Every day you "swap" cows' feed for milk. And you know best that the value of any feed is determined by the amount of milk it will make your cows produce.

And that's why Purina Cow Chow stands out as a good buy...for on the Purina Plan one gallon of Cow Chow ration—with roughage—will make one or more gallons of milk.

Figure it out ... that's about 43c worth of milk from about 20c worth of

Cow Chow: proof that Purina Cow Chow offers you top profit opportunities.

Compare your present feed to Cow Chow for results. Perhaps, you, too, should "swap."
