecessary functional aches, pains and nervousness just seem to go away.

I have seen more water fall in one day during a Texas rain-storm than fell in three days here. But the city was not prepared or built to take care of such a rainstorm. This was just another unusual weather condition, for which Los Angeles is noted.

Since we live in Northwest Los Angeles or Hollywood, we were not in the area flooded by the Los Angeles River and the Tujunga Wash. The Hollywood hills range between us and the river and wash.

North of Hollywood hills in North Hollywood, where the Tujunga Wash broke over a man-made dam to run its old way, flooded all Tujunga Wash was, in the first house in its path.

The house I saw upside in the place, built too near the wash bank. The houses destroyed—few compared to the population of the city—were built on a hillside without proper foundation, or on the bank of the river or washes (as they are called). This soil seems to crumble and melt away when wet.

Small damage was done to nearly every house with a basement. The sewage could not carry the on-rush of water fast enough to keep water out of the basements.

Great damage was done to highways, bridges, railroads, mountain

When You Need a Laxative

Thousands of men and women know how wise it is to take Black-Draught at the first sign of constipation. They like the refreshing relief it brings. They know its timely use may save them from feeling badly and possibly losing time at work from sickness brought on by constipation.

If you have to take a laxative occasionally, you can rely on **BLACK-DRAUGHT** A GOOD LAXATIVE

Rev. J. N. Hester of Southland and Methodist pastor at New Lynn, Click of Clyde doing the preaching. The public generally, is invited to attend.

Bread and Milk are the foods boys and girls need in the largest amounts

BREAD BUILDS WINNERS. It supplies the PEP and ENERGY they all must have to compete successfully against the gang. It gives them STRENGTH and ENDURANCE. For bread furnishes the valuable PROTEINS that are needed to GROW ON . . . to REPAIR tired, worn out tissues . . . and to develop important organs. Bread helps to fight off fatigue and to develop strong sound bodies. According to leading authorities, bread is an almost ideal combination of body-building protein and energy-giving carbohydrates. It is easily digested by children and sustains energy over many hours. As a matter of fact, no other common food except sugar is MORE QUICKLY digested than bread. It leaves no waste—nothing to harm or upset young digestive systems. Because bread provides so much needed energy for action and so many other important elements for growth, it can well make up at least ONE FOURTH of the food children eat every day. There is no BETTER or CHEAPER way of giving growing children the things their bodies need in greatest amounts: a good source of food energy and muscle-building protein.

Baby Chick! Biggest cheap sale! Very lowest greatly reduced prices. Write for prices. Bremer Hatchery, La Grange, Tex.

AROUND THE HOUSE

Setting Gelatine.—Gelatine salads and desserts will jell faster in metal molds than in enamel, earthenware or glass molds.

When Cooking Cheese.—In cooking anything with cheese use a low temperature, because intense heat makes cheese tough and stringy.

Sugaring Doughnuts.—To dust doughnuts with sugar place the sugar in a paper sack and put in six doughnuts at a time. Hold the top of the sack together and shake it. The doughnuts will then be quickly coated with sugar.

2 Steps in Fighting Discomfort of COLDS

All it usually costs to relieve the misery of a cold today—in 3¢ to 5¢—relief for the period of your cold 15¢ to 25¢. Hence no family need neglect even minor head colds.

Here is what to do: Take two BAYER tablets when you feel a cold coming on — with a full glass of water. Then repeat, if necessary, according to directions in each package. Relief comes rapidly.

The Bayer method of relief is the way many doctors now approve. You take Bayer Aspirin for relief — then if you are not improved promptly, you call the family doctor.

15¢ FOR 12 TABLETS 2 FULL DOZEN 25¢ Virtually 1 cent a tablet

Two Extremes Some men are so covetous as if they were to live forever; and others so profuse, as if they were to die the next moment.—Aristotle.

FOR CUTS MOROLINE Large 5¢ Small 10¢

Bound Friends There is no more sure tie between friends than when they are united in their objects and wishes.

ARE YOUR NERVES ON EDGE?

Waco, Texas.—Mrs. Fred Fanning, 1603 Franklin Ave., says: "My nerves were on edge and I was weak and upset. I had no appetite and was so miserable. After taking Dr. Pierce's Favorite Prescription I was able to eat, gained weight, my nerves were better, and I looked and felt better in every way. Ask your druggist for it today."

Where Command is Due Command your servants, that is, those who owe you obedience (not others).

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"Why Kidnap Me?"

By FLOYD GIBBONS
Famous Headline Hunter

HELLO EVERYBODY:

Here's a mystery. Why was Sam Wolf kidnaped? That question puzzled Sam himself. It puzzled me, too. Maybe it will make you wonder a bit. We all know why most kidnapers commit their dirty crimes. They do it for money—for ransom. Once in a while a man is kidnaped for revenge, or to keep him from telling what he knows. But Sam didn't fit into any of these pictures. He wasn't rich. There wasn't anybody he knew of who was looking for revenge. And he didn't know anything that anyone would be interested in keeping quiet.

But just the same Sam was kidnaped. Sam lives in Brooklyn, N. Y. One August day in 1934, something went wrong with his lucky star.

Sam is a truckman, and on that August day he was working as usual. It was about 1 o'clock in the afternoon, and his truck was parked at the curb in mid-town Manhattan. As he sat there in the driver's seat a young man came over to him.

The young fellow was in his early twenties and neatly dressed. He said he had a job that he wanted Sam to do. That job was to pick up three trunks at a house on West Eighteenth street and deliver them to the Pennsylvania station.

Just a Job of Trucking.

The young fellow looked all right to Sam, and there was no reason why he should suspect anything. Sam didn't have any large amount of money on him, and there was no other reason he could think of why anyone should want to harm him. In fact, Sam didn't think about the matter at all. It was just another job and he went about it as he'd go about any other.

The young lad asked Sam his price and Sam told him it would be three bucks. The young fellow said, "All right," and they started off. They got to the Eighteenth street address, which proved to be a furnished house, and both of them went inside. As they entered Sam went first and the young fellow followed. They climbed a flight of stairs and turned into one of the rooms on the second

The Man Pointed a Gun at Sam.

floor. As Sam went in—the door closed behind him. Then, out from behind that door stepped a masked man, a slouch hat pulled down over the upper part of his face, pointing an automatic pistol.

Tied Him Up but Wouldn't Explain.

The man pressed the gun against Sam's side. He told Sam to keep quiet. The pair of them—the masked man and the young fellow who had hired him to move trunks—began tying him up. They bound his hands and feet with wire—put a towel over his mouth. Then the masked man went out, leaving the young fellow to stand guard over their prisoner.

It was all too much for Sam. What did these birds want? Did they expect to get any money out of him? Then they were going to be disappointed. Sam didn't have any great amount of money—not enough, anyway, to pay a gang of kidnapers for the terrible risk they were taking. Did they have the wrong man? Well, that might be a possibility.

He tried to talk to his captor. The young fellow wasn't very communicative. When Sam suggested they had the wrong man he smiled in a way that suggested that he knew what he was doing. Sam discarded that "wrong man" theory. An hour dragged by, and Sam began to wonder again.

All sorts of questions filled his mind. It wasn't alone the problem of why they wanted him. There was also the question of what they might do with him. He began to wonder if his family would next hear of him when he was dragged out of the river, or his body found, stuffed in a trunk, on a dump somewhere on the outskirts of the city. Such things have happened. Sam had never thought of them happening to him. But now he was beginning to.

Wanted His Truck for a Robbery.

Another hour passed. The young lad who was guarding him was decent enough. He kept his gun out and pointed at Sam, but he didn't harm him. Once he even lit a cigarette and held it to Sam's lips so he could have a smoke. Sam felt a little better after that.

A third hour passed. Then the other man came back. The two of them began to untie Sam. When they had taken the wire from his hands and feet they told him to lie down on the bed for ten minutes. After that they went out, locking the door behind them.

As soon as their footsteps had died away Sam was on his feet, banging on the door. After a few minutes the landlady came and let him out. He left that house and walked down the street, still puzzled about the strange adventure that had befallen him. He went to the police station to report the loss of his truck—and there he got the answer to his mystery.

It was the simplest thing in the world. That pair of crooks just wanted to rob a dress goods house down on Bleecker street. And they had held Sam a prisoner so he wouldn't report its loss until after they had finished the job. The cops found his truck the next morning, abandoned down on Delancey street.

Basilisk Lizards Are Jumpers

Four species of basilisk lizards abound in and near Central America, but are nowhere else. They range in length from a few inches to three feet. Most of their lives are spent in trees along rivers. Great climbers and jumpers, they do not hesitate to dive from a lofty tree into the water. So swiftly do they run on their hind legs that they can "run" across streams. And they can stop so abruptly human eyes cannot follow them.

The Pyramid at Gizeh

The great pyramid at Gizeh is 481½ feet high, with a width of each side at the base of 755½ feet. The sloping sides rise at an angle of 51 degrees 50 minutes and have a slant height of 568 feet.

The Texas Panhandle

The Texas Panhandle is the comparatively narrow part of the state projecting away from the main part of the state in the extreme southwest, somewhat resembling the handle of a pan.

From Forest to Fireside

Since the ancient Egyptians, centuries before Christ, wove, pounded and polished reeds to make sheets of papyrus, paper has been made of vegetable substances. From about 1880, the most prolific source of paper for printing has been the American forests of conifers, the spruce being the most important tree for this purpose. Virtually all newspapers are printed on paper made from a mixture of ground and chemically digested wood.

Gross and Tare

Gross weight of goods is the total weight as shipped or packed, with no deduction for weight of container, waste, etc. Tare is an allowance of weight made to a purchaser by deduction of the weight of the container.

Raven Was Held Sacred

In ancient Greece and Italy the raven was sacred to Apollo and the Roman augurs pretended to be able to forecast the future from its manner of flight.

New Slenderizing Dresses

IF YOU'RE in the size-34-and-up class, here are three brand new fashions designed especially for you! Everyone of them is extremely smart and everyone is designed to give added charm and dignity to full figures. They are easy to make. The patterns are carefully planned to help beginners, and each is accompanied by a detailed sew chart. So start in tomorrow, and have at least two of them ready for Easter.

Princess House Dress.

It's a sure way to start the day right, having a dress as becoming and pretty as this one to put on first thing in the morning. It takes a woman with some plumpness-to-do justice to that fitted, long line. Made up in printed percale, gingham, or chambray, with rows of ricrac braid, this dress will be so successful that you'll use the pattern time and again.

Graceful Afternoon Frock.

An especially charming style for luncheons, bridge parties and club meetings. The full sleeves make your arms look small, and are very graceful in themselves. Gathers at the shoulders create necessary bust fullness. Make this dress for now in silk print or chiffon. Later on, in voile or summer sheer it will be your coolest dress.

Dress With Lengthening Panels.

The plain neckline, the slim waist, snugged in by gathers, the long panel, front and back, are all beautifully slimming in effect. All in all, this dress is so smart that it's certain to be one of your favorites. This design adapts itself

to so many materials—silk crepe, small-figured silk print and, later on, linen.

The Patterns.

1485 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 36 requires 4½ yards of 39-inch material, with 3½ yards of braid for trimming.

1233 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 36 requires 5½ yards of 39-inch material.

1482 is designed for sizes 32, 34, 36, 38, 40, 42, 44. Size 34 requires 4 yards of 39-inch material, with short sleeves. With long sleeves, 4½ yards.

Spring-Summer Pattern Book.

Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Advertised BARGAINS

Our readers should always remember that our community merchants cannot afford to advertise a bargain unless it is a real bargain. They do advertise bargains and such advertising means money saving to the people of the community.

"SNUGGLES DOWN IN THE PAPER —SMOKES TASTY AND COOL"

says Jimmy Bateman, praising this fast-rolling, mellow "makin's" tobacco . . .

70 fine roll-your-own cigarettes in every 2-oz. tin of Prince Albert.

THERE'S NO TIME in a busy newspaper press-room to fool around with slow-rolling "makin's" tobacco that spills all over. Pressmen want to twirl their "makin's" smokes fast—but trim and neat, too. And their smokes have got to be full-bodied and tasty, yet mild! Bob Etter, Jimmy Bateman, and Joe Brown check on things they roll up Prince Albert "makin's" cigarettes. P. A.'s the favorite, all right. (That's what pipe-smokers say too!)

PRINCE ALBERT
THE NATIONAL JOY SMOKE

Maasen Produce Program Today

Maasen Produce will have its formal opening in its new quarters this afternoon, March 25, at 2:30 p. m. Mr. Maasen will occupy the building just north of his present location which has just been completed for him by the McCormack heirs. It is a modern building with a beautiful blue construction glass front, as are all the McCormack buildings on the block.

H. A. Maasen, proprietor, states that he intends to keep the inside as neat as the outside. He will give his customers the same efficient service that he has in the past. He will start doing business in his new location next Monday. He has been in the produce business at various intervals since 1928, and has been in his present location since 1935.

On Friday, the meeting will be opened with the serving of chicken salad sandwiches, coffee and cold drinks. Mr. Maasen says that the chicken salad will be made of pure chicken meat from poultry he has fattened himself, and he promises that it will be delicious.

At 4:00 M. G. Peferon, assistant professor in the Department of Dairy Manufactures, Texas Tech, will lecture on the care of cream. This lecture will be of particular interest to those farmers who sell cream and wish to get the highest available prices.

This will be followed by a moving picture and accompanying lecture on the care of poultry given by W. H. Cowan of General Mills poultry experimental farm, Kansas City.

Probably nothing of the exact nature of this opening has ever been done in Tahoka, and Mr. Maasen is doing his best to help his customers produce superior products.

New Paper Issued At O'Donnell

The News belatedly salutes the new newspaper at O'Donnell. The O'Donnell Press, which made its appearance two weeks ago. The paper is newsy, well printed and a credit to our neighboring city to the south.

Messrs. William G. Forey and F. E. Forey, brothers, are editors and proprietors of the paper, bringing their plant from Haskell, where for three years they published the Haskell County Leader.

G. D. Holbrook, Deputy Superintendent of Public Instruction of Texas, visited all of the affiliated schools of the county Wednesday.

Mr. and Mrs. Edgar Edwards of Shallowater visited relatives here over the week end.

Mr. and Mrs. Harold Edwards visited in Borger three or four days last week.

Mrs. H. A. Maasen is suffering from a badly sprained ankle.

ODD STATUTES ARE DUG UP FROM PAST

Churchgoers Compelled by Law to Pack Guns!

St. Louis.—In Winchester, Mass., a young girl may not be allowed to dance on a tight rope except in a church, and in Waterloo, Neb., it is illegal for any barber to eat onions between 7 a. m. and 7 p. m.

These are some of more than 2,000 odd laws unearthed as a hobby by Lyman E. Cook, thirty-four-year-old St. Louis attorney. The law which started Cook on his hobby four years ago, he said in an interview, was a South Carolina statute "passed at a time when your gun was your best friend," which states: "It is against the law to attend church in South Carolina without carrying your gun."

Tail Light for Dogs.

Some of the other laws Cook unearthed were:

In Milwaukee an ordinance forbids anyone to let his car stand in the street more than two hours unless a horse is hitched to it.

An ordinance in Berea, Ohio, states that any animal on the street after dark shall prominently display a red tail light, including dogs.

Monroe, Utah, passed an ordinance which requires that daylight be seen between dancing couples.

Pity the poor swain in Maryland who visits the home of his girl friend six times, because Maryland law says that this is equivalent to a proposal of marriage.

A Nottingham, Md., ordinance decrees that pigs must be allowed to roam loose between March 1 and October 20.

The Ohio general code provides that a person lynched by a mob may recover from the county in which such lynching occurred a sum of not more than \$500.

The California state code declares it a misdemeanor to shoot at any kind of game, bird or mammal—except a whale—from an automobile or airplane.

Self-Murder Charged!

Some of the cases that Cook has found are even more astounding than the laws. For instance:

The case of a man who was convicted in 1839 in France of murder and sentenced to death, the sentence later being commuted to life imprisonment. After he had spent 21 years in solitary confinement, it was discovered that the person he had been charged with murdering was himself.

Fitting punishment for any writer was the sentence of a Russian court in 1819 on an author convicted of libel. He was sentenced to eat his own words, page by page. It took three days to complete the sentence.

In Falaise, France, during the year 1936 a pig trampled an infant. The pig was tried and convicted of murder and sentenced to be executed in men's clothing.

Here in St. Louis, Mo., a man was tried and convicted of the murder of his stepfather in 1809. After he had been hanged it was discovered that one of the jurors did not understand or speak a word of English.

Seagraves Organizes New Rotary Club

A charter will be presented to a new Rotary Club at Seagraves on Tuesday night, March 29, the organization of the club being sponsored by the Midland club. Four members from each club in this area are being invited to the charter night program.

Leonard Craft of the Tahoka club has been invited to appear on the program, talking on the subject "What Will Seagraves Get Out of Rotary?"

Organization of the club at Seagraves gives practically every town on the South Plains of 1,000 or more a Rotary Club.

Mmes. W. M. Harris and Carl Grifling visited friends in Sweetwater Thursday.

SILK THREAD LINKS AMERICA TO ORIENT

Important Item in Commerce of United States.

Washington, D. C.—The nation's capital recently was invaded in a far-flung skirmish of the Sino-Japanese conflict—skirmishers being mainly women in what might be called the "Battle of the Boycott." Advocating a boycott of Japanese silk, Washington debutantes staged a testine style show entitled "Life Without Silk," demonstrating fashions in cotton and rayon. On the same day, an anti-boycott delegation of Philadelphia silk mill workers paraded in the capital, pleading "Buy silk and save our jobs."

"Whichever view the public holds on the boycott, it has suddenly realized that silk, even in the typically American manufactures of sheer hose or pink and lacy underwear, has an exotic international background," says the National Geographic society.

"In a representative year, 1935, to keep American silk mills rolling and American shoppers silken-clad, the United States imported raw silk, in skeins reeled from the silkworm's cocoon, from five countries: Japan, China, Italy, Switzerland, and Palestine. Other silk producing countries are France, Hungary, Greece, Turkey, Spain, India, and Syria. The United States is the world's largest silk importer.

Undressing the Dead.

"This vast international commerce is supported by a thread—a gossamer filament of super-spiderweb fragility, so light-as-air that one pound of it would reach 900 miles. It is obtained by undressing the dead silkworm—unraveling the cocoon which he has patiently spun as a dressing gown to lounge in until the worm turns into a moth and his wings are ready for public appearance. For the silkworm isn't really a worm at all, but a baby moth, a scion of the ancient and honorable family of insects.

"To mistake his identity is natural, for the silkworm comes from a long line of insect magicians. As a climax to his silk-spinning stunt—which is far more astounding than lifting rabbits out of a hat—he can perform the famous 'hidden wing' trick which is a specialty of his family: as a mere hairless cream-colored caterpillar he enters a cocoon with nothing up his sleeve, then emerges as an ashy white moth with a pair of antennae, two pairs of wings, and three pairs of legs.

"Secret of success in the silk industry is to stop his stunt midway. If the silkworm moth is allowed to escape from his cocoon, the thread is broken and the silk almost useless. So he is drowned in boiling water as soon as his silk is spun.

"To most insects, man's reactions are mainly on the angry side, ranging from irritation to murder. Only the bee and the silkworm have been domesticated, and it is hardly his tender bond of friendship with the human race for which the bee is famous. The silkworm, on the other hand, is an honored guest in the home of man, born and bred under the same roof, fed by human hands on his favorite food, and finally he monopolizes his host's attention for constant feeding during 20 hours a day. Then he rewards this hospitality by giving away the very shirt off his back—in other words, his cocoon.

Japan Produces Most.

"In Japan, where three-fourths of the world's raw silk is produced, the silkworm is the most valuable live stock.

"Silkworm culture was kidnapped from China many centuries ago, according to tradition. Each cocoon is about the size and shape of a big peanut shell. It consists of a single continuous thread of silk from 500 to 1,300 yards long.

"The one-worm-power silk mill whose output surpasses man's cleverest imitations starts life in a pink egg which turns gray before it hatches and is so small that it needs the added weight of about 39,999 brother eggs to tip the scales at one ounce. The 'worm' is hatched in an incubator, appearing as a tiny larva no fatter than hairs. Immediately a banquet of mulberry leaves is spread over the wicker tray in which the tiny forms wiggle, and the ravenous munching of invisible jaws is audible.

"After five days of continuous nibbling, the silkworm finds his interior a little too large for his exterior, and seeks the anaesthesia of sleep for his growing pains. During the nap his skin cracks neatly down the back, and he backs out of his discarded jacket and orders a double portion of mulberry leaves. On the sixth, twelfth, eighteenth, and twenty-sixth days of his existence he brings out a new edition of himself. For a final snack before he begins spinning, he devours 20 times his own weight in mulberry leaves."

Youth Depends on Bees to Pay College Tuition

Jackson, Mich.—Swarms of buzzing bees are paying for the higher education of Floyd Soper, sixteen-year-old Jackson high school student.

He expects to have \$1,000 drawn from his hives in sale of honey before he enters college. He became an apiarist in 1933, buying a swarm of bees for a dollar, and now has 20 hives.

Lynn Is Leader In Lint Per Acre

C. A. Thomas and several others have this week called our attention to a news story published in the Lubbock Avalanche and Journal by Charlie Guy and cohorts, in which story some cotton statistics are produced.

The Lubbock papers have been saying much about Lubbock county's gigantic cotton crop, and their crop is worthy of note, but many of the folks who read that paper think that Lubbock may be showing a little too much braggadocio (is that the way to spell it Shalley?)

Lubbock, Lynn, Dawson, Lamb, and other Plains counties have made the world sit up and take notice. This area in 1937 produced over a million bales of cotton.

But, C. A. and the rest of we Lynn county folk still maintain that old Lynn has just harvested the greatest cotton crop any Plains county ever harvested or possibly ever will harvest again.

By Charlie's own figures (or possibly they were those of J. Sam Lewis), Lubbock county produced 162,448 bales of cotton on 225,000 acres, while Lynn produced 152,651 bales on 165,000 acres. Therefore, the yield per acre in Lubbock county was 315.2 pounds per acre, while in Lynn county the lint yield per acre was 462.5 pounds.

Possible these acreage estimates are a little low, but the proportion is probably somewhere near the same. And old Lynn has 110 sections in one big ranch, and about 75 sections in four or five other ranches. Can Lubbock compete with that?

Subscription paying time is here!

Negro Ball Team Will Play Sunday

Tahoka Tigers and Big Spring Sea Cats, negro baseball teams, will fight it out on the baseball diamond west of the high school here Sunday afternoon at 3:30, Dave Washington, local manager announces.

The local "gentlemen of color" have played two games at James winning one 6 to 4 and tying the other 4-4.

DELEGATION ATTENDS PLAINVIEW MEETING

Rev. and Mrs. Geo. A. Dale, Mr. and Mrs. A. J. Mullins, W. A. Reddell, K. R. Durham, Mrs. H. B. Howell and Misses Mary and Margaret Preston attended the associational meeting of the Baptist B. T. U. Sunday School and W. M. U. at Plainview Wednesday, Rev. and Mrs. Dale and Miss Margaret Preston stayed over for the Thursday session. Rev. Dale is president of the Associational B. T. U.

Among the beautiful hedges in town is that of Mrs. L. C. Haney, a hedge of lilacs, which is blooming profusely. Also of note are the red-buds in bloom at various homes.
